Driving Direct CP Issuance

E-FINANCE

Driving Direct CP Issuance New Product Lets Issuers Build Real-Time Market Picture

By Susan Kelly

Last December, Julie Nickoley, senior manager of commercial paper operations at DaimlerChrysler, agreed to work with Prescient Markets to develop a Web-based subscription technology service to help companies price and manage their commercial paper issuance. The goal: a system to provide real-time flow of short-term prices and a way to track investors and competing issuers. At the time, the global automaker and long-time direct CP issuer saw the possibilities as interesting, but not necessarily a priority.

All that changed two months later, when DaimlerChrysler's CP was downgraded to A2/P2. Suddenly, big money-market funds, which once constituted 85% of DaimlerChrysler's market, were no longer buyers. Nickoley had an immediate need to figure out what other buyers existed out in the market to take their place, but it took her a day or two to get investor information out of the mainframe-based system she used to manage CP issuance.

In October, the kind of capability Nickoley sought finally became available with the introduction of Prescient Funding Desk. Now we know for all customers what time of day they trade, what size of trade they normally do, if they come in through cpmarket or on the phone, says Nickoley. The customer analytics was the key.

With the development of Funding Desk, companies can get information on prices, including fluctuations in competitors' CP rates and what investors are looking for in the market on a real-time basis. Funding Desk's pricing module provides

short-term market rates from Prebon Yamane and CP rates from cpmarket.com, Prescient's online platform for direct issuance of CP.

In Tune with Market The advantages? Trades done on cpmarket.com flow automatically into Funding Desk, and Prescient says it is working on a link with Bloomberg that will bring in data on trades done on Bloomberg's CP platform. Companies can save on funding costs by using the data to target less yield-sensitive investors. They can also save money by knowing when competitors move rates and then matching those moves. Using Funding Desk, we're much more in tune to whether pricing is changing in the market, DaimlerChrysler's Nickoley says. Besides cost savings, issuers may simply want to keep tabs on their investors to ensure that no one investor holds too large a chunk, in order to lessen the risk of having to scramble to find other buyers if a big investor exits suddenly.

Targeting New Issuers Laurent Paulhac, Prescient's president, won't give the price of Funding Desk, but says it varies based on the size of a corporation's CP program. So far only DaimlerChrysler and ChevronTexaco are using Funding Desk. Paulhac defines the market for Funding Desk as the 500 U.S. companies with more than \$1 billion of CP outstanding. About 40 of those companies now sell some or all of their CP directly. But given the ease of electronic issuance and the support available on Funding Desk, Paulhac expects more companies will move toward direct issuance via the Web. In fact, officials at both Prescient and Bloomberg say they were already seeing more interest in their platforms for direct issuance from companies that traditionally placed their CP through dealers - even before Funding Desk's debut.

If those companies are going to sell paper directly, they're going to need something on the funding desk or treasury operations side to account and process and transact, says Craig Dukes, North American manager for short-term funding at Ford Motor Credit. Funding Desk is a perfect fit for those people.

Laurent Paulhac

Will the Recession be Short?*

Sender	pmork@lajollaeconomics.com
Recipients	['info@lajollaeconomics.com']
File	arora-h/deleted_items/134.

Over the past few weeks we have struggled to find an appropriate parallel to the economic situation in the aftermath of September 11. In a recent paper we argued that the appropriate parallel for the post 9/11 was the Gulf War. In both cases the incident punctuated what we already knew: that the economy was in recession. We also pointed out some interesting similarities. In both cases, Alan Greenspan was chairman of the Fed and George Bush was president. However, there are some major differences this time. The George Bush in the White House now is proposing to lower tax rates. For that reason we believe that the recovery is going to be stronger than that of the previous recession. More on this subject anon.

RE: Entergy Bid

Sender	harry.arora@enron.com
Recipients	[' brandon.cavazos@enron.com ']
File	arora-h/sent_items/30.

I left a message for Greg, that we'd be prepared to show a 3\$ bid if that includes capacity. I did underline the point that we are not too excited to buy but nevertheless will show an indicative bid.

Let me know if you have any questions.

Harry

RE: Con-Ed - Lakewood New Jersey Synthetic Peaker

Sender	greg.blair@enron.com
Recipients	['harry.arora@enron.com']
File	arora-h/inbox/34.

The exact location is Lakewood LMP. There is a substation at Lakewood. Plant location is 55 miles south of New York City on an exit ramp of the Garden State Parkway. To my knowledge, the existing plant is not interconnected to NY. In any event, pricing would be for PJM East.

-----Original Message-----

From: Arora, Harry Sent: Monday, November 05, 2001 5:07 PM To: Blair, Greg; Cavazos, Brandon Subject: RE: Con-Ed - Lakewood New Jersey Synthetic Peaker

What is the exact location (in terms of LMP) - is this a PJM east or PJM west hub ? Is it connected to NY, either Zone G or Zone J ?

-----Original Message-----

From: Blair, Greg Sent: Monday, November 05, 2001 3:56 PM To: Cavazos, Brandon Cc: Arora, Harry Subject: RE: Con-Ed - Lakewood New Jersey Synthetic Peaker

Brandon and Harry:

Brandon: I assume the pricing is at the mids. Also, since the spread between the 1.50VOM and the 3.00VOM is so small, I'll just quote the 1.50.

Harry: Please look at the entire email thread (to get a sense of all the metrics we're employing for this quote). ConEd has already announced a 3x7FA peaker configuration for Lakewood, NJ. The site is already owned by ConEd, part of an existing 230MW combined cycle plant they already own. It's on the same transmission line (running to the south) as the Oyster Creek nuclear facility, which has a license expiration in 2009. The existing plant is a non-merchant EWG, selling 215MW to JCP&L pursuant to a twenty-year PPA expiring in 2014. ConEd has put out an RFP to sell 200-250MW of the peaking capacity from this planned facility. They planned to have the unit operational by June 2002. If we provide this synthetic toll, the plant construction would be deferred. Let me know if we can do 350 to 500MW and let's talk about appropriate spreads above the mids. Also, please be mindful of their desire for 8 hour mins.

Thanks

-----Original Message-----

From: Cavazos, Brandon Sent: Monday, November 05, 2001 4:38 PM To: Blair, Greg Cc: Hiemstra, Nick Subject: FW: Con-Ed - Lakewood New Jersey Synthetic Peaker

Pricing as follows: For the 3 year option: \$1.50 VOM - \$1.77 \$3.00 VOM - \$1.69

For the 4 year option: \$1.50 VOM - \$1.74 \$3.00 VOM - \$1.66

As always, these prices are indicative. For a product of that size (350-500MW), I would probe the customer to find a break-even/cost of construction price, and approach Harry to get the risk premium. Let me know how it works out,

Brandon Cavazos Enron North America 1400 Smith Street Houston, TX 77002 713-345-3335

<< File: ENA Participation.xls >> All,

The below Analyst & Associate recruiting dates require ENA participation at Manager level at above. In order to resource each of your departments it is important to have ENA's involvement and participation in the interviews and debrief sessions on Fantastic Friday and Super Saturday events. These de-brief sessions will allow you the opportunity to select candidates you wish to join your groups. The target is to assign potential candidates to business units and departments from the outset.

As ENA has the highest percentage of A&A rotating in its business unit, the participation of ENA at interview should reflect this. Therefore, please encourage your direct reports and managers to participate in the below events in order to secure candidates for your business area.

Associate Recruiting: Saturday November 3 Total - 70 Candidates for Interview Analyst Recruiting: Friday, November 16 Total - 70 Candidates for Interview Associate Recruiting: Saturday, December 1 Total - 70 Candidates for Interview

The above spreadsheet represents ENA's participation today which I believe highlights the need for much additional support in these efforts.

Please confirm by return participation of your respective groups.

Regards,

Karen Buckley HR - ENA

To: nicholas.m.sopkin@db.com, William.Stuart@enron.com, Tina.Livingston@enron.com cc: Subject: Option settings in structured note

Nick

Hope things are going well.

In the next few days we need to do two things.

1. Set the termination value of the existing options 2. Set the terms for new options for the next year.

Since the option is cash settled and not settled with actual currency payments, while we need actual currency exchanges to mitigate our risk, we would like to talk to you to manage that.

We also need to spend a few minutes, on the structure of the next set of options, to ensure a good execution.

When you get a chance give William Stuart (713-853-1507) our ccy trader or myself (713-853-6750) a call, or point us in the right direction.

Thanks

Harry

Bear Island Opportunity

Sender	billy.braddock@enron.com
Recipients	['iris.mack@enron.com', 'nick.hiemstra@enron.com', 'harry.arora@enron.com']
File	arora-h/deleted_items/130.

As mentioned earlier, we have the opportunity to sell a 76MW, 7x24, fixed for floating financial swap to these guys for 5 years beginning 1/1/02. They want offers from both the PJM-East and PJM-West Hubs. In an effort to lower the fixed price, they are willing to sell let us curtail during Monday-Friday for the term of the deal on an hour-ahead basis. There can be a variety of call option structures, depending upon which gives them the largest premium (options being number of hours which we can curtail each day). Nick has begun working on valuing an at the money, 5x8 call (effectively an 8-hour curtailment), with hour-ahead notice. Rob Benson is pricing the swap. As soon as we get the swap price (and the resulting strike price for the call), Nick can firm up his initial valuation and we can discuss with you.

Yahoo lead.....	
Sender	jeff.bartlett@enron.com
Recipients	['harry.arora@enron.com']
File	arora-h/savedmail/44.

thought you'd be interested to hear Chad's perspective here.....

----- Forwarded by Jeff Bartlett/HOU/ECT on 11/29/2000 05:04 PM -----

"Chad Muir" <chad@campuspipeline.com> on 11/29/2000 04:09:40 PM To: Jeff.Bartlett@enron.com cc: Subject: Re: quick question

Just got off the phone with Kira. She asked me what y'all do and I probably butchered it, but she sounded interested (especially when I closed by saying it would be a business services, fee-based revenue stream - from what I know in the industry, Yahoo's all about that these days, trying to find complements to its existing largely ad-driven model for which they are getting pummeled). She said you should forward any information on to her at kira@yahoo-inc.com. To reach her by phone (I'd recommend handling initial contact through email and then suggesting phone time, but your call), I don't have her direct number, but called the main Yahoo corporate number 408-731-3300, then used the dial by name directory - her last name is spelled Zahn, but you have to keep adding letters from her first name (i went through K-I) before it will recognize it. She and her husband both were in law school with me and are very, very cool folks. He works at Silicon Valley Bank now.

Let me know if there's anything else I can do to help.

chad

Jeff.Bartlett@enron.com wrote:

Thanks for the perspective on Yahoo - very helpful, especially since we don't have much (any) business history with them. I'll be looking at W's 600 appointments next week to see if your name is there along with Ken Lay's (that rumor knocked \$5B market cap from us today) jb "Chad Muir" <chad@campuspipeline.com> on 11/29/2000 02:14:52 PM To: Jeff.Bartlett@enron.com cc: Subject: Re: quick question Yes, I do. Two actually. Drew Lanham and Kira Zann. Rather than me putting stuff in an email about which of the two you should go through, call me when you can. I'm at the house all day today 435-655-2939. Tomorrow I'm at the office, but can be reached by cell 801-556-8490. There's a definite difference between the two, but they both work together. By the way, sorry we missed you over T-day weekend - hope you had a good weekend in OU country, despite the close game... Let's try to get together over New Year's if you'll be around. File	arora-h/discussion_threads/44.

Dear Mr. Arora: Hope this mail finds you in the best of health and cheer. I am sorry to know that I have not been selected for the Enron Summer Associate Program and would greatly appreciate any feedback that you can offer me with regards to interview that I had with Enron. I am extremely interested in working at Enron and firmly believe that my prior experience in the commodities trading arena and the skills that I gain in my MBA program will enable me to add significant value to Enron. I plan to apply for the full time program at Enron and would like to use the feedback to prepare myself for the full time associate program at Enron. Many Thanks once again for taking the time and effort to interview me at Owen and also for considering me for the Enron Summer Associate Program.

Sincerely, Max

Introduction to Enron Net Works' DealBench B2B platform

Sender	jeff.bartlett@enron.com
Recipients	['kira@yahoo-inc.com']
File	arora-h/discussion_threads/5.

Kira- I got your name (and email address) from Chad Muir and was hoping to arrange a time to briefly (and informally) talk to you about Yahoo's B2B business strategy and whether you think there might be any opportunities to discuss some strategic relationship between Yahoo and Enron Net Works's DealBench subsidiary.

Without getting into too many details, DealBench is an ASP addressing the needs of large, secure, sophisticated transaction participants. We are currently offering live online auctioning capabilities, online virtual datarooms and certain deal areas for the syndication of bank products and lease portfolios. We have completed transactions with nominal value of over \$4 Billion since launching the site 4 months ago. My initial thought is that this could potentially fit in nicely with what I believe is Yahoo's need for recurring transaction-based revenues in certain B2B areas.

Hopefully we can find time to talk soon. Take care, Jeff

Jeffrey M. Bartlett Principal, DealBench Director, Enron Net Works 713-853-5629 (work) 713-598-1946 (cell)

zPro Offer extended past Thanksgiving

Sender	customerservice@zoomerang.com
Recipients	['harry.arora@enron.com']
File	arora-h/deleted_items/135.

Dear Harry,

I recently sent an announcement regarding our zPro Special Offer (code TL1ED). Because so many people are making special efforts to be with family this Thanksgiving in particular, we're extending the time period for the special zPro offer until November 28.

In case you haven't already signed up, I encourage you to check out zPro's features at

<http://newslink.zoomerang.com/ss?click&zoom-clicks&3be9cec4>

Call 877-771-7758 by November 28 and mention promo code TL1ED or email us at <mailto:customerservice@zoomerang.com?subject=TL1ED> to take advantage of the extended time period for this special zPro offer.

More than 25% of Fortune 500 companies use zPro for sending surveys and collecting results, because of features like

- Personalizing and branding your surveys by uploading images - Downloading results into spreadsheet format - Cross tabulating and comparing responses from one question to another - Creating longer surveys - Unlimited data storage

You now have until November 28 to call 877-771-7758 or email us at

<mailto:customerservice@zoomerang.com?subject=TL1ED> to take advantage of this special offer.

Sincerely,

Dana Meade, Director of Product Management Zoomerang

<http://newslink.zoomerang.com/ss?click&zoom-clicks&3b587055>

Re: The Body Shop quick question

Sender	harry.arora@enron.com
Recipients	[' jocelyn.gordon@enron.com ']
File	arora-h/sent/5.

Jocelyn

New Power Company and Azurix are other affiliate companies of Enron. EDS is a totally different company, to which we have outsourced some stuff - so they have a number of employees on our premises (on EDS contract).

I personally do not work out at the bodyshop. So would be unable to help you on how it might be in the morning. I am sure you can call the BodyShop and they can help you out. If you have questions, our HR co-ordinator (Lauren or Ben) should be able to provide further assistance.

Harry

From: Jocelyn Gordon/ENRON@enronXgate on 02/06/2001 02:10 PM To: Harry Arora/HOU/ECT@ECT cc:

Subject: The Body Shop quick question

Harry,

Just a quick question for you, please.

I read the guidelines and included them below regarding the Body Shop. At the beginning of the page, it includes the category of employees to include some that I am not familiar with. Of course, I do see the area for contractors, however, I was curious what these classifications are. Can you please let me know what these are? New Power

Company/Azurix/EDS Employees

I just want to be sure on the correct fees prior to making a commitment to join with them. Also, have you ever been to the Body Shop in the morning? Do you know if it is super crowded or not? I can't imagine too many people arriving at 5:30am.

Thanks ahead for your input. I appreciate it.

Jocelyn Gordon DealBench 713-345-3826 (P) 713-346-8576 (F)

File	arora-h/sent_items/27.

Stacey

What is this dual trigger option - can you give me some background on this one ?

Harry

-----Original Message-----

From: Cilia, Mary Sent: Monday, October 22, 2001 1:08 PM To: White, Stacey W.; Arora, Harry Subject: FW: status of CCO book accounting treatment

FYI -

Jennifer Stevenson at Andersen may be calling you all to try and verify something to assist us with our dual trigger accounting arguments. We have been trying to prove to Andersen that the value in the dual trigger option lies more in the price volatility than the physical plant outage. AA was perplexed by the approximate 50% margin on these deals. Larry Marcus pointed out to them that this isn't any different than an out of the money call option which would also typically generate a 50% margin. They believe that it will greatly help our argument if they can verify with a trader that this is true. Let me know if you have any questions. Thanks.

Mary

-----Original Message-----

From: Williams, Karin Sent: Monday, October 22, 2001 8:07 AM To: Cilia, Mary Subject: FW: status of CCO book accounting treatment

David Hoog recommends that Jennifer and Patty talk with Harry Aurora. K

-----Original Message-----

From: Hoog, David Sent: Saturday, October 20, 2001 11:27 AM To: Williams, Karin; Marcus, Larry Cc: Sekse, Per; Price, Brent A.; Glover, Sheila Subject: RE: status of CCO book accounting treatment

if a call option is way out of the money, such as the ones we purchased last summer, the premium is a multiple of the "expected" payout. a trader may not respond well to the term "margin" because they dont calculate it. as an example, if the

midmarket value for a \$100 power call is \$2.50, and a \$500 call is expected to pay 40% as much, a trader would offer this illiquid instrument for \$2, which would be like a 50% margin. one problem with this analogy is that expected value of payout is frequently much lower than the midmarket because there are very few arbitrageurs in this market who can really take advantage of that. this example does support the statement, but a trader will not think about it the same way. they will not call this extreme vol smile on illiquid products a high margin. harry arora would be the trader to talk to.

-----Original Message-----

From: Williams, Karin Sent: Fri 10/19/2001 4:29 PM To: Hoog, David; Marcus, Larry Cc: Sekse, Per; Price, Brent A.; Glover, Sheila Subject: status of CCO book accounting treatment

Patty Grutzmacher and Jennifer Stevenson (both Andersen) were scheduled to review our pricing model with Tom Bauer (Andersen partner) this week. Due to issues relating to the Enron shareholders' lawsuit, Tom could not meet with them. Patty and Jennifer did have further discussions with Amitava and Vasant. They are all right with the model.

Larry - Patty / Jennifer want to confirm your statement that a 50% margin on an out-of-the-money call option is not unusual. They have asked Stacey White (Director of Power Risk Mgmt) to recommend a power trader with whom they can talk. If you know of a person you would like them to talk with, please let me know.

Mary Cilia (transaction support) has asked Jennifer and Patty not to push the issue with Tom Bauer until he is in a more receptive mood. We are still anticipating a resolution this quarter. I will continue to keep you informed.
