File	blair-l/sent_items/366.

Gary is right. But if NGTS is the only contract, they will take the swing.= Or is Pioneer saying they want to take the swing? If Pioneer wants to do the swing, maybe they could= do a contract to cover the swing volume only? Karen and Larry, what do you think? Thanks. = Lynn

Gary Spraggins 06/01/2001 12:32 PM To:=09Nancy Callans/ET&S/Enron@ENRON cc:=09Janet McDaniel/ET&S/Enron@ENRON, Zuela Carter/ET&S/Enron@ENRON, Linda= Trevino/ET&S/Enron@ENRON, Lynn Blair/ET&S/Enron@ENRON=20

Subject:=09Re: Request for OBA at South Texas Team POI =20

We do not have OBA at non DAS points this may fall under small volume meter= s, I will check.

gary

Nancy Callans 06/01/2001 11:08 AM To:=09Janet McDaniel/ET&S/Enron@ENRON cc:=09Zuela Carter/ET&S/Enron@ENRON, Gary Spraggins/ET&S/Enron@ENRON, Linda= Trevino/ET&S/Enron@ENRON, Lynn Blair/ET&S/Enron@ENRON=20

Subject:=09Request for OBA at South Texas Team POI

NGTS called me yesterday morning indicating that they were buying gas from = Pioneer Gas Pipeline Company and receipting it at POI 401 (Gains Co. #2) fo= r 6/1/01. NGTS indicated that Pioneer Gas Pipeline Company wanted to buy b= ack 100 Dths of this gas at POI 78163 and the system would not allow it. I= pulled up POI 78163 only to discover that it was not a legitimate POI on N= NG and that POI 401 was a receipt POI only. I then went to Gary Spraggins = to verify if their was a POI that NGTS could delivery gas off NNG for Pione= er's compressor.

Received a call from Tim Green and Cindy White at Pioneer Gas Pipeline Comp= any (915) 655-3300 explaining Pioneer sent in an agreement form to create a= new interconnect to take gas off NNG and mailed NNG a check to cover this = expense. I t went to Linda Trevino to see where we stood with this new ag= reement. Linda indicated that she had not activated POI 78163 as she did n= ot have a reference contract. I called Pioneer and they indicated that NGT= S would be the only supplier at this POI. I called Darren Brown at NGTS an= d he informed me that he would be using contract 107903 to deliver gas to P= ioneer's compressor starting 6/1/01. I gave the contract information to Li= nda and she activated the POI and it defaulted to active confirmation. I c= alled Tim at Pioneer and asked him if "active confirmation" was what he rea= lly needed and he indicated that he would prefer "confirmation by exception= ". I had him fill out "NNG Request for Operator Choice Form" and fax to me= . Linda changed the operator option for Pioneer to reflect "confirmation = by exception". =20

Tim Green asked if they could set up an OBA at POI 78163 as the compressor = would not necessarily use the 100 Dths nomed daily? I had him send an e:ma= il request to Zula Carter and myself indicating POI 78163 be added to the O= BA at POI 401 Gains County #2. This e:mail request must be approved and Z= ula Carter will advise us when this takes place.

I got involved in this as I schedule for NGTS although I realize POI 401 is= on the So TX Team and assigned to Janet.

If I you have any questions feel free to call me.

Nancy

File	blair-l/inbox/273.

Raetta or Lynn: Is there no way for them to designate all of their fuel from Marshall?

-----Original Message-----

From: Blair, Lynn Sent: Friday, November 16, 2001 4:36 PM To: Stevens, Bob Cc: January, Steve; Zadow, Raetta; Blair, Lynn Subject: RE: Receipt Points

Bob, you are correct in your statement. But I want to be sure Koch understand when they nominate their receipt at Carlton of 2828 the delivery on that path will be 2828 less fuel. Otherwise I agree with you statements. I will be out next week, but Raetta is up to speed on this issue if you have any questions. Thanks. Lynn

-----Original Message-----

From: Stevens, Bob Sent: Wednesday, November 14, 2001 9:10 AM To: Blair, Lynn Subject: FW: Receipt Points

Lynn: Please verify that if Koch realigns their 35,000/d contract (K# 20510) such that their MDQ at Carlton matches their Carlton flow obligation of 2,828 and has the rest of their 32,172/d at Marshall (They would need to realign 30 mcf from Carlton to Marshall to effectuate the above, and I've checked with Doug Aschwege to make sure he would approve it.) that Steve's and my interpretation as described below is correct. Basically the question is whether the Carlton flow obligation is only the Tariff stated volume (ie., no fuel imputed) and that the remainder of the MDQ plus fuel on the whole 35,000/d will flow as primary firm receipts at Marshall. Thanks for your help!

-----Original Message-----

From: Phillips, Steve (EKT) [mailto:Steve.Phillips@entergykoch.com] Sent: Tuesday, November 13, 2001 4:25 PM To: Stevens, Bob Subject: Receipt Points

Bob,

Per our conversations earlier this month, My contract 20510 needs to have only 2828 mmbtu at Carlton and 32172 at Marshall. All of the fuel for the transport needs to be taken from Marshall. Currently, this contract has 2858 at Carlton. This is 30 above my obligation. After this change is made, it is my expectation that under no circumstances will my volume at Carlton be curtailed below a receipt volume of 32568 at Marshall. A combination of 2828 plus 32568 gives me a delivered volume of 35000. That is my firm entitlement and curtailments below that are unacceptable as long as my nominations are primary FT.

Please contact me at 713-544-4017 if more clarification is needed.

Thank you.

Steve Phillips

Eastern New Mexico Agent

Sender	amy.mulligan@enron.com
Recipients	['mark.mcconnell@enron.com', 'laura.giambrone@enron.com', 'terry.kowalke@enron.com', 'bert.hernandez@enron.com...]
File	blair-l/deleted_items/307.

Eastern New Mexico has terminated its agency agreement with Enron North America. From now on, Coral will be agent for their shipper contract, 24754. Eastern New Mexico and Coral are still discussing what to do with Eastern New Mexico's OBA agreement, 25190, but that will be settled before the end of the month.

If you need to get in contact with them for nomination and scheduling issues you can reach Susie Horton (Coral) at 713-767-5406. And for operational questions at their point (13199) or regarding their OBA imbalance, you can reach Ricky Britain (Eastern New Mexico) at 505-355-2468.

Thanks, Amy

-----Original Message-----

From: Cessac, Kenneth Sent: Wednesday, November 14, 2001 12:46 PM To: Holmes, Bradley; Wagoner, Michael; Kenagy, Gary; Anderson, Gary E.; Stern, Ellis; Scott, Donna; Sims, Peggy; Thompson, Charlie; Ryzinski Jr., Stan; Thomas, Hardy; Littel, Steve Subject: Netmeter Presentation

I have asked Dan Noack of DataGateway to provide us with a brief presentation and demo of their products.

Location: 3AC - 3rd floor conference room Date: Friday November 16 Time : 10:00AM - 11:30AM

They currently have two products, NetMeter and NetBalance. The NetMeter applications looks like it would provide us with a cost effective way of making our PGAS measurement data available to our customers via the web. NetMeter is a service they provide and our cost is based on the number of meters we post to their system.

They also have a new data validation product which will be released first quarter in 2002. This product could be used with our PGAS system to perform some automated validation of our volume data. Dan will be providing an overview of this product as part of this presentation.

Subject: FW: SCG Advice 2837-A

After discussing with Lynn and Glen, we think that we would like to file comments in this proceeding concerning an issue we have had since this has been implemented on Nov 1. In instances where SoCal happens to call their OFO in the Intraday 2 cycle, it can cause Transwestern to have Shipper imbalances because we do not have an opportunity to pass-along these reductions to our upstream parties. We think we would like to file a letter that may mention our general support of the "direction" of SoCal's changes, but that we do have an issue that has developed since actual implementation that we are currently working on with them. Lynn & I worked on this rough general description we thought could be incorporated into a brief letter.

"If SoCal calls an OFO in the Intraday 2 Cycle, an allocation is passed to Transwestern through the confirmation process with SoCal. Due to the timing of these OFO's, Transwestern is unable to confirm such reductions with Transwestern's upstream parties."

Lynn thinks if we are unable to resolve this issue with SoCal, TW could have high Shipper imbalance exposure.

-----Original Message-----

From: "Dan Douglass" <douglass@energyattorney.com>@ENRON Sent: Friday, November 09, 2001 5:02 PM To: Hass, Glen; Harris, Steven Cc: Gregg Klatt Subject: SCG Advice 2837-A

Glen and Steve:

The attached supplemental advice filing by SoCalGas replaces the changes to Rule 30, Transportation of Customer-Owned Gas, proposed by AL2837. The purpose of this filing is to describe the new internal receipt point operating procedures that SoCalGas is implementing, and to request Commission authorization to include the revised operating procedures in Rule 30. SoCalGas says this step is being taken in anticipation that it will be replaced with a system of firm tradable intrastate transmission rights in Gas Industry Restructuring (GIR) proceeding, I.99-07-003. During the GIR panel hearings, several parties requested that SoCalGas publish its windowing criteria in tariffs to facilitate a better understanding of the method used to allocate receipt point capacity. SoCalGas agreed to make such a filing, and D.99-07-015 directed SoCalGas to file an advice letter adding windowing information to its tariffs. To comply with this directive, on August 6, 1999, SoCalGas filed AL2837, which has not been acted on by the Commission. Customer complaints about SoCalGas' windowing procedures have convinced SoCalGas that it should replace its internal windowing operating procedures with a system that is open to the maximum operating capacity at each SoCalGas receipt point. SoCalGas is making these internal operating changes effective November 1, 2001. SoCalGas held meetings with upstream pipelines on October 17, and with interested customers and stakeholders on October 18, regarding the upcoming changes. They were invited to ask any questions in the days leading up to the meetings. Comments and/or protests are due on November 21. Have a good weekend! Dan

From: Blair, Lynn Sent: Friday, July 20, 2001 5:24 PM To: Hass, Glen; Williams, Jo; Watson, Kimberly; Donoho, Lindy; Lohman, TK; January, Steven; Schoolcraft, Darrell; Holmes, Bradley; Harris, Steven Cc: Blair, Lynn; Corman, Shelley; Garcia, Ava Subject: SoCal Needles "Window" allocation

I would like to have a meeting to review pros and cons in relation to the procedure Transwestern is using today for the SoCal Needles "window" allocation.

Some of the questions being asked:

1. Why are we allocating for SoCal, (at their request)?
2. Why are we allowing SoCal to set the capacity lower than TW's primary firm?
3. What are the options for TW to change the allocation procedure at Needles?

I am sure there is a host of other questions we could answer as well. We are looking at Tuesday, July 24, at 9:00 a.m or Wednesday, July 25, 1:30 p.m.

Please let Ava Garcia (713-853-5842) know which day is better for you. Then we will get a room and let everyone know date and time.

Thanks. Lynn

Lynn, After preparing the Storage Summary Sheet this morning I could not save the updated file. In fact the file has disappeared from this solar system. I contacted the Solution Center to have the file restored and was informed that a business reason and director level approval is required before any restoration work can begin. As for the business reason, as you know, the NNG Marketing Dept uses this sheet daily to monitor storage activity and as a basis for purchase and sales decisions throughout the month. Marketing expects to see this sheet daily. In addition, Finance has requested a copy of the file daily to help track potential imbalance activity on NNG's system. Lynn, Please forward this e-mail to the Solution Center authorizing the restoration of the file at \\gthou-dv01\common\mkt\oma\sumdec01.xls so I can continue to support the informational needs of the Marketing and Finance Departments provided by the data in the aforementioned file. Thanks, Mike

From: Holmes, Bradley Sent: Friday, September 28, 2001 9:47 AM To: Blair, Lynn; Medeles, Gerry Subject: FW: NNG Letter asking for Written Clarifications

I recommend this wording...

ETS is in the process of evaluating the feedback and system requests from the NNG Winter Operations meeting. A system enhancement to notify shippers when they have nominated to an alternate receipt or delivery point that is not on their contract is on the list for consideration. The requirements for this modification are currently being determined, however, the exact method and wording of the message has not been finalized. It is anticipated that the enhancement will be installed in the first quarter of 2002.

Comments?

FYI -----Original Message----- From: Graham, Charlie Sent: Tuesday, June 19, 2001 2:42 PM To: Delaine Kurth (E-mail) Subject: Mt. Jesus Condensate

Delaine,

The Operating Agreement between Northern and KN (now Oneok) entitles Oneok to all condensate and drip liquids removed from any of the Northern pipelines, equipment or facilities upstream of Oneok's Bushton Plant. That agreement also provides that Oneok will be responsible for picking-up, hauling and providing a detailed accounting of such liquids removed. In addition Oneok is to pay Northern for the shrinkage attributable to such condensate and drip. Northern invoices Oneok monthly for a cash reimbursement of the mmbtu's attributable to the condensate removed.

Effective April 2000, Oneok began short paying its invoices. The table below summarizes the amount shorted through April 2001 as \$67, 889.36. This short payment reflects Oneok's refusal to reimburse Northern for removal of condensate attributable to the Mount Jesus Drip, lease # 71176. Oneok has indicated to Northern that Oneok's contract hauler contends the liquid removed from Northern's system at this point is water. In spite of evidence provided by Northern to the contrary, Oneok accepts its contractor's contention, apparently pays a disposal fee, and refuses to reimburse Northern for the mmbtu's lost.

This location produced condensate prior to the March 31, 1997 agreement and no change to Northern's pipeline operations that would impact condensation dropout has occurred. Oneok was properly reimbursing Northern prior to April 2000. In addition, the attached analysis of liquid removed from the location on September 20, 2000, demonstrates that hydrocarbon condensate continues to be collected at the drip. Northern must insist that compensation for these BTU's removed from Northern's System be made by Oneok. Your immediate attention to this matter is appreciated.

Thanks

Subject: Northern Natural Gas

I have some questions about data that I have been downloading from the NNG/Enron website. I am not sure you are the correct person to contact about these questions but I am hoping you can help or at least point me in the correct direction.

I am looking at three different pieces of data - Index of Customers, Tariff information and Capacity Release data. I am having trouble understanding the way your pipeline works and I am hoping someone will be able to help. One of the major questions I have is why the rate schedules differ so much between these three pieces of data, IOC lists the rate schedules on contracts as TF_M_11_3, TF_M_4_10, or TF_F_1_12. Tariff lists the schedule TF with various rates under it, TF_12 base, TF_12 variable and TF5 (all under the market to market heading), TFF under the Field to Field /market Demarcation heading, etc. , and in capacity release I see rate schedules that look different still, TF5-TF5, TF7-TFF, TF2-TF12, TFX1-TFX Mkt Apr-Oct. I am trying to reconcile the differences and I can get a little ways but then I run into problems. For instance, in the IOC, I am assuming TF_M_11_3 means TF rate- Market to Market- flowing from Nov-March. But then I see a contract that has the TF_M_11_3 rate schedule that flows from April thru Oct (according to effective and expiration dates of the contract) and I get confused again. I can correlate some of the capacity release rates to tariff, TF5-TF5 corresponding to TF5 under the TF rate, but then I get to TF7-TFF and I am not sure where the TF7 comes from or what it correlates to. I know there must be some way to look at all this together, but I am at a loss to figure it out, which is why I am asking for your help.

I have never nominated on your pipeline, but instead am just doing data collection and analysis. There are more questions I need to have answered and would like to be able to contact someone so that I can talk with them and gain an understanding of how your pipeline works. Could you please give me a call or direct me to whom I need to speak? I can be reached at 720.548.5470.

One more thought - is there perhaps a "handbook" that I would be able to read that might answer some of these questions for me, perhaps a nomination guideline that you might give to a new trader/scheduler? If so, please mail me a copy to 3333 Walnut Street Boulder, CO 80301.

Thank you so much for your help in this! I appreciate anything you can do for me.

Konni Keuter Director, GASdat Platts A Division of the McGraw-Hill Companies

File	blair-l/sent_items/335.

Karen, no problem. I just want to be sure we are all learning and it sounds like you had some challenges which gave you some added training. Hang in there. The 8:00 a.m. Final does get easier as you do the process over and over. Thanks for the update. Lynn

-----Original Message-----

From: Clapper, Karen Sent: Sunday, October 28, 2001 9:43 AM To: Blair, Lynn Subject: FW: Final AM Process for 10/26/01

Lynn,

Just to let you know that one of the imbalances that kicked out I did figure it out(believe it or not);I have run nominated reports and scheduled quantities reports for all of Axia's contracts so that Kathy and myself can look at those on Monday to make sure everything looks alright.

The final for 10/27 I was able to figure out and everything was fine. I will get this "final" down if it kills me!

-----Original Message-----

From: Hoang, Joe Sent: Saturday, October 27, 2001 9:46 PM To: Buchanan, John Cc: Clapper, Karen; Washington, Kathy; Kedwaii, Hasan; Vakil, Kramer Subject: Final AM Process for 10/26/01

John, Karen asked me to send you a note about the problems we encountered with the final AM processing for 10/26.

When Karen submitted the rollover for the first time, it kicked out two imbalances. One, she was able to figure out with Kathy's help and the other one she cannot.

The shipper on K# 62418 nom 78172 at Demarc to K# 22252 during the ID2 cycle. They were scheduled at 75177. Shipper K# 22252 modified his gas from Demarc (from K#62418) to different storage. However, he re-nom at the full 78172, not the amount that was scheduled from ID2, which was 75177. Shipper K# 62418 did not make any changes to this package.

If we just looked at the nom screen , everything is tied out. However, we have to consider what's was scheduled. In this case, the scheduled number for K#62418 did not match the final am nomination on K#22252.

After this transaction was invalidated (K#22252), the system kicks out another imbalance, since K#22252 was realigning storage gas to K# 22319, and we did not invalidate that change.

Karen also had some problems with not seeing the apply button. I think Kathy walked her through the process since I did not. We restarted the final AM process after the Timely allocation and completed the cycle around 2pm.

Please call if you have questions/concerns. Thanks, Joe

FW: PNR Balance on PNM Cr# 25672 - PO# 27190

Sender	michael.bodnar@enron.com
Recipients	['lynn.blair@enron.com', 'tk.lohman@enron.com', 'richard.hanagriff@enron.com', 'laura.giambrone@enron.com', 'c...
File	blair-l/customer___reliant_retail_energy_minneapolis/3.

Laura, Based on the response received from Sue and TK (below), please remind PNM of the 10,000 Dth PNR balance and ask them to nominate the gas off TW at their earliest convenience. The gas is currently "parked" at the Rio Puerco PNR point, POI# 500617. Since the Purchase Order# 27190 expired on 4/30/2000, PNM will have to use their current PNR contract (Cr# 27267). I have asked Richard Hanagriff to transfer the quantities from PO# 27190 to Cr# 27267.

In your discussions with PNM you might verify that Imbalance Statements should continue to be sent to Sally Prentice at Alvarado Square in Albuquerque, NM. (TW has been sending an imbalance statement on this 10,000 Dth to Sally each month)

If you have any questions, please call me.

MBOD

-----Original Message-----

From: Lohman, TK Sent: Monday, October 15, 2001 8:57 AM To: Bodnar, Michael Subject: FW: PNR Balance on PNM Cr# 25672 - PO# 27190

I agree with Sue. I don't think they would pay up to this point. Just have PNM get it out.

TK -----Original Message----- From: Neville, Sue Sent: Friday, October 12, 2001 4:33 PM To: Bodnar, Michael; Watson, Kimberly; Lohman, TK Cc: Blair, Lynn; Hanagriff, Richard; McEvoy, Christine; Giambrone, Laura Subject: RE: PNR Balance on PNM Cr# 25672 - PO# 27190

I would recommend that we just have them nominate it out when it is convenient for TW and not charge them any additional fees. Is there a procedure in place that will prevent us from missing a balance like this again?

Sue

-----Original Message-----

From: Bodnar, Michael Sent: Friday, October 12, 2001 4:06 PM To: Watson, Kimberly; Neville, Sue; Lohman, TK Cc: Blair, Lynn; Hanagriff, Richard; McEvoy, Christine; Giambrone, Laura Subject: PNR Balance on PNM Cr# 25672 - PO# 27190

In analyzing shipper imbalance statements, Laura Giambrone discovered a PNR balance of 10,000 Dth on the above noted contract. The balance was parked on TW on April 26, 2000 and PNM paid a \$0.03 per Dth/d fee in that month. TW has not billed PNR fees on the balance since May 1, 2000. PNM has not inquired about nor nominated the redelivery of the quantities held by TW. How should this matter be handled?

File	blair-l/tw___imbalances___netting_trading/8.

Let's plan on meeting today after Steve's staff meeting to discuss. The existing imbalances as of the effective date of the tariff OBA will have to be individually negotiated with the party to resolve separate and apart from any imbalance that occurs under the new OBA. TW's tariff states that if the OBA party does not execute/sign the tariff OBA, they are still subject to the tariff OBA if they physically receive or deliver gas into/out of Transwestern's system. These relationships will have to be managed carefully from all sides to resolve the old imbalances while moving forward with the tariff OBA for new imbalances.

Thanks, Kim.

As you are all probably aware of, we will be adding eight new Storage Points effective 11/01/2001. They are listed below along with the Rep that I have assigned the point to in GVA - please let me know if any of the assignments are not correct. These new points will be listed on the following two tariff pages - 135D and 144.

Poi 78284 - TW/NNG Gray Deferred Delivery - Chris

Poi 78286 - Transok Aarapaho Deferred Delivery - Randy J.

Poi 78287 - ANR Greensburg Deferred Delivery - James

Poi 78288 - Enogex Custer Deferred Delivery - Chris

Poi 78289 - Westar Seagraves Deferred Delivery - Randy J.

Poi 78290 - Valero Spraberry Deferred Delivery - Scott

Poi 78291 - El Paso Keystone Deferred Delivery - Scott

Poi 78292 - NNG/KN Pony Express (Tescott) Deferred Delivery - Robert

Thanks,

Raetta

Lynn,

In reviewing the Duke contract 27291, I did find that the rate was not correct for four months in the past year. I also reviewed Duke contract 27349 since it also had the same type of alternate to California deal. Two months on the second contract were not billed correctly. If Marketing can input the correct rates into the system, I can regenerate the invoices and bill Duke immediately. Please see the attached file for details.

Thanks, Bert

From: Blair, Lynn Sent: Monday, September 24, 2001 2:11 PM To: Giambrone, Laura; Hernandez, Bert; McEvoy, Christine; Miller, Beverly; Miller, Chris L; Minter, Tracy; Mulligan, Amy; Ward, Linda Cc: Donoho, Lindy; Lohman, TK; Kowalke, Terry; Hanagriff, Richard Subject: FW: K #27291 - Invoices not capturing incremental fees for alternate points

Team, I realize this rate change is done in Marketing. But, you have a responsibility to review the invoice to ensure that the adjustment to the price has been made if there is alternate deliveries. Let's be proactive to ensure we have accurate billing. If you have any questions, please let me know.

-----Original Message-----

From: Hanagriff, Richard Sent: Monday, September 24, 2001 11:30 AM To: Blair, Lynn Subject: RE: K #27291 - Invoices not capturing incremental fees for alternate points

This adjustment will result in approximately \$7800 in additional revenues.

One way to prevent this situation in the future would be for the rep and or myself to ensure that Duke's rate has been increased when they have alternate deliveries to the border. If these alternate deliveries exist and the rate has not been increased then the rep needs to bring this situation to the attention of the marketer.

File	blair-l/sent_items/256.

Shelley, wanted to pass this on to you. Mike and I just talked about this and we are going to work with Richard and Reyna to be sure this cannot happen in the future. (One of those surprises we were talking about earlier today). Thanks. Lynn

-----Original Message-----

From: Neville, Sue Sent: Friday, October 12, 2001 4:33 PM To: Bodnar, Michael; Watson, Kimberly; Lohman, TK Cc: Blair, Lynn; Hanagriff, Richard; McEvoy, Christine; Giambrone, Laura Subject: RE: PNR Balance on PNM Cr# 25672 - PO# 27190

I would recommend that we just have them nominate it out when it is convenient for TW and not charge them any additional fees. Is there a procedure in place that will prevent us from missing a balance like this again?

Sue

-----Original Message-----

From: Bodnar, Michael Sent: Friday, October 12, 2001 4:06 PM To: Watson, Kimberly; Neville, Sue; Lohman, TK Cc: Blair, Lynn; Hanagriff, Richard; McEvoy, Christine; Giambrone, Laura Subject: PNR Balance on PNM Cr# 25672 - PO# 27190

In analyzing shipper imbalance statements, Laura Giambrone discovered a PNR balance of 10,000 Dth on the above noted contract. The balance was parked on TW on April 26, 2000 and PNM paid a \$0.03 per Dth/d fee in that month. TW has not billed PNR fees on the balance since May 1, 2000. PNM has not inquired about nor nominated the redelivery of the quantities held by TW. How should this matter be handled?

American Express Status - Update

Sender	no.address@enron.com
Recipients	[]
File	blair-l/deleted_items/329.

As you are aware, the Corporate American Express credit cards have been cancelled, effective December 4, 2001. We are working with American Express to establish new contracts for ETS employees. This will allow for reinstatement of service and a requirement for issuance of new cards. We are expecting an answer from American Express on December 14, 2001.

Until advised, please limit travel and entertainment expenses. If you are required to travel on business, you will need to use your personal credit cards or cash and submit your expenses through the XMS expense account system at: <https://expensexms.enron.com/ewp/> . If the use of a personal credit card to cover your travel needs is not an option, cash advances can be approved by your immediate supervisor, and processed through your local administrative team. In Houston, all cash advance requests, after obtaining proper approval, should be routed to Carolyn Centilli for processing.

We will continue to update you of program changes as we continue to work with American Express. If you have questions, please call Mary Ann Johnson - 713-345-5278 or Bruce Martin - 713-345-6527.

Morris A. Brassfield 3AC3285 Senior Director Enron Transportation Services

File	blair-l/deleted_items/223.

John, I've rewritten the beginning of this notice to be more consistent with the posting we did for the Bushton shut down and receipt of C6+ gas in Jan etc.

"Northern has been notified by El Paso that the nitrogen level being delivered at the Keystone Interconnect (POI 169) exceeded their tariff specification on October 11, 2001 and as a result gas was not confirmed for delivery to them at that point. Northern has reviewed the gas composition for the receipts in the area, and gas received by Northern with a high nitrogen content in this area may not be confirmed for receipt or curtailed, if previously scheduled, in accordance with gas quality specifications in section 44 of Northern's tariff. If this becomes necessary, the points listed below will be allocated or curtailed in the following order based on the gas stream composition. List"

Insert your list, but We don't understand how this relates to Spraberry Area and Hobbs Area, what are the points??? Please call if you have any questions.

P.S. I agree with Mary Kay's comments (of course). Dari -----Original Message----- From: Buchanan, John Sent: Monday, October 15, 2001 3:32 PM To: Corman, Shelley; Blair, Lynn; Dornan, Dari; Darveaux, Mary; Stage, Michael G.; Williams, Jo; January, Steven; Miller, Mary Kay Subject: FW: Draft Statement on High Nitrogen

Please review the proposed posting concerning the high nitrogen issue with El Paso, and feel free to make suggestions or comments. Comments need to be submitted by Wednesday October 17th at noon to make sure this get posted to the Web in a timely manner. Contact Penny McCarran ext.5416 or John Buchanan ext. 7429

Thanks: John Buchanan -----Original Message----- From: McCarran, Penny Sent: Monday, October 15, 2001 2:51 PM To: Buchanan, John Cc: Fauchaux, Eric Subject: Draft Statement on High Nitrogen

DRAFT

On October 11, 2001 Northern was informed by El Paso Natural Gas that the nitrogen level in the gas being delivered into El Paso's system at the El Paso/NNG Keystone interconnect (POI # 169) exceeded El Paso's nitrogen tariff specification. El Paso's tariff restrict the nitrogen level in the gas stream to no more than 3%. According to El Paso, the nitrogen level on October 11 at the Keystone interconnect was 3.5%. El Paso refused to allow deliveries from Northern into El Paso on this day.

Northern does not have a tariff specification that restricts the receipt of gas with nitrogen over a certain level. However, Section 44 of Northern's FERC Gas Tariff states that

"The gas shall be commercially free from objectionable odors, solid matter, dust, gums and gum-forming constituents, or any other substance which may interfere with the merchantability of the gas, or cause injury to or interference with proper operation of the lines, meters, regulators, or other appliances through which it flows."

It is Northern's position that any gas which has a high nitrogen content that makes the gas delivered from Northern's system non-merchantable is subject to being curtailed/allocated. Northern has reviewed the gas composition for the receipts in this area which would affect the total level of nitrogen in the gas stream. If it becomes necessary for Northern to curtail receipts to ensure that the gas stream is merchantable to El Paso at the Keystone interconnect, gas receipts into Northern will be curtailed/allocated according to the following order. These points have been listed according the level of nitrogen in the gas stream. The receipt point listed first has the highest level of nitrogen, the second point listed has the second highest level, etc.

1. NNG/Pinnacle Terry POI 60022 2. Gaines County #2 POI 401 3. Gaines County #3-NNG POI 395 4. NNG/Altura Gaines POI 78023 5. GPM Fullerton Plant POI 36511 6. Adobe Plant POI 25450 7. Spraberry Area 8. NNG/Amerada Hess Gaines Co. POI 78028 9. Warren Eunice POI 6751 10. Hobbs Area 11. LLano/NNG Lea POI 200

If El Paso refuses to allow deliveries from Northern into EL Paso Keystone, Northern may require all gas to be received from shippers in this portion of our system to conform to the gas quality specification set forth in Section 44 of Northern's FERC Gas Tariff. Any previously granted waivers by Northern of Section 44 of its FERC Gas Tariff relating to receipts shall no longer be effective until further notice.

While you may have read in the Change Control email sent today from the ETS Solution Center, we have some changes on the 41st floor scheduled for this weekend during the maintenance window. While we do not expect any problems with this maintenance window, we need to make sure we have a plan in place to not impact the customers.

This Saturday night, October 27, starting at 10:30 pm fiber maintenance will be performed in the wiring closet on EB41. During this maintenance window the jacket that covers and protects the fiber will be pulled back tight and secured. This fiber connects the 41st floor wiring closet with the server room on 41, where the TMS servers are located. While we do not expect this maintenance to have any impact, if we do have any issues with the fiber it can be replaced within an estimated 2 hour window. Outage impact would then be lose of connectivity with the Enron LAN from that server room, therefore TMS would be unavailable.

At 10:30 pm on Saturday night, Mark Cowley from the server team will contact the HotTap Helpdesk to get approval to start the maintenance window. The maintenance window will not begin until all processing for the pipelines is complete. If we have any problems or issues he will contact me and I will start the escalation process.

If you have any questions, please feel free to give me a call. Thanks. Jean x51615

I just talked with Mark Walton x34864 (He is working Debbie Moseley's account in her absence - she is expected to return tomorrow) and he now understands the issue. Since we have been billing ONEOK based upon water tickets left by the truck driver (rather than the revenue statement ONEOK receives for it's condensate like we use at all other points), I think they want to see where our gallons came from. I believe the field has been faxing the water tickets to Debbie and she has been basing her invoice on them. Mark will look into what we have been using today and will let me know. He with also talk

to their accounting to determine if they just want this data for after the fact backup or if they are holding up payment.

Tim and Mike, would it be appropriate to have Mike call Bill and get specifics from him? Then we can do a conference call to explain the cuts? Just a suggestion. Thanks. Lynn -----Original Message----- From: Bodnar, Michael Sent: Wednesday, September 19, 2001 3:07 PM To: Threet, Kay; Johanson, Tim Cc: Miller, Kent; Neville, Sue; Stevens, Bob; Blair, Lynn Subject: RE: LS Power/Cogentrix injection overrun allocation question

Tim, I can't find a single date when LSP's overrun injections were cut completely. The LSP - Whitewater FDD contract has had 27 days this injection season where, at the end of the gas day, overrun injections are scheduled. I have found an example where USES tried to increase their nomination during the gas day. However all the available capacity had been scheduled during an earlier process cycle. When this occurs, no incremental injections can be scheduled unless incremental capacity becomes available. Another problem is that at the end of most gas days USES utilizes storage netting to further complicate the analysis. I really need more to go on. If USES can provide a date or dates it would help our analysis.

-----Original Message-----

From: Threet, Kay Sent: Wednesday, September 19, 2001 10:47 AM To: Johanson, Tim Cc: Miller, Kent; Neville, Sue; Stevens, Bob; Bodnar, Michael Subject: RE: LS Power/Cogentrix injection overrun allocation question

<< File: lspoverrun.xls >> Tim,

Please find attached a summary showing the injection overrun volumes LSP scheduled on their FDD contracts 23281 and 23282 during the injection months of June, July and August 2001.

Since the storage allocation is administered in Market Services, I have asked Mike Bodnar to look into specifics of the days allocated vs. LS Power's overrun volumes. I did do one quick spot check of a day where we allocated storage through the Intraday 2 process, and I found that LSP did indeed schedule injection overrun quantities on that day. Specifically, I looked at the gas day of September 1, 2001. I note that LSP schedule 7,825 mmbtu on an MDQ of 3,008 on contract 23281, and they scheduled 5,945 mmbtu on an MDQ of 3,560 on contract 23282 on Sept 1st. I'm not sure that it is accurate to say they are never getting any injection overrun on days we allocate storage. I can tell you that I think the allocation process is working correctly, but I'll let Mike speak to these issues further.

Hope this helps!

Kay

-----Original Message-----

From: Johanson, Tim Sent: Wednesday, September 19, 2001 7:58 AM To: Threet, Kay Cc: Miller, Kent; Neville, Sue; Stevens, Bob Subject: LS Power/Cogentrix injection overrun allocation question Importance: High

Kay,

Bill Anderson from US Energy mentioned to Kent and I at the KC Operations meeting that his FDD injection overrun volumes are being cut completely when there is a storage allocation. At first, I thought this was due to a discounted injection overrun rate being charged to LS Power/Cogentrix. However, you confirmed yesterday that LS Power/Cogentrix is paying the full injection overrun rate, and therefore should get a pro-rata piece of the available capacity at the time of the allocation.

I told Bill that we would look into our allocation process, and find out why LS Power/Cogentrix was being cut completely. Could you let me know if you find anything incorrect in our allocation process with regards to the LS Power/Cogentrix account? Perhaps LS Power/Cogentrix is entered into the allocation system incorrectly as a discounted rate?

Please let me know what you find. I would like to respond to Bill as soon as possible.

Thanks!!

Tim Johanson

Subject:=09Maintenance Notes on El Paso, ANR, NOVA, and NGPL

Transportation Notes=20 Saying linepack had stabilized, El Paso canceled an Unauthorized Overpull P= enalty alert Wednesday, one day after it had gone into effect. The pipeline= also said it will take Line 1100 between the Eunice and Pecos River statio= ns down for repairs June 26. Six interconnects will be unable to deliver in= to El Paso that day, and the total flow of gas through Eunice Station to th= e South Mainline will be limited to 245 MMcf/d. Plants upstream of Eunice a= nd in the Monument area will compete for space with San Juan and Anadarko g= as moving south from Plains Station.=20 NOVA said it must reduce target linepack due to increasing soil and ambient= temperatures and to maintenance outages. It is seeking index-based uncondi= tional tenders through Tuesday for the firm sale of about 200,000 gigajoule= s. Tenders may be submitted for all or some of the reduction, which will be= accomplished through inventory transfers. The gas must be taken in more or= less even increments over a period of up to five days starting on or about= June 28, 2001. Call Darryn Rouillard at (403) 920-6341 for more informatio= n.=20 ANR plans to begin maintenance Monday at its Havensville Compressor Station= that will run through Oct. 15 and reduce Southwest Mainline capacity by ab= out 125 MMcf/d. However, based on current flow levels the impact of the wor= k should be minimal, ANR said.=20 Due to unexpected difficulties in operating the Bisti Station's #8 unit whi= le the C-1 turbine at the Chaco Plant in northwestern New Mexico is out of = service, flow from all wells in the GBISTI gathering system should remain s= hut in until turbine maintenance is complete, El Paso Field Services said. = The C-1 turbine is expected to return to service June 29. Operators must co= ntact Troy Chamberlain at (505) 564-4015, Corina Veloz at (505) 599-2357 or= the Control Center at (505) 599-2334 before turning wells back on.=20 El Paso said Wednesday evening its Guadalupe Station turbine and the #3 tur= bine at Pecos River Station #3 turbine had tripped offline unexpectedly. Th= e Guadalupe unit was returned to service quickly that evening, but attempts= to restart the Pecos River unit have been unsuccessful. Capacity through P= ecos River is limited to 840 MMcf/d until further notice.=20 NGPL reported discovery of a gas quality problem at the Transok-Bryan recei= pt point in Bryan County, OK. NGPL is working with Transok to resolve the p= roblem but said if it continues, NGPL may need to cut scheduled volumes at = the point.=20

Thank you for responding to our invitation. Attached is the agenda for the Northern Natural Gas Winter Operations Meeting scheduled for September 6-7 in Kansas City. There still may be a few minor modifications made but hopefully this preliminary copy will give you an indication of our meeting focus.

If you have yet to submit your RSVP but would like to attend the meeting please fax your information as soon as possible, (713) 646-8000. Feel free to give me a call if you have questions, (713) 853-5660. We look forward to seeing you on September 6!

File	blair-l/inbox/126.

It appears to me that these should be expedited for completion because it would help reduce the number of late charts. My understanding is that some of these stations have been converted for some time. sj

-----Original Message-----

From: Ratliff, Dale Sent: Friday, December 07, 2001 3:18 PM To: Cessac, Kenneth; Floyd, Jodie Cc: January, Steve Subject: EFM Stations

Ken,

EFM units (Bristols) have been installed at the following stations. They are new installs replacing chart however we have not communicated with these devices and we have no target date for there completion.

Schuyler #1, NE 2838 852481 St. Michael #2, MN 78181 Sioux Center, IA 4065 780011 Garner, IA 2886 734141 Rudd, IA 3207 733071 Nora Springs 3206 733051 Northwood, IA 3211 733061 Britt, IA 2877 734061

The following station a fisher was replaced with a Bristol the week before Thanksgiving and has not work since.

Heartland Corn 61623 766010 Gibbons, MN 63016 760235

Please help the field make the changes necessary to make these devices work. If you have any questions call me at x31534

Thanks for you help Dale

Bushton Universe Gas Quality

Sender	penny.mccarran@enron.com
Recipients	['steve.kirk@enron.com', 'charlie.graham@enron.com', 'michele.winckowski@enron.com']
File	blair-l/inbox/168.

Attached is an excel spreadsheet showing the gas quality at all the points in the Bushton Universe. I have sorted the information by POI #, BTU content, carbon dioxide content, helium content, C6+ content and nitrogen content. The POI listing is consistent with the official Bushton Universe list used for Gas Logistics purposes with the following exceptions:

1. POIs # 71315 and # 71316 are not on the attached list since they are pooling points and will not have gas composition information. 2. POI # 59685 Richfield Gas Storage/NNG Stevens is on the attached list twice. The gas composition information is tied to meter # 658429 and the throughput activity is reported by the summation meter # 660018. 3. POI # 1309 CNG/Beaver - C Line Receipt is including in the attached data since the CNG Beaver processing plant is not running at this time. The CNG volume is flowing to the Bushton Plant as strangers gas.

Once everyone has gotten a chance to look at this information I would like to have another meeting to discuss the data. A video conference has been set as follows:

Day Thursday Date January 3, 2002 Time 1:30 to 3:00 pm Location 42C2 Houston and 696 Omaha

Feel free to give me a call if you have questions.

Penny

STORAGE ALLOCATION

Sender	james.carr@enron.com
Recipients	['jean.blair@enron.com', 'lynn.blair@enron.com', 'terry.kowalke@enron.com', 'joe.linhart@enron.com']
File	blair-l/storage___alloc_process/3.

Lynn, I have resolved Tony Gee and Matt Martindale questions concerning this weekend storage allocation for the gas day June 23.

Matt was concern that Tenaska's Mid-17 contract 106171 was cut by our storage allocation the first time on Intraday 2. In fact this contract received a small cut on the Non-Grid AM cycle. Matt changed his nomination in the evening cycle to change some of his supply from Northern Border's Ventura to Mid-17 storage. This nomination change will now be code as "incremental" on his storage contract 21229 for the remaining cycles. Tenaska was able to avoid storage allocation cut on their IDD contract 21229 until Intraday 2 due to a "PRR" code for supply cut by Northern Border at Ventura. Our storage allocation only cut Tenaska Mid-17 path for gas delivered to their contract 21344 due to storage cuts downstream. I have advised Matt to be aware of these problems when changes nomination.

Tony Gee thought he was being "bump" or cut in the Intraday 2 cycle on his IT contract 5915 and FDD contract 102835 on his supply from Northern Border's Ventura. Prior to Intraday 2 we donot true-up storage allocation cuts until Intraday 2 with Northern Border. Tony was only checking his nomination with Northern Border on his contract 5915 and seeing all his volume schedule to flow. Tony failed to check his schedule volumes in Hot-Tap after the evening cycle to see his actual schedule volume was cut due to storage allocation. Advised Tony to check his schedule volume in Hot-Tap after each cycle.

James

-----Original Message-----

From: May, Jeff Sent: Thursday, July 19, 2001 9:30 PM To: Sullivan, Michael; Ratliff, Dale; Blair, Lynn; January, Steven; Kedwaii, Hasan; Bisbee, Joanne; Bryant, Mike; Wagoner, Michael; Floyd, Jodie; Nacey, Sheila Cc: Smith, David Subject: RE: TMS - PGas meeting

The change has been implemented to drop the CURRENT day from the extract process. In this case, today is the 19th and there are NO daily records for the 19th in the file. Processing has just completed and this has been verified. Earlier today I contacted the oncall person for each company and let them know that the change had been implemeted and that no impact was expected to their processing. But, just in case, if there was a problem it may be associated with this change. I have no doubt that if there is a problem, everyone has my number. It's like an old worn out shoe. Just to play it safe,,,,,,,,, 713-646-6191 - Office - I get in approx. noon. 713-813-8096 - Pager Jeff

I have an initial estimate of about 8 hours of work on the PGAS side. I have asked Jeff to let me know when they plan to do the work and will let you know.

-----Original Message-----

From: Ratliff, Dale Sent: Friday, July 13, 2001 9:44 AM To: Blair, Lynn; January, Steven; Kedwail, Hasan; May, Jeff; Corman, Shelley; Bisbee, Joanne; Bryant, Mike; Sullivan, Michael; Wagoner, Michael; Floyd, Jodie; Nacey, Sheila Subject: TMS - PGas meeting

Attendees Lynn Blair Steve January Hasan Kewdail Joanne Bisbee Jeff may Mike Sullivan

A representative with Cedar Falls Utility contacted the NNG measurement desk about volumes for the current gas day changing on the Operator Confirmation Summary.

Issue:

The daily PGas extract is including partial volume with an Incomplete flag for the current gas day (not closed). The MIPS extract did not process current gas day volumes. The Operator Confirmation Summary in TMS displays the incomplete volume to the TMS scheduler and to external customers thus impacting the imbalance calculation.

Possible Solution: 1. Hold the data pole file until gas day is complete 2. Modify downstream system to process the incomplete flag to ignore current day volumes 3. Modify the PGas extract so that current day volume will not be included.

Solution:

PGas IT staff will modify the PGas extract so that current day (non closed) volumes will no longer be included in the file. This will make the extract identical to the MIPS daily extract file it replaces. TMS IT staff will modify the Operator Confirmation Summary in TMS to display the flow codes included in the extract. The flow codes are as follows:

Blank = Complete record I = Incomplete record * = Complete but edited record

Mike Sullivan will provide a work plan and implantation date. If you have any question call me at 713-853-1534.

Thank you Dale Ratliff
