EPMI and EES -- Attached is information regarding changes effective December 15 to SPP's credit policy. SPP requests that Enron (EPMI and EES if necessary) return a new credit agreement.

Please let us know if we can assist with this. Thanks. Christi 37007

From: Maurer, Luiz Sent: Monday, November 26, 2001 11:27 AM To: Nicolay, Christi L. Cc: Steffes, James D. Subject: FW: SPP Credit Policy

Chris

As per your request, I examined the new SPP credit policy and creditworthness standards.

I tried to compare with previous versions, but I did not find any. I just encountered vague references on chapter 11 of the Open Access Transmission Tariff document. Apparently, there is more posted on Oasis.

I contacted SPP and the response I got from Phil follows. He also copied Michael Jacobson.

Who else should receive this information? The new policy is effective December 15.

Thanks for your continued guidance.

LM

From: McCraw, Phil [mailto:pmccraw@spp.org] Sent: Monday, November 26, 2001 9:27 AM To: Maurer, Luiz Subject: SPP Credit Policy

Luiz,

I received your forwarded voice mail and email you had sent to Sherry Jenson. Thanks for looking at the credit policy. The answer to your question is that there has never been this much detail available on our credit policy. I would say to just use the one posted now would be the best thing to do.

I did not know who would need to see the policy at your company so I sent the following email to Michael Jacobson at your company. If there is anything further I can do for you feel free to let me know.

Michael,

If you are not the proper person to receive this request will you please forward it to the proper person within your organization.

We have recently made significant changes to our credit policy and we have requested all customers be compliant with the credit policy by December 15 of this year. I have attached a copy of the credit policy reflecting these changes for your review.

After reviewing your company's last 24 calendar months of activity it would appear that we will need a letter of credit in the amount of at least \$100,000 for you to be compliant with the terms of the policy. Approved language for the letter of credit is at the end of the credit policy as attachment 2. The issuing bank must also be acceptable to SPP and these requirements can be located in the financial security section of the policy under Letter of Credit. Also, we have mailed and emailed the policy with a request to send back the credit agreement. I have also attached a copy of this agreement. If you would have it signed and sent back as well it would be greatly appreciated.

Military Resale Group, Inc. Corporate Profile: January 2002 2180 Executive Circle

Colorado Springs, CO 80906 Telephone: 719-391-4564 Facsimile: 719-391-4565 Ticker Symbol: OTCBB - MYRG Shares Outstanding: 6,630,004 Estimated Float: 1,220,004 52 Week Range: \$2.27 - \$0.03

Company Contact: Mr. Ethan D. Hokit, President

-

Military Resale Group, Inc. (OTCBB-MYRG) recently became a "new" publicly-owned company as a result of its acquisition in December 2001 by Bactrol Technologies, Inc. MYRG markets and distributes groceries and related products to commissaries on U.S. military bases in the Colorado area, where our operating roots go back five decades. Previously a publicly-traded corporate shell, Bactrol Technologies acquired Military Resale Group in a reverse acquisition, leaving 6.6 million shares outstanding and only 1.2 million shares in the public float.

MYRG was incorporated in 1997 when it acquired Pittock Distributors, Inc., a fifty-year old firm specializing in distribution of products to the Military Resale Market. At the time of the acquisition of Pittock, it had approximately \$750,000 in revenue. Revenue has increased over five-fold (5x) in the past four years reaching \$4.8 million in 2001. MYRG believes

that revenue can increase to a \$12 million annualized rate by the end of 2002 with the existing facilities. President Ethan Hokit and GM Bob Hefner have each been in the local military resale market for over 25 years.

The Military Resale Market is a \$15 billion niche market with 13,000,000 authorized patrons, which operates under the aegis of the Defense Commissary Agency (DeCA), a Department of Defense (DOD) agency. The DOD's objective, in this activity, is to operate resale store systems that sell groceries (at commissaries) and general merchandise (at exchanges, i.e., PXs) at the lowest possible prices. The resulting average cost savings last year of 30.4% make the system a major fringe benefit (untaxed) to military personnel. The competitive structure of the Military Resale Market consists of a few large distributors that do not dominate the industry, and hundreds of smaller distributors. MYRG's long-term strategy is to grow, primarily by acquiring other small distributors, and also by internal growth.

#### Positive Investment Theme

1. The Military Resale Market for groceries-merchandise is a \$15 billion a year niche industry. -13,000,000 authorized patrons benefit from lower prices (about 30%) and on-post shopping convenience. -Demand is cyclically stable due to the basic product nature and military headcount. -Distributors require some specialized knowledge - a barrier to entry - in this industry regulated by DeCA (Defense Commissary Agency).

2. The shares possess several appealing investment features. A. They are statistically attractive, as measured by the Market Value/Sales Ratio. -MYRG's market value is currently about \$2.0 million. This is only .4x actual 2001 sales of \$4.8 million and only .3x projected 2002 sales of about \$6.5 million, which is well below the level of the Market Value/Sales ratio for most stocks. B. The float is thin, containing only 1.2 million shares. C. A stock play on the Military Resale Market is a "new" idea to investors and is defensive in a weaker economic setting.

MYRG has set a target of reaching a trading range of \$4.00 - \$5.00 per share by year-end 2002 so that it can seek a national exchange listing.

Reagan C. Rorschach Enron North America 1400 Smith Street Houston, Texas 77002 713.345.3363

-----Original Message-----

From: Broussard, Richard Sent: Tuesday, October 09, 2001 10:10 AM To: Kroll, Heather; Rorschach, Reagan Cc: Comeaux, Keith; Will, Lloyd Subject: N. Little Rock Metering

Below is a summary of the metering issues for N.Little Rock.

Entergy is requiring NLR to supply all metering. There are several meters already in place but more are needed. James Bray is the contact with the metering information. All existing meters are pulse contact meters and the metering is brought back to NLR's SCADA system via a radio network. Benton has pulse meters in place but the pulse data is not currently brought back to the SCADA system. For now, meter readers have to go out to each meter with a laptop and tie it into the meter to get readings. The best solution would be to have all of the meters brought back to the central SCADA system. The peak load for NLR is 260MW, the peak for Benton is 65MW.

The biggest issue is the generation at the hydro station. There is currently 40 MW of generation from two 20MW units. These units are flow following; the generation is controlled by the flow of water in the river. NLR has no control over the water flow. It is controlled by the Army Corps of Engineers. The CoE currently sends out forecasts of water flow but it is not accurate. Right now, the control system at the hydro plant is not connected to NLR's SCADA system. They do have a fiber network in place and the hydro plant can be connected. NLR has to pay Entergy an imbalance charge mostly caused by the change in generation at the hydro plant.

Assuming that NLR can get all of the meter data and the hydro plant data back to the SCADA computer, I think that the best course of action for us is to connect a near real-time connection to the SCADA computer to get data back to Houston. This is a system similar to what we installed at Clarksdale. For an estimate of costs, use \$50,000 for installation and \$1,000 per month for communications. This is for a file server at the site of the SCADA computer with a frame relay connection back to Houston. With this we can monitor the NLR load as well as the hydro generation on a near real-time bases (+/- 5 seconds).

James Bray is supposed to call me with more information on the metering and control systems. However, if you get the chance, please try to find out the following information:

- 1) How many more meters need to be installed?
- 2) What will it take to get the Benton meters tied back to the SCADA computer?
- 3) Is there any generation control at the hydro plant or is it totally dependent on water flow? In other words, can they control the pitch of the rotors, open or close valves, divert water, etc. to control the total generation?
- 4) Less importantly, what type of SCADA system to they have and what is the platform? Platform - Windows NT, Unix, Windows 2000, Windows 95 (Gasp), etc. Software - GE Harris, WonderWare, Intellution, etc.

Rick

Hello all:

The time has come again for Bowl for Kid's Sake! Entergy-Koch is sponsoring the event this year which will raise money for the children of Big Brothers-Big Sisters of Greater Houston. BBBS offers youth mentoring programs to at-risk children, and their goal is to match children from single-parent families with responsible, adult role models.

Last year, our team raised over \$1500, and this year our team goal is \$3000. The company goal is to raise \$350,000 in total. The minimum pledge per pin is \$.10 (100 score minimum), or a flat pledge of \$10. Either method works, but be careful on the pledge per pin donation (I have been studying the moves of Roy Munson and Ernie McCracken from the movie Kingpin).

If you are interested, please reply with your phone number, address, and pledge amount (you will be billed directly in the mail by BBBS).

For those of you who are also interested in supporting our efforts in person, the fundraiser will take place on Thursday, March 7th from 2:00-4:30 at Palace Lanes, 4191 Bellaire Blvd (713-667-6554).

Thanks again to those who could contribute last year. We hope to have just as much success this time!

Patrick D. Howard Gulf South Pipeline Company, LP Transportation & Storage Services phone: (713) 544-5402 fax: (713) 544-6257 e-mail: patrick.howard@gulfsouthpl.com

#### Enron response in Dynegy v. ComEd

|            |                                                                                   |
|------------|-----------------------------------------------------------------------------------|
| Sender     | l..nicolay@enron.com                                                              |
| Recipients | ['harry.kingerski@enron.com', 'susan.lindberg@enron.com', 'd..steffes@enron.com'] |
| File       | carson-m/deleted_items/323.                                                       |

Attached is Enron's response against Dynegy's argument that Firm LD contracts cannot be used as designated sources for network transmission pursuant to the FERC OATT. ComEd allows firm LD contracts to be designated as network resources on a day ahead basis for the Illinois retail program. Dynegy argues that only "capacity" contracts should be allowed and ComEd's practice deprived Dynegy of at least \$2-4 MM of hypothetical capacity payments over the past two years. Also, attached are responses from other participants, including the Illinois Commerce Commission in favor of the practice.

Currently, not all transmission providers follow ComEd's practice. While we are arguing that FERC policy allows Firm LD products to be used as network resources, please check with us before assuming that other TPs will allow this (pending a FERC order in this case).

Yeah, it has been a little hectic as of late. I am still at Enron(for now). I have been retained as part of the trading organization to stay with this entity to see if it sells. We go to auction on Monday and will see what happens?? I guess the interested parties are UBS Warburg and Citigroup. Good companies, but I will have to see what the \$offer\$ is for me personally. Anyway, the family is doing GREAT and is looking forward to Christmas. Harris is about 14mos now, so he

kind of understands the whole presents thing, which should be fun!

Have a happy holiday!

MC

This is not a circular and you will not get another chance. This deals with migration to new systems and you need to migrate your own information or applications in the next day. Remember do not delete anything and data to be transferred must comply (see attachments below).

The policy must be complied by Thursday. Please ensure that everyone in your group has moved everything which is in compliance with the policy. We will not be delaying close or restart for people not having completed their own migrations.

Please make sure that those people who are not in the office are contacted and comply (eg Dana - please cover Kevin's migration requirements)

Thanks

Louise

| File       | carson-m/deleted_items/200.                        |

Dear Michael, On Monday, the Washington bureau will follow up = on the President's new push for energy legislation in Congress. Washington= Bureau Chief Peter Cook says on Friday, we heard some of the President's s= trongest language to date, urging Democrats in the Senate to bring a bill t= o the floor. There are also several energy

hearings scheduled in Congress next week, including one on possible new limits on power plant emissions in the Senate and another on MTBE in the House. The hearings are some of the first to be rescheduled since the anthrax scare hit Congress earlier this month. RDI Consulting Principal Mark Morey is penciled in from the Washington bureau on Monday. He'll share his insight on where the emissions issue stands on the Hill during the 9:00 a.m. ET newscast. Secretary of Interior Gale Norton was in Houston Friday at the IPAA conference. On Monday Houston Correspondent Kim Benestante will bring us more from Secretary Norton on Lease Sale 181 and how drilling in ANWR will create thousands of jobs for Texans. Noble Drilling CEO Jim Day will also stop by the Houston bureau to talk about his company's third-quarter earnings. The company reported very good earnings but Day warns that the fourth quarter may not be as good because of a weakening economy. Join us for all the details on Monday. ENL's Kym McNicholas will speak with Western States Petroleum Association Spokesperson Dave Fogarty next week. Fogarty will discuss California's decision to ban MTBE by December 31, 2002 and whether the state is ready for this move. Catch Fogarty from the West Coast bureau on Wednesday. Former Governor Pete Wilson tells Kym he takes responsibility for signing the state's deregulation plan, but adds there were steps Governor Gray Davis could and should have taken to avoid what turned out to be an energy crisis. Kym will have all the details on this story next week. Finally from New York, Goldman Sachs Analyst Dave Fleischer will drop by to talk about the gas market during the noon ET newscast. Keep in mind things are subject to change at a moment's notice. Occasionally guests cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Have a fantastic weekend! Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour. 09 09 09 09 09 09 09 09 09 Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap video (Requires Windows Media Player or Real Player) Experience all that Williams Energy News Live has to offer! 09 09 Dear Michael, With time running out before Congress finishes business for the year, ranking member on the Senate Energy Committee Frank Murkowski (R-AK) is making a new attempt to pass energy legislation. On Tuesday, the Washington bureau will cover a news conference on Murkowski's plans to announce his new approach to move an energy bill this year. Also from Washington on Tuesday, Energy Secretary Spencer Abraham is the guest speaker at Energy Daily's newsmaker breakfast. Abraham is expected to talk about the status of energy legislation in Congress. The Washington bureau will bring us coverage of the Abraham speech tomorrow. The Houston bureau will speak with Raymond James & Associates Energy Team Vice President John Gerdes. Earnings for some companies are down compared to the third quarter last year, but Gerdes says production volumes seem to be in line with expectations. He'll discuss the third quarter during the noon ET newscast on Tuesday. PG&E and the California Natural Gas Producers Association are co-hosting an informational workshop on Northern California natural gas issues. ENL's Kym McNicholas will bring us an update on the workshop on Tuesday. Kym says the meeting will cover a number of topics including discussion of new proposed well connection protocols, a review of the proposed gathering line auction process and a review and discussion on PG&E's proposed plan of reorganization. We'll have all the details on the workshop from the West Coast bureau on Tuesday. Goldman Sachs Chairman of the Global Power Group Doug Kimmelman will speak with Kelsey Hubbard on Tuesday from New York. Kimmelman will discuss the state of the merchant energy business and what the recent economic slowdown will mean for current power projects. Log on during the 10:00 a.m. ET newscast to catch Kimmelman. Finally from Boulder on Tuesday, E Source Director of Strategic & Marketing Issues John Egan will join us during the 4:00 p.m. ET newscast. He'll discuss the E Source

=09 =09 Dear Michael, The Washington bureau will have the latest on the anthrax scare on Capitol Hill on Thursday. Washington Bureau Chief Peter Cook says the decision to shut down the House of Representatives until Tuesday means at least one energy hearing on MTBE will be delayed. The Senate remains in session and we hope to hear from Senators on Thursday about the situation. Peter also says the bureau will have more reaction to the news that Department of Energy official Joe Kelliher has been picked by President Bush to fill the vacant seat at the Federal Energy Regulatory Commission. Kelliher's name has been on the top of the list for some time, and now the decision is official. PSE&D Director of Interregional Transmission Laura Manz will also join us from the Washington bureau on Thursday. Manz has been participating in the FERC RTO workshop, and she'll give us her take on what might come out of the weeklong meetings. Join us during the 10:00 a.m. ET newscast for the Manz interview. IBM Chemical and Petroleum Industry Vice President of Marketing Craig Hodges is penciled in from the Houston bureau on Thursday. IBM has been selected by Shell Oil to create the prototype for a wireless gas station named the e-Station. Catch Hodges during the noon ET newscast. West Coast Bureau Correspondent Kym McNicholas reports, Energy Secretary Spencer Abraham will be in California to announce a new public-private partnership regarding "Path 15," a transmission bottleneck in California. Abraham will also give a keynote address at Hoover Institution's Conference on California's Electricity. Also from the West Coast bureau on Thursday, Kym talks with a Spokesperson about the Valero refinery's plan to build one power plant to operate the refinery and one to sell energy to off-site customers. The California Energy Commission is expected to decide Wednesday night whether to grant the Valero refinery, located in Benicia, a permit to build. From the NASDAQ in New York, NYMEX President Robert Collins will join us. He'll discuss the status of NYMEX operations and trading following the September 11th attacks during the 9:00 a.m. ET newscast. Keep in mind things are subject to change at a moment's notice. Occasionally guests cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour. =09 =09=09=09=09 =09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap video (Requires Windows Media Player or Real Player) Experience all that Williams Energy News Live has to offer! =09 =09 Dear Michael, We'll have more live coverage on Wednesday from the Power Mart Conference in Houston. The Houston bureau will be speaking with guests from the technology sector of the energy industry. Tomorrow we'll hear from Automated Power Exchange's John Melby, Skipping Stone Principal Andrew Zetlan and Triple Point Technology CEO Peter Armstrong. Log on for these live interviews and more from the Power Mart Conference on Wednesday. The Washington bureau will bring us the latest from the Hill on the fight over energy legislation. Washington Bureau Chief Peter Cook says Republicans and Democrats are blaming each other for the lack of a comprehensive energy bill in the Senate. Senator James Inhofe (R)-Oklahoma, will join us during the 3:00 p.m. ET newscast to give his take on

where things stand= . Wednesday is day three of the FERC's Regional Transmission Organizati= on Workshop. We'll hear more from the participants tomorrow. RTO developm= ent will also be the topic of conversation at the Power Marketers Associati= on Annual Washington meeting. Rep. Joe Barton (R)-Texas, the architect of = a restructuring bill in the House, will be a featured speaker at the meetin= g. We'll hear from Rep. Barton on Wednesday. Henwood Energy Services Man= aging Director Gary Hunt talks with ENL's Kym McNicholas Wednesday about ho= w he feels California's energy supply crisis has turned into a displacement= strategy by power generators. Hunt will also talk about what he believes = must be done to clean up the financial mess from the crisis. Kym also re= ports, President Bush is heading to California on Wednesday. He'll address= military personnel at Travis Air Force Base and meet with the California B= usiness Association prior to leaving for Shanghai, China. Join us for thes= e reports from the West Coast bureau tomorrow. On Wednesday, Occidental P= etroleum is releasing its third-quarter earnings report. During the 9:00 a= .m. ET newscast, Standard & Poor's Equity Research Oil and Gas Industry Ana= lyst Tina Vital will join us from New York to discuss how Occidental fared.= We'll also get an earnings report on Duke Energy on Wednesday. Edward = Jones Senior Energy Analyst Zach Wagner will join us from St. Louis during = the 2:00 p.m. ET newscast to discuss Duke's third quarter. From Chicago o= n Wednesday, Alaron Trading Vice President and Senior Market Analyst Phil F= lynn is penciled in during the noon ET newscast. Flynn will provide insigh= t on how traders could be affected by the AGA's plan to stop publishing its= weekly storage report. Keep in mind things are subject to change at a mo= ment's notice. Occasionally guests cancel or change time slots. We'll cont= inue to do our best to keep you updated on future interviews and events. = Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, = at the top of each hour. =09 =09=09=09=09 =09=09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap vi= deo (Requires Windows Media Player or Real Player ) Experience all that= Williams Energy News Live has to offer! =09 =09 Dear Michael, The Washington bureau will bring us more on the = EPA decision to recommend changes to the nation's fuel specifications on Th= ursday. Washington Bureau Chief Peter Cook says the proposal to reduce the = number of boutique fuels across the country will likely draw mixed reaction= . We'll have the latest on energy legislation from the Senate. There con= tinues to be mixed signals coming from both parties on the likelihood of a = deal that could pave the way for a comprehensive energy bill to reach the f= loor. Also in Washington, a long list of energy influentials will speak= at the Alliance to Save Energy's Summit on Energy Efficiency. Energy Secr= etary Spencer Abraham, Senate Energy Committee Chairman Jeff Bingaman and S= . David Freeman, the Chairman of California's new state power authority are= among the scheduled participants. We'll have coverage of the Summit from = the Washington bureau on Thursday. Houston has long been called the energ= y capital of the world and downtown Houston has always been considered the = energy corridor. Now the Woodlands, a community located north of Houston, = is staking its claim as the next energy corridor of the area. On Thursday = the Woodlands Chamber of Commerce is hosting an energy forum to discuss the= area's growth and ways to attract more companies. We'll bring you details= from the Houston bureau tomorrow. We'll take a rare look Thursday into t= he largest nuclear power plant in Texas. South Texas Project Electric Gene= rating Station invited members of the news media to tour secured areas as n= uclear plants around the country upgrade security in light of the threats a= nd attacks on America. Also from the Houston bureau on Thursday, Simmons= & Company International Vice President of Research Mark Meyer will drop by= to discuss how oil stocks are doing this quarter. Catch Meyer during the = 10:00 a.m. ET newscast. The California Public Utilities Commission is mee= ting on Thursday. West Coast Correspondent Kym McNicholas says the agenda = may include the Rate Agreement between the

CDWR and the PUC along with the = issue of Direct Access. Kym also reports, the Sacramento Municipal Util= ity District is boosting its capacity. This move will add to what is alrea= dy the largest utility-owned distributed photovoltaic system in the world. = Kym will bring us details on Thursday. Finally from the West Coast burea= u, we'll have comments from California Governor Gray Davis' Press Secretary= Steve Maviglio on the federal government's plans to expand Path 15. Join = us for these stories from the West Coast bureau tomorrow. From ENL Headqu= arters on Thursday, Williams Energy Partners L.P. Chief Financial Officer D= on Wellendorf will join us to discuss the company's third-quarter earnings.= And Edward Jones Senior Energy Analyst Zach Wagner will join us from St. = Louis to continue the discussion on earnings. Wagner will discuss Enron du= ring the 4:00 p.m. ET newscast tomorrow. Keep in mind things are subject = to change at a moment's notice. Occasionally guests cancel or change time s= lots. We'll continue to do our best to keep you updated on future intervie= ws and events. Be sure to watch our newscasts every business day - 9 a.= m. to 5 p.m. ET, at the top of each hour. =09 =09=09=09=09 =09=09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap vi= deo (Requires Windows Media Player or Real Player ) Experience all that= Williams Energy News Live has to offer!
