* For the fifth consecutive month, preliminary data indicates that market pulp inventories in the NORSCAN region saw a greater-than-historical average decline of 195,000 tonnes in September (avg decline in Sept. is 108K tonnes). * As a result of this greater-than-normal decline, total inventories now stand at 1.525 million tonnes -- nearing the 1.5 million tonne historical inflection level, and down 24% from the Feb '01 level of 2.006 million tonnes (a 4-year high). * The reduction in inventories has certainly not been a result of strong demand, but rather continued discipline on the part of major producers -- NORSCAN mills operated at only 78% and shipments equalled 88% of capacity in Sept. * We are encouraged by this news, and believe that pulp prices could see an increase in coming months. As we wrote yesterday, we see 2002 as the cyclical trough yr with NBSK pxs averaging \$510/tonne, followed by a 17% rebound in '03 to \$595/tonne, and '04 as the cyclical peak yr with avg px of \$695/tonne.

FW: Market Pulp -- Weyerhaeuser Announces U.S. Pulp Price Increase

Sender	ayesha.kanji@enron.com
Recipients	[monika.causholli@enron.com]
File	causholli-m/deleted_items/88.

-----Original Message-----

From: Dillon, C A [EQRE] [mailto:c.a.dillon@ssmb.com] Sent: Thursday, October 18, 2001 6:49 PM Subject: Market Pulp -- Weyerhaeuser Announces U.S. Pulp Price Increase

Chip Dillon Managing Director Salomon Smith Barney 388 Greenwich Street -- 28th Floor New York, NY 10013 USA
Phone: 1-212-816-2793 Fax (US): 1-800-380-6401 Fax (International) 1-212-816-1090 Email: c.a.dillon@ssmb.com

* In September, many major market pulp producers announced px increases of \$20-\$30, effective Oct. 1. One major hold-out was Weyerhaeuser. At the time, we were skeptical of the success of a px increase for Oct. based on current market conditions -- favoring a gradual, modest increase in Nov and Dec. * This afternoon, WY announced that it was raising pulp pxs by \$20 per tonne in the U.S. to \$500 from \$480/tonne (effective November 1). This move would effectively put WY's pricing in-line with the higher October levels attempted by other producers (which have not generally held, to our understanding). * Consistent with our view, we do believe that global market pulp pxs can rise modestly in November &

December based on the fact that several regions' producers are seeing realizations near-or-below cash-cost levels. * We maintain our view that global market pulp pxs will rise gradually (at a modest pace) throughout 2002, but average below 2001 levels (cont'd below)

OPINION We also see much higher average pulp prices in 2003 and again in 2004 -- which we regard as the cyclical peak year. Our average NBSK price forecast for Europe remains \$540 per tonne in 2001; \$510 per tonne in 2002; \$595 per tonne in 2003; and \$695 per tonne in 2004. We note that Weyerhaeuser's action is for the U.S. market, which has generally been roughly \$30 per tonne higher in price level than Europe due largely to the impact of the very strong US dollar vs European currencies.

Company mentioned:

Weyerhaeuser (WY -- 1M -- \$49.09)

simon

-----Original Message-----

From: Causholli, Monika Sent: 06 July 2001 20:51 To: Cose, Simon Subject: Hardwood Pulp

Hello Mr. Cose,

I have found some information on harwood Pulp and BEK. So far I only have production, and capacity numbers for each country as well as some forecast that RISI has done on the hardwood. I am still waiting to get some demand data from RISI and I expect that to come next week. In addition, I have a powerpoint presentation on BEK and I can send that one over to you as well. Do you want to have this information now or do you want to wait until I get the demand data? Also, is better for you to have these faxed or by mail.

let me know, Monika Causholli (713) 345-1510

Dear Team:

Our originators are in need of regional market information. They are in search of capacity and consumption data for three regions: North America, Asia-Pacific and Europe.

The problem we're facing is that each publication is disclosing very different numbers. I think RISI is the publication which contains the most data across these commodities. If RISI data is not available for your commodity, please send me any data that is available. Also, please disclose units if possible.

The information requested is for a presentation for Ray Bowen this week. The following is this presentation. If you have any further questions please contact me. Thanks for all your help!!

Regards, Laura

Monika!! Hot Update from GS Luis Carlos

-----Original Message-----

From: Stivaletti, Joe [mailto:joe.stivaletti@gs.com] Sent: Monday, July 16, 2001 8:47 AM To: Stivaletti, Joe Subject: Market Pulp Prices Continue to Fall; Goldman Sachs High Yield Research; 7/16/01

Market Pulp Prices Continue to Fall; Goldman Sachs High Yield Research; 7/16/01

This week's issue of Pulp & Paper Week shows an NBSK pulp price of \$500/tonne, down from \$540/tonne last month and \$710/tonne at the beginning of the year. As we wrote about last week, demand for pulp continues to be very soft, with Norscan shipments down a whopping 10.6% during the first six months of 2001. This ties to lower demand for paper products as a result of general economic weakness.

Norscan stocks are still too high, totaling 1.781 million tonnes at the end of June. Although pulp inventories typically rise during the seasonally slow months of July and August, we are optimistic that increased amounts of producer downtime this summer will actually improve the inventory situation somewhat. Producers have already announced 550,000 tonnes of downtime for the third quarter, which equates to 9% of Norscan quarterly capacity. The extent of Q3 downtime will determine how quickly the pulp market can stabilize and when pulp prices can begin to reverse this slide.

Our forecast is for an average NBSK pulp price of \$580/tonne in 2001, down from \$685/tonne in 2000.

Pulp Update: Inventory Rise in July Well Below Average; Goldman Sachs High Yield Research; 8/14/01

Norscan pulp inventories rose just 4,000 tonnes in July, which is well below the typical seasonal increase of approximately 150,000 tonnes. Amidst all the bad news about the pulp environment, this is good news. Producer downtime is certainly helping. However, pulp prices remain quite weak, and inventories of 1.78 million tonnes are still too high to allow for any tightening of supply and demand in the short term.

We will distribute details of the July pulp report once they are available.

Subject: Credit Analyst (2)

Hello,

I am applying for the credit analyst position. See my resume below

Sincerely, Monika Causholli

Monika Causholli 2240 North Boulevard #5205 Houston, Texas 77098 (713) 807-1039 mcausholli@hotmail.com

EDUCATION BS in Financial Services/Business Administration, Oregon State University, Corvallis, Oregon Overall GPA 3.91/4.00. Minor: Political Science/International Affairs.

WORK EXPERIENCE

Financial Analyst/Researcher Enron North America/Industrial Markets

Houston, TX 6/01- Present

- * Analyzed the financial condition of pulp and paper companies by carefully reading through their financial statements and drawing the conclusion of their financial health. Based on the results of the analysis, prepared company reports for the origination team.
- * Supported the team of originators and traders by gathering data on the pulp market, preparing presentations, doing analysis on the prices and other market variables. Wrote a weekly newsletter with the most important information that included a market commentary. Built and completed the spreadsheets that contain all the market data for pulp. The spreadsheets helped the spot/financial traders to evaluate market conditions and make trading decisions.

Real Time Trader/Analyst Enron North America

Portland, Oregon 6/00-6/01

- * Researched the variables that affect the hourly electricity market including temperatures, planned and forced outages of generating units, loads and CISO exopt prices resulting in an informed opinion about that day's trading options.
- * Looked for opportunities to create value based on the research. Raised up to \$100,000 a day by following the market closely, taking advantage of the arbitrage opportunities between the different markets, and making use of transmission available to send power to various points.
- * Ran the El Paso Electric Utility during the off peak hours and weekends by matching the load (demand) with the supply and making the necessary decisions to run the system reliably by following the WSCC requirements on spin and nonspin requirements.

Summer Intern Enron Capital & Trade Analyst Program Portland, Oregon 6/99-9/99

- * Researched and graphed the historical temperatures for the Pacific Northwest, the Desert Southwest, and Rocky mountain and tried to find the correlation between the temperatures and energy load (demand).
- * Co-designed the load-forecasting model for the Pacific Northwest, Desert Southwest and Rocky Mountains in a course of three months.
- * Compiled the daily information for the term and cash traders including the historical temperatures graphs for California, daily forecasted load, and gas prices.

Financial Analyst Edicom sh.p.k. Assistant Tirana, Albania 6/98-9/98

- * Calculated revenues, expenses, interest payments and cash flows for over ten investment projects including apartment buildings and a business center.
- * Translated business letters including memos and proposals from Italian/Albanian to English.

COMPUTER SKILLS Software: Proficient in MS Word, PowerPoint, and Excel
