*******Information required by FERC, Docket No. EL00-95-027, et al.**

Sender	alan.comnes@enron.com
Recipients	['jeff.richter@enron.com', 'christian.yoder@enron.com', 'paul.kaufman@enron.com']
File	dasovich-j/all_documents/11095.

This arrived today. This FERC data request is due Monday April 16 and requests "copies of all short-term and long-term bilateral contracts for electricity which such seller has entered into with DWR subsequent to the December 15 Order."

I am inquiring with Jeff Richter and Christian Yoder to get the necessary data. If you have information that would be responsive to this request, please call me ASAP.

Alan Comnes

95 FERC ? 61,058

FEDERAL ENERGY REGULATORY COMMISSION WASHINGTON, D.C. 20426

April 12, 2001

Docket Nos. EL00-95-027 and EL00-98-026 To: Companies Listed On The Attachment

Dear Sir/Madam:

On December 15, 2000, the Commission issued an order in this proceeding directing remedies to address dysfunctions in spot markets operated in California and to ensure just and reasonable wholesale power rates by public utility sellers in California. San Diego Gas & Electric Co., et al., 93 FERC ? 61,294 (2000). Several of the key elements of that order were intended to remove barriers to entering into long-term contracts. The Commission now seeks information to determine how successful efforts have been to fashion long-term contracts and to reduce reliance on spot markets. In addition, we note that at a hearing held by the Committee on Government Reform of the United States House of Representatives on April 10, 2001, in Sacramento, California, the Committee requested that the Commission provide information on bilateral contracts for sales to the California Department of Water Resources (DWR), which has been negotiating such contracts with suppliers on behalf of end-users in California.

The Commission directs each supplier listed on the Attachment to file by the close of business, April 16, 2001, copies of all short-term and long-term bilateral contracts for electricity which such seller has entered into with DWR subsequent to the December 15 Order. The Commission will treat these contracts as confidential, unless the supplier waives such confidential treatment. However, the Commission intends to provide copies of the contracts to the Committee on Government Reform under confidential seal. To the extent any responsive contracts have already been filed with the

Commission, in unredacted form, suppliers may substitute a reference to the Docket No. assigned to the Docket Nos. EL00-95-027 and EL00-98-026 - 2 -

pertinent document rather than submitting a copy of the document. If a seller has not entered into any such bilateral contracts with DWR, it should file a letter so stating by the close of business, April 16, 2001.

By direction of the Commission.

David P. Boergers, Secretary.

TITLE: Implementation Specialists (3 openings), Leadership System Venture & Research and Marketing Associate, Leadership System Venture

COMPANY: Partners In School Innovation

DEGREE: MBA/MEd combination a plus

Organization Description The mission of Partners In School Innovation is to work in partnerships with public schools in high-poverty areas in the San Francisco Bay Area, most serving mainly children of color and second-language learners, to enable them to achieve educational equity through school-based reform. In our core program, Partners works for 5-7 years with schools committed to pursuing ambitious whole-school reform efforts focused first on improving student literacy. Partners is a results-oriented, entrepreneurial organization. We are currently engaged in a major expansion, from 8 partner schools to 34 partner schools over the next few years. As part of that growth, we have launched a new school Leadership System Venture to enable schools to increase student achievement by supporting improved teacher practice and professionalism, and increased capacity for organizational improvement. For more information: www.partnersinschools.org.

Job Title: Implementation Specialist, Leadership System Venture (3 openings) (MNC-589) Job Description Working closely with the Venture Director and a highly interdependent team, as well as the leaders in our pilot schools, the Implementation Specialist will contribute his/her expertise to refining the design and supporting its implementation in individual pilot schools and districts. This includes the systems and processes through which teachers and others work to achieve continuously improving student, teacher, teacher team, and school performance; it also includes the assessment-oriented student information systems used by people at each of these levels. In addition, the Implementation Specialist will contribute to the design of Partners' service approach for helping partner schools and districts to implement and gain the benefit of the new school leadership system. Qualifications ? Substantial experience in face-to-face support for the design and implementation of change efforts in schools and districts; track record of effective client relations in consulting, partnering, or other support role ? Demonstrated ability to work creatively and productively, both individually and as a member of a team, in an assignment with ambitious aspirations and ambiguity about how best to meet them ? Substantial experience (2-4 years) in the development and analysis of management systems ? Experience in the selection, adaptation, and use of school assessment data management (or similar) software ? Project-management skills and experience ? MBA/MEd combination a plus

Compensation Salary commensurate with experience. Competitive benefits.

Job Title: Research and Marketing Associate, Leadership System Venture (MNC-590) Job Description Working closely with the Venture Director and a highly interdependent team, the Research and Marketing Associate will contribute his/her expertise to our R&D effort to refine our design and support its implementation, specifically through conducting research into our system design and its implementation in pilots, research on other re

Hello Environmental Committee Members:

The following items may be of interest to you, members of your organization or your employees. Please forward to anyone you know who may find value in this information. Some events and opportunities for involvement have come up with very short notice. Please check dates for upcoming events.

As always, if you know of events or have topic suggestions you would like to have included here, please let me know.

MB *****

On Friday, May 11, the BAAQMD hosted a workshop to review the proposed changes to the emergency generator regulations. This public workshop provided the BAAQMD an opportunity to describe in detail the proposed regulation and the regulated community an opportunity to ask questions and provide feedback.

The new requiements will include: * Simple permit requirement for any emergency generator engine larger than 50hp * 100 annual run hours for test, maintanance and reliability * Unlimited run hours for "emergency" power generation * Record keeping requirements

There are exeptions and other details. For more information, please see the attachments, the BAAQMD staff report and other information items referenced below.

Steve Motzko of Solectron has created a short Power Point presentation that summarizes the BAAQMD regulation. (see the third attachment)

I have included my notes from the workshop as well (fourth attachment"May11Notes")

The final draft regulation is scheduled to be presented to the BAAQMD board for approval on June 20 and if approved will be effective July 1. Please read the attachments for more detail.

Here is a link to the BAAQMD Standby Generator Application Instructions:

<http://www.baaqmd.gov/permit/standby.htm>

The BAAQMD draft regulation and 34 page staff report can be accessed in PDF files at:

Interesting Information and Business Resource:

CleanEdge.com

CleanEdge.com is the web presence for Clean Edge, Inc., founded in 2000 by Ron Pernick and Joel Makower. Clean Edge was founded on the belief that clean technologies are poised for dramatic growth in a manner that will offer significant and tangible economic, environmental, and social benefits. Many of these technologies offer solutions to such pressing issues as energy shortages, resource scarcity, and climate change, while creating economic opportunities for entrepreneurs and investors. Clean Edge strives to be a catalyst for clean-tech investors and innovators through a variety of products and services. The website will feature the latest news on clean technology, track the stock prices of leading clean-tech firms, and subscribe to the free twice-monthly e-letter CLEANWATCH. You will be able to download a free report entitled "The Clean-Tech Market Authority." The website is located at www.cleantech.com

For more information, contact Joel Makower at 510.451.6611 or makower@cleanedge.com

***** LOCAL EVENTS

"Photovoltaics: Proven Solutions for the Energy Crisis" a presentation by Janice Lin, Director of Business Development, PowerLight Corporation

DATE: Tuesday, May 22, 1:30-3:00 p.m. LOCATION: Leininger Center (Okayama Room) San Jose

Bay Area Action+Peninsula Conservation Center Foundation (BAA+PCCF) presents

A Community Forum on Energy

Tuesday, May 22, 7:00 p.m. FREE Admission

Have you been wondering what's really going on with the energy crisis? Curious about Bush's energy policy? Then join us for the Peninsula Environmental Forum on Tuesday, May 22 at 7 p.m. at the Peninsula Conservation Center. The forum will provide a conceptual overview of our global energy challenges, why it is important to support the development of renewable energy, and practical advice on how we can act now to reduce energy consumption.

Speakers:

Craig Diamond is Director of Business Development in the Environment Division of the Electric Power Research Institute. He is also on the Board of Directors of BAA+PCCF. He has ten years of experience in environmental policy and strategic environmental consulting, and has worked at an internet startup company. Craig has a Masters in Public Policy from the University of Michigan, and an undergraduate degree in biology from Tufts University.

Dan Lieberman is Program Manager for Green Pricing and Energy Efficiency at the non-profit Center for Resource Solutions. Prior to joining CRS, Dan worked as Energy Product Manager at Utility.com, an internet-based green power marketer. Dan has a decade of experience in resource efficiency issues, including positions at local, state, and federal agencies. He received MBA and Master of Public Affairs degrees from The University of Texas at Austin.

The Peninsula Environmental Forum is a monthly event held at the Peninsula Conservation Center, located at 3921 E. Bayshore Rd., Palo Alto. For more information on the energy forum, contact David Coale at 650.962.9876 ext. 309. For more information on the Peninsula Environmental Forum series, contact Peter Drekmeier at 650.962.9876 ext. 302.

***** Greenbelt Outings

The first attachment is a listing of various coordinated outings to fantastic scenic, agricultural or open space places in the Bay Area. Many of these would be great fun for the whole family. The schedule of events is June through August.

In Situ and On-Site Bioremediation, Sixth International Symposium, Sponsored by Batelle, the IT Group, Regenis, Geomatrix, Parsons, and NAVFAC

DATE: June 4-7, 2001 LOCATION: Sheraton Hotel and Marina, San Diego, CA COST: \$895 Industry, \$850 Government/University, \$375 Full-time Students

This Symposium will focus on the use of biological processes to remediate soil, groundwater, and sediment contamination and to treat industrial waste. Bringing together international leaders in site remediation from government agencies, universities, and private organizations, the Symposium provides a unique forum to facilitate technology transfer and integrate recent developments in fundamental research with innovative engineering applications. Program highlights include 625 platform and poster presentations, 55 technical sessions, set of abstracts provided to each registrant, 9 technical short courses and 40 exhibitors. Program details can be found at www.battelle.org/biosymp.

Register by phone at 1.800.783.6338.

Demand Response and Energy Efficiency Opportunities - An On-line "Web Cast" seminar

Silicon Energy present a webcast seminar, produced on behalf of SVMG's collaboration with Natural Resources Defense C

TABLE OF CONTENTS

I. NATURE OF THE CASE 1

II. VENUE 2

III. PARTIES 2

IV. CLASS ACTION ALLEGATIONS 5

V. COMMON ALLEGATIONS OF FACT 6

A. The California Wholesale Electricity Markets 6

B. Defendants' Improper Acts 8

C. Results of Defendants' Activities 13

FIRST CAUSE OF ACTION 15 Violation of Sections 16720 and 16726 of the California Business and Professions Code
Trust In Restraint of Trade or Commerce in Violation of the Antitrust Act SECOND CAUSE OF ACTION 18 For Violations
of the Unfair Trade Practices Act Based Upon Violations of the Antitrust Act

THIRD CAUSE OF ACTION 19 For Violations of the Unfair Trade Practices Act Based Upon Defendants' Unfair Business
Acts and Practices

FOURTH CAUSE OF ACTION 20 Violations of the Consumers Legal Remedies Act

VI. PRAYER FOR RELIEF 21

Plaintiff hereby alleges on information and belief based upon the investigation made by and through her attorneys, as follows: I. NATURE OF THE CASE

1. This is a class action seeking redress under the law of California for defendants' conduct in the market for wholesale electricity. During the spring and summer of 2000, a group of electricity generators and traders, including defendants, exercising market power, unlawfully manipulated the California wholesale electricity market, resulting in grossly inflated wholesale electricity prices throughout the state and much of the Western United States. Defendants accomplished this result by, inter alia, improperly using confidential real time generator capacity, use, and maintenance data, and transmission system flow data to "game" the wholesale electricity market, by withholding electrical generating capacity from the California Power Exchange's forward markets, by improperly parking power with affiliates in other states which was later resold in California at inflated rates, by scheduling previously unplanned plant outages to coincide with other plants' planned maintenance shutdowns, and by scheduling transmission flows to cause or exacerbate congestion. 2. The improper use of confidential real time data was in violation of the California Tariff by which defendants are authorized to sell wholesale electricity within California. 3. By engaging in said unfair business practices, defendants have directly and severely damaged purchasers of electricity supplied through the California Power Exchange. As noted in the August 30, 2000 San Diego Union Tribune: "The utility bills of all [electric] ratepayers in San Diego are exorbitant. . . . Rates that were 3 cents per kilowatt hour have risen to 19 cents per kilowatt hour in just three months -- nothing short of confiscatory rates." 4. In its November 1, 2000 Order, the Federal Energy Regulatory Commission ("FERC") expressly found that electricity prices in California have been maintained at "unjust and unreasonable" levels during the relevant period, though it determined that it did not have the authority to mandate refunds or other retroactive relief with respect thereto. In its November 22, 2000 response to the November 1st FERC order, the California Public Utilities Commission (CPUC) concluded that due to market manipulation by wholesale energy producers and traders, customers of electricity supplied through the California Power Exchange had been overcharged more than \$4 billion dollars during the summer of 2000. In its November 22nd response to the November 1st FERC order, even the California Independent System Operator (CAISO) which manages California's transmission system infrastructure, known as the "power grid", found that the summer 2000 prices resulted from the exercise of intolerable levels of market power by generators and traders. II. VENUE

5. Venue is proper because defendants each transact business in the State of California and because the damages caused by defendants' unlawful manipulation of the price of wholesale electricity occurred in San Diego County. III. PARTIES

6. Plaintiff Pamela R. Gordon is an adult resident living in San Diego, California. Plaintiff Pamela R. Gordon is a retail electricity customer of SDG&E, and has been forced to pay rates for electricity during the Class Period (defined infra) that are unjust and unfair and that have been artificially inflated by defendants' misconduct. Moreover, plaintiff Pamela R. Gordon was born with no lymph nodes in her legs which results in a lack of circulation. Exposure to high temperatures will cause plaintiff Pamela R. Gordon's legs to swell, which can lead to possible severe health consequences. As a result of

her condition, plaintiff Pamela R. Gordon must maintain her home at temperatures of not more than 67 degrees at night and 71 degrees during the day. Plaintiff Pamela R. Gordon is unable to terminate her electricity service and has been forced to pay unjust and unfair rates for electricity from SDG&E as a result of defendants' misconduct. Specifically, plaintiff Pamela R. Gordon was charged and/or paid the following rates for electricity by SDG&E during the Class Period: // // // // //

Dates Total Electric Charges

5-26 to 6-27-00 \$180.92

6-27 to 7-27-00 \$226.67

7-28 to 8-28-00 \$311.84

8-28 to 9-27-00 \$143.48

9-27 to 10-26-00 \$84.71

7. Plaintiff was charged less for electricity per kWh prior to the Class Period and the inception of Defendants' wrongful conduct:

Dates Total Electric Charges

3-29 to 4-27-00 \$100.50

8. Defendant Reliant Energy (hereinafter "Reliant") is a Houston, Texas based public corporation doing business in the state of California as Reliant Energy Services. It is a generator and trader of wholesale electricity which is ultimately sold to California consumers, including plaintiff and the class, and is a WSCC member. Reliant operates five electricity generating plants in California which supply wholesale electricity to the California Power Exchange. 9. Defendant Southern Company (hereinafter "Southern") is an Atlanta, Georgia based public corporation doing business in the state of California as Southern Energy, Inc. It is a generator and trader of wholesale electricity which is ultimately sold to California consumers, including plaintiff and the class, and is a WSCC member. Southern Energy operates six electricity generating plants in California which supply wholesale electricity to the California Power Exchange. 10. Defendant Dynegy, Inc. (hereinafter "Dynegy") is a Houston, Texas based public corporation doing b

Verizon to Pitch Movies-on-Demand to Studios, Variety Says Bloomberg, 04/06/2001

USA: Enron to cut one-fifth of jobs at broadband unit.

04/06/2001 Reuters English News Service (C) Reuters Limited 2001.

HOUSTON, April 6 (Reuters) - Energy trading giant Enron Corp. said on Friday it will eliminate some 250, or roughly 20 percent, of the jobs at its broadband telecommunications unit, detailing a move which it has previously described as an internal redeployment of staff. Enron Broadband Services spokeswoman Kelly Kimberly said the company is cutting jobs at the unit, which now employs 1,150 people, because it has completed the build-out of its 18,000-mile (29,000 km) fiber-optic network and because of slow demand for streaming media products delivered to personal computers. "The network is substantially complete now, so that means fewer people are required for technical positions," she said. The job cuts also reflect Enron Broadband's decision to play a less active role in the market for streaming media services, such as video of corporate events delivered to personal computers, where demand had been slower than expected, she said. However, Kimberly said Enron Broadband will continue to pursue entertainment-on-demand services actively. Kimberly said employees whose jobs are being eliminated will be eligible for redeployment to other positions at Enron Broadband Services or other Enron units, although there could be some involuntary terminations. Previously Enron officials had dismissed rumors about job cuts at Enron Broadband Services and had spoken instead of an internal redeployment of staff within the unit without detailing its impact on overall employment there. The company's stock, which peaked at just above \$90 last year and was trading in the \$80s as recently as mid-February, has recently fallen into the \$50s in line with broader weakness in the stock market and among technology and telecommunications stocks in particular. On Friday it was up 95 cents at \$56.65. Since early last year Enron has been building a high-speed broadband communications network that it plans to use as a base to build a bandwidth marketing and trading business similar to its huge natural gas and electricity trading operation. Excitement among investors about the broadband business and about Enron's success in developing a strong Internet-based trading platform for energy and other commodities drove an 87 percent rise in the company's share price last year, outpacing a gain of 54 percent for the S&P utilities index. Kimberly said Enron's bandwidth trading operation is continuing to perform strongly, with more than 500 trades carried out in the first quarter, exceeding the total for all of 2000. Despite the jobs cuts at Enron Broadband, she said, the unit is recruiting to fill some other positions.

USA: RESEARCH ALERT-Morgan starts Dynegy as buy.

04/06/2001 Reuters English News Service (C) Reuters Limited 2001.

NEW YORK, April 6 (Reuters) - J.P. Morgan said Friday that analyst Anatol Feygin had initiated coverage of Dynegy Inc. as a long term buy with a price target of \$63 a share. He said the company has provided "defensive earnings growth through a top tier wholesale energy player" that is "second only to Enron ." Dynegy's asset-light strategy allows the company to follow Enron's lead, with a favorable risk/reward profile with 73 percent of EBIT coming from non-regulated "merchant energy" opportunities, he said. "We project Dynegy's long-term earnings growth rate at 22 percent," he added. The analyst attributed Dynegy's "retreat from the \$57 level to the California power crisis, which has been a major stumbling block for the stock and should hinder near-term performance. It casts doubt on the very dynamic that Dynegy is a play on, and usurps management time and talent. "Although fundamentally we see it as more of a nuisance - a few credit/collection issues (with) little to no earnings risk, and a delay, not a derailment of the deregulation process - the resolution of the Golden State debacle is to us the key catalyst for an upgrade." Dynegy shares were off 94 cents at

\$49.98 in early New York Stock Exchange trading.

Business NYMEX Analysis Jack Cafferty

04/06/2001 CNNfn: Before Hours (c) Copyright Federal Document Clearing House. All Rights Reserved.

JACK CAFFERTY, CNNfn ANCHOR, BEFORE HOURS: On March 20, Vincent Viola was voted in as the new chairman of the New Mercantile Exchange. He takes over during a time of change and challenge for the NYMEX. Mr. Viola is here now to talk about his new position and the task ahead. Congratulations on the ascension to the throne down there. VINCENT VIOLA, NYMEX CHAIRMAN: Thank you, Jack. CAFFERTY: Job one is? VIOLA: Making sure that the exchange is postured to fulfill it's purpose as a magnificently liquid and efficient pricing mechanism, and a stable, global counterparty for mediation of credit and risk on the products that we pursue to trade on the exchange. CAFFERTY: And to do it with an eye on making a profit. VIOLA: Yes, exactly. CAFFERTY: Which is a little bit different assignment than it's been down there. VIOLA: Yes, exactly, the fact that our business model now, by virtue of the fact that we seek to make and provide profit to our shareholders compels us to start to act and function like a business. CAFFERTY: Now last year, you did incur losses down there of about almost \$3 million. Tell me a little bit about why that

Let me start off by thanking Scott for going with me to the New Yorker thing - that and the Oriental "massage" parlor afterwards were great!

Secondly, Alison and I were thinking that it might be fun to get somewhat dressed up for the party on Friday, since it is THE social event of the season. What do you guys think? I'm not talking black-tie, but I am looking for an excuse to wear a skirt or dress. But I leave it up to the birthday boy and the birthday boy's beloved.

Please advise.

I suggest we meet at La Ginestra at 6:30 tomorrow night (its right next door so we'll be able to run over when it looks like we need to). We should leave the city at 6pm and I told Molly that we would pick her up. Whoever gets there first get a table for 7 (if Don is coming, Stacy).

Can't wait!!

Let's go to dinner at this place my friend Stacy recommends (that is right next to Sweetwater). She lives there and I trust her food advice. I am trying to Molly and Sean to go also. Then I will make reservations for 8. How does that sound to you guys?

PP, thanks for the call with the info last week.

BTW, who's in the band besides Ed and Steve?

Subject: Re: Ken Lay Meetings in CA

Rosalee: Thanks very much for helping arrange the meetings. Here is the list thus far. There may be additions. I've also suggested dates for the meetings.

May 3rd in Sacramento (after the meeting with David Freeman):

Governor Davis (he spends a lot of time in Los Angeles and you may find that he prefers to meet there). House Speaker Robert Hertzberg House Republican member John Campbell (Republican's point person on energy issues) House Minority Leader David Cox Senate Majority Leader John Burton Senate Minority Leader Jim Brulte

May 4th--Morning, in Los Angeles John Bryson, CEO Edison International Governor Davis (unless the meeting occurs on the 3rd in Sacramento)

May 4th--Afternoon, in San Francisco Bob Glynn, CEO PG&E

Joseph Alamo from our office will provide you with the phone numbers for John Campbell, David Cox, John Burton, and Jim Brulte. I assume that your office has the numbers for John Bryson and Bob Glynn. If you do not have the numbers, let me know and I will get them for you. Thanks again for your help.

Best, Jeff

I think that is a great idea. It would be great. Fun mix of people too. Where should we have it??? I think it should not be at our house in Napa, but someplace a little more special.

P.S. Nice use of "birthday" as the segue to the deal.

Speaking of birthdays, Prentice has informed me that, despite my protestations (being a very low-key sort of guy), there "must" be some party for my birthday this year (which I'm still opposed to--and I may be in Houston that MONTH anyway).

I was thinking (cuz I hate spotlights), that it might be fun and interesting, since your Dad and I are both hitting interesting birthdays this year, if we had a joint party---double the people, double the fun. (I don't know if he'd rather have a solo party for his, though.) And since my dad's met your dad, but our mom's ain't been in the mix, I thought it might be a good (and hopefully safe) atmosphere to get them together in.

Am I smoking crack on the whole idea?

Sorry for surprising you this morning!! Nothing wrong with being comfortable in your birthday suit.

Speaking of birthdays, I think we should have a goal to get my company acquired by your company by May 30, 2001.
Good goal, huh??

I want to talk to you about the details I have been thinking about while you were gone. When should we talk?? Let's set up a meeting so we make sure to move this all forward.

Welcome back.

POWER conference sponsorship by ENRON

Sender	borenste@haas.berkeley.edu
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/5547.

Hi Jeff:

I'm sending this as a separate email from the last in part because I want to emphasize that the invitation to be a discussant is in no way connected to Enron's decision to be a conference sponsor or not.

The email I sent you in November on sponsoring is below. Can you let me know as soon as possible (like in the next week) if Enron would like to be a sponsor.

Severin

Severin Borenstein

E.T. Grether Professor of Business Administration and Public Policy Director Haas School of Business U.C. Energy Institute University of California 2539 Channing Way Berkeley, CA 94720-1900 Berkeley, CA 94720-5180 (p) 510-642-3689 (p) 510-642-5145 (f) 707-885-2508 <http://www.ucei.org>

Email: borenste@haas.berkeley.edu WWW: <http://haas.berkeley.edu/~borenste>

From borenste@Haas.Berkeley.EDU Wed Jan 31 11:01:07 2001 Date: Wed, 29 Nov 2000 11:31:09 -0800 (PST) From: Severin Borenstein <borenste@Haas.Berkeley.EDU> To: Jeffrey Dasovich <jeff.dasovich@enron.com> Subject: POWER Conference Sponsorship by Enron

Dear Jeff:

I am writing to ask Enron to become a sponsor of the annual POWER research conference on electricity restructuring, which will take place this year on March 16, 2001 in Berkeley. This will be POWER's sixth annual electricity research conference. Last year's conference was quite successful, with attendance of nearly 150 and a number of papers that were discussed widely and were influential in electricity policy. Information on past programs and the plans for this year at our website: http://www.ucei.org/power_conf.html . We already have received submissions from top researchers for this year's

conference. We anticipate another very strong program of active electricity restructuring researchers and practitioners.

As in the past, we plan to include about 8 papers on the program. The presentations will be organized by topic and the papers will be discussed by both researchers and practitioner. Past programs have been very successful in stimulating discussion that included both researchers and practitioners.

The cost to Enron to become a sponsor would be \$10,000. As a sponsor, Enron would be listed on the front of the conference program and in the pre-conference mailing. In addition, Enron could send up to 5 people to the conference at no additional cost.

The annual POWER conferences on electricity restructuring have been very well received by industry, policy, and academic participants. With the broad and growing interest in deregulation of electricity markets, we have every reason to anticipate that this year's conference will be just as successful. We hope that Enron will decide to become a sponsor of the conference.

I can be contacted by phone at 510-642-5145, by fax at 510-643-5180, or by e-mail at borenste@haas.berkeley.edu. I look forward to talking with you soon about this.

Sincerely,

Severin

FW: PUC Rate Proposal Disaster! Please call and fax PUC

Sender	jeff.dasovich@enron.com
Recipients	['karen.denne@enron.com', 'janel.guerrero@enron.com', 'skean@enron.com']
File	dasovich-j/all_documents/12310.

FYI. Silicon Valley Manufacturing Group ain't happy about the rate increas= e=20 (surprise). ----- Forwarded by Jeff Dasovich/NA/Enron on 05/10/2001 04:56 PM -----

=09"Carla Reddick" <creddick@svmg.org> =0905/10/2001 04:44 PM =09Please respond to creddick =09=09=20 =09=09
To: <creddick@svmg.org> =09=09 cc:=20 =09=09 Subject: FW: PUC Rate Proposal Disaster! Please call and fax
PUC=20 Commissioners Brown, Duque and Lynch (info below)

SVMG Member Companies:

We URGENTLY REQUEST YOUR SUPPORT in sending a strong message today and tomorrow to the PUC that the proposed rate proposal is unacceptable to SVMG employers, its workers and families. We have only until 6 pm this evening to submit formal comments for the proposed rate structure just this morning. A brief analysis is below. Please call or fax the following Public Utilities Commissioners IMMEDIATELY with our urgent message. Please and let me know if you and your organization have done so.

Also, don't forget to avail yourself of one last opportunity to directly meet with the PUC at a public hearing regarding this rate proposal at the Doubletree Hotel tomorrow (Friday May 12, 2001) at 3:00, 2050 Gateway Place. To participate you must arrive early and sign-in to speak. A membe= r of the Public Advisor's Office will be there for assistance. To get more advice about participation at the hearing contact the PUC's Public Advisory Office at 415-703-2782.

Thank you for your help at this critical time.

Justin Bradley Director of Energy Programs 408 501 7852

***** Geoffrey Brown - Phone 415 703 1407; Fax 415 703 1294 (Perhaps the key swin= g vote, most important focus of advocacy)

Henry M. Duque - Phone 415 703 3700; Fax 415 703 3352; (Historically on sid= e of business but needs encouragement)

Carl Wood - Phone 415 703 2440; Fax 415 703 2532 (Most anti-business votin= g record; probably intractable)

President Loretta Lynch - 415 703 2444; Fax 415 703 1758 (Unlikely to change vote from public stance but worth a try based on past relationships and connection to Gov. Davis)

The PUC unveiled their proposal with the following rate allocations:

Residential customers are protected with an average rate increase of 17%, Small commercial users 45% Large energy users up to from 50 to 75%.

This does not include the 1 cent rate increase proposed in January which would increase the large energy users rate by 100%. A fair and proportiona= l rate increase would be an average increase of 34% for all customers. President Lynch admitted that this may not be enough, and that additional rate increases could be required in the future. In protecting the residential rate classes, the PUC is shifting approximately \$1 Billion from the residential rates to all other customer classes.

It is important that we all SVMG member companies communicate to our PUC Commissioners the danger of protecting residential rates where the use of power is more discretionary and flexible than for employers. Unfairly high business rates decrease productive electricity use with subsequent loss of goods and services and JOBS. Protecting the residential rate class is bad policy because it guts the incentive for many residents to conserve.

SVMG understands that prices must rise significantly to accommodate the cost of electricity. It is regrettable. But any plan must be equitable and proportional between all rate classes with no cross subsidization.

The SVMG press release from this morning is below. The PUC release is in the link below.

The PUC release. http://www.cpuc.ca.gov/PUBLISHED/NEWS_RELEASE/6967.htm

***** P.U.C. IS A.W.O.L. ON PROPOSED RATE INCREASE=01,S EFFECT ON THE ECONOMY AND EFFORTS FOR RESIDENTIAL CONSERVATION

For Immediate Release: Contact: Michelle Montague-Bruno May 10, 2001 (408) 501-7853

=01&The disproportional rate increases proposed by the PUC will devastate the state and potentially the nation=01,s economy,=018 said Carl Guardino, president and CEO of the Silicon Valley Manufacturing Group, in response to electricity rate increases being suggested by the Public Utilities Commission (PUC) and its President Loretta Lynch.

The PUC president=01,s proposal has three critical flaws: 1. It undermines the Governor and the Legislature=01,s conservation plan,= which already tilts heavily toward residential customers, because the PUC proposal provides individuals with no incentives to conserve. 2. It is devastating to California=01,s economy; which will cripple California companies and every working family that depends on a healthy business climate to maintain jobs. 3. Coupled with the economic downturn California employers already face, this Commission is either insensitive or ignorant to the further loss of jobs this proposal could create.

=01&The PUC may think that by shielding residential customers from paying our proportionate share that they are doing everyone a favor; yet it=01,s pretty hard to pay your bills when a disproportionate plan forces your employer out of business or out of California,=018 said Guardino.

Yesterday, the PUC proposed raising rates for some employers by 50 to 75 percent, which would be the second increase handed to the industrial business community this year. For many employers, the recently proposed rate increases will equate to a 100 percent increase in electric bills in less than five months.

=01&This is irresponsible behavior at a time when the state=01,s economy is already reeling from an economic downturn that has hurt employers and lost jobs for working families,=018 said Guardino.

=01&Many companies, including Roche Pharmaceuticals, have had very aggressive energy reduction programs in place for several years, which will continue. To further cut consumption - in order to pay for a non-proportional and destructive rate increase -- for some employers, could mean cutting into their workforce, or leaving the area all together,=018 said Dr. James Woody, President of Roche Pharmaceuticals R&D in Palo Alto and Chairman of the Board of the Silicon Valley Manufacturing Group. =01&We want to do our fair share in paying for rate increases, but the disproportionate nature of this proposal could be devastating to employers. We need a rate structure that will allow employers to thrive and help pull us out of this economic downturn.=018

The Silicon Valley Manufacturing Group understands and acknowledges the need to raise electric rates to help minimize blackouts, which will protect the public=01,s health and safety. However, to achieve desired conservation and fairness, it is essential that all Californians share proportionally in rate adjustments.

=01&Proportional rate increases should be implemented with no rate shifting between classes of energy users. Member companies of SVMG are committed to being part of the solution, as we work together to conserve power, retain our workforce and ensure a healthy economy,=018 said Guardino.

=01&Apparently, the PUC is out of touch with working families, conservation or jobs in California,=018 said Guardino. =01&It=01,s a naive proposal. It assumes we can put a firewall between working families and jobs their employers provide; but instead this notion threatens the livelihoods of California workers and businesses.=018

FYI. Bill Gang of EES Federal Solutions has been working actively with the Air Force in California. I've participated in weekly calls with them in the effort to get them energized about DA. Turns out they're precluded by law from lobbying. But they seem to have other ways of being influential. I've put Scott Govenar in contact with them and he's keeping them in the DA Coalition loop. Bill/Scott is this guy familiar to you? Bill any suggestions on how we might best target them in our efforts to get groups energized? Bill: Perhaps you could phone Janel Guerrero directly to discuss? Her number is: 713.853.9104 (is that right Janel)?

Best, Jeff

Thanks - that is what I had assumed.

One of your e-mails was forwarded to me by my people at Edwards AFB. As the lead utility counsel for one of the larger purchasers of electricity in the state, I am obviously very interested in this subject. Keeping the direct access option is important to us, not just to keep the state honest on price shifting between customer classes, but also for reasons of reliability and power composition. As a Federal agency, we have a goal to meet on renewable power, and this will be difficult if not impossible to do if we do not have some degree of choice in the composition of our electricity.

PM

I apologize for being dense, but when I checked the version of SBX 27 on the legislative web site, it is nothing like what is discussed in your e-mail. Is there an amendment (or several of them) that I have missed and that are not showing on the site (which shows no movement since the bill was introduced)? I have attached an RTF file of the version of the bill I found on the website at:

http://info.sen.ca.gov/pub/bill/sen/sb_0001-0050/sbx1_27_bill_20010131_intro_duced.html

Please give me a call if you have a minute to discuss this situation.

Things are looking up! If this passes, we should be in pretty good shape. Note the part that says we can operate as we wish up to June 1!

Bill ----- Forwarded by William Gang/HOU/EES on 03/02/2001 08:42 AM -----

Susan J Mara@ENRON 03/01/2001 06:43 PM

To: cc: Subject: SBX 27 -- Direct Access Language Proposed by Bowen

This is an OK bill. Not well drafted. It's also overly complicated and proscriptive.

Deletes the offensive part of ABX 1. It allows anybody to do whatever they want until June 1 (section 2 d) On June 1, - res and small commercial customers can get in a cue and get DA up to the # of MWs that are added through load growth. (Section 2 e) -- Larger customers would pay an exit fee. (section 2 f) -- DA customers would be a entrance fee to return to IOU service (Section 2 g)

There is also a confusing section (2 c) that says a retail customer is only stuck with CDWR for the proportion of power that CDWR provides. The way it reads, if CDWR is providing 40% of the IOUs' power, the retail customer can get DA for 60% of its load. I doubt that will fly -- too difficult to keep track of and ISO will oppose (only one scheduling coordinator/meter)

A conference call and meeting is scheduled with parties tomorrow on this language.

Will keep you apprised.

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 03/01/2001 04:28 PM -----

From: David Young=20 Sent: Friday, May 11, 2001 2:04 PM To: Cameron Sellers Subject: Enron Contacts

?

Hi Cameron,

?

The 3 key players we have met with so far at Enron are:

?

John Gillespie- Sr Director Global Strategic Sourcing

713-646-6222??? john.gillespie@enron.com

?

Derryl Cleaveland - Sr Director Global Strategic Sourcing

713-646-7024??? derryl.cleaveland@enron.com

?

Steve Hotte - VP/CIO Enron Gas & Pipeline Group

713-853-6719??? steve.hott@enron.com

?

A decision maker in this might also be George Wassaf, Managing Director=20 eSupply & Procurement, who is John Gillespie's boss.? I started this journe= y=20 at Enron by contacting George, who put me on to John G.? John is responsibl= e=20 for implementing systems for the GSS unit.? George's contact info is:?=20 713-646-7531??? george.wasaff@enron.com

?

Another top level exec we need to meet?is Enron's CTO, Philippe Bibi, who i= s=20 also the CEO of Enron Online.? He is the proud owner of Enron's proprietary= =20 sourcing systems - DealBench (auction/exchange) and ibuyit.com (indirect=20 procurement through catalog management).? Implementing a solution for=20 EnronOnline might be a separate opportunity from the Global Strategic=20 Sourcing opportunity.? If your contact at Enron has any connection with=20 Philippe, a warm introduction to him would be most helpful.

?

Thanks,

David M. Young Manager- Enterprise Sales Perfect Commerce, Inc. 1860 Embarcadero Rd., Suite 210 Palo Alto CA? 94303 Tel: 650-798-3356 Email: dyoung@perfect.com

"Sourcing - the identification, evaluation, negotiation, and configuration = of=20 supply partners - is the single largest opportunity for an organization to= =20 impact the cost, structure, and overall efficiency of its supply chain."?? = --=20 Aberdeen Group, Inc.

Transmission lines project draws bidders By Dale Kasler Bee Staff Writer (Published July 24, 2001)=20 Aiming to ease one of the festering problems in California's energy crisis,= =20 13 companies and public agencies have bid for the right to widen a notorious= s=20 bottleneck in the state's transmission lines, federal officials said Monday= .=20 The bidders range from the East Bay Municipal Utility District to wholesale= =20 power generators such as Mirant Corp., Calpine Corp. and Williams Cos. Some= =20 independent experts argue that if a generator wins the bid, it could use it= s=20 control over those transmission lines to manipulate the electricity market.= =20 The bottleneck is Path 15, a narrow 90-mile stretch of power lines near Los= =20 Banos that carries electricity between Northern and Southern California. It= =20 has less transmission capacity than other portions of the power grid, which= =20 has led to blackouts.=20 In January, Northern California suffered power outages in part because Path= =20 15 couldn't deliver the surplus electricity that was available in Southern= =20 California. The proposed expansion would add 1,500 megawatts of capacity.= =20 "It's a very big issue; there's been a lot of congestion," said Severin=20 Borenstein of the University of California Energy Institute.=20 In addition, the Independent System Operator, which manages the power grid,= =20 estimates the congestion generated by Path 15 added an estimated \$221.7=20 million to California's power bill in a 16-month period that ended in=20 December.=20 Borenstein said he believes there are considerable hidden costs as well,=20 because the bottleneck has created an incentive for sellers to withhold=20 power. Path 15 effectively cuts California into two separate markets, makin= g=20 it easier for sellers to manipulate each submarket to raise prices, he said= .=20 Pacific Gas and Electric Co., which owns the existing Path 15 transmission= =20 lines, already has been conducting environmental studies with an eye toward= =20 widening the path. To speed things along, the federal government in May ask= ed=20 for bids on the project, which sparked proposals from generators and others= .=20 Borenstein said having a generator widen Path 15 could bring new problems.= =20 Whoever builds the additional power lines owns them and can charge "tolls" = to=20 companies that use the lines to transmit electricity. A power generator cou= ld=20 deliberately withhold supplies, thereby increasing the congestion on Path 1= 5,=20 and increase the tolls, Borenstein said.=20 PG&E is among those bidding to widen the path. So is its sister company, an= =20 unregulated entity called PG&E National Energy Group. Other bidders include= a=20 partnership led by Sempra Energy Resources, an unregulated sister company o= f=20 San Diego Gas & Electric Co.=20 The federal government estimates it will take \$300 million and three or fou= r=20 years to widen Path 15. The costs are ultimately paid by utility customers.= =20 U.S. Energy Secretary Spencer Abraham, speaking to reporters in Los Angeles= =20 on Monday, called the expansion of Path 15 "a critical component in solving= =20 the long-term power crisis in this state."=20

The Bee's Dale Kasler can be reached at (916)321-1066 or dkasler@sacbee.com =20 <<mailto:dkasler@sacbee.com>>. =20 Bee news services contributed to this report.

Dan Walters: Blame game over California's energy crisis will continue for= =20 years

(Published July 24, 2001)=20 The wrestling match between politicians and Enron Corp. moved into a more= =20 intense arena over the weekend when a state Senate investigating committee= =20 sought contempt penalties because the huge energy company has refused to tu= rn=20 over internal documents.=20 Although Houston-based Enron owns no major power plants in California, it h= as=20 adopted the toughest stance of all energy companies against the multiple=20 investigations of why wholesale energy prices spiked so high. And it has=20 become, in turn, a whipping boy for California politicians.=20 At one point last spring, state Attorney General Bill Lockyer said he wante= d=20 criminal charges against Enron and its chairman, Kenneth Lay. "I would love= =20 to personally escort Lay to an 8-by-10 cell that he could share with a=20 tattooed dude who says, 'Hi, my name is Spike, honey,' " Lockyer said. With= =20 less colorful language, Gov. Gray Davis has often castigated Texas-based=20 companies as price gougers -- even though Texas firms have been fairly mino= r=20 suppliers to California.=20 Some of it is just buzzword politics. Lockyer and Davis know that=20 Californians dislike anything associated with Texas, and Lay has been one o= f=20 President Bush's major political supporters. Enron, meanwhile, cites the=20 rhetoric as evidence that Lockyer, Davis and legislative investigators are= =20 interested less in finding the truth than in seeking scapegoats. Enron also= =20 filed a lawsuit challenging the legality of the Senate's subpoenas of tradi= ng=20 data.=20 Most other energy companies have complied with the demands, creating=20 Sacramento repositories of the data under elaborate confidentiality=20 agreements worked out with the special Senate committee headed by Sen. Jose= ph=20 Dunn, D-Santa Ana. But Enron has refused, and on Saturday, Dunn submitted a= =20 report asking the Senate for "an appropriate coercive sanction."=20 Does Enron have something to hide? Or does it sincerely believe that what's= =20 happening in California is political scapegoating? Are the companies' fears= =20 about the confidentiality of the data sought by the Senate justified? Would= =20 data be selectively leaked to show the firms in the worst light? Would data= =20 be used by competitors? Or could the information find its way into the hand= s=20 of class-action attorneys?=20 Dunn, a prominent trial attorney himself, insists that confidentiality will= =20 be protected and that the information being sought is only for legislative= =20 purposes. But Enron and the other companies have some reason to be wary of= =20 turnin

Enron Names Special Committee To Examine Transactions

10/31/2001 Dow Jones News Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Enron Corp. (ENE) created a Special Committee to examine deals related to the Security and Exchange Commission investigation into transactions involving Enron's former chief financial officer, which has now turned into a formal investigation. The energy-trading company also named William Powers Jr. to its board, making him in charge of the Special Committee, the company said in a press release Wednesday.

Enron says SEC opens formal inquiry into related-party transactions

10/31/2001 AFX News (c) 2001 by AFP-Extel News Ltd

HOUSTON (AFX) - Enron Corp said the Securities and Exchange Commission has opened a formal inquiry into the company's transactions with entities connected with related parties. In a statement, Enron said "the SEC has opened a formal investigation into certain of the matters that were the subject of recent press reports and that previously were the subject of its informal inquiry." Earlier this month, Enron announced a charge of 1.01 bln usd, or 1.11 usd per share, and an incremental 1.2 bln usd reduction in stockholders' equity, related to the unwinding of investments with the related LJM partnership. The SEC requested the company provide information on these related-party transactions days later, and the company dismissed its chief financial officer, Andrew Fastow, for his involvement in running the LJM partnerships. In today's statement, the company announced the election of William Powers Jr to the board, effective immediately. Powers, who is dean of the University of Texas School of Law, will chair a Special Committee to examine and take any appropriate actions with respect to transactions between Enron and entities connected to related parties, it said. In addition to reviewing the transactions in question, the Special Committee is charged with communicating with the SEC and recommending any other actions it deems appropriate. "I have asked the Board to take this action to address fully and forthrightly investors' questions and concerns," said Enron chairman and chief executive officer Kenneth Lay. "Responding to the SEC offers us an additional opportunity to achieve this same goal for investors, and we will cooperate fully. We will also make every appropriate public disclosure during the course of the SEC's investigation." 20 pav/

Enron Says SEC Informal Inquiry Now a Formal Investigation 2001-10-31 17:37 (New York)

Enron Says SEC Informal Inquiry Now a Formal Investigation

Houston, Oct. 31 (Bloomberg) -- Enron Corp. said an informal inquiry by the Securities and Exchange Commission is now a formal investigation, and the Houston-based company's board is appointing a special committee to address allegations related to partnerships run by its former chief financial officer.

William Powers Jr., dean of the University of Texas law school, will chair a committee to handle the SEC's requests for information about the partnership, Enron said.

Key Enron Employees Aren't Jumping Ship, Recruiters Say By Michael Rieke Of DOW JONES NEWSWIRE

10/31/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Enron Corp.'s (ENE) current problems aren't sending its key employees running for the door, according to two executive recruiters. While employees at Enron's underperforming units are shopping around for new jobs, those working for its core wholesale energy trading and retail energy units seem content, the recruiters told Dow Jones Newswires. "We've been getting resumes from their international group over the last year," said Bruce

Peterson, managing director for Korn Ferry in Houston. "But= its been a very well-known fact that they're getting out of those business= es."=20 Another Houston recruiter, who didn't want to be identified, said he has go= tten "a flood" of resumes from employees at Enron's natural gas and power a= ssets in South America.=20 Employees at Enron's broadband unit are also sending out resumes, said the = recruiter. That business has brought the company losses of more than \$100 m= illion this year despite hundreds of layoffs. Enron continues to cut costs = in its telecom business.=20 Neither recruiter has seen many resumes from Enron's big moneymakers - the = wholesale energy trading group and the retail energy services group.=20 Some of the lower-level employees of those units have sent out resumes but = Peterson said he hasn't seen higher-level executives in the job market. How= ever, he attached a caveat to that statement.=20 "Quite a few of the senior people at Enron have left over the last 6-12 mon= ths," he said.=20 When Enron's share price was flying high last year and early this year, som= e of Enron's top executives cashed out their stock options and left the com= pany.=20 Those executives included Cliff Baxter, former vice chairman and chief stra= tegy officer; Ken Rice, former head of Enron Capital and Trade as well as f= ormer chief executive of Enron Broadband Services; Kevin Hannon, former pre= sident of Enron Broadband Services; and Lou Pai, former chairman and chief = executive of Enron Energy Services.=20 The lure of cashing out lucrative stock options won't cost Enron any more e= mployees any time soon. The company's share price has fallen too far too qu= ickly, leaving the options underwater.=20 The company's shares traded as high as \$80 early this year. By July the pri= ce had dropped to around \$50, leaving employees with options that were virt= ually worthless. So Enron told employees it would issue new options in Augu= st.=20 But the company's share price continued to fall as more and more bad news c= ame out. The new options issued in August, when the share prices were aroun= d \$40, are now underwater also.=20 Now that the options are out of the money, Enron employees are more vulnera= ble to the lure of other companies, Peterson said.=20 Enron could face another problem in keeping key people. Its employees work = under two-year contracts. If they leave Enron before their contracts expire= s, a noncompete clause could prevent them for working for a competitor.=20 Some of th

How about talking Monday pm?

There were a ridiculous amount of handouts again on Thursday, some of which directly related to next week's assignments. I thought the quiz was straight forward enough.

Mark - my mom and I were going to go to the Pottery Barn Kids in Corte Madera on Saturday, so perhaps we could stop by your house to drop off copies of the handouts on our way in or out. Send me directions again to your house if you would.

I'm not sure how we can get copies to you Jeff. I could drop them off to your place in SF if that works. Let me know.

Thanks, CV

Jeff, Mark:

Wondering where you were yesterday. Hope you didn't forget about the in-class quiz!

The next HW and writeup due next week seems like a heavy one. Do most of you have Monday off? I'll take a look at the case/HW Sa/Su, and prefer a meeting / conf call anytime Monday. Perhaps PM in the city if folks are working that day? Sunday PM (after 7) works for me too.

In Business This Week: HEADLINER KENNETH LAY: THE SHOES ARE DROPPING By Stephanie Anderson Forest in Dallas=20 Edited by Monica Roman

11/05/2001 BusinessWeek 50 (Copyright 2001 McGraw-Hill, Inc.) When Enron CEO Jeffrey Skilling resigned abruptly in August after six months on the job, longtime Chairman Kenneth Lay assured investors that "there's no other shoe to fall." So much for the warning. On Oct. 16, the Houston-based energy giant reported its first quarterly loss in more than four years after taking \$1.01 billion in write-offs. It also disclosed a surprising \$1.2 billion charge to shareholder equity to help unravel complex transactions between Enron and partnerships that until recently had been overseen by former Chief Financial Officer Andrew Fastow. Then, on Oct. 22, Enron revealed that the Securities & Exchange Commission is probing those Fastow-related transactions. Two days later, Enron promoted Jeff McMahon to CFO and announced that Fastow will take a leave of absence. The setbacks have Lay, who has reclaimed the CEO post, scrambling. He must get operations back on track, fend off shareholder lawsuits, and, above all, rebuild credibility with investors.

STOCKWATCH Enron shares resume fall, down 8 pct as SEC opens investigation

11/01/2001 AFX News (c) 2001 by AFP-Extel News Ltd NEW YORK (AFX) - Enron Corp shares were sharply lower, down more than 8 pct= at midsession, as investors continued to fear that the company's dealings = with the LJM partnership could bring heavy financial reprisals following the opening of a formal inquiry by the Securities and Exchange Commission, dealers said.=20 At 11.55 am, Enron was down 1.35 usd, or 9.57 pct, to 12.55. The DJIA rose 61.23 points to 9,136.44, the S&P 500 gained 8.76 points to 1=,068.40 points, the Nasdaq composite climbed 23.02 points to 1,713.40.=20 Yesterday, Enron announced the election of William Powers Jr to the board, = to chair a Special Committee that will examine and take any appropriate actions with respect to transactions between Enron and entities connected to related parties.=20 In addition to reviewing the transactions in question, the Special Committee = is charged with communicating with the SEC and recommending any other actions it deems appropriate.=20 While the investigation might take time to draw a conclusion, the immediate= cash crunch Enron has been facing is expected to be resolved, said Merrill Lynch analyst Duane Grubert.=20 One step in that direction came following Enron's announcement that JP Morgan and Salomon Smith Barney Inc have executed commitment letters to provide= 1 bln usd in secured credit lines supported by the company's Northern Natural Gas and Transwestern Pipeline assets.=20 Over time, Enron has several other options to raise cash, including cutting= its 400 mln usd per year dividend, cutting back on its 1500 mln usd of capital spending, and monetizing its July 2002 right to convert debt into 11.5= million shares of EOG, said Grubert.=20 The danger for the company now is that a "real or fabricated confidence crisis by Enron's counterparties threatens near term strength of the merchant = segment. Competitors could get mean, and could prematurely shun Enron, while trying to steal market share," he said.=20 blms/aw For more information and to contact AFX: www.afxnews.com and www.afxpress.com

USA: RESEARCH ALERT-Merrill lowers Enron rating.

11/01/2001 Reuters English News Service (C) Reuters Limited 2001. NEW YORK, Nov 1 (Reuters) - Merrill Lynch on Thursday said it lowered both = its mid-term and long-term ratings for Enron Corp. , the No. 1 buyer and seller of natural gas, to "neutral," from "accumulate" and "buy," respectively, due to uncertainty about the U.S. Securities and Exchange Commission's investigation into the company's financial dealings.=20 Analyst Donato Eassey said in a research note that while he "has not altered his view of Enron's fundamentals or its ability to weather the long term = storm," he believes the noise surrounding the SEC's investigation will overpower any earnings analysis. "Ultimate outcome and underlying fundamentals aside, we believe significant= pressure and uncertainty will remain on Enron until the

investigation concludes," Eassey said. "The Houston-based company, whose stock has been sent into a tailspin by the probe, said on Wednesday the informal inquiry by the SEC had become a full-scale investigation of the company's finances. The stock slumped \$1.34, or nearly 10 percent, to \$12.56 in Thursday morning New York Stock Exchange trade. In the past week and a half, the stock has dropped to nine-year lows while losing \$17 billion in market value.

USA: UPDATE 1-Enron says gets \$1 billion in secured credit.

11/01/2001 Reuters English News Service (C) Reuters Limited 2001. NEW YORK, Nov 1 (Reuters) - Enron Corp., facing a probe by U.S. regulators into its financial dealings, on Thursday said it obtained \$1 billion in secured credit lines to bolster investor confidence. Enron said J.P. Morgan, the investment banking arm of J.P. Morgan Chase & Co., and Citigroup Inc. unit Salomon Smith Barney Inc. will provide the credit, which will be secured by Enron's Northern Natural Gas Company and Transwestern Pipeline Co. assets. The proceeds will be used to supplement short-term liquidity and to refinance maturing obligations, Enron said. The commitments are subject to customary terms and conditions, including final due diligence, the company said. The announcement came shortly before opening trade on the New York Stock Exchange, where Enron shares plunged \$1.60, or 11.5 percent, to \$12.30. Earlier Thursday, brokerage house Merrill Lynch & Co. cut its rating on Enron to "Neutral/Neutral" from "Accumulate/Buy." The Securities and Exchange Commission said late Wednesday it was making an informal inquiry into Enron transactions a full-scale investigation.

I would love for you to meet our new VP of Professional Services (who is, incidentally, now for all intents and purposes running our company). I think you will love him. He is very interested in the idea of working with Enron and I want you to meet him. Can we set up a dinner for the three of us sometime in the next couple weeks? I know your schedule is busy with school, so why don't you tell me a couple nights that work (other than Mondays) and I will make it work on our end. Please oh please.

Love,

Your Pal Cameron

P.S. Going to Colleen's new (to me) place for some wine tonight. I'll tell her hello for you?

FW: SFSU Cogen Relocation - Gas Metering

Sender	geoff.pollard@enron.com
Recipients	['john.larsen@enron.com', 'jeff.dasovich@enron.com']
File	dasovich-j/interconnection/10.

Jeff, I am seeking your advice/assistance on an issue with PG&E at San Francisco State University. The attached message indicates that PG&E in unable to meet our schedule requirements for the installation of meters on our generator relocation project at SFSU. We have been working since April to try and ensure this problem would not occur. PG&E has consistently either not responded or been slow to respond. When we did hear back from them, they always assured us that there would be no problem, but they never made firm committments in their responses. Even now they are not providing firm dates.

The delays they are causing will create substantial customer satisfaction problems, and subjects us to Liquidated Damages of \$850 per day.

I have a call into Bob Kinert at PG&E to inform him of our mutual customer satisfaction issue. I am hoping he will be able to take action to improve the schedule. What steps do you reccommend if Bob is of little or no assistance?

Thanks for your timely support.

Geoff Geoff Pollard, PE Account Manager UC/CSU Program Enron Energy Services 925-543-3763

Jeff: Great! Give me just a couple of days to confirm the exact date. Go ahead and write Lari to see when she is available as she'll probably be the hardest person to juggle around.

Now here is a question for you....Rob has been wanting to go up to RRR and check it out but he'd probably be 1/2 day on the beach as other non-riders have been with us in the past. Would this be ok with you or shall I schedule with him for another time? I'm easy either way. Besides Rob the only other people could possibly be Jeff or Alice as the girls (Nora, Kari, Pat) are hot on the summer show circuit. I could always ask, just let me know.

Would you like me to call the B&B we stayed at and get their availability? What is the name?

Madeleine

jdasovic@enron.com wrote:

29th/30th works best for me. those other dates, if they open up, i think would work, too. i'm really sorry i missed you guys yesterday. when kair asked way back when, i had a conflict on that day. fine with me if we ask others, though it's sort of fun when it's small, with like-minded folks. you're call. let me know and i'll write lari a note pronto. sorry to see carl move. best, jeff Madeleine Todd <madeleinet@earthlink.net> on 06/12/2000 03:09:44 PM To: jdasovic@enron.com cc: Subject: Re: I am so sorry for the delay! I wanted to make sure I had a better idea of my schedule. I am thinking the following..either the weekend of the 8th, 9th; the 29th or 30th. I may go to Chicago the 15th or 22nd which I'll know about within the next couple of days thus one more weekend may open up. What are your thoughts? Do you want to check Lari's schedule? Anyone else we should ask? We missed you on Sunday. The whole gang was there minus Lisa. Carl leaves in 2 weeks. They decided to move because he felt his career with the City would never go where he wanted it to go. I can explain the rest later. Madeleine jdasovic@enron.com wrote: > Hello out there. I plan to be booting everyone out of my house before/upon my return from the airport, if you catch my drift, but perhaps we can place some people in Amy Hood's upstairs abode to slave away? Or you can just come at 5:30 or 6? I've told people to come at 7:30, I think, but I am pretty flexible on that.

Amy Hood will provide salad plates, and I think my regular dinner plates are big enough to fit pasta and steak/potatoes/radish salad (which is really a garnish anyway). Does that work?

-----Original Message-----

From: Cameron Sellers [mailto:cameron@perfect.com] Sent: Tuesday, April 17, 2001 1:57 PM To: 'Rogers, Sarah'; Cameron Sellers; Alison McCauley (E-mail); Amy Hood (E-mail); Mari Nayvelt (E-mail) Cc: 'Jeff.Dasovich@enron.com' Subject: RE: Friday

I think it all sounds great. I can probably be at your house around 2pm or so. It looks like you might be off to the airport, but we can coordinate and hopefully someone else might be around. I can make the dressing on Thursday night. I would also be happy to make anything on Thursday that I can. I'll look at the recipes tonight and let you know what I can do ahead of time.

The only thing missing that the birthday boy requested is truffle pasta (and Jeff this is where you come in). This might be very easy and if it is I will take care of it and serve it before the steaks. If I can do it then you might even drop an appetizer (or we'll never get to the cake). Jeff, can you help me with this pasta? Essentially he wants a light truffle pasta like we had everywhere in Tuscany. We have those truffles in jars - any idea what to do with them. We also have truffle oil. If all else fails, I am prepared to cook some fettuccini, slice up one of a truffles, mix in some olive oil and truffle oil and toss. What do you think??

What time are we tell the non-preparers to come??

From: Rogers, Sarah [mailto:srogers@jamcracker.com] Sent: Tuesday, April 17, 2001 1:26 PM To: Cameron Sellers (E-mail); Alison McCauley (E-mail); Amy Hood (E-mail); Mari Nayvelt (E-mail) Subject: Friday

Chicks,

Friday approaches. Alison has graciously volunteered to deal with flowers, and Amy H is going to make a cake. Here is my suggested menu:

Champagne/wine/cocktails (I have) Savory biscotti to dip into medium-bodied red wine (from Martha Stewart) Smoked salmon nori stacks (from Martha Stewart) Moroccan salmon on bamboo skewers (from Martha Stewart) Fancy-looking crudites presented nicely in glasses and whatnot with buttermilk dip (from Martha Stewart) Iceberg wedges with roquefort dressing (Cameron's mom's recipe) Steak with wasabi mashed potatoes and daikon radish salad (April 2001 Bon Appetit) Cake (Amy) Port/champagne/etc (I have some)

I am going to go to the grocery store on Thurs afternoon and could potentially make the biscotti then. I have picked things that I think will look impressive but not be impossible to get done (a) relatively quickly and (b) ahead of time. I think the mashed potatoes can also be done ahead of time.

I may have a conference call on Fri from 9-11, but I hope to put it on mute while I chop things. I will have to do some work and also pick up Bob at the airport at 2:30, but any help is welcomed (either in person or on your own separately). Let me know what your plan is and what you'd be interested in doing, as well as any questions or concerns you have about le menu.

This will be soooooooooo fun!

Everyone is welcome at my humble abode to chop/dice/cut whatever they please whenever they please - I will not be there, but will leave a key if you guys are interested in using the space - just let me know and it is all yours as sadly I apparently am expected to work that day.

Amy Hood

I plan to be booting everyone out of my house before/upon my return from the airport, if you catch my drift, but perhaps we can place some people in Amy Hood's upstairs abode to slave away? Or you can just come at 5:30 or 6? I've told people to come at 7:30, I think, but I am pretty flexible on that.

Amy Hood will provide salad plates, and I think my regular dinner plates are big enough to fit pasta and steak/potatoes/radish salad (which is really a garnish anyway). Does that work?

I think it all sounds great. I can probably be at your house around 2pm or so. It looks like you might be off to the airport, but we can coordinate and hopefully someone else might be around. I can make the dressing on Thursday night. I would also be happy to make anything on Thursday that I can. I'll look at the recipes tonight and let you know what I can do ahead of time.

The only thing missing that the birthday boy requested is truffle pasta (and Jeff this is where you come in). This might be very easy and if it is I will take care of it and serve it before the steaks. If I can do it then you might even drop an appetizer (or we'll never get to the cake). Jeff, can you help me with this pasta? Essentially he wants a light truffle pasta like we had everywhere in Tuscany. We have those truffles in jars - any idea what to do with them. We also have truffle oil. If all else fails, I am prepared to cook some fettuccini, slice up one of a truffles, mix in some olive oil and truffle oil and toss. What do you think??

What time are we tell the non-preparers to come??

Chicks,

Friday approaches. Alison has graciously volunteered to deal with flowers, and Amy H is going to make a cake. Here is my suggested menu:

Champagne/wine/cocktails (I have) Savory biscotti to dip into medium-bodied red wine (from Martha Stewart) Smoked salmon nori stacks (from Martha Stewart) Moroccan salmon on bamboo skewers (from Martha Stewart) Fancy-looking crudites presented nicely in glasses and whatnot with buttermilk dip (from Martha Stewart) Iceberg wedges with roquefort dressing (Cameron's mom's recipe) Steak with wasabi mashed potatoes and daikon radish salad (April 2001 Bon Appetit) Cake (Amy) Port/champagne/etc (I have some)

I am going to go to the grocery store on Thurs afternoon and could potentially make the biscotti then. I have picked things that I think will look impressive but not be impossible to get done (a) relatively quickly and (b) ahead of time. I think the mashed potatoes can also be done ahead of time.

I may have a conference call on Fri from 9-11, but I hope to put it on mute while I chop things. I will have to do some work and also pick up Bob at the airport at 2:30, but any help is welcomed (either in person or on your own separately). Let me know what your plan is and what you'd be interested in doing, as well as any questions or concerns you have about le menu.

This will be soooooooooo fun!

File	dasovich-j/all_documents/195.

Please let me know at your earliest convenience, whether the comments, declaration and matrix meet with your approval. As noted below, PG&E will be signing the comments on behalf of all consenting OFO Settlement parties.

Salle E. Yoo Davis Wright Tremain One Embarcadero Center, Suite 600 San Francisco, CA 94111 Tel. 415 276-6564; Fax 415 276-6599 salleyoo@dwt.com

-----Original Message----- From: Yoo, Salle Sent: Wednesday, November 17, 1999 2:32 PM To: 'Amirault, Paul'; 'Craig Chancellor'; 'Gerald Worster'; 'Grant Kolling'; 'James Weil'; 'Jeff Dasovich'; 'John Leslie'; 'Marcel Hawiger'; 'Mark Baldwin'; 'Mark Pocha'; 'Michael Rochman'; 'Raveen Maan'; 'Rich Hall'; 'Ron Oechsler'; 'Tom Solberg'; 'Timothy J Hamilton'; 'plg@cpuc.ca.gov'; 'mark.c.moench@wgp.twc.com'; 'mday@gmssr.com'; 'jmct@gmssr.com' Cc: How-Downing, Lindsey Subject: FW: Comments on OFO Settlement Enclosed is a copy of the proposed Comments of the Settlement Parties in Support of the OFO Settlement. ("Comments") The Comments address the specific issues raised by ALJ Biren at the last prehearing conference as laid out below in our previous email. I am also attaching a copy of the Declaration of Dan Thomas (addressing how the Settlement is in the public interest) and the matrix developed by PG&E that compares the terms of the OFO Settlement to those in the Gas Accord. In order to expedite the process, PG&E has suggested that it, as a representative of all settlement parties, be the sole signatory to the Comments. Therefore, please review the enclosed documents, provide any revisions and an indication of your assent/dissent to having PG&E sign the document on your behalf by end of business tomorrow (Thursday, November 18). The deadline for filing the Comments in Monday, November 22. If you have any questions, please do not hesitate to call. Salle E. Yoo Davis Wright Tremain One Embarcadero Center, Suite 600 San Francisco, CA 94111 Tel. 415 276-6564; Fax 415 276-6599 salleyoo@dwt.com <<Comments_OFO.doc>> <<dft-dec.doc>> <<chart.doc>> -----Original Message----- From: Yoo, Salle Sent: Monday, November 15, 1999 11:16 AM To: 'Amirault, Paul'; 'Ben Ledene'; 'Craig Chancellor'; 'Grant Kolling'; 'Jeff Dasovich'; 'John Leslie'; 'Marcel Hawiger'; 'Mark Pocha'; 'Michael Rochman'; 'Raveen Maan'; 'Ron Oechsler'; 'Tom Solberg'; 'Rich Hall'; 'Mark Baldwin'; 'Timothy J Hamilton'; 'pgg4@pge.com' Cc: 'Katie Elder'; How-Downing, Lindsey Subject: Comments on OFO Settlement CONFIDENTIAL AND PRIVILEGED COMMUNICATION SUBJECT TO CPUC RULE 51 As you recall, at the prehearing conference, Judge Biren directed the OFO settlement parties to provide her with additional information regarding the OFO settlement. Friday, Nov.12, Patrick Golden and I had a follow-up conversation with Judge Biren to confirm the procedure by which she desires to receive the information. As a result of the call, Patrick and I suggest that the OFO settlement parties file joint "Comments Supporting Settlement" on Nov 22, along with any other party which may file comments on the settlement. Our comments would encompass the following: 1) The settlement is in the public interest as attested by an attached declaration. 2) The settlement does not constitute a change in the basic Gas Accord settlement; it merely refines implementation details on the Gas Accord. As a result, no hearings are necessary on the settlement. 3) Neither SB1602 nor 1421 impact immediate Commission approval of the settlement. 4) The settlement is intended to be a final, not an interim, settlement. With respect to Judge Biren's request for declarations (which she reconfirmed despite agreeing that Rule 51 does not require declarations), Patrick and I discussed having the settling parties provide one declaration from PG&E outlining the reasons why the settlement is in the public interest, and having the PG&E declarant be authorized to state that the following parties authorize him to state that they support his declaration. Judge Biren confirmed that any replies to our comments would be due along with all other reply comments on the settlement. If you have any comments or suggestions on this approach, please let either Salle Yoo or me know ASAP. Anil,

Questions for you: Is Zircom in an easily definable industry so we can make comparable studies and valuations? Is their much public history of the firm? Will such an acquisition have a significant influence on Intel's earnings (my guess is no since Zircom's latest annual revenue was only \$500 million versus Intel's \$20+ billion revenue)? Can we make reasonable future estimates of Zircom's financial statements and business lines?

I, for one, have little knowledge or confidence in myself of analyzing a tech company. Given the fact that Anil is the only person in the industry from our group we would be heavily reliant on him to give us strategic insight on the companies and their businesses. My preference- an industry that is relatively more stable and simple for all of us to understand. While we don't have to do Amazon specifically, I would like an industry or company that won't require an immersion of readings just to understand the product, sales distribution, clients, distributors, etc. Remember, we have to make guestimates about the future of the industry and predict sales, costs, etc. The nice thing about Amazon (or a similar company) is that it is merely an Internet twist on an industry with a very long history and an easy to understand business model. Webvan could be another example.

Another idea: Trying to value Fidelity Investments- a private company. The nice thing about this exercise is that there is a lot of data on comparable companies (T. Rowe Price, Zurich Scudder, Franklin Templeton) and some public information on Fidelity. A good portion of our valuation would be based on assumptions which means that as long as we can support our assumptions we can't be wrong.

_____Reply Separator_____ Subject: RE: Group Project Author: cvavrek@deloitte.com (Vavrek; Carolyn (US - San Francisco)) Date: 03/14/2001 1:03 PM

My vote is for analyzing the Intel purchase because we have access to some inside info, Anil is well versed in this industry (I assume) so we could do some good comps analysis and it seems like the right size case for us. We could easily send Sarah the link Anil sent us and say that we are going to analyze this acquisition. I am also open to the Amazon analysis, although I am not as excited about analyzing such a popular issue.

I was just brainstorming on potential projects. I thought that an interesting and fairly relevant topic could be a current evaluation of Amazon.com and how the projected revenues & profits relate to the current stock price. We could also provide some historical perspective on all realistic Amazon's stock price was a year or two ago relative to a discounted cash flow. I can fairly easily get my hands on some Wall Street analyst research reports that could provide us with some insights and hints as to what Wall Street is expecting. Most of our time can be spent creating a discounted cash flow model similar to what we have been doing in class. Since the jury is still out on Amazon's business model, I think it would make for some interesting debate in class when we present our model.

Business; Financial Desk JAMES FLANIGAN New Mix Needed to Fuel Energy Future JAMES FLANIGAN

05/20/2001 Los Angeles Times Home Edition C-1 Copyright 2001 / The Times Mirror Company

For all the debates about President Bush's national energy policy, the issues are more simple than complicated. The most basic fact pushing the new policy is an Energy Department projection that U.S. use of electricity will grow seven times faster in the next two decades than it has in the last 10 years. And, of necessity, that growth will have to be satisfied with a different mix of fuels. Today 52% of the nation's electric power is generated by burning coal and 16% comes from burning natural gas. But natural gas is the growth element, projected to supply 33% of U.S. electricity 20 years from now. Coal will continue to be the largest factor in electricity generation, the Bush plan states, but its role will decline because of environmental considerations. Techniques already in use--such as turning coal to gas before burning--can eliminate most of the polluting sulfur and nitrogen oxides. But coal's inefficient combustion generates high levels of carbon dioxide and accompanying concerns about global warming, so its use will be in relative decline. That's why the energy policy talks of increasing the use of nuclear power, which supplies 20% of U.S. electricity. And that's also why the heart of the program supports exploration for natural gas and the building of pipelines to increase the availability of that efficient, relatively clean fuel. Why is energy use projected to rise faster than it has in the recent past? Because the use of computer networks that today control the functioning of most institutions in society--companies, schools, government--is already increasing. Such

networks demand electric power that is far more reliable than ever before. And those demands have pushed the infrastructure of transmission lines and other facilities to the breaking point. So a major thrust of the new policy is to support the modernizing of transmission systems and other infrastructure. The plan's very existence is positive, business people say. It's an antidote to local bickering. "We now have a plan about energy expansion, so a national dialogue can begin," says Mark Stevens, head of strategic planning for Fluor Corp., a major engineering and construction company based in Aliso Viejo in Orange County. The new policy offers a stark contrast to the past. During the last major energy crisis, which began with the 1973 oil embargo, government policy aimed to allocate scarce resources. Utilities were restricted from burning natural gas to produce electricity, for example. Now the aim is to increase production of fuels and energy. A sure consequence will be lower prices for oil and natural gas within a few years, energy experts say. From current levels of \$4 to \$5 per thousand cubic feet, natural gas "will be selling for \$3 to \$4 by 2003," says Thomas Robinson of Cambridge Energy Research Associates. Such price levels, however, still will be more than double those of most years in the last decade. So the businesses of exploration, production and delivery of natural gas will remain brisk. Current U.S. consumption of natural gas is nearly 23 trillion cubic feet a year, up 21% from a decade ago. Pushed by such demand, industry is investing in major projects--such as the natural gas pipeline from Prudhoe Bay in northern Alaska down through Canada, on which design and engineering are underway. Oil field and gas service companies such as Halliburton Co. and BJ Services Co. have been working flat out for more than a year. Companies that survived lean years when oil and natural gas prices were low, such as Global Marine Inc., now are thriving. Under the Bush proposals, exploration for natural gas in the Rocky Mountains and other land areas would increase. That would mean even more work for drilling and production companies such as Helmerich & Payne Inc., Noble Affiliates Inc. and Noble Drilling Corp., which have been reaping higher sales and earnings after half a decade of lean times. Imports of natural gas will grow. Mexico's natural gas, now being flared as it comes up with oil in the Bay of Campeche, surely will find its way north to markets in the U.S. and northern Mexico, either as liquefied natural gas or through pipelines that will be constructed. A main thrust of the Bush proposals will be to modernize and expand electric transmission lines. And here again the new policy is focused on programs already underway. The Federal Energy Regulatory Commission is working to set up new kinds of private companies, called regional transmission organizations, that would buy transmission lines from investor-owned and municipal utilities and ultimately meld them into a national grid. Such RTOs, financed by institutional investors, would increase the flow of electricity across the country and, in theory, eliminate bottlenecks. That would enhance the growing practice of many utilities and companies such as Enron Corp. of trading electricity in financial futures markets. PG&E Corp. and Sempra Energy, the holding companies for two of California's three big investor-owned utilities, operate large power trading businesses. But legislation would be required to establish RTOs and to acquire local transmission lines, and that issue should lead to pitched battles in Congress. With its devotion to infrastructure, the White House energy plan is certain to give increased work to engineering and construction companies--Fluor, Bechtel Group Inc., Jacobs Engineering Group Inc., URS Corp. and Washington Group International Inc.--that already have heavy backlogs. "We'll be hiring engineers," says Fluor's Stevens--if he can find them. The numbers of engineering graduates from U.S. universities have been declining, but as a result of opportunities presented by the Bush energy program, enrollments in engineering schools could increase. Or U.S. companies could draw on engineering expertise at their subsidiaries in Asia and Europe, where engineering graduates still are in abundance. Bush's energy plan, if most of its proposals win approval in Congress, would serve as a catalyst for investment in electric power generation and oil and natural gas production, as well as research on coal, nuclear and, to a lesser extent, wind and solar power and other forms of renewable energy. Such investment always has a ripple effect on other industries. Even in the 1970s, this brought surpluses and lower prices for energy, which benefited companies in sectors as diverse as chemicals, food processing and tourism. That is this plan's aim also, as we look ahead to "interesting times," in the Chinese proverb's ambivalent phrase, for U.S. energy prospects and the economy. * James Flanigan can be reached at jim.flanigan@latimes.com. (BEGIN TEXT OF INFOBOX / INFOGRAPHIC) Energy Disparity Fuel sources for electricity in California and other states contrast sharply. California burns less

UK: UPDATE 1-Scot Power in talks to buy Portland-sources By Andrew Callus 04/30/2001 Reuters English News Service (C) Reuters Limited 2001. LONDON, April 30 (Reuters) - Scottish Power Plc has held talks with Enron Corp about buying its Portland, Oregon-based power utility Portland General, a good geographic fit for the British group's existing U.S. arm PacifiCorp, industry sources said on Monday. "It's an obvious one and, yes, there have been discussions," said one source speaking after the official breakdown last week of energy trader Enron's talks to sell Portland to Nevada-based utility Sierra Pacific Resources Corp . PacifiCorp operates in six U.S. states including Oregon, and has its headquarters in Portland, the state capital. Utility holding company Sierra had been preparing to pay about \$2 billion for Portland and assume \$1 billion in debt. But the deal ran into trouble as the U.S. West Coast power crisis unfolded earlier this year, and talks were officially called off last Thursday. Reports that Britain's biggest utility may step in for Portland's 700,000 customer base and 2,000 megawatts of generating capacity surfaced at the weekend in Britain's Observer newspaper. PacifiCorp faces its own power crisis fallout, including \$1 million a day buying-in costs resulting from the failure of one of its generators. The problems have helped depress Scottish Power's share price to a point where it now registers five percent UK sector underperformance over the past two years. And analysts said Portland has a significant exposure to current high U.S. power prices, with only about 2,000 megawatts of its own generating capacity but 3,700 megawatts of peak demand to satisfy. U.S. utility acquisitions are always fraught with regulatory difficulties and in this case an additional regulatory complication is that Portland owns a decommissioning nuclear power station. COST SAVING OPPORTUNITIES Nevertheless, Scottish Power has said it intends to expand further in the U.S. to exploit opportunities for merger cost savings in a highly fragmented market - The group's English rival National Grid Group was able to take out 40 percent of New England utility EUA's cost base by merging it with neighbouring power group NEES last year. Its current weak share price and lack of cash after the PacifiCorp buy has hindered development, but in March it made clear it might sell its UK water business, Southern Water. The proceeds are earmarked for acquisition purposes, and industry sources have put the price sought at 1.7-1.8 billion pounds (\$2.4-2.6 billion). Enel of Italy has confirmed an interest. On Monday,

Scottish Power was tightlipped. "We do not comment on market speculation," said a spokesman. But analysts said Portland was an obvious choice, given that it serves mainly the city of Portland and its surrounding area, in the middle of one of PacifiCorp's key markets. "It's hard to see them finding a better company to buy in terms of geographic fit and potential cost savings," said Peter Atherton of Schroder Salomon Smith Barney, who released a note last week pointing out the opportunity. But he is wary of the move. "On the surface selling Southern Water and acquiring PGE (Portland)... would appear attractive for SPW," said the research note. "However the loss of Southern Water's predictable earnings profile would, at least short term, put pressure on earnings and dividend cover." Scottish Power will face questions about Portland and Southern Water at its annual results presentations on Thursday this week. Analysts predict pretax profit before goodwill amortisation and exceptional items of 612-643 million pounds for the year to March 2001 down from 736 million a year earlier. Lower wholesale prices and regulatory price cuts on retail and distribution in the UK will more than offset the effect of a complete full year contribution from PacifiCorp, which only fed into Scottish Power's profits for four months in the previous year. A change to accounting practices which alters the way deferred taxation is treated will also account for about 40 million pounds of the profit fall, analysts said, with higher telecoms losses also a factor.

India State Panel Set Up To Rework Dabhol Power Pact

04/30/2001 Dow Jones International News (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW DELHI -(Dow Jones)- India's Maharashtra state government Monday appointed a nine-member committee to renegotiate the controversial power purchase agreement with the U.S. energy major Enron Corp.'s (ENE) Indian unit Dabhol Power Co., the Press Trust of India reported Monday. The government has asked the committee, headed by former federal Home Secretary Madhav Godbole, to attempt to negotiate a revised agreement within a month, the PTI said. The committee's goals are to bring down the power tariff and allow the sale of excess power to the federal government or its utilities, the PTI said. A restructure of Dabhol's stakeholding may also be on the agenda. The \$3 billion, 2,184-megawatt Dabhol project has been mired in financial disputes after the Maharashtra State Electricity Board, its main customer, failed to pay several bills. The project has the largest single foreign investment in India. Texas-based Enron has a 65% stake in Dabhol Power, and is the project's largest shareholder. Other shareholders include the MSEB with 15% and General Electric Co. (GE) and Bechtel Enterprises (X.BTL) with 10% each. -By Himendra Kumar, Dow Jones Newswires; 91-11-461-9427; himendra.kumar@dowjones.com

SURVEY - ENERGY & UTILITY REVIEW: US edges closer to new energy policy: The recent power crisis in California has raised American awareness of the situation and the Bush administration seems to be more committed to the problem, writes David Buchan Financial Times, Apr 30, 2001 By DAVID BUCHAN The US is striving towards some kind of energy policy. When it eventually gets one, the impact on the rest of the world will be considerable. The long-term health of the world's biggest economy, depends on resolution of its domestic energy problems. It also has an impact on the market and climate generally as the world's biggest importer of oil and emitter of greenhouse gases. The US is also home to the world's largest private energy sector, but also has a government prone to use energy as a weapon of foreign policy. Through sanctions, Washington has kept its own companies

***** AS COMMERCE COMMITTEE VOTE NEARS ON HR 1542, BELLS SPAR WITH CLECs, IXCs OVER 'SUBSTITUTE'

Bell company interests predict the Internet Freedom and Broadband Deployment Act, HR 1542, will clear the House Energy and Commerce Committee by a comfortable margin tomorrow. Opponents, however, hope that enough amendments and opposition will surface to dampen Congress's enthusiasm for broadband "relief" legislation.

"It looks like it will pass," U.S. Telecom Association interim President and Chief Executive Officer Gary S. Lytle told TR today after a press briefing to review the legislation. "It should get somewhere in the mid to high 30s," he said, referring to the number of members on the 57-person panel that USTA predicts will vote for the bill at tomorrow's markup session. The bill cleared the telecommunications and the Internet subcommittee last month by a 19-14 vote (TR, April 30).

Meanwhile, a "substitute" version of HR 1542 that began circulating late last night (Monday) has sparked another round of bickering between Bell company interests and members of the competitive local exchange carrier and interexchange carrier industries. The substitute, released by Commerce Committee Chairman W.J. (Billy) Tauzin (R., La.), incorporates the four amendments that were approved by the telecom subcommittee. It also adds new language regarding FCC rules

on ILECs' resale of advanced services and "line sharing" and new definitions for "Internet backbone services" and "Internet access service."

H. Russell Frisby Jr., president of the Competitive Telecommunications Association, said the new provisions would make the legislation "go from bad to worse under the guise of compromise." The new definition of "Internet backbone services" is too broad, he said, as it would include too many services in a deregulated regime.

Mr. Frisby also pointed to language that purportedly would preserve CLECs' ability to implement line sharing. The FCC's line-sharing rules permit CLECs to offer data services over the high-frequency portion of a line while the ILEC continues to provide voice services over the lower-frequency portion. But Mr. Frisby said the substitute bill would invalidate later FCC orders that "put the meat on the bones" of the line-sharing mandates.

According to a copy of the substitute draft, the FCC's rules on line sharing would remain intact, but ILECs wouldn't be required to provide access to the high-frequency portion of the loop at the remote terminal -- a provision that another critic agrees would "undercut" the Commission's line-sharing rules. "If line sharing is not allowed through remote terminals, then 35% of consumers will be denied residential broadband competition because of this bill," the CLEC source said.

That claim, however, was disputed by Thomas J. Tauke, senior vice president-public policy and external affairs for Verizon Communications, Inc. Speaking with reporters at the USTA press briefing, Mr. Tauke said the bill's new line-sharing language would have a "minimal effect" on CLECs in Verizon's service territory because "very few of them use" line sharing. For Verizon, the substitute language would eliminate the "economic and practical problems of providing for line sharing when we have fiber in the local loop," he said.

Rep. Tauzin's substitute bill also has new language requiring ILECs to continue reselling advanced services at wholesale rates for as many as three years after enactment of the bill. The original version of the bill would have given ILECs an immediate exemption from resale obligations.

Committee staffers were said to be working out last-minute details on another amendment that's expected to be offered tomorrow by Reps. Cliff Stearns (R., Fla.), Bobby L. Rush (D., Ill.), and Thomas C. Sawyer (D., Ohio). According to sources, the amendment would give ILECs immediate regulatory relief. But it would require ILECs to make about 70% of their central offices DSL (digital subscriber line)-ready by a date certain, most likely within three years of enactment.

Mr. Tauke said Verizon would oppose any DSL buildout requirements, saying "it's good public policy not to have a buildout provision in this legislation." The government should mandate buildout requirements "only when the market isn't working," he said.

Many of the same amendments that were withdrawn during the telecom subcommittee's review are being teed up for tomorrow, including several from Rep. Tom Davis III (R., Va.) and one from Rep. Anna Eshoo (D., Calif.) to require Bell companies to continue filing service-quality and accounting reports at the FCC. Rep. Tauzin has said he would address FCC "enforcement" issues at tomorrow's markup session, but he may not tackle those issues through legislation.

Asked by TR whether Rep. Tauzin planned to offer an FCC enforcement amendment to HR 1542, spokesman Ken Johnson said today, "I can only confirm that Reps. Tauzin and [Rep. Fred Upton (R., Mich.)] will offer an

Enron Replaces Fastow as Finance Chief --- McMahon Takes Over Post; Move Fo= llows Concerns Over Partnership Deals By Rebecca Smith and John R. Emshwiller Staff Reporters of The Wall Street Journal

10/25/2001 The Wall Street Journal A3 (Copyright (c) 2001, Dow Jones & Company, Inc.)

Enron Corp. replaced its embattled chief financial officer, Andrew S. Fastow, capping a tumultuous day in which the huge energy company saw its stock = price again fall sharply and help pull down the share prices of other major= energy-trading companies.=20 Investors appeared worried that Enron's recent woes could have a destabiliz= ing effect on the energy-trading market. The Houston energy powerhouse, wit= h annualized revenue topping \$150 billion and assets of more than \$60 billi= on, handles transactions representing roughly one-quarter of the nation's t= raded-electricity and natural-gas volumes. In less than two years of operat= ion, its EnronOnline trading platform has become a central marketplace for = the energy business and already has handled more than \$880 billion in trans= actions. "Enron makes the market. Make no mistake about that," said Merrill Lynch an= alyst Donato Eassey. "There's not a trader out there that doesn't use Enron= Online." As such, Enron enters into thousands of transactions every day in = which the company's credit-worthiness is critical. Enron said its business = operations were functioning normally yesterday. The company also has consis= tently said it is financially strong and liquid.=20 Enron said its new chief financial officer is Jeffrey McMahon, the 40-year= old head of the company's industrial-markets division. His selection may be= intended, in part, to raise the company's credibility. People familiar wit= h the matter say Mr. McMahon left his job as treasurer last year after voic= ing concerns within the company about Mr. Fastow's role in running two limi= ted partnerships that were involved in billions of dollars worth of transac= tions with Enron. Internal partnership documents indicate Mr. Fastow and po= ssibly a handful of associates made millions of dollars from the partnershi= ps. Mr. Fastow severed his ties with those partnerships in July in the face= of increasing conflict-of-interest concerns being expressed by Wall Street= analysts and major Enron investors. On Monday, Enron announced that the Se= curities and Exchange Commission was looking into the Fastow-related transa= ctions.=20 While Enron as recently as Tuesday strongly defended Mr. Fastow, as well as= the company's dealings with the partnerships, controversy over those arran= gements clearly played a role in the executive's departure. "In my continue= d discussions with the financial community, it became clear to me that rest= oring investor confidence would require us to replace Andy as CFO," said Ch= airman and Chief Executive Kenneth Lay in a prepared statement.=20 Enron said Mr. Fastow "will be on a leave of absence from the company." He = couldn't be reached for comment.=20 It remains to be seen how much Mr. Fastow's removal will assuage an increas= ingly restive investment community. The action came after the 4 p.m. market= close and followed a day in which Enron's stock once again plunged. As of = 4 p.m. in New York Stock Exchange composite trading, Enron shares were at \$= 16.41, down \$3.38, or 17%. It topped the Big Board's most active list at ne= arly 76 million shares, more than twice the volume of the second-most-activ= e stock. Several trades yesterday involved blocks of 800,000 shares or more= , possibly indicating

that some institutional holders are souring on Enron = stock.=20 Enron's shares are down about 50% from the beginning of last week. Earlier = this year, the stock was above \$80 a share.=20 In an apparent ripple effect, the stocks of other energy-trading companies,= which do business with Enron, also fell sharply yesterday. For instance, D= ynegy Inc. shares on the Big Board were off \$5.45, or 13%, at \$37.26. A num= ber of the energy companies hit by the selloff have business strategies muc= h different than Enron's, which rely heavily on complex and highly structur= ed investment vehicles.=20 Prudential Securities analyst Carol Coale said Mr. Fastow's departure could= be seen as evidence that "management does care" about investor concerns. H= owever, she adds, the move also could be viewed by some investors, coming a= s it did two days after the announcement of the SEC inquiry, as "an admissi= on of guilt." Ms. Coale yesterday issued a sell recommendation on Enron lar= gely because of uncertainties about the company's extremely complex financi= al structure.=20 Enron has consistently denied any wrongdoing in its Fastow-related dealings= .=20 Worries and rumors about Enron's financial strength could be found in the s= tock market yesterday. Goldman Sachs analyst David Fleischer said he heard = people voice concerns about a possible "death spiral" in which increasing c= redit concerns about Enron would decrease the number of people willing to d= o business with the company, which would in turn weaken its finances and le= ad to further business reductions. Mr. Fleischer, a longtime fan who still = has a buy recommendation on the company, said he hasn't yet seen any eviden= ce of such a problem.=20 However, Mr. Fleischer said, Enron needs to disclose more information about= its myriad of financial transactions with related partnerships and other e= ntities. Enron is facing a problem with "trust and credibility. It's not ea= sy to regain something as basic as trust," he said.

IBEW Statement on PG&E Bankruptcy

PR Newswire 04/06/01, 5:02p (Copyright , 2001, PR Newswire)

WASHINGTON, April 6 /PRNewswire/ -- In response to the bankruptcy announcement made by Pacific Gas and Electric, Edwin D. Hill, International President of the International Brotherhood of Electrical Workers (IBEW), issued the following statement.

"Pacific Gas and Electric's filing for bankruptcy could make a dire situation in California even worse. On behalf of the 13,500 IBEW Local Union 1245 members employed by PG&E and the public they serve, we believe it is imperative that constructive action be taken now.

"Specifically, we call on the Federal Energy Regulatory Commission (FERC) to stop dragging its feet and impose price controls on the wholesale electricity market in California. It is obvious that price gouging by wholesale suppliers has bled dry the investor-owned utilities and precipitated this crisis. The state has purchased power in an effort to prop up the system, but it too has paid the same inflated prices. This only threatens California's budget surplus and places an unfair burden on taxpayers while doing nothing to address the root of the problem.

"We also believe that it is time for government and industry to work together to jump start projects to improve the interconnected transmission grid in the Western states so that power can be quickly and efficiently moved to where it is needed. Prompt action on such projects could have helped alleviate the current problems, and they should commence with all due speed.

"Another factor that has driven the crisis is the lack of adequate generation facilities to power the growth of California and other Western states. We urge the Western Governors Association to take the lead in helping to chart a course that will bring more facilities on line and provide short and long term solutions to these difficulties.

"Even though we have been assured that PG&E employees will still be paid, and we know that their pensions are protected by law, we will fight to ensure that our collective bargaining rights are honored during this process. We will work with our Local Union 1245, utility management, Governor Davis and all other parties to restore sanity and reliability to California's gas and electricity systems."

Duke Energy Statement Regarding Pacific Gas & Electric Company Filing for Chapter 11 Reorganization

PR Newswire 04/06/01, 4:34p (Copyright , 2001, PR Newswire)

CHARLOTTE, N.C., April 6 /PRNewswire/ -- Duke Energy Corporation (NYSE: DUK) today issued the following statement:

We regret that the collective actions to mitigate Pacific Gas & Electric's (PG&E) financial crisis were unsuccessful in keeping it from filing for Chapter 11 reorganization. However, the Chapter 11 filing provides a defined process to collect our past receivables and keep PG&E in business going forward.

Duke Energy had taken a number of aggressive steps to limit its financial exposure to uncertainties in California's energy market, including the potential bankruptcy of the state's investor-owned

Enron Gets Electricity Contract

04/04/2001 The Wall Street Journal (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -- Enron Corp. said it signed an agreement to provide more than \$600 million of electricity to J.C. Penney Co. The energy concern said it will provide electricity to 1,250 J.C. Penney retail locations in 50 states. The Dallas retailer said the move will protect it from volatile energy prices. The companies declined to comment on the length of the contract. In 4 p.m. New York Stock Exchange composite trading, Enron fell \$2.51 to \$54.07 and J.C Penney fell four cents to \$15.55.

Energy Companies Use Sports to Win Market Share

04/04/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

BOULDER, Colo., April 4 /PRNewswire/ -- As umpires shout "Play Ball!" and the first pitch is thrown at Enron Field, Cinergy Field, and Edison Field, the biggest winners of the day may not be the teams on the field. No matter what the final score is, the stadium sponsors will have won significant marketing and branding advantages over their competitors. Or so goes the thinking in the war rooms of an increasing number of utility companies. Ballparks, racetracks, and even local playgrounds have become new arenas for energy industry competition. As never before, energy companies are sponsoring golf tournaments; major and minor league baseball, football, basketball, and hockey teams; college sports; soccer matches; local events; horse racing, and even the Olympics. The list is nearly as long as the Cinergy Indianapolis marathon. Sport marketing -- the corporate sponsorship of a sporting event or team for the purpose of marketing a product or service -- is big business worldwide. In 2000, U.S. corporations alone spent \$5.92 billion on sport sponsorships, up 16% from 1999. "Energy companies represent one of the fastest-growing segments of the sport sponsorship market," says Matthew Joyce, an energy industry analyst at E Source and co-author of a new report on sport sponsorship. "Under pressure to differentiate themselves in a changing energy marketplace, many utilities and competitive energy service providers are turning to sport marketing to link their products and services with popular sporting events and teams," adds Joyce. These firms are sponsoring sports to increase name recognition, improve sales, and demonstrate good corporate citizenship, as well as to accomplish a host of other goals. Sports hold a universal appeal -- the desire to play is inherently human. Few other elements of society command the passion or participation engendered by sports. "In one form or another, sports encompass nearly the entire demographic spectrum. It taps into people's emotions, making it an especially attractive marketing vehicle," adds the report's co-author, Melissa Tuck, also of E Source. Though multi-million-dollar stadium naming agreements grab headlines, many firms are achieving their marketing objectives through less expensive, lower-profile sponsorships such as donating land for local sports fields, refurbishing parks, sponsoring youth sport clinics, and supporting charity events. But at every level of competition, energy companies are striving to create connections that will give rise to business relationships that fans will love and their rivals will hate. The just-published report from E Source, "Playing to Win: Sport Marketing for ESPs," examines sport marketing efforts across the energy industry -- from major stadium and arena naming deals to corporate sponsorship of grassroots sporting events. It pinpoints factors that determine whether energy service providers should consider sport marketing as an integral part of their strategic marketing plan and outlines criteria for determining whether a given sponsorship is having the desired effect. ITALY: ANALYSIS-Power competition makes little headway in Spain. By Dominique Magada

04/04/2001 Reuters English News Service (C) Reuters Limited 2001.

VENICE, Italy, April 4 (Reuters) - Spain has not yet introduced fair competition in its power market which is still dominated by domestic utilities, new entrants to the Spanish market said this week. "The impact of the opening of the market to competition in Spain has been close to nothing," Steven Taylor, origination manager at independent power producer (IPP) Cinergy Global Power in Spain, told an energy conference. "There are 20 new entrants in Spain and they haven't had much impact on generation or supply." Among new entrants other than his company, he mentioned U.S. firms TXU Europe, AES Corporation and Enron, German RWE, Electricidad de Portugal, Intergen and Belgian Electrabel. French utility Electricite de France, which is also keen to buy a stake in the Spanish power sector, has been selling electricity to Spain since before liberalisation. Taylor said reasons for the lack of competition in the Spanish market include the lengthy process for new plants' planning permission, difficulties in securing gas supply contracts for new plants and the lack of regulatory intervention in the market place. "We need a regulator with more teeth to regulate the market," he said. LACK OF GAS COMPETITION A BIG PROBLEM He added that another issue is the lack of liquidity in the gas market and the absence so far of gas-to-gas competition which makes it hard for new entrants to secure supplies. "A number of plants

have received planning permission but are not secure deals for the supply of gas to the plants," said Tony Taylor, Director of fuel procurement at IPP Intergen, a Shell-Bechtel joint venture, also involved in Spain. Gas markets in Europe were liberalised last August when the EU Gas Directive came into force. The sector is gradually opening starting with large industrial consumers

Enron Vice Chairman J. Clifford Baxter To Resign

05/02/2001 Dow Jones News Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Enron Corp. (EBE) Vice Chairman J. Clifford Baxter is resigning from the company to spend more time with his family. In a press release Wednesday, the energy and communications company said Baxter will continue working for Enron as a consultant. Baxter joined Enron in 1991 and was chairman and chief executive of Enron North America before being named chief strategy officer for Enron in June 2000 and vice chairman in October. India State Panel Invites Enron Unit For Talks May 5

05/02/2001 Dow Jones International News (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW DELHI -(Dow Jones)- India's Maharashtra state government has formally asked U.S. energy major Enron Corp.'s (ENE) Indian unit Dabhol Power Co. to appoint a team to renegotiate the power purchase agreement with the state government's expert committee Saturday, the United News of India reported Wednesday. "We have formally requested the DPC president to send a team for renegotiation. We will be awaiting their response to commence the talks on May 5," UNI quoted the state's Energy Secretary V.M. Lal as saying after his meeting with officials of the Maharashtra State Electricity Board and the nine-member expert panel. The \$3 billion, 2,184-megawatt DPC project in Maharashtra has been mired in financial disputes after the MSEB, its main customer, failed to pay several bills. The project has the largest single foreign investment in India. The Maharashtra state government has asked the committee to try to negotiate a revised agreement within a month. The committee's goals are to lower the power tariff and allow the sale of excess power to the federal government or its utilities. A restructure of the DPC's stakeholding may also be on the agenda. Texas-based Enron has a 65% stake in the DPC, and is the project's largest shareholder. Other shareholders include the MSEB with 15%, and General Electric Co. (GE) and Bechtel Enterprises (X.BTL) with 10% each. -By Himendra Kumar, Dow Jones Newswires; 91-11-461-9427; himendra.kumar@dowjones.com

ATS Announces First Half Results

05/02/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

CALGARY, May 2 /PRNewswire/ - Applied Terravision Systems Inc. (ATS) (CDNX: TER) is pleased to announce its first half results for the six-month period ended March 31, 2001. ATS's revenues for the first half increased to \$17.868 million,

28.3 percent higher than the \$13.925 million recorded for the first half of fiscal 2000. Gross Margin revenues increased 40.1 percent to \$17.191 million from \$12.214 million during the first half of fiscal year 2000. EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization and Extraordinary Items) for the six month period-ended March 31, 2001 was \$2.204 million or \$0.07 per share, an increase of 355.6 percent, compared to EBITDA for the period-ended March 31, 2000, which was \$0.484 million or \$0.02 per share. Cash flow from operations, prior to changes in non-cash working capital, for the six-month period-ended March 31, 2001 was \$1.067 million or \$0.03 per share, as compared to the same period-ended March 31, 2000 when the cash flow from operations, prior to changes in non-cash working capital, was \$0.264 million or \$0.01 per share. Net income before tax, amortization of goodwill and extraordinary items for the first six months of fiscal 2001 was \$0.656 million or \$0.02 per share, an increase of 249.6 percent, compared to net a loss before tax and amortization of goodwill of \$0.453 million for the corresponding period in fiscal 2000. After amortization of goodwill and allowance for United States income tax the company had a net income before extraordinary items of \$0.141 million or \$0.00 per share in the first six months of fiscal 2001 as compared to a loss of \$0.879 million or \$0.03 per share in the prior year period. FORWARD LOOKING STATEMENTS

In the interest of providing ATS shareholders and potential investors with information regarding the Corporation, including management's assessment of the Corporation's future plans and operations, this presentation contains forward-looking information that represents the Corporation's internal projections, expectations or beliefs concerning future operating results and various components thereof of the Corporation's future economic performance. The projections, estimates and beliefs contained in such forward-looking statements necessarily involve known and unknown risks and uncertainties which may cause the Corporation's actual performance and financial results in future periods to differ materially from any estimates or projections of future performance or results expressed or implied by such forward-looking statements. Accordingly, shareholders and potential investors are cautioned that events or circumstances could cause actual results to differ materially from those contemplated. Companies continue to take advantage of ATS's Application Service Provider (ASP) and Business Function Outsourcing (BFO) eSolution business offerings. ASP subscription fees and associated revenues from ATS's intellectual property delivered on its ASP platform for the first half of fiscal 2001 increased 127.9 percent to \$11.605 million from \$5.093 million for the first half of fiscal 2000. These revenues comprised 64.9 percent of total revenues during the first half of fiscal 2001 as compared to 36.6 percent during the first half of fiscal 2000. BFO services generated \$1.376 million in revenues for the first quarter of fiscal 2001, comprising 7.7 percent of total revenues during this period, whereas ATS recorded no BFO revenues during the first half of fiscal 2000. During the first six months of fiscal 2001 the ATS reoccurring revenue base (which includes maintenance, ASP Subscription Fees and BFO Contracts) increased 37.0 percent to \$7.728 million from \$5.642 million for the same period in 2000 while professional services revenues increased 66.8 percent to \$10.332 million from \$6.196 million during the same period. As anticipated, increased ASP and BFO sales offset reduced license fee revenues as customers move to ATS's reoccurring subscription fee business model. License fee revenues declined by 57.2 percent to \$0.888 million from \$2.074 million during the same six months of fiscal 2000. ATS's ASP centers continue to demonstrate value to new and existing customers. Stylus Exploration Inc., of Calgary, moved their business information systems to an ATS managed data center. Lyco Energy of Dallas entered into an agreement with ATS to utilize the Dallas BFO / ASP center. Additionally four non-operated interest companies began using ATS's BFO centers, two in Canada and two in the U.S. ATS's e-Solutions allow these customers to shift their non-core business functions and information technology needs to ATS so they can devote their time and attention to their core business functions of oil and gas exploration and production. ATS continues

S&P Lowers Enron Credit Linked Notes Trust Ratings; On Watch Neg

11/07/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

NEW YORK, Nov. 7 /PRNewswire/ -- Standard & Poor's today lowered its ratings on Enron Credit Linked Notes Trusts' credit linked notes and placed them on CreditWatch with negative implications (see list).=20 The lowered ratings reflect the Nov. 1, 2001 rating action taken on Enron Corp., which was based on Standard & Poor's belief that Enron's plan to employ asset sales and other means to repair its damaged balance sheet will be insufficient to restore its long-term credit quality to the historical triple-B-plus level. The CreditWatch placements recognize the uncertainties that surround the company and its credit quality in the short run due to the possibility of further unanticipated developments in the capital markets. These synthetic issues utilize a credit default swap that references Enron's senior unsecured debt and therefore the rating on the credit-linked notes will reflect the current senior unsecured rating of Enron.

DJ CNBC's FABER REPORT: Enron/Dynegy Deal Talk 2001-11-07 14:56 (New York)

The following is a transcript of a report aired Wednesday by CNBC reporter David Faber:=20 =20 Enron is in discussions with Dynegy about a range of options that include= a merger of the two companies.=20

While such an outcome is only one of a number of options being discussed, sources close to the talks tell me such an outcome is being considered.=20 Enron is trying to raise equity capital and restore confidence amid the complete collapse of its stock price.=20

Today, the Houston-based energy trading concern's shares have fallen another 25%, while its bonds, perhaps a better barometer of the market's concerns about credit quality, have shed roughly ten points.=20

Enron will not comment. But sources close to the situation tell me the company continues to speak with a handful of private equity firms about an investment. Those talks are still in the early stages.=20 Talks with Dynegy, a cross-town rival of Enron's that also markets and trades energy, have progressed at a faster pace.=20

Dynegy is unlike Enron in that it owns more hard assets, many of which came along with the acquisition of Illnova, completed in 2000. While many potential acquirers have shied away from Enron due to continued concern about unknown liabilities the company may have, Dynegy is very familiar with its energy trading business.

Dynegy is the number two player in the U.S. energy trading market and would clearly become the dominant player were it to merge with or acquire Enron. A Dynegy spokesman declined comment.

While Dynegy has off-balance sheet financings that are similar to Enron's, those financings are not guaranteed by the parent. It is such guarantees that have concerned Enron investors along with a series of questionable investments.

Given the massive decline in Enron's stock price, Dynegy now has a market value that is twice that of Enron.

That decline in Enron's stock price would make any equity infusion heavily dilutive, if private equity firms were to choose to invest in Enron they would likely do so in the form of a security that converted to equity and paid a dividend.

Still, because Enron now has a market value of only \$5.3 billion, the roughly \$2 billion it may want represents an enormous percentage of its overall equity value.

Hence, discussion with Dynegy may have taken on the form of a merger, rather than a strategic investment.

Enron in Talks With Dynegy That May Include Merger, CNBC Says 2001-11-07 13:39 (New York)

Houston, Nov. 7 (Bloomberg) -- Enron Corp. is talking with rival energy company Dynegy Inc. about a number of options, including merger, to help it raise equity capital and restore confidence, financial news network CNBC reported. Spokesmen for Dynegy and Enron declined to comment.

WSJ: Dynegy In Talks To Put About \$2B Into Enron Now By Robin Sidel

11/07/2001 Dow Jones News Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

Of The Wall Street Journal

NEW YORK -(Dow Jones)- Dynegy Inc. (DYN) is in advanced discussions to infuse about \$2 billion into Enron Corp. (ENE) in a transaction that may lead to a full-blown merger between the two companies, sources familiar with the matter told The Wall Street Journal. A formal transaction could be unveiled as early as Thursday, these people said. The situation is very fluid and is subject to change, these people noted. (This report and related background will be available at the Journals' Web site, WSJ.com.) Enron has been rocked by last month's disclosure of a \$1.2 billion reduction in its equity base partly tied to financial dealings with company partnerships headed by Enron's former chief financial officer. Last month, it reported a third-quarter loss of \$618 million. The Securities and Exchange Commission has launched a formal investigation into the matter. Last week, Enron secured \$1 billion in new credit lines, using gas-pipeline assets as collateral. Enron needs the infusion in part because its previously announced plans to raise cash through the sale of power assets is going more slowly than expected. Mostly, though, it needs to restore its credibility with Wall Street at a time when its access to the financing markets is drying up. Enron shares recently traded down \$1.57, or 16%, at \$8.10

Bandwidth Market: Trade For DS3 Capacity Nets High Price

07/24/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- A direct trade done Tuesday for DS3 bandwidth between Seattle and Vancouver, B.C., brought one of the highest prices ever recorded in the market. The deal, priced at two cents a DS0 mile a month, will start as soon as the circuit can be provisioned, said a trader. Direct trades are done by the counterparties themselves without an intermediary like a broker. Another direct deal was done for DS3 bandwidth between Seattle and Los Angeles for a three-month contract that also will start as soon as the circuit is provisioned. The price was \$0.0075/DS0 mile/month. One other trade was done Tuesday for DS3 bandwidth in calendar year 2002 between New York and Dallas through Enron Corp. pooling points at \$0.0015/DS0 mile/month. Pooling points are network interconnection sites where title to bandwidth is transferred. They are also used to monitor quality of service. -By Michael Rieke and Erwin Seba, Dow Jones Newswires, 713-547-9207, 713-547-9214; michael.rieke@wsj.com, erwin.seba@dowjones.

USA: Northeast utilities on track to form RTO - PJM chief.

07/24/2001 Reuters English News Service (C) Reuters Limited 2001.

WASHINGTON, July 24 (Reuters) - With the help of a federal mediator, Northeast electricity transmission grid operators are on track to combine their assets under a common roof, Phillip Harris, chairman of the PJM Interconnection, told reporters on Tuesday. "I think that's do-able," Harris said, referring to the Federal Energy Regulatory Commission's July 11 rule ordering the New York Independent System Operator, PJM, PJM West and New England Independent System Operator to form a single regional transmission organization (RTO). All the entities convened Monday in a closed-door hearing before FERC Administrative Law Judge Peter Young to begin 45 days of negotiations to hammer out the formation of the single Northeast RTO. "We can't solve all of the issues, but we can come up with a plan" during that time, Harris said. RTOs are not likely to be discussed at the FERC commissioners' meeting on Wednesday, Harris said. No RTO issues are on the agenda for the final FERC meeting before commissioners take a month-long break, an agency spokeswoman said. The focus of the Wednesday meeting will be refunds for California and other Western states that claim power wholesalers overcharged them during the past year. RTOs have become a priority for FERC, which is looking for ways to make the nation's patchwork transmission grid more seamless to overcome bottlenecks in moving power between regions. FERC recently proposed combining transmission operators into four RTOs to be formed in the Northeast, Southeast, Midwest and West. "Whether the magic number is four or 10 is somewhat problematic," Harris said. FERC has praised the PJM system - which serves much of Pennsylvania, New Jersey and Maryland - as a model for nationwide RTO building. The agency has also turned down New York ISO and Northeast ISO requests to maintain their status as free-standing independent system operators. PJM has what it takes to make a nationwide model, Harris said. "The technology is there to make it happen," he said. PJM Interconnection uses a complex computer model and locational marginal pricing to calculate prices based on supply, demand and congestion at each node on the grid. PJM could apply its model to a larger RTO, Harris said, because "it's hard to find something bigger than what we're doing." PJM operates about 8,000 miles of transmission lines in Pennsylvania, New Jersey and Maryland, Washington D.C., and part of

Delaware. It also coordinates the flow of about 60,000 megawatts of generation across those wires. Last week, residential electricity provider NewPower Holdings Inc. complained to FERC about the installed capacity charges in the PJM system. The company said the PJM charges were "unjust and unreasonable" and discriminated against new market players. NewPower told FERC it was unfair that companies owning generation plants in the region do not have to pay the installed capacity charge, but NewPower and others that don't own generating plants must pay high capacity rates.

EnergyBusinessWatch Releases Two-Part Interview With FERC Chairman Curt Hebert

07/24/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

WASHINGTON, July 24 /PRNewswire/ -- FERC Chairman Curt Hebert, in one of his most wide-ranging interviews since he was named to head the agency six months ago, told EnergyBusinessWatch in a two part series while California may still see some blackouts in August the state now appears to have passed a danger point. "We're not too worried about credit here, but we were certainly getting the blame when the prices were high," Hebert said. "The fact that prices are down and they have been down since the very hour the mitigation plan went into effect shows the forward thinking, the ability to get things under control of this commission and the hard working staff." Hebert sat down with EBW Executive Editor Howard Buskirk July 20 to talk about his six months as chairman, what he views as his legacy so far and his plans for the future. High on his list is a FERC that is now more responsive to markets. "A couple years back at FERC, even though they were talking about markets, they were very much in their infancy in trying to understand how they work," he said. "I would say that FERC now has certainly moved beyond its adolescence and trying to act more like an adult ... Hopefully that means that there's less regulation in the future." Hebert also warned that the commission must make certain it does not turn off Wall Street, since the financial community will need to be behind commission initiatives to get the right investments. "You can't do anything in this business without the confidence of Wall Street," Hebert told EBW. "If anyone thinks we can turn this industry around and we can have adequate supply and we can have adequate deliverability without the confidence of Wall Street they are absolutely wrong. They haven't done their homework and they don't understand history." Hebert also touched in the most detail yet on the controversial article in "The New York Times" in whi

04/11/2001 Subject: RE: Grand total is....! 01:53 PM

We definitely need to see the paperwork since we already paid a bill of at least that much so far. Don't worry, though we will make sure that you don't get stuck with anything and work it all out.

How has Enron managed to achieve such success while other energy firms have struggled to deal with the changing market landscape?

Global Change Associates is pleased to announce the publication of a new corporate profile entitled, "Enron 2001: An Inside View". This objective study takes an insider's look at Enron, specifically, how the firm operates and the keys to its success. Much of the information provided comes from first hand accounts and covers areas such as:

? The firm's structure and operations ? The recruitment and training of new employees ? How Enron empowers and compensates its employees ? The keys to structuring Enron type "risk free" transactions ? How to negotiate with Enron ? Why Enron occasionally forgives counterparty obligations ? Is the Enron model right for your organization?

Enron 2001: An Inside View is a unique publication. It provides valuable insight into the firm's operations and analyzes its successes and failures. For those firms dealing directly with Enron, or thinking about adopting some of Enron's business practices, it is an invaluable, must have tool.

This innovative study is available for purchase at \$995.00.

For a detailed Table of Contents please open the attached file, Enron2001TOC. To order please go to www.global-change.com, click on "Reports" or complete the attached order form and fax to 212-625-8810.

P.S. Nice use of "birthday" as the segue to the deal.

Speaking of birthdays, Prentice has informed me that, despite my protestations (being a very low-key sort of guy), there "must" be some party for my birthday this year (which I'm still opposed to--and I may be in Houston that MONTH anyway).

I was thinking (cuz I hate spotlights), that it might be fun and interesting, since your Dad and I are both hitting interesting birthdays this year, if we had a joint party---double the people, double the fun. (I don't know if he'd rather have a solo party for his, though.) And since my dad's met your dad, but our mom's ain't been in the mix, I thought it might be a good (and hopefully safe) atmosphere to get them together in.

Am I smoking crack on the whole idea?

From: David Young Sent: Tuesday, July 17, 2001 12:08 PM To: James McCormick; Cameron Sellers; Ian Sullivan
Subject: Enron/EnronOnline Importance: High

?

James, Cameron, Ian,

?

I got a call this morning from Marc Eichmann, a DealBench Product Manager at Enron Net Works. He got my contact info from Ken Sommers, one of the Procurement Managers in EES, who has been pushing to get our solutions implemented.

?

Marc is meeting today with a team of directors to determine how to go forward in providing reverse auction and RFQ functionality to the various Enron business. They realize that DealBench does not provide the breadth of functionality required to get acceptance by the buyers/dealmakers for daily use. Thus they are trying to determine whether to put the time and resources into developing DealBench further or to strike a deal with a third party vendor to enhance their platform.

?

The project is in its early stages.? Their timeline is 2-3 months before implementation.? Enron business units would be the primary users of the software, but?they would eventually want to sell this service out to all users of EnronOnline.? Marc said they would want to be able to open up the code and conjoin our software with theirs.?

?

He wants us to basically hand it away.? I discussed our standard Enterprise pricing and the Charter Program offer we have given to GSS and EES, and he still felt this was beyond their budget.? He emphasized how much business volume runs through EnronOnline and how good an opportunity this would be for us.? I told him I would like to have our VP Business Development speak with him to discuss any further business relationship and pricing details.? Marc can be reached at 713-345-8422 or marc.eichmann@enron.com.?

?

I've tried to followup with Ken Sommers and Eugene Ribaudo to get a feel for how we might be able to proceed with a sale directly?to EES versus a marriage with DealBench.? Ken is out of town this week, but hopefully will respond to my voice mail and email.? Let me know how to proceed.

?

Thanks,

David M. Young Manager- Enterprise Sales Perfect Commerce, Inc. 1860 Embarcadero Rd., Suite 210 Palo Alto CA?

Greetings. Kim's stuff looks pretty good to me. There's a pretty high likelihood though that I won't be in class Monday or Tuesday either. That means I can't turn in whatever it is we're turning in tomorrow (if I sound clueless, it might be because he ran out of handouts in the first class describing how the cases would work, and there's nothing posted on the site--apologies). I can do the write-up for next week.

Kimberly Kupiecki <kkupiecki@arpartners.com> on 09/09/2000 09:02:50 PM To: dwindham@uclink4.berkeley.edu, jjackson@haas.berkeley.edu, jdasovic@enron.com cc: Subject: Re: E220 Case #1

Hello fellow E220 mates,

Attached are my attempts at Q1 and Q3. I will not be in class Mon or Tues.

Jeff, can you hand the case in?

I am happy to take a crack at the other questions, let me know if you would like me to help out there.

The xcel file is a little messy, it was really just a work sheet to play around with the numbers, but you are welcome to it. In terms of format, since there is no guidance, I say we do it however we want. We could answer the questions in prose style, for example. The write up should be no more than a page and a half - but that is just my humble opinion.

Cheers,

At 12:40 PM 9/9/00, jdasovic@enron.com wrote:

Greetings folks. We should decide how we want to handle. One thing I'm not clear on and that I couldn't find in the syllabus is, what's the format for the write up? If we're called on to discuss, do we simply discuss orally, some sort of simplistic PP slides, spreadsheets, other? Anyway to discuss between now and Monday, or do we want to just take Dylan up on his offer? Hi Madeleine,

Have a great time in Chili..... Just a thought,my daughter, Kyala, has a friend who's family runs a river fishing and horseback riding vacation place in Argentina....email Ky a <amiga@northcoast.com> to ask how to contact them, if you are interested.

I'd love for you folks to come up again in January, although I will only be here for a few days out of the month. However, Helene could "lead" your ride, and I'll bet Harvey would like to join you. I'll be on the millenium trek from Jan 13th on. I'm here from FEB 10th to 22nd, then gone for another couple weeks. I'm planning for "special" rides once a month for the next

year....would love to have you and yours be here for as many of them as possible!

Here's the info for them...

Rates: \$195 per day/arrange your own lodging & meals/ bring your own lunch/ English or Western horses available/ join other compatible RRR riders. Sign up for as many/few days each weekend as you like. Carpool information from San Francisco Bay area available.

Also available: 3 (\$75.00) or 4 hour (\$100) rides. If you would prefer to have a "private" excursion, just whomever is in your group with a guide, surcharge of \$25 (3 hours), \$35 (4 hours, or \$45 (all day) applies.

Thanksgiving Get-Together: November 26, Nov 27 1999

Y-2-K Millenium Bash December 31, 1999, Jan 1, 2000 , Jan 2, 2000

Valentine's for Singles, Couples, & "Others" February 13, 14 , 2000

Spring is Mendocino Weekend April 8, 9, 2000

Wild Iris, Full Moon Weekend May 20, 21, 2000

Escape to the Redwoods Weekend June 10, 11, 2000

Mendocino Music Festival Weekend July 22, 23, 2000

Beach and Redwoods Weekend August 26, 27, 2000

Fall Frolic Weekend October 7, 8, 2000

Full Moon Mushroom Madness Weekend November 11, 12, 2000

Thanksgiving Get-Together November 25, 26, 2000

New Year's Bash December 30, 31, 2000

I'm off to Zimbabwe for my "foster" daughter's wedding on Dec 6th....will be gone til nearly New Year's Eve. Then to Florida for a family weekend, and leaving Jan 14 for New Zealand. So.....have a great holiday...hope to catch you some time over the winter....and if not we'll certainly ride together in the Spring.

Cheers,

Lari

"Dan Douglass" <douglass@energyattorney.com> 06/20/2001 10:59 PM To: "ARM" <arem@electric.com> cc: Subject: Comments on Draft Decisions Regarding PX Credit and Direct Access

Attached for your review and comment is my first draft of comments to be filed on Monday with regard to the draft decisions of ALJ Barnett and Commissioner Bilas. Please review it carefully, as I have thrown in everything I can think of on a rush basis, and it may require some significant editing. Pay particular attention to Section V dealing with Bilas' request for parties to discuss alternatives to DA suspension. The draft offers a compromise to the DWR's concerns, as expressed in the Angelides memo. Also, notice that Section VI urges the Commission to bifurcate the DA and PX credit issues, acting quickly on the first, if it must, but more leisurely on the PX credit subject.

Finally, I have a suggestion in the form of a question. How would AReM members feel about making this a joint filing with WPTF? There is cross-membership between the two groups and the same issues would be raised in the separate filings which I am otherwise prepared to draft. This draft would requires some modifications so as to refer to the "Joint Parties" as opposed to solely mentioning AReM, and I might add a section dealing more explicitly with WPTF's contribution to getting the zero minimum bill stipulation signed in the first place. Otherwise, the document would stay much as it is (subject to your input over the next few days, of course). Please let me know what you think asap, as I am already working on a WPTF draft. Incidentally, I will also be filing comments on behalf of ABAG which will support the positions taken in the attached document, but I am not proposing that ABAG also be a party to this filing. Thanks for your help! Comments as soon as possible would be very much appreciated!

Dan

It's about 90% certain that I'm out of the office on the 3rd. Thank you, Sue, for helping out.

Best, Jeff

"Sabine Schnittger" <Sabine.Schnittger@frontiereconomics.com> 06/29/2001 09:43 AM Please respond to Sabine.Schnittger

To: <Susan.J.Mara@enron.com> cc: <jeff.dasovich@enron.com> Subject: RE: Australian visit

Thanks for your time, Sue.

I hope I am not causing confusion - we also emailed Jeff Dasovich to ask if he had time to talk with the Australians - he said he was going to see what he could do.

If you or Mr Dasovich might have time to give these guys a market participant's view that would be great - at the moment they are only seeing the CPUC, the CAISO and PG&E.

Would you maybe have time to talk to them on Tuesday, July 3rd? They could meet anytime between 1.00PM up to 4.00PM and then they need to head off to the airport. Maybe they could take either of you out for lunch?

Best wishes,

Sabine.

-----Original Message----- From: Susan.J.Mara@enron.com [mailto: Susan.J.Mara@enron.com] Sent: Thursday, 28 June 2001 6:43 PM To: Sabine.Schnittger@frontier-economics.com Subject: Re: Australian visit Whoops. Forgot to back to you on this. Do you have a date? Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 "Sabine Schnittger" <Sabine.Schnittger@frontierecon To: "Sue Mara" <smara@enron.com> omics.com> cc: Subject: Australian visit 06/18/2001 09:01 AM Please respond to Sabine.Schnittger Dear Sue, Hope you are well; no doubt the ongoing saga in California is keeping you busy. I am writing to ask whether you might be available to meet (maybe for an hour/hour and a half max) with an Australian colleague of ours and three advisors to the Treasurer of the state of New South Wales (Sydney, Australia) to give

them a market participant's perspective on about events in the California electricity market and the implications for deregulation/regulatory policy for electricity. Basically the four are advisors to the Minister of Energy and are being sent across to the US to get a feel for what went on and how to avoid similar disasters in the National Electricity Market (NEM) in Australia. By way of background I should say that New South Wales is a party to the NEM, and is in the process of deciding in which direction the reform process should be taken forward. The team would therefore be very interested in Enron's views on such issues as regulatory policy with respect to retail rates, market power, encouraging investment (including grid investment), but also any other issues that Enron considers to be important in the light of the California experience. The group consists of Bill Frewen (Senior Ministerial Advisor State Owned Corporations to the NSW Treasurer), Peter Shields (Senior Economist, Market Implementation Group, NSW Treasury), Mark Duffy (Economics/IR Consultant to the MIG, NSW Treasury) and Danny Price (Principal, Frontier-Economics, Consultant to the MIG, NSW Treasury). If you - or someone else that might have a view on California market reform - might have time to talk to them that would be very much appreciated. Many thanks, Sabine.

babe, if they get back to me with a date that week, i think that you ought to just have the meeting, understanding that the meeting with execs may not have occured yet. nevertheless, you'll have a darned good idea by that time whether its working well or it's a flop, non?

anywho, let's see what response i get back. maybe they'll want to push back.

her hair looked really good (it was pretty all over the place previously). now, with a few professional flourishes, she look even more gorgeous (if that's possible).

best, Jeff

OK, so the oct 15th date is a little too early. The pilot review with execs at enron is at the end of the month. SO, we should target early November for this meeting. Can you help facilitate that?

What did you think of PP's hair. I was shocked. It looked really good!

Cameron Sellers Vice President, Business Development PERFECT 1860 Embarcadero Road - Suite 210 Palo Alto, CA 94303 cameron@perfect.com 650.798.3366 (direct dial) 650.269.3366 (cell) 650.858.1095 (fax)

From: Ian Sullivan Sent: Wednesday, September 26, 2001 6:44 PM To: Cameron Sellers Subject: RE: Meeting with Perfect Commerce

We are tentatively scheduled for a Pilot Review with the VP of EES on 10/30 in Houston, so early Nov. for this meeting is probably the best bet. -----Original Message----- From: Cameron Sellers Sent: Wednesday, September 26, 2001 2:09 PM To: Ian Sullivan Subject: FW: Meeting with Perfect Commerce

I pushed this date way out. We can easily push it out more. Jeff fully understands that we want to schedule this meeting after the pilot has been completed (not get in the way, see the real value of the system first...etc.). My question to you is when is the pilot scheduled to be completed so I have a time frame on when these discussions might take place.

Thanks, Cameron

From: Dasovich, Jeff [mailto:Jeff.Dasovich@ENRON.com] Sent: Wednesday, September 26, 2001 1:57 PM To: Greg Piper (Enron); Brad Richter (Enron) Subject: Meeting with Perfect Commerce

Greg: Good talking to you. Congratulations on your new role. Sounds exciting (in addition to exhausting).

Based on our call, I contacted Perfect Commerce. The two folks from their shop that will be in Houston are:

Ian Sullivan SVP, Professional Services and all implementation of the product

Cameron Sellers VP, Business Development

They'd like to meet sometime during the week of October 15th. Let me know if that works for you and Brad. Or if you'd like to contact them directly, just let me know and I'll get you their numbers/emails.

I ran across Perfect when I was doing an MBA project-we were required to find a company that we could consult to on e-commerce strategy.

I've since found out that Perfect's doing a pilot with EES-acting as the e-procurement platform for products tied to EES' outsourcing deals. From what I hear it's going well, and EES is enthusiastic.

The technology is very interesting: soup to nuts e-procurement platform developed by Paul Milgrom (global auction guru and economist at Stanford). Glad you guys can meet with them. I think it's definitely worth the time-the technology may fit very well with Networks.

Best, Jeff

STATES UTAH -- Bill repealing merger of agencies goes to Gov. Leavitt LA. -- PSC to seek reconsideration of allowing AT&T to sue commissioners

TEXAS -- PUC to enroll Lifeline customers automatically WIS. -- Bill would bar passing on costs of city-owned cable TV to nonsubscribers MASSACHUSETTS -- WorldCom joins AT&T call for Verizon to cut UNE rates TEXAS -- SW Bell performance measurement penalties total almost \$2.6 million NEW YORK -- Meeting set to organize opposition against Verizon DSL WASHINGTON -- Bill would extend ban on mandatory local measured service IOWA -- Legislator takes aim at telemarketers MISSOURI -- PSC approves asset transfer from SWBT to SBC Services OHIO -- PUC sets schedule for considering unresolved OSS issues

FUTURE OF REGULATION UTAH Bill repealing merger of agencies goes to Gov. Leavitt

The Legislature has approved HB 184 to repeal a controversial measure (HB 320) approved by the Utah Legislature last year to fold the Committee of Consumer Services into the Division of Public Utilities. (1/24/00 a.m.) HB 184 passed through both chambers within two days. Absent repeal, HB 320, which wasn't scheduled to take effect until July 1, would combine and rename the entities as the Office of Public Advocate.

Rep. David Ure (R., District 53), who sponsored HB 320, now is sponsoring the bill to repeal it. The legislative staff told TR he decided the time isn't right to overhaul the structure of the state's utility regulatory apparatus given current concerns about adequate supplies of electricity in the West. Questar Gas Co. had pushed for HB 320 last year.

The DPU is charged with representing the public interest before the Public Service Commission and ensuring that all utility customers have access to safe and reliable service at reasonable prices. The Committee of Consumer Services represents residential, small commercial, and agricultural consumers before the commission.

Because HB 320 would combine the two missions into a single entity, interest groups were concerned the bill would decrease the amount of information available to the PSC when making decisions.

Consumer group opposition to HB 320 during the 2000 legislative session persuaded Gov. Michael O. Leavitt (R.) to call for a review of the law after the session concluded in March. Leavitt allowed the bill to become law without signing it.

SECTION 251/252 LOUISIANA PSC to seek reconsideration of allowing AT&T to sue commissioners

The Public Service Commission has decided to ask the U.S. Court of Appeals for the Fifth Circuit (New Orleans) to reconsider its Jan. 16 ruling that the 11th Amendment doesn't protect the PSC from a lawsuit filed by AT&T Corp, a commission staff member told TR. (1/18/01 p.m.) The PSC has 45 days from Jan. 16 to file for rehearing, the staff member said.

In 1997 AT&T filed suit against the PSC over an interconnection agreement the commission arbitrated between AT&T and BellSouth Telecommunications, Inc. AT&T alleged that the agreement favored BellSouth and that the PSC's arbitration didn't comply with sections 251 and 252 of the Telecommunications Act of 1996. In addition, AT&T brought a suit against the five commissioners under the Ex parte Young doctrine, seeking relief from any arbitration determination that didn't comply with sections 251 and 252 of the Act.

Reversing the district court's ruling against AT&T, the appeals court maintained that the PSC waived its 11th Amendment sovereign immunity by voluntarily accepting and fulfilling its assigned role in the federal regulation of local competition under the federal Telecommunications Act of 1996. Furthermore, the appeals court ruled that AT&T's suit against the individual commissioners could proceed even if the PSC were protected under the 11th Amendment. (Case no. 99-30421, AT&T Communications v. BellSouth Telecommunications Inc.; Louisiana Public Service Commission; Don Owen; Irma Muse Dixon; Dale Sittig; James M. Field; Jack A. Blossman)

UNIVERSAL SERVICE TEXAS PUC to enroll Lifeline customers automatically

The Public Utility Commission yesterday approved rules allowing eligible customers to be enrolled in the Lifeline program automatically. (8/21/00 a.m.) The rules require the PUC to work with local telephone companies and the Department of Human Services to set up the Lifeline Automatic Enrollment Program.

The department will identify customers who are eligible for the program and provide their names to the local telephone companies. The program is scheduled to begin March 1. (Project no. 21329)

VIDEO WISCONSIN Bill would bar passing on costs of city-owned cable TV to nonsubscribers

A bill introduced in the Senate would prohibit a municipality that owns and operates a cable TV system from passing on the cost of the system to nonsubscribers. The prohibition wouldn't apply to a municipality that began operating a cable TV system before the legislation's effective date.

A municipality that began operating a cable TV system on or after the legislation's effective date would be allowed to pass on to nonsubscribers only the costs of public, educational, and governmental access channels and the costs of debt service on public improvement bonds for the construction, renovation, or expansion of the municipality's cable TV system.

A municipality that owns and operates a cable TV system would have to maintain records that include (1) the cost of franchise fees, pole rentals, and all other expenses that the municipality would incur if it were a nonmunicipal cable TV operator that had been granted a franchise and (2) the amount, source, and cost of working capital used for the municipality's cable TV system.

SB 23 has been referred to the Senate Committee on Health, Utilities, Veterans, and Military Affairs. Sen. Rodney Moen (D., District 31) introduced it.

SECTION 251/252 MASSACHUSETTS WorldCom joins AT&T call for Verizon to cut UNE rates

WorldCom, Inc., has asked the Department of Telecommunications and Energy to force Verizon New England, Inc., to reduce its unbundled network element (UNE) rates to "levels that reflect forward-looking economic costs." The WorldCom request came in a letter supporting AT&T Corp.'s petition for lower Verizon UNE rates.

AT&T's petition had urged the DTE to withdraw its support for Verizon's application to the FCC for authority to enter the interLATA (local access and transport area) market in Massachusetts unless Verizon reduced its rates. WorldCom and AT&T assert that neither the rates Verizon submitted in July nor the revised rates it submitted in October are low enough to "allow economically viable competition via the UNE-platform." (1/3/00 a.m.)

WorldCom said the "most efficient and straightforward approach" to promoting local competition is "to order that specific reduced rates be put in place and to make clear that those rates will act as a ceiling in pending and future rate cases." (DTE 01-20)

LONG DISTANCE TEXAS SW Bell performance measurement penalties total almost \$2.6 million

Southwestern Bell Telephone Co. has paid almost \$2.6 million to the Public Utility Commission for failing to meet performance measurements established in its compliance monitoring proceeding from January 2000 through November 2000, the PUC staff told TR. The proceeding aims to ensure SW Bell's compliance with the market entry requirements of section 271 of the federal Telecommunications Act of 1996.

In June 2000 the FCC granted SW Bell authority to enter the Texas interLATA service market. (Project nos. 20000, 20400, and 21000)

ADVANCED SERVICES NEW YORK Meeting set to organize opposition against Verizon DSL

Silicon Alley Station and the New Networks Institute are sponsoring a Feb. 5 meeting in Manhattan to discuss the "slow" rollout of digital subscriber line (DSL) service

Sara Beckman Receives UC Berkeley's Distinguished Teaching Award Undergrads Create Solutions at the E-Business Case Competition UC Berkeley Teams Take Part in Two Real Estate Challenges Haas Experts on the Challenges to the Economy at the Faculty Alumni Colloquium Haas Celebrates the End of the Year Graduating MBA Student Debrief with Dean Tyson Faculty News Haas in the News Happening at Haas Haas Celebrations

SARA BECKMAN RECEIVES UC BERKELEY'S DISTINGUISHED TEACHING AWARD Sara Beckman, senior lecturer at the Haas School, is one of four recipients of this year's Distinguished Teaching Award, UC Berkeley's highest prize for teaching. ?

The recipients will be honored in a ceremony on Wednesday, April 25, at 5:00 p.m. in Zellerbach Playhouse. The entire UC Berkeley community is invited to attend.

Beckman has been with the Haas School of Business since 1988 and has taught courses in three of the Haas School's four degree programs -- undergraduate, full-time MBA, and Evening MBA -- and in executive development. Beckman currently teaches Operations Management and New Product Development in the MBA program.

In 1995, Beckman and engineering Professor Alice Agogino introduced the course Managing the New Product Development Process (BA290A/ME290P) to be taught jointly to business and engineering students. This course has been the most popular course at the Haas School for at least the past two years. Beckman continues to co-teach the course with Professor Agogino; the course is cross-listed with the College of Engineering. In the last two years, it has also involved Leslie Spear from the California College of Arts and Crafts. The highlight of this course is the New Product Tradeshaw, which takes place at the end of the semester and allows the students to display their prototypes to the public.

Beckman has received excellent course evaluations from the students in all of her courses. She has been a member of Club 6 for every semester she has taught at Haas. Club 6 membership requires a median student evaluation rating of at least 6 on a scale of 1 to 7.

Beckman earned her undergraduate degree in industrial engineering with distinction at Stanford University. She also earned two Master's degrees -- in industrial engineering/engineering management and in statistics -- and a doctoral degree at Stanford University. Before coming to Haas, Beckman worked at Booz, Allen & Hamilton and managed several technology initiatives and programs at Hewlett Packard. From 1991 to 1997, Beckman took leadership of the Management of Technology (MOT) program. In 1998, she became co-director with Marketing Chair Russell Winer of the reorganized and expanded Fisher Center for the Strategic Use of Information Technology (FCSUIT). FCSUIT's objective is to integrate the Haas School's various efforts in e-business.

Previous winners of the Distinguished Teaching Award at Haas include Richard Lyons, Andrew Shogan, Laura D'Andrea Tyson, and M. Frances Van Loo.

Beckman is joined this year by three other recipients: Carolyn Bertozzi, assistant professor of chemistry; Seda Chavdarian, lecturer in the French Department; and Ronald Gronsky, professor of material science and engineering.

The Distinguished Teaching Award is given by the Committee on Teaching, a committee of the Berkeley division of the Academic Senate. A reception in the Alumni House's Toll Room follows the ceremony.

UNDERGRADS CREATE SOLUTIONS AT THE E-BUSINESS CASE COMPETITION The second annual E-Business Case Competition wrapped up last week with a final competition on Monday night. Undergraduate students from across the Berkeley campus formed teams and came up with solutions to an Internet strategy problem for Cisco Systems.

"The second annual E-Business Case Competition once again provided a venue for showcasing the incredible talents of Haas and UC Berkeley undergraduates in addressing a real-world business issue in a pressure-packed setting," says Dan Himelstein, undergraduate program director. "Not only was it a great night for everybody involved in putting together and participating in this competition to hold their heads high, it was also a lot of fun."

The members of the winning team were David Chan, industrial engineering and operations research; Christine Cho, business administration; Lisa Mou, economics; and Aryn Saleh, industrial engineering and operations research.

The team's solution addressed how Cisco Systems can use the Internet to help its channel partners focus on their core competencies and create a competitive advantage using a "triangular channel solution" that revolved around the development of a comprehensive and interactive "myCisco" web site for use by Cisco, its channel partners/resellers, and

end users. The site would provide a set of integrated electronic marketplace online applications that would deliver better information and better product and service solutions in a more efficient, effective, and profitable manner.

Each member of the winning team received a \$100 gift certificate from Cisco, \$1000 for the team to share from the Schlinger Family Foundation, t-shirts donated by Deloitte Consulting, and a crystal commemorative plaque. The other finalist teams received \$350 for the team to share from the Schlinger Family Foundation, t-shirts donated by Deloitte Consulting, and a crystal plaque to each member of the team.

Representatives from the Schlinger Family Foundation, Cisco Systems, and Deloitte Consulting came to hear the final presentations and meet the participating students.

UC BERKELEY TEAMS TAKE PART IN TWO REAL ESTATE CHALLENGES Two teams of UC Berkeley graduate students have been working feverishly on plans to present at National Association of Industrial and Office Properties (NAIOP) Challenge and the Bank of America Low-Income Housing Challenge competitions this spring.

NAIOP Real Estate Development Challenge The NAIOP Real Estate Development Challenge is a competition between graduate students at UC Berkeley and Stanford that is sponsored by the San Francisco Bay Area chapter of the National Association of Industrial and Office Properties. Teams of five students are given an actual site, for which they must propose the best use, design, financing, and marketing of a commercial real estate project.

UC Berkeley's 2001 NAIOP Team includes Aimee Einstein, MBA 02; Jonathan Fearn, Masters of City Planning 01; Chiendao Glasgow, Masters of Architecture 01; Maria Iniguez, MBA 01; and Sara Williams, MBA 02. UC Berkeley's team won the competition last year bringing the decade-long battle with Stanford to a tie, five wins for each university.

Proposals are judged by a nine-member jury of real estate professionals in the areas of development, finance, property management, brokerage, and local government. This year's site is on Mare Island, a former naval base in Vallejo, California. Final proposals are presented at an annual luncheon in May, with hundreds of NAIOP members in attendance. The winning team gets to keep the prized Golden Shovel (a close cousin of the Big Game Axe) for one year.

Final presentations take place Thursday, May 3, beginning at 11:30 a.m., at the Olympic Club in San Francisco. Tickets are \$30 for UC Berkeley faculty and students to attend the lunch and the presentation (this is a discounted price offered to faculty and students). There is no charge if you are just attending the presentation.

Bank of America Low Income Housing Challenge Sponsored by Bank of America, the BofA Low-Income Housing Challenge is a competition among several west coast graduate schools, where

Stocks Close Higher As Investors Cheer Earnings News By Peter Edmonston

10/22/2001 Dow Jones Business News (Copyright (c) 2001, Dow Jones & Company, Inc.) The Wall Street Journal Online Stocks rallied sharply Monday despite the widening anthrax scare, as a batch of better-than-expected quarterly earnings reports cheered investors. The Dow Jones Industrial Average gained 172.92, or 1.9%, to close at 9377.03 after gaining 40.89 points Friday. The Nasdaq Composite Index rose 36.75, or 2.2%, to 1708.06 after climbing 18.59 points in the previous session. Other major stock indexes gained ground Monday. The Standard & Poor's 500-stock index added 16.42 to 1089.90, the New York Stock Exchange Composite Index rose 7.13 to 561.45, and the Russell 2000 Index gained 4.80 to 430.50. Bonds were mixed and the dollar strengthened. The stock market's gains were tempered briefly by news that a postal worker in Washington, D.C., was diagnosed with anthrax contracted by inhalation. Additionally, two other postal workers in Washington have died and their deaths are being investigated to determine if they died of that same ailment. But stocks took the anthrax reports in stride, suggesting a new and surprising level of confidence among market participants, some analysts said Monday. "The market is really shrugging off this news," said Mark Donahoe, a managing director at U.S. Bancorp Piper Jaffray. Upbeat earnings news from American Express, released Monday afternoon, seemed to give stocks an additional lift. Investors may be shifting their focus away from concerns about anthrax exposure and U.S. military maneuvers in Afghanistan to take a closer look at quarterly earnings results, said Steven Kroll Sr., managing director at Monness, Crespi & Hardt. The uncertainty on the global front "looks like it is going to be a long, drawn-out affair," Mr. Kroll said. "I think stocks will revert back to being earnings-driven." Although dismal by ordinary standards, last week's flood of quarterly earnings reports got a reasonably upbeat reception from investors, who seem to have approached them with extremely low expectations. "The markets acted pretty well last week in light of some very ugly earnings," said Mr. Donahoe of U.S. Bancorp. That resilience might be giving hope to investors this week, he added. Still, investors will be carefully sifting through quarterly results in the coming week to get a fix on how the fourth quarter is shaping up, Mr. Kroll argued. Third-quarter earnings showed several pockets of strength on Monday, with big companies such as Minnesota Mining and Manufacturing and U.S. Steel posting results that met or topped analysts' estimates. The Dow industrials got an additional boost shortly after 2 p.m. EDT when index component American Express reported earnings that, excluding certain items, beat Wall Street previously lowered estimates. The financial-services concern posted net income of \$298 million, or 22 cents a share, down 60% from \$737 million, or 54 cents a share, a year earlier. Excluding charges related to a corporate restructuring and the September 11 attacks, American Express said it would have earned \$595 million, or 45 cents a share, for the latest quarter. Analysts had been expecting earnings of 30 cents a share, according to Thomson Financial/First Call. Shares of American Express surged after the quarterly earnings release, closing up 3.4% at \$30.32. Chip stocks helped lead the Nasdaq composite higher, with the Philadelphia semiconductor index gaining 5.4%. The rally seemed to be a continuation of Friday's gains in the sector, sparked by positive earnings news from KLA-Tencor. U.S. Steel, the nation's No. 1 steelmaker, said it swung to a third-quarter loss from a profit a year earlier, hurt by oversupply and a weak economy. But excluding charges related to the closure of one mill and damage at another, U.S. Steel said its loss was much narrower than what was forecast by analysts surveyed by Thomson Financial/First Call. Shares of U.S. Steel rose 9.7% to \$14.74. Investors also sent 3M shares nearly 5% higher after the maker of chemical and adhesive products squeaked by Wall Street estimates, despite a 21% decline in net income. And oil producers Conoco and USX-Marathon Group handily beat analysts' forecasts. But not all the earnings news was cheery. Local phone company SBC Communications recorded net income that was slightly below estimates. Shares of SBC, a component of the Dow industrials, fell 5.1% to \$41.40. Meanwhile, the outlook for corporate profits in the fourth quarter seems discouraging, some analysts noted. On Monday, 3M guided Wall Street's earnings expectations lower for the upcoming quarter, and a top executive at U.S. Steel told analysts that the company's fourth quarter would be "difficult." Companies "are meeting third quarter expectations, but they are talking down the fourth quarter," said Mr. Kroll of Monness Crespi & Hardt. He said that some of the rise in Monday's markets might be a carryover from Friday's buying activity related to the expiration of U.S. stock option and index option contracts, an event known as "double witching." One of the hardest-hit stocks on Monday was Enron, an energy concern that said that the Securities and Exchange Commission was seeking information about certain complex transactions it undertook with a limited partnership organized by its chief financial officer. Shares of Enron plunged 21% to \$20.65. Overseas, stocks closed higher. London's Financial Times-Stock Exchange 100-Share Index gained 1.1%, while Frankfurt's Xetra DAX index rose 2%. Earlier in the day, Japan's Nikkei 225 average closed with a gain of 0.3%, but Hong Kong's Hang Seng Index ended 0.3% lower. In economic news, the Conference Board reported that its index of leading indicators for the month fell 0.5% in September, matching the estimates of economists surveyed by Thomson Global Markets. The index -- a composite of measurements aimed at forecasting likely changes in the economy -- included some data gathered after the Sept. 11 attacks. The decline, which was the index's largest one-month drop since January 1996, confirmed that the widespread weakness in the U.S.

economy is deepening, the Conference Board said. Falling stock prices and rising initial unemployment claims were two of the index components that contributed most negatively to the September reading. In August, the leading-indicators index slipped 0.1%, less than the previous estimate of a 0.3% decline. Even so, the back-to-back declines paint a bleak economic picture, said Conference Board economist Ken Goldstein. The two-month decline in the index suggests that the already-weak economy is likely to remain weak into next year, Mr. G

Enron's Skilling Cites Stock-Price Plunge As Main Reason for Leaving CEO Post By John R. Emshwiller Staff Reporter of The Wall Street Journal

08/16/2001 The Wall Street Journal A2 (Copyright (c) 2001, Dow Jones & Company, Inc.)

Jeffrey K. Skilling said that the pressure he felt from Enron Corp.'s plummeting stock price was the main reason he decided to resign Tuesday as the energy giant's chief executive officer after only about six months in the job. In an interview yesterday, the 47-year-old Mr. Skilling elaborated on his decision to leave Houston-based Enron. On Tuesday, Mr. Skilling insisted he had resigned for "personal reasons" unrelated to Enron's business activities. In the interview, he reiterated that he wasn't under any pressure to resign from the company's board or Chairman Kenneth Lay, who has resumed the CEO's duties at the nation's biggest energy trader. However, yesterday Mr. Skilling said that his "personal reasons" were deeply enmeshed with feelings that he had failed in a crucial business area during his brief tenure as CEO. Calling the company's stock performance a "kind of ultimate score card," Mr. Skilling noted that Enron's share price had fallen by some 50% this year. Mr. Skilling said he took that stock-price drop very personally. "I put a lot of pressure on myself" for that decline, he said. "I felt I must not be communicating well enough" with investors. He felt this particularly given Enron's strong financial results over the past several quarters, based largely on growing volumes in its trading

business, which covers a range of items, including electricity, pulp and paper. If the stock price had remained up "I don't think I would have felt the pressure to leave," he said. In January, Enron topped \$84 a share in New York Stock Exchange composite trading. It closed Tuesday, before the announcement of Mr. Skilling's resignation, at \$42.93 a share. As of 4 p.m. yesterday, Enron traded at \$40.25, after falling below \$37 during the day. Mr. Skilling, who had been at Enron 11 years, said the depressed stock price was particularly tough to explain to fellow Enron employees, many of whom are shareholders. "People would say 'What is going on with the stock, Jeff?' I would have to say I didn't know. It has been frustrating," said Mr. Skilling. The self-portrait offered by Mr. Skilling in the interview is rather different from the widely held image of him as an ambitious, bright and thick-skinned business strategist whose long-held goal had been becoming Enron CEO. Mr. Skilling said that the "final straw" in his decision to leave had come on a visit last week to England in connection with the deaths of three Enron workers in a power-plant accident there. That trip helped reinforce "how tenuous life is," said Mr. Skilling, who has three children from a previous marriage and recently became engaged. While Mr. Skilling said Enron is in "great shape," his departure raised anxiety in the investment community. Merrill Lynch, for instance, lowered its rating on Enron to neutral from buy based on "uncertainty" created by the resignation. Yesterday, an Enron spokesman confirmed that Mr. Lay plans to name two executives to the existing "office of the chairman" within the next few days or weeks. The spokesman said Mr. Lay hadn't yet revealed whom the two would be. The office of the chairman had consisted of Mr. Lay and Mr. Skilling.

Enron's Lay to Name Two to Chairman's Office, Newspaper Reports 2001-08-16 08:41 (New York)

Houston, Aug. 16 (Bloomberg) -- Enron Corp. Chairman Kenneth Lay plans to name two company executives to the "office of the chairman" as soon as the next few days, the Wall Street Journal reported, citing an unnamed Enron spokesman. The appointments follow the resignation Tuesday of Jeffrey Skilling as chief executive. Lay took back his job as CEO of the biggest energy trader. Skilling had said he resigned for personal reasons. Pressure from Enron's falling stock price also contributed to his decision, he said in an interview with the Journal. Skilling joined Enron in 1990 and became chief executive in February. "I felt I must not be communicating well enough" with investors, he said, according to the newspaper. Houston-based Enron's shares had fallen 48 percent this year before Skilling stepped down, though second-quarter profit rose 40 percent from a year earlier, and revenue had almost tripled. The "final straw," showing "how tenuous life is," happened last week on a trip to England related to the deaths of three Enron workers in a power-plant explosion, Skilling said in the newspaper interview. Enron's stock fell \$2.68, or 6.2 percent, to \$40.25 yesterday.

Abreast of the Market Veritas Software, Vitesse Decline Amid Tech Slump, Energy Surge By Robert O'Brien Dow Jones Newswires

08/16/2001 The Wall Street Journal C2 (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW YORK -- Energy stocks found reason to rally, but weakness in technology issues caused market averages to fade in another thinly traded summer session. BEA Systems hit a 52-week low as investors reacted to the downbeat forecast that accompanied the San Jose, Calif., software maker's fiscal second-quarter results Tuesday. BEA Systems fell \$1.56, or 8.4%, to \$17.04 in Nasdaq Stock Market trading. At best, reaction to the earnings results in the group drew an inconsequential response. Semiconductor-equipment maker Applied Materials finished nine cents higher at 43.74 on Nasdaq, while Nvidia, a maker of three-dimensional graphics processors, rose 10 cents, to 85.95 on Nasdaq, after its quarterly profit statement. In a more accurate gauge of investor caution, companies about to record quarterly results faded. Brocade Communications, a maker of data-storage software products, ease

Secretary of State Bill Jones on Monday urged California's attorney general to investigate possible conflict of interest violations by consultants hired to help the Davis administration navigate the energy crisis. Jones, a Republican candidate for governor, said at a Los Angeles news conference that Atty. Gen. Bill Lockyer and the state Fair Political Practices Commission should determine whether seven of the consultants have conflicts of interest because they own stock in one or more energy companies. He also asked the state's chief law enforcement officer to immediately determine whether the governor's office violated state law by exempting 21 of the 45 consultants from financial disclosure requirements. "I am gravely concerned that a cloud of illegality and collusion exists at the highest level of our state government due to the actions and the conscious policy of secrecy of Gov. Davis," Jones said. That brought a sharp retort from the governor's spokesman, Steve Maviglio, who attacked Jones for engaging in campaign politics. "The secretary of state has a five-person team bankrolled by the taxpayers attempting to dig up dirt for political reasons," Maviglio charged. "This is politics pure and simple being played by a candidate desperate to get his name in the paper," Maviglio said. If there are any violations of the law, he added, "they're going to be addressed." The secretary of state's entry into the energy controversy poses yet another headache for Davis as he prepares to run for a second term next year. Already, the GOP and some power producers have begun airing commercials critical of Davis' handling of the power crunch, forcing the governor to dip into his own campaign funds to fight back. Jones, as the state's chief elections officer, contends that his concerns are not just political. He noted that he appoints one of the five members of the Fair Political Practices Commission, which enforces campaign finance and conflict of interest laws. Among other things, Jones questioned why Vikram Budhraj, head of the Electric Power Group, a Pasadena energy consulting firm, bought stock in Edison International and Dynegy Corp. in the days before he went to work for the state. Budhraj was hired under a \$6.2-million contract between his firm and the state Department of Water Resources that was signed on Jan. 18. Like two dozens of the consultants hired by the state, he did not complete a financial disclosure statement until last week, more than six months after he went to work for the department, which now buys power for the state's three largest utilities. The financial disclosure statement filed by Budhraj last Thursday shows that he bought between \$10,000 and \$100,000 worth of Dynegy stock on Jan. 11. Six days later, he bought between \$10,000 and \$100,000 of Edison stock. That was the same day that Davis declared a state of emergency because of the energy crisis and ordered the Department of Water Resources to begin buying power on behalf of the state's financially troubled major utilities. On Jan. 22, Budhraj again bought between \$10,000 and \$100,000 of Edison stock. On his disclosure statement, he indicated that he began work for the state Jan. 25 and sold the stock on Jan. 29--the first opportunity he had to divest his holdings. Jones told reporters that Budhraj's investments in Edison grew by 44% to 47%, while his Dynegy investment increased 28% in that brief period. Budhraj was also on retainer as a consultant to Edison International, earning more than \$100,000 in the year before becoming a contractor for the state. Maviglio said Budhraj wrote a letter to DWR Deputy Director Ray Hart saying he had no dealings with Edison International. He also was not involved in any long-term contracting with Edison. Any profits Budhraj made from the stock are irrelevant because the stock was sold by the time he was on the job, Maviglio said. Another consultant, Bernard Barretto, who describes himself as an energy trader/scheduler for the state, disclosed last week that he purchased stock in power producer Enron Corp. But no date or amount of the purchase was listed. Financial disclosure forms filed last week by five other consultants show they all own stock in Calpine Corp., a major California-based power wholesaler. Energy trader Elaine L. Griffin bought between \$10,000 and \$100,000 worth of

Calpine stock on Feb. 1. Her contract with the state began Feb. 20. Griffin's newly completed economic disclosure statement does not show her selling the stock. Herman Leung, who went to work as an electricity scheduler in March, bought between \$2,000 and \$10,000 worth of Calpine stock on Jan. 22. Schedulers William F. Mead, Peggy Cheng and Constantine Louie also disclosed that they own stock in Calpine. Mead, in fact, said his holdings ranged between \$100,000 and \$1 million. But their forms contain an important omission: The consultants do not say when they purchased the shares. Oscar Hidalgo, a Water Resources spokesman, said the agency's attorney is reviewing all the past purchases to ensure that no laws were violated by contractors buying power or negotiating long-term contracts with companies in which they held stock. "We're reviewing all that to see if [there were] any problems with any past negotiations," Hidalgo said. "We're looking at all the records in past buys or trades so we understand who exactly did what." He said it's a "very big task" that will take weeks to complete. In the meantime, those contractors who have disclosed stock ownership have been recused from working with generators in which they have a financial interest. The governor's spokesman said several of the contractors who own stock in Calpine are not traders, and thus do not have direct dealings with the company. "If you own Calpine stock and aren't doing any business with Calpine, then you're fine," Maviglio said. Calpine is one of a number of firms that negotiated long-term contracts with the state and that have come under fire from critics who say they will saddle consumers with artificially high electricity costs for years to come. For weeks, Jones has been sharply critical of the administration's failure to require its consultants to file conflict of interest forms, which must be completed within 30 days of a person starting work. The governor's spokesman said the administration was told by the sta

WSJ, Wed, 6/27: California Secures Loan of \$4.3 Billion for Power

Here's a switch: Generator praised for pricing, efficiency By Dale Kasler Bee Staff Writer (Published June 27, 2001) SAN JOSE -- If the power generators profiting from California's energy crisis are a reckless band of megawatt cowboys, as their critics claim, then Calpine Corp. bills itself as the guy in the white hat. Unlike many of its rivals, this fast-growing power plant builder and operator hasn't been accused by federal regulators of overcharging California for electricity. Gov. Gray Davis, who routinely accuses generators of price gouging, exempts the San Jose-based company from his criticism. He further praises Calpine's efforts to build thousands of megawatts' worth of new power plants, enough to make a significant dent in California's energy shortage. Known for its relatively clean-burning plants, Calpine even gets support from some environmentalists. "They have made a clear commitment to invest in California's future," said Davis spokesman Steve Maviglio. "Their pricing has been far more reasonable than any other generator." Taking a dig at Calpine's Texas-based rivals, he said Calpine "took a different tack from the Joe Bobs of the world," an apparent reference to executive Joe Bob Perkins of Houston's Reliant Energy Inc. In some respects, Calpine seems quaint when compared with its swashbuckling competitors. Rather than cash in on the lucrative but flighty spot market for power, Calpine builds comparatively efficient plants and sells the energy via stable, long-term contracts, such as its contract to deliver power to Sacramento from its just-completed plant in Sutter County. When the Federal Energy Regulatory Commission ordered several generators to refund more than \$124 million to California because of overcharging, it left Calpine off the list. However, Calpine is participating in the FERC-sponsored settlement talks under way in Washington that could result in generators making refunds to California. The company wouldn't comment on those talks but takes great pains to separate its behavior from the conduct of other generators. "We're not a speculator in this business," said Pete Cartwright, the company's 71-year-old founder, president and chief executive. "We're not in it to speculate on high prices. To that extent, I think we're distinct from all of the others." But Calpine isn't building plants out of charity. Although its stock price has suffered lately because of investor skittishness about the energy crisis, the company's financial performance hasn't missed a beat. Calpine's profits jumped five-fold to \$94.8 million in the first quarter of this year. Revenue soared to \$1.23 billion from \$235 million. And despite its disdain for speculation, Calpine is arguably the most daring power plant builder in the business. Coming from seemingly out of nowhere, Calpine has embarked on what experts believe is the most ambitious power-plant construction program in U.S. history. The company currently operates about 7,100 megawatts of power plant generation in 30 states; its plan is to operate 70,000 megawatts in five years. That would make Calpine the largest supplier of electricity in the United States, and probably the world, said company spokesman Bill Highlander. Although Calpine has run into problems in some locations -- including San Jose, where opposition arose to its proposed plant in the Coyote Valley -- it has generally found smooth sailing. "There are others doing this," Cartwright said. "But somebody has to be No. 1. So we decided it would be us." One of the first U.S. power companies to seize on deregulation of the wholesale electricity business, it has concentrated on the United States, while rivals have built plants around the world. "Many of our competitors were off building plants in China and Indonesia; we elected to focus at home," Cartwright said. "That's given us a real jump on our competition." The ambitious nationwide blueprint includes building plants that will produce about 11,000 megawatts of new power in California. That would bring Calpine's total capacity in California to more than 12,000 megawatts, enough to power about 9 million homes. That would make Calpine the largest power generator in the state, eclipsing Pacific Gas and Electric Co. The company is adding 60 employees to its 90-employee construction-management office in Folsom. Calpine's 500-megawatt plant in Sutter County, which has its formal opening in July, has already begun generating power for the state Department of Water Resources and has sold under contract about a third of its electricity to the Sacramento Municipal Utility District. Calpine's reach is extending far beyond California. Its new plant in Middletown, N.Y., scheduled to open in 2004, will be Calpine's fifth in that state. It's developing its second and third plants in Florida and is doubling its number of Texas plants to 10. There will be plants in Goldendale, Wash., and Oxford, Conn., and Calgary, Alberta, and points in between. The company also is building a \$624 million natural gas pipeline into Southern California from New Mexico in a joint venture with pipeline operator Kinder Morgan Energy Partners, a move that could dramatically ease California's natural gas shortage. A second phase of the project, to cost \$1.1 billion, would extend the

line into Northern California. Calpine's profile is growing in other ways. In Houston, where it runs a trading desk, it's building a 32-story office tower in the "power corridor" downtown, taking its place in the skyline among such power titans as Enron Corp. Cartwright said Calpine can handle its phenomenal growth just fine. "We determined that the market would support that many megawatts, that we had the organization and the project opportunities and the financing and the equipment to make it happen," he said. "It

Haas NewsWire April 2, 2001 ***Pick up your tickets for CEO Exchange from 12:30 to 2:00 any day this week in the Haas courtyard.*** CONTENTS #7 Ranking for Haas School is Best Ever in Latest US News Business School Survey The Economy in Crisis: Five Haas Experts Comment on the State of the Economy Classes Start Today for New Master's in Financial Engineering Degree at Haas Sharing our Strengths: The Haas/Boalt Connection Haas Advisory Board Convenes for Semi-Annual Meeting Haas in the News Happening at Haas Haas Celebrations #7 RANKING FOR HAAS SCHOOL IS BEST EVER IN LATEST US NEWS BUSINESS SCHOOL SURVEY The Haas School of Business was ranked the 7th best business school in the United States in the latest annual survey of American graduate schools by US News and World Report magazine. This is the best showing ever by the school in the history of the US News ranking, which was released Friday.

US News also ranked the Haas School's Evening MBA Program the 8th best in the country, unchanged from last year. The full-time MBA Program was number 10 in last year's ranking, up from 14th place the year before.

The rankings appear in the April 9 issue; copies are available on newsstands today. The rankings and related stories are also available on line at <http://www.usnews.com/usnews/edu/beyond/bchome.htm>.

"We are always pleased when a ranking reflects the reality we live every day, which is that the Haas School is a world-class institution, with faculty and students who are extraordinarily innovative and accomplished and, consequently, very much in demand by every type of major business and academic organization, everywhere on earth," said Jay Stowsky, associate dean for school affairs and initiatives.

Several specialty programs at Haas were also ranked among the top 10 nationwide in a part of the US News survey that is based on the opinions of deans and MBA Program heads. They include: finance (10th); general management (8th); entrepreneurship (10th); marketing (8th); quantitative analysis (8th); and nonprofit organizations (7th).

In addition, the Haas School's graduate program in health management was ranked the 7th best program in the country.

The full-time MBA program ranking is based on a weighted average of eight measures of academic quality that fall into three major categories: reputation (40 percent); placement success (35 percent); and student selectivity (25 percent).

Babson THE ECONOMY IN CRISIS: FIVE HAAS EXPERTS COMMENT ON THE STATE OF THE ECONOMY The Haas School community will have the opportunity to hear Haas experts speak on the state of the economy. "The Economy in Crisis: A Panel Discussion with Haas School Experts," takes place Wednesday, April 4, from 2:00 p.m. to 3:30 p.m. in Arthur Andersen Auditorium. All Haas students, faculty, alumni, and staff are invited to attend.

The panel of speakers includes: Andrew Rose, the Bernard T. Rocca Jr. Professor of International Trade, director of the Clausen Center for International Business and Policy, research associate at the National Bureau of Economic Research, and a research fellow in the Center for Economic Policy Research. Ken Rosen, the California State Professor of Real Estate and Urban Economics and the chairman of the Fisher Center for Real Estate and Urban Economics. Janet Yellen, the Eugene E. and Catherine M. Trefethen Professor of Business Administration, former Chair of the Council of Economic Advisors under President Clinton, and former governor, Board of Governors of the Federal Reserve System. James Wilcox, the Kruttschnitt Professor of Financial Institutions, former chief economist at the Office of the Comptroller of the Currency, and former economist, Federal Reserve Board. Dean Laura Tyson, the Class of 1939 Professor of Economics and Business Administration, former chairman of the National Economic Council and former chairman of the President's Council of Economic Advisors. Dean Tyson also plans to address the issues surrounding graduating into a turbulent job market, including an assessment of various industry sectors. The session will be open to questions from the audience after opening remarks. CLASSES START TODAY FOR NEW MASTER'S IN FINANCIAL ENGINEERING DEGREE AT HAAS For 49 students classes start today for the Master's in Financial Engineering (MFE), a new graduate degree program at the Haas School of Business. Of the 49 students, 6 are taking the program to earn a concurrent degree with the MBA program, combining the in-depth study of financial economics and the dynamics of markets with the general management education of the MBA program.

The class of 2002 is represented by an international group of highly educated scientists and professionals: The inaugural class represents 19 countries: 7 students come from China, 6 come from Canada, 5 from Korea, and 5 come from five different European countries. Also represented are South America (Chile and Colombia), Africa (Zimbabwe), and Southeast Asia (India and Indonesia), as well as Taiwan, Hong Kong, Russia, and the Republic of Georgia. Top professions include finance (25%), engineering (18%), and research & development (11%) 18% hold a Ph.D. and 25% hold a master's degree in another field. One fourth of the class performed in the top percentile of the GMAT. The Haas MFE is the first such degree program in the United States that is offered entirely under the auspices of a business school. It is also the first US program to require its students to take a three-month internship at a top financial firm as part of the learning experience. The Haas MFE program will prepare candidates with superior analytical skills for a growing niche of quantitative finance careers.

MFE candidates will train for positions as risk managers, investment bankers, asset managers, derivatives traders, and developers of specialized securities at the world's leading commercial and investment banks, insurance companies, and corporate and public treasury departments.

Founding sponsors include some of the world's top financial firms, namely AIG Inc., Barclays Global Investors, BARRA Inc., Gifford Fong Associates, Goldman Sachs & Co., First Union Bank, KMV LLC, MBIA Inc., Morgan Stanley Dean Witter, Quantal International Inc., The Dean Witter Foundation, and WR Hambrecht + Co., LLC. Sponsoring firms will be accepting interns from the programs.

PG&E stakeholders meeting for the 2001 PG&E Transmission Expansion

Sender	lgoldseth@svmg.org
Recipients	['lgoldseth@svmg.org']
File	dasovich-j/notes_inbox/11607.

FYI Energy Committee Members:

PG&E is hosting its fifth stakeholders meeting for the 2001 PG&E Transmission Expansion Plan on September 17 and 18, 2001 in San Francisco, CA. The purpose of this meeting is to present the study group with the draft 2001 expansion plan. The fifth stakeholder meeting has been divided into two days: Sept. 17 to present Bay Area Plans and Sept 18 to present non-Bay Area Plans.

Date: Monday , Sept 17, 2001 Subject: Stakeholders Meeting #5 - "PG&E 2001 Electric Grid Expansion Plan - Bay Area Plans" Time: 10:00 a.m. to 4:00 p.m. Location: 77 Beale Street, Conference Room 308 San Francisco, CA 94177

Date: Monday , Sept 18, 2001 Subject: Stakeholders Meeting #5 - "PG&E 2001 Electric Grid Expansion Plan - Non-Bay Area Plans" Time: 10:00 a.m. to 4:00 p.m. Location: 77 Beale Street, Conference Room 308 San Francisco, CA 94177

In order to ensure enough handouts please email or call your RSVP to Ledy Torres (dst2@pge.com or 415-973-1392) by Monday, September 10, 2001. If you have any additional questions about this meeting, please contact Mark Esguerra (pme8@pge.com or 415-973-4380). An agenda and handouts will be sent out soon.

Regards, Mark Esguerra PG&E-Electric Transmission Planning Mail Code N3B P.O. Box 770000 San Francisco, CA 94177

Direct Report Mtg in November (Activity)

Sender	ginger.dernehl@enron.com
Recipients	['lora.sullivan@enron.com', 'geriann.warner@enron.com', 'ginger.dernehl@enron.com', 'j..noske@enron.com', 'd.....
File	dasovich-j/inbox/492.

Hi Everyone,

The budget meeting will soon be upon us and I want to keep everyone informed as to what will take place. Day of arrival, November 7th there is nothing planned; everyone is on their own for dinner. Thursday, November 8, the meeting will begin @ 8:00 AM and will conclude by 1:00 PM. I will inform you later as to the meeting location. After the meeting on Thursday there will be an afternoon of activities available. Please note what is available and let me know of your activity choice. Friday, November 9 the meeting will begin @ 8:00 AM and conclude by 3:00 PM, so please make your travel arrangements accordingly.

Golf (I have tee times for 1:32, 1:40 & 1:48 PM) Spa Services (If interested, I can fax you what services they offer) Horse Back Riding (I can fax schedule and rates if interested) Tennis (I have information I can fax if interested)

Transportation:

Airport transportation from the Colorado Springs Airport is available through the Broadmoor Transportation Service. Please call 719-577-5769 to make your transportation arrangements. Airport transportation is b reservation only.

Fares: \$16.00/each way (20-30 min travel time)

Thanks and I will keep in touch.

Ginger Dernehl Administrative Coordinator Global Government Affairs Phone# 713-853-7751 Fax# 713-646-8160

Hi Team,

Here's the final cut.

I added hyperlinks to DCF sheets in backup as well as to trading comps and deal comps in the backup. And animation for slide turns.

Also, be sure to preview the 3-legged stool slide I added after valuations in slide presentation mode with sound enabled... Totally OK to remove it if any of you don't like it...

-----Original Message----- From: Michael Heinrich Sent: Monday, March 12, 2001 4:17 PM To: Jacquelyn Wu Subject: Adjustment Bid Market Update <<...>> 5201 Great America Parkway, Suite 522 Santa Clara, CA 95054 408 517-2100 408 517-2985 fax March 12, 2001 Dear Colleague, Thank you for your participation and support in resolving our problems this summer regarding congestion management in the California market. As we have indicated, we believe that this problem is costing us millions of dollars today and continued pro rata schedule cuts as a method of congestion management will continue to reduce energy supply this summer and escalate substantially to well over \$100,000,000 in replacement energy costs. As you suggested, we presented our solution of operating an adjustment bid market to manage congestion to the CAISO Board of Governors on February 28, 2001. Following that meeting we were requested to work with the CAISO staff to develop a resolution to be presented at the next Board meeting on March 15, 2001. The CAISO staff will be presenting their solution described as "Market Stabilization Plan/Interim Market Redesign" in a effort to resolve this and other problems. While the CAISO plan may have long-term benefits, it has been brought forward without the benefit of full stakeholder airing and we believe that it will be difficult to complete all software and systems work in time to have benefit this summer. In addition, it will require significant participant re-education. We are also very concerned about the amount of time remaining to complete this process along with the risks and costs associated with its implementation. Therefore, APX will finalize its offer for the solution that we described to you on February 21 as an alternative to the CAISO staff plan during the upcoming CAISO Board of Governors meeting. We know that our solution can be implemented in time, that it will improve adequate supply and that it will save millions of dollars this summer. We have heard from many of you that you support this market as a viable way of mitigating the high cost of congestion in the coming months. WE ARE ASKING FOR YOUR SUPPORT OF THIS PLAN WITH the CAISO Board of Governors on March 15, 2001. Sincerely, Michael L. Merwin

David Hoffman gave me your name as someone who may know vendors that are interested in a space at the up coming ASME Distributed Power Conference (Please see conference information below). If so, please pass this on to them, or have them get in touch with me.

Thank you, Tom La Berge

T. La Berge & Company 3118 NE Davis ST. Portland, OR, 97232 USA tel: 503-232-8965 fax: 513-232-6049
tomlaberge@Qwest.net

DISTRIBUTED POWER CONFERENCE SPONSORED BY ASME OREGON SECTION

WHEN: April 24 and 25, 2001 WHERE: Portland, Oregon TOPICS INCLUDED: Fuel Cells, Co-Generation, Micro Turbines, Environmental, Regulatory Issues, Regional Energy, Utility Interconnection, Venture Capital.

For details and registration go to <http://www.asme-distributed-power.com/>

Who Should Attend? The intended audience includes managers, engineers, regulatory personnel, and the general public. All people wishing to have a general understanding of smaller, "in-the-fence" power generating facilities will want to attend this conference.

Participants will gain a basic understanding of the various generating technologies commonly used, what is involved in completing a successful project and a better appreciation of the current regional energy picture

Register by February 20, 2001 for \$350.00 (\$400.00 after)

Vendor Display Space is Still Available: Vendors: Buy two tickets and get a free display space. Or, buy a vendor display space and get two free tickets to the conference. (The cost of display space is buying two conference tickets.) For information and to reserve your display space please contact Tom La Berge at 503-232-8965 or e-mail tomlaberge@quest.net .

Who We Are The Oregon Section ASME (American Society of Mechanical Engineers) is a volunteer, non-profit, professional organization. This conference will promote and enhance the technical competency of attendees and contribute to the well-being of the community.

Attached is a ruling by ALJ DeUlloa issued yesterday pertaining to the calculation of the California Procurement Adjustment. A draft decision was suppose to be release on such on Friday, March 16th. It was not, and now we know why. On March 14th, the Department of Water Resources wrote to the Commission to give the commission its views on how the CPA should be calculated. In his ruling of yesterday DeUlloa stated that he would wait to issue the PD so as to take into account DWR's submission. He also provided parties until tomorrow to file comments on the DWR letter (which is attached to the ruling).

Not surprising, DWR has a different view of the world than the UDCs do when it comes to calculating the CPA. The UDCs view the CPA as residual amount left over from the generation component of their bundled rate on 1/5/01 after the cost of their retained generation (including QFs and bilateral contracts) are subtracted out. DWR views the CPA as a rate (i.e., a cent per kWh) which would be paid to DWR by the UDCs every month. It is DWR's view that a Total Generation Related Rate must be calculated which is a blended average of the cost of the UDC retained generation and the cost of the "net short" power. From this total rate (e.g., 5 cent) the cost of the UDC retained generation (e.g., 2 cent) would be subtracted and the remainder (i.e., 3 cent per kwh) would be the CPA. This CPA would be subject to further allocation by the Commission to determine the Fixed Department of Water Resources Set-Aside. DWR is not asking that such allocation be done now.

DWR's view of the world would place it in a sounder financial position, making it a more viable purchaser of electricity for California, but would place the UDCs in more dire straights.

Please let me know by tomorrow at noon if you want to comment on the DWR proposal.

Jeanne Bennett

RE: AReM/WPTF Updated Draft Filing Concerning the Proposed Decisi

Sender	mday@gmssr.com
Recipients	['harry.kingerski@enron.com', 'jdasovic@enron.com', 'robert.c.williams@enron.com']
File	dasovich-j/notes_inbox/12363.

Here is my view on the comments. The ARM comments cover most of the territory we would want to cover, but they do not spend enough time explaining that the Barnett conclusion about "credits only not cash" is the result of a flawed interpretation of the original stipulation. The comments also do not raise the points in Bob Williams' email from two days ago, namely that the conclusion that only credits are available is counter to the course of performance and practice by the parties, and that the decision is procedurally flawed for providing relief beyond that requested in the Edison petition, thereby denying the other parties due process. These elements could be added to the comments.

Secondly, however, the comments tee up very clearly the fact that we have an outstanding complaint on these issues and say that the decision could hurt our chances for recovery. Bob had recommended that we down play these issues to avoid enticing our enemies at the Commission. The ARM comments explicitly indicate that this order will prejudice our complaint case, which I do not believe we would want to admit in any event.

In conclusion: the ARM comments should not be used as the sole vehicle all the above changes are made. If the changes are made, we can go with those comments. Otherwise, I would suggest sticking with the comments we are preparing, adding more information about our due process objections and arguing strongly for a bifurcation of the issues. This would both support ARM and allow us to make a more focused pitch to defer the cash or credit issue.

Please call me at 415-279-0702 to let me know how you would like to proceed. Mike Day

From: Marty Sunde 03/20/2001 09:25 AM Phone No: 713 853-7797 Phone 888-953-9478 SkyTel Pager EB 889

To: Jeff Dasovich/NA/Enron@Enron, Eric Letke/DUB/EES@EES, Sandra McCubbin/NA/Enron@Enron cc: Subject: Re: Follow up with Alpert's Office

Jeff and Eric, I have NO problem trying to get letters for support of Direct Access. Eric, if we can get those to support Jeff and Sandi, this is wonderful.

Also, I had asked Eric to check with Alpert's office to register our follow on phone number and offer to try to correct the aggravated customers. Eric, if you can provide a status on all of these as you make progress, that's appreciated.

----- Forwarded by Marty Sunde/HOU/EES on 03/20/2001 09:13 AM ----- From: Jeff Dasovich@ENRON on 03/19/2001 07:57 PM Sent by: Jeff Dasovich@ENRON To: Marty Sunde/HOU/EES@EES cc: Eric Letke/DUB/EES@EES, Heidi Messick/EFS/EES@EES, Sandra McCubbin/NA/Enron@ENRON Subject: Re: Follow up with Alpert's Office

Marty: Thanks for the information.

Getting Eric's contact information to Alpert's office is in motion. Regarding attempt to follow-up with those who called Alpert's office to complain, I wasn't clear on that action. Likely makes sense for Eric to coordinate with Sandi to make the contact with Alpert's office. Letters are an attempt to influence Alpert to 1) fix the Direct Access prohibition and 2) ensure that DA customers don't get saddled with the DWR costs.

Let me know if this approach works.

Best, Jeff

Marty Sunde@EES 03/19/2001 07:02 PM

To: Jeff Dasovich/Na/Enron@ENRON cc: Eric Letke/DUB/EES@EES, Heidi Messick/EFS/EES@EES, Sandra McCubbin/NA/Enron@Enron Subject: Re: Follow up with Alpert's Office

All I asked Eric to do was: ensure that there was an Enron contact if another complaint came in. find out from Alpert's office if we could call back a few of those who called to complain to find out what they perceived, correct the misperception, apologize.

From: Jeff Dasovich@ENRON on 03/19/2001 04:20 PM Sent by: Jeff Dasovich@ENRON To: Scott Govenar <sgovenar@govadv.com>, Eric Letke/DUB/EES@EES, Sandra McCubbin/NA/Enron@Enron, hgovenar@govadv.com, Susan J Mara/NA/Enron@ENRON, mpalmer@enron.com, Karen Denne/Corp/Enron@ENRON, Janel Guerrero/Corp/Enron@Enron, Paul Kaufman/PDX/ECT@ECT, Richard Shapiro/NA/Enron@Enron, James D Steffes/NA/Enron@Enron, Harry Kingerski/NA/Enron@Enron, MDay@GMSSR.com, ken@kdscommunications.com, Marty Sunde/HOU/EES@EES cc: Subject: Follow up with Alpert's Office

Thanks, Scott.

Scott/Hedy/Sandi/Bev: Erik Letke heads up the retail marketing effort underway in San Diego. Marty Sunde wants Alpert to have an EES commercial contact that she can talk to in the event she has further questions, etc., He'd like Erki to be the contact person. Erik could you copy your vitals (title, contact info) to Scott and Hedy Govenar and Sandi McCubbin so they can forward along to Alpert?

Erik, seems that it would be useful if the customer letters to Alpert could make the following points (folks please weigh in and add/subtract/modify if needed):

The customer's glad to have had the option to take Direct Access service from Enron because having the opportunity to take advantage of the offer has made the customer better off. Direct Access is an extremely important option that customers need, want and should have going forward. Any "solution" that the Legislature comes up with must therefore include the continuation of Direct Access for all customers. As such, the Legislature should immediately fix AB 1X to make sure that Direct Access remains a permanent fixture of California's energy strategy. Direct Access customers should not be forced to pay for DWR's power purchase costs, since Direct Access customers aren't benefitting from those purchases.

Best, Jeff

Scott Govenar <sgovenar@govadv.com> 03/19/2001 04:01 PM

To: Jeff Dasovich <jdasovic@enron.com> cc: Subject: Dede

As discussed, customers should send letters to Dede as follows:

The Honorable Dede Alpert California State Senate State Capitol, Room 5050 Sacramento, CA 95814

Interested companies should copy: "Honorable Members of the California State Legislature" and fax or mail me a copy for further distribution. My fax is (916) 448-0816 and my address is 1127 11th Street, Suite #400, Sacramento, CA 95814.

LME Base Metals:Aluminum Ends Officials Dn On Fresh Sales

07/06/2001 Dow Jones Commodities Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

LONDON -(Dow Jones)- London Metal Exchange three-month aluminum ended officials lower Friday from Thursday's late kerb, on heavy fresh speculator selling in Asian trade and an unexpected stock build, dealers said. (LME three-month prices in dollars a metric ton at officials, with the previous late kerb close in brackets. Comex copper at 1324 GMT in cents a pound, with the previous close in brackets.) Copper 1,562.50 (1,560.00) Tin 4,537.50 (4,535.00) Aluminum 1,449.50 (1,451.50) Zinc 886.25 (884.50) Nickel 5,975.00 (5,962.50) Lead 459.50 (450.50) Comex Sep Copper 70.25 (70.85) The Asian selloff forced aluminum down to a one-year low at \$1,434/ton, and after some early forward buying interest in the pre-market in London, the market took a further blow as LME stock movements were released. Aluminum stocks rose 1,450 tons Friday, bringing total stocks to 626,550 tons. "It (the stock increase) was fairly unexpected, but it exposes the slackening demand that has characterized this market for the last six months," said one LME dealer. The move kept aluminum prices depressed for much of the morning, before more forward and bank buying emerged in the first two rings to pull prices off the lows for officials. Aluminum's early falls pulled the already nervous copper market to a two-year low at \$1,552/ton, and although the latter's stock rise was much more considerable, it had been expected, dealers said. Copper stocks in LME warehouses have risen by over 50,000 tons in the last two weeks, and a number of dealers are still insistent that another 30,000-40,000 tons will be seen in the coming two weeks. Unconfirmed reports have said major trade house Enron is behind the stock build, in an effort to reduce the market's nearby supply tightness and alleviate the large short positions they are thought to have built up on the July-for-a-week spread. However, the stock builds are only having a limited effect in easing the tightness. "Everyone knows what they (Enron) are up to, and won't lend until they're really hurting," one LME floor dealer said. Spreads were also a focus of the tin market, where prices slumped to an eight-year low at \$4,490/ton, after the cash-to-three-month spread reverted to a \$25/ton contango Friday morning from a \$60/ton backwardation at the beginning of the week. The move was caused by heavy lending of the nearby spreads and rolling forward to September, a tin dealer said. "I think we've seen the last of the tightness for a couple of months," he added. -By David Elliott, Dow Jones Newswires; 44 207 842 9353; david.elliott@dowjones.com

ENTERPRISE INTERVIEW: India's salesman to the investing world

07/06/2001 AsiaWeek Copyright (C) 2001; Source: World Reporter (TM) - Asia Intelligence Wire

Convincing foreign investors that his country is a good place to do business is a tough sell. But Delhi's finance minister insists that despite a few high-profile setbacks his country offers the world's best returns Indian finance minister Yashwant Sinha has had a roller-coaster year. In February, he delighted foreign investors with a reformist, pro-business budget. But days later, confidence was rocked by a stock market crash and insider trading scandal. Then New Delhi's first major privatization, of the BALCO aluminum plant, sparked a crippling two-month strike by workers. Worse, India's biggest and once most trumpeted foreign investment, Enron Corp's \$3-billion Dabhol power project, remains at a standstill following claims the Maharashtra state government defaulted on payments. A U.S.-led \$1.6-billion power project near Madras is stalled over financing. Recently, during a road show to Hong Kong and Singapore, Sinha spoke with Executive Editor Richard Hornik, Managing Editor Zoher F. Abdoolcarim and Senior Editor Cesar Bacani. Extracts from their conversation: Can India really compete for investment? We have completely opened up the Indian market. I know that China and other countries have been receiving large foreign direct investments, but let's not forget that they started much earlier on the reform path. The problem is one of perception. We have the challenging task of explaining the new India to the world.

Don't you also have the task of explaining it to the Indian people? Isn't there a resentment of foreign companies left over from the colonial era? Every government has pursued the same reform path, including welcoming foreign direct investment. There has [also] been a very marked change from what you referred to as the colonial past. The increasing realization is that it is not Western multinationals that are causing problems. It is competition from other developing countries. There seems to be disquiet among investors, though, about high-profile cases such as Enron and BALCO. BALCO had nothing to do with foreign investment. It was a 100% government company, and we decided to sell 51% along with management control. There was some resistance, but fortunately that has been resolved. In the case of Enron, I have clearly sent out a message to both the Maharashtra government and [Enron] that they had to sit down in the spirit of constructive cooperation and find a solution. Let's not [interpret] a commercial dispute involving one company as being a major disincentive for foreign investment. What are you doing to increase governance in the financial world? I have told Parliament three things: That we shall adopt international best practices so that the scope of mischief is reduced further; that we must strengthen the market regulator; and that we want to corporatize the stock exchanges, which are run by the brokers, so there can be no conflict of interest. In India, can what is manufactured by foreign-owned firms be sold locally? Absolutely. And because of its sheer size, India's middle class of 250-300 million consumers is almost like a middle-sized [developed] country. In terms of purchasing power parity, India is considered to be the world's third largest economy. Another advantage for investors] is that we have a judicial system that does justice to Indians and foreigners alike. But it's slow - very slow. When you say slow, there are courts of appeal from primary courts to the High Court

?

FYI on the Enron mtg...? I'll catch up with Jeff early next week, talk to h= im=20 about the mtg, and strategize on next steps.? I think we have a legitimate= =20 chance to do something with this group at Enron, and need to assess where= =20 Jeff can help without complicating the decision-making process in the=20 near-term.

?

-----Original Message-----

From: David Young=20 Subject: Enron Demo Recap

Here's a recap of our demo meeting with Enron's Global Strategic Sourcing= =20 group on Tuesday...

?

Demo went well.? In attendance for Perfect were Ian, James M and David Y.? =20 Enron's attendees were:

- John Gillespie - Sr Director GSS - Platforms & Processes (decision maker) - Pam Tragesser - GSS Operations Mgr (asst to Derryl C - Sr Dir GSS -=20 Operations) - John Will - Director Sourcing - Pipe Valves & Fittings - Craig Brown - Director Sourcing - Chemicals, Oils & Lubricants - Shirley Jo Dickens-Wilson - Enron Transportation Services Procurement Mgr - Eugene Ribaldo - Enron Energy Services Procurement Mgr - ibuyit.com team= =20 lead - Ken Sommers - Enron Energy Services Procurement Mgr

?

Despite only having 1 hour to present, Ian competently ran through a compan= y=20 and feature overview, then blasted through a demo of PS2 and PPD.? We did n= ot=20 get to show PI.? They all bought in that this was a sophisticated sourcing= =20 tool, that it followed their processes and would help streamline their=20 operation.? Only negatives we heard was that the \$1M price tag was a show= =20 stopper, and that they were trying to minimize RFQs and focus on release=20 against agreements.? With 2000 revs at over \$100B, and a spend to match tha= t,=20 their ROI would be tremendous.? =20

?

Shirley Jo said that her primary use of this system would be for any purcha= se=20 over \$50k, which requires 3 bids.? She does not feel that she has enough of= =20 these events to justify implementation in her ETS group.? =20

?

Their current processes are basically pen, paper, phone and fax.? They do u= se=20 RFQ templates and Excel spreadsheets.? They also model Total Cost of=20 Ownership - evaluating the total lifecycle of materials.

?

They are using their homegrown auction platform, DealBench, and were trying to compare this against our system. Their transaction fees for using the DealBench system are minor, so our pricing looks high, but that would be comparing apples against oranges. I will address this in the cover letter on the pilot proposal we will send.

?

Questions that came up included:

- What is the difference between maverick spend in Procurement vs Sourcing? Ian responded Perfect reduces maverick spend during the sourcing cycle by standardizing company best practices and providing visibility/accountability of vendor selection criteria.

- How does the optimization calculation work? Ian gave basic explanation of input variables and ranking/scoring. Don't feel we need to elaborate on this at this point, possibly in future.

- Can we utilize a hands-on demo to play with the system? We suggested a pilot, but also said that it might be possible to work something out over Webex just to test drive a little more before moving into a pilot.

?

We agreed that the next step is for us to send a pilot proposal and they will get together either Friday or sometime next week to review the proposal, discuss their opinions and determine the next step. ?

?

I sent the Pilot Proposal and cover letter out today by email after final approval by Ian. I will followup on Monday to find out what their evaluation gameplan is and to suggest meetings so that we can get ROI inputs to allow James to workup an ROI proposal.

NEWS IN BRIEF <http://www.tr.com/online/trd/2001/td020501/Td020501-05.htm>

***** FRUSTRATED JUDGES FOCUS ON BACKGROUND IN 'AVERAGE SCHEDULE' CASE

Appeals court judges today vented their exasperation at the inability of attorneys to explain how universal service support for each small, "average schedule" company is determined. The attorney representing the FCC bore the brunt of the judges' frustrations and, at times, caustic comments on that issue.

But on the legal issues, the lawyer representing the National Exchange Carrier Association, Inc., in its challenge to an FCC decision seemed to take the harder hits. The U.S. Court of Appeals in Washington must decide whether the FCC acted "arbitrarily and capriciously" in prescribing a 6.5% increase in "average schedule" universal service support.

"Average schedule" companies use formulas derived by NECA and approved by the FCC to approximate their per-loop costs of providing service. This is in contrast to so-called "cost companies," which perform studies to calculate their actual per-loop costs.

The case marks the first time that NECA, which the FCC has charged with updating the formula used by "average schedule" companies to calculate universal service support, has asked the court to review an FCC order, NECA attorney

Richard A. Askoff pointed out during oral arguments this morning.

The judges spent as much time seeking information on how the "average schedule" mechanism works as they did questioning attorneys about their legal arguments. Judge David S. Tatel asked for clarification of how the "average schedule" formula was applied to individual companies.

After FCC attorney Laurel Bergold spent nearly all her allotted time in an unsuccessful attempt to clarify that aspect of the case, Chief Judge Harry T. Edwards commented, "We get hard things from the FCC, but this [case] is bizarre."

Mr. Askoff apparently cleared up the matter for the judges during his rebuttal arguments. He explained that certain data (such as the number of loops per exchange) is plugged into the "average schedule" formula to determine a given carrier's amount of support.

But Mr. Askoff faced some tough questions from Judge Douglas H. Ginsburg regarding NECA's argument that it hadn't received proper notice of the FCC's intention to prescribe the 6.5% adjustment. Judge Ginsburg wondered what NECA would have said to the FCC, if it had received notice, that it didn't say in advocating a 33% increase in universal service support for "average schedule" carriers.

Mr. Askoff said NECA would have discussed the "fallacy" of the FCC's belief that universal service support should be tied to growth in the number of local loops. Judge Edwards replied that NECA already had made that argument before the FCC.

The case ("National Exchange Carrier Association, Inc., v. FCC," no. 00- 1055) stems from an FCC decision to reject NECA's proposed "average schedule" universal service formula for 1998-1999.

***** CLECs WANT RECORD ON PACIFIC BELL InterLATA SERVICE BID
'REFRESHED'

The California Office of Ratepayer Advocates, several trade associations representing competitive local exchange carriers (CLECs), and nine individual CLECs have asked the state Public Utilities Commission to "refresh" its record on Pacific Bell's compliance with federally mandated market-opening standards before deciding whether the telco has met those standards.

In a joint petition filed Friday, Feb. 2, they argued that the record in the proceeding was "too stale" for the commission to reach credible conclusions about Pacific Bell's compliance with the market-opening mandates by May 24--the date the commission is scheduled to issue a final decision.

Compliance with a 14-point competitive "checklist" of market-opening moves outlined in section 271 of the federal Telecommunications Act of 1996 is a prerequisite to Bell companies' receiving FCC authorization to provide in-region interLATA (local access and transport area) service. The FCC is required to consult with relevant state commissions and the Justice Department before ruling on a Bell company's section 271 application. Bell companies typically try to convince the state regulators of their compliance before submitting an application to the FCC.

The joint petitioners told the California commission that the record in the proceeding could be supplemented "in a relatively prompt and efficient manner."

If "Pacific Bell intends to include updated or other additional information in its application to be filed with the FCC, then it should make that information available to the [California commission]"

NEWS IN BRIEF <http://www.tr.com/online/trd/2001/td011501/Td011501-05.htm>

***** WorldCom TO PAY \$88M TO END LAWSUIT ALLEGING OVERCHARGES

WorldCom Corp., has agreed to pay \$88 million to customers who claim they were overcharged for direct-dialed calls. The proposed settlement ends a class-action lawsuit brought by subscribers who complained that MCI WorldCom, Inc. (now WorldCom) misled them about the conditions under which it would charge them higher nonsubscriber rates for domestic and international calls.

While the company admits no wrongdoing, it has agreed to compensate customers for the higher charges on calls placed between Feb. 5, 1996, and Oct. 15, 2000. Under the terms of the settlement, WorldCom also agreed not to raise "casual calling" rates for nonsubscribers this year. Daniel Girard, an attorney who represents the subscribers, said that a letter regarding the settlement would be sent to 5 million people who may be eligible for reimbursement.

The U.S. District Court for the southern district of Illinois will decide at a March 29 hearing whether to approve the terms of the settlement in the case ("In re MCI Non-Subscriber Telephone Rates Litigation," docket no. 1275).

In the lawsuit, the subscribers claimed that MCI didn't provide sufficiently clear tariff information describing when it would charge them the higher nonsubscriber rates and surcharges for placing direct-dialed calls. The tariff stated that customers who remain "presubscribed to MCI after [their] account(s) are removed from MCI's billing system" would be charged nonsubscriber rates.

In 1998, the FCC found that the tariff was "too confusing" (TR, Nov. 19, 1998). The FCC's decision "opened the door" for the lawsuit and resulting settlement, Mr. Girard said.

***** QWEST CITES IMPROVED SERVICE, ANNOUNCES LINE-SHARING PACTS

Qwest Communications, Inc., says it improved its service to end-user customers and other carriers in 2000 in key areas--including those that have come under fire from consumers and state regulators.

Qwest filled almost 98% of its service orders on time, Afshin Mohebbi, Qwest's president-worldwide operations, told reporters during a conference call today. Ninety-five percent of local service repairs were completed on time, Qwest's best performance in this category since 1996, he said. He also cited reductions in the percentage of customers whose service was out for more than 24 hours and a decrease in "held or delayed" orders.

Qwest today also unveiled permanent line-sharing agreements with MULTIBAND Communications, Inc., New Edge Networks, NorthPoint Communications, Inc., and Contact Communications. Line-sharing agreements enable competitors to use the high-frequency portion of the loop for data transmission while Qwest continues to provide voice service over the low-frequency portion. Permanent line-sharing agreements now are available to all wholesale customers, Mr. Mohebbi said.

In other long-term plans, Qwest will seek the FCC's approval to offer interLATA (local access and transport area) services in at least one state by year-end; it plans to initiate state-level proceedings in several others, Mr. Mohebbi said. He said Qwest hoped to obtain approval in all of the states in its service area by the end of next year.

Under section 271 of the Telecommunications Act of 1996, a Bell company must obtain FCC permission before providing in-region interLATA services. The FCC must consult with the relevant state commissions as well as the Justice Department to ensure that the Bell company has sufficiently opened its markets to competition.

***** PORTUGAL TELECOM AIMS TO EXPAND BRAZILIAN HOLDINGS

Portugal Telecom SGPS SA plans to expand its Brazilian presence by acquiring wireless operator Global Telecom SA, which operates networks in the Parana and Santa Catarina states. Those states are neighbors to Sao Paulo, where Portugal Telecom already offers wireless service through its Brazilian subsidiary, Telesp Celular Participacoes SA (TCP).

Under an agreement announced today, TCP will pay \$556 million in cash and assume \$654 million in debt to acquire Global Telecom from its current owners--Japan's KDDI Corp., Argentina's ITX Corp., and Brazil's Inepar SA Industria e Construcoes.

Global Telecom's territory has 15 million "pops" (potential customers), of which the carrier has captured 463,000 subscribers. TCP has about 4 million subscribers. The combination of the two requires the approval of Brazil's telecom regulator, Anatel. TCP intends to pay for the transaction with its cash reserves and debt financing.

The announcement of the agreement prompted Moody's Investors Service to place the debt ratings of Portugal Telecom on review for possible downgrade. By acquiring Global Telecom, Portugal Telecom would take "advantage of a unique investment opportunity in a high-growth wireless business," Moody's said in a statement. But "the magnitude of the investment may constrain the financial ratios" of Portugal Telecom, Moody's said, "as well as expose it to a higher risk operating environment."

***** 'CREATIVE FINANCING' RECOMMENDED TO MEET ASIAN DEMAND FOR NETWORKS

Future telecom infrastructure projects in Asia will require "creative financing solutions" if development is to keep pace with demand, a Washington, D.C.-based international telecom lawyer said today. The greatest obstacle to meeting Asia's demand for Internet and other telecom networks is "meeting the communications sector's demand for capital," according to Glenn S. Gerstell, a Milbank, Tweed, Hadley & McCloy LLP partner.

Speaking at the Pacific Telecommunications Council's conference in Hawaii, Mr. Gerstell presented a "white paper" describing the benefits and drawbacks of various financing methods--and how a combination of approaches can secure needed financing in spite of the reluctance of financial institutions to take risks in less developed nations.

"Techniques for Financing Telecoms and Interne

REGIONAL Second workshop set on Qwest market entry bid Qwest says it's improving customer service

STATE & LOCAL GOVERNMENT WISCONSIN Gov. Thompson nominates Garvin to PSC

Gov. Tommy Thompson (R.) has nominated Robert Garvin to the Public Service Commission to fill the vacancy that will be created when John H. Farrow, who has asked not to be reappointed when his term expires March 1, steps down. The nomination is subject to Senate confirmation.

Garvin has been an executive assistant at the PSC since June 1998, responsible for managing the commission's daily operations and providing legal and policy advice on a variety of regulatory matters. Previously, he was the commission's staff attorney and legislative liaison.

Gov. Thompson also reappointed Ave Bie as chairwoman of the three-member commission. She's serving a term that expires in 2005.

CUSTOMER-AFFECTING GEORGIA BellSouth, AT&T agree to \$19 million access charge reduction

The Public Service Commission announced that BellSouth Telecommunications, Inc., has agreed to reduce its access charges by \$19 million. The reduction follows private negotiations between BellSouth and AT&T Corp. Beginning July 1, 2001, Georgia will have "among the lowest regional Bell operating company rates in the nation," the PSC stated.

STATE & LOCAL GOVERNMENT CALIFORNIA Group appeals to Davis; says taxpayers shouldn't foot Duque's legal bill

The Foundation for Taxpayer and Consumer Rights has asked Gov. Gray Davis (D.) to intervene and reverse a Public Utilities Commission decision that taxpayers should pay Public Utilities Commissioner Henry Duque's (R.) legal fees defending against conflict-of-interest charges. The foundation filed a lawsuit in late December in San Francisco County Superior Court seeking to remove Duque from office.

The complaint alleges that Duque owned stock in a company regulated by the PUC, Nextel Communications, Inc., in violation of a state law prohibiting commissioners from holding stock in the companies they regulate. (1/2/01 p.m.)

The foundation said a Public Records Act request revealed that PUC President Loretta Lynch (D.) decided that taxpayer money should be used for Duque's legal defense. (12/11/00 a.m.) The foundation says there's no legal requirement that the commission pay Duque's legal fees. "The PUC should not be committing public resources to defend Mr. Duque for illegal acts clearly outside the scope of his public duties," it said.

The foundation also pointed to a Nov. 29 opinion issued by state Attorney General Bill Lockyer (D.) that cleared the way for the foundation's lawsuit. In that opinion, Lockyer concluded, "It would, therefore, appear that the defendant's office became vacant immediately upon his acquisition of the 700 shares of Nextel on May 12, 1999. The fact that the defendant subsequently disposed of the prohibited interest is immaterial and did not operate to restore him to the vacated office."

Under California law, the AG must approve all quo warranto lawsuits filed by private individuals in the name of the state of California. Quo warranto lawsuits are civil actions filed in an attempt to force a public official to forfeit an office for

misconduct. (12/6/00 a.m.)

FUTURE OF REGULATION MISSOURI Bill would require election of PSC commissioners

Sen. Doyle Childers (R., District 29) has introduced a resolution that would provide for the election of nine members to the Public Service Commission, one from each U.S. congressional district. Currently, the governor appoints the PSC's four members.

SJR 6 has been referred to the Senate Financial and Governmental Organization, Veterans' Affairs, and Elections Committee.

CUSTOMER-AFFECTING MISSISSIPPI Bill seeks to prevent 'slamming'

Rep. Stephen Holland (D., District 16) has introduced a bill that would prohibit telecom companies from changing a consumer's service provider without authorization. HB 785 would require a company to receive written authorization from the consumer, toll-free electronic authorization from the telephone number in question, or oral authorization from an independent third party before changing a subscriber's service. The service provider also would have to send the subscriber written verification of the change within 30 days.

A customer who paid service charges after an unauthorized change of service had occurred would be able to inform his or her authorized carrier of the situation. The authorized company then could ask the allegedly unauthorized company for evidence confirming the consumer's request to switch providers.

The allegedly unauthorized service provider would have to respond within 10 days either by sending a confirmation of the subscriber's request to change companies or compensating the subscriber in an amount equal to what the subscriber paid to the unauthorized company.

HB 785 would allow the Public Service Commission to ask the attorney general to review potential slamming violations. The AG could order a civil penalty of up to \$2,000 for each violation. The PSC would have to promulgate rules to enact the legislation.

HB 785 has been referred to the House Public Utilities Committee.

CUSTOMER-AFFECTING MONTANA Bill requiring carriers to aid telemarketing probes moves to House floor

The House Business and Labor Committee has passed a bill that would require local exchange carriers (LECs) and interexchange carriers (IXCs) to cooperate with Department of Commerce investigations of alleged violations of the state's Telemarketing Registration and Fraud Prevention Act. The bill (HB 84) has passed its second reading in the House by a 58-41 vote. It now advances to the House floor to be considered for passage to the Senate.

HB 84, which was sponsored by Rep. Trudi Schmidt (D., District 42), originally would have applied only to LECs, but the Business and Labor Committee amended the bill to apply to IXCs as well. (12/4/00 p.m.)

The telemarketing act prohibits sellers or telemarketers from engaging in acts such as (1) requesting a fee to remove derogatory information from or to improve a person's credit history; (2) using threatening, intimidating, or profane language; or (3) behaving in a manner that a reasonable person would consider annoying, abusive, or harassing.

SECTION 251/252 OKLAHOMA SW Bell expands UNE discount list

Southwestern Bell Telephone Co. has expanded the discount unbundled network element (UNE) items available for lease to competitors in Oklahoma on a nondiscriminatory basis. The company expanded its list during negotiations with the state Corporation Commission regarding its alternative regulation rules. At that time, SW Bell agreed to discounts on a list of unbundled network elements that are needed most by competitors.

The expanded list of discounts is included in an interconnection agreement SW Bell negotiated with Logix Communications Enterprises, Inc. The agreement calls for discounts of up to 25% on the nonrecurring charges on UNEs designed to bring the rates charged in Oklahoma in li

New views emerging on power: More elected officials support the concept of= =20 planned blackouts. By John Hill Bee Capitol Bureau (Published May 23, 2001)=20 If Californians are to be left in the dark, they should at least know when = to=20 break out the candles or send the workers home.=20 That's the growing sentiment among a range of elected officials, including= =20 Gov. Gray Davis, who are pushing the idea of planning power blackouts and= =20 giving businesses and residents ample warning.=20 On Tuesday, the Democratic governor's office said Davis supports longer=20 public notice than the 24 hours called for under a proposal by the Californ= ia=20 Independent System Operator, which runs the state's power grid.=20 Assemblyman Mike Briggs, R-Fresno, introduced a bill that would lay out a= =20 blackout schedule for the summer. Businesses could make plans for the=20 possible blackout days and also be assured that on all other days the light= s=20 would stay on.=20 Briggs called his plan an improvement on the existing system in which "ever= y=20 day is a potential blackout day."=20 A Senate committee, meanwhile, discussed planned blackouts as part of a=20 strategy to gain leverage over electricity generators by declaring that the= =20 state will not pay above a certain amount for power. The state would ask=20 Washington and Oregon to join the so-called "buyers'

cartel."=20 If the power generators refused to sell at the lower prices, the state would= d=20 gut it out with planned blackouts.=20 "Let's use the blackouts against the generators," Michael Shames, head of t= he=20 San Diego-based Utility Consumers' Action Network, told the Energy, Utiliti= es=20 and Communications Committee. But Shames and others stressed the need for= =20 warnings of at least 12 hours and blackouts no longer than 90 minutes.=20 "Absent that management of blackouts, we don't see how the buyers' cartel= =20 could work," Shames said.=20 On a visit to Chicago on Monday, Davis said he talked to officials about th= e=20 city's system for giving the public warning days before possible power=20 blackouts, with definite notice right before.=20 "There is no reason to keep that secret from the public when their safety i= s=20 likely to be jeopardized," Davis told reporters Tuesday. The governor said = he=20 plans to meet in the next few days with managers at ISO to explore the idea= =20 of a system like Chicago's.=20 The grid operator announced Monday that it will try to give the public at= =20 least a half-hour notice of outages, but many officials said Tuesday the=20 public needs even more warning. Davis aides said the governor's plan will g= o=20 beyond ISO's.=20 There are potential pitfalls. Criminals might make their own plans, taking= =20 advantage of deactivated alarms. And some say that a schedule of blackouts= =20 might increase the number of outages.=20 If people have been warned that a blackout is coming, and a last-minute=20 supply of electricity makes it unnecessary, grid managers would have to=20 decide whether to call it off, said Dorothy Rothrock, vice president of the= =20 California Manufacturers & Technology Association.=20 If they did, it would add uncertainty to future warnings, she said, possibl= y=20 leading them to order unnecessary blackouts.=20 "Obviously, there are trade-offs," Rothrock said.=20 Still, the idea of planning blackouts seems to be gaining ground as a way f= or=20 the state to get back some control of the energy crisis, sorely lacking in= =20 recent months.=20 "It would help us as Californians to say, 'The hell with you, George Bush,= =20 we're going to handle this ourselves,' " said Jim Overman, 68, of Elk Grove= .=20 Overman said he has been burning up the phone lines trying to persuade anyo= ne=20 who will listen that scheduled blackouts will make everyone's lives easier.= =20 Briggs said he has been told by constituents, including irrigators and food= =20 processors, that scheduled blackouts are the way to go.=20 Irrigators would know that they shouldn't plan on getting water on a day th= at=20 their electronic gates might be closed.=20 Businesses could tell workers to stay home on a blackout day, or arrange fo= r=20 backup power generators, he said.=20 "We would be very interested in it," said Ed Yates, senior vice president o= f=20 the California League of Food Processors.=20 Power blackouts are chaotic for processing plants, Yates said, requiring so= me=20 plants to be re-sterilized and shutting down operations for more than a day= .=20 Some processors might choose to close on days when they faced a blackout, h= e=20 said, losing revenue but avoiding the loss of thousands of pounds of food.= =20 "It doesn't solve the problem, but it helps manage a very difficult=20 situation," he said.=20 Briggs said that his plan would result in possible blackout days every two= =20 weeks. The plan would assume that a certain number of customers would have = to=20 turned off to keep the grid operating. If the electricity shortage went abo= ve=20 that amount, people might still face unanticipated blackouts, Briggs said.= =20 One question is public safety. Some are queasy about burglars knowing when= =20 blackouts will occur. But pluses include the ability to arrange for tempora= ry=20 stop signs at road intersections, or families being able to arrange for a= =20 sick relative to be moved.=20 "If the police have only five minutes notice, they can't get to difficult= =20 intersections to direct traffic, they can't help paramedics, fire departmen= ts=20 and ambulances get where they have to be," Davis said.=20 The manufacturers' association and other business groups haven't endorsed t= he=20 idea yet, but say it's worth a look.=20 "It's preferable to random, rolling blackouts," Rothrock said.=20

Subject: FERC in the News: USA: UPDATE 1-FERC adopts plan to monitor Calif. power market.

USA: UPDATE 1-FERC adopts plan to monitor Calif. power market. By Patrick Connole and Tom Doggett

04/26/2001 Reuters English News Service (C) Reuters Limited 2001.

WASHINGTON, April 25 (Reuters) - A split U.S. Federal Energy Regulatory Commission approved on Wednesday a plan to stabilize California's volatile power market and stem market abuses.

Under the plan, set to take effect in late May and last for one year, price relief measures will be imposed on California's wholesale power sales during severe energy shortages. The three-member commission split sharply on the plan, voting 2-1 for an order that the majority believe will prevent power costs from soaring out of control in California this summer.

Wholesale power prices have jumped tenfold in California in the past year, the result of growing demand from the state's 34 million residents following a decade that saw no major power plants added to its electric system.

FERC Chairman Curtis Hebert, a Republican, and Democrat Linda Breathitt supported the order. Democrat William Massey dissented despite 10 hours of talks aimed at reaching a consensus.

"California consumers can rest assured that the commission has been attentive to their problems, and has worked tirelessly to ensure that they receive necessary relief in a manner that does not compound current problems or undermine longer-term solutions," Hebert said.

DISSENTING VOTE

Massey said that by limiting price relief to declared power emergencies, FERC's actions would fall short of solving the severe problems plaguing the California market.

"The evidence is pervasive that the problem exists 24 hours a day, seven days a week. Now is not the time for half-a-loaf solutions," Massey said.

Under the plan, price mitigation would be triggered whenever the California Independent System Operator (ISO) declares a power emergency.

The ISO, which manages most of the state's power grid, uses a three-stage alert system, with a Stage One called when power reserves drop to within seven percent of actual demand on the grid.

As demand eats further into the supply cushion, Stage Two and Stage Three alerts are declared, with Stage Three indicating rolling blackouts may be required to avoid overloading the grid and triggering far more widespread outages.

California has ordered rolling blackouts four days so far this year, with state energy officials predicting more are likely this summer when air conditioning pushes demand to its annual peak.

FINDING A FAIR PRICE

The mitigation and monitoring plan's central element will require generators to offer available power in real time using a "proxy" price established a day ahead of actual delivery, FERC said.

The proxy price reflects the "marginal cost of the highest-cost generator" asked to supply power to the grid.

This price will vary daily according to demand, the price of fuel used by generators - such as natural gas - and the cost of complying with environmental standards.

However, generators could charge more than the proxy price if they can justify the higher cost when FERC reviews their sales records, which they are required to submit at the end of each month. If those costs cannot be justified, FERC can

order the generator to refund the buyer.

FERC said all generators in California, even those not subject to the commission's price regulations, are required to sell into the ISO's real time price market as a condition of their use of the ISO's interstate transmission lines.

Hydro-electric facilities were exempted from the plan because of their generation limitations, which fluctuate according to reservoir levels and the competing needs of others for those same water resources.

REGIONAL SOLUTION

The commission emphasized that the only real solution to the power supply problems affecting the western markets was to forge a regional response.

Toward this goal, FERC said California ISO would need to file a plan to form a regional transmission organization (RTO) by June 1, or forfeit the so-called crutch of FERC's price-relief plan.

Among the many measures contained in the order, FERC told California utilities to coordinate any temporary shutdowns of generating plants with the ISO to ensure the state has adequate electric supplies at all times.

The order also formally opened an investigation by commission staff into possible abusive wholesale practices behind power sales throughout the Western region.

FERC said the plan would expire in 2002 as the California power crisis eases. The state's rush to build new power plants is expected to put an additional 4,000 to 6,000 megawatts on the grid by next summer, enough to supply up to six million homes.

Bush Comments About Taiwan Causes Stir

TAIPEI, Taiwan (AP) - President Bush's bold comments about Taiwan provoked quick reactions of concern Thursday in Asia, where a war between China and Taiwan could devastate the region. Bush told The Associated Press on Wednesday that U.S. military force is "certainly an option" if China strikes Taiwan. He later said that America has an obligation to defend Taiwan if China attacks. China had no immediate comment about Bush's comments, and Taiwan's Foreign Ministry was also silent. Grafts Can Restore Sexual Function

DANA POINT, Calif. (AP) - Salvaging a nerve from the ankle, surgeons have found they can rewire the penis so men achieve erections and have sex after operations to remove their cancerous prostate glands. Doctors say the nerve grafts are not as good as the original nerves, but they do allow some men to regain sexual function when they otherwise would be undoubtedly left impotent. "It seems to have promise, certainly over doing nothing," said Dr. Joseph J. Disa, a plastic surgeon who performs the surgery at Memorial Sloan-Kettering Cancer Center in New York City.

Africa Ministers OK AIDS Drugs Plan

ABUJA, Nigeria (AP) - African ministers agreed on a draft declaration Wednesday calling on their countries to import and produce their own generic AIDS drugs and to boost spending dramatically on AIDS programs to fight the pandemic. POWER Conference Sponsorship by Enron

Sender	borenste@haas.berkeley.edu
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/all_documents/3999.

Dear Jeff:

I am writing to ask Enron to become a sponsor of the annual POWER research conference on electricity restructuring, which will take place this year on March 16, 2001 in Berkeley. This will be POWER's sixth annual electricity research conference. Last year's conference was quite successful, with attendance of nearly 150 and a number of papers that were discussed widely and were influential in electricity policy. Information on past programs and the plans for this year at our website: http://www.ucei.org/power_conf.html . We already have received submissions from top researchers for this year's conference. We anticipate another very strong program of active electricity restructuring researchers and practitioners.

As in the past, we plan to include about 8 papers on the program. The presentations will be organized by topic and the papers will be discussed by both researchers and practitioner. Past programs have been very successful in stimulating discussion that included both researchers and practitioners.

The cost to Enron to become a sponsor would be \$10,000. As a sponsor, Enron would be listed on the front of the conference program and in the pre-conference mailing. In addition, Enron could send up to 5 people to the conference at no additional cost.

The annual POWER conferences on electricity restructuring have been very well received by industry, policy, and academic participants. With the broad and growing interest in deregulation of electricity markets, we have every reason to anticipate that this year's conference will be just as successful. We hope that Enron will decide to become a sponsor of the conference.

I can be contacted by phone at 510-642-5145, by fax at 510-643-5180, or by e-mail at borenste@haas.berkeley.edu. I look forward to talking with you soon about this.

Sincerely,

Severin

Attached is a ruling by ALJ DeUlloa issued yesterday pertaining to the calculation of the California Procurement Adjustment. A draft decision was suppose to be release on such on Friday, March 16th. It was not, and now we know why. On March 14th, the Department of Water Resources wrote to the Commission to give the commission its views on how the CPA should be calculated. In his ruling of yesterday DeUlloa stated that he would wait to issue the PD so as to take into account DWR's submission. He also provided parties until tomorrow to file comments on the DWR letter (which is attached to the ruling).

Not surprising, DWR has a different view of the world than the UDCs do when it comes to calculating the CPA. The UDCs view the CPA as residual amount left over from the generation component of their bundled rate on 1/5/01 after the cost of their retained generation (including QFs and bilateral contracts) are subtracted out. DWR views the CPA as a rate (i.e., a cent per kWh) which would be paid to DWR by the UDCs every month. It is DWR's view that a Total Generation Related Rate must be calculated which is a blended average of the cost of the UDC retained generation and the cost of the "net short" power. From this total rate (e.g., 5 cent) the cost of the UDC retained generation (e.g., 2 cent) would be subtracted and the remainder (i.e., 3 cent per kwh) would be the CPA. This CPA would be subject to further allocation by the Commission to determine the Fixed Department of Water Resources Set-Aside. DWR is not asking that such allocation be done now.

DWR's view of the world would place it in a sounder financial position, making it a more viable purchaser of electricity for California, but would place the UDCs in more dire straights.

Please let me know by tomorrow at noon if you want to comment on the DWR proposal.

Jeanne Bennett

As you may have heard, Governor Davis intends to hold a press conference Thursday evening at 6:05 PST to deliver "an important live address on energy ... will speak in detail about California's energy emergency and make an important announcement." ?He has requested five minutes during evening newscasts to make his remarks.

While there is no way to know specifics, we've heard rumor that his remarks will include the following:

1. Discussion of rate increases 2. State's conservation efforts 3. Blame FERC for crisis 4. Point out what a great job he is doing

IEP is prepared to react immediately to the Governor's remarks if needed. ?

Below are two Dow Jones stories on the press conference, and a memo that was released by Davis' top financial adviser, Joe Fichera.

We'll keep you posted -- but please alert me or Katie if you hear anything.

Thanks, Jean

Calif Gov To Make 'Important' Energy Announcement Thurs ???? Updated: Wednesday, April 4, 2001 08:17 AM?ET ????
? (This article was originally published Wednesday)

By Jason Leopold

OF DOW JONES NEWSWIRES

LOS ANGELES (Dow Jones)--In a highly unusual move, California Gov. Gray Davis Tuesday requested radio and television stations in the state to clear five minutes of time Thursday evening so he can make an important announcement regarding the state's energy crisis.

Davis is expected to deliver a speech at 6:05 p.m. PST and will likely talk about the state's conservation efforts, a 4,000 megawatt shortfall expected next month, the need to bring new generation online, recent rate hikes ordered by the California Public Utilities Commission, and the possibility for further rate increases this summer to keep the state's three investor-owned utilities solvent, sources close to Davis told Dow Jones Newswires.

The source said Davis is not expected to discuss a final agreement to buy the power lines owned by PG&E Corp. (PCG, news, msgs), unit Pacific Gas & Electric, Edison International's (EIX, news, msgs) unit, Southern California Edison, and Sempra Energy's (SRE, news, msgs) unit, San Diego Gas & Electric.

Davis' press secretary, Steve Maviglio, would not comment on Davis' speech.

In a memo to the media, Davis' office said the governor will "deliver an important live address on energy from his office in Sacramento. During this historic address to the people of California, the governor will speak in detail about California's energy emergency and make an important announcement."

The last time a California governor interrupted a broadcast schedules was in 1992, when Republican Gov. Pete Wilson delivered a speech about the state's budget problems, a spokesman in Davis' office said.

But Davis' staff said "this is the first time in recent memory that a Governor has asked for time statewide to deliver a live address to the people of California."

Calif Gov Staff To Speak To Analysts About Energy Crisis ?? ?? Updated: Wednesday, April 4, 2001 05:37 PM?ET ??? ?
LOS ANGELES (Dow Jones)--California Gov. Gray Davis' advisers will speak to Wall Street analysts Thursday following a live state address on the state's energy crisis, according to an email sent to the financial community and obtained by Dow Jones Newswires.

Daivs' staff, in a highly unusual move, asked radio and television broadcasters to clear five minutes of air time Thursday night so Davis can make an "important announcement" about the state's months-long energy crisis.

Sources close to the governor said Davis will discuss the state's conser

NEWS IN BRIEF <http://www.tr.com/online/trd/2001/td011201/Td011201-08.htm>

COMMISSIONERS SPLIT ON CONDITIONS IMPOSED ON AOL-TIME WARNER MERGER

One of the FCC's last major actions during the tenure of Chairman William E. Kennard marks the agency's first effort to oversee Internet "instant messaging" services. The move last night came as the FCC announced its long-awaited decision to clear the merger of America Online, Inc., and Time Warner, Inc.

All five Commissioners voted to approve the merger-related application, but the majority's vote to attach conditions as competitive safeguards prompted sharp criticism from the person widely expected to succeed Mr. Kennard.

Commissioner Michael K. Powell warned that the FCC was taking a "substantial leap" by declaring broad jurisdiction over the Internet. And Commissioner Harold Furchtgott-Roth reiterated his strong view that the FCC lacks authority to extract conditions through its public interest reviews of merger-related license transfers.

The FCC's merger conditions mandate that the combined company-- known as AOL Time Warner, Inc.--allow all customers to choose Internet service from any unaffiliated ISP that has a contract with the merged company to use its cable TV facilities. Customers must be able to have their chosen ISPs provide their "first screen" when they go online, without going through an AOL Time Warner-affiliated ISP as an intermediary.

The merged company must allow unaffiliated ISPs to have direct billing relationships with its subscribers. And it may not discriminate in favor of its affiliated ISP in terms of caching services, customer technical support, multicasting capabilities, address management, or other technical functions.

The FCC also indicated its concern that, without conditions, AOL Time Warner would be able to leverage its dominance in text-based instant messaging (IM) into the nontext-based IM market. As a condition of the merger approval, therefore, the FCC prohibited AOL Time Warner from offering any new advanced, IM-based high-speed service (AIHS), feature, or enhancement that includes one- or two- way streaming video communications using a "names and presence directory" (NPD).

The prohibition could be lifted, however, if AOL Time Warner demonstrated that it had complied with certain safeguards.

Commissioner Powell said the majority had "given in too much to their collective imaginations" in imposing the IM conditions. In a separate statement, he said he was unwilling to join them in making the "substantial leap" to find that the FCC "has jurisdiction to regulate virtually every Internet product."

Neither the record nor anticompetitive theory supports mandating IM interoperability, Mr. Powell said. "No competent antitrust authority, to my mind, would conclude intervention was necessary, nor do I believe such an analysis would withstand judicial review," he said.

During a press briefing this morning, Mr. Kennard insisted that the IM conditions were "very narrowly tailored and minimally intrusive." Although he wouldn't speak directly to Mr. Powell's criticism, the chairman said, "At the end of the day, I felt--and my two other colleagues felt--that in order to protect consumers we had to impose some conditions." For more details, see Monday's TR.

***** KENNARD SUBMITS RESIGNATION, PLANS TO LEAVE FCC POST FOR THINK TANK

FCC Chairman William E. Kennard has submitted his resignation to the White House, effective Jan. 19, and will take a temporary senior fellow position at the Aspen Institute, a think tank in Washington.

Ending a three-year term as the nation's top telecommunications regulator, Mr. Kennard made his resignation public during a press conference this morning to discuss the FCC's approval of the merger America Online, Inc.-Time Warner, Inc. merger (see story above). At the Aspen Institute, Mr. Kennard will be advisory board chairman of the Communications and Society Program.

Although his term on the Commission does not expire until the end of June, Mr. Kennard said, "Our work is complete, and it's time for me to go."

Most industry observers predict that President-elect George W. Bush will appoint FCC Commissioner Michael K. Powell chairman. In one scenario some see as likely, President Bush could nominate Texas Public Utility Commission Chairman Patrick H. Wood III to be an FCC commissioner to succeed Mr. Kennard. After Mr. Wood had been confirmed and dealt with federal communications industry issues for a while, he could be named chairman of the agency, leaving Mr. Powell free to accept another appointment, possibly in the Justice Department, these sources say.

Mr. Kennard has been FCC chairman since 1997; he was the Commission's general counsel from 1993-1997. Previously, he was a partner at the law firm of Verner, Lipfert, Bernhard, McPherson & Hand and counsel to the agency's reigns as interim chairman.

***** FCC TRANSITION TEAM LEANS HEAVILY ON COMMON CARRIER REPRESENTATIVES

President-elect George W. Bush has begun rounding out the "transition advisory team" that will work with the incoming administration on critical FCC issues, including the selection of a new chairman. Earlier this week a handful of telecom policy advocates were added to the FCC team, which in its current form is top-heavy with common carrier service interests, observers note.

Overall, the FCC group had 31 members as of late today, inc

05/03/2001 South Florida Sun-Sentinel Broward Metro 3B (Copyright 2001 by the Sun-Sentinel)

Pompano Beach A town meeting will be held tonight on Enron Corp.'s power plant proposal for Pompano Beach. Called by Commissioner Kay McGinn, the meeting will be open to anyone who wants to speak. The City Commission is to vote Tuesday on whether to approve a zoning variance for the project. The meeting will be held at 7 p.m. at the Pompano Beach Civic Center, 1801 NE 6th St.

Would buying boycott help lower California's electricity bill? By MICHAEL LIEDTKE AP Business Writer

05/03/2001 Associated Press Newswires Copyright 2001. The Associated Press. All Rights Reserved. SAN FRANCISCO (AP) - There's a limit to how much people will pay for most things in life. If the cost scares off enough buyers, prices eventually fall. So what would happen if this textbook example from Economics 101 were applied to California's electricity crisis? What if the state officials struggling to maintain energy supplies simply refused to buy power above a certain price and accepted more blackouts this summer? The question would have been absurd just a few months ago and even now the notion seems surreal, given the possible consequences. Inviting even more blackouts inevitably would hurt businesses and frustrate consumers, threatening to further depress California's already slumping economy - the sixth largest in the world. But desperate times require drastic measures, according to the economists, lawmakers and activists who believe the state will be better off sitting in the dark than buying electricity at any price during a summer shortage likely to produce recurring blackouts anyway. "It's better to use (blackouts) and break the (wholesale energy) cartel than simply to suffer

them," said Michael Shames, executive director of the Utility Consumer Action Network, a San Diego watchdog group. Refusing to buy enough power to keep the lights on "would be like playing with fire," counters Wells Fargo & Co. chief economist Sung Won Sohn. "Blackouts aren't a just matter of inconvenience or being too hot or cold. They cost businesses a lot of money." Buying electricity at the last minute to meet the state's power needs already has cost the California government \$5.7 billion in the past 3 1/2 months. The state energy bill for 2001 could reach \$50 billion, in money otherwise spent on education, public safety and health care, Shames said. Faced with the prospect of a significant budget deficit, some lawmakers think it's time for California to take a stand against the power wholesalers - many of whom are based outside the state. This Tuesday, the state Senate Energy Committee will consider authorizing the state to refuse to buy power above certain prices. Current law requires state electricity managers to avoid blackouts by buying all available power at any cost. "We have been over a barrel in so many ways," said Sen. Dede Alpert, D-Coronado, who sponsored SB73x. "Maybe there's a point in the market where (we) just say no and go with the planned blackout strategy instead." Economists give the bill little chance of succeeding. "It's never going to happen. It's not a viable option," said University of California at Berkeley Professor Severin Borenstein, one of the energy experts who have studied the idea. The business lost during blackouts would mean more layoffs in a state already skittish over the technology downturn and the looming Hollywood writers strike, economists say. Other ripple effects include diminished gasoline supplies, leading to even higher prices at the pump, and distribution headaches that could leave store shelves bare. And some consumers - the elderly and the infirm, for example, need power at any price. Without electricity, Manteca resident Betty Jarzemkoski said she wouldn't be able to help her ailing husband to get out of his motorized bed at home. "It would be a real hardship for us," said Jarzemkoski, 78. "I'm on a fixed income so I hope they can figure out something to bring down prices. But we need power." Despite such concerns, the concept of a buyer's boycott hasn't been flatly ruled out - at least publicly - by Gov. Gray Davis as he struggles to reduce the state's staggering electricity bill. The state is spending as much as \$90 million per day to meet California's electricity needs and the bleeding is sure to get worse. When the summer heat increases demand and tightens supplies, California might spend more than \$1 billion each week, state officials estimate. Extended blackouts pose an even greater cost, economists say. When Northern California suffered rolling blackouts for several hours Jan. 18-19, the economic losses totaled \$2.3 billion, mostly from lost profits and wages, estimated the Los Angeles Economic Development Corp. Multiply that over several weeks across the entire state, and it becomes apparent why it makes more sense for California to continue buying power at inflated prices, even if leaves the state with deep debts and a ruined credit rating, economists argue. As it is, California probably won't be able to round up enough power at any price on some days this summer, making some blackouts a virtual certainty. The blackouts will reduce the state's economic output by \$2 billion to \$16 billion, according to a study released last month by the Bay Area Economic Forum. The resolve of the state's politicians and ratepayers would be sorely tested for a boycott to succeed, much in the way that labor strikes boil down to whether workers or management can withstand more financial pain. "Politicians aren't going to willingly turn out the lights because politicians want to get re-elected," said Borenstein, director of the University of California's energy institute. "As soon as people start losing their jobs because the power is off, the public will get tired of the blackouts real quick." Still, Californians might tolerate an increase in blackouts if they understand why the state chose to pursue such a drastic course, said Stanford economics Professor Frank Wolak, who heads the Independent System Operator's market surveillance committee. "This isn't something you could do without an enormous public rel

Post, Fri, 7/13: Judge Rejects Power Refunds For California=20 WSJ, Fri, 7/13: Mediator Questions California's Claims To Power Refunds

Lawmakers vow a vote on Edison=20 By Kevin Yamamura and Emily Bazar Bee Capitol Bureau (Published July 13, 2001)=20 Facing a looming deadline and pressure from the governor, legislative leaders=20 said Thursday they will push for a vote next week on a revised plan to save=20 Southern California Edison from bankruptcy court.=20 Under competing proposals from each house of the state Legislature, large=20 businesses would pay for the majority of Edison's \$3.5 billion debt and power=20 generators would be pressed to accept less than they are owed for past energy=20 purchases.=20 A vote next week would come three months after Gov. Gray Davis first struck=20 an agreement with Edison. His original arrangement would have the state=20 purchase the company's transmission lines for \$2.76 billion and use a portion=20 of consumer rates to help pay off Edison's debt.=20 But lawmakers roundly criticized the Democratic governor's agreement in=20 subsequent weeks and floated alternatives soon afterward. Lawmakers=20 acknowledged that the latest alternatives are still under negotiation.=20 The governor's agreement with Edison has an Aug. 15 deadline, which falls=20 toward the end of the Legislature's summer recess. Because the monthlong=20 break is scheduled to begin next Friday, lawmakers plan to vote before then=20 .=20 The Assembly could vote on a proposal as early as Saturday.=20 Davis on Tuesday threatened to call a special session to keep legislators in=20 Sacramento if they do not approve the Edison plan before the break. But=20 Senate President Pro Tem John Burton, D-San Francisco, challenged that=20 threat, saying, "Only the Legislature can keep the Legislature here."=20 Senate Democrats are studying a plan by Sen. Byron Sher, D-Palo Alto, that=20 would have large businesses pay off most of Edison's debt and force=20 generators to reduce by 30 percent the amount they are owed by the utility.=20 That would leave about \$1.2 billion in debt, for which Edison itself would be=20 responsible without relying on ratepayers, Sher said.=20 His plan also gives the state the option to purchase Edison's transmission=20 lines for book value -- less than half the price Davis offered to pay.=20 Burton said his house will vote on a version of Sher's proposal next week.=20 Burton said he prefers Sher's version because large businesses and industrial=20 users, not consumers or small businesses, would be responsible for paying=20 the majority of Edison's debt. He reiterated that businesses were among the most=20 ardent advocates for electricity deregulation.=20 "We're trying to do something legislatively that protects the people and=20 isn't a bailout for the utility," Burton said. "I don't think it's fair that=20 small users pay for any of (the debt)."

=20 While the Senate toils over Sher's proposals, members of the Assembly are=20 drafting their own version of a plan. Their version, too, would separate=20 users into large and small categories, according to Paul Hefner, a spokesman=20 for Assembly Speaker Robert Hertzberg, D-Sherman Oaks.=20 Under the plan, electricity for small users -- some residential and=20 small-business customers -- would come from the cheapest sources -- Edison's=20 own power plants and renewable energy sources known as "qualifying=20 facilities." Larger users would pay more because they would obtain power from=20 the long-term contracts that have been signed by the state Department of=20 Water Resources.=20 Ultimately, as the amount of electricity supplied by the long-term contracts=20 declines over the course of several years and the overall supply increases,=20 costs to large businesses are expected to decline as they buy more power on=20 the open market, presumably at lower prices.=20 The plan envisions a portion of business and residential rates dedicated to=20 reducing Edison's debt for at least the first year, with businesses picking=20 up more of the burden in future years. Like the Senate plan, the state would=20 have an option to buy transmission lines.=20

Bingaman, Senate Energy Chief, Will Block Bush Plan (Update1)

(Adds company names in fourth paragraph and details about contributions in paragraph 23.)

Washington, June 5 (Bloomberg) -- President George W. Bush delivered his energy plan to Senator Frank Murkowski last month, expecting the Alaska Republican to push it more or less intact through the Senate and on to passage by the House. Now the package intended to boost oil and gas production and ease some pollution controls is in the hands of Jeff Bingaman. The New Mexico Democrat disagrees with Bush's approach and wants to start fresh negotiations on what U.S. policy should be. Bingaman, 57, who's spent most of his 19 years in the Senate out of the spotlight, will become chairman of the Energy and Natural Resources Committee when Democrats take control of the Senate later this week. Bush wants to make it easier for companies like Enron Corp., Exxon Mobil Corp. and BP Plc, to build power plants and pipelines by easing regulations, and he's opposed to regulating the carbon dioxide emissions blamed for global warming. Bingaman has introduced legislation to cut emissions to curb global warming. The president's proposal to drill in the Arctic National Wildlife Refuge, in trouble even with Republicans in charge, is dead as long as Democrats have control. Bingaman has no plans to consider it. Bush opposes caps on energy prices; Bingaman is cosponsor of legislation to impose caps on wholesale energy prices in California although, according to a spokesman, he'd prefer the Federal Energy Regulatory

Commission do that on its own.

Seeking Consensus

Bingaman says rather than offer his own plan now, he'll try to sit down with Republicans and negotiate something both sides can agree on. There is already agreement on some proposals, such offering tax credits to encourage domestic drilling and the use by business of renewable energy technology, such as wind-powered turbines. "Obviously, I'm going to work for consensus," he said. "There's nothing about much of these issues that should be partisan." Bingaman says he hasn't decided whether to push a single, comprehensive energy bill or move issues separately. Democrats may insist on separate bills for political purposes, said Tim Evans, a senior energy analyst at IFR Pegasus. "They'll say, 'Let's get all of the most vulnerable Republicans on record supporting drilling and see if they get re-elected,'" he said. Whatever his decision, Bingaman won't meet Murkowski's goal to have a bill for Bush to sign on July 4. "I'm not anxious to have some artificial deadline so that we can have a bill-signing ceremony on a holiday," Bingaman said. "I don't think that's the way to legislate."

Visionary or Do-Nothing?

Throughout his career, Bingaman has made a practice of taking time to study an issue before acting. "He's something of a visionary," said Bruce Black, a former law partner who became a federal judge in New Mexico after Bingaman recommended his nomination. "He sees trends." Opponents see inaction. "He doesn't accumulate much in the way of negatives by not doing much," said John Dendahl, chairman of the Republican Party of New Mexico. Bingaman is a politician who doesn't stray from party positions, Dendahl said. "He's not a maverick. He's always been when the chips are down a straight Democratic voter." In 2000, Bingaman voted with the party leadership 87 percent of the time on votes in which the two parties took opposing positions, according to data compiled by Congressional Quarterly.

Fundraising Success

In the Senate, Bingaman's strategy has been to home in on issues that have been neglected, such as school accountability and defense research that has civilian uses, work with others, and not hog the credit. "He wouldn't try to beat it to the front of the class," said Ben Alexander, a Bingaman fundraiser. That approach appears to have worked: Republicans haven't been able to budge Bingaman from his Senate seat by appealing to New Mexicans' distrust of party-line politicians. With Alexander's help, Bingaman built a campaign fund that's helped him fend off rivals. He raised \$2.7 million for his 2000 re-election bid compared with his Republican challenger's \$669,000. The \$295,527 Bingaman got from oil and gas companies and electric utilities made him the industry's sixth-largest congressional recipient in last year's elections, according to the Center for Responsive Politics. The oil and gas industry gave \$32.6 million overall last year in campaign contributions. The top contributor, Enron, a pipeline and energy-trading firm, gave \$2.4 million. Exxon, the world's largest publicly traded oil company, followed with \$1.4 million and BP, the third largest publicly traded oil company, donated \$1.3 million, according to the Center for Responsive Politics.

Comparison With Murkowski

Environmentalists said Bingaman will balance conservation and production concerns better than Murkowski. "Murkowski wants to jam through an agenda" to boost production, said Alyssondra Campaigne, legislative director of the National Resources Defense Council. Bingaman "tends to be more studious and thorough." As chairman, Murkowski has pushed a comprehensive bill that includes tax incentives to promote the use of alternative energy and opening 1.5 million acres of the 19-million acres of the Alaska refuge to oil and gas exploration. Bingaman has proposed leasing land in the Gulf of Mexico for oil production, and that concerns environmentalists. "It would put too much at risk in coastal resources," the NRDC's Campaigne said.

USA: TECO breaks ground on 599-MW Arkansas power plant.

06/05/2001 Reuters English News Service (C) Reuters Limited 2001.

NEW YORK, June 5 (Reuters) - TECO Energy subsidiary TECO Power Services held a groundbreaking ceremony Tuesday on its 599-megawatt natural gas-fired power plant in Dell, Ark. Actual construction on the Dell Power Station began in March, the company said in a statement. One megawatt provides enough electricity for about 1,000 average homes, therefore the Dell plant will provide enough electricity for about 600,000 homes. National Energy Production Corp. (NEPCO), a subsidiary of Houston-based energy giant Enron Corp. , is building the plant. The Dell plant, along with a

sister plant, the McAdams station in Kosciusko, Miss., are designed to interconnect with the Entergy transmission system. Both will sell electricity to wholesale customers in the Southeast and Midwest, TECO said. Dell is expected to begin commercial operation in the second half of 2002. Tampa, Fla.-based TECO Energy units include Tampa Electric, Peoples Gas System, TECO Transport, TECO Coal, TECO Coalbed Methane, TECO Propane Ventures

By Christina Cheddar Of DOW JONES NEWSWIRES

NEW YORK (Dow Jones)--With the number of corporate bankruptcies on the rise, knowing the creditworthiness of one's customers is becoming more and more important. For Enron Corp. (ENE), the world's largest energy trading company, keeping track of credit risk has always been part of doing business. That became even more true with the company's launch of EnronOnline, its Internet-based commodities trading network. In order to deal with the accelerated volume and speed of transactions on EnronOnline, the company developed a tool to help its own commercial traders manage the credit risk. Early last year, Enron rolled out this tool, Enron Credit, on a limited basis. Gradually, the company expanded its use and scope. Last month, the company re-launched Enron Credit in its current format. Enron Credit tracks more than 10,000 companies, giving each a rating known as the "Enron cost of credit." The rating is expressed as an interest rate. The Web site also provides news, a company's expected chance of bankruptcy and other related information. While much of this information is free to registered users, Enron also has turned the product into a new revenue stream. Users may download data into a spreadsheet and receive periodic updates for a fee. The site also can sell a user a "digital bankruptcy swap," which is a way to hedge against credit exposure. The price of the swap is determined by a rating Enron's staff assigns to a company and the amount of credit exposure a company needs to protect against. For a supplier, the main advantage of a swap is that if a customer is unable to pay due to bankruptcy, the supplier will be paid immediately. According to Enron Europe President John Sherriff, the goal of Enron Credit is to create a more efficient credit market by increasing trading liquidity. The tool is important because "in just a short amount of time, a company's credit can go from stellar to bad literally overnight." At present, some analysts haven't factored in revenue from Enron Credit into their earnings models. However, as the commodity markets Enron trades in mature, it is possible the need for products such as Enron Credit could increase. -By Christina Cheddar, Dow Jones Newswires; 201-938-5166;

Duke, Enron Get 1st-Qtr Profit Boost From California: Outlook 2001-04-04 17:21 (New York)

Duke, Enron Get 1st-Qtr Profit Boost From California: Outlook

Houston, April 4 (Bloomberg) -- Duke Energy Corp., Enron Corp. and other power sellers continued to reap the benefits of California's electricity shortage in the first quarter, with some bringing in record profits, analysts said. Duke, which owns generation in California that can light more than 3 million homes, had an 18 percent increase in per-share profit, forecasters say. Earnings at Enron, which sells electricity and natural gas in California and helps companies protect themselves from the risks of energy price movements, rose about 13 percent, analysts estimated. Jeffrey Skilling, chief executive of Houston-based Enron, said demand is rising for the Houston-based company's business of helping companies cut energy costs by reducing consumption and finding lower-priced suppliers. "We're seeing the positive effect of the chaos going on out in California," Skilling told investors in March. California officials and consumers have criticized energy suppliers for profiting from their crisis. Power prices in the state averaged nine times higher in the quarter than a year earlier because a shortage of power plants limited supplies, and generators demanded higher payments to offset the risk of selling to the state's near-bankrupt utilities. Most of the big suppliers sell electricity worldwide and insist California is a small part of total sales. Dynegy Inc., which for example, has said California power sales accounted for about 15 percent of last year's profit in marketing and trading.

Higher Prices

Dynegy said on Monday that first-quarter profit rose to 40 cents a share from 26 cents a year earlier because of increased demand and higher energy prices. The Houston-based company was expected to earn 31 cents. San Jose, California-based Calpine Corp. said Thursday it earned almost twice as much as it had forecast to analysts in the quarter, helped by sales in California. Calpine said it made 20 cents to 25 cents a share, about three times as much as it earned a year earlier. Atlanta-based Mirant Corp. said March 14 it would earn 46 cents to 48 cents a share in the quarter, more than twice as much as expected, because of gains in its natural gas and electricity business in the U.S. West. Avista Corp., which also sells energy in the western U.S., said in March it would earn 33 cents to 35 cents a share in the quarter, more than the 30-cent average estimate of analysts polled by First Call/Thomson Financial. Enron said in March it expected to earn \$1.70 to \$1.75 this year, but wouldn't break out first-quarter estimates. First Call estimates are that Enron will make 45 cents a share, up from 40 cents a year earlier.

Seeking Payments

Enron's shares fell 30 percent in the quarter, partly on concern about debts owed by customers in California. Investors questioned whether Enron and others would be paid for power and gas they delivered to the utilities owned by PG&E Corp. and Edison International. The utilities have more than \$14 billion in debt because regulators wouldn't allow them to pass on all of soaring power-buying costs to consumers. Prices jumped as high as \$3,000 a megawatt-hour in December -- about 100 times normal levels -- because of the power shortage, cold weather and high natural-gas prices. California regulators approved a \$4.8 billion annual rate increase on March 27 to help PG&E and Edison pay the bills. The rise isn't expected to cover all the power-buying costs. PG&E and Edison have delayed reporting fourth-quarter earnings because of their financial problems and haven't said when they'll report first-quarter results. Several suppliers agreed during the first quarter to sell electricity to California, which is buying on behalf of nearly bankrupt PG&E and Edison. The contracts' average price is less than half the average price utilities paid last year, but more than double the average price in 1999. In the fourth quarter, power suppliers, including Duke and Reliant, set aside money for bills they might not be able to collect from California customers. Duke offered in March to take less money if given guarantees of payment for the power it sold.

Summer Boost

California could endure blackouts this summer if more generation isn't built quickly. Generators may see even bigger profits th

USA: UPDATE 1-Calif. bankruptcy ripples through utilities shares. Reuters English News Service, 04/06/2001

Pacific Gas and Electric Company Files for Chapter 11 Reorganization Business Wire, 04/06/2001 Transwestern Pipeline Company; Notice of Application Federal Register, 04/06/2001

USA: UPDATE 1-Calif. bankruptcy ripples through utilities shares.

04/06/2001 Reuters English News Service (C) Reuters Limited 2001.

NEW YORK, April 6 (Reuters) - Shares of utilities companies paused, plummeted then pared losses after news on Friday that Pacific Gas & Electric, California's largest investor-owned utility, filed for voluntary bankruptcy, a victim the state's flawed deregulation law. Trade in shares of parent company PG&E Corp. were halted before the filing. When trading resumed, they fell 37.96 percent to \$7.06, off \$4.32, below its modern stock low of \$8.50. Shares in Edison International, California's other financially strapped utility, lost almost 30 percent of its value to trade down \$3.72 at \$8.92. Stocks of wholesale power suppliers with money owed to them at risk as a result of the California power crisis also fell sharply on the news but recovered slightly in later trade. "California is a problem that's going to be with us for quite some time, but these guys are going to benefit from the fact that rates were increased there recently and going forward they will benefit from power prices that are high relative to historical norms and eventually they are going to get paid on some of these receivables as well," said Dain Rauscher Wessels analyst Mark Easterbrook. Easterbrook said Duke Energy Corp., Dynegy Corp., Reliant Energy Inc. and Williams Cos. Inc. each had outstanding amounts of \$100 million or more owing to them as a result of the California power crisis, including a significant but as yet unquantified portions owed by Pacific Gas & Electric. Duke was down 4.74 percent or \$2.01 at 40.39 while Dynegy was off \$2.27 or 4.46 percent to 48.65, up from its low of \$46.35. "The market has taken than \$1 billion - more than threefold - off Dynegy's market capitalization even though its exposure to reserves is \$265 million," said James Yanello, analyst at UBS Warburg. Williams Cos. was down 96 cents or 2.32 percent lower at \$40.89 but off its low of \$39.60. "Enron, Williams and El Paso's exposure is very limited," said Yanello. Enron Corp. shares were down 2.6 percent or \$1.45 at \$54.25, off its low of \$53.20. "It's unfortunate that the state's largest utility was forced to turn to the court for a resolution. Solutions to the state's energy crisis have been available for months that would have avoided this scenario, but Governor Davis and the legislature lack the bold leadership to take swift, decisive action," spokesman Vance Meyer said. El Paso shares moved off its intraday low of \$63.03 to trade up 7 cents at \$63.10. Reliant Energy edged back up to \$43.51 or down 4.06 percent or \$1.84 after hitting an intraday low of \$42.65. Pacific Gas and Electric Company Files for Chapter 11 Reorganization

04/06/2001 Business Wire (Copyright (c) 2001, Business Wire)

SAN FRANCISCO--(BUSINESS WIRE)--April 6, 2001--Pacific Gas and Electric Company, the utility unit of PG&E Corporation (NYSE: PCG), today filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code in San Francisco bankruptcy court. The company said it is taking this action in light of its unreimbursed energy costs which are now increasing by more than \$300 million per month, continuing CPUC decisions that economically disadvantage the company, and the now unmistakable fact that negotiations with Governor Gray Davis and his representatives are going nowhere. Neither PG&E Corporation nor any of its other subsidiaries, including its National Energy Group, have filed for Chapter 11 reorganization or are affected by the utility's filing. "We chose to file for Chapter 11 reorganization affirmatively because we expect the court will provide the venue needed to reach a solution, which thus far the State and the State's regulators have been unable to achieve," said Robert D. Glynn, Jr., Chairman of Pacific Gas and Electric Company. "The regulatory and political processes have failed us, and now we are turning to the court." Glynn added, "Our objective is to move through the Chapter 11 reorganization process as quickly as possible, without disruption to our operations or

inconvenience to our customers. Throughout this crisis, our 20,000 employees have been and remain committed to providing safe and reliable service to the 13 million Californians who depend on us to deliver their gas and electricity." Pacific Gas and Electric Company decided to file for the protection of Chapter 11 primarily due to:

- Failure by the state to assume the full procurement responsibility for Pacific Gas and Electric's "net open position" as was provided under AB1X. This has the result of increasing financial exposure to unreimbursed wholesale energy procurement costs, which the utility estimates to be approximately \$300 million or more per month.
- The impact of actions by the California Public Utilities Commission (CPUC) on March 27, 2001, and April 3, 2001, that created new payment obligations for the company and undermined its ability to return to financial viability.
- Lack of progress in negotiations with the state to provide recovery of \$9 billion in wholesale power purchases made by the utility since June 2000, which have not been recoverable in frozen rates.
- The adoption by the CPUC of an illegal and retroactive accounting change that would appear to eliminate our true uncollected wholesale costs.

"In addition, despite Pacific Gas & Electric's best efforts to work with the State of California to reach a consensual, responsible, fair and comprehensive solution to California's energy crisis, no agreement has been reached with the Governor and the Governor's representatives have dramatically slowed the pace and the progress of discussions over the past month. "Furthermore since last fall, we have filed comprehensive plans for resolving this matter with the CPUC, but they have not acted affirmatively on them," said Glynn. On October 4, 2000, Pacific Gas and Electric sought emergency rate action by the CPUC. In November 2000, we filed our rate stabilization plan, which, if adopted, would have increased electric prices by an initial 25 percent, compared with the 46 percent recently adopted by the CPUC. Neither request was acted upon. Had the state acted at that time:

- Pacific Gas and Electric would have been kept creditworthy;
- Pacific Gas and Electric would have been able to enter into long-term power purchase contracts at prices lower than those announced by the state;
- The state would not have had to almost exhaust the state's budget surplus by spending billions of dollars to purchase power for the utility's customers;
- The state would not now need to issue billions of dollars in bonds to cover these power purchases; and
- The state would not now be advancing a proposal to spend billions of dollars to purchase the state's three investor-owned utility's electric transmission systems.

"This year, the state has spent more than \$3 billion on power purchases and, with the CPUC, has arranged to be reimbursed for these expenses," noted Glynn. "In contrast, since June Pacific Gas and Electric Company has spent \$9 billion in excess of revenues to pay for power for its customers and exhausted its ability to continue borrowing, but there has been no prog

SEC Seeks Information on Enron Dealings With Partnerships Recently Run by Fastow By Rebecca Smith and John R. Emshwiller Staff Reporters of The Wall Street Journal

10/23/2001 The Wall Street Journal A3 (Copyright (c) 2001, Dow Jones & Company, Inc.)

Enron Corp. said it has been contacted by the Securities and Exchange Commission seeking information on the energy giant's controversial dealings with partnerships that were set up and run until recently by its chief financial officer, Andrew S. Fastow. Following Enron's announcement yesterday morning of the SEC inquiry, the company's stock took another big slide, falling more than 20% in New York Stock Exchange trading. As of 4 p.m., Enron shares were trading at \$20.65, off \$5.40, knocking about \$4 billion off Enron's market capitalization. Volume topped the Big Board's most-active list at about 36 million shares. A week ago, Enron stock was trading at about \$33 a share. Subsequently, the company announced a \$1.01 billion third-quarter write-off that produced a \$618 million loss. Analysts also voiced concerns yesterday about possible other bad news lurking amid Enron's vast and extremely complex operations. The company has dealings with a number of related entities. Under certain circumstances, if Enron's credit rating and stock price fall far enough, the company would be obligated to issue tens of millions of additional shares to these entities, diluting the holdings of current shareholders. Enron has previously acknowledged the provisions but said its business is strong and it feels confident that there will be no defaults. In a statement, Enron Chairman and Chief Executive Kenneth Lay said the company "will cooperate fully" with the SEC inquiry and "look(s) forward to the opportunity to put any concern about these transactions to rest." Enron has consistently said that it believes its dealings with the Fastow-related partnerships were proper and properly disclosed. The company has said it put billions of dollars of assets and stock into partnership-related transactions as a way to hedge against fluctuating market conditions. The SEC inquiry came from the agency's Fort Worth, Texas, regional office. According to a person familiar with the matter, this would indicate that the inquiry comes from the SEC's enforcement arm, as opposed to its corporate-finance section. The participation of the enforcement branch would indicate that the agency is looking into whether there were possible violations of securities law. However, enforcement-branch inquiries often don't produce any allegations of wrongdoing. It also appears that the SEC hasn't yet taken the step of launching a formal investigation, which would be a sign that the agency believes securities laws might have been violated. The SEC declined to comment. Certainly, there have been questions and concerns about those partnership transactions, which contributed to a \$1.2 billion reduction in shareholder equity last week as part of Enron's efforts to unwind the deals. Mr. Fastow, who has declined repeated interview requests, resigned from the partnerships, known as LJM Cayman LP and LJM2 Co-Investment LP, in late July in the face of rising conflict-of-interest concerns by Wall Street analysts and major company investors. Since then, internal partnership documents have shown that Mr. Fastow and perhaps a handful of Enron associates made millions of dollars last year in fees and capital increases as general partner of the LJM2, the larger of the two partnerships. Mr. Fastow's partnership arrangement caused some unhappiness inside Enron, according to people familiar with the matter. For instance, these people say, sometime after the creation of the partnerships in 1999, Enron Treasurer Jeffrey McMahon went to company president Jeffrey Skilling and complained about potential conflicts of interest posed by Mr. Fastow's activities. Mr. Skilling didn't share Mr. McMahon's concern, these people say, and Mr. McMahon requested and received reassignment to another post. Mr. Skilling resigned as Enron president and chief executive in mid-August, citing personal reasons and the fall in Enron's stock price, which peaked at about \$90 a share last year. Mr. McMahon and Mr. Skilling haven't responded to repeated interview requests. Investors are also

concerned about potential problems arising in Enron's dealings with other related entities. In some cases, Enron could be required to issue large amounts of stock to noteholders in some of the entities if certain so-called double trigger provisions occur. For example, last July Enron helped create the Marlin Water Trust II, which sold \$915 million in notes that are due July 15, 2003. However, Enron can be considered in default, in advance of that date, if its stock price falls below \$34.13 for three trading days and its senior debt is downgraded to below investment grade by either Moody's Investors Service or Standard & Poor's. Currently, Enron debt is still investment-grade at both ratings agencies and would have to be lowered by several notches to fall into a noninvestment grade category. Last week, Moody's put Enron on review for a possible downgrade. However, observers believe that even if Moody's lowers Enron's rating, the company will still be investment-grade.

October 23, 2001 Where Did the Value Go at Enron? By FLOYD NORRIS New York Times What really went on in some of the most opaque transactions with insiders ever seen? Wall Street has been puzzling over that since Enron (news/quote</redirect=/marketwatch/redirect.ctx?MW=3Dhttp://custom.marketwatch.com/custom/nyt-com=/html-companyprofile.asp&symb=3DENE>) released its quarterly earnings a week ago. Yesterday shares in Enron plunged \$5.40, to \$20.65, after the company said that the Securities and Exchange Commission was looking into the transactions. The reaction was in some ways puzzling. Given the questions that have been raised since the earnings announcement - some of them prominently featured in The Wall Street Journal - it was likely that the S.E.C. would begin a preliminary inquiry. Whether it will go farther than that is not clear, but if nothing else the slide in Enron shares over the last week shows the hazards that can confront a company that allows word of a major reduction in its balance sheet value to dribble out.

File dasovich-j/all_documents/13225.

There might be some interest around here to help fund an anti-price cap letter or survey from members of the American Economics Association on price caps and what to do about the California power crisis. I believe you have done this sort of thing before on some other economics issues.

Do you want to price this out and test the waters to see if some others want to join in an effort?

Class Registration

Sender jeff.dasovich@enron.com

Recipients ['tj@haas.berkeley.edu', 'dimeff@haas.berkeley.edu']

File dasovich-j/sent/4215.

Greetings TJ: Well I'm in a pickle. The memo you sent said we had from 11:30 AM to 10:00PM on 4.19, and from 7 AM to 9 AM on 4.20. But the documentation I received from Telebears said from 1 PM on 4.19 to 1 PM on 4.20. All that aside, I have obviously missed the times, it's my fault, and I apologize.

I spoke with Diane this morning and she suggested that I throw myself at the mercy of the court by writing you an email with my picks. Here they are:

Class Control # My Priority Units Competitive Strategy 09441 1 3 Negotiations 09514 2 3 Non-Profit Boards 09787 3 1 Financial Institutions and Markets 09472 4 3 Leadership and Change 09520 5 3

I'd like to take 7 units (2, 3-unit classes and the 1-unit class).

Sorry for the mix-up. Thanks very much for you help. If you have any questions, don't hesitate to contact me at 415.782.7822.

Best, Jeff

Re: Still nothing on the gas meeting?

Sender	jeff.dasovich@enron.com
Recipients	['scott_sullivan@enron.com', 'joseph.alamo@enron.com']
File	dasovich-j/sent/4745.

Greetings. Forgive the delays. The meeting can largely be summarized by the CEC presentation. I'll have Joseph email it to you. In a nut shell, there's more interstate pipeline coming to the California border than there is INTRAsate capacity to take it from the California border to the consumer/business. The CEC's forecasts show that things will be tight in California. The thrust of the workshop is that, just like power plants, intrastate pipeline capacity is lagging demand in California and California needs to make a concerted effort at revitalizing the in-state gas infrastructure and do it quickly. Hope this is helpful, and again, sorry for the delay.

Best, Jeff

Free Food and Booze during 2/13 Break

Sender	owner-eveningmba@haas.berkeley.edu
Recipients	[eveningmba@haas.berkeley.edu]
File	dasovich-j/all_documents/8934.

OK, perhaps not the booze, unless you're up for a keg of O'Doul's, but definitely the pizza and soft drinks. Just a reminder that I am facilitating an Evening MBA Career Services Planning Session next Tuesday, 2/13 in the Career Center Conference Room (S420) during class break.

Last week John Morel received some good feedback regarding how the Career Center can cater to the needs of EvMBA students. I would like to continue on that path with those of you who weren't able to attend on 1/31. Input from both sessions will assist John and the account managers structure and prioritize programs to meet our career-related needs (e.g., EvMBA Resume Book, on-campus company visits during class breaks, networking events at a student's company, internships, etc.). Since John will not be attending, please direct any questions specifically for him using the contact info below.

Of course, if you cannot attend, feel free to send me your comments and recommendations. Following is a link to the Career Center in case you're not familiar with its offerings:

<http://www.haas.berkeley.edu/careercenter/mba.html>

See you next Tues.,

Hi guys - Well, my little bundle of joy arrived in the world on Friday am. Her name is Zo% Nicole and she is very sweet. I am finally home from the hospital (I had to have an emergency c-section so they kept me longer than expected).

I was wondering if you formed a group for FIA class? I just e-mailed the instructor that I would miss class this week and asked to be excused from the first assignment. I would like to stay on track after that, starting with Case Write-Up #2. What is your plan for this class and these case write-ups?

I am so sorry for the delay! I wanted to make sure I had a better idea of my schedule. I am thinking the following..either the weekend of the 8th, 9th; the 29th or 30th. I may go to Chicago the 15th or 22nd which I'll know about within the next couple of days thus one more weekend may open up. What are your thoughts? Do you want to check Lari's schedule? Anyone else we should ask?

We missed you on Sunday. The whole gang was there minus Lisa. Carl leaves in 2 weeks. They decided to move because he felt his career with the City would never go where he wanted it to go. I can explain the rest later.

Madeleine

Recipients	['alberto.levy@enron.com', 'assad@elektro.com.br', 'alan.comnes@enron.com']
File	dasovich-j/all_documents/4022.

The next Government Affairs-The Americas meeting will soon be upon us. Dinner at Ruggles Restaurant, Enron Field, Thursday, December 7 will begin at 7:00pm and will be casual dress. For those of you staying at the Doubletree, there is shuttle service available from the hotel. Please contact the Concierge desk 25 minutes before departure to request the shuttle service. The address for the restaurant is: 333 Crawford Street, Houston, TX 77002 (713)259-8080.

The department meeting on Friday, December 8 will begin at 8:30am and conclude by 3:00pm and will take place at the Doubletree Hotel in the De Zavala room (please see attached agenda). It's Friday, so casual dress is required! A continental breakfast will be available beginning at 7:30am for all the early birds.

One last thing, the room block will be cut off by close of business tomorrow, Thursday, November 30. Please make your room reservation if you haven't done so already.

Look forward to seeing everyone next week and please call me with any questions.

Newly Revised Home Depot Memo - REVIEW AGAIN

Sender	cvavrek@deloitte.com
Recipients	['asama@yahoo.com', 'mark_guinney@watsonwyatt.com', 'jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/5394.

I just got changes from Anil that showed me the message I sent last night did not pick up my final version of the document for some entirely bizarre reason (perhaps I had the file open when I attached the document and it only sent the most recently saved version?).? Here is the file again - please review and let me know if okay to finalize.

Sorry for this confusion!

Carolyn M. Vavrek Manager - Human Capital Advisory Services Deloitte & Touche 50 Fremont Street San Francisco, CA? 94105

phone: 415-783-5137 fax: 415-783-8760 e-mail: cvavrek@deloitte.com

-----Original Message-----

I don't think it frees up any money.? The footnote is only indicating that they have \$50 million in lease obligations for the upcoming year.? I may be missing something but what this would potentially affect is the asset turnover and leverage ratios since non-capitalized leases are off-balance sheet items and so don't get included in the Total Assets category.

***** Mark D. Guinney, CFA Consultant Watson Wyatt Investment Consulting 345 California Street, Ste. 1400 San Francisco, CA? 94104 (415) 733-4487 ph. (415) 733-4190 fax

_____.Reply Separator_____ Subject:??? Re: Home Depot Memo - Revised Author: Jeff.Dasovich@enron.com Date:?????? 02/08/2001 11:13 AM

Gang: Quick question.? Does the lease-buy-back free up \$50M of funds for 1987? Mark, is that captured in the 1987 cash flows?? Don't think that should change our recommendation, but ran across it in the case and was wondering if we captured it.

FYI

W. Wayne Gardner Enron Broadband Services 1400 Smith Street Houston, TX 77002-7361 Phone: 713 853 3547 Fax: 713 646 2532 ----- Forwarded by Wayne Gardner/Enron Communications on 08/02/2001 18:28

Wayne Gardner 08/02/2001 09:24

To: Paul Racicot/Enron Communications@Enron Communications cc: James Ginty/Enron Communications@Enron Communications Subject: Trading in Asia

Paul, as we discussed this morning, Regulatory is telling us that it is likely that we will be able to establish a regional trading desk in Singapore that will hold all the licenses necessary to trade in all of the priority countries in Asia. Regulatory expects to receive confirmation next week that the 1% annual Singapore telecom license fee will apply only to Singapore bandwidth. Given that Asia trading will be centralized in Singapore, we want to make sure that the activities of traders outside of Singapore do not cause the Singapore trading operations to be subject to tax outside of Singapore. In this regard, Asia traders should keep in mind the following general rules:

Traders that regularly engage in the execution of trades outside of Singapore will create a taxable presence outside of Singapore that will likely result in double taxation. Traders that regularly engage in the negotiation of trades outside of Singapore will create a significant risk that local tax authorities will assert that such activities created a taxable presence outside of Singapore that would likely result in double taxation. EBS Tax would want to monitor such a situation very closely, so please let us know immediately if these circumstances arise. Traders engaging only in the solicitation of business and the provision of product information (including pricing) outside of Singapore will not create a taxable presence outside of Singapore. In this regard, please note that even if traders restrict themselves to business solicitation, a large scale presence in any given country could attract the attention of the tax authorities who may adopt aggressive positions with regard to the creation of a taxable presence.

When in doubt as to the application of these general rules to a specific situation, please do not hesitate to call.

Thanks.

RE: Job candidates for Enron	
Sender	jeff.dasovich@enron.com
Recipients	['James Bushnell', 'borenste@haas.berkeley.edu']
File	dasovich-j/sent_items/2317.

Thanks. If we ever get out of this mess, you can rest assured that I'll help out. Can you remind again right after the first of the year, at which time we should have a better idea of where this ship is heading? Thanks.

Best, Jeff

-----Original Message-----

From: Severin Borenstein [mailto:borenste@haas.berkeley.edu] Sent: Friday, November 23, 2001 9:02 PM To: Dasovich, Jeff Cc: James Bushnell Subject: Job candidates for Enron

Hi Jeff:

I'm not sure if hiring is an issue these days for you, but I wanted to let you know that Jim Bushnell and I will be again teaching a course at Berkeley this spring called "Energy Market Strategies and Policies." The course is cross-listed between the Haas School of Business and the Energy & Resources Group (ERG) at UC Berkeley.

The course is currently limited to 42 students, but it is already over-subscribed, so we are trying to move it to a larger classroom. We'll have mostly MBA students from Haas, but also about a dozen masters students from ERG. There are also usually at least a few PhD students. The students in the class are were very smart -- many of them already have experience in the energy industries -- and we believe the course puts them in a position to immediately contribute to any energy-related organization that they would join. You can see a copy of last year's course syllabus at <http://www.haas.berkeley.edu/~borenste/EnergyMarketsSyllabus.pdf>

Many of these students are interested in either summer or permanent employment starting as early as May. If you have openings that you would like to advertise to these students, please let me know. We will be setting up a webpage with job announcements in energy-related organizations. If you send me a job description (or the URL for it), I can add it to the webpage.

Talk to you soon, Severin

Hi Diann,

I just left a phone message for Wanda as I didn't have her email and was supposed to coordinate the follow up call with her. Anyway, we are still working on preparing the account examples demonstrating the change in methodology and should have those to you by tomorrow. In the meantime, I wanted to go ahead and arrange the follow up call for this Thursday 5/3 at 1pm PST. That would be 3pm your time. Can you please let me know the email addresses for your participants so I can get a notice out to them.

I had yourself, Wanda Curry, Evan Hughes, Jeff Dodson, Bob Williams, Jim Doth, and Martin Curtilan? Not sure of the spelling. Please let me know so I can send out the meeting notice out with the call in details.

Thanks Much.

Ladies & Gentlemen:

I apologize for the confusion regarding this meeting but we are now going to call off Monday's meeting (12/4) and just stick to the one already scheduled for Thursday, December 7th. This meeting will be held in 43C1 and the call in numbers remain the same as listed below.

Once again, there will be no November 30th or December 4th TAR&L meeting. Please call me at 37097 if I may be of further assistance.

----- Forwarded by Angie Buis/Enron Communications on 11/29/00 12:43 PM -----

Due to the unavailability of several players, we would like to move the November 30th TAR&L meeting to Monday, December 4th, 8:30-noon in conference room EB14C1. Please advise if you are unable to attend at this time.

Thank you!

Angie Buis x-37097 ----- Forwarded by Angie Buis/Enron Communications on 11/28/00 08:38 AM -----

The next TAR&L meeting will take place on Thursday, November 30, 8:30 a.m. to 12:00 noon, in conference room EB43C1. Breakfast will be provided. The call-in information is listed below.

International Participants: (304) 345-7526 Domestic Participants: (888) 271-0949 Passcode: 589792

Host (Houston) number: (888) 271-0949 Passcode: 281574

I have arranged for 4 domestic and 2 international ports. Should extra ports be required, all the person will need to do is dial the appropriate number listed above.

Additionally, we have scheduled another TAR&L meeting for Thursday, December 7th, same location, time and dial in numbers.

Should you have questions regarding any of the above, please do not hesitate to call me at extension 37097.

Thanks.

<<...>>

5201 Great America Parkway, Suite 522 Santa Clara, CA 95054 408 517-2100 408 517-2985 fax

Dear Colleague,

As your may be aware, we have invited you and your company to an extremely important meeting on February 21, 2001 at the APX headquarters in Santa Clara to discuss a solution to the critical problem we have today in our California market regarding congestion management and CAISO schedule cuts. This problem is costing us millions of dollars today and continued pro-rata schedule cuts as a method of congestion management will escalate substantially to well over \$100,000,000 and could even rise above that before the end of this year.

Since the California Power Exchange no longer operates an adjustment bid portfolio market to manage congestion, APX has discussed the potential of operating a similar market with the CAISO. Technically, our solution is sound and the CAISO endorses this market. APX is uniquely capable of developing this market as an interim solution until the California ISO settles on its longer term congestion reform methodology. Without this market, we all stand to lose millions of dollars by having schedules cut by the CAISO because there are no other short term alternatives to congestion management. The investment we will require from you to develop this interim solution will be minor compared to the financial impact without it.

We are asking you to attend this meeting and to confirm your desire to see such a solution provided by APX. Ultimately we will seek financial commitments prior to developing the solution but believe it is feasible to have it in place well before the summer season. Due to its interim nature we will seek a flat fixed fee such that its planned abandonment will not negatively impact APX with the more permanent change to congestion management that will eventually be implemented by the CAISO.

The attached agenda provides an updated outline of our planned activities. These include a brief introduction and review of why this is important to California market participants and the impact of doing nothing, an overview of how such a market will work, and a presentation by the CAISO regarding integration issues with current CAISO congestion management procedures.

We welcome your participation in this most important meeting next week and look forward to your commitment to a successful resolution of this situation.

Sincerely,

Michael L. Heinrich John Stremel Vice President Vice President

Mary Hain@ECT 10/25/2000 11:01 AM

To: James D Steffes/NA/Enron@Enron, jdasovic@ees.enron.com, Mona Petrochko, Susan J Mara/SFO/EES@EES, Sarah Novosel/Corp/Enron@ENRON, Joe Hartsoe@Enron, Dennis Benevides, Tim Belden/HOU/ECT@ECT, Cooper Richey/PDX/ECT@ECT, Robert Badeer/HOU/ECT@ECT, Jeff Richter/HOU/ECT@ECT cc: Subject: Draft response to CMUA paper

The attached draft answers the California Municipal Utilities Association complaint that California markets are not workably competitive and therefore FERC should establish cost-based rates. In its complaint, CMUA argued that the market isn't workably competitive because the prices were higher this summer than in previous years even in hours where demand was no higher. Seabron's paper shows that high prices have resulted from a number of unrelated structural and market design factors and increasing attempts at regulatory intervention. Our answer is due at FERC tomorrow so please get me your comments ASAP. ----- Forwarded by Mary Hain/HOU/ECT on 10/25/2000 08:48 AM

File	dasovich-j/all_documents/28049.

Dan Douglass has drafted joint comments for two coalitions in which Enron is a member -- Alliance for Retail Energy Markets and Western Power Trading Forum. Robert, feel free to contact Dan directly with your comments. Let me know your thoughts as well. I am out of the office at a WPTF meeting. Dan is here as well. If you need to contact me, you can leave me a message on my office phone or try my cell (415 -- 902-4108), but I'm not sure the cell is working all the time.

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 06/22/2001 07:35 AM -----

"Dan Douglass" <douglass@energyattorney.com> 06/20/2001 10:59 PM

To: "ARM" <arem@electric.com> cc: Subject: Comments on Draft Decisions Regarding PX Credit and Direct Access

Attached for your review and comment is my first draft of comments to be filed on Monday with regard to the draft decisions of ALJ Barnett and Commissioner Bilas.? Please review it carefully, as I have thrown in everything I can think of on a rush basis, and it may require some significant editing.? Pay particular attention to Section V dealing with Bilas' request for parties to discuss alternatives to DA suspension.? The draft offers a compromise to the DWR's concerns, as expressed in the Angelides memo.? Also, notice that Section VI urges the Commission to bifurcate the DA and PX credit issues, acting quickly on the first, if it must, but more leisurely on the PX credit subject. ? Finally, I have a suggestion?in the form of a question.? How would AReM members feel about making this a joint filing with WPTF?? There is cross-membership between the two groups and the same issues would be raised in the separate filings which I am otherwise prepared to draft.? This draft would requires some modifications so as to refer to the "Joint Parties" as opposed to solely mentioning AReM, and I might? add a section dealing more explicitly with WPTF's contribution to getting the zero minimum bill stipulation signed in the first place.? Otherwise, the document would stay much as it is (subject to your input over the next few days, of course).? Please let me know what you think asap, as I am already working on a WPTF draft.? Incidentally, I will also be filing comments on behalf of ABAG which will support the positions taken in the attached document, but I am not proposing that ABAG also be a party to this filing.? Thanks for your help!? Comments as soon as possible would be very much appreciated! ? Dan ? ? Law Offices of Daniel W. Douglass 5959 Topanga Canyon Blvd.? Suite 244 Woodland Hills, CA 91367 Tel:?? (818) 596-2201 Fax:? (818) 346-6502 douglass@energyattorney.com

HD Case: Proposed Plan

Sender	cvavrek@deloitte.com
Recipients	['mark_guinney@watsonwyatt.com', 'chin@haas.berkeley.edu', 'sama@haas.berkeley.edu']
File	dasovich-j/all_documents/8896.

I just spoke live with Mark about the case write-up.? Hope the following works for everyone.?

I will take a shot at comparing the following for questions (a) and (b):

(1) Home Depot's strategy (low margin, high turnover, high service, best quality products) with their financial ratios. (2)

Home Depot's strategy with Hechinger's (upscale stores with high profit margins) by comparing their financial ratios.

(Understand that I have not had the benefit of attending the last two classes, but hope to watch them on video tape before I send out my answers.)

Mark has already addressed question (c), we just need to make clear in the memo the assumptions he used.? Mark - perhaps you could write those up so we can drop them into the memo?

The other big issue is with Home Depot's expansion strategy - should they continue to build the 9 new stores, and if so, how should they finance the expansion?? They could use their line of credit or go to the equity market.? Obviously with the line of credit we need to make sure that they can cover the interest expense and with the equity market we need to be careful of their depressed stock price.? Can someone else volunteer to look at the expansion efforts and financing (question d)?

I am going to work on this today and hope to e-mail it out by 9am tomorrow.? Can we set a time on Wednesday to discuss this live??

Subject: Final Version-Manifesto

TO:?? Colleagues

SUBJECT:? Final Version

I've done my best to include your very helpful comments.? The document now also contains a summary.

I would like your endorsement, by noon PST (Wednesday) if possible.? A number of you have already indicated you would sign it.? Also, Tom Campbell has indicated he will try to recruit Ken Arrow.? I believe one of you agreed to recruit Dan McFadden.? Laura is working on Larry Summers.? Solow would be a great addition, too.

Can we agree on the following division of labor from here out:

1.? Recruiting others:? All

2.? Media representatives:? Campbell, Tyson, Spiller, Verlerger, Wilk, Teece, and Hogan (This is by no means meant to preclude anyone contacting the media after we go public.)

??? On media, we are giving the LA Times a 24-hour exclusive.? We won't release to other media sources until 9:00 AM Thursday.

Many thanks for your involvement and endorsements.

(See attached file: Manifesto-final version.doc)

Revised Agenda for next TAR&L meeting

Sender	wayne.gardner@enron.com
Recipients	['sue.nord@enron.com', 'michelle.hicks@enron.com', 'donald.lassere@enron.com']
File	dasovich-j/eci/2.

1. Based on discussions from the 11/8 meeting, step through a specific US/Japan trading example for bandwidth purchased and resold by the US trading desk, specifically determining what the US trading desk can and cannot do with respect to each piece of the international capacity segment (see attached file).

2. Time permitting, step through a US/Japan trading example for bandwidth purchased and resold by the Singapore trading desk, specifically determining what a hypothetical Singapore trading desk could and could not do with respect to each piece of the international capacity segment.

3. Develop a prioritized plan of action specifying steps, accountabilities, format, and timeline for each area of responsibility to work together to provide necessary input for traders for each of the following jurisdictions:

Europe Japan Hong Kong Australia Singapore Taiwan Korea Brazil Mexico Argentina Chile Venezuela Colombia

4. Review and discuss Dave Merrill's note on Korea.

5. Time permitting, step through a specific US/Korea trading example as in point one above.

Susan J Mara@ENRON 05/08/2001 11:52 AM

This bill now goes to the Assembly. The Assembly has its own bill -- 128X, which is working its way through Committee. The Senate bill has an \$80 benchmark (above which the 100% tax applies) and the Assembly bill has a \$60 benchmark

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 05/08/2001 09:48 AM -----

To:

SB 1x passed the State Senate late this afternoon by a vote of 25-12. Senator Soto spoke in support arguing that the money should be returned to taxpayers. The flate rate of the refundable tax credit will be determined by the FTB. Senator Scott said that FERC has failed to act. This bill will regulate the price of electricity in CA. He said that the PUC will be allowed to review and adjust the base price for the tax, and that the PUC could allow additional exemptions (is this an unconstitutional delegation of authority?). Also, a long-term contract arrangements are exempt from the bill. Senator Morrow spoke in opposition. He said that the bill is not about relief. Rather, it redistributes wealth and should be changed to refund the money to consumers. Senator Battin spoke in opposition. He cited the planned Intergent plant in North Palm Springs. This bill does not solve the crisis. It just discourages generators from building in this state. Senator Dunn said that emergency steps must be taken and that he supports this bill. Otherwise, CA's wealth will go out of the state, primarily to Texas. Senator Polanco spoke in support and said that ratepayers are being gouged. Billions in profits have been reaped by generators. Senator McClintock spoke in opposition and said that power plants are not being built here and that this bill will stop the construction of plants in CA. Senator Peace spoke in support and said that FERC has failed to enforce the law. Senator Perata spoke in support and said that generators have gotten caught red-handed and now need to pay a penalty. Senator Haynes spoke in opposition and said that the constitution will be violated by this bill and that companies will sell to other states, rather than California. Senator Bowen spoke in support of the bill. She asked why we should have the welcome mat our to CA when these companies are charging 300% more in their prices then just a year or two ago. She also indicated that the Legislative Counsel has given them an opinion that this bill is constitutional because it only applies to the electrons flowing into the state. Whatever that means? No Republicans voted for the bill. No Democrats voted against it. Final vote was 25-12. However, if the Assembly or Senate adjourns the Special Session without passing this bill and/or AB 128x, then both measures will die.

i won't be in class tonite. i'm open, too, but to tell you the truth, mark, the thought of comparing us and european accounting standards/practices makes me break out in a rash. if there's any way that we can focus on strategy, valuation, or other sorts of financial analyses that we've focused on in the course, that would be preferable from my perspective.

best, Jeff

The Enron idea is intriguing but could be extremely difficult to do. If most of the Wall Street analysts are having difficulty seeing through the financial statements than what chance do we have?

AOL/Time Merger is a good idea. Also, we can look at a foreign company like Daimler and see how their financial statements change as they have to convert to US GAAP and what this tells us about their foreign accounting.

No rush, but thought I'd throw this out there just to get the ball rolling:

Looks at this point like any of the presentation dates work for me, so I don't necessarily have a preference. Options for project (and I'm really just throwing stuff out there to stimulate thought): Analyze AOL/Time Warner merger My company, Enron, is accused by some analysts of being nothing more than a Merrill-Lynch, or a Morgan-Stanley, or a Goldman-Sachs, etc. These analysts claim that we should therefore trade at multiples that are in line with the investment houses. We differ in that view (for a lot of reasons that I won't go into here). Might be interesting to analyze strategies, differences, etc.

Anyway, just some thoughts to get the ball rolling. I'm open to just about anything.

To: Mark Guinney <Mark_Guinney@watsonwyatt.com>, chin@haas.berkeley.edu, sama@haas.berkeley.edu, Jeff.Dasovich@enron.com cc: Subject: HD Case: Proposed Plan

I just spoke live with Mark about the case write-up. Hope the following works for everyone. I will take a shot at comparing the following for questions (a) and (b): (1) Home Depot's strategy (low margin, high turnover, high service, best quality products) with their financial ratios. (2) Home Depot's strategy with Hechinger's (upscale stores with high profit margins) by comparing their financial ratios. (Understand that I have not had the benefit of attending the last two classes, but hope to watch them on video tape before I send out my answers.) Mark has already addressed question (c), we just need to make clear in the memo the assumptions he used. Mark - perhaps you could write those up so we can drop them into the memo? The other big issue is with Home Depot's expansion strategy - should they continue to build the 9 new stores, and if so, how should they finance the expansion? They could use their line of credit or go to the equity market. Obviously with the line of credit we need to make sure that they can cover the interest expense and with the equity market we need to be careful of their depressed stock price. Can someone else volunteer to look at the expansion efforts and financing (question d)? I am going to work on this today and hope to e-mail it out by 9am tomorrow. Can we set a time on Wednesday to discuss this live? - Carolyn

I like the numbers too.? Anil - I got the same answer you did, but decided in the write-up to only contemplate the ad campaign change in perpetuity, consistent with Jeff's write-up.? I substituted Mark's answer to the last question for Jeff's and added an attachment, hopefully showing the crux of our number crunching.? Let me know if you think we should attach additional or different details from the spreadsheets (especially for the third question).? Otherwise I think we are done with this one. - cv ? ?

Carolyn M. Vavrek Manager - Human Capital Advisory Services Deloitte & Touche 50 Fremont Street San Francisco, CA? 94105

phone: 415-783-5137 fax: 415-783-8760 e-mail: cvavrek@deloitte.com -----Original Message----- From: Anil Sama [mailto:asama@yahoo.com] Sent: Monday, February 19, 2001 7:40 PM To: Vavrek, Carolyn (US - San Francisco); Jeff.Dasovich@enron.com; Mark Guinney Cc: asama@yahoo.com; Jeff_Dasovich@enron.com Subject: RE: Answers

Hi Team,

I ran my own numbers this morning, and verified what you guys have sent out. I think we can use Mark's or Jeff's write-up as is. Just have one clarification re: Q2 - my?spreadsheet shows that if we increase ad expenses for five years only '94-'98 (as opposed to in perpetuity), then the stock price ends up being 22.73 v/s Mark's 22.20. I do get 22.20 if?I also increase the 6th year ('99) expenses to 27% - perhaps this was an oversight - can someone pls confirm?

For Q5, merely changing terminal growth to 4%, and WACC to 10% gets us to an \$80 stock price.?But?4% in perpetuity is probably unrealistic?

Re: the last question, I agree with Mark's analysis - firms that have huge R&D cycles and patent protection over 17 years etc. e.g. pharmas would be good candidates for foreacsting over a longer term horizon.

Rest looks great - you guys are awesome!!

-Anil

Hi Jeff,

I am easy, it just gets difficult to coordinate the more people you have, it may be better of for her to find a smaller group, but if she has her sights set on us, that's fine with me.

At 05:15 PM 9/28/00, Jeff.Dasovich@enron.com wrote:

See my note and Christine's response. Thoughts? Suggestions? Jimmie, apparently she's had a crush on you ever since she heard you say, "Cash-sucking machine." ----- Forwarded by Jeff Dasovich/NA/Enron on 09/28/2000 07:11 PM ----- Christine Piesco <christine.piesco@o To: Jeff.Dasovich@enron.com racle.com> cc: Subject: Re: Teams 09/28/2000 06:23 PM Jeff, Sorry, I should have mentioned when we spoke that Prof Aceves already said it would be OK to join a group with 4, making it 5. He knew that would be the case. He suggested I pick a group, rather than him just randomly choosing one to assign me to. You seemed nice based on my initial reaction to meeting you, which is why I approached you about it. If the group has reservations based on my past group's experience, please let them know that the situation arose because I was out of the country for a week and a half without email access, and therefore wasn't able to contribute to two weeks of assignments. I had let Prof Aceves know about this planned business-related absence even before the course started, so he didn't penalize me. He forgot that I was the person who had sent him that note when my group approached him to let him know I hadn't contributed to two assignments. He said based on that, he would speak to the group to put me back in it if I wanted, or I could join another group. I hadn't had any conflicts whatsoever with the other group, I just had been out of communication, but I felt that given what had happened starting with a fresh group would be easier. In my opinion, it was just unfortunate that this trip happened two weeks into the class, before I could prove myself to my old group. If you can communicate both of these things to your other group members, I really would like to join you all. My alternative at this point would be to do the next assignment individually, since I wouldn't be able to find another group until two weeks from now, and then have the professor assign me to one. I greatly appreciate your help. If I can join you all, please let me know as soon as possible so I can make sure I contribute to the next assignment. OK gang, she's hell bent, and I've spent about as much time as I'm willing on this. Sorry about the hassle---Jimmie, if you hadn't used that colorful language, we wouldn't be in this mess. Anyway, unless I hear strong protests in the next 30 minutes, I'm writing back to say she can join (and has to do the next case all by her lonesome on the team's behalf as payback). Lemme know.

Best, Jeff ----- Forwarded by Jeff Dasovich/NA/Enron on 10/02/2000 04:21 PM -----

Christine Piesco <christine.piesco@oracle.com> 10/02/2000 02:39 PM

To: Jeff.Dasovich@enron.com cc: Subject: Re: Teams

Jeff,

I appreciate your help. I sent a note to the Prof last week letting him know your concerns and asking him to verify once more that a group size of 5 was OK. I got his response today that it was. Apparently, my old group was the only one with 3, most of the others have at least 4. If there really is a lot of resistance I will ask the Professor to assign me randomly to a group. I would simply prefer to join one that I chose. I appreciate you're group's helping me out of this awkward spot, if they decide to let me in. Let me know,

Thanks, Christine

Jeff.Dasovich@enron.com wrote:

Hi Christine: Yes, forwarded the email you sent last week. Here's where folks came out. First, we think that the folks in your first group are mean. Second, it's a real challenge managing a group of four and there's concern that five will break the camel's back. Suggestion came up that it might be much more manageable if you could try to link up with a smaller group first. If there's a problem finding a smaller group, then we could try to do five and hope the ship don't sink? Sound reasonable? Best, Jeff Christine Piesco <christine.piesco@o To:

Jeff.Dasovich@enron.com

racle.com> cc: Subject: Re: Teams 10/02/2000 01:14 PM Jeff, Have you had a chance to convey what I said to the group, and can I join? Professor Aceves was aware that I talked to you about joining your group, and he sent me an email asking to confirm that I was now in a group. I'd certainly like to be! As you know, I want to make sure I am in one to do the next assignment with. Please let me know, so that if I am joining your group I can make the meetings and contribute to the next case. Our schedules make it messy. I can come over tomorrow during the break if Anil and Carolyn want to meet. Mark, if you want to hunker down with the model tomorrow, you should feel free. The only thing about Thursday is that Carolyn's got a

commitment with Dian. Can we talk about meeting this weekend? I can be flexible.

Best, Jeff

04/16/2001 Subject: OAT Valuation Model(Document link: 10:52 AM Jeff Dasovich)

OK folks. It's about 80% of the way there. My brains are oozing out looking at cells, so I want to get this around so Mark can get started on refining assumptions and other folks can examine as well. I'll continue to check it and de-bug it. Mark, you and I should talk, too. (You'll note that at this point, the valuation is in the \$30s, so there's work to do.) Apologies in advance for any errors (and I'm sure they're there).

If anyone has any questions on the model, just let me know.

I think we ought to get together to meet this week as much as possible to start getting the power point presentation together. And perhaps we should think about meeting this weekend?

In the meantime, I'm pulling together the data on Buffet (Berkshire Hathaway) stock performance, etc., and will also do the financial ratios, including Dupont, for OAT.

Does this work for folks? Other thoughts?

Best, Jeff (See attached file: OAT Valuation 0416.xls)

Cameron (cc: Ian),

See my response below to the email from David Hurwitz today regarding DealBench. My contact at DealBench is: Suresh Raghavan, Principal (also Director of Enron Net Works) 713-853-4217 suresh.raghavan@dealbench.com I'll leave DealBench in your hands, but please keep me advised as it relates to Enron. Let me know if I can be of any help. Thanks, David

-----Original Message-----

From: David Hurwitz To: A - Execs; David Young; Jim Fleming Sent: 6/19/01 9:55 AM Subject: DealBench

FYI: Just got a direct mail piece from DealBench, LLC, a wholly owned Enron company. They are selling themselves as a complete RFP and auction system.

dh <https://www.dealbench.com/> <<DealBench.url>>

David H, Here's a wrapup of my meeting with DealBench two weeks ago. I left a voicemail for Cameron yesterday asking her how to proceed with them, as this would become a BizDev deal with a perceived competitor. On another note, the 2 EES Proc Mgrs that Jim F and I met with a couple of weeks ago, mentioned that they have an initiative on the table to run a reverse auction by July 15, and that they are considering BayBuilder. They said they don't care about the DealBench platform, it doesn't meet their needs and DealBench isn't giving any better deal to Enron's business units than they would to anyone else off the street. Ian and I are trying to schedule a meeting next Tuesday with Proc Mgrs from several business units along with John Gillespie from GSS in order to demo Perfect Insight and discuss our Early Adopter Program. David Young -----Original Message----- From: David Young Sent: Friday, June 08, 2001 12:35 PM To: Jim Fleming; James Brackenrig Subject: EnronOnline / DealBench

Met for 45 min w Suresh Raghavan to discuss DealBench (Enron's proprietary auction platform) and the potential for Perfect to provide complementary solutions to their customers through EnronOnline and beyond. We agreed that the purpose of our discussions would not be to have him sponsor us to the Global Strategic Sourcing unit, but only to consider Perfect as a bus dev deal. We would need to price ourselves as an ASP for them, but with the liquidity they have (supposedly like \$1B per day traded through EnronOnline), this should be a no-brainer. Suresh is the Principal of DealBench, as well as a Director of Enron Net Works. DealBench is one of many business units under the Enron Wholesale Services / Enron Net Works group, including EnronOnline, ClickPaper, MetalMarkets, and other wholesale marketplace services. DealBench has 3 primary offerings: * Auctioning/RFQ management * Deal Rooms with complex negotiations tools * Data Rooms for sharing of secure documents such as CADs, blue prints, etc for M&A due diligence.

We discussed the basic functionality and sophisticated math behind Perfect, and he felt that it was worth considering further as a complementary service offering for the DealBench platform. He would like to arrange a demo for him and some of his managers for the end of June or early July.

He knew that would be the case. He suggested I pick a group, rather than him just randomly choosing one to assign me to. You seemed nice based on my initial reaction to meeting you, which is why I approached you about it. If the group has reservations based on my past group's experience, please let them know that the situation arose because I was out of the country for a week and a half without email access, and therefore wasn't able to contribute to two weeks of assignments. I had let Prof Aceves know about this planned business-related absence even before the course started, so he didn't penalize me. He forgot that I was the person who had sent him that note when my group approached him to let him know I hadn't contributed to two

assignments. He said based on that, he would speak to the group to put me back in it if I wanted, or I could join another group. I hadn't had any conflicts whatsoever with the other group, I just had been out of communication, but I felt that given what had happened starting with a fresh group would be easier. In my opinion, it was just unfortunate that this trip happened two weeks into the class, before I could prove myself to my old group. If you can communicate both of these things to your other group members, I really would like to join you all. My alternative at this point would be to do the next assignment individually, since I wouldn't be able to find another group until two weeks from now, and then have the professor assign me to one. I greatly appreciate your help. If I can join you all, please let me know as soon as possible so I can make sure I contribute to the next assignment. Thanks, Christine Jeff.Dasovich@enron.com wrote: > Christine: > > My apologies. My schedule melted down after we talked on Monday. Here's > where folks came out. There's some concern about size. John Shelk is going to investigate the status of this amendment in the context of the Barton bill. However, we want to raise with you our initial strong reaction to this amendment. We are highly troubled that this amendment is being pursued at the Federal level. We believe that we run the risk of hurting our push for negawatts, let alone getting a very negative vote on direct access itself. We will do some quiet soundings. But at this point, we believe there is enormous downside risk to this strategy. We are calling NYMEX to find out what they are thinking.

Chairman Barton has told us he would support a direct access amendment when the full committee marks up the bill next week. Radanovich and Chris Cox have expressed strong interest in sponsoring it. We are suggesting language which bypasses the CPUC -- with federal preemption of course. Coan the California DA folks press the congressional delegation focusing on Radanovich and Cox?? What are your thoughts? -----Original Message----- From: Charlie DeWitt

[mailto:nymex4@unidial.com] Sent: Friday, May 11, 2001 11:31 AM To: tricia.geringer@mail.house.gov; royce.reinecke@mail.house.gov Cc: Mark Seetin Subject: DIRECT ACCESS AMENDMENT

Dear Tricia and Royce, thanks for hearing us out on the issue of direct access. Congressman Radanovich is welcome to offer an amendment on this issue next week. The following language is based on some language we tried to have inserted at the State level. Unfortunately, AB1X passed in January prohibits direct access and competition among sellers for buyers of electricity. Without a free market for electricity and with all electricity purchases going through a state-mandated exchange, the taxpayers of California are left with paying the bill for electricity: DRAFT LANGUAGE FOR DIRECT ACCESS IMPLEMENTATION Not later than thirty days after enactment, the Independent System Operator ("ISO"), shall submit to the Federal Energy Regulatory Commission ("FERC") a transmission congestion relief program that incorporates physical rights to firm transmission through congestable interfaces. Such rights will confer on users the right to access transmission through the interfaces without incurring congestion fees. The rights will provide access for periods judged to serve direct access market participants of up to one year. Initial provision of these rights will be through an annual auction overseen by the ISO. The rights will be resalable. Not later than thirty days after enactment, the program will implement direct access for large non-residential users of electric power. The program will require large industrial, commercial and other non-residential users of electricity to fulfill their electric power needs by contracting with non-investor owned utility ("IOU") sources in accordance with the following schedule: 90 days after enactment: 1 megawatt and greater loads 180 days after enactment: 300 kilowatt and greater loads 270 days after enactment: 100 kilowatt and greater loads 360 days after enactment: 70 kilowatt and greater loads. This program will permit large industrial, commercial, and other non-residential users of electricity to voluntarily enter into contracts to fulfill any portion of their own electric power needs through direct contracting with non-IOU sources.

More directly, does this mean DWR can determine that the market price we are other market participants settle at does not work for them or California and only decide to pay the portion they find is reasonable after the fact? If so I don't think this answers all of the credit concerns. I am not sure DWR is a creditworthy party to Enron either, nor do I think Enron want to take that risk for balancing, load curtailment and trading?

<IMCEAEX-_O=CAISO_OU=CORPORATE_CN=DISTRIBUTION+20LISTS_CN=ISO+20MARKET+20PARTICIPANTS@caiso.com> cc: Subject: CAISO Notice: Market Notice re: Credit Issues

Market Notice re Credit Issues

In response to the FERC order of April 6, 2001 re the issue of creditworthiness, the California Department of Water Resources (DWR) has authorized the ISO to make the following statement. To the extent (and only to the extent) that a purchase is not otherwise paid by any party or payable by another party meeting the credit standards set forth in the ISO Tariff (another "Qualified Party"), DWR will assume financial responsibility for all purchases by the ISO in its ancillary services and imbalance energy markets based on bids or other offers determined to be reasonable. Such determination of reasonableness will be made by DWR on a case by case basis and communicated to the ISO. All bids into the ancillary services and imbalance energy markets will be deemed to be contingent on the acceptance of financial responsibility by DWR, to the extent not paid or payable by another Qualified Party. Unless a supplier is otherwise notified, any bid accepted by the ISO will be deemed to have the financial support of another Qualified Party or DWR as specified in this notice. In addition to the foregoing, DWR will assume financial responsibility for all purchases resulting from the issuance by the ISO of emergency dispatch instructions, to the extent not paid or payable by another Qualified Party. Payment for such purchases shall be made according to the rate specified in the ISO Tariff for emergency dispatch instructions. The ISO and/or DWR reserve the right to rescind or modify the foregoing arrangements at any time and for any reason, including a successful rehearing or appeal from the April 6 order.

As the FERC determined in its February 14 order that DWR is a creditworthy counterparty, the ISO believes that the foregoing arrangements meet the requirements of FERC's April 6 Order. Accordingly, the ISO expects that suppliers will honor their obligations under the ISO Tariff and related agreements to respond to ISO dispatch instructions.

YOU ARE INVITED: "Why are Public Schools Failing and What Can Be

Sender	djtheroux@independent.org
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/12585.

Dear Jeff,

For decades, reformers have promised to improve the public schools, but recent newspaper headlines show that many schools have gotten worse:

* "Threshold lowered on exit exams -- State OKs high school standard below what was originally proposed" * "'Abysmal' exit test results for 9th-graders -- Most flunk if 70% is a passing grade" * "Small wars plague the schools -- Teachers,

district, mayor embroiled" * "Schools Add Security in Reaction to Violence"

Why have efforts to improve the public school system been such failures? Which reforms are more likely to overcome the political obstacles to improve education? Which reforms best ensure that schools will be held accountable to parents? Which reform proposals have the greatest potential for fostering educational excellence?

To explore these and related question, the Independent Policy Forum will feature two noted education experts: Richard Vedder (author, CAN TEACHERS OWN THEIR OWN SCHOOLS?) and John Merrifield (author, THE SCHOOL CHOICE WARS). The program will be held the evening of Thursday, July 5th, from 6:30 to 8:30 p.m., at the Independent Institute's conference center in Oakland, California.

For your review, I am adding below an invitation with further details on the program. Because seating is limited, please make your reservations as soon as possible. For further information, please contact me or the Institute's Events Coordinator, Ms. Nichelle Beardsley, at 510-632-1366 x118.

We hope to see you on July 5th.

Sincerely,

David J. Theroux Founder and President The Independent Institute 100 Swan Way Oakland, CA 95621-1428
510-632-1366 Phone 510-568-6040 Fax DTheroux@independent.org <http://www.independent.org>

WHY ARE THE PUBLIC SCHOOLS FAILING AND WHAT CAN BE DONE? - Next Independent Policy Forum (July 5, 2001)

American children learn less than they did 30 years ago, and even where there are signs of improvement, they are small. Many high school graduates -- 90 percent of whom attended government-operated public schools -- lack the skills needed in today's knowledge-intensive workplace. Further, many students fail to graduate. (The dropout rate in California is 32 percent overall, and 45 percent for immigrants.) Parents and educators have long recognized the shortcomings of the public school system, but their efforts to reform it have failed. Are school vouchers and charter schools the answer? What about teacher-owned schools? What other reforms might make schools more innovative and accountable to parents? Please join us as education experts RICHARD VEDDER and JOHN MERRIFIELD examine new strategies for achieving educational excellence.

SPEAKERS:

-- RICHARD VEDDER, Senior Fellow, The Independent Institute; Professor of Economics, Ohio University; author, CAN TEACHERS OWN THEIR OWN SCHOOLS?

-- JOHN MERRIFIELD, Senior Research Associate; The Education Policy Institute; Professor of Economics, University of Texas, San Antonio; author, THE SCHOOL CHOICE WARS

WHEN: Thursday, July 5, 2001 Reception and book signing: 6:30 p.m. Program: 7:00 - 8:30 p.m.

WHERE: The Independent Institute Conference Center 100 Swan Way Oakland, CA 94621-1428 For a map and directions, see http://www.independent.org/tii/tii_info/about.html#map

TICKETS: \$30.00 per person: includes one copy of Richard Vedder's book, CAN TEACHERS OWN THEIR OWN SCHOOLS?, OR John Merrifield's book, THE SCHOOL CHOICE WARS, OR admission without a book is \$10 per person (\$7 for Independent Institute Associate Members)

Praise for Richard Vedder's book, CAN TEACHERS OWN THEIR OWN SCHOOLS?

"Vedder suggests for-profit schools owned and operated by teachers and school administrators would offer a promising alternative to the present public school system." -- SCHOOL REFORM NEWS

"Nobody yet has found a foolproof formula for revitalizing American K-12 education. So let's be humble enough -- and empirical enough -- to try as many tantalizing approaches as we can. In that spirit, I commend Richard Vedder's pioneering ideas." -- CHESTER E. FINN, JR., former Assistant Secretary, U.S. Department of Education

For more information about CAN TEACHERS OWN THEIR OWN SCHOOLS? see http://independent.org/tii/catalog_pr/policy_schools.html.

Praise for John Merrifield's book, THE SCHOOL CHOICE WARS

"Professor Merrifield asks this question: what is meant by and what is the intended consequence of reforms bearing such labels as vouchers, school choice, charter schools, privatization, and competition? This book brilliantly and clearly exposes the superficiality and extraordinary fuzziness of those labels." -- SEYMOUR B. SARASON, author, CHARTER SCHOOLS: Another Flawed Educational Reform?

Thursday, September 13, 2001 TODAY'S CFOs ON THE MOVE Assessing the Human Toll

By CFO Staff

Though Tuesday's events touched almost every American, some in the US business community were hit especially hard by the loss of friends and colleagues. At least two CFOs were killed in the terrorist attacks.

Waltham, Mass.-based E-business software maker Netegrity Inc. reported that CFO James Hayden was a passenger on the United Airlines Flight 175 that crashed into the World Trade Center Tuesday morning. Hayden, 47, was credited with helping Netegrity become one of the more highly valued companies in the tech industry. He is survived by his wife and two children. Netegrity plans to start a memorial fund in his name.

MRV Communications Inc. lost CFO and vice president of finance and administration Edmund Glazer, who was aboard the Los Angeles-bound American Airlines Flight 11, which crashed into the other tower of the WTO. Glazer is survived by his wife and young son.

In other CFO news, Jack Nichols III joined Atlanta-based startup Incanta Inc. as CFO. Incanta makes streamlining applications for broadband providers. Nichols joins Incanta from NetSchools, an E-learning company. Incanta is a venture-backed company started in 1999.

Officials at Palo Alto, Calif.-based biopharmaceutical company XenoPort Inc. appointed William Harris CFO. Harris joins the startup from Coulter Pharmaceuticals Inc., where he was CFO until Coulter's acquisition by Corixa Corp. in December 2000.

Wood Ruling on Retroactivity Issues - IMPORTANT

Sender	douglass@energyattorney.com
Recipients	['johnson.tamara@enron.com', 'susan.mara@enron.com', 'sandler.vicki@enron.com']
File	dasovich-j/inbox/778.

Commissioner Wood is not letting go of the retroactive direct access suspension issue. Attached for your information is a ruling issued Tuesday which calls for parties to file comments by November 2 (and reply comments on November 8) on the following questions:

It is noted that statistics from the utilities' monthly filings (see attached Appendix A)[1] show that commencing on or about July 1, 2001, there has been an increase in customers switching to direct access. This information further highlights the concerns about cost-shifting and the need to minimize the significant impacts to bundled electric customers who will likely be left with more costs.[2] These cost-shifting issues are part of the Commission's consideration in determining whether there should be an earlier suspension date and what this date should be.

Accordingly, in this Assigned Commissioner's Ruling, the following issues are presented for comment by interested parties:

1. Why should or shouldn't the Commission choose an earlier date (than after September 20, 2001) for suspending the right to acquire direct access service?
2. If the Commission should choose an earlier date, why should or shouldn't the Commission consider the July 1, 2001 suspension as set forth in the June 15 and August 27 Draft Decisions of ALJ Barnett? If not July 1, 2001, what other date or dates should the Commission consider and why?
3. Are there alternatives to suspending direct access as of a date before September 20, 2001, that would still alleviate cost-shifting problems? What are the pros and cons of these alternatives? Can the Commission adopt any such proposed alternative without new legislation?
4. What effect, if any, should be given to renewals of contracts originally entered into prior to the effective date of the Commission's suspension of direct access?
5. What effect, if any, should be given to provisions in contracts ("add-on provisions") that allow the buyer to add more facilities to be served after the date on which direct access is suspended?
6. Are there any other types of contract provisions that the Commission should consider in terms of applying the suspension as set forth in D.01-09-060 or the Commission's consideration of an early suspension date?
7. If any party has in its possession any of the following, please provide:
 - a. Copies of various types of contracts executed or agreements entered into between electric service providers and direct access customers.[3]
 - b. Copies of various types of contracts or agreements offered but not executed or entered into between electric service providers and direct access customers.[4]
 - c. Copies of blank direct access contracts, not otherwise provided in 7a or 7b.
8. For electric service providers:
 - a. How many contracts have you executed or entered into with direct access customers between January 17, 2001 and September 20, 2001? How much load is contracted for in each of these contracts? Please provide the information by dates of execution.
 - b. What percentage of your total direct access contracts contains any renewal provision? What percentage of your total direct access contracts contains any add-on provision?

[1] The information contained in Appendix A is taken from Statewide Summaries in the Direct Access Implementation Activities Reports from January 15, 2001 to October 15, 2001, that is publicly available on the CPUC website. The summaries were produced from information filed by the utilities on a monthly basis. (See Opinion Extending Certain Monthly Reporting Requirements [D.00-12-036] (2000) ___ Cal.P.U.C.2d ___.)

[2] The general magnitude of potential cost shifting can be seen by referring to DWR's most recent revenue requirement draft submission, dated October 19, 2001, of which official notice is taken. The revenue requirement from ratepayers contained in DWR's most recent submission is \$10.189 billion for the twenty-four calendar months of 2001 and 2002.

[3] Information about the customer (e.g., name, address, etc.) and pricing may be redacted from these copies. Date of execution or signing should not be redacted.

[4] Information about the customer (e.g., name, address, etc.) and pricing may be redacted from these copies. Any information regarding the dates of the offer should not be redacted.

Finally, Wood says that it is his, "current plan that a decision regarding the above will be issued based on the written comments filed by the parties. If any party believes that an evidentiary hearing is needed, it must make such a request in its comments. The requesting party must set forth in detail what material factual issues are in dispute, why those facts are material, and what evidence would be presented in an evidentiary hearing on such issues."

Indian Official in Enron Talks Retracts Resignation (Update5) Bloomberg, 05/23/01

INDIA: UPDATE 1-India state panel head to resume Enron talks.

05/23/2001 Reuters English News Service (C) Reuters Limited 2001.

BOMBAY, May 23 (Reuters) - India's Maharashtra state averted a crisis on Wednesday when it persuaded the head of a panel renegotiating U.S. energy giant Enron's troubled Dabhol power project to remain in his job. Madhav Godbole, who quit earlier on Wednesday, said he was returning after the state cabinet unanimously rejected his offer to resign. "They have bestowed confidence in me," he told Reuters. Godbole's resignation over remarks made against him by a senior

politician had created a stir and looked likely to derail efforts to resolve a raging row between Houston-based Enron Corp. and the Maharashtra State Electricity Board (MSEB). Enron's \$2.9 billion project in the western state of Maharashtra is widely seen as a test case for India's plans to privatise its power sector. Godbole was heading a committee to renegotiate the contract between Dabhol Power Company (DPC), owned 65 percent by Enron, and state utility Maharashtra State Electricity Board (MSEB), which has been embroiled in dispute for over six months. The dispute was sparked off last month when MSEB began defaulting on monthly payments to DPC, which is building the 2,184 megawatts power plant in the state. The first phase of 740 MW of the project is already up and running, while the second phase of 1,444 MW is slated to be completed next month. After months of wrangling over a payments dispute with the cash-strapped state electricity board, DPC last Saturday issued a preliminary notice to terminate its contract to sell power to the utility. Dabhol's termination notice was widely seen as a first step by Enron to pull out of the power project. MSEB is planning to retaliate by imposing a fine of four billion rupees (\$85.16 million) on the power firm. Godhole was appointed last month to resolve this dispute. The next meeting of the committee, which was due to meet with DPC officials on Wednesday, may be held next Tuesday, he said. Meanwhile, a senior banker told Reuters that local lenders to DPC were planning to seek the help of the federal government in ensuring that foreign lenders did not invoke guarantees that they have issued. The Business Standard newspaper said the losses of the local lenders would amount to nearly 30 billion rupees if the guarantees were invoked. (\$1=46.97 Indian rupees).

Dutch NMa To Decide On Import Capacity Complaints By Sept

05/23/2001 Dow Jones International News (Copyright (c) 2001, Dow Jones & Company, Inc.)

AMSTERDAM -(Dow Jones)- Dutch competition authority NMa doesn't expect to reach a decision on complaints filed by several large market parties on the way cross-border electricity transportation capacity is allocated before the end of August, a commission on the subject said Wednesday during a hearing. The commission needs to hear the response to these complaints from Sep, or Nea, as the umbrella association for Dutch electricity generators is now called, before it can make a decision on the matter. A representative of Nea said the organization couldn't respond on Wednesday as it "needs more time to prepare." Several large parties in the Dutch energy market Wednesday appeared before the commission to elaborate on previously submitted complaints on the way cross-border electricity transport capacity is currently allocated. The complaints heard by the commission showed grave concerns that existing mechanisms are driving up electricity prices and hampering the development of a free market instead of fostering it, as the Dutch government had aimed to do. At the hearing in The Hague, Cecile Gommans of the antitrust regulator NMa, who heads the committee on the subject, said complaints focus on the privileged position Nea members have in the allocation of import capacity and the rules for the auctions through which the remaining capacity is distributed in the markets. Three out of the four Nea members are owned by German and Belgian companies who control the interconnectors on the other side of the Dutch border. As such, half of the proceeds from such auctions accrue to the parent companies of the Nea members. Of the 3,900 megawatts of total import capacity available, over 900 MW are reserved for Nea. Other participants for whom the capacity available to them is therefore limited feel the market mechanism has failed to deliver access to imported power on equal terms. The complaints on the way auctions of import capacity are conducted are mostly on entering conditions for parties who want to bid. Smaller parties feel rigid rules for that are practically excluding them from the auctions. The capacity auctions are held by the TenneT Auction Office, a wholly-owned subsidiary of Dutch grid operator TenneT. The complaints submitted NMa include those from Enron Corp. (ENE), Dutch energy intensive consumer group VEMW and Dutch chemicals industry association VNCI. After Nea's response, which is scheduled for mid-June, the NMa expects to decide on the complaints "within 10 weeks", Gommans said. -By Arent Jan Hesselink, Dow Jones Newswires, 0031 20 6260770, arentjan.hesselink@dowjones.com -0- 23/05/01 14-27G

Michael Capellas, John Mendelsohn, MD, & Jeffrey Skilling to Speak at Houston Technology Forum May 29

05/23/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

Prominent Business Leaders to Discuss Technology Trends Affecting Houston's Future HOUSTON, May 23 /PRNewswire/ -- Houston Technology Center (HTC) announced today that Michael Capellas, chairman and CEO of Compaq; John Mendelsohn, MD, president of University of Texas M. D. Anderson Cancer Center; and Jeffrey Skilling,

president and CEO of ENRON, will be the featured speakers at the Houston Technology Forum moderated by Lloyd Bentsen III, chairman of HTC, and scheduled for May 29, from 10:45 a.m. - 1:30 p.m., at the Hyatt Regency Houston. The event is being presented by HTC in conjunction with the American Marketing Association (AMA) and the Business Marketing Association (BMA). "We are very fortunate to have four such outstanding speakers at this premier technology event," said Paul Frison, president and CEO of HTC. "Anyone involved in Houston's key technology sectors -- energy, information technology, life sciences and NASA-originated technologies -- will greatly benefit from their knowledge." The speakers will address the present and future technology trends in their respective industries and in Houston overall. They will also participate in a panel discussion during the Q&A segment of the forum. The Houston Technology Forum is one of Houston's premier technology events. The forum provides participants with the opportunity to listen to industry experts and network with over 1,000 leaders of Houston's business community. The Houston Technology Forum is being underwritten by the following sponsors: Visionary Arthur Andersen LLP www.andersen.com BLUE LANCE www.bluelance.com Compaq www.compaq.com COMSYS

Job candidates for Enron

Sender	borenste@haas.berkeley.edu
Recipients	['jimb@ieor.berkeley.edu', 'jeff.dasovich@enron.com']
File	dasovich-j/inbox/916.

Hi Jeff:

I'm not sure if hiring is an issue these days for you, but I wanted to let you know that Jim Bushnell and I will be again teaching a course at Berkeley this spring called "Energy Market Strategies and Policies." The course is cross-listed between the Haas School of Business and the Energy & Resources Group (ERG) at UC Berkeley.

The course is currently limited to 42 students, but it is already over-subscribed, so we are trying to move it to a larger classroom. We'll have mostly MBA students from Haas, but also about a dozen masters students from ERG. There are also usually at least a few PhD students. The students in the class are were very smart -- many of them already have experience in the energy industries -- and we believe the course puts them in a position to immediately contribute to any energy-related organization that they would join. You can see a copy of last year's course syllabus at <http://www.haas.berkeley.edu/~borenste/EnergyMarketsSyllabus.pdf>

Many of these students are interested in either summer or permanent employment starting as early as May. If you have openings that you would like to advertise to these students, please let me know. We will be setting up a webpage with job announcements in energy-related organizations. If you send me a job description (or the URL for it), I can add it to the webpage.

Talk to you soon, Severin

Severin Borenstein

Follow up conference call**Sender** wanda.curry@enron.com**Recipients** ['harry.kingerski@enron.com', 'robert.williams@enron.com']**File** dasovich-j/all_documents/11965.

I have sent Janet Covington the participant list as requested per her e-mail below. She has agreed to set up the conference call for Thursday, May 3rd at 3 PM central time. Please reserve this time. I will forward each of you the spreadsheet we receive from them today. I will let you know if I think we should get together to review the spreadsheet prior to the call.

Thanks,

Wanda Curry ----- Forwarded by Wanda Curry/HOU/EES on 05/02/2001 09:58 AM -----

Diann Huddleson 05/02/2001 08:01 AM To: Wanda Curry/HOU/EES@EES cc: Subject: Follow up conference call

Wanda, I spoke with Janet after you forwarded her voice mail. I told her we would provide the participant list this morning. Let me know if you want me to do that.

----- Forwarded by Diann Huddleson/HOU/EES on 05/02/2001

08:00 AM -----

Janet.Covington@sce.com on 05/01/2001 03:46:06 PM To: dhuddles@enron.com cc: Subject: Follow up conference call

Hi Diann,

I just left a phone message for Wanda as I didn't have her email and was supposed to coordinate the follow up call with her. Anyway, we are still working on preparing the account examples demonstrating the change in methodology and should have those to you by tomorrow. In the meantime, I wanted to go ahead and arrange the follow up call for this Thursday 5/3 at 1pm PST. That would be 3pm your time. Can you please let me know the email addresses for your participants so I can get a notice out to them.

I had yourself, Wanda Curry, Evan Hughes, Jeff Dodson, Bob Williams, Jim Doth, and Martin Curtilan? Not sure of the spelling. Please let me know so I can send out the meeting notice out with the call in details.

Thanks Much.

Speaker Hertzberg Names Committee To Handle Energy Crisis. Members Will Organize Statewide Public Hearings, Examine Financial Practices and Craft Policy.

SACRAMENTO - Working quickly to address the state's energy crisis, Assembly Speaker Robert M. Hertzberg (D-Van Nuys) and Assembly Minority Leader Bill Campbell (R-Villa Park) announced today the formation of a new committee that will hold public hearings across the state, shape legislation and probe financial practices among utilities and generators.

"The public deserves to know what went wrong. They deserve to know where the money went. They deserve answers, and we are going to get them," Speaker Hertzberg said. "In addition, members of the committee will hold hearings around the state to assess the impact of this crisis in every region of California."

"I applaud the Speaker's decision to form a special committee to address the energy crisis," said Minority Leader Campbell (R-Villa Park). "He has indicated a desire to make the committee bi-partisan and Republicans look forward to working cooperatively to resolve the significant energy crisis that California faces."

Aside from shaping the state's energy policy during the special session, the Assembly Committee on Energy Costs and Availability will hold public hearings across the state, seeking comment from ratepayers, small-business owners and

consumers on how the energy crunch is affecting them.

"This committee's first priority regarding the setting of rates for electric power will be price stability," said Assemblymember Roderick D. Wright (D-South Central Los Angeles), who Speaker Hertzberg named as Chairman of the Assembly Committee on Energy Costs and Availability. "This deregulation experiment has been risky and expensive, and has put the economic well-being of this state in jeopardy."

The committee will work with the staff of the Speaker's Office of Oversight to determine how utility companies have spent the money they received for their stranded costs, and what generators have done with their dramatic influx of cash.

"The public has a right to know where that money has gone," said Assemblymember Darrell Steinburg. "We will conduct a thorough investigation to determine just that."

The Speaker noted that David Wiggs, who helped restructure the Los Angeles Department of Water and Power in 1997, has been retained as an advisor to the committee. Wiggs will help the committee sort through market reforms and oversight of past utility spending. Wiggs is a retired chairman of El Paso Electric Co. and an experienced advisor for issues related to the electric utility industry. He is largely credited for leading El Paso Electric through a multi-year bankruptcy proceeding.

"There is no doubt that the state's consumers are faced with the most serious energy crisis in decades," said Assembly Speaker pro Tem Fred Keeley (D- Boulder Creek). "We are focused on market reforms, demand responsiveness measures and measures to stabilize the energy supplies. Consumers will only genuinely be protected from increasing energy prices when substantive reforms of the market place are adopted and take hold. Specifically we must, through legislative and regulatory actions, reform the way electricity is bought and sold and the way we contract for power on a long-term basis."

Speaker Hertzberg named the following additional members to the new committee:

Assemblymember Anthony Pescetti (R-Rancho Cordova) (Vice-chair) Assembly Speaker pro Tem Fred Keeley (D-Boulder Creek) Assemblymember Darrell Steinberg (D-Sacramento) Assemblymember Juan Vargas (D-National City) Assemblymember Jenny Oropeza (D-Long Beach) As

The=20 general fund was first tapped, then a short-term loan allowed the purchasin= g=20 to continue.? Now the state needs to issue \$13.4 billion in bonds authorize= d=20 in SBX1 31 (Burton D-San Francisco), to be paid back by utility ratepayers= =20 for more than a decade.=20

On July 12 the CPUC must decide how much of utility rates should be siphone= d=20 off to pay off the bonds and the ongoing costs of power being purchased on= =20 the spot market and under short and long term power contracts signed by DWR= .=20 This =01&dedicated revenue stream=018 (DRS) will be based on the latest ana= lysis by=20 utility and administration financial experts. The big question is whether= =20 current rates are high enough to cover all utility generation costs (nuclea= r,=20 qualifying facilities, hydro, etc.), DWR power costs, and all the other=20 elements of rates

(public purpose charges, transmission and distribution, etc.). Many assumptions about the spot market, the effects of the FERC price mitigation order and the level of customer demand enter into the calculation of the DRS. Wholesale spot prices have recently dropped, but there still could be a shortfall that would need to be made up in higher rates or with more borrowing to push off repayment to the future.

In related news, last week the CPUC nearly ordered the suspension of direct access in order to ensure that customers would not be able to leave utility service and thus escape the payment of bond and DWR power costs. Customer groups were able to persuade regulators to put off the decision pending legislation that could clarify a direct access customer's obligation to pay a fair share of these costs. To that end, ABX2 10 (Hertzberg D-Van Nuys) is being amended to make the bonds secured by the DRS rather than DWR contracts, thus creating more regulatory flexibility regarding the terms of direct access, and SBX2 27 (Bowen D-Marina del Rey) and ABX2 42 (Kelley R-Idyllwild) are the competing vehicles for how exit fees should be calculated.

LOCKYER CONVENES NEW GRAND JURY ON ALLEGED PRICE GOUGING

California Attorney General Bill Lockyer appointed 19 new members to a Sacramento County Grand Jury this week to consider the growing volume of evidence from both sides on the continuing investigations of alleged price gouging by power generators. The Grand Jury to be convened later this week will be issuing subpoenas for testimony and documents and is expected to be impaneled for several months.

In a related development, Lt. Governor Cruz Bustamante and Assemblywoman Barbara Matthews reportedly will introduce two new whistleblower acts to the state capitol on Thursday from a San Diego power plant. Recent testimony from three employees before a legislative committee investigating charges of wrongdoing on the part of a San Diego power plant claimed their employer, Duke Energy, manipulated the supply of electricity from the plant to increase the company's profits. In response, generators have produced documents showing they were simply following the direction from the State Independent System Operator to modify their electricity output.

WINDFALL PROFITS TAX LEGISLATION TO BE CONSIDERED

SBX2 1 (Soto D-Pomona) would impose a windfall profits tax on electrical power generators and is scheduled for hearing on Monday, July 9th in the Assembly Revenue and Taxation Committee. CMTA opposes the bill.

SBX2 1 pertains to all types of electricity generation including co-generation produced and sold by manufacturers and generation by other qualified facilities such as bio-mass and solar plants. It causes the excess profit to be confiscated by the state from a middleman in the supply chain: a 100% tax. This revenue is then distributed to individual taxpayer but not to business taxpayers (who paid the middleman the excess in the first place).

The bill is a state-imposed price cap. Excess profit is defined as anything exceeding a cost-based rate established by the PUC on a plant-by-plant basis. If enacted, SBX2 1 would have almost no effect on merchant generators, as most of them have entered into contracts with the state that pass on the cost of any increased taxes to the state. Furthermore, this legislation would violate federal law which preempts state law in this area. In accordance with the 1979 federal law, the PUC has set the price at which co-generators and other QFs can sell their energy. It is the cost that the utility would have charged had it performed the sale. This formula was devised to encourage manufacturers to build on-site generation and sell excess power for public use. This formula did not guarantee a profit for such generators but gave them an incentive to build generation facilities and operate efficiently. Changing the formula would result in manufacturers refusing to build more generation facilities and increased litigation costs until the courts wipe away SBX2 1 (Soto).

LIABILITY FOR ELECTRICAL NON-GENERATION

CMTA strongly opposed ABX2 51 (Reyes D-Fresno) which would make any retail or wholesale operator of an electric generation facility strictly liable for any damages proximately caused by that generator's reduction or discontinuance of service for economic reasons.

Neither negligence nor intent must be proven in order to establish strict liability. Under this legislation, a generator could be held strictly liable for damages that resulted if electricity supplies were curtailed when the generator was temporarily shut down to perform routine maintenance, unscheduled maintenance or due to other external

business factors (i.e. the= =20 high cost of fuel).? ABX2 51 also would make it difficult for a generator t= o=20 permanently close a facility, even if the facility was not operating=20 profitably.=20

Generators are only one component of many that work together to provide=20 reliable electricity supplies throughout the State.? However, ABX2 51 would= =20 result in generators shouldering the responsibility for all damages,=20 liability and responsibility for electricity shortages.=20

Amendments were taken to remove co-generation from the bill.? However, CMTA= =20 will continue to oppose the measure on the principal that imposing strict= =20 liability on generators will only discourage generators from siting new=20 facilities and selling their electricity within the State.=20

The measure passed from the Assembly Judiciary Committee on July 2 and next= =20 will be heard in the Assembly Energy Costs and Availability Committee. ?=20

STREAMLINING THE PIPELINE PERMITTING PROCESS=20

The CMTA is supporting ABX2 47 (Diaz D-San Jose) which would increase the= =20 financial threshold necessary to obtain a Public Utilities Commission (PUC)= =20 Certificate of Public Convenience and Necessity (CPCN) from \$50 million to= =20 \$100 million.? Increasing this threshold will allow for expedited=20 construction of new natural gas pipelines and will help to shore up the=20 infrastructure needed to increase the State's natural gas capacity.

The measu

STATES NEW JERSEY -- Bill sets market share test for promoting local competition INDIANA -- URC to investigate Ameritech service quality MISSOURI -- Bill targets Web sites that force computers to dial long distance numbers MONTANA -- Committee OKs Uniform Electronic Transactions Act INDIANA -- URC gives interim approval to parts of Ameritech UNE tariff CALIFORNIA -- PUC approves interim performance assessment plan OREGON -- PUC wants contested cases to go to state appeals court MONTANA -- Senate passes bill keeping '911' fund interest 'in the system' INDIANA -- URC seeks comment on scope of UNE proceeding ARKANSAS -- Rep. Hunt seeks to clarify computer crime law OHIO -- PUC to hold hearings on '614' area code relief proposals

SECTION 251/252 NEW JERSEY Bill sets market share test for promoting local competition

Sen. Robert W. Singer (R., District 30) has introduced SB 1522 to "establish conditions necessary for genuine competition to develop in the local exchange telephone market." The measure lays out standards and procedures that would apply to each incumbent local exchange carrier (ILEC) until its market share in its local service territory declined to 50% or below.

The Board of Public Utilities would have to hold a "cost-of-service" hearing within 45 days of the law's effective date to determine an ILEC's actual service costs, including costs of providing unbundled network elements to competitors. In analyzing costs, the BPU would have to use "parameters consistent with those established by the FCC."

The BPU would have to hold subsequent cost-of-service hearings every two years to provide for appropriate rate adjustments. After each hearing, the ILECs would have to file new rate tariffs with the BPU to reflect "actual costs of service, plus an authorized rate of return up to a maximum of 10%." The bill includes provisions to make sure "ILECs offer to lease network elements to competing local exchange carriers [CLECs]" and "otherwise conduct their business in nondiscriminatory ways with regard to CLECs."

"Immediately following" the law's effective date, the BPU would have to order full testing of the ILEC's operations support systems (OSSs). The board couldn't certify an OSS as functional unless the testing "unequivocally" demonstrated that it

met the same standards as required for systems used for switched interexchange service. The OSS would have to pass a 90-day commercial availability test before certification.

After the initial hearing, switched access rates would have to be reduced to cost. Unless cost data supported higher rates, the BPU would have to set access rates at no higher than \$.008 per minute for local switching charges and \$.00175 per minute for originating and terminating nontraffic-sensitive switched usage rates.

Another provision of the bill deems local calls to Internet service provider to be "local call[s] for reciprocal compensation purposes."

The bill aims to protect consumers by directing the BPU to establish a universal service fund (USF) that would be funded by all telephone service providers. The USF would provide discounted service for eligible schools and libraries and provide support for service in high-cost areas. The measure would require creation of a Lifeline service program.

The BPU would have to develop comprehensive performance standards, reporting requirements, service quality measurements, and enforcement mechanisms to ensure that service isn't degraded, and competitors aren't disadvantaged in the competitive marketplace.

SB 1522 has been referred to the Commerce Committee. An identical version (AB 3122) sponsored by Assemblywoman Rose Marie Heck (R., District 38) has been introduced in the Assembly. The text of SB 1522 is available at http://www.njleg.state.nj.us/2000/Bills/s2000/1522_i1.htm.

CUSTOMER-AFFECTING INDIANA URC to investigate Ameritech service quality

The Utility Regulatory Commission yesterday opened a formal investigation of Ameritech-Indiana's service quality. The commission acknowledged that the company's service quality has improved during the last few months but said it's concerned that during 2000 the company didn't meet service quality standards required by law. The URC said its investigation will require Ameritech to "convince the commission why enforcement action should not be taken."

According to the URC, Ameritech doesn't comply with the state law requirement to restore all service outages within 24 hours of the time they're reported. (170 IAC 7-1.1-11(E)(1)) Ameritech managed to comply with the requirement just 85.3% of the time during the first quarter of 2000, 81.4% of the time during the second quarter, and 66.2% during the third quarter.

The URC said Ameritech's performance falls short of compliance with the state law requirement that it fulfill at least 90% of all requests for new primary service in any month within 5 days. (170 IAC 7-1.1-11(A)(2)) Ameritech complied with the standard 86% of the time during first quarter 2000, 85.5% during the second quarter, and 88.6% during the third quarter.

It said Ameritech also fails to meet the standard requiring it to make all reasonable efforts to provide adequate personnel so that under normal operating conditions, at least 80% of calls to business office and repair service are answered within 20 seconds after the beginning of a ring, the URC said. Ameritech's average response to answer phone calls in 2000 ranged from a low of 62.5 seconds in January to a high of 222.7 seconds in August, it said.

INTERNET MISSOURI Bill targets Web sites that force computers to dial long distance numbers

Sen. John Loudon (R., District 7) has proposed a bill to prohibit Web site operators from causing users' computers to dial long distance numbers without informing the users. SB 70 would add a new section to Chapter 570, RSMo.

Web site operators who violated the new section could be charged with a "class A" misdemeanor if related long distance charges were \$150 or less. If the charges totaled more than \$150, the Web site operator could be charged with a "class C" felony.

SB 70 has been referred to the Civil and Criminal Jurisprudence Committee. Its text is available at <http://www.senate.state.mo.us/01info/billtext/intro/SB070.htm>.

INTERNET MONTANA Committee OKs Uniform Electronic Transactions Act

The state House Business and Labor Committee has approved a Uniform Electronic Transaction Act to prohibit anyone from denying legal effect or enforceability to a record or signature solely because it's in electronic form. (1/3/01 p.m.)

Each government agency would be able to determine whether and to what extent it would send and accept electronic records and electronic signatures. The committee amended the bill to state that government agencies wouldn't be limited to specific types of technologies.

HB 234 states that electronic signatures would be valid only if all parties agreed to conduct a transaction electronically. If a party agreed to conduct one transaction by electronic means, the party could refuse to conduct other transactions electronically. This right to opt out of electronic transactions couldn't be waived.

Secretary of State Mike Cooney (D.) is the sponsor of HB 234, which awaits consideration on the House floor.

SECTION 251/252 INDIANA URC gives interim approval to parts of Ameritech UNE tariff

The Utility Regulatory Commission yesterday gave interim approval to the terms and conditions portion of Ameritech-Indiana's proposed unbundled network element (UNE) tariff. The interim approval is subject to challenge in a formal pleading by any competitive local exchange carrier, other party to the case, or the commission's own motion to investigate a specific term or condition. The URC gave final approval, however, to the tariff

Regulatory Analysis of Peering Arrangements

Sender	wayne.gardner@enron.com
Recipients	['alisa.christensen@enron.com', 'xi.xi@enron.com', 'beth.wapner@enron.com']
File	dasovich-j/all_documents/8242.

Xi Xi, Thank you for your note. The reason that regulatory, legal, and tax need to analyze peering arrangements is that it appears that EBS may use such arrangements to effectively provision IP transport and IP transit obligations (see attached note from Gunnar Frey).

Do you believe what Gunnar contemplates in his note falls within the definition of a peering arrangement set forth in your note?

I think the basic questions are best framed in concrete terms:

If a US customer with an office in Sao Paulo were to pay EBS, Inc., to provide IP transport from Sao Paulo to the US, would EBS Inc. be required to establish a Brazilian entity with a Brazilian telecom license to provide the IP transport?

If the answer to the foregoing question is yes, would it matter whether the IP transport were provisioned through the purchase of private line capacity from Sao Paulo to Miami or via the peering arrangement described below with Impsat?

If the answer to the foregoing question is no, would EBS' licensed Brazilian entity have to be a party to the Impsat peering arrangement?

Regards,

Wayne,

You may have surmised this already but for the BMC Sao Paulo E-1 I am planning to use Impsat Fiber Network. I wrote you about this company at the end of November and proposed this scenario. I think last time we spoke you said you thought we should be able to do this without creating a foreign entity or tax liability. Is that still true. Thanks,

Wayne,

Arshak and I have been working to reach an agreement with Impsat Fiber Networks. Impsat has an extensive network in 8 countries in Latin America as well as a pop in Miami. We have been discussing a peering/transit agreement whereby one of our customers could connect to an Impsat port in Latin America for IP transit to the EIN. As we envision this now, we would swap Impsat a dedicated 45mbps port to our network for one into their network. The connection between the two networks will take place in Miami. If an EBS customer wanted IP capacity back to the US they could connect to any Impsat port in Latin America. The customer would pay Impsat a port connection fee at every point where they connected to Impsat in Latin America. EBS's customer would pay EBS USA for the capacity (e.g. 8 mbps).

The reverse would be true for an Impsat customer in the US. The Impsat customer could connect to an EIN port for a fee that would be paid directly to EBS but any charges for capacity would be paid to Impsat. The Impsat customer could use the EIN for transport between EBS pops and an EBS customer could have transit between Impsat's pops. We would expect the EBS customer's Latin America requirement to be part of a larger VBN deal with components in the US and, possibly, other continents.

Would this scenario create a tax liability for EBS in Latin America? Impsat is incorporated in Delaware and trades on the NASDAQ. Their hqs are in Argentina. I welcome anyone's comments. Thanks,

Wayne,

This my response to your question.

What is the regulatory analysis of peering arrangements?

Peering is an act of establishing a relationship to pass Internet traffic between one national internet backbone provider to another national provider. Peering is currently not subject to any industry-specific regulations and is governed by commercial requirements. The reason that peering is not regulated by Federal Communications Commission or any other agency is mainly due to two factors:

1) data traffic has not been subjected to the same stringent regulation as voice traffic

2) history of Internet -- Since it was the National Science Foundation (NSF) who founded the first backbone to encourage the exchange of information between different scientists and researchers, the open environment for peering was essential to the rapid growth of the Internet. Currently, most of the Internet traffic is exchanged through private pooling instead of the public Network Access Point (NAP). With private peering, traffic can be exchanged in the same city, which avoids the

classic syndrome in which traffic that originates and terminates in Houston would have to travel through NY or even India.

Please note that peering is not to be confused with Interconnection in the PSTN, which are very cumbersome and expensive.

May I also ask for what reason are you bringing up the topic of peering, is there a deal involving this topic ?

Please let me know if you have any questions.

Xi Xi

Fitch Places Marlin Water Trust II & Osprey Trust I on Rtg Watch 2001-10-26 15:00 (New York)

Fitch Places Marlin Water Trust II & Osprey Trust I on Rtg Watch Neg

Fitch-NY-October 26, 2001: Fitch has placed the ratings of Marlin Water Trust II's (Marlin II's) approximately \$915 million senior secured notes due 2003, and Osprey Trust's (Osprey's) approximately \$2.4 billion senior secured notes due 2003 on Rating Watch Negative. The Marlin II notes and the Osprey notes are currently rated 'BBB'. This rating action follows the placing of Enron Corp.'s ratings on Rating Watch Negative by Fitch.

The rating of the Marlin II notes is supported by an overfund account (pre-funded interest) and equity commitment from Enron in the form of mandatorily convertible preferred stock. The overfund account is invested in Enron debt securities (rated 'BBB+', Rating Watch Negative), with payments used to service interest to noteholders. Payment of principal ultimately relies on Enron's obligation to remarket mandatorily convertible preferred securities. Fitch currently rates

Enron's preferred securities 'BBB-', Rating Watch Negative. In addition, the transaction also benefits from rights under a \$125 million loan to Azurix Europe Limited, rated 'BBB+' by Fitch.

Similarly, the rating of the Osprey I notes is based on the support from the assets in the share trust used to support interest payments and an equity commitment from Enron to remarket mandatorily convertible preferred stock to fund principal payments. The mandatorily convertible preferred stock has been issued and is being held in the share trust. The assets in the share trust supporting interest payments include Enron unsecured obligations (the overfund account) as well as quarterly dividend payments on the mandatorily convertible preferred stock.

While various sources of repayment exist, such as sale or liquidation of the underlying assets or an equity offering, in each case primary credit support is derived from the Enron obligation to remarket mandatorily convertible preferred stock if an amount sufficient to repay the notes has not been deposited with the trustee the 120-day prior to the maturity date, which is one of the Note Trigger Events. In the event that the issuance of the preferred stock yields less than the amount required to redeem the senior notes, Enron is required to deliver additional shares. If Enron cannot or does not deliver on this obligation, subject to certain standstill periods, then the amount of the deficiency becomes a payment obligation of Enron, representing a general unsecured claim. Additional Note Trigger Events include a downgrade of Enron's senior unsecured debt below investment grade by any of the major rating agencies in conjunction with specified declines in Enron's closing stock price over three consecutive trading days, as well as customary events of default under the notes. It is important to note that Enron has not verified that the underlying assets have adequate market value to fully pay down the associated debt.

Fitch will continue to monitor these transactions in conjunction with the ratings of Enron, Corp. and will update investors as appropriate.

Enron's Debt Falls As Company Draws Down On Bank Loans

10/26/2001 Capital Markets Report (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW YORK -(Dow Jones)- Enron Corp.'s (ENE) bond and bank debt was quoted lower early Friday following the Houston energy giant's decision Thursday to draw down about \$3 billion on its bank loan facilities. Late Thursday, Enron said it had taken action to dispel uncertainty in the financial community. Specifically, the company said it drew on its committed lines of credit to provide cash liquidity in excess of \$1 billion. Enron's 6.4% bonds which come due in July 2006 were hovering just below 80 cents on the dollar, down from around 82 cents on Thursday. Trading activity in investment-grade bank debt like that of Enron's isn't as active as the market for leveraged loans made to companies with less than investment-grade ratings. But fixed-income sources noted some offers Friday for Enron's bank debt at around 94 cents on the dollar, still well-above distressed levels. They add that banks may want to try to sell Enron's bank debt, which is now funded following the drawdown, but at a coupon that was negotiated several months ago. That was well before Enron ran into its current market turmoil. Last week, the company reported a \$618 million third quarter loss and \$1.2 billion reduction in shareholder equity. The company has said that the Securities and Exchange Commission is conducting an inquiry into transactions it did with Andrew S. Fastow, its former chief financial officer who was replaced on Wednesday. Moody's Investors Service rates Enron's senior unsecured debt at Baa1, though it's on review for a possible downgrade. Fitch Inc. and Standard & Poor's both rate the debt triple-B-plus. Fitch also has Enron's debt on review for a possible downgrade, while S&P changed Enron's credit outlook to negative from stable. Enron's stock was trading at around \$15.87, down 48 cents at around 12.20 p.m. EDT. Among the Enron bank debt that comes due in May 2002 is a \$1.75 billion 364-day commercial paper backstop facility. The company also has a \$1.25 billion revolving facility that's due in April 2005, according to Loan Pricing Corp. in New York. One distressed debt investor said some of the bank debt comes with a low coupon of around 55 basis points over the London Interbank Offered Rate. Banks, the investor said, "are funding it and not getting paid for the risk at Libor plus 55, even though it comes due in May '02," the investor said. Another fixed-income official said that trading desks may start to kick the tires on Enron's bank debt, given the run of fallen angels, or investment-grade companies that have been downgraded to below investment-grade status, within the last year. Among such companies are Lucent Technologies Inc. (LU) and Xerox Corp. (XRX) "As soon as banks have a piece of paper they never expected to be funded, it really changes their perception and some just want to get this stuff off their books," this person said. Some banks, though, may not be active seller of Enron's debt given that banks' business with big investment-grade companies is relationship-driven. "Banks are not very quick to pull out of a relationship like that," the fixed income official said.

Thursday, October 25, 2001 Circuit Breaker: Enron Dumps CFO Amid Conflict Questions

By Stephen Taub

Enron Corp. is set to replace CFO Andrew Fastow. As CFO.com reported in a story earlier this week, Fastow's role in a limited partnership has raised concerns about a conflict of interest.

Fastow is succeeded by Jeff McMahon, who had been serving as chairman and CEO of Enron's Industrial Markets group. From 1998 to 2000, McMahon was Enron's treasurer. He resigned that post in part because he disapproved of Fastow's role in running two partnerships, according to The Wall Street Journal.

"In my continued discussions with the financial community, it became clear to me that restoring investor confidence would require us to replace Andy as CFO," said Kenneth L. Lay, Enron chairman and CEO, in a statement.

McMahon, 40, joined Enron in 1994 and spent three years in the London office as CFO for the company's European operations. Upon returning to the United States, McMahon assumed the post of EVP of finance and treasurer for Enron Corp. In 2000, he was named president and COO of Enron Net Works, where he focused on E-commerce activities.

As reported on Friday, The Wall Street Journal said a limited partnership organized by Fastow, who has been Enron's CFO since 1997, racked up millions of dollars in profits from transactions conducted with the energy company.

On Monday, Enron said the Securities and Exchange Commission requested information regarding certain related party transactions.

On October 16, Enron stunned Wall Street when it announced that it would take a \$1.01 billion after-tax charge for the September 30 quarter.

Since the announcement, Enron's share price has more than halved.

Fastow's dismissal seems to be an about-face for Enron. In a conference call Tuesday, Lay said the partnerships were fully disclosed and took steps to assure that there was no conflict as Fastow played both roles. Enron has since dissolved the partnerships.

"Obviously, the board and even the lawyers and auditors realized that there would be an apparent conflict of interest there and the board prescribed certain methods for it to be dealt with ... so Enron would never be compromised," Lay said in published accounts. "We are very concerned [at] the way Andy's character has been loosely thrown about in certain articles, as well as the company's reputation."

Predictably, on Wednesday at least two law firms - Stull, Stull & Brody and Bernstein Liebhard & Lifshitz, L.L.P. - filed class-action suits against Enron, Lay, Fastow, and Jeffrey K. Skilling, the former Enron chief executive who resigned in August.

The suits allege that the defendants issued false and misleading information that materially misstated the company's condition and prospects to the investing public. Moreover, the suits argue that the company failed to disclose material information necessary to make its prior statements not misleading.

The complaints charge that Enron issued a series of statements concerning its business, financial results, and operations which failed to disclose, among other things:

- * The company's Broadband Services Division was experiencing declining demand for bandwidth, and the company's efforts to create a trading market for bandwidth were not meeting with success, as many of the market participants were not creditworthy.
- * The company's operating results were materially overstated, since Enron failed to write down in a timely fashion the value of its investments with certain limited partnerships - the partnerships that were managed by Fastow.
- * Enron was failing to write down impaired assets on a timely basis in accordance with GAAP.

For example, the need to conform to social norms leads survey subjects to overstate their socially desirable behaviors (e.g., use of condoms) and to underreport their socially undesirable behaviors (e.g., sharing needles).

Surveys generally remind individuals of unsafe behaviors they may have practiced. However, subjects may find it difficult to remember whether or how often they have engaged in these behaviors -- either because the survey mentioned several such behaviors or because the individuals have not engaged in such behaviors often or recently. Difficulty in accessing this information leads to skewed survey responses.

Based on these findings, the authors developed new guidelines for social marketers and public health officials to increase the effectiveness of AIDS prevention campaigns.

HAAS PROGRAM ATTRACTS NON-BUSINESS STUDENTS FROM ACROSS THE US The Haas School has enrolled a group of 64 undergraduates from institutions around the globe to participate in the Business for Arts, Sciences, and Engineering (BASE) program, run by the Undergraduate Program Office. This summer's program started on July 9 and will run through August 17.

BASE is an intensive, six-week educational experience geared towards non-business majors. Now in its fourth year, the goal of BASE is to give non-business students an opportunity to learn the fundamentals of business with a stimulating mix of theory and practice. Many of the students attending BASE are from Cal and the other UC campuses, but more than half of the students come from schools outside the UC system. Stanford, Dartmouth, Brown, and the University of Toronto are among the 24 schools with students in the program.

BASE students enroll in three courses: Finance and Financial Accounting (BA 120) taught by Vic Stanton, Marketing (BA 160) taught by Trudy Kehret-Ward, and Human Resource Management (BA 150) taught by Holly Schroth. Outside the classroom, the program focuses on practical applications of knowledge -- the students take field trips to Goldman Sachs, Cisco, and Accenture. There are also career workshops and mock interviews to prepare students for the job market. ? ? For more information, please refer to the program's web site at http://haas.berkeley.edu/Undergrad/BASE_.html.

CED CREATES CUSTOM PROGRAMS FOR LOS ALAMOS NATIONAL LAB The Center for Executive Development at the Haas School delivered its first one-day custom executive program on High-Tech Marketing and Opportunity Recognition for Los Alamos National Laboratories on Monday, June 18.

"This course is part of the Management of Technology (MOT) Program's overall effort to make Haas an integral partner in new business development based on technologies developed at the Los Alamos Lab," says Drew Isaacs, executive director of MOT. Other successful aspects of this collaboration include MOT summer internships at the lab for Haas students, and a planned series of courses on business fundamentals for later this year and early next year.

This executive program was designed to provide engineers and scientists with a strategic overview of the business skills needed for successful high-tech entrepreneurship and new venture creation. The program was held in Los Alamos, New Mexico. The course, limited to 25 participants, was oversubscribed and is likely to be repeated later this year.

For information on custom executive programs at Haas, contact the Center for Executive Development at 510-642-4735, e-mail execdev@haas.berkeley.edu or visit the web site <http://www.haas.berkeley.edu/ced>.

HAAS E-MAIL IS AVAILABLE ON THE WEB Haas students, faculty, and staff can now check their Haas e-mail through any Internet browser, anywhere in the world through Haas' new WebMail service. ? To use Haas WebMail, go to <http://www.haas.berkeley.edu/HCS>, click on My Haas WebMail, and enter your user name and password. This is a pilot program for the Haas community.

FACULTY NEWS IYER WINS MARKETING SCIENCE AWARD Assistant Professor Ganesh Iyer received the prestigious John D.C. Little Award for the best paper in Marketing Science written in 2000 for his article, "Markets for Product Modification Information," Marketing Science, Vol. 19 (2000), No. 3, pp. 203-225. This was the lead article in the issue in which it appeared. Iyer's coauthor on this article was David Soberman, an assistant professor at INSEAD, France. ?

O'BRIEN JOINS THE FACULTY John O'Brien, executive director of the Master's in Financial Engineering program, has been appointed Adjunct Professor at Haas, effective July 1, 2001. O'Brien joined Haas in July 2000 to help establish the MFE Program. He has over three decades of experience in finance. He was managing director of the Client Service Group at Credit Suisse Asset Management and helped launch CSAM's entry into e-commerce. In the early 80s, he co-founded

Leland O'Brien Rubinstein Associates, Inc., with Haas finance professors Hayne Leland and Mark Rubinstein. He served as chairman and CEO there until 1997.

WPTF Friday Deliver Unto Us A Burrito

Sender	foothi19@idt.net
Recipients	[charlotte@wptf.org]
File	dasovich-j/all_documents/29372.

THE FRIDAY BURRITO "...more fun than a fortune cookie, and at least as accurate."

=01&Are those folks smoking crack?=018 he asked in an outrage. My friend, = 0l=01, Dave in Houston, has trouble understanding the workings of our power business here in California. In fact, so do I. Yesterday=01,s Joint Senate/Assembly Committee on Energy and Natural Resources did nothing to improve either Dave=01,s or my understanding of the national embarrassment California is perpetrating with electricity deregulation.

=01&The next thing you know, they will be taking property, and forcing utilities to build power plants and transmission,=018 he mused between sips of Dixie longneck beer and chomps of jalapeno peppers. =01&Come to think of it, Dave, they did say something about that. Yeah,=018 I recalled, =01&Senator Peace was expounding on his favorite idea which is forcing the ISO or the utilities to build peakers, and not let the market build them. I can=01,t remember if that was before or after he suggested to EOB Chairman Kahn that the ISO and the PX should be folded into State agencies under the direction of the Electric Oversight Board.=018

I know what you are thinking right now. The next thing you know California will have regulated retail rates. That recipe should be out of the PUC=01,s oven sometime next week.

=01&Well, the power marketers are jiggling the system, bidding up to the ISO=01,s bid cap. There is no way you can tell me that a generator planned to make \$750/MWH in its pro forma,=018 Dave added. =01&So you agree with Herr (Hair) Peace! You don=01,t believe in markets,=018 I retorted. = =01&Oh, I believe in them, but I remember when I was short on a 300 MW trade, and without any notice or advanced warning, the price in the Midwest market went against me,=018 Dave recalled. =01&I called everyone who I tra= ded with, and they had nothing. I finally called XXXXX, and I asked what will it cost for 50 MW?=018

=01&Why didn=01,t you ask for 300?=018 I wondered. =01&I didn=01,t want to= show him my position. You get hosed when you show the buyer your position. Ask for 50, first,=018 Dave chided.

=01&What happened?=018 =01&Oh, they offered to sell for \$150/MWH. I said I= =01,d take it, and then said I needed another fifty. He asked \$300. I took that, and he priced the next 50 MW at \$600,=018 lamented Dave. =01&He just wanted to see how far he could push me. That=01,s what I mean when I say the traders are jiggling it.=018

=01&But Dave, you old communist, your forgetting the trading function is what mitigates the risk. The traders are the in between people who guess at the price. Sometimes they guess right, and sometimes they guess wrong. But the damage, or the reward, is on their book, not passed on to the ultimate consumer. It has nothing to do with the marginal cost of a generating plant.=018

And there you have it. Put in a price cap, and the traders have a target for which to shoot. I can=01,t prove the following, yet, but I=01,I= I wager with any of you that as the price cap level dips down, the average trading price climbs even as the so-called =01&dysfunctional=018 price spik= es are eliminated. Consumers get hosed, and the fundamental economic principle is upheld, which is, one can never be made better off with the imposition of an additional constraint.

I feel better already. Here is what is on our short agenda this week.

Things in the Mailbag

Things in the People=01,s Republic of California

@@@ The ISO Replies to the EOB Report @@@ Reflections on a Day of Senate Hearings @@@ PUC Issues Oil on Functioning of Wholesale Market

Odds & Ends (!)

Things in the Mailbag

It has been awhile since we put the mail feedbag on and had a munch. Here is what my friends have been writing me.

FPL Energy=01,s Steve Ponder was only too quick to tell me, =01&Please Gary= , no more whining about your computer. How old are you?? Is this the year you get the AARP letter??? A very depressing moment. Do you really not know how to spell Morro Bay??? Please let us know what is going on with your son's hockey team?? Don't forget the cigars for Moron??? Bay!!!!=018

It is good to have friends like Steve. They make the pain of separation so much easier. And Steve, when you FPL guys get that Entergy merger sorted out, in a dozen years or so, you let us know. I want to participate in the name selection for the new entity. How about Fentergy PLus?

Next, from the PX=01,s Mark Hoppe, who writes, =01&As you've heard from others, I don't know quite how you manage to knock out all this material each week. The burrito is informative, humorous and usually contains a sprinkle of irony, tragedy (ISO Drama). Though you are usually neutral regarding the PX, you are not unduly negative which I appreciate. I think we do a pretty good job over here and so often people in the industry forget the amount effort and challenge it took the PX to successfully open this market.=018

Thanks, Mark. I just want you to know that my ability to write this stuff every week is not constrained by the facts or evidence. I have learned from watching Herr (Hair?) Peace, that as long as you can talk (write, too) fast, and have conviction in your statements, regardless of how groundless they may be, you will have a willing and eager audience.

A few weeks ago, I received from the PX=01,s Jennifer Sherwood a note, which she wants you to know are her opinions, not necessarily the PX=01,s. It=01,s okay, Jennifer. I paid George,yesterday, the \$20 I owed him for that sham Rose Bowl bet, (remember?, Stanford lost) and your opinions are cool with us. =01&Just curious - has anyone been comparing high unleaded prices to high CA electricity prices? What I mean is, we are up in arms about how we should protect the unfortunate San Diego consumer who can't afford to keep the AC on. But what about the inflated unleaded gas prices the whole country has seen over the last few months? No effort is made by the government to shield the consumer from how much it costs to fill their gas tank. No mention is made of those who can't afford to drive to the grocery store because they can't afford the extra 15 or 20 cents a gallon. The costs are passed along to the consumer without pause. Granted there are differences between the unleaded market and the electricity market in terms of demand-side responsiveness, but then again is it that much different to say, =01+I can't drive today because gas is too expensive=01, vs. =01+I can't turn up the AC today because it's too expensive.=01,=018

Finally, from one of our [secret] Washington readers, and I am not telling who, I received the following: =01&I ... broke down and listened to the [ISO Governing Board] discussion and vote. Ugh! I too noted that the "speak fast" was applied to everyone but Herr Peace. My goodness, what a mess we have. I loved Jerry's picture in USA Today -- it spoke volumes. My sources at FERC tell me, though, that we should keep an eye out for {FERC Chairman} Hoecker to do something really ... [Censored] ... for political reasons. Given no Commission meetings til September, the only way to act is by unanimous consent, so I would hope he can't do all that much.=018

Things in the People=01,s Republic of California

@@@ The ISO Replies to the EOB Report

Several of you people commented to me that the ISO=01,s reply to the PUC/EOB report was very good. I decided to excerpt the best sections of it for the Burrito. The full document can be found on the ISO=01,s website.

=01&... the [PUC/EOB] Report asserts that the suspected activities of certain generators on June 13 created frequency instability leading to the Bay Area blackouts the following day. In fact, the events of June 13 and June 14 were completely

File	dasovich-j/all_documents/4317.

Wayne - to remind, there are two operational issues that had been on the agenda that keep getting deferred : the Singapore license entity and a regulatory issue in Korea. The deferral of the Singapore one defers our license application and our timeline for Singapore. I told the commercial team we hoped to deal with it in this week's call, but that even then the license would slip to January, with Singapore processing time. So we need to try to decide the entity this week or next, either in this call, or by e-mail, or in a separate call - - whatever is the most efficient way. Otherwise with the holidays we may lose an additional month. What is the best mechanism to decide this?

In Singapore, if we can see our way clear to go with the already established entity, of course that would be simpler, but I defer to the group's judgment.

For the Korea question, perhaps all we need to do is agree to ask Kim and Chang to look at it (including mine and Jan Haizman's and Jae-Moo Lee's thoughts) and give us their advice. If legal authorizes that I can get some material worked up to send.

I will be on the Thursday call from the beginning unless I am in the air in which case I will join around 60-90 minutes into the call.

Thanks.

To: Donald Lassere/Enron Communications@Enron Communications, Sue Nord/NA/Enron@Enron, Michelle Hicks/Enron Communications@Enron Communications, Cynthia Harkness/Enron Communications@Enron Communications, Lara Leibman/Enron Communications@Enron Communications, Jan Haizmann/LON/ECT@ECT, Rajen Shah/LON/ECT@ECT, Richard Anderson/Enron Communications@Enron Communications, James Ginty/Enron Communications@Enron Communications, Beth Wapner/Enron Communications@Enron Communications, David Merrill/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Robbi Rossi/Enron Communications@Enron Communications, Ban Sharma/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Jane Wilson/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Jeff Dasovich/NA/Enron@ENRON, Mike Dahlke/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Michael Grimes/AP/Enron@Enron, Bill White/Enron Communications@Enron Communications, Kristin Albrecht/Enron Communications@Enron Communications cc: Angie Buis/Enron Communications@Enron Communications

Subject: Proposed Agenda for 12/7/00 Meeting @ 0830

1. Review attached note to confirm that we are restricted to one option (the "Regulatory Structure") from a regulatory standpoint with respect to the trading of Japanese bandwidth.
2. Determine whether there are similar restrictions in Singapore or Hong Kong requiring us to adopt a similar Regulatory Structure.
3. Review the tax costs and risks arising from the Regulatory Structure and describe the steps that must be taken to manage the tax risks.
4. Given the foregoing, determine what specific steps are necessary to implement the Regulatory Structure and manage the concomitant tax, legal, accounting, and credit risks.
5. Review what steps, if any, are necessary to permit bandwidth trading by the US (and UK?) trading desks of bandwidth terminating in Australia.

6. Time permitting, determine whether regulatory considerations require that we adopt a structure similar to the Regulatory Structure in Mexico, Brazil, or Argentina.

7. Time permitting, review what steps, if any, are necessary to permit bandwidth trading by the US (and the UK?) trading desks of bandwidth terminating in Canada.

Questions and comments are invited. Thanks.

W. Wayne Gardner Enron Broadband Services 1400 Smith Street Houston, TX 77002-7361 Phone: 713 853 3547 Fax: 713 646 2532 ----- Forwarded by Wayne Gardner/Enron Communications on 05/12/2000 08:28

Wayne Gardner 17/11/2000 18:12

To: Sue Nord/NA/Enron cc: James Ginty/Enron Communications@Enron Communications, Donald Lassere/Enron Communications@Enron Communications, David Merrill/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT Subject: Japan Trading

Dear Sue, Because of the important role of Japan in the trading business of EBS, I want to make sure I understand very clearly our regulatory options. For the sake of simplicity, I limit the discussion below to trading of segments between Japan and the US on the grounds that the Japanese principles that apply to any other trading of international segments would be identical. The discussion is further limited to the purchase of IPLCs because that is the standard form of telecom capacity available for purchase out of Japan. Finally, based on input from Regulatory, the discussion assumes that the purchased IPLCs are divided into half-circuits. The Japan half-circuit terminates in Japan and in the middle of the Pacific. The US half-circuit terminates in the middle of the Pacific (picking up where the Japan half-circuit terminates) and in the US.

I. Our only option from a regulatory standpoint: We understand that the only option from a regulatory perspective is as follows: EBS Networks YK ("YK") purchases the Japan half-circuits because it has an ST2 license and switch in Japan through which it will route ALL trades. EBS Trading L.P. ("Trading") purchases the US half-circuits only. Each of Trading and YK can resell their respective half-circuits in the form of capacity under the EBS Master Services Agreement (the "Master") to others, who may be resellers or end-users.

II. Tax consequences of structuring trades in accordance with this option: At best, the tax consequences of the foregoing are that half of the earnings on Japan to US trading will be subject to 42% immediate Japan income tax (with no ability to defer the cash payment of tax with Enron's US tax loss carryforward). In addition there may be significant exposure to US income tax (we are in the midst of quantifying this risk and evaluating potential ways around it) which would incrementally increase the effective income tax rate to 62%. If instead Trading undertook all the Trading activity, virtually all of the earnings of Japan to US trading would be subject to a single rate of US income tax (35%) and the payment of such tax could be deferred for a significant period of time due to Enron's large US tax loss carryforward.

III. The following options have been ruled out by Regulatory for the following reasons:

Unworkable Option 1: Trading does not acquire an ST2 license. Trading buys US and Japan half-circuits directly and resells them in the form of capacity under the Master to others, who may be resellers or end-users.

This option is illegal from a regulatory standpoint even though YK has an ST2 license. Japanese telecom regs provide that a reseller of Japanese IPLC capacity must hold an ST2 license directly. In other words, the regulations provide that no affiliate of the YK licensee may resell IPLCs unless that affiliate itself acquires a license. Moreover, Trading cannot claim that it is not engaged in resale activities that require an ST2 license. Japanese telecom regulations treat the resale of capacity under the Master as a resale of the underlying IPLC.

Unworkable Option 2: Trading does not acquire an ST2 license. YK purchases the Japan half-circuits. Trading purchases the US half-circuits. YK then resells the Japan half-circuits to Trading. Trading then resells the entire circuits under the Master to others, who may be resellers or end-users.

For the reasons set forth under Option 1, this option is illegal from a regulatory standpoint, even if the sale from the YK to Trading and the subsequent resale by Trading occur in tandem one immediately after the other.

Unworkable Option 3: EBS Trading L.P. forms a wholly-owned US special purpose vehicle ("SPV") which obta

Cisco and the Internet: the Second Annual E-Business Case Competition Submit Your Suggestions for the First Annual Haas Staff Award The Future of Digital Music Ninth Annual Youth Venture Capital Competition at Haas Distinguished Faculty and Alumni Discuss Global Issues UC Berkeley Symposium in Tokyo: Technology and Entrepreneurship Haas in the News Happening at Haas Haas Celebrations

CISCO AND THE INTERNET: THE SECOND ANNUAL E-BUSINESS CASE COMPETITION Predicting the future of high-tech companies may be tricky business, but UC Berkeley students are up to the task. Next Monday, April 16, five teams of UC Berkeley students (both undergraduate and graduate students) will make their best case for the future of Cisco Systems' use of the Internet at the E-Business Case Competition. The event takes place at 5:30 p.m. in the Arthur Andersen Auditorium.

Cisco Systems and Deloitte Consulting created this case to give students an opportunity to recommend solutions to Cisco for using the Internet to help its channel partners focus on their core-competencies and create a competitive advantage. In addition to the judges from Cisco, Deloitte Consulting, and the Haas School, the audience will vote for the winning team out of the 5 finalists. Over \$2,500 in cash awards will be given to the finalists. The Haas School of Business, Cisco Systems, Deloitte Consulting, and the Schlinger Family Foundation sponsor the event.

The final teams were chosen from more than 20 submissions to the undergraduate program office. Each team is composed of UC Berkeley students from any field of study and must include at least one non-Haas major. The finalists teams are: Aleksey Strygin, Mark Khavkin, Jane Knop, and Inna Garilova Nancy Lan, Melissa Wong, and Darien Shanske David Chan, Aryn Saleh, Christine Cho, and Lisa Mou Vincent Chiu, Martin Lanner, Albert Lai, and Ryan Mickle Christian Milan, Shirley Gou, Kitty Cheung, and Ruby Shih The competition and the reception that follows offer an opportunity to meet representatives from Cisco Systems and Deloitte Consulting. The entire UC Berkeley community is welcome to attend the final presentation night. A Palm Pilot will be raffled off at the end of the event.

SUBMIT YOUR SUGGESTIONS FOR THE FIRST HAAS STAFF AWARDS Inaugurated by Dean Laura Tyson to recognize the tremendous contribution of the staff at the Haas School, the 2000-2001 Outstanding Staff Awards will be presented at the End of the Year Party on May 4, 2001. Members of the Haas community are invited make nominations. The deadline for nominations is Wednesday, April 25, 2001.

The guidelines for nomination are: Performs at a level above and beyond normal job requirements. Significantly improves customer service or increases customer satisfaction. Significantly improves a work process or increases the efficiency of a procedure. Takes initiative to reduce organizational barriers through such activities as mentoring and voluntarily assisting coworkers. Works to foster collaboration, communication, and cooperation among colleagues. Contributes to and demonstrates a commitment to the purpose and values of Haas. The guidelines for the award and the form for submission are available at <http://www.haas.berkeley.edu/news/outstandingstaff.html>.

THE FUTURE OF DIGITAL MUSIC The Management of Technology Program is joining Boalt Hall for a roundtable discussion on "Digital Music and Copyright Issues" on Wednesday, April 18, from 4:00 p.m. to 6:30 p.m. in the Arthur Andersen Auditorium.

"This year's Digital Music Conference is taking place in a different landscape for both Napster and peer services than last year's conference," says Drew Isaacs, executive director of MOT. "Although the 'shutting down' of Napster has had limited

effect on the swapping of free music files on the Internet, it has brought to universal awareness the complex business and legal environment for digital music publishing and distribution.? This is the core issue to be examined at this year's event."

The event is free and open to the UC Berkeley community. The panel includes Robin Gross, Electronic Frontier Foundation; Gerd Leonhard, Licensemusic.com; Milt Olin, Napster; Barry Simmons, Simons and Stern; John Simson, Recording Industry Association of America; Carol Smith, Listen.com; and Peter Menell, executive director of the Berkeley Center for Law and Technology, as the moderator.

NINTH ANNUAL YOUTH VENTURE CAPITAL COMPETITION AT HAAS The Haas School's extremely successful youth outreach program, Young Entrepreneurs at Haas (YEAH), is holding its ninth annual Venture Capital Competition on Saturday, April 28, from 8:00 a.m. to 1:00 p.m. in Wells Fargo Room. This competition brings students from local middle and high schools to Haas to present their business plans to a volunteer "venture capital" board.

YEAH allocates over \$10,000 to top performers for business startup or educational costs through this competition. The competition offers participating youth a chance to demonstrate their new skills, pitch their business ideas to a panel, and compete for grants of up to \$500 for business startup or college costs.

YEAH is an academic preparation program for educationally disadvantaged middle and high school students who express an interest in business. With the support of 40 MBA volunteer mentor/business coaches, YEAH teaches teens how to develop their business ideas, draft business plans, and turn their ideas into entrepreneurial opportunities. The program also introduces youth to the stock market, the global economy, and teaches them how to improve test taking and study skills that are critical to admission to the UC system.

Due to increased public and private funding, the YEAH Program has tripled in size to reach more than 170 youth from middle schools and high schools in the Oakland, Berkeley, Emery, and West Contra Costa Unified School Districts this year. For more information on YEAH, visit www.haas.berkeley.edu/yeah.

The organizers are still looking for a few more volunteer panelists. Please contact Ajuah Helton at 510-643-0923 for more information.

DISTINGUISHED FACULTY AND ALUMNI DISCUSS GLOBAL ISSUES The annual Faculty Alumni Colloquium on May 5 features Haas faculty and alumni discussing current economic issues and global management trends in the new economy.

Keynote speaker Patricia C. Dunn, BA 75, will speak on "Investment Management in an Era of Individual Retirement Planning." Dunn is global chief executive of Barclay's Global Investors and chairman of the firm's Global Management Committee. Dunn is also a member of the Haas School of Business Dean's Advisory Board.

There will be two faculty panel sessions, each with two concurrent panels. The morning session offers "Does the New Economy Need a New Anti-Trust" by Michael Katz and "The National and Bay Area Economic and Real Estate Outlook" by Ken Rosen. During the afternoon session, Severin Borenstein will speak on "The California Electricity Crisis: Are Policymakers Learning the Right Lessons?" and Homi Bahrami will discuss "Managing the Knowledge Worker."

Dunn joins a distinguished list of prior keynoters for the Colloquium, a day-long event that enables alumni to come back to campus and interact with current faculty. Past speakers include Alex Mandl, MBA 69, chairman and CEO of Teligent; Roger Siboni, BS 76, president & CEO, E.piphany; Arun Sarin, MBA 78, then CEO of InfoSpace; Laura D'Andrea

USA: BP plans to build U.S. LNG import terminals.

04/03/2001 Reuters English News Service (C) Reuters Limited 2001.

HOUSTON, April 3 (Reuters) - Oil giant BP Amoco Plc said on Tuesday it has tentative plans to build up to three new import terminals for liquefied natural gas (LNG) to help meet growing demand for natural gas in the United States. "We are looking at probably two or three opportunitiesto bring LNG into both the East Coast and potentially the West Coast as well," Tony Fountain, president of BP North America Gas & Power told reporters at a Ziff Energy conference in Houston. "The driver for us in LNG is the tremendous market opportunity in North America, but we've obviously got great (natural gas) reserves and resources around the world," he said. Fountain said Mexico was among potential sites that BP was considering for an LNG terminal to meet demand for natural gas on the U.S. West Coast. He declined to give specific details on locations or timing, saying only that BP's plans envisaged construction of the new terminals during the current decade. BP is already involved in LNG production in Trinidad and Fountain said the company is currently exploring the possibility of producing LNG in Egypt and other locations around the world. Strong U.S. natural gas prices have led to renewed interest in LNG, with companies such as El Paso Corp. and Enron Corp. drawing up plans for new import terminals. Until recently the high cost of cooling and transporting natural gas in liquid form made investment in new import facilities uneconomical. The U.S. currently has four LNG import terminals that were built more than 20 years ago. Two of them are currently receiving LNG cargoes and the other two are scheduled to resume operations in the next one to three years.

USA: CMS gets okay to expand Louisiana LNG terminal 40 pct. By Spencer Swartz

04/03/2001 Reuters English News Service (C) Reuters Limited 2001.

SAN FRANCISCO, April 3 (Reuters) - CMS Energy Corp. said Tuesday it has received final approval from the federal government to boost its liquefied natural gas (LNG) terminal capacity in Louisiana, already the largest in the U.S., by over 40 percent. Michigan-based CMS's decision to add 300 million cubic feet a day (mmcf) of gas capacity at its Lake Charles terminal, the largest of two U.S. LNG terminals in operation, comes amid record high gas prices as traditional sources of gas from places like Texas and the Gulf of Mexico cannot keep pace with rising demand. The decision by the Federal Energy Regulatory Commission (FERC) will allow the company's Trunkline LNG unit to begin immediately making modifications at its LNG terminal and to have the new capacity on line by June of this year, the company said in a statement. With FERC approval, CMS will expand the Lake Charles terminal from its current send out capacity of 700 mmcf to a peak capacity of 1 billion cubic feet a day (bcfd), CMS said. CMS also said it was evaluating whether to add another 200 to 300 mmcf of send out capacity at the LNG terminal, a company spokesman said. The modifications to the CMS Trunkline LNG facility, which will not impact current terminal operations, will eliminate bottlenecks in the regasification process, the company said. In 2000, there were 55 LNG tanker ships unloaded at the Lake Charles terminal, and CMS said it expects the level LNG shipments to be higher in 2001. NEW WEST COAST MARKET? High prices for traditional gas supplies have lent further momentum to the prospects for increased use of LNG, traditionally just about one percent of overall U.S. gas use due largely to high transportation and liquefaction costs. LNG's costly liquefaction process involves super-cooling and injecting gas into spherical high-pressure tanks for onshore storage or shipment on board special LNG carriers. Some analysts have estimated LNG could rise to around five percent of overall gas use in the U.S. in the coming years, as well as attracting Asia-Pacific LNG to the energy-starved West Coast. U.S imports of LNG, mainly to New England, the largest consumer of gas, usually have usually come from Algeria, Trinidad, Nigeria and Qatar in recent years. But as high gas prices on the U.S West Coast face vast gas resources in the Asia Pacific region, the paradigm

appears to be shifting. In late March, Chevron Corp. said it was studying plans that could allow it to start shipping LNG to the U.S. West Coast by 2005 if the project is economically viable. Chevron said it would look at supplying the LNG from its gas holdings in Australia. El Paso Corp. also said in March it had tentatively agreed to begin purchasing LNG in 2005 in hopes of shipping it to California or Mexico. Under this plan, LNG would be purchased from a Phillips Petroleum Co. plant near Darwin, Australia. **TERMINAL INTEREST** In January, energy giant Enron Corp. said it was looking into developing a new LNG import terminal in the Bahamas, connected by a 90-mile (145 km) pipeline to Florida. This plan could begin commercial service by the end of 2004 if all regulatory permits are approved. Cabot LNG, a unit of Belgian-based energy services company Tractebel, operates the other active U.S. LNG terminal at Everett, Mass., near Boston. The company is in the process of more than doubling its vaporization capacity from 435 mmcf/d to more than 1 bcf by the end of this year. The two other U.S. LNG import terminals, in Cove Point, Md., and Elba Island, Ga., idled years ago for lack of demand, are expected to reopen in one to three years, a move that would put all four of the country's LNG terminals back to work for the first time since 1982.

USA: Enron unit, J.C. Penney sign \$600 mln energy deal.

04/03/2001 Reuters English News Service (C) Reuters Limited 2001.

SAN FRANCISCO, April 3 (Reuters) - A unit of energy giant Enron Corp. and J.C. Penney , one of the nation's largest retailers, on Tuesday said they have signed a \$600 million energy services deal in a bid to lower the retailer's energy costs and firm up its profit margins. Under the agreement, Enron Energy Services (EES) will manage and purchase the supply of energy-related commodities, like electricity and natural gas, at more than 1,250 J.C. Penney locations in all 50 U.S. states. EES will also replace or update energy equipment to reduce consumption and create additional savings for J.C. Penney, Enron said in a statement. The deal comes a day after EES signed a long-term energy management agreement for all of upscale retailer Saks Inc.'s facilities. Under that agreement, EES will supply all of Saks' store locations, which total over 300, its distribution facilities, and administrative offices with electricity and natural gas. Although no time frame was given for either the J.C. Penney or Saks deal, Enron has said that contracts typically run between five and 10 years. To date, EES manages ener

USA: Enron says recent woes to hurt profitability.

11/14/2001 Reuters English News Service (C) Reuters Limited 2001. HOUSTON, Nov 14 (Reuters) - Troubled energy trading giant Enron Corp. , which agreed last week to a buyout by smaller rival Dynegy Inc. , said on Wednesday it expects

its recent woes to have a "temporary but negative impact" on fourth-quarter profitability. Enron executives said in a conference call with analysts and investors that fourth-quarter results would also be adversely affected by severance costs and other restructuring costs. It did not provide further details, but said it expects to issue fourth-quarter earnings guidance in two to three weeks. Enron also said it is seeking an additional \$500 million to \$1 billion in private equity to help rebuild confidence in the company and keep its core trading operations afloat in the nine months before the acquisition by Dynegy is expected to close. Enron, the nation's biggest buyer and seller of natural gas and electricity, agreed on Friday to be bought by Dynegy for about \$9 billion in stock after investor unease over the company's business deals sapped its finances to the point of near-collapse. Enron has been under the gun from Wall Street since mid-October when it said shareholder equity had been cut by \$1.2 billion because of off-balance sheet deals with partnerships run by former Chief Financial Officer Andrew Fastow, who was later replaced. The deals are under investigation by U.S. regulators.

Copyright ? 2000 Dow Jones & Company, Inc. All Rights Reserved. USA: Enron traders seen riding out storm, cuts likely. By Scott DiSavino

11/14/2001 Reuters English News Service (C) Reuters Limited 2001. NEW YORK, Nov 14 (Reuters) - Traders at Enron Corp., atop the energy trading world, are avidly being pursued by rivals but are holding out to see if there is a good deal awaiting them in the proposed buyout by Dynegy Inc. While a number of jobs are expected to go after the near collapse of North America's biggest energy trader, the new owners are expected to pull out all the stops to keep Enron's top traders - seen as the company's key assets. "I know (traders) are getting a ton of calls, but I don't think there is going to be a mass exodus from the trading floor," said Joe Baker, president of Houston-based Search Consultants International, a recruitment company that serves the energy and power marketing industry. Enron, known for turning out some of the industry's most aggressive traders, also has a reputation as a tough training ground for newcomers, handsomely rewarding those who "make their numbers" and quickly showing non-performers the door. Traders at other energy firms said experienced traders can earn six-figures salaries before annual bonuses, paid sometime between the beginning of January and the middle of March. A company recruiting traders before the bonus is paid would have to pay a larger sign on bonus. "The majority of the key traders are going to wait and see what kind of situation develops ... everyone's got their eyes open," Baker said. "Most people want to stick around to see what kind of bonus they are going to get." WAIT AND SEE Energy traders are clearly worried about the \$9 billion takeover announced last week, an opportunity for Dynegy to chop head count. "There's a lot of overlap at both firms. I don't think there will be enough room for everyone," a trader at another Texas-based energy firm said. Enron is the nation's biggest buyer and seller of natural gas and electricity. Dynegy is about a fifth as big as Enron measured in terms of revenue. Despite the job uncertainty hanging over their heads, traders said they could not name a single Enron or Dynegy trader actively scouting out a new employer. "Everyone seems to be waiting to see what happens. There are only a few trader jobs open in the country right now. Those positions will likely be filled pretty quickly if this merger goes through," another trader said. "Some (traders) are going to be looking for work no matter whether they're laid off or leave on their own," the trader added. So far, it is mostly Enron support staff who are polishing off their resumes. Enron said Wednesday in an analyst meeting the company expects to take a charge for severance in the fourth quarter. However, no job cut numbers were discussed. Baker said the support staff feels their jobs are the ones most threatened by the proposed Dynegy merger. Dynegy is buying Enron for its trading operation and has said it is confident the best will stick around. Upon completion of the merger, the combined company, to be called Dynegy Inc., is expected to have revenues exceeding \$200 billion and \$90 billion in assets. Dynegy agreed to buy its larger cross-town rival after Enron investors lost faith in the company whose stock plummeted following its disclosure of off-balance sheet deals with partnerships run by its former chief financial officer. The stock was off 8 cents, or 0.8 percent, at \$9.92 a share at the close on New York Stock Exchange trade Wednesday, well below its 52-week high of \$84.88. Meanwhile, Dynegy stock fell \$1.58, or 0.7 percent, to \$46.20 a share. - Scott DiSavino, New York Power Desk, +646-223-6072, fax +646-223-6079, e-mail scott.disavino@reuters.com and Nigel Hunt, Los Angeles bureau +213-955-6752.

Copyright ? 2000 Dow Jones & Company, Inc. All Rights Reserved. USA: Arbs tread lightly on Enron-Dynegy deal. By Dane Hamilton

11/14/2001 Reuters English News Service (C) Reuters Limited 2001. NEW YORK, Nov 14 (Reuters) - Merger arbitrageurs say they're treading lightly in betting over prospects for the \$9 billion stock-swap takeover of Houston energy trader Enron Corp. by rival Dynegy Inc. . These market pros, who bet on the likelihood a merger will be completed, say big questions about Enron's financial condition raise doubts about the deal and make them shy about risking heavy bets. Wednesday's

conference call between Enron officials and investors did little to assuage that, they say. "People are very nervous about Enron," said one arb at a major New York brokerage. "They aren't sure if Enron is actually earning anything." Arbs who think a deal will eventually be completed may "short" the acquirer and buy target stock, reasoning that the acquirer's stock will fall and the target will rise on completion. But in recent days, Enron's stock has languished, while Dynegy's stock has gained more than 40 percent, although it was close to the same level a month ago. Some arbs said Dynegy's stock may have risen because it could gain valuable pipeline assets whether or not a deal is completed. Enron said it granted Dynegy an option to buy its Northern Natural Gas pipeline system fo

Haas NewsWire November 26, 2001

Due to the winter holiday, the Haas NewsWire will suspend publication after the December 10, 2001 issue. Publication will resume with the January 14, 2002 issue.

CONTENTS * Award-Winning Orpheus Chamber Orchestra to Hold Teaching Residency * Dean Tyson to Deliver Final State of the School Address on Wednesday, November 28 * Very Popular "Fundamentals of Business" Course Opens Haas to Berkeley Graduate Students * Haas Joins in Launching of National Organization to Increase Women in Business Leadership * Staff News * Haas in the News * Happening at Haas * Haas Celebrations

AWARD-WINNING ORPHEUS CHAMBER ORCHESTRA TO HOLD TEACHING RESIDENCY The Grammy Award-winning Orpheus Chamber Orchestra will hold a one-day teaching residency at the Haas School on November 29th. Orpheus, the only chamber orchestra in the world that consistently rehearses, performs, and records without a conductor, has garnered attention from the corporate sector for its unique approaches to creativity, innovation, and self-management.

Orpheus will showcase its innovative approach to leadership for of a group of Haas MBA students on Thursday from 1:00 p.m. to 5:00 p.m. at the International House auditorium. Tickets to the event were awarded to MBA students through a lottery process. Morgan Stanley is sponsoring the event at Haas. The firm also sponsored an Orpheus residency at Hitotsubashi University in Tokyo in June 2001.

The program will include presentations by Dean Laura Tyson; Harvey Seifter, executive director of Orpheus Chamber Orchestra and author of "Leadership Ensemble"; lecturer Terry Pearce; and David Pottruck, co-CEO of Charles Schwab. John McGeehan, managing director and chief administrative officer for Morgan Stanley Japan Limited will also be in attendance.

Central to the distinctive personality of Orpheus is its unusual process of sharing and rotating leadership roles. The "Orpheus Process" is built on individual responsibility, shared leadership, and workplace democracy. The process has enabled the orchestra to unleash the talent, vision, creativity, and leadership potential of each member of the group.

For every work, an elected committee of musicians selects a concertmaster and each instrumental section chooses a representative. These chosen representatives (the "core group") are responsible for forming the initial concept of the piece and developing an overall interpretive approach to the music before the entire orchestra comes together to rehearse. The core also structures the rehearsal process for the entire orchestra, which provides clear leadership while insuring that every member has a real stake in the artistic outcome of every piece performed by the orchestra. The results of the process have produced 28 years of sustained excellence at the highest level of international accomplishment.

The main focus of the residency at Haas will be to demonstrate the Orpheus Process in action as the orchestra rehearses the first movement of Haydn's Symphony No. 63 in C Major in "real time," showing by example their work process from

core preparations to final product. The applications of the Orpheus Process to the business world will be framed in the introduction and reinforced through a question-and-answer and discussion period with the students and presenters.

DEAN TYSON TO DELIVER FINAL STATE OF THE SCHOOL ADDRESS ON WEDNESDAY, NOVEMBER 28 Dean Tyson will give the final state of the school address of her tenure as dean on November 28. The speech will be given twice that day, once during the day at 12:45 p.m. and once in the evening at 7:45 p.m., in the Arthur Andersen Auditorium. Dean Tyson will take questions from the audience at the end of the speech. All students, faculty, and staff are welcome to attend.

VERY POPULAR "FUNDAMENTALS OF BUSINESS" COURSE OPENS HAAS TO BERKELEY GRADUATE STUDENTS For the first time, the Haas School is offering a graduate-level business course specifically designed for non-business school students at UC Berkeley who want exposure to fundamental knowledge of management and business. "Fundamentals of Business" (BA 296-10) will introduce Berkeley graduate students to the basics of business.

So far, the course appears quite popular, with almost every seat taken during the pre-enrollment process. Of the 102 students currently pre-enrolled, the largest segment (18 students) comes from the College of Engineering. The remainder come from a variety of graduate programs at Berkeley.

"For years there has been high demand for Haas courses outside the school," says Andy Shogan, associate dean for instruction. "Graduate students don't have time to take several business courses to learn management, finance, and marketing. This course will satisfy that demand and expose the students to more topics."

Fundamentals of Business is a broad survey course for graduate students designed to provide a comprehensive introduction to the study of business and modern management techniques such as data gathering, analysis, and decision-making. The class meets in the Arthur Andersen Auditorium on Wednesdays from 6:00 p.m. to 9:00 p.m.

The format of the course is three five-week modules taught by a team of instructors with different functional areas of expertise. The modules are: "Managing People in Organizations" taught by Nancy Euske, "Accounting and Finance" taught by Victor Stanton, "Delighting Customers: Marketing and Strategy" taught by David Robinson.

At the end of each of the three modules, there will be an exam on the following Monday. The course is open to graduate students only from departments other than the Haas School. No prerequisite coursework is required, but a familiarity with basic economics is helpful. For more information visit <http://www.haas.berkeley.edu/~robinson/BA296/>.

Haas also offers an undergraduate business survey course, BA 10, which is a prerequisite for the business major.

HAAS JOINS IN LAUNCHING OF NATIONAL ORGANIZATION TO INCREASE WOMEN IN BUSINESS LEADERSHIP A new national nonprofit organization designed to increase the number of women business owners and business leaders was announced on November 6 during the group's first board meeting at the University of Michigan Business School. Ilse Evans, executive director of MBA Admissions and Career Services, and David Downes, director of the Full-Time MBA program, are founding board members.

The organization, whose name and headquarters have yet to be determined, is an alliance of educational institutions, businesses, and nonprofit groups. The organization will work to increase women's access to education and business networks, support women financially in their business education, raise awareness of the impact women can make on business and society, and encourage and support research on relevant topics.

"One of the key barriers to access to business education is the lack of awareness and knowledge women have about the value and flexibility of business careers and education," says Jeanne M. Wilt, executive director of the new organization and assistant dean for admissions and career development at the University of Michigan Business School.

Over the next three years, the organization plans to substantially expand its membership of business schools and companies, serve alumnae of member schools and develop strategic partnerships with other key organizations that work with women and girls. It aims to raise \$20 million by 2004 to support its work.

Business members of the new group include Dell, Deloitte Consulting, Gol

Joining the Haas Network: New MBA, Undergraduate, and Ph.D. Students Arrive at Haas Chancellor Berdahl Appoints Ben Hermalin Interim Dean All the 2001 YEAH Graduates Pursue Higher Education The Haas School Welcomes New Faculty New Staff Haas in the News Happening at Haas Haas Celebrations

JOINING THE HAAS NETWORK: NEW MBA, UNDERGRADUATE, AND PH.D. STUDENTS ARRIVE AT HAAS

The Haas School is bubbling with activity this week as the new school year begins and incoming classes of students in four degree programs settle into their new routines. In keeping with tradition, the Undergraduate, Evening MBA, MBA, and Ph.D. programs have worked hard to admit select groups of students.

"I am thrilled with the outstanding students we have admitted for this fall's entering class," says Pete Johnson, acting co-director of admissions for the full-time MBA program. "They are a talented and diverse group of people who bring a wealth of experiences with them to Haas."

The full-time MBA class of 2003 includes 238 students, selected from an applicant pool of 3,259. Thirty-five percent of the new first-years are international students, representing 31 different countries. Seventy-four percent are bilingual and 62% are trilingual.

On average, the members of the new MBA class have 5 years of professional work experience, and they bring a wealth of knowledge and experience to the Haas community. The class includes a producer from Fox Sports and NBC TV, a freelance director of plays and musicals, a design engineer from Porsche, and a former writer for "Let's Go" travel books. On the extracurricular side, the class includes members of the Peruvian National Rowing Team; the Kyoto University Ballroom Dancing Team; the 1994 National Taekwondo Champion; a four-time state cycling champion; and the winner of a 1999 New York Film Festival producer award for best drama.

The new Evening MBA students distinguish themselves by their strong educational backgrounds. The Evening MBA class of 116 students represents 13 countries and the students have, on average, 7.1 years of post-university work experience. Thirty-five percent of the students hold Masters degrees and 9% have Ph.D.s. Thirty-three percent of the class is bilingual and 25% is trilingual.

"This was a particularly competitive applicant pool, with a 60% increase in applications from last year," says Diane Dimeff, executive director of the Evening MBA Program. "We broke our previous record for applications by 30%, so we are especially excited about this group of new students and the depth and breadth of experience they bring to the classroom."

The Evening MBA class includes a former submarine officer; the chief of Otorhinolaryngology (ear, nose, and throat specialist) at the Veterans Affairs Medical Center in San Francisco; a California water resources manager; an associate treasury program manager for the state of California; a researcher who helped establish a clinical program to provide experimental medicine for a viral liver disease; a competitive swimmer; a student who helped pay his way through school by fighting forest fires for two summers; and a student who interned in a high-pressure French restaurant in Paris.

As one of the most popular undergraduate majors on campus, the Haas Undergraduate program always attracts the cream of the crop of continuing Cal and incoming transfer students. This year, off the 1,150 applicants to the Undergraduate Program, 214 have enrolled. Seventy-nine of the students transferred to UC Berkeley. For the UC Berkeley admits, the average GPA was 3.59.

In the Ph.D. program 467 people applied to the program, but only 39 were admitted. Sixteen new Ph.D. students were enrolled, bringing the total for the program to 80. The average GMAT for the students is 730 and the average GPA is 3.82. There are 11 men and six women in the class. Ten of the students are international, hailing from eight different countries. "We have students from Asia, Europe, South America, New Zealand, and the US," says Jan Price Greenough, associate director of the Ph.D. Program. "They have compiled an impressive scholastic and professional record. We are very excited about their potential and promise and look forward to a very good class."

CHANCELLOR BERDAHL APPOINTS BEN HERMALIN INTERIM DEAN

When Dean Laura Tyson announced that she would resign on December 31, 2001, Chancellor Robert Berdahl immediately announced that he would appoint Ben Hermalin as interim dean while the university runs a national search for a new dean of the Haas School.

Associate Dean Ben Hermalin has been an integral part of Dean Tyson's administration at Haas since he was appointed associate dean in 1999. "Ben has worked closely with me and the rest of the Dean's Office on all of our initiatives, from the Pilot Program to the new degree programs," says Tyson. "He has won the loyalty and support of both faculty and staff through his unique combination of boundless energy, fairness, attention to detail, intelligence, and good humor. He is committed to the well-being of the Haas School and has been an effective advocate for its interests on the campus."

Hermalin, 39, is the Willis H. Booth Professor of Banking and Finance and has been with the Haas School since 1988. He has a joint appointment with the Department of Economics and is a co-founder and director of the private online academic publishing company Bepress.

As associate dean Hermalin oversees all faculty recruitment and retention as well as merit raises and promotions for the Haas faculty. Working with Dean Tyson, Hermalin has helped to get permission from the campus administration to recruit more faculty members in a given year than is normally allowed and to meet competitive offers to current faculty. "Dean Tyson has built a good team, a strong organization, and an excellent staff. I hope to provide continuity and continue the school's initiatives," says Hermalin of his future role as interim dean.

"Haas is very fortunate to have someone of Ben's stature, experience, and dedication willing to serve as interim dean," says Michael Katz, the Edward J. and Mollie Arnold Professor of Business Administration. "His ability to be equally comfortable in a three-piece suit and a Hawaiian shirt makes him ideally suited to face the diverse challenges of leading the school."

His recent research has focused on telecom pricing with Katz. This fall he will teach a Ph.D. course in the economics department called, "Mechanism Design and Agency Theory." Hermalin holds a BA in Economics from Princeton and a Ph.D. in economics from the Massachusetts Institute of Technology. He is also on the Editorial Board for the American Economic Review and is co-editor of the Berkeley Electronic Journals in Economic Analysis & Policy.

"Ben is an excellent squash player," says Dwight Jaffee, professor of banking and finance. "My hope is that his deanly duties will slow him down so that I can win more often."

Tyson and Hermalin will work together throughout the fall with Andy Shogan, Jay Stowsky, and the school's professional staff to make the 2001-2002 academic year a successful one for the Haas School.

ALL OF THE 2001 YEAH GRADUATES PURSUE HIGHER EDUCATION

In another sign of continuing success for the Young Entrepreneurs At Haas (YEAH) program all ten of the 2001 graduating high school seniors from the Young Entrepreneurs Program are continuing their education.

"Our YEP students have taken to heart the principles and real-life lessons of entrepreneurship and finance, and followed their interest toward higher education," says Oscar Wolters-Duran, direct

I would love for you to meet our new VP of Professional Services (who is, incidentally, now for all intents and purposes running our company). I think you will love him. He is very interested in the idea of working with Enron and I want you to meet him. Can we set up a dinner for the three of us sometime in the next couple weeks? I know your schedule is busy with school, so why don't you tell me a couple nights that work (other than Mondays) and I will make it work on our end. Please oh please.

Love,

Your Pal Cameron

P.S. Going to Colleen's new (to me) place for some wine tonight. I'll tell her hello for you!

Recipients	['victor.browner@enron.com', 'joan_heredia@urscorp.com', 'jdasovic@enron.com', 'peter@cea.sfex.com']
File	dasovich-j/notes_inbox/41.

I just wanted to let you know that starting on September 5th, CEA's phones will be answered by an automatic system. This is being done so that we can free up Carin to focus more on office management and client services. As a result, when you dial the CEA number (415-421-4213) you will hear a recorded message asking you to enter the three digit extension of the person you are trying to reach. If you do not know the extension, you can select an option that puts you into the company directory. If you know the extension, you can enter the three digits as soon as you hear the voice from the automated system (i.e., you don't have to wait). For your information, here are the three digit extensions for everyone at CEA:

Carin D'Oliva - 101 Kirk Marckwald - 102 Peter Okurowski - 103 Darcy Whaley - 104 Andreas Merkl - 105 Tisha Mercado - 107 Darcy Wheelles - 109 John Claussen - 110 Jill Kaufman Johnson - 113 Lauren Johnson - 114

Agreed. Also, Margaret, do we have numbers on what portion of GDP and California's "GDP" the tech sector represents?

Best, Jeff

Rob Bradley 09/24/2000 11:51 AM

To: Jeff Dasovich/NA/Enron@Enron cc: Margaret Carson/Corp/Enron@Enron Subject: Re: Lost Demand

I think it will be extra important to add "lost demand" from brownouts and blackouts to consumption to get the real growth rate of power demand this year. There was an increment of this for 1999 given the problems in New York City and Chicago and maybe elsewhere.

- Rob

Government Affairs-The Americas: Department Meeting

Sender	ginger.dernehl@enron.com
Recipients	['alberto.levy@enron.com', 'assad@elektro.com.br', 'alan.comnes@enron.com']
File	dasovich-j/notes_inbox/5501.

Woodlands, here we come again!!!! The next Government Affairs-The Americas meeting is scheduled for Friday, March 9 at 8:00am and should conclude by 5:00pm. For those staying overnight, I have a block of rooms reserved and I will be

putting a rooming list together for the conference center. Please do not call the conference center directly for reservations. I will need to know by Wednesday, February 7 of your plans to attend this meeting and if you will require overnight accommodations (pls indicate # of nights needed).

The location of the meeting will be:

The Woodlands Resort 2301 North Millbend Drive The Woodlands, TX 77380 Phone# 281-367-1100 Fax# 281-364-6274
Check-In time is 3:00pm Check-Out time is 12:00pm

The Woodlands Resort provides transportation service to and from the airport on a scheduled basis from 6:00am - 10:00pm at a cost of \$32.00 per person, per trip. Reservations must be made a minimum of 24 hours in advance for both arrivals and departures. If you have an interest in using this service, please call the transportation desk at 281-364-6256.

The agenda for the meeting is still a work in progress and I will forward it to everyone once it is finalized.

Thanks and please don't hesitate to call me if you have any questions.

Subject: Contact with Prominent UC Berkeley Energy Economist

Greetings Dr. Gobbo:

If my memory serves, you should have arrived back in Italy, or will return soon. Since we met, I have spoken with Severin Borenstein, who is intimately involved with California's electricity restructuring (melodrama?) and a renowned energy economist at UC Berkeley. Severin has offered to serve as a contact for you as you continue to take on the formidable task of restructuring your country's electric industry. I've included his contact information below. And, of course, if there is ever anything I can do for you, do not hesitate to contact me.

All the best, Jeff

Severin Borenstein

New West is proposing these amendments to the bad bill AB XX 82. Its view is that it wants to start getting Some interest in the PX credit issue to see if they can get it into a bill. They acknowledge that AB XX 82 is a bad bill. We will be having a teleconf on this tomorrow with all the ESP consolidated billers.

So far, I've told New West that it would likely be better for them, if Enron stays away from formally supporting this, given the target on our face in the Legislature. More important, I need to know if EES would like to see some PX credit language in legislation.

I have some questions about the approach New West took in modifying the legislation, so, I have a call into them.

Hello Sarah: My name is Jeff Dasovich. I work for Enron in Enron's San Francisco office. Last Friday, the Chairman of our company, Ken Lay, met with Kevin Sharer and other CEOs from California to discuss the energy crisis in California and the need to develop as soon as possible a comprehensive solution to the problem. Mr. Sharer asked for some additional background on the issues and the solution and asked that you be contact person. That information is attached. If you have any questions, don't hesitate to contact me at 415.782.7822 or on my pager at 888.916.7184.

Best regards, Jeff Dasovich

PG&E Stakeholders Meeting Agenda

Sender	lgoldseth@svmg.org
Recipients	['lgoldseth@svmg.org']
File	dasovich-j/deleted_items/1740.

SVMG ENERGY COMMITTEE MEMBERS:

Stakeholders,

This is a reminder that PG&E is hosting its fifth stakeholders meeting for the 2001 PG&E Transmission Expansion Plan on September 17 and 18, 2001 in San Francisco, CA. The purpose of this meeting is to present the study group with project proposals and alternatives to be included in the expansion plan. The fifth stakeholders meeting has been divided into two days: Sept. 17 to present Bay Area Project Proposals and Sept 18 to present non-Bay Area Project Proposals.

Date: Monday , Sept 17, 2001 Subject: Stakeholders Meeting #5 (Day 1) - "PG&E 2001 Electric Grid Expansion Plan - Bay Area Project Proposals" Time: 10:00 a.m. to 4:00 p.m. Location: 77 Beale Street, Conference Room 308 San Francisco, CA 94177

Date: Monday , Sept 18, 2001 Subject: Stakeholders Meeting #5 (Day 2) - "PG&E 2001 Electric Grid Expansion Plan - Non-Bay Area Project Proposals" Time: 10:00 a.m. to 4:00 p.m. Location: 77 Beale Street, Conference Room 308 San

Francisco, CA 94177

Attached is the agenda for the meeting. If you have any additional questions about this meeting, please contact Mark Esguerra (pme8@pge.com or 415-973-4380).

Regards, Mark Esguerra PG&E-Electric Transmission Planning Mail Code N3B P.O. Box 770000 San Francisco, CA 94177

where've we been? where've you been? really only stay at my house on school nites (monday/thursday). will be chez toi tonite. would LOVE to go back this weekend (it's gorgeous---TONS of iris, apple blossoms, wild flowers, etc.), but alas, we promised you're folks we'd plant tomatoes this weekend. I'm going to put down nice gravely rock around the beds, so it looks more like Italy, or France or something and we don't get all the weeds. Sorry about S.D., but it will be super nice down there. Be sure to go to Black's Beach. And golf and Torrey Pines. See you tonite?

Need an interesting project for independent study or for a course project? Consider looking into the Environmental Enterprise Corp. They match MBA student teams with environmental entrepreneurs in Latin America. They have posted available projects on www.ecofinance.net/eec. <<http://www.ecofinance.net/eec.html>>html
<<http://www.ecofinance.net/eec.html>>. Typical assignments are business plan development or marketing strategies. Travel to the client/country is not required, but not discouraged either (if you have the time and money.)

This information is sent to you without Haas endorsement/approval. If you pursue this you will need to find a Haas faculty member who will accept this project as fulfillment for the requirements for their course(s). This is being sent to you only to make you aware of a potential source of projects that might fit your needs.

For further information please contact:

Subject: Contact with Prominent UC Berkeley Energy Economist

Greetings Dr. Gobbo:

If my memory serves, you should have arrived back in Italy, or will return soon. Since we met, I have spoken with Severin Borenstein, who is intimately involved with California's electricity restructuring (melodrama?) and a renowned energy economist at UC Berkeley. Severin has offered to serve as a contact for you as you continue to take on the formidable task of restructuring your country's electric industry. I've included his contact information below. And, of course, if there is ever anything I can do for you, do not hesitate to contact me.

All the best, Jeff

CSU Fresno 115kV Substation Status

Sender	rob.cone@enron.com
Recipients	[jeff.dasovich@enron.com', 'dinah.baharin@enron.com', 'richard.crevelt@enron.com', 'chris.weber@enron.com', '...
File	dasovich-j/all_documents/326.

Team

Listed below is a brief description on the status for the Project.

? EIP Associates is currently working on the CEQA Initial Draft Study. The draft will be complete on February 11th, 2000. At this point it will be in our hands for review and comment. I have scheduled for our review period to take no longer than one week. So please be prepared, the Study will be coming to you on February 14th. I want to get this Study out to public review ASAP! ? EES will be sending out an Request for Proposal (RFP) to three contractors this week to obtain costs to compare to the PG&E numbers received in their Detailed Study. The RFP will contain various sketches and documents detailing the following scopes of work. The overbuilding of the existing 12kV line to accommodate a 115kV circuit from the PG&E Herndon - Bullard Sub. to the new CSUF Sub. The installation of an underground 115kV circuit from the PG&E Herndon - Bullard Sub. to the new CSUF Sub. The yard work at the PG&E Herndon - Bullard Sub. ? Developing a strategy for the upcoming meeting with PG&E to go over the Detailed Study. I am shooting for this meeting to take place during the last week of February. I will be working with all of you in the mean time to make sure all bases are covered and that a

correct, thorough agenda is developed.

I hope this gives everyone an idea of where we stand. Feel free to call or respond back with any questions or comments.

*

ENRON * Summary - outstanding meeting with a world-class F500 company, these people understand Strategic Sourcing, there are multiple opportunities within this account, nice work by David Young to get us in front of the right people * Derry's group (50 people) handles Strategic Sourcing (SS) across 8 major spend categories for the company (IT/Telco, Pipes/Valves/Fittings, Admin Svcs, Travel & Entertainment, etc...) * They currently run a very sophisticated, off-line SS process but... have ZERO tools to manage this process on-line and are desperate for better information pre and post sourcing events * Their SS process is slow (the target for each sourcing event is 90 days, although many run beyond this) and they are frustrated by the lack of information available from their SAP system * Our solution was a direct hit with their needs - the marriage of Perfect Buyer/Supplier to speed up their req2select process was compelling, the PPD was a hit (as usual), and Perfect Insight will be huge win for them * Next steps - they want us to come back and show the product with some of their info (custom demo), we will also hit other areas of the company identified in the mtg as potential users of our solution

Accenture offering Practice job interview experience Plus \$\$\$

Sender	owner-evmba_social@haas.berkeley.edu
Recipients	[evmba_social@haas.berkeley.edu]
File	dasovich-j/all_documents/11287.

To follow is a message regarding practice interviews offered by Accenture. THIS IS NOT AN AVENUE TO A JOB WITH ACCENTURE, rather, you're helping the company to develop their interview process and train their recruiters. So if you volunteer, please don't put the press on these people . . .

Accenture is looking for seven individuals to serve as experienced practice interviewees at our San Francisco office on Thursday, May 24th. The session will be held from 1pm-5pm, and lunch will be served. In addition to earning \$50, participants will be reimbursed for their travel expenses to and from the session.

Participants will: Meet with Accenture executives to conduct practice interviews. Receive feedback from real interviewers. Get paid \$50 plus round trip transportation expenses.

Criteria : Individuals in any master's degree program with a 3.0 GPA and 2+ years of work experience.

Interested students should email resumes to Christina Roemer at christina.roemer@accenture.com. Resumes will be reviewed and potential participants will be contacted via telephone. Then a confirmation for participation will be sent via email with specific information regarding the session.

NOTE: These interviews are for PRACTICE PURPOSES ONLY and have no bearing on future interviewing and/or employment opportunities with Accenture.

Christina Roemer Accenture - St. Charles, IL People Enablement - Training Operations, Conduct & Support Phone: 1.630.444.5449 VPN: 49/45449 Email: christina.roemer@accenture.com

Reply Separator _____ Subject: More Nagging About the Project Author: Jeff.Dasovich@enron.com Date: 03/13/2001 8:18 PM

Greetings:

Sounds like I'm glad that I missed the quiz last week.

Hate to be a nag, but we've got to turn in what we're doing for our project on Thursday. I propose doing a nice, clean merger, which would allow us to do both comparative analysis (who are these companies?) and merger/valuation analysis. Mark and I talked last night and I pleaded again not to do strict accounting stuff, but if that's what folks would like to do, I can certainly suck it up. Any thoughts?

Best, Jeff

Fwd: Direct Marketing conference

Sender	rwiner@stern.nyu.edu
Recipients	[eveningmba@haas.berkeley.edu]
File	dasovich-j/inbox/955.

Date: Wed, 28 Nov 2001 16:08:12 -0500 To: mba02@haas.berkeley.edu, evening@haas.berkeley.edu From: Russell Winer <rwiner@stern.nyu.edu> Subject: Direct Marketing conference Cc: Tulin *** DELETE IF YOU ARE NOT INTERESTED IN DIRECT MARKETING*** The Direct Marketing Educational Foundation has an annual conference bringing together MBA students from top programs and leading Direct Marketing professionals. This year, the program will be held Feb. 1-3 in New York. The program is intended for MBA students who have serious career interests in direct marketing but who have not yet had a significant amount of experience in the field. More information is provided in the attached document. In the past, we have sent 2 and sometimes 3 students to the program. This e-mail is being sent to second year Haas full-time MBA students and evening program students. I would prefer that the latter applicants be at least in the second year of the program. If you are interested in attending and can commit to the dates, please send me a one-page resume and a one-paragraph statement of how you would benefit from the program. The due date for getting this information to me is Monday, Dec. 3. Please send it to my NYU e-mail address (I'm on leave here this academic year), rwiner@stern.nyu.edu. File	dasovich-j/sent/221.

Greetings folks. We should decide how we want to handle. One thing I'm not clear on and that I couldn't find in the syllabus is, what's the format for the write up? If we're called on to discuss, do we simply discuss orally, some sort of simplistic PP slides, spreadsheets, other? Anyway to discuss between now and Monday, or do we want to just take Dylan up on his offer?

Best, Jeff

Kimberly Kupiecki <kkupiecki@arpartners.com> on 09/07/2000 06:56:44 PM To: jdasovic@enron.com cc: dwindham@uclink4.berkeley.edu, kupiecki@haas.berkeley.edu, jjackson@haas.berkeley.edu Subject: Re: E220 Case #1

File	dasovich-j/all_documents/9408.

Please read this e:mail. Important detailed information provided.

Hi everyone:

I want to follow-up with each of you on some details for the upcoming Government Affairs-The Americas meeting on Friday, March 9. First thing, your contacts for this upcoming meeting will be Linda Noske (x36082) & Geriann Warner (x35036). After Tuesday, February 27, I will be out of the office and unavailable until Monday, March 12. (Aloha!)

The meeting will take place at the Woodlands Resort in the "Lakeside Room" on Friday, March 9. A continental breakfast will be available at 7:30am with the meeting beginning promptly at 8:00am and concluding by 3:00pm (see attached agenda).

The Woodlands Resort 2301 North Millbend Drive The Woodlands, TX 77380 Phone# 281-367-1100 Fax# 281-364-6274 Check-In time is 3:00pm Check-Out time is 12:00pm (see attached map)

For those of you who will be staying overnight, as an overnight guest at The Woodlands Resort, you are entitled to dinner the evening of March 8th and breakfast the next morning at the Woodlands Dining Room. You must let the server know that your meal should be charged to the Enron master account. This service is part of the meeting package that Enron has agreed to. If you have any questions, please feel free to call Linda or Geriann.

The Woodlands Resort provides transportation to and from the airport. Assistants/Coordinators, please schedule any transportation with the resort directly, their number is 281-364-6256. PARKING: Valet parking is not available, you will need to park in a parking lot on site.

ATTIRE: Friday Casual

Below, you will find a list of names with date of arrival/departure for those needing overnight accommodations. Please check this list for accuracy and get back with me ASAP if changes are needed.

2 challenges I see We do not want the "rate freeze" to end but we do want a interim rate increase. What about a temporary tax as a solution. We like taxes in our contracts - flow through. And it does not require ending rate freeze I think the front part could be stonger with references to AB1890??

"Seabron Adamson" <seabron.adamson@frontiereconomics.com> 06/27/2001 10:01 AM Please respond to seabron.adamson

To: <Jeff.Dasovich@enron.com> cc: Subject: California

Jeff:

One of my senior colleagues is visiting San Francisco on July 2nd and 3rd, with two senior members of the government of New South Wales (Australia) in tow. Frontier are advising the NSW government on their electric restructuring process. My colleague Danny Price is a real star on power markets - he has worked on it for longer than I have even.

Inevitably, these people are interested in understanding the California meltdown. We have scheduled for them to meet a range of folks in California, including two of the CPUC Comissioners, Lorreta Lynch's chief of staff, Cal ISO, PG&E, one of the generators, etc. They are forewarned that the CPUC and Davis's office will be all political bluster.

Any chance they might catch up with someone from Enron for an hour? Could buy you a nice lunch on Monday July 2nd? Enron has a substntial operation in Australia but I guess that is a bit out of your balliwick.

I realize this is a very late (and unusual request) so I completely understand if it is inconvenient or impossible.

Cheers

Seabron

Greetings Laura and Marybeth:

Laura: If you have the time and the inclination, I'd like to spend a half-hour briefing you on the energy situation. I apologize for the brevity of this note, but can fill you in more if you think that there's value in chatting.

In a nutshell, there's a concerted effort underway----one last big push----to try to get a comprehensive solution in place for California that works for the majority of constituencies (i.e., broad coalition right and left of center).

The deal would be bi-partisan.

If successful, the deal would:

Put rates in place that reflect and cover costs, repay debts, send the right price signals for efficiency, but fall short of "shock therapy." Return the utility to creditworthiness as a result of the new rates. Use the minimum amount of State- and utility-backed bonds to finance the solution Turn the procurement role back over to the utilities (and away from the State) once creditworthiness is established---3-6 months following the rate changes. Establish the competitive market structure that California was promised but never got---consumer choice for all customers; 18-24 months later, large industrial would

be required to procure electricity needs from the market. NOT include government takeovers of the industry (e.g., sale of utility transmission assets to the State would not be part of any deal). Include a contribution from large players, e.g., utilities and suppliers. Resolve the myriad lawsuits, investigations, etc.

Those involved still believe that there is a need for a group of "wise persons" to help get the deal done. L. Summers is willing; others are being considered. Your name has come up. But that issue can be addressed later. The goal of a phone call would be to bring you up to speed on the events, which are breaking quickly.

Hope all is well and hope to talk to you soon. Congratulations on Haas' #7 ranking in US News and World Report.

Best, Jeff

DPCA Congressional Distributed Power Day

Sender	todoc1@aol.com
Recipients	['spencermgt@aol.com', 'kduggan@capstoneturbine.com', 'solaradc@bellatlantic.net', 'gwilliams@sempra.com', 'gss...]
File	dasovich-j/all_documents/12771.

To DPCA Friends and members:

By now you have received Dan Dessanti's email to you telling about the Congressional Distributed Power Day scheduled on June 6 (please see attached Announcement). For those of you who received this message at least twice or some reason did not receive Dan's email I apologize. We are still trying to update our mailing list.

DPCA has retained Burson-Marstellar to provide logistical guidance and assistance in the event planning. To highlight the value of this event, they will also craft and generate the proper messages to the public, Congress and the energy market on the value of distributed energy and the importance it should provide in the President's National Energy Strategy. Therefore, I have been asked by Burson to contact old, current and potential DPCA members to provide them (please use the cc's on this email) information on your respective involvement and activity in the development and use of distributed energy.

Such information should include, where relevant : 1. DE mission; 2. types of DE technologies, products, systems you manufacture, develop, deploy; 3. amount of private investment to develop these technologies, 4. collaborative projects - size and customers served, 5. number of customers served, product volume sold or deployed, nationally and internationally, 6. where you and your customers are located.

Also please provide Burson with copies of press announcements pertaining to your Distributed Energy activity across the country and the Public Affairs Contact for your respective organizations and companies.

The Burson- Marstellar contact is Greg Larson. He can be reached at 916-341-1000. His Fax number is 916-341-1000

Finally, if your organization is not a member and would like to join DPCA, and participate in this event and similar ones throughout the year please fill out the attached form ASAP. On behalf of the Executive Committee of DPCA we look forward to seeing you on June 6.

Thank You Tod O'Connor 818-883-1038 (o) 818-317-9804 (cell)

A Special Offer for Wine Lovers!

Sender	mondavi.um.a.5.14@webmail.wineenthusiast.net
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/inbox/850.

Dear Friend,

Happy Holidays. At The Wine Enthusiast we're committed to offering you the finest selection of wine cellars and unique wine accessories. We also love to let you in on opportunities for new adventures in wine.

Our friends at Robert Mondavi have graciously extended a special offer for membership in their wine club, Robert Mondavi Ensemble. Ensemble provides access to limited, pre-release and library vintages from this world-renowned winemaker at special member prices. In addition, you'll enjoy member benefits at Robert Mondavi Winery, including special pricing, VIP tours and invitations to exclusive Ensemble events.

As an Ensemble member, you will receive four Seasonal Shipments per year that each include 2-5 bottles of wine. The special Ensemble price is \$75 to \$100 per shipment after applying your 15% member discount (plus shipping and applicable tax). Join Ensemble on or before December 31, 2001, and Robert Mondavi will include two elegant wineglasses with your first shipment.

You are invited to review the current and past shipments of Robert Mondavi Ensemble to see the quality and variety of wines offered.

Visit Ensemble Online - <http://webmail.wineenthusiast.net/UM/T.asp?A5.14.8.1.50456> View Current Shipments -
<http://webmail.wineenthusiast.net/UM/T.asp?A5.14.8.2.50456> View Past Shipments -
<http://webmail.wineenthusiast.net/UM/T.asp?A5.14.8.3.50456>

Enjoy the member benefits of Robert Mondavi Ensemble, or give someone close to you a holiday gift that lasts year-round. Visit Ensemble Online or call the Ensemble Concierge at 1.888.766.6328, ext. 3490 for more information on this special offer.

Wishing you and your loved ones a safe and joyous holiday season.

By law, Robert Mondavi can only ship to recipients in the following states: CA, CO, IA, ID, IL, MN, MO, ND, NE, NM, OR, WA, WI and WV. Some restrictions and limits may apply. Void where prohibited by law.

You are receiving the email because you have subscribed to this list. If you would like to remove yourself from this list, please click: <http://webmail.wineenthusiast.net/UM/U.asp?B5.14.14.50456> and you will be removed immediately! Thank you!

FROM: Don Santa, Regulatory Affairs Committee Chair Joe Hartsoe, Power Marketing Working Group Chair Julie Simon, Vice President of Policy Mark Bennett, Senior Manager of Policy

DATE: September 25, 2000

RE: Boston Pacific Statistical Research Project

Attached you will find a draft of a statistical research project, "A First Look at Price Spikes, Price Caps, and Their Effect on the Emergence of a Fully Competitive Electricity Market," prepared by Boston Pacific Company, Inc. The project was

commissioned by both EPSA and several members, all of whom had input into the development of the project. The goal of the project is to provide some statistical background for the concerns surrounding the high electricity prices in California this summer.

Please review the attached document so we can discuss it on our weekly Power Marketers conference call and distribute the final product to FERC by the end of the week. The call will be held on Wednesday, September 27th at 11:00 a.m. To access the call, dial 1-800-937-6563 and ask for the Julie Simon/EPSA call. If you have any questions, please contact Julie Simon at 202-789-7200 or jsimon@epsa.org.

POWER conference on electricity restructuring

Sender	borenste@haas.berkeley.edu
Recipients	[jeff.dasovich@enron.com]
File	dasovich-j/all_documents/8749.

Hi Jeff:

March seems a long ways away right now, but we are trying to put together the program for the sixth annual POWER Conference on Electricity Industry Restructuring, which will be March 16 in Berkeley. The conference is divided into 4 sessions, each with two papers. We would like to invite you to be a discussant in the fourth session (program below). It would involve just a 10 minute discussion of one or both papers and then participating in the Q&A. Would you be interested?

Severin

Severin Borenstein

E.T. Grether Professor of Business Administration and Public Policy Director Haas School of Business U.C. Energy Institute University of California 2539 Channing Way Berkeley, CA 94720-1900 Berkeley, CA 94720-5180 (p) 510-642-3689 (p) 510-642-5145 (f) 707-885-2508 <http://www.ucei.org>

Email: borenste@haas.berkeley.edu WWW: <http://haas.berkeley.edu/~borenste>

Session #1

Greg Crawford (Duke) , Joe Crespo (UNC), and Helen Tauchen (UNC). "Bidding Asymmetries in Multi-Unit Auctions: Implications of Bid Function Equilibria in the British Spot Market for Electricity."

Steven Puller (UC Berkeley). "Pricing and Firm Conduct in California's Deregulated Electricity Market."

Discussants: Peter Carmon (U of Maryland), Anjali Sheffrin (California ISO)

Session #2

Frank Wolak (Stanford). "Identification and Estimation of Cost Functions Using Observed Bid Data: An Application to Electricity Markets."

Jeffrey Lien (Maryland). "Forward Contracts and the Curse of Market Power."

Discussants: Richard Green (University of Hull, UK),

Session #3

James Bushnell and Erin Mansur (UCEI), "The Impact of Retail Price Deregulation on Electricity Consumption in San Diego"

Julie Berry Cullen (Michigan), Leora Friedberg (Virginia) and Catherine Wolfram (UC Berkeley). "Consumption and Home Energy Costs: How Prevalent is the 'Heat or Eat' Decision?"

Discussants:

Session #4

Paul Joskow (MIT) and Edward Kahn (Analysis Group). "A Quantitative Analysis of Pricing Behavior in California's Wholesale Electricity Market During Summer 2000."

Dallas Burtraw, Karen Palmer, Ranjit Bhavirkar, and Anthony Paul (Resources for the Future). "Electricity Restructuring and the Cost of Pollution Reduction."

Discussants:

DATE: October 17, 2000

RE: RTO Filing Conference Call Schedule UPDATE

In the light of the flurry of recent filings, we have revised the RTO conference call schedule. Since PJM made its RTO filing on October 11th, and RTO West has made public its intent to file its substantive RTO proposal one week after the October 16th deadline, we will discuss the PJM filing on Friday in place of RTO West. We will schedule a call on RTO West and any other significant filings that may be made for Friday, October 27th. A schedule for those calls will follow.

Friday, October 20 ? 1:30 PM PJM - Filing available at www.pjm.com, under the "Documents" link, then under "FERC Filings"

? 2:30 PM SPP/Entergy -SPP's filing available at www.spp.org; Entergy's filing available at www.entergy.com, under "Company Information," then under "Transmission Business"

? 3:30 PM Desert STAR - Filing will be available at www.dstarnet.com

Monday, October 23 ? 10:00 AM Grid South Transco - Filing available at www.gridsouth.com, under "FERC Filing Documents"

? 11:00 AM Grid Florida - Filing available at www.flatransco.com, under "Filing Documents"

? 12:00 AM Southern Gridco - will be at www.southernco.com later this week

To access the calls, dial 1-800-937-6563 and ask for the Julie Simon/EPSA call. If you have any questions, please contact Julie Simon at 202-789-7200 or jsimon@epsa.org.

To: "Energy Restructuring Stakeholders" <ibarreto@caem.org> cc: Subject: DOE-NARUC North American Summit announces new speakers and an online bulletin board

[[MAPI 1.0 storage : 5416 in winmail.dat]]

NARUC and DOE are the hosting the North American Summit on Harmonizing Business Practices in Energy Restructuring in Dallas, Texas, on November 29 to December 1. This email is an update on recent developments in the Summit.

Newly confirmed speakers include Commissioner Linda Breathitt, Federal Energy Regulatory Commission; Rep. Joe Barton (R-Texas), chairman of the House Energy and Power Subcommittee; Phil Sharp, Lecturer in Public Policy, Kennedy School of Government, Harvard University; Kurt Yaeger, president and CEO, Electric Power Research Institute; Bob Anderson, commissioner, Montana Public Service Commission; Karen O'Neill, vice president for new markets, GreenMountain.com; Steve Ward, public advocate, Maine Attorney General's office; Donato Eassay, vice president, securities research and economics, Merrill Lynch; Rick Rumbarger, president and CEO, PowerTrust.com; Kathleen Magruder, Vice President, Government Affairs, The New Power Company (a joint venture of IBM, Enron, and AOL)

We have established a bulletin board for the Summit. You can access the bulletin board through the following link: <http://www.energymarkets.org/cgi-bin/Ultimate.cgi?action=intro>. The Forums in this board will permit you to ask questions or raise issues for the speakers on each of the panels at the Summit.

You can register for the Summit at <http://www.energymarkets.org/registration.htm>.

Information on reserving a room at the Adams Mark is at http://www.energymarkets.org/city_site.htm.

Please forward this email to colleagues who may be interested in the subject of the Summit.

Thanks!

FERC Investigation on California

Sender	sarah.novosel@enron.com
Recipients	[jeff.dasovich@enron.com', 'richard.shapiro@enron.com', 'james.steffes@enron.com']
File	dasovich-j/notes_inbox/807.

This is just a rumor, but we heard on the EPSA call today that Scott Miller is trying to get his report on the California part of his investigation to the Commissioners by Friday of this week.

Also, the EPSA/Boston Pacific paper continues to be revised, but EPSA wants to get it to FERC as soon as possible (but if Scott completes his report by Friday it may not be in time for Scott's report), so they have asked us to review the report and Executive Summary and get comments back to them for a conference call on Friday. Since we will be at FERC during the EPSA call, we will need to get any comments we may have to Julie by Thursday evening or Friday morning.

Thanks everyone.

Sarah

Subject: Boston Pacific Statistical Research Project

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketing Working Group

FROM: Don Santa, Regulatory Affairs Committee Chair Joe Hartsoe, Power Marketing Working Group Chair Julie Simon, Vice President of Policy Mark Bennett, Senior Manager of Policy

DATE: October 4, 2000

RE: Boston Pacific Statistical Research Project

Attached is the latest draft of the full Boston Pacific statistical research project, reflecting the comments made by EPSA members. Both clean and redlined versions are attached. There are two major changes in the project: 1) the seven-page summary is the Executive Summary of the report; and 2) all cost estimates for new peakers have been removed.

Please review the documents so we can discuss them on a conference call on Friday, October 6th at 11:00 a.m. EST and then release it to Scott Miller for the FERC investigation. Please dial 1-800-937-6563 and ask for the Julie Simon/EPSA call. If you have any questions or comments, please contact Julie Simon at 202-789-7200 or jsimon@epsa.org before the Friday call.

Credit Suisse First Boston <Paul_Patterson@xmr3.com> 01/25/2001 07:33 AM

To: chip.schneider@enron.com cc: Subject: Governor Gives Limited Information on Auction

Credit Suisse First Boston Paul Patterson Good morning, Here are some of the recent developments in the California power crisis: ? Yesterday evening, Governor Davis revealed preliminary results of the DWR's auction for long-term forward power contracts. 39 bidders participated, with an average weighted bid of \$0.069 per kWh excluding "Super Peak" periods. ? However, the governor did not discuss the quantity of power actually bid, the breakdown between offers for base-load, peak, and off-peak power, or provisions for ancillary services. In our opinion, these are exceedingly important issues that need to be known to adequately determine the "success" of any auction. ? Republican Assembly leader Bill Campbell is reportedly working on an alternative bill to Speaker Hertzberg's proposed bill. Reportedly Campbell's bill would call for the state to arrange long-term contracts for the utilities, in exchange for the option to purchase ownership stakes. ? We believe that the actual results of the long-term contract auctions should be a key point of focus for investors and may help determine what headroom, if any, the utilities could have. We believe that investors should remain aware of the high risk still associated with shares of PCG (\$9.94, Hold) and EIX (\$9.63, Hold).

Paul Patterson, 212-325-5876 Neil Stein, 212-325-4217 Wen-Wen Chen, 212-538-0223 Emily Lao Chua, 212-325-1982

SVMG ENERGY COMMITTEE MEMBERS & LIAISON REPRESENTATIVES - FYI

Bay Area Action+Peninsula Conservation Center Foundation (BAA+PCCF) presents

A Community Forum on Energy

Tuesday, May 22, 7:00 p.m. FREE Admission

Have you been wondering what's really going on with the energy crisis? Curious about Bush's energy policy (announced this morning)? Then join us for the Peninsula Environmental Forum on Tuesday, May 22 at 7 p.m. at the Peninsula Conservation Center. The forum will provide a conceptual overview of our global energy challenges, why it is important to support the development of renewable energy, and practical advice on how we can act now to reduce energy consumption.

Speakers:

Craig Diamond is Director of Business Development in the Environment Division of the Electric Power Research Institute. He is also on the Board of Directors of BAA+PCCF. He has ten years of experience in environmental policy and strategic environmental consulting, and has worked at an internet startup company. Craig has a Masters in Public Policy from the University of Michigan, and an undergraduate degree in biology from Tufts University.

Dan Lieberman is Program Manager for Green Pricing and Energy Efficiency at the non-profit Center for Resource Solutions. Prior to joining CRS, Dan worked as Energy Product Manager at Utility.com, an internet-based green power marketer. Dan has a decade of experience in resource efficiency issues, including positions at local, state, and federal agencies. He received MBA and Master of Public Affairs degrees from The University of Texas at Austin.

The Peninsula Environmental Forum is a monthly event held at the Peninsula Conservation Center, located at 3921 E. Bayshore Rd., Palo Alto. For more information on the energy forum, contact David Coale at 650.962.9876 ext. 309. For more information on the Peninsula Environmental Forum series, contact Peter Drekmeier at 650.962.9876 ext. 302.

Groovin' Peer-to-Peer They may not be able to tell you what it is, exactly, but they agree it's going to be really big. The man who invented Lotus Notes is back in the news after three years in deep stealth mode with his new company, Groove Networks. Groove will be taking the wraps off today at Internet World, and outlets ran stories about Ray Ozzie's new thing. It's a platform for peer-to-peer communications - so the reporters describing it sounded collectively like the blind men with the elephant. Among the sound bites they collected from analysts: "Ray Ozzie is Napsterizing Notes" (Michael Schrage in the New York Times); "This could be the next killer application for the Internet" (Esther Dyson in the Wall Street Journal); "Has the potential of being the AOL instant messaging of the business community" (David Marshak in the Boston Globe). Most outlets waited until today to run their Groove stories, but Techweb posted yesterday noon. Consequently their story was filled out with quotes from patent filings and the comments of anonymous sources, one of whom spoke "before he realized his nondisclosure agreement had not expired." Reporter Barbara Darrow got on-the-record comments from analyst Judith Hurwitz and from Dan Bricklin, one of the fathers of the spreadsheet (and Ozzie's former boss). Groove's software will be available for free download starting today, and most of the coverage centered on the give-it-away business model. The Wall Street Journal's William M. Bulkeley alone detailed the version Groove plans to sell to businesses. The Globe's Hiawatha Bray quoted an Aberdeen Group analyst thus: "It's a successful technology in my estimation, but the business model is a little less secure." * Keith Dawson

IMPORTANT! New Accounts Payable System

Recipients	['pbray@newpower.com', 'rob.bakondy@enron.com', 'joseph.alamo@enron.com']
File	dasovich-j/all_documents/12142.

Hi All-

Enron has decided to outsource our accounts payable department and also implement a whole new system for paying invoices. What this means to all of us is you may receive email(s) from iBuyit Payables. These are very important emails! These are invoices that need to be paid. Any ENA people receiving invoices should automatically assume they go to me.

As for Sue's group I think any invoices you receive will need to go to Joseph. If you are unsure please let he or I know and we can figure out which one of us should get the invoice.

Here is the irritating part: You can not just forward the iBuyit Payables email to me/him. You must click onto the first link in the email (see example below). Then log on to the iBuyit Payables system using your P00# and log-on password (these are the same P00# and password you use to access eHRonline). At this point you will be at your iBuyit Payables in-box. I pasted a copy of my in-box below as an example. There are boxes to check if you want to forward the invoice. If you check them all then click on 'Quick Forward' a forward box will appear. Type in mine, or Joseph's (if it's his invoice) last name in the 'last name' box, then click search. From there you can click 'Forward'. I will not only ensure the invoice is paid, but also give the vendor the correct information for future invoices.

Please bare with me during this time. This whole process isn't going to be very much fun for any of us. However, I have made it my priority to have this new invoice situation organized as quickly as possible. If anyone has any questions please let me know. On one last note: All paper invoices should still be given directly to me then I can send them to A/P for scanning.

Thanks, April Hrach Administrative Coordinator Phone: 415-782-7825 Fax: 415-782-7851

EXAMPLE EMAIL:

Please do not reply to this e-mail.

You are receiving this message because an invoice requiring coding, issue resolution, or approval has been submitted to your iBuyit Payables in-box. This requires your action through iBuyit Payables.

To launch iBuyit Payables, click on the link below: <http://iBuyitPayables.enron.com> (This is the link you need to click on)

Note: Log into iBuyitPayables using the same Employee PID (P-Number) and Password you use to enter the eHRonline system and/or SAP.

First time iBuyit Payables user? For training materials, click on the link below:

http://sap.enron.com/sap_doclib/user/file_list.asp?cabinet_id=265

Need help? Please contact the ISC Call Center at (713) 345-4727.

EXAMPLE iBuyit Payables in-box:

Re: FERC Investigation on California

Sender	jeff.dasovich@enron.com
Recipients	['sarah.novosel@enron.com', 'mary.hain@enron.com', 'joe.hartsoe@enron.com', 'james.steffes@enron.com']
File	dasovich-j/all_documents/2077.

Thanks, Sarah. Question: Could we, and should we, attempt to pre-empt the FERC report and try to get press coverage of the BP paper before FERC releases the results of its investigation?

Sarah Novosel 10/04/2000 11:58 AM

To: Richard Shapiro/NA/Enron@Enron, James D Steffes/NA/Enron@Enron, Jeff Dasovich/NA/Enron@Enron, Susan J Mara/SFO/EES@EES, Mona L Petrochko/SFO/EES@EES, Joe Hartsoe/Corp/Enron@ENRON, Mary

Hain/HOU/ECT@ECT, Paul Kaufman/PDX/ECT@ECT cc: Subject: FERC Investigation on California

This is just a rumor, but we heard on the EPSA call today that Scott Miller is trying to get his report on the California part of his investigation to the Commissioners by Friday of this week.

Also, the EPSA/Boston Pacific paper continues to be revised, but EPSA wants to get it to FERC as soon as possible (but if Scott completes his report by Friday it may not be in time for Scott's report), so they have asked us to review the report and Executive Summary and get comments back to them for a conference call on Friday. Since we will be at FERC during the EPSA call, we will need to get any comments we may have to Julie by Thursday evening or Friday morning.

Thanks everyone.

Sarah

Subject: Boston Pacific Statistical Research Project

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketing Working Group

FROM: Don Santa, Regulatory Affairs Committee Chair Joe Hartsoe, Power Marketing Working Group Chair Julie Simon, Vice President of Policy Mark Bennett, Senior Manager of Policy

DATE: October 4, 2000

RE: Boston Pacific Statistical Research Project

Attached is the latest draft of the full Boston Pacific statistical research project, reflecting the comments made by EPSA members. Both clean and redlined versions are attached. There are two major changes in the project: 1) the seven-page summary is the Executive Summary of the report; and 2) all cost estimates for new peakers have been removed.

Please review the documents so we can discuss them on a conference call on Friday, October 6th at 11:00 a.m. EST and then release it to Scott Miller for the FERC investigation. Please dial 1-800-937-6563 and ask for the Julie Simon/EPSA call. If you have any questions or comments, please contact Julie Simon at 202-789-7200 or jsimon@epsa.org before the Friday call.

New Study Ranks State Progress on Restructuring

Sender	owner-red_index_private_sector@caem.org
Recipients	['red_index_private_sector@caem.org']
File	dasovich-j/all_documents/383.

The Center for the Advancement of Energy Markets has issued the Retail Energy Deregulation Index 2000 (RED Index).

The RED Index shows that * Pennsylvania and New York, with scores of 59 and 58 out of 100, respectively, lead the nation in customer choice. * California, the pioneer in electric restructuring, surprisingly ranks only 11th, with a score of 34. * Texas, a relative newcomer to restructuring, leads the South with a score of 45 and a ranking of seventh in the nation. * The national average score is 18, but that rises to 20.4 when weighted by sales volume and 23.3 when weighted by revenue.

The Center for the Advancement of Energy Markets (CAEM) is an independent, nonprofit think tank whose mission is to promote an effective transition from the monopoly model of regulation to the competitive or customer choice model. Ken Malloy, President of CAEM and primary author of the RED Index, has been a public official with the Federal Energy Regulatory Commission, the Illinois Commerce Commission, and the U.S. Department of Energy.

Is there a correlation between states with higher electric prices and states' progress toward restructuring? There is a stronger movement in states that rank higher in average price, since all contiguous states scoring in the top 10 for price also were in the top 20 in the RED Index. But this movement is no confined to high priced states. Nevada, Montana, and Texas all are below average states on price but are ranked in the top 10 on the RED Index.

RED Index 2000 is a 90-page study that measures the progress states have made in moving from the monopoly model of public utility regulation to the competitive model. A RED Index score of 0 represents the monopoly model and a score of 100 represents complete and effective implementation of the competitive model. The index focuses on retail competition and currently only covers electric restructuring, and will be updated twice a year.

CAEM developed the RED Index by identifying 18 key attributes that are the foundation for an effective transition to competition. These attributes were weighted and scores were assigned to the different options that states have regarding that attribute. CAEM then conducted research to determine the option chosen by each state on each of the 18 attributes. The index scores were then calculated based on the methodology and research.

CAEM provides the RED Index at no fee to state public utility commissions, state energy offices, consumer organizations, governmental agencies, educational, and nonprofit, public interest organizations. CAEM funds the study by charging a fee of \$495 to private sector companies.

Private sector organizations can order a copy from redindex@caem.org, through the center website at www.caem.org, or by calling 703-250-1580.

Please feel free to contact me with any questions.

Ralph per my separate email on retail electricity competition Stephen ----- Original Message ----- From: Severin Borenstein <borenste@Haas.Berkeley.EDU> To: Stephen Littlechild <littlechild@tanworth.mercianet.co.uk> Sent: Friday, September 08, 2000 1:19 AM Subject: Conference at Berkeley

Hi Stephen: I'm on the organizing committee of a conference that is being put on by the Goldman School of Public Policy on electricity deregulation. Unlike the annual UCEI conference, this will not be papers presented by researchers, but rather very short introductions (e.g., 5 min), followed by round-table discussions and then questions from the audience. It will probably take place on monday November 13, though it could get moved to thursday Nov 17. I've been asked to invite you to participate in this conference, and I'd really like to encourage you to do so. Also invited will be FERC Commissioner Hoecker, CalPUC President Loretta Lynch, and U.S. Representatives Markey and Largent. They are also trying to get the CEOs of Enron, Duke Power, and a couple other producers. Carl Shapiro will be on one of the panels, as will I. I realize that this is a long way to travel for a one-day conference. I'm hoping that you have other invites in the U.S. you could piece together with it. Also, I'd like to invite you to give a seminar here at UCEI while you are in town. There is a lot going on in CA in electricity and a lot of research on the subject. Besides all those you know of here, Catherine Wolfram has moved this year from Harvard to Berkeley, so is also now here permanently. If this doesn't work out, I hope we can make it happen another time. In addition, it is looking likely that UCEI will receive funding from the state to open a Center for the Study of Electricity Markets, which would allow us to invite a number of visitors at the same time to do research here at Berkeley. If that comes through, perhaps we could arrange a longer visit in Berkeley? I look forward to hearing from you. Severin

Dear Executive,

The Center for Information Technology & Marketplace Transformation (CITM) at the Haas School of Business is a world-famous research organization that explores the links between ecommerce, technology, and business strategy and processes.? For more information about CITM, please see:

www.haas.berkeley.edu/citm

CITM recently began a new project, "Enabling eBusiness," that studies the migration to the Internet of companies across all industries.? Surveys and field studies at user and vendor companies and interaction with industry organizations and other research institutions will provide insight into, and case studies on, such topics as aligning business and IT strategy, best practices, build vs. buy, and organization structures.?

To kick off the Enabling Ebusiness project, CITM held a major conference Dec. 6, 2000 with experts from industry and academia who focussed on the opportunities presented by Ebusiness, strategies for achieving them and for overcoming legacies (technologies, processes, people and organizations).? The keynote speaker was George Surdu, Director of Information Technology Services for the Ford Motor Company, one of the sponsors of CITM.

The conference was very well received and it is apparent that these issues are of interest to many companies.? Therefore, CITM is offering another conference on May 22, from 9 - 5 with a reception following in the early evening.? Our keynote speaker will be Steve Ellis, EVP of Wells Fargo's Wholesale Internet Solutions Group.? Also on the agenda: J_rgen Lutz, eProcurement, Bayer AG Leverkusen, and Mark V. Klopp, Managing Director, Digital Business Ventures, Eastman Chemical Company.? We expect other interesting speakers making for an absorbing and rewarding day.

Conference registration fee:\$950 early registration; \$1250 after May 7 If you are interested in attending, please send an email to

The tail is beginning to wag the dog. Although the QFs represent only about 3000MW of capacity, the gas (and then coal) QFs have the least ability to withstand a further delay in payment, given their relative lack of liquidity and high level of fixed obligations (O&M, debt) and unreimbursed fuel expenses. The legislature needs to move quickly to stem the tide.

-----Original Message-----

From: Paul Patterson <Paul_Patterson@xmr3.com>@ENRON
[mailto:IMCEANOTES-Paul+20Patterson+20+3CPaul+5FPatterson+40xmr3+2Ecom+3E+4=0ENRON@ENRON.com]=20 Sent: Wednesday, March 14, 2001 6:37 AM To: Schneider, Chip Subject: EIX, PCG: Edison Fights Lien Request; Conservation Measures=20 Introduced

Credit Suisse First Boston Paul Patterson Good morning, -Yesterday, Edison International indicated that Caithness, a QF, is seeking a lien on an Edison asset that would give it a secured claim in the event of bankruptcy. Edison stated that it would fight any U.S. court decision in favor of Caithness, which could come as early as tomorrow. -Because of their dire financial situation, we believe that QFs like Caithness pose the greatest risk of filing an involuntary

bankruptcy petiti= on=20 against PG&E and Edison International. -Last week, state legislators modified SB47X, the draft bill to lower QF=20 prices, in an effort to speed its passage. Reportedly, legislators are tryi= ng=20 to lower average QF prices to \$0.079 per kWh. The CPUC is unlikely to decid= e=20 on revenue allocation until the bill is passed. -This week, California moved forward with demand- and supply-side programs,= =20 including the governor=01,s plan to give a 20% rebate to customers that red= uce=20 power consumption by 20%. Also, three Western governors made another reques= t=20 to FERC to cap wholesale prices. -Although Governor Davis and the utilities continue to negotiate a utility= =20 recovery plan, it is unclear if the state legislature will pass such a plan= .=20 Therefore, we suggest that investors avoid EIX (\$14.88, Hold) and PCG=20 (\$14.24, Hold), unless they have a high tolerance for risk and volatility.

Please call us with any questions you may have. Regards, Paul Patterson, 212-325-5876 Neil Stein, 212-325-4217 Wen-Wen Chen, 212-538-0223 Emily Lao Chua, 212-325-1982

Bill Perry	
Sender	cameron@perfect.com
Recipients	['scottwl@hotmail.com', 'nancy.sellers@robertmondavi.com', 'eldon@direcpc.com']
File	dasovich-j/all_documents/28322.

I am sorry I could not call you earlier to talk about this; I have been in Washington D.C. the last few days with my CEO for meetings.

First of all I want to say that I am very, very sorry that you have had to deal with the Bill Perry issue in any way. I think it is entirely inappropriate to involve either of you and I am sure it has caused you distress. I am also sorry that I went onto Bill Perry=01,s property last weekend and I promise to NEVER go on Bill Perry=01,s property again.

Last weekend the 6 of us took the usual hike around the Johansson=01,s prop= erty and ended up on Roseman Creek road next to Bill Perry=01,s property with th= e observation deck. Scott has never seen the deck and has heard a lot about it so I (in not my best judgment) thought it would be ok to quickly go up t= o the deck and check it out for a couple minutes and come right back. We did not intend on hanging out on the deck or spending more than a couple of minutes. All I wanted to do was show Scotty where it was and what it looke= d like. Kent and Scott had been talking about building one on our property and I wanted them to see it. We went in the middle of the day and we did not bring any drinks, bottles, cigarettes, or food. We purposely went out there with nothing, spent a couple of minutes and came right back. I am no= t saying that this was right (because it was still trespassing), but we did not go out there as we had in the past.

Then, on Sunday, Bill Perry came (unannounced) to the dome and started yelling at me. He called me horrible names and said he was calling the Sheriff. I only spoke nicely to him and apologized repeatedly. I also promised him that I would never go onto his property again. He embarrassed me and said bad things about me and both of you regarding things that are not even related to this event. He also said that people continue to go on his deck and disrespect his property. This is when I knew that it is not just us that has used his deck. I have not been on his property in two years and I know Prentice and Jeff haven=01,t either. He complained that things have still be mistreated and he blamed me for things that I could no= t have done. I know that what I did was not right and I tried to let him see that I was sincere about never going there again, but he would not listen.

I know that I have to deal with this issue. I assume you have the name of the Sheriff so I can speak with him (and I hope you referred him immediatel= y to me). You should not have been called in this matter and that is VERY upsetting to me. You did not trespass. Trespassing is not a crime that is against another person=01,s property, but rather against another person. T= here is no reason why you should be involved. I am a 32 year old adult, full capable of being responsible for my

own actions. I may make mistakes, but it is not your responsibility to answer for those mistakes and I am sorry that you have been put in this position.

From: Paul Patterson <Paul_Patterson@xmr3.com>@ENRON=20 [mailto:IMCEANOTES-Paul+20Patterson+20+3CPaul+5FPatterson+40xmr3+2Ecom+3E+4= 0ENRON@ENRON.com]=20 Sent: Tuesday, March 06, 2001 7:13 AM To: Schneider, Chip Subject: EIX, PCG: Governor Announces Forward Contracts; CPUC to Discuss=20 Revenue Allocation

Credit Suisse First Boston Paul Patterson Good morning, Recent developments in California's power crisis:

-Yesterday, Governor Davis announced that the DWR has signed 40 contracts f= or=20 8,886 MW per year, over the next 10 years and at an average price of \$69 pe= r=20 mWh. The DWR also has agreements in =01&principle=018 to cover 65-70% of it= s net=20 short power position this summer. -We remain cautious on the power purchase agreements, given past results of= =20 the state=01,s power auctions. At least two generators have indicated that,= =20 while they have signed MOUs with the DWR, the agreements are not definitive= =20 and issues still need to be resolved. -Also yesterday, District Court Judge Lew scheduled a trial date of July 31= =20 for Edison=01,s lawsuit against the CPUC. -On Thursday, the CPUC will address several utility issues. Of particular= =20 importance is the allocation of customer revenues to the DWR. The method of= =20 allocation is expected to determine whether the DWR or the utilities are at= =20 greater risk for undercollection. -We believe many uncertainties still remain. It is unclear when the state= =01,s=20 conceptual agreements with the utilities and the generators will be finaliz= ed=20 in addition to how the legislature will receive the agreements. -Consequently, we believe that investors should avoid EIX (\$15.21, Hold) an= d=20 PCG (\$14.75, Hold), unless they have a high tolerance for risk and volatili= ty.

Please call us with any questions you may have. Regards, Paul Patterson, 212-325-5876 Neil Stein, 212-325-4217 Wen-Wen Chen, 212-538-0223 Emily Lao Chua, 212-325-1982

Rob--

We should probably tread carefully in this area. My understanding is that University is the lead agency for permitting, and if the mitigated negative declaration you provided to me is the final one, then I don't know if the City has the authority to require a conditional use permit other than the negative declaration that the University obtained (prepared?). However, if the neg dec was only preliminary, then the City has the opportunity to provide comments, and I suppose it's theoretically possible that the City could seek an injunction. I don't know if the City has separate rules, but I do know that under Fresno County rules, items that have a utility or quasi-utility purpose are oftentimes exempt from the CUP process (unless I suppose that the CEQA study requires it).

I think we should let the University take the lead on this because if it turns out that the City is going to inject itself in the permitting process then we don't want get in the middle of yet another delay-causing dispute.

Let me know how I can help.

AW

From: Rob Cone/Western Region/The Bentley Company@Exchange on 04/18/2000 02:47 PM CDT To: Richard Crevelt/Western Region/The Bentley Company@Exchange, Dirk vanUlden/Western Region/The Bentley Company@Exchange, Geoff Pollard/Western Region/The Bentley Company@Exchange, Andrew Wu/HOU/EES@EES, Jeff Dasovich/SFO/EES@EES cc: Subject: Minutes from call with City of Fresno, Attorney

I received a phone call today from David Hale, City Attorney, with the City of Fresno. The following items below are issues that David brought up regarding the CSU Fresno Project. They are centered around the CEQA document that was provided to them.

? David can not make recommendations and/or comments to the City's Team with the scope of the 115kV line from the PG&E Herndon/Bullard Sub. to the CSU Fresno Sub. not being fully defined. i.e. overhead or under ground, PG&E or CSU Fresno owning the line. ? David has numerous issues either way should PG&E owns the line or CSU Fresno. ? David is investigating whether or not there is a public utility easement located at Bullard. He indicated that the likelihood is high that there is. ? If PG&E installs and owns the line then there are set of rules that the City has in place for this work to be conducted by a public utility governed by the CPUC. The easement issues are broad under this scenario. ? David indicated that should PG&E install and own the 115kV line, that an encroachment permit will not suffice. He indicated that a Conditional Use Permit would need to be utilized. ? David stated that should CSU Fresno want to install and own the 115kV line that this is an area that is "convoluted and complex". There would be a tremendous amount of legal issues around this. i.e. can the City grant this easement to the University? With the line being dedicated to the University what does that mean? Does CSUF have a legal right to this easement? ? It sounds like the City has never dealt with this type of issue and does not have set of rules and/or regulations dealing with this. ? David stated that he might be in the next meeting with the University, EES, and Fresno.

I will advise everyone should there be any other developments in this area prior to the upcoming meeting with the City. Let me know if you have any comments or questions.

I have just asked the CPUC for time to speak on Edison's behalf. I am still drafting our response (just got permission/instructions from my management) We intend to support the settlement, but suggest that, in light of the delays which have occurred in implementation, and the drastic changes which have occurred in California's energy markets, and the infrastructure proceeding that is on-going, in particular, how much additional take-away capacity is required to support the proposed interstate pipeline expansions, it may be appropriate to renegotiate some of the details of the settlement and/or for the Commission to take additional testimony/evidence.

Enron will very vigorously support the CS and I would hope that we could get as many people as possible to do the same. Let's face it, California's gas industry is a mess for the same reasons the electricity industry is a mess (despite, and perhaps contrary to, the substantially more narrow reasoning offered by the Brattle Group). The CS is a well-thought-out, well-designed program for moving forward; unlike the "interim," which takes two steps back. Can we split up the names of all the people who signed on and call them and try to get them to show up in support?

Best, Jeff

Subject: Re: Commission Oil Hearings

Watson has asked for time to speak. I'm planning to continue to support the CS. It brings some greater stability and certainty to SoCalGas' noncore rates. The allocation of backbone capacity might improve shippers' certainty of being able to move gas through Topock and Wheeler Ridge. In the short term, it's hard to say how much that might help prices, but I doubt that it would make them worse. In the longer term, if new generation on the PG&E and Kern / Mojave systems, plus the North Baja and Questar lines, actually reduce SoCalGas' throughput, then a SoCalGas city-gate market might be pretty competitive. Finally, the CS removes SoCalGas' favorite argument in favor of the peaking rate.

So what are Edison and Enron going to do?

Tom

Sarah --

Looks fine. Did Craig Roach contribute?

I wonder if we should highlight the Interconnection problems we are having with new generation? I know that most of the delays are Siting related, but it is unclear to me if the ISO or the local utility is the right point of contact. This would help us nationally and gives FERC an "answer" - enforce your Interconnection policies!!

Also, this doesn't mention any possible market flaws. Do we think that some exist? Are any of the AS markets manipulated? EPSA needs to make sure that it takes an honest approach to this situation or its credibility will be destroyed. Has Craig Roach looked into this?

Jim

Subject: California "Fact Sheet"

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketing Working Group

FROM: Donald Santa, Regulatory Affairs Committee Chair Joe Hartsoe, Power Marketing Working Group Chair Julie Simon, Vice President of Policy

DATE: August 30, 2000

RE: California "Fact Sheet"

At our meetings last week with FERC, we had a great deal of valuable factual information and policy suggestions, but they were not pulled together as a cohesive story. Based on materials provided by various companies, we have drafted the attached fact sheet entitled "California: The Real Story." It is an effort to pull together the most compelling pieces of information and policy arguments as a "leave-behind" for FERC staff and other regulators and to form the basis for any testimony at the upcoming congressional hearings.

The paper includes factual information pulled from a number of sources and Jackie Gallagher, EPSA's Research Assistant, is attempting to verify and cite as many facts as possible. To make the message convincing, we need "chapter and verse" on our facts. Please review the material carefully to be sure it is accurate and compelling. Any assistance in verifying these facts, or providing others that do a better job of telling our story, will be appreciated. You can e-mail to Jackie at jgallagher@epsa.org.

We will discuss the paper during our conference call next Wednesday, September 6 at 11:00 a.m. (EDT). To access the call, dial 1-800-937-6563 and ask for the Julie Simon/EPSA call. If you have any questions or suggestions before Wednesday, please contact Julie Simon at 202-789-7200.

EPSA study attributes lower electricity prices to competition

Wholesale Competition Contributed to Trend of Lower Power Prices, According to New EPSA Study

PR Newswire 07/23/01, 1:00p (Copyright , 2001, PR Newswire)

WASHINGTON, July 23 /PRNewswire/ -- Calls for a return to cost-plus rate regulation in the wake of the California power crisis are misplaced, according to an independent study released today that found that competitive markets contributed to a 36 percent decline in retail electricity prices among surveyed utilities.

"That decrease is in sharp contrast to the increases that consumers experienced in the days of solely cost-plus rate regulation," said Electric Power Supply Association President Lynne H. Church, who released the findings during a media luncheon in conjunction with the group's summer membership meeting. "This analysis is evidence that we should continue to move forward toward more competition in order to apply downward pressure on prices."

The study: "Assessing the 'Good Old Days' of Cost-Plus Regulation," analyzed sales data for 60 of the nation's investor-owned utilities during 1985-1999, when traditional cost-plus rate regulation began evolving toward more competition. Complete sales figures for 2000 were not yet available when the study was completed. The study was commissioned by EPSA and conducted by Craig Roach, Ph.D, principal of Boston Pacific Co.

"In the wake of the California power crisis, some people have expressed a longing for a return to the 'good' old days of cost-plus regulation, but those days were far from good," Roach said. "People seem to forget that, in the days of cost-plus regulation between 1970 and 1985, inflation-adjusted electricity prices actually increased 25 percent for residential customers and increased 86 percent for industrial/commercial customers."

"So much for the good old days," Church said. "The price increases under cost-plus regulation were precisely what drove the start of electricity competition in the early and mid-1980s."

During the 1985-1999 period, according to the analysis, inflation-adjusted electricity prices decreased an average 30 percent for residential customers and 36 percent for industrial/commercial customers.

"We should not allow the problems in California to cast a false shadow on competition," Church said. "The evidence presented in this study makes it clear that it would be counterproductive and unwise to go back to the old ways."

"It is important to understand that what happened in California resulted, in part, from market rules that prohibited basic risk management," Roach said. "Specifically, utilities were required to take on the risk of selling at a fixed price to customers, but not allowed to manage that risk by arranging contracts with fixed-price suppliers or use other risk management tools. Managing risk appropriately benefits consumers, and risk management is more efficient and effective in a truly competitive regime."

"This study bolsters our belief that the Federal Energy Regulatory Commission should continue to move expeditiously toward more efficient wholesale markets, states should continue to move quickly toward opening their retail power markets, and Congress should quickly adopt comprehensive legislation to help them along," Church said.

Note: A copy of the complete study is available at www.bostonpacific.com/powerprices.

EPSA is the national trade association representing independent power producers and power marketers active in U.S. and global power markets. As suppliers of reliable, clean, competitively priced electricity, EPSA members seek to bring the benefits of competition to all electricity customers.

I couldn't get my computer to pull AB 189 from home. I did talk to Counihan. His view is that the bill does not repeal the operative provisions of AB 1890 for DA, Sec 365. As I mentioned it does repeal the whereas part, Sec 330. He agrees, however, that as soon as it passes, the CPUC will implement ABX 1 and vote to kill DA. AReM put out a press statement on the senate passage of AB 2X78. I think you may have received it.

Kassandra Gough <kgough@calpine.com> 07/20/2001 12:09 PM

To: "arem@electric.com" <arem@electric.com> cc: Subject: Recommend Oppose of SB 78xx

Hi everyone,

I know that AREM is not opposing SB 78xx (Polanco/Sher) because it is silent on direct access; however, I want to recommend that the position be changed to oppose. I have spoken with Norm and he asked that I send this out for comment. Please look at the bill and specifically Section 13, on Page 35 (see below). I believe that if this bill were to become law direct access in SCE's, PG&E's and SDG&E territories (I believe the section stands alone so it wouldn't matter if PG&E accepted the same deal or not) would be dead. In summary, the bill would essentially allow any IOU to go back into the generation business and require the CPUC to approve rates that are sufficient to cover their reasonable cost of operation, investment and provide for a reasonable rate of return (I don't believe this is cost-based rates). The CPUC is given broad latitude over conducting proceedings, issuing orders or anything else that may be necessary to accomplish the goal of assuring that service provided by IOU's is adequate. Section 13 will kill competition, eliminate direct access and create new stranded costs. And, to add insult to injury the State Power Authority may be their partners in crime. As to the politics of the bill it was just amended to be a majority vote bill. Burton has said it is this bill or nothing. SCE is opposing the bill but there are several lobbyist who think this is all an ambush and SCE would love this bill.

Please comment on my above analysis. I would love to be wrong on this one.

Kassandra Gough Government and Legislative Manager Calpine SEC. 13. Section 454.10 is added to the Public Utilities Code, to read: 454.10. (a) In order to assure that the service provided by electrical corporations is adequate, the commission may require each electrical corporation that provides distribution service to make direct investments in electric generation facilities whose output is dedicated to serve the customers connected to its distribution grid. (b) After a hearing, the commission shall approve rates sufficient to enable the electrical corporation to recover its reasonable costs of operation, its reasonable investment in the electric generation facilities and a reasonable return on its investment, in accordance with Section 451. (c) An electric corporation may meet the obligation described in this section by entering into projects for electric generation facilities jointly with the California Consumer Power and Conservation Financing Authority. (d) The commission may conduct proceedings, enter orders and undertake such actions as it considers necessary or appropriate to carry out the provisions of this section. <<sb 78xx -Polanco.pdf>>

RE: Friday, May 4 meeting at 1:30 pm in the CMTA conference room to discuss Windfall Profits Tax bills

Due to a scheduling conflict, we are changing our Thursday, 2:00 pm meeting to Friday, May 4 at 1:30 pm.

As most of you are aware, CMTA is opposing legislation designed to impose a Windfall Profits Tax on electricity generator companies. The bills are SBX1 1 (Soto) and ABX1 128 (Corbett). Please note that the Soto bill pertains to co-generators as well as entities exclusively in the power business. That means that many of you would be directly effected. The other primary basis for opposition is that the bills would inhibit electrical supply. Please also note that, to the extent that SBX1 1 (Soto) were operative, it would impose the "windfall cost" on business taxpayers who would fund the credit given to personal income tax taxpayers.

You are invited to our lobbying strategy meeting which will be here at CMTA's offices at 980 9th Street, Suite 2200 on Friday, May 4 at 1:30 pm. Please RSVP to Pam Ross at 916-498-3320 or pross@cmta.net.

On interconnection, I think our approach has been that the ISO should be the party you have an interconnection contract with, not the utility.

James D Steffes@EES 09/06/2000 05:29 AM To: Sarah Novosel/Corp/Enron@ENRON cc: Paul Kaufman/PDX/ECT@ECT@ENRON, Joe Hartsoe@Enron, Mona L Petrochko/SFO/EES, jdasovic, Richard Shapiro/HOU/EES, Mary Hain/HOU/ECT@ECT@ENRON, Susan J Mara/SFO/EES, tim belden Subject: Re: California "Fact Sheet"

Sarah --

Looks fine. Did Craig Roach contribute?

I wonder if we should highlight the Interconnection problems we are having with new generation? I know that most of the delays are Siting related, but it is unclear to me if the ISO or the local utility is the right point of contact. This would help us nationally and gives FERC an "answer" - enforce your Interconnection policies!!

Also, this doesn't mention any possible market flaws. Do we think that some exist? Are any of the AS markets manipulated? EPSA needs to make sure that it takes an honest approach to this situation or its credibility will be destroyed. Has Craig Roach looked into this?

Jim

Sarah Novosel@ENRON 09/05/2000 02:39 PM To: James D Steffes/HOU/EES@EES, Paul Kaufman/PDX/ECT@ECT, Joe Hartsoe@Enron, Mona L Petrochko/SFO/EES@EES, jdasovic@ees.enron.com, Richard Shapiro/HOU/EES@EES, Mary Hain/HOU/ECT@ECT, Susan J Mara/SFO/EES@EES cc: Subject: California "Fact Sheet"

Here is EPSA's "Fact Sheet" on California. We're discussing it at the EPSA power marketers' weekly conference call tomorrow. We're also considering having EPSA submit this Fact Sheet to the CPUC in response to the data requests sent by the CPUC (responses are due on Friday). If you have any comments or suggested changes, please let me know (as soon as possible) in case EPSA submits this paper to the CPUC.

Thanks

Subject: California "Fact Sheet"

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketing Working Group

FROM: Donald Santa, Regulatory Affairs Committee Chair Joe Hartsoe, Power Marketing Working Group Chair Julie Simon, Vice President of Policy

DATE: August 30, 2000

RE: California "Fact Sheet"

At our meetings last week with FERC, we had a great deal of valuable factual information and policy suggestions, but they were not pulled together as a cohesive story. Based on materials provided by various companies, we have drafted the attached fact sheet entitled "California: The Real Story." It is an effort to pull together the most compelling pieces of information and policy arguments as a "leave-behind" for FERC staff and other regulators and to form the basis for any testimony at the upcoming congressional hearings.

The paper includes factual information pulled from a number of sources and Jackie Gallagher, EPSA's Research Assistant, is attempting to verify and cite as many facts as possible. To make the message convincing, we need "chapter and verse" on our facts. Please review the material carefully to be sure it is accurate and compelling. Any assistance in verifying these facts, or providing others that do a better job of telling our story, will be appreciated. You can e-mail to Jackie at jgallagher@epsa.org.

We will discuss the paper during our conference call next Wednesday, September 6 at 11:00 a.m. (EDT). To access the call, dial 1-800-937-6563 and ask for the Julie Simon/EPSA call. If you have any questions or suggestions before Wednesday, please contact Julie Simon at 202-789-7200.

File dasovich-j/all_documents/11826.

Since the case asked us to evaluate this from Munro's point of view, it is his job to examine the potential the deals in the best interest of Time's shareholders. Therefore, in my opinion we will have to incorporate the after-tax value to the Time shareholder as one piece of the puzzle. The difficulty with the tax implications to the shareholder is that we do not know the average shareholder's cost basis. It should just be a mention in our memo.

As I mention in a previous e-mail, there is no tax implication to the corporation except for the leverage and tax shield. Unless we completely recreate the DCF I don't think we can accurately quantify the tax shield advantage especially since we don't know how the additional leverage will alter the WACC, i.e. what is the optimal WACC of the combined company. Another complication is the difficulty in recreating the DCF is the timing and tax implications of the asset sales which we know to be around \$3.5 billion.

Our professor doesn't seem to require any advanced calculations. We are probably all right with some approximations.

***** Mark D. Guinney, CFA Consultant Watson Wyatt Investment Consulting 345 California Street, Ste. 1400 San Francisco, CA 94104 (415) 733-4487 ph. (415) 733-4190 fax

Jeff:

I have been looking at your numbers and I have a few questions.

1). If we look at this from the stand point of the Time shareholder's, we do not really need to worry about the make-up of Time-Paramount after the merger. Since this is an all cash deal, the purchase price will be given to Time's shareholders. This amount needs to be above the DCF of the Time-Warner deal for us to suggest it.

2). As for the taxes maybe Mark can shed some light on the issue. During the acquisition phase the only taxes that will be paid will be the capital gains paid by Time Shareholders. Paramount will not pay taxes on the purchase. Paramount's tax position will improve due to the increased debt payments. Looking at it from Time shareholder's we really don't care do we? Maybe I am wrong.

Otherwise everything looked good. I like the common sized balance sheet. I should be home all day tomorrow. Call me at 925-362-0210 and let me know how I can pitch in.

Dylan

At 08:55 PM 4/28/01 -0500, Jeff.Dasovich@enron.com wrote:

OK Gang: Well, I've been crunching numbers all day, and haven't yet gotten to the writing. I've attached Dylan's original responses for reference. Figure it'll be a memo from Time's CEO to the Time Board. I've leaving now for Mendocino, but will be back early tomorrow to finish this up. Please check out the spreadsheet. The case is sort of confusing?how do Time's analysts value Time at \$189-212, when they're trading at 109 the day before the announcement of the deal with Warner. That doesn't jive. Are they saying that, absent synergies, the combined Time/Warner is worth the enterprise value of Time at 189-212 plus the enterprise value of Warner at \$63-71 (again, the analysts valuation)? That just seems ridiculous, give where they're trading. Anyway, here's where my analysis is heading----tell me if I'm smoking crack. The deal isn't really \$175 per share. It's \$175 LESS the taxes that will have to paid (since it's a purchase deal) PLUS the value of the tax shield created by the net increase of \$8.9B in new debt that Paramount will take on. Does this seem right? Could folks look at my spreadsheet? I've got it conceptually set up, but I'm not quite sure how to calculate the taxes paid under the purchase method or the value of the tax shield (assuming that this is correct. If I'm just completely out of it with this angle, just let me know. In any case, seems that there's some value in the tax-free (Time-Warner) versus the taxable (Time-Paramount) deals. Presumably, we could take the total enterprise value of Time-Warner (nontaxed) and compared it to the total enterprise of Paramount-Time (taxed) and compare the two. I've got a hunch that the Time-Warner number may win the day, but I haven't gotten that far in the crunching yet. In any case, I'll be back around Noon tomorrow and will crank the puppy out. Best, Jeff (See attached file: Timewar_Jeff Calculations.xls)(See attached file: TimeWarner.doc)

Call - Sent on Behalf of Jeff Dodd

Those of you that are concerned about the changes to Article 1 (Change #6 in Holly's memo) regarding choice of law might like to know about California AB 256, see text below. It makes all non-California choice of law clauses ineffective in electronic contracts with California consumers, and we think it may be expanded to all consumer contracts (due to E-SIGN issues). We have a working group of people opposing the bill, which has passed the Assembly and is in the Senate. THIS BILL IS QUITE LIKELY TO PASS. So if you're concerned please help us stop it! Among numerous other problems, I think it would force all companies that sell goods to California consumers with an express warranty to provide local repair facilities or contract for local repair services (ie, it overturns the Zeos case). If you want to participate in the opposition working group please let me know. (KCaldwell-IA@ix.netcom.com.) - Kaye Caldwell ===== Text of AB 256 ===== 1799.207. Notwithstanding any other provision of law, if a consumer in this state enters a consumer contract or other transaction for the purchase or lease of goods or services primarily for personal, family, or household purposes and the consumer contract or other agreement documenting the transaction is created, generated, sent, communicated, received, or stored by electronic means, all of the following apply: (a) The consumer contract or transaction shall be governed by California law. (b) For the purpose of applying the provisions of this part, the consumer contract or transaction shall be deemed to have been made or to have occurred at the individual's residence. (c) Any action arising from or connected with the consumer contract or transaction that is commenced against the consumer shall be filed in the county or judicial district in which the consumer resided at the time the transaction was entered or resides at the time action is filed. (d) This section may not be waived or varied by agreement. Any waiver of this section is void and unenforceable as contrary to public policy. ===== End of Text of AB 256 =====

You're right, Sue. Rates can't go up w/out declaring the rate freeze over in some fashion---trying to finesse it. Thanks very much for the comments. Harry also had a good comment---don't specify the amount of rate increase in our comments; rather note that the rate increase needs to be well-reasoned and based on facts and evidence. Will make that change.

Jeff,

This looks good. It comes across as moderate in tone-- although probably no one else will ask to leave the rate freeze in place.

I have a legal question -- Under AB 1890, I don't see anyway that the CPUC can raise rates without ending the rate freeze first. Am I missing something? So, how is it clear that the CCPUC can raise the rates on Feb 1? It's clear, however, that once the retained assets are valued that the rates can be changed.

Legislative Support

Sender	paul.kaufman@enron.com
Recipients	['susan.mara@enron.com', 'mday@gmssr.com', 'jeff.dasovich@enron.com', 'sandra.mccubbin@enron.com']
File	dasovich-j/all_documents/12582.

Mike:

I regret that we had a difficult call yesterday. We greatly appreciate the good work that you do and the commitment you and your firm have to our company. Moreover, I recognize that the legislature is a difficult environment and that there is substantial pressure on you and Sandy. I also recognize that needs and demands can change quickly and, at times, our RCR process can be difficult!

All that said, however, the Government Affairs group has an obligation to use our internal and external resources in the best and most cost-effective manner. The RCR process helps us satisfy that obligation..

From our conversation yesterday and a later call with Sandy, it appears that there is some confusion on how we will use the RCR process to contract for legal support for our legislative efforts. Hopefully this e-mail will clarify the process so there is no confusion in the future and so that you can feel comfortable you are undertaking work that is authorized and for which we have a budget.

1. To begin, it appears from your e-mail yesterday that Goodin, MacBride has billings as of May 11 for approximately \$10,000 on direct access, windfall profits, the "Global Settlement," and Power Plant Siting. With respect to this work, I recognize that there may have been confusion about our budgeting and RCR approval process. These billings will be included in the RCR-approval requests discussed below.

2As we discussed yesterday, the work associated with the billings in May was conducted without any RCR approval or any budget in place. As you know we terminated the two legislative retainers at the end of April. No RCRs were filed to cover the matters on which work was completed in May.

I did receive a budget on legislative matters on May 8. However, a decision was made only yesterday to proceed on a specific matter-by-matter basis. The work in May should not have been undertaken while we considered whether to proceed with an overall legislative budget or proceed with specific RCRs. In short, the proposed budget was not RCR approval.

In the future, any work undertaken by Goodin MacBride should only be conducted pursuant to an approved RCR. If an emergency arises--i.e., an issue arises that could not have been contemplated, we can get emergency approval for work necessary to respond to the emergency. Please contact me in the event of an emergency. I can be reached through my office line--503.464.7945, pager--888.916.2262, or cell phone 503.539.4733. If I can't be reached, please contact Jim Steffes. Jim's pager number is 888.906.9676. Note that both Jim and I wear the pager at all times and respond immediately to messages left on the pager.

3. Pending RCR approval for the matters identified below, I have asked Goodin MacBride to participate in the Direct Access coalition meetings taking place today and tomorrow. In a discussion with Sandy yesterday, I agreed that Goodin MacBride should participate in a telephonic conference on the Calderon bill.

4. To the maximum extent possible, you should include Leslie Lawner in future Direct Access Coalition meetings, conference calls, legislative drafting efforts, etc.

5. If there is any confusion on whether there is RCR approval for a particular matter, please contact me before undertaking an assignment. If I am unavailable, please contact Jim Steffes.

6. Today, Sandy is filing several RCRs for legislative support on Direct Access, Siting, Windfalls Profits, and the Global Settlement. They will be considered at next Monday's RCR conference call. If they are approved, Sandy will manage the Goodin MacBride assignments associated with Direct Access, Siting, and Windfalls Profits.

7. Jeff Dasovich will manage all work associated with the Global Settlement, whether it is legislative or not. This does not mean that Sandy cannot give assignments to Goodin MacBride that involve the Global Settlement; it simply means that before that work begins Jeff must approve the work.

This particular issue is a critical matter for our company. Jeff is involved in the strategy and business calls concerning this matter and is working on a daily basis with Jim Steffes, Rick Shapiro and Steve Kean to develop our position and advocate that position in the settlement discussions. We must ensure that our Sacramento efforts are fully coordinated with our strategy and business interests (as they develop through the settlement discussions). To avoid any confusion on the scope of Jeff's responsibility, I consider all legislation addressing the Edison MOU, any future MOUs with Sempra, and "Plan B," to be part of the Global Settlement.

Please contact me if you have any questions regarding any of the above. Again, we appreciate your hard work and commitment to our efforts.

Paul Kaufman

USA: INTERVIEW-EnronOnline sees volume growth, CEO says.

By Gelu Sulugiuc

07/17/2001

Reuters English News Service

(C) Reuters Limited 2001.

NEW YORK, July 17 (Reuters) - As most players in a shrinking pool of online energy trading platforms struggle to stay alive, leader EnronOnline has a simple philosophy: If it ain't broke, don't fix it.

The Internet arm of the energy marketing and trading giant Enron Corp. , EnronOnline predicts it will increase its volume and says it can coexist with the IntercontinentalExchange (ICE), the chief executive of Enron Networks told Reuters on Tuesday.

The innovative company is always evaluating its business environment, ready to remold itself according to market demands, but it is not pursuing mergers or acquisitions for now, according to Greg Piper.

"I would never say never, but we're not proactively looking at acquiring an ownership position in any other exchange platform," Piper said.

With an average of \$3.5 billion in trades every day, EnronOnline enjoys the highest volume of all energy electronic platforms. Most energy trading platforms launched last year have failed to generate profits.

Its closest rival is ICE, which routinely exceeds \$1 billion a day. But while ICE is a many-to-many exchange that matches bids and offers, on EnronOnline one can only trade with Enron.

"It's a tool that supercharges our market-making business," Piper said.

Enron is the No. 1 natural gas and electricity marketer in the United States. About 60 percent of its transactions are captured through the electronic platform.

"As long as we show good prices to our customers, our volumes will continue to grow," Piper said.

The company is looking to grow online volume in products such as metals, steel, weather, petrochemicals and plastics.

"We're trying to remain the leader in energy and help our other markets get more traction," Piper said. "There is a huge amount of growth that we haven't even tapped into yet."

Piper said he is not worried about ICE's recent success. The Atlanta-based exchange recently took over London's International Petroleum Exchange and plans to transfer its open-outcry business online, significantly boosting its trade volumes.

"Maybe six to 12 months from now, the story might be a lot different," Piper said. "But right now, there is room for the both of us."

He added that Enron traders do not shy away from trading on ICE. Many of the energy giants that founded ICE and provide most of its liquidity are also Enron's biggest clients.

"Enron will seek out a good deal on ICE when there is one," Piper said.

INNOVATION KEY TO SUCCESS

Recognized as one of the most innovative companies in the United States, Enron is constantly evaluating its position in the market and thinking of ways to become more successful.

"The right thing to do in November 1999 was to launch EnronOnline," Piper said. "But we look at it every day and if it made sense to do something different, you can bet that Enron would do it and we wouldn't be emotional about it."

One of the company's advantages is the fact that its software is a flexible application that allows EnronOnline to easily go in an out of different markets and regions. It constantly adds new products to its trading arsenal.

But Piper said that EnronOnline has no plans to turn itself in a many-to-many exchange.

"We want to focus in providing our markets to others," he said. "In the near term, we're not changing that."

The company is considering licensing the application itself, but would not elaborate on who wants it and how much Enron would ask for it.

EnronOnline has been so successful that even its competitors take their hats off.

"I've been hearing for two years now that a one-to-many exchange wouldn't work, but Enron just keeps proving people wrong," said Frank Getman, chief executive of online energy exchange HoustonStreet.

"If you're willing to make tight two-way markets and be the best price in the market, then people will continue to use your site."

Enron's stock rose 41 cents to \$49.53 a share on Tuesday in trading on the New York Stock Exchange.

Re: Re[2]: HD Case: Proposed Plan

Sender	asama@yahoo.com
Recipients	['chin@haas.berkeley.edu', 'sama@haas.berkeley.edu', 'jeff.dasovich@enron.com', 'mark_guinney@watsonwyatt.com']...
File	dasovich-j/notes_inbox/5422.

All,

I was thinking along similar lines - HD should moderate growth in the coming year - only invest in opening 2-3 new stores in locations with the highest estimated ROI, or perhaps those that are?the most complete (since there is some construction in progress already) to reduce any incremental expense.? Focus instead on improving operating efficiencies which have been steadily deteriorating to increase investor confidence/stock price. Then expand via another public offering at a later date.?

Sarah had asked in class to look?into whether HD was going to be able to make payroll in the coming year. I tried to do this assuming no expansion (freeze all construction in progress). Using Mark's spreadsheet and backing out the new store acquisition costs, and reducing inventories that would have been part of the new stores, this still leaves a cash need from financing of \$25.8 mil in order to meet operational ! needs. So they?are going to need to tap into credit lines for at least

this amount regardless.

I will be in class tonight. If you have a conf call, could we do it at 7:30? If we do, please send across details before 5PM, or else you can just leave me a voice mail on my cell at 916 600 1245 and I'll retrieve it during break...

-Anil

? Mark Guinney <Mark_Guinney@watsonwyatt.com> wrote: Jeff, I assume you can coordinate a conference call from work. Call me at home: 415-388-2548.

Excellent points and I was thinking along similar lines. Questions I have:

How do you know that LT debt gives more advantageous terms? We have no yield curve info nor do we know their credit rating. At what point does their borrowing exceed their covenants? Is our strategy to not raise the required \$66million or to stop/slow PPE spending so that the \$66m is not needed?

***** Mark D. Guinney, CFA Consultant Watson Wyatt Investment Consulting 345 California Street, Ste. 1400 San Francisco, CA 94104 (415) 733-4487 ph. (415) 733-4190 fax

Reply Separator _____ Subject: Re: HD Case: Proposed Plan Author:
Jeff.Dasovich@enron.com Date: 02/07/2001 ! 11:25 AM

Hi folks:

Since we have only one page, the write up for number 4 will have to be very brief. Before writing it, though, I wanted to offer a few bullets regarding what angle we might take, and let folks respond, comment, counter, etc. before writing it up. I'll clean and beef up once we've agreed to the approach we'd like to take to question #4. Finally, I can work from my office on this this evening, which means that I can use the conference call capability of my office phone to patch everyone in if we'd like to do a conference call. If that's what folks would like to do, I'd prefer to do the call at around 7 PM. Just let me know.

Best, Jeff

The question for #4 is:

Stock price is down 23%, significant debt has already been tapped to support massive growth and covenants on that debt restrict taking on a lot more debt.

What should HD do w.r.t. current operations and future growth strategy? !! n the near term focus less on growth and more on getting margins and EBIT growth back in line with results from previous years. (Management's Letter to Shareholders alludes to this, but it's difficult to determine whether management is just paying lip service to the need to capitalize on the growth spurt and grown earnings, or continue on the growth effort.)

With respect to funding future (more moderate growth), the company does have some room to increase long-term debt (e.g., current ratio for 1986 = 2.26). It seems that HD would get better terms and have increased flexibility by issuing additional debt rather than relying on lines of credit. As such, HD ought to look those sources of funding and fill in any "funding gaps" with funds from the line of credit.

Given the significant drop in stock price, HD is likely better off in the near term 1) moderating growth, 2) improving performance to generate cash internally, and 3) using! long-term debt issuance to provide the funds needed. Once performance and stock price improves, then HD should consider a stock issuance.

How can company improve operating performance? Reduce selling, store operating expenses and pre-opening expenses Improve receivables turnover Improve inventory turnover Improve per store/sales Consider closing poor-performing stores All of which will improve margins

Should company change its strategy? If so how? Shift from meteoric growth to moderate, targeted growth, and focus on generating positive cash flow from operations Focus on improving performance at existing stores; specifically focus on controlling costs and asset turnover and productivity Consider another debt issuance rather than rely extensively on credit line in order to decrease cost of funds and increase flexibilit

Thanks. Good points. Will make sure that we have "bad guys" issued covered. You have a great holiday with your family and a safe and happy New Year.

Best, Jeff

James D Steffes 12/27/2000 09:29 AM

To: Jeff Dasovich/NA/Enron@Enron cc: Subject: Re: DRAFT talking points for California PUC Hearings on the 27th/28th
Jeff --

Your notes look great. Best of luck today with the Hearings. Only items not included would be (1) information from the PX / ISO and (2) governance at the PX / ISO. I don't think these will be appropriate at these hearings.

Finally, I think that if the Hearings begin to devolve into a "who are the bad guys", what are you proposing Mike Day respond? Do we have any messages for this situation (however unlikely)?

Jim

You're right, Sue. Rates can't go up w/out declaring the rate freeze over in some fashion---trying to finesse it. Thanks very much for the comments. Harry also had a good comment---don't specify the amount of rate increase in our comments; rather note that the rate increase needs to be well-reasoned and based on facts and evidence. Will make that change.

points for California PUC Hearings on the 27th/28th

Jeff,

This looks good. It comes across as moderate in tone-- although probably no one else will ask to leave the rate freeze in place.

I have a legal question -- Under AB 1890, I don't see anyway that the CPUC can raise rates without ending the rate freeze first. Am I missing something? So, how is it clear that the CCPUC can raise the rates on Feb 1? It's clear, however, that once the retained assets are valued that the rates can be changed.

-----Original Message-----

From: Philip Angelides, Calif State Treasurer [mailto:philip_angelides@treasurer.ca.gov] Sent: Thursday, July 26, 2001 4:14 PM To: Subject: Investor Conference Call 8/2/01

As part of the continuing efforts of the California State Treasurer's Office to provide information to investors regarding the Department of Water Resources ("DWR") Power Purchase Program, we will be hosting an investor conference call in New York. Our East Coast based investors will be able to attend in person at 270 Park Avenue, between 47th and 48th streets, 49th Floor in New York on Thursday, August 2 at 2:00 P.M. EST.

This meeting presents an opportunity to update investors on the DWR Power Purchase Program and respond to your questions. Tim Gage, Director of the Department of Finance; and Tom Hannigan, Director of the Department of Water Resources will join me in the presentation which will be followed by a question and answer session.

If you plan to attend in person, please RSVP to Janis Williams via e-mail at jwilliams@treasurer.ca.gov no later than 11:00 A.M. EST, Tuesday, July 31. For those investors unable to attend, the call-in information is as follows:

Conference Telephone Number: (800) 946-0741 Conference Call Title: California State Treasurer Investor Call

Replay Information Replay Telephone Number: (888) 203-1112 Replay Access Code: 451552 (Replay is available after 5:00 P.M. (EST) August 2, 2001 through midnight (PDT) August 12, 2001)

Thank you for your continued interest in the State of California and the DWR Power Supply Revenue Bond Program.

Philip Angelides State Treasurer

Here's my changes-- DASOVICH ADDITION NEEDED

Sender	susan.mara@enron.com
Recipients	['jeff.dasovich@enron.com', 'james.steffes@enron.com']
File	dasovich-j/all_documents/12976.

Jim,

Here are my proposed changes to what you have said -- in color.

Here is the language keeping DA alive -- the decision is attached (it's short)

D01-03-009, page 6 , March 7, 2001 "Finally, due to pending legislation which would alter Section 80110, we shall stay action on implementation of the suspension of direct access under Water Code Section 80110 until further order."

Jeff, Please fill in the discussion of the MOU below (bullet 5).

The term "Surcharge" is only applicable until the end of the AB1890 rate freeze (which will end no later than March.31.02 and may end earlier if (a) federal court finds in PG&E/SCE favor or (b) California legislature mandates an earlier end-date or (c) the CPUC decides to actually complete its proceeding to value the retained assets and calculate an end to the rate freeze, which would take months. Surcharge is a "term of art" to get around the problems of the AB1890 rate freeze. At the end of the AB1890 rate freeze, it is my understanding that the CPUC will modify fully the rate structure and level to ensure full cost recovery on a going forward basis (therefore Utility Retained Generation, QF expense, CDWR current expenses (both energy purchase and financing costs will be included). Some members of the CPUC signaled in the May 5 decision (noted below) that they intended to investigate "bottoms up" rate making -- this is preferred by AReM and many others. Theoretically, it would clearly separate generation-procurement-retail sales functions from other charges, such as T and D. DA customers would only be charged for T & D etc. -- not the other. If done correctly, even charges included now in T & D, such as some ISO-related functions, would be moved out to make the T&D charges pure wires charges. This approach would be preferred. Any "bottoms up" proceeding would take months and unlikely to be concluded before the end of this year. Other outstanding costs will include (1) Utility Undercollection from May.00 until when no additional CA-ISO costs are applied or until rates cover costs and (2) CDWR costs beginning Jan.17.01 until the end of AB1890 rate freeze or the end of DWR's purchasing activities. Understanding how all these costs will be recovered and by whom will most likely (80% probability) be decided by the Legislature with some decision-making by the CPUC. If the Legislature does not take this up, it will be decided by the bankruptcy court or federal court. Utility Undercollection Bypass - 25% So far, the Legislature has done nothing to address the utility undercollection (except for San Diego, which has a balancing account but no way to collect it yet). SCE's MOU does address this by (INSERT BY JEFF). The MOU has received bad reviews by the Legislature but Enron has been supporting it with some changes and a bi-partisan group of Legislators has been analyzing it and intends to propose amendments. Probability that utility undercollection is dealt with by the Legislature -- 50% Various bills in the Legislature have been introduced to delete the language in AB1X 1 that gave the CPUC the right to terminate DA. A diverse group of business interests called the Direct Access Coalition has been pushing for this and for a bill that takes care of DWR's potential stranded cost problem but provides flexibility for direct access. Our current assessment is as follows: Bypass allowed for payment of DWR costs Jan.17.01 thru rate freeze end - 80% probability for people who never were on Utility Service, 50% for people who used Utility Service post Jan.17.01 but build self-gen or incorporate energy efficiency/load management; also, 50% chance for 60-90 day amnesty period for people to select direct access and 50% chance for free direct access (without surcharge or exit fee) for those who switch while DWR has a "net short" position. CDWR Net Unavoidable Bypass - 10% for people who used Utility Service post Jan.17.01, 80% for others.

LEGISLATION IMPACTING THIS DECISION

There are three key direct access bills being considered (the Bowen bill - SB2x27, the Kelley bill - AB2x42, and the Battin bill - SB2x??).

The Bowen bill would remove the DA suspension authority granted in AB1x1 and replace it with the following (1) if a customer has not bought from an electric utility on or after Jan.17.01 there are no charges [except there may be an entrance fee to use the electric utility going forward] and (2) if a customer wants to switch from an electric utility to an ESP they must pay "to the department any uncollected amounts equivalent to the department's net unavoidable cost of power procurement, including any financing costs, attributable to that customer" to ensure the satisfaction of any power purchase obligation or bond obligation to serve "that customer". The recovery period shall be coincident with the terms of bonds issued to finance the purchases. The CPUC has 90 days from the effective date to notify customers of their obligations.

The Kelley bill would remove the DA suspension authority granted in AB1x1 and replace it with the following (1) if a customer has not bought from an electric utility on or after Jan.17.01 there are no charges, (2) every customer is allowed to buy from an ESP a % of their load equal to the amount served by Utility Retained Generation (not CDWR purchases)

with no charges, (3) after the effective date, any customer that buys from the electric utility and wants to switch must pay "to ensure satisfaction of any power purchase obligation or bond obligation incurred by the department" with the following constraints - (a) for res and small commercial customers, if DA load is less than load growth or (b) to self gen customers, if the customer has given 180 days prior notification or (c) if the customer has given DWR 12 months' advance written notice (then only a fee equal to 12 months unavoidable costs). The CPUC has 30 days from the effective date to notify customers of their obligations.

The Battin bill would ... still reviewing

Keep in mind that all of these bills are in flux. As described above, the DA Coalition is pushing hard for a "good" direct access bill that provides some flexibility and has its own language that it is floating. Even with exit fees, the Coalition's proposed language would require DWR to base the fee on a calculation of its actual costs from losing the load. Enron is also pushing to make direct access part of any compromise settlement and the Republicans have taken the same approach.

CPUC DECISIONS IMPACTING THIS

March 7 Decision Implementing ABX 1 -- decided not begin the process to terminate direct access

May 5 Order - DA doesn't pay DWR expenses going forward and the 3 cent surcharge does not apply to DA customers. Good for bypass of these costs. We expect the utilities to file Petitions to Modify the decision to argue that they cannot implement it -- they will likely seek to have the charge apply to DA Customers and then put the same amount in the credit. Given the problems we all have with the negative credit and the utilities' notion of a zero bill, there will be much opposition to the utilities' proposal. The utilities chance of success on this is less than 50%.

Proposed action -- Alliance for Retail Energy Markets (AReM) will begin pushing to stop charging the current 1 cent surcharge to DA customers (to be consistent with the May 5 decision). Chance of success is 60%.

State Department FACT SHEET - CHEMICAL - BIOLOGICAL AGENTS

Sender	teunisse@haas.berkeley.edu
Recipients	['mba03@haas.berkeley.edu', 'mba02@haas.berkeley.edu', 'undergrd@haas.berkeley.edu']
File	dasovich-j/inbox/661.

Dear Haas Community,

Please find below a State Department Fact Sheet on Chemical and Biological agents. In light of yesterday's event at Haas I thought it might be useful for you to have this information. Please note the intended audience is Americans living overseas.

Sebastian

U.S. Department of State Washington, D.C.

FACT SHEET CHEMICAL - BIOLOGICAL AGENTS

The recent terrorist threats and confirmed cases of exposure to anthrax have caused an increase in anxiety over the possibility of chemical and biological attacks (CBA). Currently, the method of delivery of anthrax has been by letter or package. While the risk of such attacks is limited, it cannot be excluded. As always, the Department will promptly share with American citizens overseas any credible information about threats to their safety. Americans should stay informed and be prepared for any eventuality.

In 1999, the Department of Defense announced its intention to commence the Family and Force Protection Initiative (FFPI) in order to provide enhanced protection to the dependents of U.S. military service members and to civilian Department of Defense (DOD) employees and their families. This program was first implemented for U.S. Forces Korea.

The Department of State has had a chemical and biological countermeasure program since 1998, when it began to deploy chemical antidotes and antibiotics to selected posts abroad. While we have no information to indicate there is an imminent threat from use of anthrax or other biological agents as a weapon against our overseas missions at this time, the Department is expanding its countermeasure program. As a precaution, the Department requested our missions overseas to stock a three-day supply of the antibiotic ciprofloxacin for all individuals who work in or frequent the missions.

This small supply of ciprofloxacin is being pre-positioned to ensure rapid access to this protective antibiotic for our employees in case of an Anthrax exposure in an overseas USG facility and would allow the mission sufficient time to provide access to care for all individuals exposed while securing additional supplies of antibiotics. Once an exposure is suspected, all individuals who had been exposed in our workplace would be provided antibiotics pending a full investigation of the exposure. This would include any private American citizen present in the facility at the time of exposure.

Again, if the Department becomes aware of any specific and credible threat to the safety and security of American citizens abroad, that information will be provided to them promptly.

Exposures to CBA that occur outside USG facilities would require the involvement of local public health authorities who would provide information and if necessary, protective antibiotics to the general public. Ciprofloxacin and other antibiotics effective against Anthrax, including doxycycline and amoxicillin are available with a prescription in most pharmacies throughout the world.

The Centers for Disease Control and Prevention (CDC) is the lead government agency on infectious diseases, including chemical/biological agents (CBA). For detailed information on CBA, including Anthrax, inquirers are referred to the CDC Internet home page at <http://www.cdc.gov>. The CDC's international travelers hotline telephone number is 1-877-FYI-TRIP (1-877-394-8747); fax: 1-888-CDC-FAXX (1-888-232-3299).

As always, American citizens should review their own personal security situations and take those precautions they deem appropriate to ensure their well-being.

Some general information on chemical-biological agents (CBA) follows:

A. Biological agents can be dispersed by an aerosol spray that must be inhaled. However, these agents can also be used to contaminate food, water and other products. Attention to basic food hygiene when traveling abroad is very important.

A. Some chemical agents may be volatile--evaporating rapidly to form clouds of agent. Others may be persistent. These agents may act directly on the skin, lungs, eyes, respiratory tract or be absorbed through your skin and lungs causing injury. Choking and nerve agents damage the soft tissue in these organs.

A. When properly used, appropriate masks are effective protection to prevent the inhalation of either biological or chemical agents; however this assumes an adequate warning. Gas masks alone do not protect against agents that act through skin absorption. Those who wish to acquire protective equipment for personal use should contact commercial vendors.

A. There is an incubation period after exposure to biological agents. It is essential that you seek appropriate care for illnesses acquired while traveling abroad to assure prompt diagnosis and treatment.

A. One of the biological warfare agents is the spore-forming bacterium that causes Anthrax, an acute infectious disease. It should be noted, however, that effective dispersal of the Anthrax bacteria is difficult.

* Anthrax is treatable if that treatment is initiated promptly after exposure. The post-exposure treatment consists of certain antibiotics administered in combination with the vaccine.

* An anthrax vaccine that confers protective immunity does exist, but is not readily available to private parties. Efficacy and safety of use of this vaccine for persons under 18 or over 65 and pregnant women have not been determined. * * The anthrax vaccine is produced exclusively by Biopart under contract to the Department of Defense. Virtually all vaccine produced in the United States is under Defense Department contract primarily for military use and a small number of other official government uses.

* For additional information, please consult your health care provider or local health authority.

Business Enron, and on, and on: Enron's Indian troubles: The world's biggest power trader cannot shake off its Indian headache

04/21/2001 The Economist Copyright (C) 2001 The Economist; Source: World Reporter (TM) - FT McCarthy

IT IS the world's largest trader of energy, and this week it announced a glowing set of first-quarter results, with revenue quadrupling and profits up 20%. But Texas-based Enron Corp cannot seem to shake off its Indian headache. For the umpteenth time in six years, it has become locked in a dispute over its power project at Dabhol, in the Indian state of Maharashtra. And again, the dispute is with its sole customer, the Maharashtra State Electricity Board (MSEB). A government-committee report published on April 12th recommends renegotiation of the project to reduce the price of its electricity, even though this has already been renegotiated once, in 1996, shortly after construction work started. To "protect its rights", Enron has started arbitration proceedings against the authorities and has issued a "political force majeure" notice against the MSEB. Perhaps most important of all, Enron has asked the finance ministry to honour a financial guarantee that the ministry provided for the project, in order to recoup \$47m that the MSEB failed to pay for power in December and January. The MSEB has lodged an \$86m counter-claim against Enron for failing to build up

generation to full load quickly enough on one day in January. Suspicions that the MSEB is trying to avoid paying its dues prompted Richard Celeste, America's ambassador to India, to suggest that Maharashtra was "taking refuge behind legalities". The mood is not yet calm enough to negotiate a way out - although there is some talk of the state or a private investor buying out Enron, which is losing interest in owning power plants in poor countries. Enron's force majeure notice as good as accuses the state government of slowing the project for political reasons. Enron says that it is willing to discuss the report, but that there is no basis for proper talks until Maharashtra restructures the MSEB's parlous finances and thus gives the project a chance of surviving its planned 20-year life without further crises. Government officials are repeating accusations thrown around in the mid-1990s that Enron is behaving arrogantly. But India too has much to lose. Suresh Prabhu, India's power minister, insists that the dispute does not reflect any "anti-foreign-investment attitudes". However, if it is not resolved soon, it could do further harm to India's already blighted image as a destination for foreign direct investment (FDI). India has long hoped to attract up to \$10 billion of FDI a year, but it peaked in 1997-98 at \$3.6 billion and last year was down to \$2.1 billion. That compares dismally with other Asian countries. The shortfall is due mainly to India's failure to turn large infrastructure proposals into actual projects. Plans for power and oil-refining projects with nearly \$20 billion of FDI have been approved in the past decade, for instance, but only \$1.6 billion has actually been invested - and a large amount of that went to Dabhol.

Copyright , 2000 Dow Jones & Company, Inc. All Rights Reserved.

April 20, 2001 Houston Chronicle Hines will add to skyline 32-story tower to be downtown near Jones Hall By RALPH BIVINS Copyright 2001 Houston Chronicle The Hines real estate development firm is preparing to make another mark on the downtown Houston skyline with the creation of a 32-story office tower. Hines will begin construction in July on Texas Avenue near Jones Hall, the Alley Theater, Chase Tower and the Houston Chronicle building. Over the last 30 years, Hines has developed a number of major buildings downtown. "We are tremendously excited to add our 10th signature building to the downtown Houston skyline," said Charlie Baughn, executive president of Hines. The 689,000-square-foot building will be named after the main tenant, the Calpine Corp., a San Jose, Calif., company that produces electricity. Calpine has agreed to lease 300,000 square feet. It has not been determined whether the building will be christened Calpine Plaza, Calpine Center or some other variation on the Calpine name. The tower is scheduled to be complete in the fourth quarter of 2003. A parking garage on the block will be torn down, but the historic Lancaster Hotel, the Longhorn Cafe and Clive's restaurant will be retained. The building will cover about three-fourths of the block, said Larry Margolis, project manager for Hines. Houston-based Hines is developing the building in partnership with Prime Asset Management, which also owns the nearby 75-story Chase Tower. Prime Asset is led by Lebanese billionaire Rafik Hariri. Shaped like an oval with a flattened side, the tower will be wrapped in an exterior of rose-tinted granite with bluish windows. A granite-paved pedestrian plaza will be built at the corner of Texas and Milam, leading into the entrance at 717 Texas Ave. The project is designed by Hellmuth, Obata & Kassabaum, the architecture firm that did Enron Field for the Houston Astros. Seven levels will be devoted to an enclosed parking garage with 900 spaces. Above the parking garage will be 24 floors of office space, with about 26,500 square feet of space per floor. Calpine will be moving about 1,100 employees into the building. The company now has its workers in three downtown buildings: Bank of America Tower, Wells Fargo Plaza and Pennzoil Place. Calpine's choices for office space in downtown Houston were slim. The prime "Class A" space in downtown is more than 96 percent occupied, and large blocks of top-quality vacant space are nonexistent. The downtown office market has made a comeback from the 1980s, when more than one-third of its office space was vacant. For more than a decade after the Texaco Heritage Plaza was completed in 1986, downtown had no new buildings. And no new space was needed. With no new construction, the vacancy numbers turned around. At the end of 1993, the overall downtown vacancy rate was 22.43 percent. By the end of this year's first quarter, downtown vacancy had fallen to 6.3 percent, according to the CB Richard Ellis realty firm, and rental rates are climbing. The Calpine building will join other significant downtown towers under construction: ? The 36-story Century Development tower at 1000 Main, near Foley's. It will have 783,000 square feet of office space and 50,000-square feet of retail space. Reliant Resources will be the primary tenant. The Gensler architecture firm designed the building, which is to op

cc: Subject: Proposed Decisions of the CPUC on PX Credit and Suspending Direct Access

Two proposed decisions were issued by hard copy and received today. Jim Steffes' office in Houston has a copy.

Both decisions eliminate the requirement that the utilities provide cash refunds to the direct access customers for the negative PX Credit as of January 5, 2000. On other points they differ.

The decision by Assigned Commissioner Wood is adversarial to direct access and suspends direct access. If adopted, direct access would be suspended July 1, 2001, except for written contracts executed prior to July 1, 2001. On the PX Credit, he says that the cash payment is not required and leaves open the notion that the bill credit would continue.

The alternate decision by Commissioner Bilas does not suspend direct access but asks for ideas on how to provide DA given ABX 1 and the concerns of the state's Dept of Finance when providing comments on the draft decision. Bilas has a finding of fact that "direct access is a necessary component of restoration of functional electricity markets." On the PX credit, Bilas' proposed decision would end the cash payment but begin a process to modify the PX credit decision (D.99-06-058) and to adopt a bottoms-up calculation for direct access customers. He asks for comments in 20 days and reply comments in 5 days. With a bottoms-up calculation, direct access customers would pay only wires charges and public purpose charges and pay no charge for power purchases.

Comments on the draft decision are due next Monday, June 25.

Enron and its coalitions will actively support the Bilas alternate and seek the third vote needed to ensure passage.

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854

Sierra Pacific Suspends Dividend Because of Energy Crisis in Western States By Rhonda L. Rundle Staff Reporter of The
Wall Street Journal

04/16/2001 The Wall Street Journal B4 (Copyright (c) 2001, Dow Jones & Company, Inc.)

Sierra Pacific Resources, which owns two Nevada utilities, said it suspended its quarterly dividend, citing high power costs and other fallout from the energy crisis afflicting the Western part of the U.S. The utility holding company said it still hopes to complete a \$2 billion agreement to purchase Enron Corp.'s Portland General Electric unit. The transaction, which will also include the assumption of \$1 billion in debt, has been delayed partly because of a new California law that has blocked Sierra Pacific from raising funds through planned sales of certain power-generating assets. Sierra Pacific has paid a quarterly dividend of 25 cents in recent quarters. Suspension of the payout will save "less than \$20 million -- but every dollar counts at times like this," said Mark Ruelle, senior vice president and chief financial officer. The dividend policy will be reviewed again at the next board meeting, set for May 21, the company said. Sierra Pacific, based in Las Vegas, said it is continuing several cost-control programs that were recently undertaken to reduce expenses. The cutbacks are mainly in the area of administrative expenses and include elimination this year of incentive pay for executive staff. Sierra Pacific, like utility owners in other Western states, has been hit by rising energy costs. Sierra Pacific has said it incurred an unanticipated expense of \$889 million in 2000 to purchase fuel and electricity on the open market. That produced a full-year 2000 loss of \$39.8 million, or 51 cents a share. "There is no question that both our utilities in Las Vegas and the Tahoe region are exposed to the same general market conditions as all of the western U.S.," Mr. Ruelle said. The impact on Sierra Pacific has been moderated somewhat by power contracts that were secured before the latest runup in prices. "Our contracted prices for fuel and purchased power are favorable compared to current prices, but still above what we can recover through utility rates," he said. Sierra Pacific got some relief in February when the Nevada Public Utilities Commission approved a 17% rate increase, equal to about \$300 million of additional revenue. Now the Nevada legislature is considering a proposed new law that would restore stability to the state's electricity markets, Mr. Ruelle said. The measure would reinstate an old regulatory provision that assures utilities of eventual recovery of any fuel and power purchase costs that exceed current rates. Sierra Pacific's agreement to purchase Portland General Electric from Enron was reached in November 1999. Enron's chief executive, Jeffrey Skilling, said last month that there is only a "5% probability" that the sale will go through. But Mr. Ruelle said Friday that Sierra Pacific is "continuing to work toward the deal and to address the difficulty in securing necessary regulatory approvals given the underlying dislocations in the markets." Sierra Pacific has agreements to sell seven of its nine power plants, and related assets, to various power generators for an aggregate of \$1.8 billion. The sales have been blocked partly by the new California law, which prohibits the sale of power plants that serve California customers. Sierra Pacific's Sierra Pacific Power Co. unit has a small service territory in the Lake Tahoe area of California. The parent company's "financial profile" looks much different without the sale of those plants, Mr. Ruelle said.

Wind Farms May Reap Profit as Britain Looks to Add Renewable Energy Sources --- Seek Profits Out of Thin Air As
Britain Pursues Renewable Energy By Geoffrey T. Smith Dow Jones Newswires

04/16/2001 The Wall Street Journal (Copyright (c) 2001, Dow Jones & Company, Inc.)

Ten years ago, Peter Edwards, a dairy farmer in Cornwall, sold his cattle to raise money to establish the United Kingdom's first wind farm intended to produce electricity. It wasn't competitive and did nothing to lessen the country's dependence on fossil fuels -- not the most encouraging vision of the future. Today, many farmers might willingly change places with him. As livestock farming staggers from crisis to crisis, wind farming is showing strength. Last week, in a landmark move, the Crown Estates, which holds the U.K. seabed in trust for the country, issued seabed leases for 13 offshore wind-farm

projects to companies traditionally associated with fossil-fuel energy. The projects, which could attract up to GBP 1.6 billion (\$2.3 billion) of investments, according to the British Wind Energy Association, will allow for the installation of 1,500 megawatts of generation capacity along Britain's coast by 2004. That would meet the electricity needs of 1.1 million households, according to BWEA estimates. The projects -- seven in the Irish Sea and six in the North Sea -- are the first concerted effort in the U.K. to raise the contribution of renewable power sources, other than hydropower, to the energy mix. For the wind industry, going offshore is a test of technology and viability. Larger numbers of more-powerful turbines, driven by higher wind speeds, could yield economies of scale. Offshore winds also are more constant than those onshore, which could help offset wind power's major drawback: unpredictability. Such projects no longer are the preserve of companies on the fringe of the energy sector. Among those awarded leases were units of Innogy PLC, Powergen PLC, Scottish Power PLC, Enron Corp. and TXU Europe. Under terms of the government's Renewables Obligation, all public electricity suppliers must get some of their power from renewable generation sources by 2003. The amount will probably start at 5% or more, rising to 10% by 2010. Via a system of tradable "green certificates," companies can trade surplus renewable power on the open market with suppliers who can't meet the obligation by themselves. The emphasis of U.K. policy-makers for the past 10 years has been on bringing prices down, rather than encouraging green energy to become competitive. As a result, the role of wind in the U.K. has been restricted to blowing the emissions of coal and gas-fired plants across the North Sea, forcing Norway and Germany to cope with the environmental impact. In countries with more government subsidies, more wind farms have flourishe

Fitch Puts Enron On Rating Watch Negative 2001-10-25 13:49 (New York)

Fitch Puts Enron On Rating Watch Negative

Fitch-NY-October 25, 2001: Fitch places the following Enron securities on Rating Watch Negative: senior unsecured debt `BBB+`; subordinated debt `BBB`; preferred stock `BBB-`; and commercial paper `F2'. Pipeline subsidiary `A-` rated senior unsecured debt at Northern Natural Gas Co. and Transwestern Pipeline Co., are also placed on Rating Watch Negative.

The rating action primarily relates to the negative capital market reaction to recent disclosures by the company. The loss of investor and counterparty confidence, if it continues, would impair Enron's financial flexibility and access to capital markets, therefore, impacting its ability to conduct its business. On Oct. 16, 2001, Enron announced a \$1 billion after-tax charge to earnings to be taken in the third quarter of 2001 and a reduction of balance sheet equity by \$1.2 billion relating to the unwinding of structured transactions. Since that time, there have been several damaging news reports on the company and its management. More importantly, investors have voiced concerns. Enron's common stock price has plummeted and spreads on its debt have widened.

The company has attempted to quell rumors and has publicly stated that it has adequate liquidity to conduct its business. Approximately \$1.5 billion of unused liquidity is available under committed bank lines.

An additional concern is that certain structured transactions of the company including Marlin Water Trust II and Osprey could unwind. While various sources of repayment exist, such as the sale or liquidation of underlying assets, or an equity offering, primary credit support is derived from the Enron obligation to remarket mandatorily convertible preferred stock if an amount sufficient to repay the notes has not been deposited with the trustee 120 days prior to the maturity date or upon a note trigger event. In the event that the issuance of the preferred stock yields less than the amount required to redeem the senior notes in either case, Enron is required to deliver additional shares. If Enron cannot or does not deliver on its obligation, then the amount of the deficiency becomes a payment obligation of Enron, representing a general unsecured claim. While trigger events include a downgrade of Enron's senior unsecured debt below investment grade by one of the major rating agencies in conjunction with specified declines in Enron's closing stock price over three consecutive trading days, Enron would have a forbearance period of 60 days as long as an attempt was being made to register the shares. The total amount of Marlin and Osprey debt is approximately \$3.2 billion. Enron has not verified that the underlying assets have adequate market value to fully pay down the associated debt.

While capital market uncertainties have escalated, Fitch has no information to indicate that there are any fundamental problems with Enron's core wholesale, retail, and pipeline businesses. Fitch expects to be in contact with the company on a continuing basis to both monitor ongoing events and address strategic, longer-term issues.

STOCKWATCH Enron higher after dismissing CFO Fastow

10/25/2001 AFX News (c) 2001 by AFP-Extel News Ltd

NEW YORK (AFX) - Share of Enron were higher in opening trade, after the company dismissed its chief financial officer, Andrew Fastow, due to his past involvement in running two partnerships, in which Enron had invested, dealers said. At 9.56 am, Enron was up 1.13 usd, or 6.95 pct, at 17.55. The DJIA was down 138.60 points at 9,207.52, the S&P 500 index was down 15.95 pts at 1,069.00 and the Nasdaq composite down 39.02 at 1,692.52. Enron said it named Jeff McMahon CFO to replace Fastow, after announcing Monday that the Securities and Exchange Commission is looking into the Fastow-related transactions. "In my continued discussions with the financial community, it became clear to me that restoring investor confidence would require us to replace Andy as CFO," said chief executive Kenneth Lay in a statement. Enron shares have fallen sharply in recent days on concerns over financial transactions made with the two partnerships, LJM Cayman LP and LJM2 Co-Investment LP, which analysts said could affect future earnings and which have prompted class action suits against the company. McMahon, who had been serving as chairman and CEO of Enron's Industrial Markets group, had quit his job as treasurer last year, after voicing concerns within the company about Fastow's role in running the two partnerships, according to the Wall Street Journal. This morning, Salomon Smith Barney analyst Raymond Niles downgraded Enron to "buy- speculative," from "buy-high risk", to reflect his concerns that "lingering uncertainty over financial practices may begin to impair Enron's commercial operations." "This is the least likely outcome, in our view, but one whose likelihood has increased over the last week as questions continue to be asked," he said. ng/lj For more information and to contact AFX: www.afxnews.com and www.afxpress.com

=DJ Concerned Energy Cos Make Few Changes In Enron Dealings 2001-10-25 14:13 (New York)

By Mark Golden, Kristen McNamara, Jon Kamp and John Edmiston Of DOW JONES NEWSWIRES

NEW YORK (Dow Jones)--Energy trading companies have concerns about the credit quality of troubled Enron Corp. (ENE), but they have made almost no changes in policies concerning the top trader of North American power and gas, the companies said Thursday.

The concerns have arisen because Enron, which accounts for about a quarter of the trade in the country's power and gas markets, has seen its share price fall by a third this week due to uncertainties about its extremely complex financial structure.

Moody's has put Enron's credit on watch for possible downgrade, and some of the company's debt is trading like junk bonds in the secondary market this week.

"We have made no changes to our credit policy concerning Enron," said John Sousa, chief spokesmann for Dynegy Inc. (DYN). "It's business as usual."

Williams Cos. (WMB) spokesman Jim Gipson said that his company, too, has made no changes and has no concerns about Enron's credit. Another Top 10 power and gas trading company, Aquila (ILA), has also left Enron credit unchanged.

Other companies expressed concern, though they've taken little if any action.

"Like everyone else in the marketplace, we're proceeding with caution," said Lora Kinner, director of credit for Tractebel Energy Marketing, the North American subsidiary of the Belgian company Tractebel S.A.

Kinner said the company is just looking for more information and doesn't expect to make any drastic changes.

Calif Guarantees Allow Williams To Book Power Revenues By Andrew Dowell Of DOW JONES NEWSWIREs

10/25/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW YORK -(Dow Jones)- Clarifications by California as to what electricity transactions the state will back enabled Williams Cos. (WMB) to book \$180 million in power sales from the previous period as third-quarter revenues, the company said Thursday. The revenues came from power William

Hello AReMers:

Below you will find the list of media outlets that covered our news conference yesterday. In addition to media present at the conference, we also had 12 reporters listening in via teleconference (only six asked questions). I am attaching the stories that we have already found; we'll send more as they are published today and throughout the week.

The SJ Merc editorial also ran today (it's excellent) and we're keeping an eye out for the Bee editorial and the possibility that Bill Stall of the LA Times may write on this issue. He was at the conference but has made only neutral comments about whether he'll write anything.

Orange County Register--Kate Berry Wall Street Journal--Rebecca Smith, John Emshwiller and Mitchel Benson Associated Press--Karen Gaudette San Jose Mercury News--John Woolfork, Mike Bazeley North County Times--Dennis Devine San Diego Union Tribune--Ed Mendel San Francisco Chronicle--Greg Lucas, Bernadette Tansey (this story will probably run on Friday) Los Angeles Times--Bill Stall Bloomberg News--Daniel Taub California Energy Markets--JA Savage Electric Power Daily--Ethan Howland Restructuring Today--George Spencer Natural Gas Intelligence--Richard Nemec Capitol Public Radio (NPR) KFBK Radio--Mike Ward PacSat News Satellite

Even better than expected Published Wednesday, June 27, 2001, in the San Jose Mercury News EDITORIAL

The opinion of the Mercury News PUC should keep consumers plugged in to power choices AT the beginning, the restructured California electricity market was supposed to include competition among sellers of electricity -- offering green

power or cheaper power -- not just competition among generators. As things played out, retail competition was nearly smothered. Now, with the state buying electricity on behalf of utilities, it could take a further blow. State officials are leery of letting customers go to other suppliers now that the state will buy huge amounts of electricity over the next decade. The Public Utilities Commission Thursday might suspend "direct access," the ability of consumers large and small to cut their own deals with electricity suppliers, instead of being forced to buy through the state/utilities. The PUC should leave it alone. Instead, the Legislature should continue discussing ways of revitalizing direct access without leaving the state with long-term contracts and not enough customers. Ultimately, the state should get out of the electricity business. Keeping retail competition alive is one avenue of escape.

***** There's a slightly negative zinger at the very end, but overall a balanced story. Published Wednesday, June 27, 2001, in the San Jose Mercury News CALIFORNIA'S ENERGY CRISIS PUC likely to call a halt to shopping for power BY MICHAEL BAZELEY <mailto:mbazeley@sjmercury.com>

AND JOHN WOOLFOLK <mailto:jwoolfolk@sjmercury.com> Mercury News State regulators Thursday are expected to pull the plug on electricity deregulation's core feature: the ability of customers to shop around for alternative power. After July 1, residential and business customers would no longer be allowed to shop for a new electricity provider under a measure expected to be approved by the California Public Utilities Commission. State leaders fear that after stepping in and buying premium-priced power to avoid blackouts this year, big businesses will flee for a better deal, sticking small consumers with the government's energy bill. Those consumers would then face higher rates, causing even more to flee. "You create a death spiral," said Sen. Debra Bowen, D-Redondo Beach. Business leaders, alternative energy providers and some state officials are desperately trying to head off the move, saying they've saved a bundle on energy through the "direct access" option of bypassing the major utilities. "While we're coping with the rate increase, we think direct access is the best way for us to manage the cost of energy," said Dominic DiMare, legislative advocate of the California Chamber of Commerce. "It leads to market discipline as well as innovation," DiMare said. Supporters argue the state, which approved a record \$13.4 billion in bonds to cover power costs, can guarantee payment without killing off customer choice. They backed an alternative proposal Tuesday by utilities Commissioner Richard Bilas in which customers would pay a charge to cover the state's energy bonds, regardless of their electricity provider. Customers already pay similar charges to cover an array of costs from nuclear decommissioning to conservation programs. "It still gives people the opportunity to buy energy that might not necessarily be cheaper, but that meets their needs more," said Rick Counihan, spokesman for Green Mountain Energy, which markets power from renewable sources such as solar and wind. But even Bilas gives his proposal long odds of approval, saying "If I were a betting man" he'd say his plan "would go down." The ability to shop for power was the impetus for the state's 1996 deregulation bill. The architects of deregulation -- led by business groups -- believed that if customers could buy power directly from producers, it would promote competition and drive down prices. It never happened. Wholesale power costs soared, and that, along with a host of other issues, drove companies out of the state, forcing tens of thousands of consumers back into the arms of utilities. Now, though, with significantly higher electric rates going into effect this month, choice is looking more attractive than ever to big businesses. Joined by alternative power companies, they are trying to push a bill through the Legislature that would set up a framework for continued choice. "Manufacturers live and die by the ability to cut costs," said Gino DiCaro, spokesman for the California Manufacturers and Technology Association. "If they have an opportunity to save money, we don't feel there's any reason that should be taken away." That type of freedom raises a host of thorny issues. The state is now buying power on behalf of utilities and entering into dozens of long-term power contracts. If businesses and residential users flee the system, the state could be left with a surplus of costly power and fewer users to pay for it. That, in turn, could mean higher rates for the remaining users. Bowen is trying to address these issues in a bill that would make customers pay when they leave the system. Her bill also would allow users to go into the market only during annual enrollment periods, and it would limit the amount of power that could be bought on the open market. Business groups are fighting those provisions.

A Dow Jones Newswires Column

NEW YORK -(Dow Jones)- Those looking for even the slightest bit of good news for the state of California can find it in Friday's San Jose Mercury News. "California is in danger of losing more than 40% of the power it has lined up in long-term contracts," says the lead of a major article, because Republicans in the state legislature didn't back the \$12.5 billion bond deal last week. Getting out of most of those contracts would be the best thing to happen to California in a long time. Since the state went on its long-term buying binge, forward prices for power in the western U.S. have been falling steadily. Gov. Gray Davis announced \$43 billion in purchases lasting up to 20 years on March 5. Contracts for summer power at Palo Verde, Ariz., a key western trading hub that feeds a lot of power into California, have fallen to \$390 a megawatt-hour from a high of \$600/MWh in late March. Further out, power for 2004-2006 at mid-Columbia River, a key trading hub north of California, has fallen from \$58/MWh in February to \$49/MWh today. Companies like Calpine Corp. (CPN) and Dynegy (DYN) that took advantage of the state's buying binge are looking pretty fat and happy. In fact, they have affectionately started calling the governor Gravy Days. Enron Corp. (ENE), which has been selling aggressively for two months, according to traders, is looking like a genius as usual. Generators that held out, like Reliant Energy (REI) and Duke Energy (DUK), may be sorry that they did. It's been a long time since those long on western power have felt serious pain in the markets, but that time has come. Power generators may not make as much profit this summer as last, and power traders that have taken long speculative positions may liquidate supplies for far less than they bought them. As was seen in the eastern U.S. power markets last summer, long positions can turn out just as painful as short positions. For California, the good news is that maybe spot purchasing costs this summer won't be as bad as once expected. The bad news is that the state government is by far the biggest "long" in the bearish forward market. It's safe to say that the \$43 billion in contracts signed in March have declined in value by 15%, or \$6.5 billion. That's almost as big of a financial disaster going forward as everything that has gone on since last summer until now. Granted, this is a sort of damned-if-you-do-damned-if-you-don't situation. Barring the utilities from the forward market during the first three years of deregulation was one of the most expensive public policy mistakes in U.S. history. California should do some forward purchasing now, and it's such a behemoth that it will move the market up when it does so. And, when it gets done buying, prices will come down simply because it stopped. But that's a footnote to the mismanagement of the financial side of the energy crisis. Early this year, when the state started down the path of mega-purchasing, there was no shortage of advice not to do so. Long-term prices were embedded with too much of today's supply-demand imbalance. The state would have been much better off dealing with the imbalance first - since it would have to do that anyway - and gradually securing

forward power as declining prices reflected the improving situation. Since then, the state has done a great job of crushing demand. Electric usage is already down 9% from where it was expected to be thanks to a conservation efforts and a slowing economy, and people haven't even seen their 30% higher bills yet. Similar reduction has been seen in power consumption in other western states and in natural gas usage nationally. This is likely what has been behind much of the downturn in forward power prices in the West. This column started with a false "good news" lead. It would be great for the state if, after the state's credit rating sinks further, sellers exercised their option to tear up the five- and ten-year contracts. But they won't do that. The prices are too good from the sellers' perspective. Calpine, which has signed three such contracts for the state, said immediately that it has no intention of reneging on its agreements. And Gary Ackerman, director of the sellers' association, told the Mercury News that he didn't expect power companies in general to back out of the deals. But there may be some real good news for California. The Davis administration hired dozens of people that have little or no experience in energy trading to purchase billions of dollars of power. Perhaps they are quick learners. This week presented an excellent opportunity for the state to pick up what it needs - summer power for this year only - on sale. Low prices in the daily market Monday and Tuesday drove the summer contract prices down to \$325/MWh, which is cheap by recent standards. The contract price moved up to \$390/MWh, but the state took advantage of the opportunity while the window was open. "The week's condition in the market place helped. We were able to procure some energy for June through September," said state spokesman Oscar Hidalgo. And, hey, there were no blackouts this week. -By Mark Golden, Dow Jones Newswires; 201-938-4604; mark.golden@dowjones.com

Options Report: Investors Sell Options As Flat Mkt Looms By Kopin Tan Of DOW JONES NEWSWIREs

05/18/2001 Capital Markets Report (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW YORK -(Dow Jones)- Options volatility, already at its lowest level in some months, edged down further amid the busy trading of Expiration Friday. But while lower volatility typically means reduced and more attractive premium for option buyers, many investors continued to sell options. With market observers expecting stocks to be flat or range-bound for a while as the economy gropes toward a recovery, these investors were selling options to generate income upfront and hoping the sold contracts will expire unexercised. Many investors sold out-of-the-money calls as part of strategies like covered call writing to help lower their cost of buying stock and the break-even points for their investments. In Ericsson Telephone Co., for instance, the June 7.50 calls traded more than 29,000 contracts, with much of Friday's volume accounted for by investors selling these out-of-the-money contracts. Investors, who earn about \$25 for each contract sold, likely were selling these as part of their covered call writing strategies. Ericsson's American depository receipts most recently gained 43 cents to \$6.83. At the Chicago Board Options Exchange, the June 7.50 calls rose 15 cents to 30 cents on volume of 19,967 contracts, compared with open inter

Business/Financial Desk; Section C California and Energy Providers in Talks Over Electric Fees By JOSEPH KAHN

06/26/2001 The New York Times Page 7, Column 1 c. 2001 New York Times Company

WASHINGTON, June 25 -- For the first time since the end of the Clinton administration, California and the companies that sell it electricity sat at the same table today to try to resolve a multibillion-dollar feud over the state's energy bills. California is demanding that power companies refund as much as \$9 billion for what it says were overcharges, while power companies say that the state's nearly insolvent utilities owe them billions of dollars. City and state officials from across the West are also participating in the negotiations. The Federal Energy Regulatory Commission convened the talks, which are scheduled to last up to two weeks. The sessions are the first since top Clinton administration officials tried and failed to broker a settlement to California's electricity crisis in their waning days in office. "The time to put California's past energy problems to rest and structure a new arrangement for California's energy future is now," said Curtis Wagner, an administrative law judge for the energy commission who is presiding over the settlement talks. The proceeding, which was standing-room-only on opening day, attracted scores of people representing multiple sides in the dispute. The main participants are electricity generating companies, electric utilities, and public officials from state and local governments and regulatory agencies. Mr. Wagner urged the public officials and companies involved to reach an agreement on how much California and other states in the Western grid should have paid for power over the last year, when California's partly deregulated market broke down. He said that if they failed to do so by July 10, he would recommend a solution to the energy agency's five commissioners, who would then have the option of imposing a settlement. Wholesale power costs in California, which totaled \$7 billion in 1999, soared to about \$27 billion last year and, by some state estimates, could double again this year. The higher costs, which have not been fully passed along to consumers, have rendered California's two main utility companies unable to pay their bills and forced the state to buy power in their place. The opening bid by Gov. Gray Davis, who set out his views in a letter sent to the energy commission today, is that the leading electricity generators should refund about \$9 billion that "they have overcharged the people of the state of California." Michael Kahn, chairman of the California Independent System Operator, is leading the state delegation. Generating companies have dismissed that figure as grossly inflated. They acknowledge that prices are high. But they say the charges are linked to shortages of natural gas, a crucial fuel for electricity generation, and were set fairly in a free market. The companies also contend that a large proportion of what they have billed California is a credit premium justified because wobbly utilities owe them as much as \$15 billion. Reliant Energy, Duke Energy, the Williams Companies, the Enron Corporation and the Mirant Corporation are among the major sellers of electricity in the Western region. The energy commission, which has the duty of determining "just and reasonable" electricity prices under a New Deal-era law, long ago found that the California market had become dysfunctional and that prices were unjustified. But the agency has struggled to come up with a method for determining fair rates, changing its method three times in recent months. So far, the agency has identified about \$125 million in potential overcharges. But that number was reached using a restrictive method that the agency has since abandoned. Last week, the agency adopted a new price control regime that is intended to limit price spikes throughout the West. If the controls it is using now were retroactively applied to electricity sales made over the last year, the generators would be asked to refund much more money. By some estimates, the refunds could total more than \$1 billion but seem likely to fall well short of the \$9 billion California is seeking.

Financial Taking No Chances; Disaster-Conscious Firms Treat Global Warming as a Reality Greg Schneider Washington Post Staff Writer

06/26/2001 The Washington Post FINAL E01 Copyright 2001, The Washington Post Co. All Rights Reserved

After two unusually warm winters melted profits at his natural gas distributing company in Dallas, Robert W. Best decided he needed protection. So he spent \$4.9 million on a new tool called weather insurance. If global warming causes the customers of his Atmos Energy Co. to continue using less gas to heat their homes, the policy will pay out cash to offset the

company's operating losses. That's the kind of practical response beginning to take place throughout U.S. industry as business leaders face up to the prospect of climate change. While the Bush administration debates other governments about whether man-made pollution causes global warming -- and, if so, who should take responsibility -- many industries are trying to cope with the realities of extreme weather. Insurance companies have begun hiring meteorologists to reassess the risk of natural disasters. Farmers are planting different types of crops and looking for crisis-proof seeds. Great Lakes shipping companies are petitioning Congress for dredging to compensate for falling water levels. Colorado ski resorts are discounting tickets to bring people back to the slopes after two sweaty winters. These changes are incremental, not massive shifts in operations. But over time, those incremental reactions could add up to a major adaptation to "climate change's pervasive and growing impacts over the next century," said Nick Sundt, a scientist with the U.S. Global Change Research Program in Washington. "I don't know for sure about global warming, but I do know the past 15 or 20 years have been warmer than normal," said Best, the chairman, president and chief executive of Atmos. "Some people will claim it's the natural cycle, but for us it doesn't really matter. . . . We've got to do something to protect ourselves." Atmos, which distributes natural gas in 11 states, including Virginia, began investing in weather insurance a year ago. The winter that began in November 1998 and the one that followed were both more than 15 percent warmer than usual across the company's entire market, Best said. He read about weather insurance in a trade journal and bought it through energy broker Enron Corp. If temperatures had been warmer than average last

Dabhol lenders to vote today on PPA PPPPA termination Our Banking Bureau Mumbai

05/16/2001 Business Standard 1 Copyright (c) Business Standard

The 25-odd lenders to the Dabhol power project will vote today on whether the Enron-promoted Dabhol Power Company (DPC) should be allowed to serve a preliminary PPA termination notice to the Maharashtra State Electricity Board (MSEB). The voting will take place through conference calls criss-crossing the globe at 6.30 pm, Indian Standard Time. Even though the three Indian lenders_ the Industrial Development Bank of India (IDBI), the State Bank of India (SBI) and ICICI_ have decided to vote against the proposition, they will not be able to block the move. Technically, the proposal can be passed if four per cent of lenders are in favour of the termination notice. In effect, it will be passed if one of the 25 lenders casts its vote in favour of it. So, it's almost a foregone conclusion that DPC will be asked to issue its termination notice. Multilateral agency J-Exim, which has provided guarantees, will not participate in the exercise. Barring J-Exim, other financial intermediaries including global arrangers ABN Amro, Citi, ANZIB, CSFB and other banks and OPIC will cast their votes tomorrow. "In the first round, Indian lenders put their foot down and refused to give clearance to the termination notice. Thistime around they will not be able to block the move any more. The Indian lenders alone cannot save the controversial \$3 billion as some of the foreign lenders are in favour of issuing the termination notice," said a source. The

Indian lenders are in favour of completing the project without any time and cost over-run. They have disbursed about 80 per cent of their Rs 1,500 crore worth of loan commitments to phase II of the project, 93 per cent of which is complete. The trial run is expected to commence in June. The board of the Dabhol Power Company has already authorised Enron India managing director, K Wade Cline, to serve a termination notice as and when he deems fit. At a meeting of the lenders last month in London, the foreign lenders were keen that the termination notice be served in the face of defaults by the Maharashtra State Electricity Board (MSEB) and the Union government's refusal to honour the counter-guarantee of Rs 102 crore for the December bill. The domestic lenders are not covered by the counter-guarantee if the contract is terminated. The foreign lenders are covered by the counter-guarantee.

Enron to suspend investments of 600 mln usd in Brazil energy sector

05/15/2001 AFX News (c) 2001 by AFP-Extel News Ltd

SAO PAULO (AFX) - Enron Corp will suspend investments of 600 mln usd in the Brazilian energy sector, news agency JB Online quoted Enron vice-president and Eletricidade e Servicos SA Elektro chairman Orlando Gonzales as saying. Of the total investment, 500 mln usd was to be assigned to the expansion of the thermoelectric plant Cuiaba II in the state of Mato Grosso, and in the construction of Rogen in the state of Rio de Janeiro, with the remainder to be invested in unit Elektro, it said. "There are no clear regulations for the sector. Regulatory issues are holding back investments," JB Online quoted Gonzales as saying. Gonzales said the decision to suspend the investments may be reconsidered if the energy sector regulator Aneel establishes clearer regulations. mg/as For more information and to contact AFX: www.afxnews.com and www.afxpress.com

USA: Sempra unit to boost natgas delivery to California.

05/15/2001 Reuters English News Service (C) Reuters Limited 2001.

SAN FRANCISCO, May 15 (Reuters) - Southern California Gas Co. (SCG) said in a statement on Tuesday it will add around 200 million cubic feet a day, or about six percent, to its pipeline system by the end of the year in order to meet the surge in demand for gas-fired power generation. Today's announcement comes two months after SCG, a unit of Sempra Energy , proposed to increase capacity on its system by 175 mmcf, or five percent. Both projects will add around 11 percent of new gas capacity to its transmission system this year, the company said in a statement. In its latest proposal, called the Kramer Junction Interconnect, SCG said it would build a 32-mile pipeline link to the Kern-Mojave pipeline system that will allow it to deliver around 200 mmcf into its system. The new capacity would be enough to drive three 500-megawatt power plants or enough gas to serve 1.4 million residential customers a day, the statement said. SCG, the nation's largest gas utility with more 18 million consumers in central and Southern California, said utilization of its intrastate transmission system in the past nine months had jumped from 75 percent to over 95 percent, due largely to the rise in gas-fired power generation. The company's announcement is the latest in several proposals to expand gas pipeline capacity to California, where demand for gas is expected to jump because of the number of gas-fired power plants being built or scheduled for construction. Gas is already used to generate about a third of California's electricity. And since April 1999, the state has approved 13 major gas-fired power plant projects with a combined generation capacity of more than 8,900 megawatts. Nine gas-fired power plants, with a total generation capacity of more than 6,000 megawatts, are under construction. Over the past two months plans to build or expand gas lines serving California have been announced by Enron unit Transwestern, Williams Cos' Kern River Transmission, El Paso Corp. units El Paso Natural Gas Co. and Mohave Pipeline Co., Pacific Gas & Electric Corp. unit National Energy Group, Questar Corp. , Calpine Corp. , and Kinder Morgan .

Enron Urges Reforms In Japan Electricity Market-Nikkei

05/15/2001 Dow Jones International News (Copyright (c) 2001, Dow Jones & Company, Inc.)

TOKYO (Nikkei)--Asserting that cuts in electricity prices will help Japanese companies save as much as Y4 trillion, major U.S. energy firm Enron Corp. (ENE) on Tuesday urged Japanese power firms to revamp the electricity market by

separating operations such as power generation, transmission and distribution, The Nihon Keizai Shimbun reported. Enron's 10-point proposal also calls for the construction of more power plants and full-scale deregulation of retail electricity, including sales to households. If such measures are carried out and electricity prices fall to match the levels of other industrialized nations, Japan's industrial sector could trim its costs by Y4 trillion, Enron said. At a seminar on power industry deregulation hosted by Enron, the company asserted that Japan's deregulation in such areas as wholesale electricity auctions in 1996 and bulk retail sales last year has not brought significant benefits to end-users. New suppliers entering the market only

City Bankruptcy won't be felt here: Hydro California firm owes\$200 million to B.C. Staff Reporter

04/09/2001 Winnipeg Free Press Metro a4 All material Copyright (c) Bell Globemedia Publishing Inc. and its licensors. All rights reserved.

While Manitoba Hydro earns more than \$1 million a day through electricity exports to the U.S., officials say the collapse of California's Pacific Gas & Electric will not affect its operations. "There's no direct impact," spokesman Glenn Schneider said yesterday. PG&E last week became the biggest public utility in U.S. history to file for bankruptcy. It owes more than \$200 million to B.C. Hydro and \$28 million to Calgary-based Enron Canada Corp. Manitoba Hydro doesn't export power to the west coast. But it does do a lot of business in the U.S. Exports resulted in record revenues of \$376 million for Manitoba Hydro in the last fiscal year. And sales to the United States for the first six months of the current year totaled \$261 million, compared to \$203 million for the same period last year. It's anticipated that Manitoba Hydro will soon sign a deal with Xcel, formerly known as Northern States Power. The deal, worth over a billion dollars, would see Hydro supply Minnesota and other Midwestern states with 500 megawatts, which represents about 10 per cent of Hydro's maximum capacity. "We're still working out some of the legal language but there's no apparent roadblocks," Schneider said. He said forecasters in Minnesota predict demand for hydroelectricity will be strong for the next 10 to 15 years. In the meantime, Schneider said Manitoba Hydro has contacted some California-based companies to see if they'd be interested in relocating to Manitoba where they are assured of cheap, reliable power. "There's been some nibbles but it's a long-term process," he said.

Enron Broadband to Cut Jobs.

04/09/2001 The Oil Daily (c) 2001 Energy Intelligence Group. All rights reserved.

Energy trading giant Enron said Friday it will eliminate some 250, or roughly 20%, of the jobs at its broadband telecommunications unit, detailing a move that it has previously described as an internal redeployment of staff. Enron Broadband Services spokeswoman Kelly Kimberly said the company is cutting jobs at the unit, which now employs 1,150

people, because it has completed the building of its 18,000-mile fiber-optic network and because of slow demand for streaming media products delivered to personal computers, such as video of corporate events. The job cuts also reflect Enron Broadband's decision to play a less-active role in streaming media services. However, Kimberly said Enron Broadband will continue to pursue entertainment-on-demand services actively. Kimberly said employees whose jobs are being eliminated will be eligible for redeployment to other positions at Enron Broadband Services or other Enron units, although some could lose their jobs. PG&E Parent Files for Bankruptcy to Recover \$9 Billion in Costs.

04/09/2001 The Oil Daily (c) 2001 Energy Intelligence Group. All rights reserved.

After months of warnings about its precarious financial situation, Pacific Gas and Electric, the utility unit of PG&E Corp., on Friday filed for reorganization under Chapter 11 of the US Bankruptcy Code. Company executives said during a teleconference they believe the bankruptcy court will provide a fair and stable venue for resolving the financial crisis caused by more than \$9 billion in uncollected costs for power purchases. Under California's flawed deregulation plan, wholesale power costs move with the market, but the resale price to consumers is at a fixed rate. "The regulatory and political processes have failed us, and now we are turning to the court," said Robert D. Glynn Jr., chairman of both PG&E Corp. and the utility. Even though the state in January took over the power purchase function from Pacific Gas & Electric and Southern California Edison, the electric utility subsidiary of Edison International, Pacific Gas & Electric continues to accrue unreimbursed costs at the rate of \$300 million per month from purchases made by the California Independent System Operator on its behalf. In addition, Pacific Gas & Electric said continuing decisions by the California Public Utilities Commission (CPUC) have left the company at an economic disadvantage because of their failure to address the unrecovered costs issue. CPUC orders imposed new payment obligations on the company and thereby undermined its ability to return to financial viability. The CPUC also adopted what Pacific Gas & Electric described as "an illegal and retroactive accounting change that would appear to eliminate our true uncollected wholesale costs." Finally, the company said it recognized "the now unmistakable fact that negotiations with Gov. Gray Davis and his representatives are going nowhere." Glynn and Gordon R. Smith, president and chief executive of the utility, said they watched Davis' televised speech Thursday night, but they heard nothing that encouraged them that the state was going to address the unrecovered costs issue. The governor proposed a rate increase of up to 34.5%, but said those customers whose consumption dropped or remained flat likely would see no increase in their bills. The action would affect customers of San Diego Gas & Electric, which is financially healthy, as well as Pacific Gas & Electric and Southern California Edison. Davis presented his plan as an alternative to the rate hike proposed last month by the California Public Utilities Commission, which is seeking boosts of more than 40%. Trading in PG&E common stock was halted shortly before the bankruptcy announcement was made. At that time, PG&E was off only 2¢ to \$11.36. When trading resumed, PG&E plunged to less than \$7/share. Edison International took a big hit, falling more than 35% to \$8 shortly before the close of trading. Edison said it has no plans to put its utility into bankruptcy. Major power suppliers to California also saw their stocks dive initially, but most recovered some of the losses before the end of trading. Duke Energy, Dynegy, Enron, Mirant, Reliant Energy, and Williams Cos. were off between 2%-5%. El Paso actually was up slightly. Barbara Shook. (c) Copyright 2001. The Oil Daily Co. California; Metro Desk The State Power Regulators to Determine State Refunds Energy: Generators and California officials will work together for 15 days to solve the huge mathematical problem. MEGAN GARVEY TIMES STAFF WRITER

06/25/2001 Los Angeles Times Home Edition B-7 Copyright 2001 / The Times Mirror Company

WASHINGTON -- Starting today, federal power regulators will begin trying to solve one of the riddles of the energy crisis: How much of a refund will California get? One thing seems clear: The reduction will be a lot more than the \$125-million refund ordered to date, in all likelihood soaring to more than \$1 billion. Over the next 15 days--the Federal Energy Regulatory Commission is mandating no weekends off--warring representatives from power companies and the state of California will sit at the same table in a government conference room while a FERC task force wrestles the question to the ground. The task is to determine the price that power would have cost if FERC's decision to impose soft caps had been made not last week, but last fall. It is a daunting mathematical problem, factoring in hourly charges during the last eight months. To come up with a total, federal regulators, state electricity officials and power generators must determine what the highest price for a megawatt should have been under the soft price caps now in effect. Then they have to figure out which companies--if any--were charging more. Under the recent FERC ruling, the price of electricity during any given hour cannot exceed the actual cost of generating the least efficient--or most expensive--power coming into the grid. Curtis L. Wagner, the 72-year-old chief judge for FERC who is overseeing negotiations on California's overcharges, said of this morning's events: "It will be a zoo." Wagner, who headed into the weekend with three inches of documents to sort through, explained that Gov. Gray Davis wants \$9 billion knocked off the amount the power generators charged California. "I don't really think it's that high," said Wagner, predicting the refund will be more than \$1 billion but probably far from \$9 billion. "We have folks trying to do some adding now and some work on what the number should be," he said. Wagner said the money at stake will be the most he has worked on in his nearly three-decade career at the agency. Until recently, the likelihood of massive refunds seemed nil. Although California lawmakers--led by Davis--had demanded relief for costs that ran as high as 10 times or more than the rates a year ago, FERC officials had not agreed. And their minds seemed set. When FERC first proposed remedies for the California price increases late last year, commissioners said: "Refunds may be an inferior remedy from a market perspective and not the fundamental solution to any problems occurring in California markets." To date, FERC has ordered \$125 million in refunds for alleged overcharges in January and February. But with the recent appointment of two new commissioners by President Bush--Republicans Patrick H. Wood III of Texas and Nora M. Brownell of Pennsylvania--FERC's position softened, leading to the price mitigation ordered last week. Now FERC is taking a closer look at the prices already charged. California lawmakers have pegged overcharges at nearly \$9 billion since the California market went haywire last summer--a number that comes from a study done by Cal-ISO, the operator

of California's electricity grid. Cal-ISO officials acknowledged last week that the study might have significant flaws. Among companies that may be required to reduce their bills are energy giants Enron Corp., Mirant Corp., Duke Energy Corp., Williams Cos. and Reliant Energy Inc.--all of which are expected to have representatives at the negotiations. The companies have hotly disputed the amount of overcharges alleged by Davis and other California lawmakers and point out that they have yet to be paid for the vast majority of electricity sold in the state in recent months. Today, Wagner said he plans to make opening statements to the media. After that, he said he hasn't determined how much of the wangling will be done behind closed doors. If the parties don't come to an agreement in 15 days, Wagner will have seven days to make a recommendation on refunds to FERC's five commissioners. It is a process that may be repeated down the road if Sen. Barbara Boxer (D-Calif.) and other California politicians get their way. Boxer has introduced legislation that would give FERC retroactive power to order refunds--all the way back to July 2000, when San Diego first faced huge spikes in electricity costs.

NEWS THE ENERGY CRUNCH / \$9 billion showdown over power / State delegation seeking refunds Lynda Gledhill, Christian Berthelsen Chronicle Staff Writers

06/25/2001 The San Francisco Chronicle FINAL A.1 (Copyright 2001)

A critical showdown in California's energy crisis starts this morning, as state officials meet with energy companies to demand \$9 billion in refunds. A 15-day settlement conference, ordered as part of the Federal Energy Regulatory Commission's decision last week to put price controls on wholesale electricity prices, will bring together the parties that have been squabbling for the past year. "We are going to Washington with one goal, and that is to bring back \$9 billion," Gov. Gray Davis told reporters yesterday. "The fact is that people have taken advantage of the market, gamed the system and ripped people off." But Davis' crusade may be dampened by challenges to the study the state used to arrive at the \$9 billion figure and by a FERC mediator's prediction that California will walk away with less than it is demanding. The Democratic governor's figure is based on an update of a March study by the California Independent System Operator, which manages the state's power grid. Some energy experts argue the study is flawed, but the ISO stood firm behind its methodology yesterday. Curtis L. Wagner Jr., the FERC administrative law judge who will oversee the meeting, said in an interview with The Chronicle yesterday that he was optimistic a settlement would be reached. Wagner said the \$9 billion "seems a little high. And the generators' numbers seem low. We'll probably come out somewhere in between." The veteran mediator, who spent yesterday reviewing spreadsheets submitted by the parties, said he will look at applying last week's commission price control order back to October. "I think we should put the refund issue to rest," Wagner said. "I'm sure we can agree on a structure that is fair to everybody." Enron Corp, Reliant Energy Inc., Duke Energy Corp., Williams Cos., Dynegy Inc. and Mirant Corp. are among the companies facing allegations of illegally overcharging California. The companies say the high prices were a result of the high costs of natural gas used to gene

Enron stock surges on executive's assurances

03/23/2001 Associated Press Newswires Copyright 2001. The Associated Press. All Rights Reserved.

HOUSTON (AP) - Shares of Enron Corp. surged nearly 8 percent Friday as chief executive officer Jeffrey Skilling assured analysts there are no layoffs planned for the company's broadband division. Enron shares began plunging this week because of layoff rumors, setting a 52-week low of \$51.51 before rebounding. Houston-based Enron closed up \$4.38 Friday to \$59.40 on the New York Stock Exchange. Skilling called the company's stock price drop to the low-\$50 range "just crazy." The rumors surfaced after some staffing changes were made at the broadband division, which Skilling said should perform better than expected this quarter. The conference call came a day after Enron repeated its expectation of earning between \$1.70 and \$1.75 per share. The consensus of analysts surveyed by First Call/Thomson Financial is \$1.74 per share. On the Net: <http://www.enron.com>

USA: Cinergy buys two U.S. Southeast power plants from Enron.

03/23/2001 Reuters English News Service (C) Reuters Limited 2001.

NEW YORK, March 23 (Reuters) - Cinergy Capital & Trading Inc., a unit of Cincinnati, Ohio-based Cinergy Corp. , said Friday it completed the acquisition of two merchant generating facilities in the Southeast from Enron North America. The two companies announced in December, 2000 they had signed a definitive agreement subject to regulatory approvals, which have now been received, Cinergy said in a statement. Financial terms of the transaction were not disclosed. The plants are the 494-megawatt (MW) Brownsville generation facility in Haywood County, Tennessee and the 504-MW Caledonia generation facility in Lowndes County, Mississippi. Both are natural gas-fired units. Cinergy Corp., owns, operates or has under development over 21,000 MW of generation. The company provides service to about 1.5 million electric and about 500,000 natural gas customers in Ohio, Indiana and Kentucky. Houston-based energy giant Enron Corp. produces electricity and natural gas, develops, constructs and operates energy facilities worldwide, and delivers physical commodities and financial and risk management services to customers around the world. - New York Power Desk, 212 859-1627, fax 212 859-1758, e-mail Eileen.Moustakis@reuters.com.

USA: UPDATE 1-Enron seeks to assuage investor fears of broadband. By C. Bryson Hull

03/23/2001 Reuters English News Service (C) Reuters Limited 2001.

HOUSTON, March 23 (Reuters) - Enron Corp.'s top executive set out on Friday to assuage investor fears about trouble in the company's broadband unit, assuring Wall Street that the nascent business was on track to meet its targets. Enron president and chief executive Jeff Skilling told analysts on a conference call that the broadband unit, which has been the subject of false layoff rumors, is in good shape and would actually benefit from the current weak market for bandwidth capacity. "My expectation is that we will see over 400, maybe over 500 transactions this quarter, which shows this business is absolutely developing. It is ahead of plans," Skilling said. If expectations are met, Enron will have cut roughly twice as many deals for the first quarter of 2001 as it did in the fourth quarter of 2000, when it performed 236 transactions, Skilling said. In all of 2000, Enron cut 321 broadband deals, he said. Enron has said it expects a sevenfold increase in bandwidth transactions in 2001 compared with last year. The conference call followed two hard days for Enron's stock which lost about 8 percent of its value and dropped under \$59 for the first time since January 2000. Investors, already pushing the stock price up before Skilling's midday call, reacted favorably to his comments on Friday as shares closed at \$59.40, up \$4.31 - nearly eight percent higher. "It seems to me that there have been a lot of little negatives developments along the way and these have taken their toll on the stock, in fact I think the stock has clearly overreacted," UBS Warburg analyst Ron Barone said. LONG BANDWIDTH SUPPLY A BONUS - A long supply of bandwidth capacity and a weak telecom market translates to a savings of about \$500 million in capital costs Enron laid out to develop its bandwidth network this year, Skilling said. "We will not have to make as ... large an investment in our network as we had expected because we are going to have access to third-party networks much more easily than we could have possibly expected," he said. "There is a huge amount of capacity out there and people are desperate to sell capacity for cash," Skilling said. That should translate to a \$500 million drop in Enron Broadband Services' (EBS) 2001 capital budget of \$750 million. Commerzbank Securities analyst Andre Meade said growing liquidity and access is a good sign for Enron's bandwidth trading business. "If prices fall, Enron is largely agnostic because there is just a big a need to optimize the price of fiber transport when prices are falling as when prices are rising," Meade said. Meade said he was not certain whether some of the shrinking capital outlay might be related to Enron's broadband content business, which suffered a blow three weeks

ago with the collapse of its 20-year-exclusive video on demand deal with Blockbuster Inc.. BROADBAND RUMORS FUELED STOCK DROP Some analysts have attributed two consecutive days of price drops in Enron's stock to false rumors of layoffs at EBS and the market's devaluation of that unit in light of weakness in the technology and telecom sectors. Skilling reiterated earlier denials of layoff talk, which Enron says was prompted by a shift of personnel inside EBS. "Enron had a very specific purpose on the conference call which was to dispel rumors about their bandwidth unit and they said they are not true," Salomon Smith Barney analyst Ray Niles said. Niles said the broadband numbers Skilling gave look in line with reaching the target of a sevenfold increase, which "would fully validate the potential of the market," Niles said. Skilling addressed lingering concerns over payment problems at its Dabhol power plant, the California power crisis and reaffirmed Enron's projected earnings per share of \$1.70-\$1.75 in 2001. "Our credit exposure in California has actually dropped, so regardless of what happens in California the \$1.70-1.75 numbers I think look great," Skilling said. On Dabhol, Skilling reiterated his view that India's national government would continue to honor its contract to back power payments if the Maharashtra state government did not.

USA: Transwestern plans expansion at Ariz. compressor stations.

03/29/2001 Reuters English News Service (C) Reuters Limited 2001.

NEW YORK, March 29 (Reuters) Transwestern Pipeline Co. (TW), a unit of Enron , said in a statement on Thursday it planned to install new compression at four existing stations in Arizona to boost gas deliveries to energy-starved California. The company said it had filed an application with the Federal Energy Regulatory Commission (FERC) to expand its system by 150 million cubic feet per day (mmcf/d) of incremental firm capacity. TW's total capacity to the California border will increase to 1.24 billion cubic feet per day (bcfd). The \$93 million project is expected to be in service by June 2002. "This expansion is a start in meeting the increased demand in California and represents additional capacity that can be brought on-line by next summer. Transwestern also plans a more extensive expansion in the future," said Stan Horton, chairman of Enron Transportation Services Company.

Enron Unit Files Application For \$93M Expansion Project

03/29/2001 Dow Jones News Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Enron Corp.'s (ENE) Transwestern Pipeline Co. unit filed an application with the Federal Energy Regulatory Commission for a \$93 million expansion project, expected to be in service by June 2002. In a press release Thursday, the company said it would install new compression at four existing stations in Arizona to expand the system by 150 million cubic feet per day, or MMcf/d, of incremental firm capacity. Transwestern Pipeline's total capacity to the California border will increase to 1.24 billion cubic feet per day. Transwestern Pipeline consists of about 2,500 miles of pipeline with 1.7 Bcf/d of peak capacity. Shares of Enron closed at \$55.31, down \$2.79, or 4.8% on Nasdaq volume of 5.7 million shares. Average daily volume is 4.2 million shares. Enron, which had 2000 revenue of \$101 billion, markets electricity and natural gas. Company Web site <http://www.enron.com> -Karen M. El Paso's Calif Gas Play Was Smart,Not Crooked -Analysts By John Edmiston

03/29/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

OF DOW JONES NEWSWIRES

HOUSTON -(Dow Jones)- When El Paso Merchant Energy bought up most of the capacity on a key natural gas pipeline to California, it was taking a "gamble" on higher profits, not trying to corner a market, analysts said. The auction in which El Paso Merchant Energy bought the capacity from fellow El Paso Corp. (EPG) affiliate El Paso Natural Gas was legitimate, and supply and demand factors proved the decision sound, they said. "El Paso took a gamble on its pipeline capacity, and the fundamentals worked out to support their trading position," said Kyle Cooper, an energy analyst with Salomon Smith Barney in Houston. California officials, struggling to cope with soaring power prices that have been driven higher in part by spiking prices of natural gas, see things differently. The El Paso pipeline is one of only two main links feeding energy from the Southwest's natural gas storage pools into California, and state officials contend the Houston-based energy company was trying to manipulate the price of gas in the state when it bought up capacity in an auction early last year. Natural gas in southern California has traded much higher than gas in northern California in recent months. At their highest, in December, the price of gas in southern California spiked to \$60 per million British thermal units, six times the cost of gas at the other end of the pipeline in Texas. Prices spiked again in February and March and remain much higher than the price of gas in producing regions. The U.S. Federal Energy Regulatory Commission Wednesday rejected a complaint from the California Public Utilities Commission alleging that El Paso Natural Gas skewed the bidding process for critical natural gas pipeline capacity into California. But the commission ordered an administrative hearing to address concerns that El Paso controls too much pipeline capacity and is driving up prices at the California border. The California Legislature was to examine the allegations in its own series of hearings next week. On Monday, The New York Times weighed in, reporting that sealed documents filed with FERC suggest El Paso sought to increase its profits by manipulating natural gas price spreads between its supply basins in Texas and New Mexico and the California energy markets. Charlie Sanchez of Gelber & Associates in Houston said it's unlikely any wrongdoing will be uncovered. "This market has become so complicated that many don't know the objectively correct answer to the questions at hand," Sanchez said. "It's likely the forces at work will be deemed perfectly legal." El Paso spokesman Aaron Woods referred requests for comment to previous denials of manipulation.

Charges Are Political - Analyst

California's charges against are politically motivated, said Ron Barone, an analyst with of UBS/PaineWebber Inc. in New York. "California needs more pipeline capacity, more power plants, less finger-pointing and less resistance to rate hikes that would immediately trigger a demand response," Barone said. The state's gas-transportation shortfall wasn't always apparent. Before last year, capacity into California was considered oversupplied, El Paso executives say: Demand didn't cover available capacity, so the company discounted its prices. California entities have failed to bid realistically to renew capacity in auctions over the past three-and-a-half years, Barone said, even when cost of that capacity was substantially below the rates allowed by regulations. For years the capacity on El Paso's line to California never made money, Cooper said. As a result, there was little incentive for anyone to build new pipelines. Demand from power generators has pushed up the state's appetite for gas. According to John Somerhalder, president of El Paso's Pipeline Group, requests for gas capacity on pipeline expansions into California are running more than 12 times what they were a year ago. "El Paso had the foresight to take a calculated risk on the value of that capacity and it worked in their favor," Cooper said. "If those fundamentals - a normal winter and excess demand and lessened storage capacity across the country - hadn't worked

out, they'd have lost that 8 cents Dynegy was willing to pay them." El Paso Merchant Energy reported year 2000 earnings before interest and taxes of \$563 million, nearly a six-fold increase from adjusted earnings before interest and taxes the year before. El Paso has said that it couldn't take advantage of the price spikes allegedly produced by market manipulation, because it began hedging its risk in the middle of last year by selling its gas forward to third parties. By the end of the year, it was nearly 90% hedged, Barone said. "This hedging capacity is proof that once El Paso actually had ca

Poland-Norway Gas Deal Might Hit Mkt Liberalization By Joe Harper Of DOW JONES NEWSWIRE

04/27/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

WARSAW -(Dow Jones)- Poland will limit its chances of developing a flexible and diversified gas market if the government goes ahead with a long-awaited gas import deal with Norwegian and Danish companies, said a participant at the Power in Poland conference in Warsaw this week. "Entering into long-term guaranteed take-or-pay contracts with Norwegian and Danish partners would result in the incumbent contract holders having an incentive to delay domestic gas market liberalization at any cost," said Jarek Astramowicz, president of Enron Poland, the Polish unit of the U.S.'s Enron Corp. (ENE). The incumbent contract holder - Poland's gas monopoly Polskie Gornictwo Naftowe i Gazownictwo (R.PGN), or PGNiG - said recently it will sign a long-term, guaranteed take-or-pay contract with Norway's state oil company Statoil AS (Y.DNS) and Danish state-owned oil and gas utility DONG in May. The three parties are negotiating a trade deal that could see between five and eight billion cubic meters (bcm) a year exported from Norway and Denmark to Poland by 2007. According to Polish press reports Statoil reportedly wants financial guarantees from the Polish government before signing any sales agreement with PGNiG. The Norwegians also said they need to sell at least eight bcm of gas a year to Poland to make the project financially viable, while the Polish side has said it wants to import only 5 bcm a year. PGNiG president Andrzej Lipko said this week PGNiG and Statoil were "negotiating intensively," but didn't say when a deal might be signed. Astramowicz said the deal would reduce the Polish side's room for maneuver in future gas importation and corner Poland

into accepting gas at higher prices than it could find on E.U. markets when the Polish and E.U. grids are fully interconnected. Enron, like other traders, operates best in markets where there is greater liquidity, and the Norway deal would dry up considerable amounts of potential liquidity. Astramowicz added that the Polish market would be oversupplied if the deal goes ahead, pushing up end-user prices. And it's the projected increases in demand for gas in Poland over the next 10 years that presents the major problem. Barbara Litak-Zarebska, Deputy Treasury Minister, said this week gas demand projections were largely based on an expected rapid shift from coal-powered to gas-powered electricity generation in Poland. Poland's Economy Ministry estimates the country's current annual gas consumption at 10.5bcm-11 bcm, and expects this total to reach 18.4 bcm by 2010, including 6.1 bcm to be consumed by the newly constructed, gas fired power plants. Astramowicz said this projection was too high, claiming the power sector was likely to take only 2.5bcm-3.5 bcm by 2010. "Furthermore, power generated from gas cannot compete with power generated by coal-fired power plants in price terms. Therefore, this source of increase in gas demand will not materialize in the near future," he said. As an alternative to the Norway deal Astramowicz pointed to western European gas trading hubs already offering flexible gas supply contracts with terms of up to ten years. "For example, competitively priced gas supplies based on the contracts executed in Zeebrugge (Belgium) or Emden (Germany) are already reaching customers in eastern Germany today and, as Polish gas consumption grows, could easily be used to source any additional gas supplies needed for customers in Poland," said Astramowicz. He also pointed to potential import price advantages from the E.U. He said gas imported from the E.U. would cost about \$135/1000cm, against a price on the current Yamal contract of \$120/1000cm and a Norwegian gas price (including the estimated transmission charge to the Polish border of \$20/1000cm), of \$150/1000cm. PGNiG's Lipko said that imported Russian gas prices would not be \$30 cheaper than Norwegian supplies once a pipeline linking the two countries had been built. Peoples Energy Reports Second Quarter Results Reaffirms Fiscal 2001 Estimate

04/27/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

CHICAGO, April 27 /PRNewswire/ -- Peoples Energy (NYSE: PGL) reported today that its second quarter earnings for the three month period ended March 31, 2001 were \$62.5 million, or \$1.77 per share, up from \$57.4 million, or \$1.62 per share for the same period a year ago. For the most recent six month period, earnings were \$98.8 million or \$2.80 per share, compared to \$87.0 million, or \$2.45 per share for the same period last year. Quarterly and fiscal year-to-date results were positively impacted by weather that was colder than the prior year periods by 19% and 23%, respectively, offset by the negative impact of gas prices that were at record levels. The combined effect of these two factors is reflected in current accounts receivable balances, which are significantly higher than a year ago. The company has implemented several flexible payment programs and is actively pursuing collection of past due amounts. "We are pleased with the results from our gas distribution business despite challenging circumstances and with the continuing growth from our diversified business segments," said Richard E. Terry, chairman and chief executive officer. "We are reaffirming our earlier fiscal 2001 earnings estimate of \$3.05 to \$3.15 per share, assuming normal weather and planned utility performance for the rest of the year. The South Texas oil and gas property acquisition that we announced today will add \$.10 to \$.15 per share to that projection." Peoples Energy reported second quarter and fiscal year-to-date results for its primary business segments: Gas Distribution. Operating income was \$101.6 million for the second quarter and \$180.0 million for the six month period, as compared to \$98.9 million and \$156.3 million, respectively, in the prior year. The increases were mainly due to colder weather, reduced depreciation expense, and the positive effects of pension benefit accounting, offset by increases in the provision for uncollectible accounts and customer conservation

OFFICE OF THE GOVERNOR

PR01: 02 FOR IMMEDIATE RELEASE January 3, 2001

GOVERNOR DAVIS CALLS SPECIAL LEGISLATIVE SESSION ON ENERGY

SACRAMENTO - Governor Gray Davis today issued a proclamation requiring the legislature to convene a special session to pass legislation addressing California's energy crisis.

According to the guidelines of the proclamation, the session will focus on legislation that:

Affects the availability, consumption, and use of energy; Governs the finances and organization of the California Independent System Operator (ISO) and the California Power Exchange (PX); Addresses the operation, maintenance, and finances of California power generators and utilities; Affects the wholesale and retail markets for energy supplies, capacity, and reliability; and Protects the health and safety of Californians with respect to power-generating facilities and transmission facilities. "In response to the Federal Energy Regulatory Commission's (FERC) failure to meet its obligations, I am taking the extraordinary step of calling the California Legislature into a concurrent Extraordinary Session to immediately address the energy situation in our state," said Governor Davis. "I will call them to do at least the following: Replace the so-called stakeholders on the ISO Board with Californians who are more concerned about affordable prices and reliability of power and; re-establish the authority for the state to inspect private power plants to assure the coordination of maintenance and operating schedules; and provide low-interest financing for new peaking facilities or re-powering old ones to make them cleaner and more efficient in return for committing their power to Californians at guaranteed low rates."

Governor Davis used his constitutional power to call for the special session (Section 3(b) Article IV). The session will begin on January 3, 2001. Each house of the legislature will be responsible for the scheduling of hearings and the calendar for the session.

Governor Davis called a special session on education in 1999, and the legislature passed a series of sweeping initiatives to improve academic performance and accountability.

###

---- GOVERNOR GRAY DAVIS ? SACRAMENTO, CALIFORNIA 95814 ? (916) 445-2841

Times are grim for farmers, caught between sagging prices, subsidies and livestock diseases. But the energy crunch may provide North America's farmers with another, lucrative line of work. Wind power has suddenly become viable and massive new projects have been announced both on and offshore. In January, the Bonneville Power Administration (a hydro-electric utility operating in the Pacific Northwest) said it will buy 1,000 megawatts of wind energy by 2003. That's enough to supply a city of 500,000 people. Just before that announcement, another utility, FPL (Florida Power & Light) Energy, announced plans to build the largest "wind farm" in the world with turbines in Oregon and Washington, enough for 70,000 homes. Last year, Texas-based Enron Corp., an energy conglomerate, had just finished 700 turbines in California, western Texas, Minnesota and Iowa. A handful of Canadian entities have announced small-scale projects within the past few months. What has changed is that wind power can be generated economically without subsidies, thanks to high fuel prices. What has also changed is that the wind power technology has improved dramatically. Equipment is less noisy and more attractive. Turbines have gone up 20-fold in price, but can produce 120 times more power than a generation ago. Another concern was that the fast-moving blades of wind turbines were killing birds. But newer designs are slower in speed and therefore less lethal. North America is way behind Europe in alternative energy, mostly because it is blessed with cheap, plentiful hydrocarbon sources. Only 1.5% of environmentally activist California's power needs are generated from wind turbines while Denmark and Germany depend on windpower for 6% of their supplies. Washington would like 5% of U.S. electricity generated from wind by 2020. But it already makes sense. Fuel costs are so high the wind business is even profitable for small, independent farmers and landowners in breezy parts (read prairies) of the United States and Canada. By harnessing the wind, they can enhance their cash flow, keep their own lights burning brightly and look after the neighbours or the local power grid, too. Most significantly, in February, the world's biggest oil giant -- Royal Dutch Shell Group -- waded in with an announcement it will construct a wind mega-project or two. But Shell is going to create wind farms offshore, away from urban development and political objections. "Wind energy is set to be the major new offshore industry of the next generation," Shell said in February. "We believe that by deploying Shell's world-class commercial, technical and financial capabilities to large and challenging projects we are confident that we can become a major player in the global wind energy sector," David Jones, executive vice-president of Shell's wind energy business, said at a conference. "Wind is the most competitive of the renewable energy sources when comparing costs with conventional fuels," said Mr. Jones. "Wind energy production is expected to increase rapidly as it moves offshore to achieve wind farms of greater scale." The company is evaluating offshore sites in North America and Europe and is also involved in turbine manufacture. It operates small pilot projects in Europe capable of meeting the needs of only a few thousand consumers. Sir Mark Moody-Stuart, Shell's chairman, underscored the shift in energy sources from hydrocarbons to wind, biomass and other renewables. He maintained this is merely the continuation of a steady trend based on consumer demands. "The energy industry evolves giving products the customers want. In the last century, there was mostly coal used, with few liquids, then liquids replaced coal, then gas came along after World War II. History shows there has been a steady de-carbonization of fuel from wood to coal to oil and gas," he said in a panel I attended in February at the World Economic Forum in Davos, Switzerland. The world "must take the climactic threat seriously" by using hydrocarbons more efficiently. "We think we can make money at the moment out of wind, some out of biomass, but not photovoltaics [batteries]," he added. "We want to meet the aspirations and needs of our customers and society. It's both a commercial challenge and a commercial imperative. We're just starting [wind power] offshore, where people cannot object." As for biomass, Shell has also been amassing forested acreage around the world which will eventually be the feedstock for fuel production from plant life. "Wind indeed is ready for prime time," Ralph Cavanagh, energy program director for the Natural Resources Defense Council, an environmental group based in New York, said recently. Another environmentalist, Worldwatch Institute's Seth Dunn, pointed in an interview to a study by Shell showing that "by 2050, over 50% of primary energy supply comes from renewables."

The Hindu-Editorial: Time for negotiations

04/14/2001 The Hindu Copyright (C) 2001 Kasturi & Sons Ltd (KSL); Source: World Reporter (TM) - Asia Intelligence Wire

THE CYCLE OF claims and counter-claims between the Maharashtra State Electricity Board (MSEB) and the Dabhol Power Company (DPC) has reached a point where the only way the imbroglio can be resolved is by renegotiations. The process of both parties slapping claims on each other helps neither even as it leaves unaddressed the basic problems in the project. The conciliation and arbitration process that has begun is also unlikely to provide any answers to the larger questions because it is about a specific issue - the decision of the Central Government not to honour a counter-guarantee on a demand of Rs. 102 crores by the DPC because the MSEB's own claim of Rs. 400 crores has not been settled - rather than about the deep flaws in the power purchase agreement itself. With the Godbole Committee calling for renegotiation to bring down the cost of Dabhol power, the Government of Maharashtra will now have to shed its ambivalence about where it stands on the project. While DPC has always been aggressive in asserting its rights, it cannot but be aware that it will be impossible for it to do business in the face of hostile public opinion and the increasingly ambivalent attitudes of the State and Central Governments as well. Given that in the U.S. the Enron Corporation itself has begun to exit from the energy production business and focus on the more profitable activity of energy trading this should be an additional factor working in favour of a renegotiated contract. But the question is how much such renegotiations will yield, for the fundamental problems of the Dabhol project were and still are about a very high capital cost, dollar-denominated tariffs and a contract for supply of liquefied natural gas (LNG) which will (after the implementation of the second phase) make DPC power all the more expensive if the plant were to operate at less than 80 per cent capacity. The Godbole Committee has not recommended scrapping the larger and more expensive Phase-II of the project and more disappointing for the State Government is that it has refused to bear

'Seasoned Trader' Moving Up To Head Enron Broadband By Erwin Seba Of DOW JONES NEWSWIREs

07/17/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- An executive described as "a seasoned trader" will le= ad=20 Enron Corp.'s (ENE) telecommunications unit after its current chief executi= ve=20 takes a different position within corporation in the next two weeks.=20 James Fallon, president and chief operating officer, will lead Enron=20 Broadband Services after it becomes part of Enron's Wholesale Services Grou= p. Broadband Services Senior Vice President Kelly Kimberly told Dow Jones=20 Newswires Fallon will lead the organization after Kenneth Rice, chairman an= d=20 chief executive, moves to a corporate job at Enron.=20 Fallon was unavailable to talk to Dow Jones for this story.=20 One broker said Fallon's selection indicated Enron isn't backing away from= =20 developing the bandwidth market.=20 "Jim Fallon is a seasoned trader," the broker said. "He made a killing in t= he=20 power markets. He has a huge reputation for making money."=20 The broker speculated that Fallon may increase the number of traders Enron= =20 has in the bandwidth market. Broadband Services has announced plans to=20 reassign and possibly layoff non-trader employees in the coming two weeks.= =20 An analyst said Fallon's appointment indicates future growth for Enron's=20 bandwidth business.=20 "I think Fallon is someone who wouldn't be there if it isn't a good=20 opportunity," said Raymond Niles, director of power and

merchant energy=20 research with Salomon Smith Barney.=20 In his new role, Fallon will report to Mark Frevert, chairman and chief=20 executive of Enron Wholesale Services, and Greg Whalley, president and chief=20 operating officer of Wholesale Services.=20 Rice previously reported to Kenneth Lay, corporate chairman and chief=20 executive.=20 Before becoming president of Broadband Services, Fallon was managing direct= or=20 of global trading and risk management for the unit.=20 From 1993 to 1999, he worked in Enron North America's wholesale energy=20 business rising from the position of associate to managing director, leadin= g=20 the power trading business.=20 Before coming to Enron, Fallon was a nuclear operations engineer for Genera= l=20 Electric, a systems engineer at W.R. Grace and a certified public accountan= t=20 for Price Waterhouse.=20 Fallon earned a bachelor's degree in marine engineering from the=20 Massachusetts Maritime Academy, a master's degree in accounting from=20 Northeastern University and a master's in business administration from=20 Columbia University.=20 Fallon takes over a unit that lost \$102 million in the second quarter of th= is=20 year and is going through a restructuring to reduce losses at the same time= =20 bandwidth prices continue to plummet.=20 -By Erwin Seba, Dow Jones Newswires; 713-547-9214; erwin.seba@dowjones.com

BANDWIDTH BEAT: Enron Readies For Life After Watermelon By Michael Rieke

07/17/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

A Dow Jones Newswires Column=20

HOUSTON -(Dow Jones)- Listen. Do you hear that giant sucking sound? It's th= e=20 watermelon being sucked out of the bandwidth market. Two years ago this month, Jeff Skilling, now chief executive and president = of=20 Enron Corp. (ENE), told Dow Jones Newswires that the Internet high-bandwidth= h=20 area of the telecommunications market was growing faster than the wholesale= =20 energy market.=20 "Enron is positioned in the heart of that watermelon," he said.=20 Skilling's watermelon hype has been replaced by talk of burn rate. Last wee= k=20 during a conference call with analysts, he said Enron must reduce its=20 operating expenses, because losses at Enron Broadband Services exploded to= =20 \$102 million in the second quarter from \$8 million in the same period last= =20 year.=20 Skilling promised to cut expenses quickly. Enron is closing the broadband= =20 services office in Portland, Ore. It will redeploy some of those employees= =20 and lay off others.=20 An Enron spokeswoman said Monday that Ken Rice, chairman and chief executiv= e=20 of the broadband unit, would move to an as-yet undetermined corporate job i= n=20 two weeks.=20 In addition to trimming bandwidth losses, Enron's taking a step that could= =20 trim their visibility.=20 Enron reports results from Wholesale Services, Retail Energy Services,=20 Transportation and Distribution, and Broadband Services. No longer. As of t= he=20 third quarter of this year, Enron Broadband Services will become a business= =20 unit within Enron Wholesale Services. That move will "make it easier for=20 Enron to hide the losses," one analyst said.=20 For reporting purposes, Enron will treat broadband as it treats wholesale= =20 markets for weather, metals, lumber and steel. In second quarter results=20 released last week, Enron said it more than doubled delivered volumes in ea= ch=20 of those commodities, but it didn't give information on income from any of= =20 them.=20 If the company's broadband business had been lumped into Wholesale Services= =20 in the second quarter, the company could have said simply and accurately th= at=20 delivered volumes in broadband increased more than sevenfold during the=20 second quarter. The broadband losses of \$102 million before interest and=20 taxes could have been rolled into the wholesale business income of \$802=20 million, leaving still-impressive income of \$700 million for the quarter.= =20 Cutbacks Par For The Course=20

Enron isn't alone in looking for ways to cut expenses in the broadband=20 sector. Telecom carriers and equipment makers have been laying off thousand= s=20 of employees this year in an effort to cut billions of dollars in losses.= =20 "It's not pretty out there," a consultant said.=20 Keith Shoemaker, a senior trader at Aquila Energy Corp. (ILA), has left the= =20 company's broadband unit for its energy business. There isn't enough real= =20 trading now in bandwidth to require the services of a senior trader, Sushil= =20 Nelson, general manager of Aquila's broadband unit, told Dow Jones Newswire= s.=20 "If you look at total sales of any network companies, the real sales - by= =20 carriers on down the chain - are a fraction of what they were a year ago,"= =20 said Harold Kamins, a managing director for Morgan Stanley Dean Witter. As = a=20 result, trading has diminished at least the same amount.=20 A liquid market for bandwidth trading is now expected to be six to 18 month= s=20 away, according to predictions by Enron's Skilling, Aquila's Nelson and=20 others.=20 There's still a future for commodity trading in telecom, because companies= =20 want to avoid big capital outlays for laying and lighting networks and want= =20 to preserve cash, said Ciara Ryan, leader of Arthur Andersen's bandwidth=20 trading team.=20 R

Over 600 Students in Four Programs to Graduate from Haas this Sunday Management of Technology Receives \$1.5 Million Endowment for Summer Internship Program California's Slumping Economy Faces Multi-Year Recovery, says Researchers UC Berkeley Teams Win Two Real Estate Challenges Haas Begins a Summer of Major Conferences Haas Celebrates a Year of Accomplishments New Staff at Haas Haas in the News?? Haas Celebrations

OVER 600 STUDENTS IN FOUR PROGRAMS TO GRADUATE FROM HAAS THIS SUNDAY On Sunday, May 20, 636 students representing four of the Haas School's academic programs will march through the Greek Theatre to commence their new roles as Haas alumni.

The Haas School will be conferring degrees to 290 undergraduate students, 233 full-time MBAs, 106 Evening MBAs, and 7 Ph.D.s at this year's commencement ceremony. David Pottruck, co-CEO of Charles Schwab Corp., will deliver the commencement address. Dean Laura Tyson will be master of ceremonies. The student speakers are Theodore Liaw (undergraduate), David Theodore Marron (Evening MBA), and Patrick De Neale (MBA).

The Haas graduation ceremonies on May 20 begin at 9:00 a.m. in the Greek Theatre. They will be followed by a reception on Kleeberger Field from 11:30 a.m. to 1:30 p.m. Students get two free tickets to the reception. (Graduates are admitted free.) Students may pick up extra tickets (\$5 each) in their program offices before Friday or at the door for the event. Children under 5 are admitted free.

New graduates looking to stay connected with the Haas School should visit <http://www.haas.berkeley.edu/alumni/newgrads/index.html> to learn more about the Haas Alumni Network.

MANAGEMENT OF TECHNOLOGY (MOT) RECEIVES \$1.5 MILLION ENDOWMENT FOR SUMMER INTERNSHIP PROGRAM With the financial backing of a leading Silicon Valley venture capital firm, the Haas School of Business, the College of Engineering, and the School of Information Management and Systems are launching an innovative program that blends academic training in entrepreneurship with hands-on industry experience at Silicon Valley startups.?

The Mayfield Fund, a top-tier venture capital firm headquartered in Menlo Park, California, has committed \$1.5 million to fund the new program at UC Berkeley, to be called the UC Berkeley Mayfield Fellows Program. The new program will be administered by the Management of Technology Program (MOT), a partnership created in 1988 by the above three units of the UC Berkeley campus. Under the UC Berkeley Mayfield Fellows Program, graduate students selected from the College of Engineering, the Haas School of Business, and the School of Information Management and Systems work as summer interns at venture-backed high tech firms in Silicon Valley.?

"I don't believe any other university offers its graduate students such rigorous training in starting new high-tech ventures, from both a business and a technology perspective," explains Richard Newton, dean of the College of Engineering.? "Add to that the opportunity to work directly for the CEO of a high-tech startup as part of the academic experience, and we have created something truly extraordinary for our students."

The first group of UC Berkeley Mayfield Fellows was announced this week, four each from the College of Engineering and the Haas School, all with extensive technical training and previous work experience in high tech. The names of the fellows will be announced at a later date. In addition to the summer internships, UC Berkeley Mayfield Fellows participate in

intensive classroom work, intended to blend the practical experience gained through their internships with the challenge and growth of a series of graduate seminars on technology and entrepreneurship.

"The UC Berkeley Mayfield Fellows Program is a great example of the way in which we're succeeding at blending hands-on industry experience at Silicon Valley companies into the Haas academic experience," says Andrew Isaacs, executive director of MOT. "The joint MOT-Lester Center collaboration on this program makes this new venture all the more exciting."

The Mayfield Fund has made the \$1.5 million commitment to UC Berkeley as part of its support of the Center for Information Technology Research in the Interest of Society (CITRIS), being created within UC as a focal point to apply advances in information technology to the solution of society's most critical needs. "Mayfield is excited by the opportunity to participate with UC Berkeley in a program that will enrich the entrepreneurial experience for graduate students," said Michael Levinthal, Mayfield Fund general partner. "The continual success of startups that have flowed from UC Berkeley to the Bay Area and beyond is exceptional, and Mayfield is proud of our association with this process."

CALIFORNIA'S SLUMPING ECONOMY FACES MULTI-YEAR RECOVERY, SAYS RESEARCHERS As California's prosperous glow begins to tarnish, the state as a whole faces sharply escalating unemployment rates, a leveling off or decline in home prices, rising office vacancies, and reduced construction over the next two to three years. These are the conclusions of Professor Dwight Jaffee and California economist Cynthia Kroll of the Fisher Center for Real Estate and Urban Economics.

In the center's recently released Spring 2001 Research Report, Jaffee and Kroll point to the vulnerability of California, and particularly of the San Francisco Bay Area, as the US economy slows. The authors look at the state's experience in past recessions and conclude that a two to three year adjustment period is likely before the state resumes expansion.

Jaffee and Kroll point out that the major stock price adjustments that occurred earlier this year reflected real changes in the economic factors driving California's economy. Driven by expansion of dot-com and high tech sectors, computer programming employment alone grew by over 90,000 jobs in 2000, with much of this increase found in the San Francisco Bay Area. The bursting of the dot-com bubble and subsequent lay-off announcements leave this sector -- and the Bay Area -- particularly vulnerable.

The real estate market will also feel the effects in coming months, and the impact on the office real estate market is likely to be substantial. In fact, prices have already begun to decline in this sector. San Francisco's SoMa (South of Market) district, which has recently put on the market many offices geared toward dot-com-type firms, is most likely to suffer as a wave of these companies goes out of business.

The authors argue that office rent's could drop substantially -- at least 10% in San Francisco's downtown area and perhaps as much as 50% in the areas most heavily affected by the dot-com bust. Dropping rents could temper the rise in vacancies. Companies that were previously forced out of the market by sky-high lease prices are now looking at reduced rates.

The residential real estate market will also be affected by the economic adjustment. Kroll and Jaffee expect the high-end residential real estate market, previously fueled by stock market gains, to contract the most as the crop of dot-com employees who found their way to quick wealth sell their newly overpriced homes. Lower- and mid-range markets will see more moderate price adjustments.

Based on past history, the researchers maintain that job losses and declining real estate prices could continue for two to three years. They point out that in the longer ter

US-Based Enron Corp Expands Pulp And Paper Ops In Asia

03/29/2001 Dow Jones Commodities Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

SINGAPORE -(Dow Jones)- Enron Corp. (ENE), one of the world's leading energy and communications companies based in Texas, is expanding its pulp and paper operations in Asia. The power and energy giant is busy setting up offices in Asia that will provide price risk management tools for the Asian pulp and paper industry, a senior Enron official told Dow Jones Newswires Thursday, on the sidelines of an industry gathering in Singapore. "Asia accounts for 30% of the (world's pulp and paper) market. You can't ignore it," he said. In January this year, Enron opened shop in Singapore and Japan. Japan is one of Asia's biggest paper producers and consumers. He said that Enron is eyeing to set up shop in India, China and South Korea as these countries have "big market potential." China and South Korea are among the top three biggest paper consumers in Asia. India is regarded by most analysts as one of the fastest growing newsprint consumers in the region. The official declined to comment further on specific expansion plans and targets. Meanwhile, he said that their customers in Singapore and Japan have logged on the www.clickpaper.com - a business-to-business portal for pulp, paper and wood products - that was built by Enron. www.clickpaper.com is an Internet-based market for buying and selling pulp, paper and wood products. In the last three years, the company was able to establish a foothold in the American and European pulp and paper markets. While the company is well known as a major supplier of natural gas and electricity, it started to branch out to the pulp and paper business in 1997, as it is one of the biggest consumers of natural gas and electricity in the U.S. Aside from providing price risk management tools, Enron's offices in the U.S. are also involved in buying, selling and producing newsprint.

COMMITTEE TO SUBMIT REPORT ON POWER SECTOR TO INDIAN STATE GOVT

03/29/2001 Asia Pulse (c) Copyright 2001 Asia Pulse PTE Ltd.

MUMBAI, March 29 Asia Pulse - The Godbole Committee, set up to review Enron promoted Dabhol Power Company's (DPC) 2,184 MW power project and the entire power scenario in the western state of Maharashtra, will submit part one of its report on April 10 to the state government. "The committee will finalise its report on April nine and submit it to the government the next day," MSEB sources told PTI here today. According to the committee's schedule, it would first submit the report on DPC's project and then commence on part two, comprising study and remedies to improve Maharashtra's entire power scenario. The sources also did not rule out a possibility of the report being tabled in the current session of the on-going state legislature. The six-member committee, set up by the Maharashtra government last month, has almost finalised its report today and met financial institutions including International Development Finance Corporation Ltd. In its over a month-long sittings, the committee discussed the state's review proposal with several energy experts including Abhay Mehta, author of the controversial book "Power Play", which depicted the alleged irregularities in the Enron deal. Another major presentation, made before the review panel was that by the Enron India Chief, K Wade Cline, and the DPC Managing Director, Neil McGregor. (PTI) 29-03 1941

SALAM MUMBAI/ Malavika Sanghvi And Pepsi fights with Coke and Coke fights with Thums Up and Sprite fights with all of them and what difference does it make in your life? As they say in Punjab, "Ki pharak painda?" And BPL fights with Orange and Videocon fights with Godrej and Bbujbal with Thackeray and Sonia with Vajpayee and how on earth does it affect you? Amar Singh versus Mani Shankar Aiyer, Ram Jethmalani versus Soli Sorabjee and Justice Anand, Rohit Bal versus Abu and Sandeep and what did it matter, what was changed or as the kids say these days, what goes of your dad? O & M fights with Lintas, Brajesh Mishra fights with J K Jain, and MTV fights with Channel V. In the end, does it make a whit of difference to your life? Star versus Zee and Sony versus Nine Gold and who cares in the long run? Who gives a damn? And Jaya Jaitley versus Aniruddha Bahal and Mamta versus Jyoti Basu, and the CBI versus Vincent George and what difference? India versus Pakistan, Tamil Nadu versus Karanataka, MG Damani versus Anand Rathi, Gavaskar versus Raj Singh Dungarpur, Azharuddin versus Manoj Prabhakar versus Kapil Dev, and Sushma versus FTV and Sharad Yadav versus Laloo Yadav and Ramkrishna Hegde versus Deve Gowda, and IBM versus Macintosh... and where does it all lead? Hotmail against Yahoo and Ted versus Rupert and India versus Pakistan and so many words of attrition and reams of newsprint and Mamta versus everyone and who cares... What is it really but phookat entertainment, or as they say in the trains, timepass? Enron versus MSEB, Time versus Newsweek, Hrithik versus Shah Rukh, Scindia versus Angre -- and your life goes on, not enhanced by any of this. Oh no, possibly even worsened, but only a little. Yashwant against NK Singh, MF Husain against Sabavala, Thapar against everyone shouting in the well of the House and in the end what does the man on the street gain from any of this? Dominos versus Smokin' Joe's, Delhi versus Mumbai, Dom Perignon versus Veuve, Dior versus Gucci, Oberoi versus Taj, Jayalalitha versus Karunanidhi, the BJP versus the Congress, Philips versus Aiwa where does it all lead? Calcutta traders against Mumbai punters, Mallya against Chabbria, Vilasrao against Govindrao, Jayaprada against Renuka has it made any difference any difference at all to the man on the street? Gladiator versus Crouching Tiger, the police versus Bharat Shah, Salman versus Subhash Ghai -- did it really matter? Olive versus Indigo, Wranglers versus Lee, Nike versus Reebok. The rich get richer, the poor get poorer, the multinationals line their pockets and the man on the street. His life doesn't change, it doesn't matter one way or the other, it just goes on and on...

Cauley Geller Bowman & Coates, LLP Announces Class Action Lawsuit Against Enron Corp. on Behalf of Investors

10/23/2001 PR Newswire (Copyright (c) 2001, PR Newswire) LITTLE ROCK, Ark., Oct. 23 /PRNewswire/ -- The Law Firm of Cauley Geller Bowman & Coates, LLP announced today that a class action has been filed in the United States District Court for the Southern District of Texas, Houston Division on behalf of purchasers of Enron Corp. ("Enron" or the "Company") = (NYSE: ENE) common stock during the period between January 18, 2000 and October 17, 2001, inclusive (the "Class Period"). A copy of the complaint filed in this action is available from the Court, or can be viewed on the firm's website at <http://www.classlawyer.com/pr/enron.pdf>. The complaint charges that Enron and certain of its officers and directors = violated Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, and Rule 10b-5 promulgated thereunder, by issuing a series of material misrepresentations to the market between January 18, 2000 and October 17, 2001, = thereby artificially inflating the price of Enron common stock. Specifically, the complaint alleges that Enron issued a series of statements concerning its business, financial results and operations which failed to disclose (= i) that the Company's Broadband Services Division was experiencing declining demand for bandwidth and the Company's efforts to create a trading market for bandwidth were not meeting with success as many of the market participants were not creditworthy; (ii) that the Company's operating results were = materially overstated as a result of the Company failing to timely write-down the value of its investments with certain limited partnerships which were managed by the Company's chief financial officer; and (iii) that Enron was failing to write-down impaired assets on a timely basis in accordance with GAAP. On October 16, 2001, Enron surprised the market by announcing that the Company was taking non-recurring charges of \$1.01 billion after-tax, or a (\$1.11) loss per diluted share, in the third quarter of 2001, the period = ending September 30, 2001. Subsequently, Enron revealed that a material portion of the charge related to the unwinding of investments with certain limited partnerships which were controlled by Enron's chief financial officer = and that the Company would be eliminating more than \$1 billion in shareholder equity as a result of its unwinding of the investments. As this news began to be assimilated by the market, the price of Enron common stock dropped= significantly. During the Class Period, Enron insiders disposed of over \$7= 3 million of their personally-held Enron common stock to unsuspecting investors. If you bought Enron common stock between January 18, 2000 and October 17, 2001, inclusive, and you wish to serve as lead plaintiff, you must move the = Court no later than December 21, 2001. If you are a member of this class, you can join this class action online at http://www.classlawyer.com/sign_up.html. Any member of the purported class may move the Court to serve as lead

plaintiff through Cauley Geller Bowman & Coates, LLP or other counsel of = their choice, or may choose to do nothing and remain an absent class member= .=20 Cauley Geller Bowman & Coates, LLP has substantial experience representing = investors in securities fraud class action lawsuits such as this. The firm = has offices in Florida, Arkansas and California, but represents investors t= hroughout the nation. If you have any questions about how you may be able t= o recover for your losses, or if you would like to consider serving as one = of the lead plaintiffs in this lawsuit, you are encouraged to call or e-mai= l the Firm or visit the Firm's website at www.classlawyer.com . Layoffs Possible As Enron Reduces Broadband Burn Rate By Erwin Seba Of DOW JONES NEWSWIREs

07/12/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Enron Broadband Services executives said staff redeployments, including possible layoffs and an office closure were part of the plans to reduce losses at the telecommunications unit of Enron Corp. (ENE). The news came shortly after Enron President and Chief Executive Jeffrey Skilling told an investor call Thursday morning that Broadband Services lost \$102 million in the second quarter of this year. "We've got to get that burn rate down," Skilling said. "And we will get the burn rate down in the next two weeks." Broadband Services Senior Vice President Kelly Kimberly said Enron hadn't yet determined the exact number of the unit's approximately 1,000 employees to be redeployed. "We will be moving some commercial support people to corporate," Kimberly said. "There will be redeployments. There may be some severances." Commercial support employees are in departments like human resources and legal support offices. Also, the unit will close its Portland, Ore., office, but its back-up network operations center (NOC) there will remain in operation. Portland employees will be offered redeployment in Houston or other offices. Those who do not accept redeployment will be offered severance packages, Kimberly said. EBS's primary NOC is in northeast Houston, one of the areas hardest hit by Tropical Storm Allison. In spite of heavy rains and flooding last month, the Houston NOC continued functioning. However, Enron officials did activate the Portland NOC in case the Houston center could not remain open. This is the second redeployment of Broadband Services employees this year. The earlier redeployment was attributed by executives to the transition from building the EBS optical fiber network to operating the network. Revenues Victim Of Crash In Telecom Prices Skilling blamed the crash of telecommunications prices for the decline in revenues in the second quarter. "There is a meltdown out there," Skilling said during the conference call. Skilling said many potential counterparties among carriers can do only short-term deals in the bandwidth market because their creditworthiness is so weak. The company believes it will be one or two years before the bandwidth market gets to the point Enron had expected it to be this year, Skilling said. Enron is the primary market maker in the bandwidth arena. Skilling and Kimberly said the company will continue to develop the commoditized market. That leadership has left Enron feeling increasingly lonely in recent weeks, said an industry analyst. "Enron was trying to move this market fast," said William Bandt of Arthur Andersen L.L.P. "They've been working to get out at the front of this market. Sometimes that's like being at the end of the high-dive board all by yourself." Overall, Enron is in good financial shape because of its core

energy industry. For the second quarter this year, Enron reported net income, excluding non-recurring items, of \$404 million on revenues of \$50.1 billion. In the second quarter of 2000, the company reported net income of \$289 million on net revenues of \$16.9 billion. The earnings per diluted share for the quarter is 45 cents compared with 34 cents a year ago. Skilling said the company expects to achieve \$1.80 in recurring earnings per diluted share this year. Broadband Services reported a loss of \$102 million in the second quarter on \$16 million in revenues before interest and taxes. In the same period of 2000, the unit reported revenues of \$151 million and a loss before interest and taxes of \$8 million. EBS had 759 transactions in the second quarter 2001 compared with 23 in the second quarter of 2000. The company added 45 new customers in the second quarter, giving it a total of 165 customers, Skilling said. Carriers and network services providers made up more than 70% of Enron's broadband customers and accounted for about one-third of its transactions, he said. In the second quarter of this year, the company delivered 98,478 terabytes of data compared with 13,692 a year ago. For the year so far, EBS has delivered 141,878 terabytes of data compared with 19,697 in same period a year ago. Broadband Services has a goal of delivering 570,000 terabytes this year. Enron has signed a long-term contract with MSN to provide broadband services, Skilling said. The deal will allow MSN to provision and pay for bandwidth as it's needed. The company will give more information on that deal later, -By Erwin Seba, Dow Jones Newswires, 713-547-9214 erwin.seba@dowjones.com

USA: Losses widen to \$102 million for Enron Broadband. By C. Bryson Hull

07/12/2001 Reuters English News Service (C) Reuters Limited 2001.

HOUSTON, July 12 (Reuters) - The revenue rug got pulled out from under Enron Corp.'s broadband division in the second quarter, leading to a wider-than-expected loss inside the nascent unit, the company said on Thursday. Enron Broadband lost \$102 million on revenue of \$16 million in the second quarter. In the year-ago quarter, when the telecom sector was much stronger, the unit brought in \$151 million in revenue and lost just \$8 million. The losses and the shrinking revenue opportunities caused by severe weakness in the telecommunications market led Enron President and Chief Executive Jeff Skilling to announce a restructuring that will include an unspecified amount of job cuts within Enron Broadband Services. "This quarter was the absolute evidence that there is a serious problem in the telecom industry," Skilling told Reuters in an interview. "Revenue opportunities just dried up. People are not contracting." The telecom and Internet network carriers that are Enron Broadband's target customers are suffering from credit problems and other financial difficulties preventing them from entering into the long-term

SDG&E Advice Letters

Sender	douglass@energyattorney.com
Recipients	['tjohnso8@enron.com', 'susan_j_mara@enron.com', 'robert.neustaedter@enron.com']
File	dasovich-j/notes_inbox/11850.

Attached is a summary of three recent SDG&E letters. Pay particular attention to 1345-E, in which SDG&E is allocating its remaining overcollected URG revenues to the benefit of AB 265 customers, rather than to the large customers to whom these revenues were originally allocated. AL 1346-E is also interesting, in that it has the utility's ratepayers reimbursing the State for its costs of negotiating and implementing the MOU. Dan

Not sure if you guys heard about these anti-abortion trucks, but I had not. I saw two of these trucks this morning and they are so disgusting that I believe it is borderline harassment or obscenity. It's difficult because I believe so strongly in free speech, but this really was upsetting. You can check out their web site at <http://www.abortionno.org/>

<<http://www.abortionno.org/>> From there you can get into the pictures and truck campaign. It's really unbelievable.

If you are not familiar with AB 36 (Steinberg) and SB 11 (Escutia), they deal with protective orders and limit the use of them.? These bills are a top priority of the business community to defeat.? Right now, they apply to cases of financial fraud, environmental hazard, product liability, and unfair insurance practices. However, please be aware that the plaintiffs' bar is planning to amend the bills to also apply to energy practices by generators. AB 36 is on the Assembly Floor; SB 11 is pending on the Senate Floor. ?

Assembly Rev & Tax Cmte Chair Ellen Corbett has decided that there will be a suspense file in her committee, with the same threshold as the Appropriations Committee (i.e., \$150,000 fiscal impact).? You may recall that former chair Johan Klehs had a similar rule, but it was discarded in 1995 and has not been used since then.? An exception to this rule will be measures that gain revenue (such as AB 128x, the excess profits tax on energy generators).? Therefore, as all tax bills have at least that much fiscal impact, all bills will go to suspense.? How many will come of is another question.

FW: Conference Call Today September 10th at 5:00 p.m. central

Sender	jeff.dasovich@enron.com
Recipients	[j..kean@enron.com', 'd..steffes@enron.com']
File	dasovich-j/sent_items/35.

FYI: To update what we've learned today regarding possibility of Senate going forward on Wed. with contempt. At this point, appears they intend to go forward.

Best, Jeff

PP =01) I know you said that you didn=01,t have reservations for dinner on Valentine=01,s Day and hopefully you still don=01,t and hopefully you both = don=01,t feel strongly about doing something alone on the night of Valentine=01,s Da= y. It=01,s Sean=01,s birthday and Molly just told me that no one can ever do a= nything on his birthday because they go to dinner and stuff. We were thinking of having a small get-together (just us and any good single friends that he has) on February 14th and making a special dinner just for him (might be a lot of lentils). Could you guys do that with us?

Proposed AB 128x Amendments

Sender	cmicheli@carpentersnodgrass.com
Recipients	['steven@iepa.com', 'smccabe@mccabeandcompany.net', 'smara@enron.com']
File	dasovich-j/all_documents/12050.

Assemblywoman Corbett will likely propose amendments at Monday's Rev & Tax Cmte hearing on her AB 128x. Apparently, the amendments will require that the PUC set a "fair price" for electricity.? Any charges above that fair price?will be subject to the proposed excess profits tax. Also of interest is that the excess profits tax would attempt to apply to out-of-state companies that sell energy into California.? They are going to try to impute nexus to the out-of-state generators by arguing that they are deriving economic benefit from selling into California and that creates nexus. Finally, it appears that the Suspense File will not be invoked in this case because that policy only applies to Regular Session bills. Obviously, AB 128x is a Special Session bill. ?

RE: UC/CSU Customer Complaint -- Quail Ridge Research Station

Sender	jeff.dasovich@enron.com
Recipients	[d..steffes@enron.com]
File	dasovich-j/sent_items/2109.

Well, we had the right person handling the call, that's for sure.

Best, Jeff

-----Original Message-----

From: Steffes, James D. Sent: Tuesday, October 30, 2001 5:09 PM To: Riley, Tom; Smith, Mike; Hughes, Evan Cc: Mara, Susan; Dasovich, Jeff Subject: UC/CSU Customer Complaint -- Quail Ridge Research Station

Tom --

I received a call today from the CPUC (came through the main Enron number) - a CPUC staffer named Joyce at 415-703-2199 (no one was interested in giving the last names).

Someone named Dan at the Quail Ridge Research Station (7001 Hwy 128 Napa, CA 94558) called the CPUC to complain that he was inappropriately switched from PG&E to Enron. It's a strange situation - the Universities own the bldg and land but a Trust pays the bills. He says that "the facility isn't anywhere near the campus."

The PG&E account number is ZNL8242005. His phone number is 503-752-0873.

I told him that we would look into this and get back by end of business Thursday.

The CPUC staffer is Joyce at 415-703-2199 (no one was interested in giving the last names).

My guess is that UC/CSU listed this account on a switch request but didn't ask Dan. What should we do??

Jim

AB 128x Passed

Sender	cmicheli@carpentersnodgrass.com
Recipients	['steven@iepa.com', 'smccabe@mccabeandcompany.net', 'smara@enron.com']
File	dasovich-j/all_documents/12145.

The 7 pages of amendments were adopted.? Please check the Assembly Website tomorrow morning, as the bill should be in print then. AB 128x passed unanimously from the Assembly policy committee by a vote of 5-0.? Cedillo was not there.? The 2 Republicans did not vote.? Voting for the measure were Corbett, Alquist, Aroner, Koretz, and Thomson. Speaking in support of the bill were Jean Ross (CA Budget Project - a liberal think tank), Lenny Goldberg (who commented that he is "hopeful that the bill is constitutional"), CalPIRG, CA Labor Federation, and Women's Energy Group. Assemblywoman Alquist asked to be a co-author of the bill.? Assemblyman Wyland said that he believes that consumers are being gouged, but that he could not vote for this bill. Speaking in opposition were:? CMTA, Intergen, BP Amoco, California Chamber, and IEP. The bill next goes to a hearing at Assembly Appropriations Cmte, scheduled for next Wednesday (5/16). However, if the Assembly and/or Senate shuts down the Special Session tonight (which is the rumor), this bill and SB 1x will die.

FYI. Information from EBS on DSL Economics.

At prices under \$50/month (for DSL and ISP service), the article says that payback is only 12 months [Don't follow this necessarily because \$600 first year Capex with only \$600 of fees].

Clearly if you add on installation and potentially internal wiring fixes (moving a phone jack to the TV set) this only makes it harder to work.

Also, interesting to note that Cable Modems are at least 10x faster than ADSL (why not go that route)?

Jim

Re: Location of WPTF Board Meeting on Monday, Sept 11, at 1pm

Sender	douglass@arterhadden.com
Recipients	['robert_anderson@apses.com', 'berry@apx.com', 'barbara_klemstine@apses.com']
File	dasovich-j/notes_inbox/232.

FYI, the Arter & Hadden office is all of 2.9 miles from the airport, so it's a very short cab ride.? If anyone is driving and needs directions, please let me know.? Our office has a small conference room which might not be large enough for all the Board attendees, so we are meeting a few floors down, in a larger room which the building makes available to tenants.? As Gary noted, it is called the Boardroom, and is located on the fourth floor.? We'll bring in some sandwich menus and order out for a late lunch.? Look forward to seeing you. ? Dan ?

"Gary Ackerman" <foothill@lmi.net> 09/05/00 02:09PM >>>

Folks,

We have a venue and location for our new Board meeting.? Arter & Hadden has offered their office space.

Dan wrote me:

"Gary, our office is at 402 West Broadway.? Phone is (619) 238-0001 and fax is (619) 238-8333.? The room is called "The Boardroom" and it's on the 4th floor.? Arter & Hadden will pick up the charge, in thanks for all the work which comes our direction from WPTF.? Do you want to start with a lunch?? Or would you prefer to assume people will have lunched and just have snacks and drinks?"

I told Dan we would appreciate a late lunch, at 2 pm.? The meeting will start at 1 pm.

The dial-in number is 712-257-3178 PC 39908

Okay, That's it.

Dual Auction Restructuring

Sender	michael.etringer@enron.com
Recipients	['jbloom@whitecase.com', 'jeff.dasovich@enron.com']
File	dasovich-j/inbox/554.

Jerry,

First off I would like to again commend you on your presentation yesterday. It would be an understatement to say that the last year's worth events have been amazing at best.

As we discussed at lunch, Enron has developed a unique approach to QF contract restructuring. The main premise is that of conducting a dual auction to determine, on a completely voluntary and open process, the QF buyout economics and the market clearing price for replacement energy. As discussed yesterday, I am enclosing copies of the presentations made to PG&E and SCE on this topic. I would be very interested in your feedback on this concept and on the presentations provided. I must footnote that the economic shown in the presentations are Enron estimates. Individual feedback, particularly in this area would be appreciated.

Jeff Dasovitch out of our SF office has been working with me on this proposal and will likely be contacting you within the next day to further discuss this idea as well as the benefits and possible strategies for initiating such an auction process.

Thanks for your time and look forward to hearing from you.

Best Regards, Mike

From: Jeff.Dasovich@enron.com [mailto:Jeff.Dasovich@enron.com] Sent: Monday, December 11, 2000 11:02 AM To: cameron@perfect.com; scotttwl@hotmail.com; psellers@Haas.Berkeley.EDU Subject: Directions

Can we do a little planning tonite for this weekend?

Cameron:

Here are the directions to the place in Stinson. Can you email to your invites? Did you invite John E?

We have the place from 5 PM on Friday evening till 10 AM on Sunday morning.

Address: 11 Sonoma Patio Stinson Beach

If you're coming from the City and take Panoramic over Mt. Tam, then when you hit Highway One, make a right and head north toward town. Go through town and make a left on Calle del Arroyo. If you see the lagoon on your left, you've gone too far. After making a left on Calle del Arroyo, make a left on Sonoma.

If you're coming from points North, then you'll be heading south on Highway One toward Stinson. After you've passed the lagoon on your right, you'll eventually come to Calle del Arroyo. If you arrive in the town of Stinson Beach, you've gone too far. Make a right on Calle del Arroyo, then a left on Sonoma.

Design of long-term contractual mechanism for California

Sender	seabron.adamson@frontier-economics.com
Recipients	['jdasovic@enron.com', 'jsteffe@enron.com', 'acomnes@enron.com']
File	dasovich-j/notes_inbox/5821.

Is there any detail available about how this long-term contractual mechanism being neogotiated might work? I ask because we have heard about interest in a similar mechanism that was adopted in Australia, in New South Wales. My colleagues in Australia are the main restructuring advisors to the NSW government. Details of this mechanism are in the public domain, i documents available from the NSW Treasury.

If they design it properly it is possible that you could still have some form of retail competition, if the hedge moves with the customer. This was a big design issue in Australia. Otherwise, it looks like a political fudge that will stymie the development of the market for years to come.

FYI -----Original Message----- From: Davidson, Debra On Behalf Of Richter, Jeff Sent: Thursday, August 30, 2001 3:39 PM To: DL-Portland World Trade Center Subject: New Memembers of EWS - Portland

I would like to welcome Tim Coffing, Gordon Savage, and David Frost to the EWS - Portland team.

Tim Coffing is a second year analyst in Enron's analyst/associate program. He spent his first rotation within the EES division of Enron. Tim is in the process of moving to Portland where his responsibilities will include managing the intra-month EWS positions and integrating them into the wholesale cash desks.

Gordon Savage comes to us from EES where he was a director in the Utility Risk Management (URM) group in Houston. Gordon is in the process of moving to Portland where he will be working with Steve Swain on the EWS - West URM portfolio.

David Frost is an associate in Enron's analyst/associate program. He spent his last rotation within Enron Broadband Services here in Portland and will be working with Steve Swain and Gordon Savage on the EWS - West URM portfolio.

Feel free to introduce yourself to Tim, Gordon, and David so they can become more familiar with the different groups on the floor.

Recipients	['whederman@columbiaenergygroup.com', 'gramlr@pjm.com']
File	dasovich-j/all_documents/907.

Dear All,

After listening to the various viewpoints and concerns expressed in our last conference call, I believe that the panel options listed in Option 3 of Rob's draft might be most effective in producing the type of discourse that we are seeking.

I propose that we schedule a conference call for this Friday afternoon, September 1, at 4PM EDT. I mentioned that I have reserved the Krutch Theater (max.capacity 375) for the week of November 13-17. I have since been informed that I can only hold the whole week through Wednesday, September 6, therefore, it will be important to narrow the options down very soon if we can.

Best wishes, Heather

At 06:44 AM 8/30/00 -0400, gramlr@pjm.com wrote:

Shall we try to talk again Monday? I think I will talk to Borenstein to see what the Haas folks have in mind. I tried to capture everyone's comments. Allen, you might want to explain

more

about your panel suggestions since I didn't do them justice. As you'll see I took the liberty of offering a new characterization of the panels that I didn't bring up on the call. Everything on there is offered as a strawman to be criticized and changed. Rob <<Draft program.doc>> Rob Gramlich PJM Market Monitoring Unit (610) 666-4291 gramlr@pjm.com

Hey All-

Please read the following email and let me know if you have any questions.

Thanks, April Hrach Administrative Coordinator Phone: 415-782-7825 Fax: 415-782-7851 ----- Forwarded by April Hrach/SF/ECT on 07/19/2001 01:55 PM -----

Wilma Blesman/ENRON@enronXgate 07/19/2001 12:41 PM

To: April Hrach/SF/ECT@ECT, Gary Bode/ENRON@enronxgate, Dalak Malik/ENRON@enronxgate, Deborah Kelly/ENRON@enronxgate, Christina Albers/ENRON@enronXgate, Jason Chumley/ENRON@enronXgate cc: Cyndi Wulfson/ENRON@enronXgate Subject: San Francisco's Outlook Migration

April,

My plans are to visit your office the week of July 30th. We have 20 people that need to be migrated. I would like to migrate 10 people on Monday and 10 people on Tuesday. Migrations are done at night, therefore, Tuesday and Wednesday morning I will configure everyone's Outlook. The rest of the time I'll be training everyone and setting everything up to best fit people's needs.

A copy of the NA Email Retention / Policy is attached.

However, due to legal issues we are currently experiencing with the San Francisco office, this will not go into affect yet. We will not purge anyone's Lotus Notes mailboxes. Notes will be available to you for referencing.

Only 30 days worth of information will be transferred from Notes to Outlook. Once on Outlook, we will still hold off on purging. Nevertheless, when the legal issues clear, we will reinforce our policy.

Thank you for your time,

Wilma Bleshman Enron Networks 713-853-1562

File	dasovich-j/sent_items/665.

Interesting.

Question 1: Please explain the following line from your note: "I really need to get certified for diving."

Question 2: How hot is it down there?

Question 3: Cheap is good, but if you're going to travel that far to dive, is the diving good there, or is there another place (like Beliz) where the diving is supposed to be killer?

-----Original Message-----

From: Cameron Sellers [mailto:cameron@perfect.com] Sent: Wednesday, October 17, 2001 7:24 PM To: Dasovich, Jeff; 'PP' Subject: honduras

I asked PP if she was interested in going to Honduras between xmas and new years this year. I really need to get certified for diving and the diving there is extremely cheap, but reliable (its an American outfit and all PADI). PP thought she might be interested in going and doing it with me. So, first I wanted to know what you thought of the whole thing. Then, if you are into it at all I will look into flight opportunities (staying down there and the scuba course and single dives are all very cheap, but the flight would be the most expensive). And, last, do you have miles on continental and are they miles that PP can take advantage of also? I think Continental goes to San Salvador which is a common connecting city. So, you might luck out on flight costs and the whole trip would not be too bad. What do you think?

To: Joseph Alamo/NA/Enron@Enron cc: Jeff Dasovich/NA/Enron@Enron, Terry Stelter/Western Region/The Bentley Company@Exchange Subject: SR Technics Palmdale Grand Opening, 3/22

Joseph,

Per our telephone conversation, attached is the draft program for the activities scheduled for our client's Grand Opening which will be attended by Governor Gray Davis and other Government VIP's. As I told you, my company, The Bentley Company (Architecture/Engineering/Construction company within EES), was responsible for a prominent part of this facility's construction (involving the conversion of a large Boeing factory that SR Technics acquired with much involvement

from the Governor's office) and Enron/Bentley will be part of the Grand Opening through possible sponsorship of some event(s), full page ad in the souvenir program, Enron name brand recognition through banners, etc. I am working out the details of our involvement with the event coordinator right now. I suspect Enron governmental affairs would like involvement given the relatively high exposure this event will garner politically and through the news media (please refer to the attachment).

Please contact me ASAP at 661-609-4886 to discuss.

Regards,

Ed Ghalib, S.E. Director, Client Management

riding mendocino	
Sender	afinch@iasco.com
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/all_documents/27782.

Hi Jeff,

Madeleine asked that I forward this to you at this email address. Looks like we may have a small group going to Mendocino in September (maybes for Pat Scatena, Madeleine and Nora, and my husband and I are definitely going). Let me know if you are interested.

I heard back from Ricochet Ridge (from Lari's executive assistant) that the weekend of September 21-23 (Friday through Sunday) would work best for them to host an advanced group.

We should probably confirm as soon as possible, and start looking for accommodations, given that September is a popular time in Mendocino.

Her prices this year are \$195.00 per person for an all-day ride (they generally start at 9ish and finish at around 3:30 or 4:00). We provide our own lunch, or for \$10 more per person, the ranch will pack us lunch. Four-hour rides are \$125.00, and can include beach, redwoods or both. The all-day rides are great, because you can go a little farther and get a nice lunch break, usually with a view. But another option would be to do a four-hour ride each day, selecting either beach or forest, to reduce the cost somewhat.

Please let me know if you can make it, and what days you would like to ride (Friday, Saturday and/or Sunday), and whether you prefer the all-day or four-hour option. When I know general numbers, we can decide if we would like to get a house (if any are available) or if a hotel/B&B option would work better.

Summary of AB 128x Amendments	
Sender	cmicheli@carpentersnodgrass.com
Recipients	['teresa_casazza@aeaanet.org', 'rexhime@cbpa.com', 'sglobby@pacbell.net']
File	dasovich-j/all_documents/12070.

The following author's amendments are expected in committee on Monday afternoon (actual Leg Counsel language is supposed to come back Monday morning): 1.? The tax will be on excess gross receipts from electrical energy distribution. 2. The tax will be imposed on the person making the first sale of electrical power in or into CA for consumer consumption. 3. The tax will be based upon the amount by which the gross receipts from the sale exceed the amount that would have been received if the sale had been made at a specified "base price" (to be determined by the PUC). 4.? There will be a rebuttable presumption that the base price represents a fair sales price. 5.? There will be a withholding mechanism of this excess tax from the purchasers, other than purchasers who are residential consumers or small business users. 6.? It will require sellers to file annual tax returns to report the tax on excess gross receipts and pay any remaining taxes due. 7.? It will allow sellers to file a claim for refund in an attempt to rebut the presumption that the base price was a fair sales price. 8.? Provide certain nexus standards to California to provide the basis to impose tax liability. 9. Include a 5-year sunset date. No opposition has been received by the Rev & Tax Cmte as of Wednesday of this week.? Therefore, no opposition (or support) will be listed in the committee's analysis.

Dear Cameron The dates you requested are open. As you have recognized from our website, we have a lush, lovely, peaceful garden oasis in an authentic historical pueblo that is also gaining interest as home to many artists and others interested in living in a most unique environment. Our aim is to provide a memorable experience with modern facilities that also reflect the beauty and comfort of Mexican rustic design. Our casitas have kitchens, baths and covered patios that afford privacy and a renewing atmosphere. Great care has been taken to provide service and comfort. Our prime season is approaching so it is well advised to book early. We have a number of inquiries for the dates you requested. The rates as described are \$80 USD per night for the casita .which is separate and very private. The weekly rate is \$450 USD. To hold a reservation we require a 50% deposit when you have your exact dates. Let us know what they are and I will mail instructions. If this is your first time to this area or if there are any questions you might have, please feel free to write. and I will do my best to answer. Our community site for up to date events is www.todossantos.cc Mil gracias for your inquiry. Linda Macfarlane for Las Palmas Casitas

Subject: meeting with Enron

Jeff,

It was great to talk to you today. Thank you so much for taking the time to hear about our latest developments. As I said earlier, we are very interested in talking to your folks in the Net Works group at Enron. The pilot we are implementing for the Enron Energy Services group is going extremely well. We've been on site now for about two weeks and have pretty much completed our user training sessions. Everyone at Enron is very pleased with the success of the project so far.

I think the best thing would be to schedule a meeting for sometime in mid-October. That way, the Pilot Program will be completely implemented and we will have more feedback on the use of our application. How about the week of October 15th? Anytime that week will work with us and, as I told you earlier, we are in Houston very frequently.

The people who would be a part of the discussion would be Ian Sullivan (who heads up all implementation and professional services) and myself.

If anyone would like more information about Perfect Commerce prior to the meeting I would be more than happy to send that over. Just let me know.

Look forward to hearing from you.

Best regards,

Cameron

File	dasovich-j/notes_inbox/11642.

David Theroux at the Independent Institute in Oakland, California became concerned over Enron's involvement in this project, so he has decided to fund the project internally.

He anticipates that the letters will go out to economists around the country when the school year starts (just several weeks away in some places) and hopes to complete the project by October. They got around 540 economists for their health care price cap letter. It will be interesting to see how many signatures they get for electricity price caps. I sent him our draft letter, and he is massaging the language between wholesale price decontrol and the use of real-time pricing at retail.

I offered the use of our university contacts to help gather signatures, but I don't know if he will even want in-kind help. Anyway, we can do something else with the \$30,000 that we were going to try to funnel to them.

- Rob

I'm assuming that since it's the middle of March, that it's only fair that he should get paid for services rendered in January, but maybe I'm missing something.

Susan J Mara 03/15/2001 05:59 PM

To: Jeff Dasovich/NA/Enron@Enron cc: Subject: Mike Day Invoices

Do you understand all the big deal about the paying Mike fast?

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 03/15/2001 03:57 PM -----

Eric Benson 03/15/2001 11:32 AM

To: Paul Kaufman/PDX/ECT@ECT, Susan J Mara/NA/Enron@ENRON, Joseph Alamo/NA/Enron@Enron cc: Subject: Mike Day Invoices

Paul, Sue and Joseph -

I wanted to give you all a quick update on the Mike Day invoices. I have the invoice for January and understand from Joseph that he has the invoice for the special session which once reviewed, coded and approved Joseph will overnight to Houston. I called Larry Dallman in accounting and Larry confirmed that Goodin, MacBride is currently on a Net 7 payment term. Larry said that he could expedite payment for the January and special session invoices for same day pay. Accounting will call me when the checks are ready to be picked up and I will fed ex payment to Mr. Day's attention once I have the checks. Larry and I agreed that it would be best to wait to send the invoices at one time (this will make it easier for accounting).

Paul - As you and I discussed, I will send an email to Mr. Day once I have received the invoices to advise him when to expect payment and I will confirm that he should be the recipient once I have the checks. I'll make sure to copy you, Sue and Joseph so we all stay on the same page.

Please advise of any questions, comments or concerns.

I've reviewed the drafts, and I think it is good work. The report of the MSC of the ISO has come out with some of its fixes to the market structure issues very closely parallels alot of our points. I am at the hearing in San Diego today where that will be the topic discussed. Will call at the lunch break. I really like highlighting how much development of retail markets will alieviate some of the problems, especially since that is something that is within the Commission's authority to fix.

Question on market power: Do we want to highlight the myriad of other causes of higher than short-run marginal costs? ie. low hydro, NOX credits

"Seabron Adamson" <seabron.adamson@frontier-economics.com> on 09/07/2000 10:00:56 AM To: "Mona L Petrochko" <mpetroch@enron.com> cc: Subject: Two sections for CPUC repsonses

Mona:

I saw the email about the delay. We have attached some draft material for some of the questions anyway. I will call you in a bit to go through it.

Hi Carolyn, Anil, Mark & Jeff - I'm really sorry but I don't know what happened to Jeff's email. I have no recollection of receiving it, and I can't find it anywhere, so I have no idea what happened. A little disconcerting... Anyhow - my apologies! Thanks Carolyn for forwarding it along.

Well, I guess my good friend Jerry's a little to busy these days. I'm going to contact another lawyer who represents some big QFs and then loop back with Jerry.

Best, Jeff

-----Original Message-----

From: Etringer, Michael Sent: Wednesday, October 10, 2001 3:40 PM To: 'jbloom@whitecase.com' Cc: Dasovich, Jeff
Subject: Dual Auction Restructuring

Jerry,

First off I would like to again commend you on your presentation yesterday. It would be an understatement to say that the last year's worth events have been amazing at best.

As we discussed at lunch, Enron has developed a unique approach to QF contract restructuring. The main premise is that of conducting a dual auction to determine, on a completely voluntary and open process, the QF buyout economics and the market clearing price for replacement energy. As discussed yesterday, I am enclosing copies of the presentations made to PG&E and SCE on this topic. I would be very interested in your feedback on this concept and on the presentations provided. I must footnote that the economic shown in the presentations are Enron estimates. Individual feedback, particularly in this area would be appreciated.

Jeff Dasovitch out of our SF office has been working with me on this proposal and will likely be contacting you within the next day to further discuss this idea as well as the benefits and possible strategies for initiating such an auction process.

Thanks for your time and look forward to hearing from you.

Best Regards, Mike

California "Top Five" list

Sender	sarah.novosel@enron.com
Recipients	['mary.hain@enron.com', 'seabron.adamson@frontiereconomics.com', 'jdasovic@ees.enron.com', 'james.steffes@enro...']
File	dasovich-j/notes_inbox/461.

Jim Steffes asked me to call Seabron Adamson to get his take on what a "Top 5" list should include for California. Seabron sent me the attached list, which, as you will notice, is just his first cut on this. I thought it might be helpful for everyone for the conference call today -- but please remember that this is really just a first attempt at putting the problems down on paper.

Sarah

Subject: California "Top Five" list

Sarah:

Please find attached a "top five" list on California market reform, as requested, with some annotations on why I think these changes would be beneficial etc. It is quite rough - not much more than a brain dump really - but can serve as a basis for discussion.

Have a look and see what you think. Perhaps we should set up a call to discuss sometime later this week?

Seabron

A California Markets Focus Group meeting will be held daily starting tomorrow, December 15th. Please plan to attend this meeting starting at 10:00 a.m. to be held in conference room EB 2868.

This will be a level setting meeting to determine what topics should be reviewed with the group on a daily basis. This forum will also allow for an overview of changes in market prices, positions and identify strategies. The recurring time and location of these daily meetings will be determined tomorrow as well.

Participation by you (or your pre-identified representative) in these meetings on a daily basis is critical. We will be preparing a report for the EES G-9 daily and your input is required.

Any questions, please call Wanda Curry @ x-33411.

Thanks

Dear Cameron The dates you requested are open. As you have recognized from our website, we have a lush, lovely, peaceful garden oasis in an authentic historical pueblo that is also gaining interest as home to many artists and others interested in living in a most unique environment. Our aim is to provide a memorable experience with modern facilities that also reflect the beauty and comfort of Mexican rustic design. Our casitas have kitchens, baths and covered patios that afford privacy and a renewing atmosphere. Great care has been taken to provide service and comfort. Our prime season is approaching so it is well advised to book early. We have a number of inquiries for the dates you requested. The rates as described are \$80 USD per night for the casita .which is separate and very private. The weekly rate is \$450 USD. To hold a reservation we require a 50% deposit when you have your exact dates. Let us know what they are and I will mail instructions. If this is your first time to this area or if there are any questions you might have, please fell free to write. and I will do my best to answer. Our community site for up to date events is www.todosantos.cc Mil gracias for your inquiry. Linda Macfarlane for Las Palmas Casitas

CRIME ALERT

Sender	owner-eveningmba@haas.berkeley.edu
Recipients	['faculty@haas.berkeley.edu', 'staff@haas.berkeley.edu']
File	dasovich-j/all_documents/1646.

To All,

A hard copy of the following crime alert was delivered by UCPD with the request to send it to everyone.

STRONG ARM ROBBERY Central Campus

"On Sunday, September 17, 2000 at about 9:00 p.m., a strong arm robbery occurred on the Esplanade between Sather Tower and Doe Library on the Berkeley campus.

The victim was an 18 year old male UCB student. he was walking from the Unit III Residence Halls to Doe Library when he was approached by 5-6 individuals. Suspect #1 asked, 'Where is Building 1B?' The victim replied that he did not know. As the victim backed away, Suspect #1 hit him on the right side of his face and knocked him to the ground. The victim felt his backpack being pulled away and grabbed for it, but was knocked down again. The victim saw the other suspects approaching, so he released his backpack and ran into Doe Library to report the crime. A witness saw the crime occur and said the suspects fled in a southeast direction towards Stephens Hall. The victim received scrapes and bruises, but was not seriously hurt. His backpack and contents were taken.

The robbers were all described as African-American men: #1 was 17-29 years old, about 5'-9" tall, about 140 pounds, thin build, black hair in cornrowed cut, goatee, wearing a black t-shirt with white lettering and black pants. #2 and #3 were 17-29 years old, medium height and weight, black hair, wearing white 5-shirts. #4 and #5 were 17-29 years old, medium height and medium build, black hair, wearing dark t-shirts.

Anyone with information about this case should immediately call the University of California Police Department Detective Kenneth Moody (510) 642-3184.

As with any emergency situation, if you see suspicious activity, call 9-911, from a campus phone."

Summary Annual Reports

Sender	corporate.benefits@enron.com
Recipients	[all.america@enron.com]
File	dasovich-j/all_documents/260.

Enron Benefit Plans Summary Annual Report

The basic financial and insurance information along with file attached provides a Summary Annual Report for the Enron Benefit Plans. The annual report for each plan has been filed with the Internal Revenue Service, as required by the Employee Retirement Income Security Act of 1974 (ERISA).

NOTE: You may receive a report for a benefit plan in which you are not a participant or under which you are not entitled. Entitlement to benefits under any of the plans is based on the provisions of each plan.

Your Rights to Additional Information

You have the right to receive, upon request, a copy of the full annual report, or any part thereof, for any plan. For insured plans, insurance information (including any sales commissions paid by insurance carriers) is shown in the annual reports.

To obtain a copy of the full annual report, or any part thereof, for any plan, write or call:

Enron Corp 1400 Smith Street Houston, TX 77002-7311

(713) 853-6161

You also have the right to receive from the plan administrator, on request and at no charge, a statement of the assets and liabilities of the plan and accompanying notes, or a statement of income and expenses of the plan and accompanying notes, or both. If you request a copy of the full annual report from the plan administrator, these two statements and accompanying notes will be included as part of that report.

You also have the legally protected right to examine the annual report at the main office of the plan (Enron Corp., 1400 Smith Street, Houston, TX 77002-7311) and at the U.S. Department of Labor in Washington, D.C., or to obtain a copy from the U.S. Department of Labor upon payment of copying costs. Requests to the Department should be addressed to: Public Disclosure Room, N-5638, Pension and Welfare Benefits Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

I think the sentence that say "immediately drive down the wholesale-cost of power" needs to be reworked. It should change the blended retail rate downward, but I'd expect the spot market--particularly this summer's--to be thinner & more volatile. ABB

I think that we should be careful. Private label activity can occur with a city today in California if the Muncipal government agrees. I would not want to try and "thread the needle" on a very specific muni language right now in CA - too much activity.

Jim

From: Jeff Dasovich on 05/04/2001 04:36 PM Sent by: Jeff Dasovich To: Robert Davis/Western Region/The Bentley Company@Exchange@EES cc: Daniel Allegretti/NA/Enron@ENRON, Jeff Ader/HOU/EES@EES, Richard Shapiro/NA/Enron@Enron, Paul Kaufman/PDX/ECT@ECT, Susan J Mara/NA/Enron@ENRON, James D Steffes/NA/Enron@Enron, Sandra McCubbin/NA/Enron@Enron, Janel Guerrero/Corp/Enron@Enron, Karen Denne/Corp/Enron@ENRON

To: Jeff Dasovich/NA/Enron@Enron, Jeff Ader/HOU/EES@EES, Daniel Allegretti/NA/Enron@Enron cc: Subject: California SB 23X

Gentlemen,

California State Senator Nell Soto (D-Ontario Dist.32) has authored SB 23 X which is intended to streamline the formation of public power districts in California.

Here is an opportunity for Enron to get involved and flex some muscle and win on several fronts. I think Enron is uniquely qualified to work with municipalities to provide private labeled products or services that will create a winning situation for all parties involved (including the IOUs).

I am extremely interested in working on such an effort and would very much enjoy sharing my ideas in more detail at any time. Please feel free to contact me.

Thanks all,

Robert Davis, Account Manager Enron Energy Services 611 Anton Blvd. Suite 700 Costa Mesa, CA 92626 Phones: Office 714-434-1800 ext.455 Cell 714-267-0968 Pager 888-935-2143

File	dasovich-j/all_documents/8449.

I think we should definitely go. I could not go up until Friday. Please make reservations!!!

Cameron Sellers Vice President, Business Development PERFECT 1860 Embarcadero Road - Suite 210 Palo Alto, CA 94303 cameron@perfect.com 650.798.3366 (direct dial) 650.269.3366 (cell) 650.858.1095 (fax)

-----Original Message-----

From: Prentice Sellers [mailto:psellers@pacbell.net] Sent: Monday, January 22, 2001 6:34 PM To: Cameron Sellers; jdasovic@enron.com; Scott Laughlin Subject: Bluegrass Weekend at Sierra Club Lodge

In case it's not on your calendars, the bluegrass weekend at the Sierra Club's Claire Tappan Lodge is:

March 16-18

It's \$46 per person per night Includes 3 meals

If we're going to go, I think we should make reservations right away. If so, do we plan on getting up there Friday night? I can make the reservations if you let me know.

I haven't found any info yet on the free one...

Here's some info I copied from the Claire Tappan Lodge website: <http://www.sierraclub.org/outings/lodges/ctl/index.asp>

Clair Tappaan is located at 7000 feet, 45 minutes drive west of Reno - 1 mile from Sugar Bowl. The living room has an enormous stone fireplace. There is a library, a large communal dinning room, a social lounge, and a hot tub. The lodge maintains 10 to 12 kilometers of groomed cross-country ski trails and offers excellent instruction in both Nordic track and telemark techniques. Top quality cross-country skis and snowshoes are also available to rent at very reasonable rates.

Guests needs to provide their own pillow, toiletries, towel, sleeping bag or comparable linens, and bathing suit if they wish to use the hot tub. We ask guests to choose a house chore to do each day they eat at the lodge.

March 16-18: Blue Grass Weekend. Calling amateurs and proffesionals alike to a weekend of great jam sessions in the afternoons and a performance by the Donner Peak Pickers in the evening. The Pickers are a fantastic bunch of widely-experienced musicians playing traditional Bluegrass with superb instrumental craftsmanship.

Angie,

Please add Jeff Dasovich and Mike Dahlke to the e-mail distribution list for these meetings. Thanks!

Jeff and Mike,

I apologize for not forwarding this information in time as I was in DC until now and did not have access to this information. I have 2 laptops and happened to have the other one with me. I hope you were both able to make the call somehow.

Regards,

Lara

File	dasovich-j/all_documents/11132.

Hey kids,

My two cents. No problems with the model or the assumptions. I thought it would be interesting to look at a 3-stage model where the growth of the company has extremely fast growth in the beginning, and then a slower growth before the terminal valuation stage (zero growth). Under this model, to justify a \$28 stock price, Netscape would have to grow 60% annually for the first 5 years, and 30% for the next 5 years. Thinking big picture, it would not be out of the ordinary for Netscape to be generating \$1 billion in revenue after 10 years of growth. Netscape would probably be able to generate such revenue but not without branching into other services or products, most of which would not have been developed in 1996, i.e. Netscapes stock price includes the optionality of future services and products that they haven't even generated yet.

I was dubious then as I am now that Netscape could be worth so much with a single and free product. We will need to address in our memo the likelihood that Netscape could leverage their early success into other profitable ventures.

My simple adjustments to the model are attached.

PS Jeff- You asked for an example of the agency dilemma. A good example of this can be demonstrated by the largest (at the time) leveraged buyout of RJR Nabisco where the company was generating a lot of free cash flow that was being spent on perquisites- company jets, golf tournaments, etc. This was because management had different goals than shareholders. Since management could not find profitable investments, instead of giving the FCF back to shareholders, they spent it on themselves. When management has minimal ownership in the company, they frequently do things that are in their own best interests and not necessarily in the best interests of the shareholders like implementing poison pills.

Rep. Bilbray introduced HRes 650 yesterday afternoon, and it will be on the floor under suspensions later today. It simply expresses the Sense of Congress that FERC should release it's completed report on the California electricity market before Novemeber 1.

In discussions with FERC, we know the report is complete, but several dates ranging from Nov. 1 to Nov. 9 have been given on the release of the report. It is the opinion of Rep. Bilbray that the report should be made public sooner, rather than later. So many of the interested parties are in limbo...waiting for the release of the report...that is just makes sense to release it now, so everyone has the opportunity to examine, analyze, and react to their findings.

As you read the resolution, you will see it's simple and to the point...we don't pre-judge the report in any way. Please let me know if you have any questions or concerns. Thank you! Paige Anderson Legislative Assistant Office of Congressman Brian Bilbray 1530 Longworth HOB Washington, DC 20515 202-225-2040; 202-225-2948 (fax)

Subject: Appeal Rights

Mike Day,

I have asked my assistant to set up a conference call for this evening to discuss preserving our arguments and rights of appeal, both generally and specifically (with respect to the negative CTC issue), during and after the present hearing. I know that we covered some of this in our previous call, and that a record on due process is being made, but I'd like for all of us to explore whether there is anything else we should be doing now, and what, if anything, we will need to do after the proceeding is concluded. I will see if Larry Mollman from Brobeck can join us as well for the state court litigation perspective. Stephanie will circulate the call-in information. Thanks.

[[MAPI 1.0 storage : 5419 in winmail.dat]]

NARUC and DOE are the hosting the North American Summit on Harmonizing Business Practices in Energy Restructuring in Dallas, Texas, on November 29 to December 1. This email is an update on recent developments in the Summit.

Newly confirmed speakers include Commissioner Linda Breathitt, Federal Energy Regulatory Commission; Rep. Joe Barton (R-Texas), chairman of the House Energy and Power Subcommittee; Phil Sharp, Lecturer in Public Policy, Kennedy School of Government, Harvard University; Kurt Yaeger, president and CEO, Electric Power Research Institute; Bob Anderson, commissioner, Montana Public Service Commission; Karen O'Neill, vice president for new markets, GreenMountain.com; Steve Ward, public advocate, Maine Attorney General's office; Donato Eassay, vice president, securities research and economics, Merrill Lynch; Rick Rumbarger, president and CEO, PowerTrust.com; Kathleen Magruder, Vice President, Government Affairs, The New Power Company (a joint venture of IBM, Enron, and AOL)

We have established a bulletin board for the Summit. You can access the bulletin board through the following link: <http://www.energymarkets.org/cgi-bin/Ultimate.cgi?action=intro>. The Forums in this board will permit you to ask questions or raise issues for the speakers on each of the panels at the Summit.

You can register for the Summit at <http://www.energymarkets.org/registration.htm>.

Information on reserving a room a the Adams Mark is at http://www.energymarkets.org/city_site.htm.

Please forward this email to colleagues who may be interested in the subject of the Summit.

File	dasovich-j/all_documents/2489.

If you had not seen this, it looks like the utilities are now trying to "help" FERC find the guilty.

What do people thin about beginning to quietly discuss with members of the California state house that the damages of the summer are not (or don't need to) being charged to end use customers. The utilities are doing a really good job of wrapping themselves with little households. In fact, TURN signed on to this pleading.

While San Diego customers are harmed, other consumers in California are just fine. Utility shareholders are taking it on the chin. We need to make sure that policymakers (especially FERC) recognize that in making any kind of refund the real choice is between Power Marketer shareholders and Utility shareholders. Jim

To: <Mary.Hain@enron.com>, <James.D.Steffes@enron.com> cc: Subject: PG&E/SCE filing

Mary and Jim:

Did you see in the PG&E/SCE filing that the two companies have kindly volunteered (p. 32) to "assist the Commission in developing a full record and in undertaking the rigorous analysis needed to fix the problems in the California markets and determine refund responsibility". How kind and public-spirited of them. More seriously, I would expect that they already have a full economic analysis going on prices, damages, etc.

Haas CEO Exchange	
Sender	owner-eveningmba@haas.berkeley.edu
Recipients	['eveningmba@haas.berkeley.edu']
File	dasovich-j/all_documents/10444.

Tickets for Haas CEO Exchange with HP's Fiorina and Cisco's Chambers

Available April 2

Tickets will be available April 2 to hear two of Silicon Valley's most high-powered CEOs: Hewlett Packard's Carly Fiorina and Cisco Systems' John Chambers speak at an event hosted by the Haas School on April 11 at Zellerbach Hall. The event will be taped for the PBS television series CEO Exchange.

The show will be introduced by Dean Laura Tyson and moderated by CNN's Jeff Greenfield. Students will have a opportunity to ask the CEOs questions at the end of the program. A raffle and a reception will follow the taping of the show.

The event is free and open to all Haas students. Tickets are required and will be available to Evening MBA students at the Evening MBA office during the week of April 2, 2000.

Wednesday, April 11, seating begins at 5:30, doors close at 5:45 pm Place: Zellerbach Hall on the UC Berkeley campus
AT Kearney, the exclusive sponsor of CEO Exchange, will raffle off two Pen Cam Trios by AIPTEK to the students at the end of the taping. The Pen Cam is a three-in-one camera: it's a PC camera, a digital camera, and a digital camcorder. You can view it at http://www.aiptek.com/Products_PenCam-Trio.htm.

HOLD ON TO YOUR TICKETS! You will need them for admission to the show, for the raffle, and for admission to the catered reception with the speakers and special guests that takes place after the show at the new Haas Pavilion.

For AT Kearney, the show's exclusive sponsor, CEO Exchange presents a unique opportunity to meet and network with business students and graduates at top schools. AT Kearney's new CEO, Dietmar Ostermann, will attend the show and the reception. He will be joined by members of his senior management staff and Haas alumni working at AT Kearney.

For more information on CEO Exchange, go to
<http://haas.berkeley.edu/groups/pubs/news/articles/CEOexchange41101.html>

This event is organized by the Haas School's Marketing & Communications Office.

We'll see you there. Ute Frey Associate Director Marketing & Communications Haas School of Business University of California Berkeley, CA 94720-1900 Phone 1-510-642-0342 Fax 1-510-642-4700 <http://www.haas.berkeley.edu>

Invitation to Participate

Sender	msimpson@shugollresearch.com
Recipients	[]
File	dasovich-j/notes_inbox/5714.

Lexis-Nexis has been a trusted source of real-time and archival information for 28 years. Continuing the Lexis-Nexis tradition of providing the most comprehensive and credible information in the marketplace, the nexis.comSM Web interface was released to our corporate subscribers in Fall 2000. To determine the applicability of this interface for graduate schools of business, Lexis-Nexis has entered into a pilot program with select leading business schools. As a pilot program participant at The University of California - Berkeley, Haas School of Business, Lexis Nexis has provided you with unlimited access to its nexis.com service. All they want in return is your opinion on how well the nexis.com service meets your expectations.

To best understand how the nexis.com service meets your needs, Lexis-Nexis has chosen an independent market research firm, Shugoll Research, to conduct a research study with pilot program participants like yourself. This is strictly market research and there is absolutely no sales effort involved. The research will be used to identify ways that the nexis.com service can be improved.

We urge you to participate in this research which will take place on February 12, 2001. All qualified participants will receive a cash honorarium as a token of our appreciation for their time and opinions. All of your answers will be kept strictly confidential.

If you are interested in participating, or simply learning more about this important research, please contact Shugoll Research one of two ways:

1. E-mail Shugoll Research at research@shugollresearch.com. Please include your first name, a telephone number and the best time of day to reach you so a representative from Shugoll Research can contact you. 2. Call Shugoll Research toll free at 800-322-4499 and identify yourself as someone who has been invited to participate in the nexis.com research.

If you have any questions or concerns, please contact your school's liaison, Gary Peete, at (510) 643-6471 or gpeete@library.berkeley.edu. Thank you in advance for your participation in this very important research.

Gary's letter responding to a series on "poor Edison" in the LA Times. I reviewed it in advance -- looked good to me.

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 05/16/2001 08:27 AM -----

Gary Ackerman <foothillservices@mindspring.com> 05/15/2001 11:36 PM Please respond to foothillservices

To: letters@latimes.com cc: Subject: Letter in re "Edison's Agony"

To the Editor;

The series of articles published last week by Ms. Cleeland called "Edison's Agony" continues your unbroken string of balanced and informative reporting on the California energy crisis. My group of merchant generators and power marketers include many pre-competition Edison employees, and employees from other utilities as well. We are sympathetic to the situation of those who currently serve under the Edison banner.

We note, however, that something is amiss in your series, and only lightly touched. That is, the role of SCE in advancing the legislation and policies in favor of competition in California.

It was SCE, and its CEO Mr. Bryson who masterminded the state deregulation legislation. Although SCE's Mr. Bryson objected vigorously to forced sales of power plants, and asked for long terms power purchase contracts, those lost battles gave way to winning the stranded-cost-recovery war.

SCE did well in adopting to the new reality, until the wholesale rates flew up, and left the utility unable to recover its costs. SCE made a deliberate calculation in May of 2000 to leave its customers unprotected from cost shocks. There was no hedging undertaken for future power purchases when the wholesale forward prices exceeded SCE's historical generation component of rates. As a result, the debts piled up.

Empathize with career employees of SCE, and with dedicated, hard working linemen who are always ready to serve at the cost of their private pleasures. But please, get it right. Much of this misery was the avoidable direct consequence of actions taken by, not avoided, by the SCE management team.

Gary B. Ackerman Executive Director Western Power Trading Forum 6155 Almaden Expy, Suite 230 San Jose, CA 95120

same issue for me. if you change wholesale-cost to retail rates I'm fine. Wholesale market will become thinnner & more volatile, but it will help stablize retail rates to consumers. Focus on the opportunity for utilities to lower their costs, not what the market will do. ABB

ATTENTION GRADUATE STUDENTS

Sender	msimpson@shugollresearch.com
Recipients	[]
File	dasovich-j/all_documents/8926.

As a pilot program participant at The University of California - Berkeley, Haas School of Business, Lexis Nexis has provided you with unlimited access to its nexis.com service. All they want in return is your opinion on how well the nexis.com service meets your expectations.

About the Research To best understand how the nexis.com service meets your needs, Lexis-Nexis has chosen an independent market research firm, Shugoll Research, to conduct a research study with pilot program participants like yourself. This is strictly market research and there is absolutely no sales effort involved. The research will be used to identify ways that the nexis.com service can be improved. If you have any questions or concerns regarding this research, please contact your school's liaison, Gary Peete, at (510) 643-6471 or gpeete@library.berkeley.edu.

This research will take place on February 12, 2001. All qualified participants will receive an honorarium as a token of our appreciation for their time and opinions. All of your answers will be kept strictly confidential.

How to Participate If you are interested in participating, or simply learning more about this important research, please contact Shugoll Research one of two ways:

1. E-mail Shugoll Research at research@shugollresearch.com. Please include your first name, a telephone number and the best time of day to reach you so a representative from Shugoll Research can contact you.
2. Call Shugoll Research toll free at 800-322-4499 and identify yourself as someone who has been invited to participate in the nexis.com research.

About Pilot Program Lexis-Nexis has been a trusted source of real-time and archival information for 28 years. Continuing the Lexis-Nexis tradition of providing the most comprehensive and credible information in the marketplace, the nexis.comSM Web interface was released to our corporate subscribers in Fall 2000. To determine the applicability of this interface for graduate schools of business, Lexis-Nexis has entered into a pilot program with select leading business schools. You should have received a user identification number, to access the Nexis.com service.

Thank you in advance for your participation in this very important research.

Shugoll Research 7475 Wisconsin Ave. Suite 200 Bethesda, MD 20814 (301) 656-0310 x109 www.shugollresearch.com

*Message 364 of 1299***Fw: A.98-07-026 et al. - Joint Petition of SCE, PG&E, and SDG&E**

File	dasovich-j/all_documents/28571.

Attached for your information is a joint petition for modification of the 1998 Revenue Adjustment Proceeding ("RAP") decision filed today by SCE, PG&E and SDG&E. The utilities request that, on an expedited basis, the Commission limit the scope of the PX Credit audit which WPTF obtained in a negotiated settlement in the 1998 RAP proceeding to remaining year 2000 calculations and thereafter order that the audit be terminated. They state that the audit is both irrelevant and costly and that "common sense demands" the Commission reconsider the decision.

They ask that comments in opposition be filed by August 3, reply comments on August 10 and a Commission decision at its meeting scheduled for August 23. They also ask the Commission to waive the period provided in Rule 77.7 for comments and reply comments on a draft decision in order that the decision become final immediately.

The filing states that there have been dramatic changes in energy markets, the number of DA customers has declined significantly and that ratepayers should not have to pay for the audit. Of course, they don't mention that the reason for the decline in DA customers is their own failure to pay the PX Credit. It is instead attributed to the "dysfunctional restructuring scheme and concomitant rise in wholesale energy prices." They justify their request legally by stating that their filing demonstrates that there are "significant new facts" and a "material change in conditions." The third criteria for reopening or modifying a Commission decision, a basic misconception of law or fact by the Commission, is not alleged to have occurred.

They also state that DA penetration will continue to decline because "Assembly Bills X1-1 and X1-6 have effectively reregulated the market."

Attached to the filing are declarations from the three ESP members of the Audit Committee, Bob Anderson of APSES, Aaron Thomas of AES NewEnergy and Marilyn Semro of Seattle City Light Department, in support of the utilities' petition. I have not reviewed the specific wording changes to the RAP decision to determine if there are any problems with the proposed modifications.

-----Original Message-----

From: Elizabeth Treanor [mailto:etreanor@orc-sac.com] Sent: Thursday, April 12, 2001 2:52 PM To: Elizabeth Treanor
Subject: PUC Seeks ORC Help-Rolling Blackouts in California Importance: High

April 12, 2001

To: ORC Western Occupational Safety and Health Group

From: Elizabeth A. Treanor

Subject: Consultants on Power Outages

This is a little out of our realm, but ORC received a call from a strategic planner with the Public Utilities Commission, who informed us that because of the energy shortage in California, there will be rolling blackouts this summer. The PUC is looking for consultants who can provide information in the following areas:

1. Impact of power outages on chemical processes
2. Impact of power outages on biomedical processes.
3. Impact of power outages at public events (and who understands current regulations with regard to ballparks).

The PUC is seeking to bypass the state contracting procedures and finalize contracts within the next few weeks. They asked ORC for names of consultants with expertise in the above areas. When ORC volunteered that power outages can have a significant impact on manufacturing operations as well, they thanked us for sharing but they are interested in direct impacts on health or safety.

If you have any suggestions for the PUC, please provide them to me ASAP; the PUC requested a response by April 16, 2001.

Thank you.

NEWS: Windfall Profits Tax

Sender	jennifer.rudolph@enron.com
Recipients	['ca.team@enron.com']
File	dasovich-j/all_documents/12117.

----- Forwarded by Jennifer Rudolph/HOU/EES on 05/07/2001

02:18 PM -----

Susan J Mara@ENRON 05/07/2001 02:15 PM

This morning Assemblywoman Ellen Corbett held a press conference on her AB 128x. Several print journalists and 3 TV cameras were present at the conference. Also of interest is that the Senate tax consultants and Burton's staff were at the event. Assemblywoman Hannah-Beth Jackson showed up late and gave a few quotes to the media present. A spokesman from Mirant also gave a few interviews after the press conference. According to Corbett's staff, they expect to handout the bill amendments at the hearing. Among Corbett's comments to the media present: "This bill is not a negotiating tool. I'm very serious about this bill. I want to see it through the process. The Governor will sign a bill like this." The following amendments are to be presented at the committee hearing today as follows: AB 128X 1) Creates a Tax on Excess Gross Receipts from Electrical Energy Distribution (called a "tax on excess greed") 2) Imposes a tax on the first sale of electricity by generators and middlemen. 3) Establishes as the measure for the tax, the amount by which the gross receipts exceed a

specified price ("the base price"). The measure of tax is called the excess gross receipts. 4) Creates a 3-tier system of rates as follows: a) Sales price more than the base price but not more than 150% of the base price, tax rate = 50% b) Sales price more than 150% of the base price but not more than 200% of the base price, tax rate = 70% c) Sales price more than 200% of the base price, tax rate = 90% 5) Creates a rebuttable presumption that the base price represents a fair sales price. 6) Adds a mechanism to require withholding of the tax by purchasers. Residential consumers and small business are exempt. 7) Requires sellers to file annual tax returns to report the tax on excess gross receipts and pay any remaining tax due. 8) The measure sunsets after five (5) years. There will be a report after today's Assembly Rev & Tax Cmte hearing. As opposed to SB 1x that returns the taxes raised to ratepayers, AB 128x would "repay" the State's General Fund.

on Western Power Crisis Continues

Credit Suisse First Boston Paul Patterson Good morning, to debate amendments to HR 1647, a California emergency relief bill. At the= =20 core of the debate is a proposal to require western generators to commit 80= %=20 of their output to long-term bilateral contracts. ? Apparently, talks stalled because of conflicting information related to t= he=20 amount of power already under contract. In addition there appears to be=20 questions over the 80% benchmark and the length of the contracts. ? The current willingness of House Republicans to consider a compromise=20 amendment is apparently linked to the impending power shift in the Senate t= o=20 the Democratic caucus. The House Committee Chair, Rep. Tauzin, hopes to bri= ng=20 the bill to a vote soon after June 11. ? Separately, some key California Assembly Democrats are proposing another= =20 plan to rescue Edison and PG&E. Under the plan, the state=01,s largest=20 commercial ratepayers would assume responsibility for most of the state=01,= s net=20 short power position as well as repayment of the utilities=01, undercollect= ion.=20 The level of support for the proposal is still unclear. ? We believe that the next few weeks will be critical in determining whethe= r=20 California can reach a political solution to avert another utility=20 bankruptcy. At present, a single viable solution has not yet appeared. =20 Consequently, we recommend that only investors with high risk tolerance=20 should consider investing in the California utilities.

Please call us with any questions. Regards, Paul Patterson, 212-325-5876 Neil Stein, 212-325-4217 Wen-Wen Chen, 212-538-0223

RE: PowerPoint info

Sender	cvavrek@deloitte.com
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/all_documents/11445.

Apology not necessary! However, you are very kind to consider my perspective on the group and project. I am certainly a bit frustrated with how this project is turning out. We should have "white boarded" our ideas and reached consensus in the very beginning I think. It would have saved all of us time. I'm counting on Mark to drive this home for us smoothly.

But, at the end of the day, I am pleased with how much I learned in Tasker's class, which is the ultimate point anyway.

Carolyn M. Vavrek Manager - Human Capital Advisory Services Deloitte & Touche 50 Fremont Street San Francisco, CA 94105

-----Original Message-----

From: Jeff.Dasovich@enron.com [mailto:Jeff.Dasovich@enron.com] Sent: Monday, April 23, 2001 10:05 AM To: Vavrek, Carolyn (US - San Francisco) Subject: Re: PowerPoint info

Carolyn:

I wanted to apologize for the way the group dynamic has shaped up. It's clear to me that you're a bit frustrated, and if I've contributed, I apologize.

You've done the most work on this project, your contribution has been very significant, and I personally am not satisfied about the way that the stuff you've pulled together (and your views) have been included. At some point, though, it gets tough beating one's head against the wall. Seems to me that, in a group, everyone should have some of their views included---that's what groups and compromises are all about. After all, it's school. We've made a lot of sacrifices to do it, and the point is to learn.

Anyway, I hope you'll still comment on the presentation, and I'm glad that you've agreed to do part of it on Thursday. For my part, I felt that I pushed yesterday about as much as I'm prepared to push and at this point, I'll put the ratios tables together, offer a few edits, but don't see much use going to the mat.

Overall, I think it'll be an okay presentation, though getting there has been, well, bumpy.

But thanks very much for all the work you did. It was important, and the presentation is better off for it.

Best, Jeff

fuel storage tanks

Sender	margaret.huson@enron.com
Recipients	['david.loosley@enron.com', 'janel.guerrero@enron.com', 'jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/11670.

Diesel Fuel Storage Tanks in Los Angeles

I pieced together some initial information on the prospect of installing diesel fuel storage tanks in the Los Angeles area. Much depends on the location of the storage facility as well as on the type (i.e. above or below ground) and size of the facility. Listed below are a few agencies that have a hand in overseeing fuel storage tanks.

Fire Department The Fire Department requires permits and review of plans for fuel storage facilities. One of three permits applies - division 4, division 5 or special permit - depending on the facility (above ground, below ground, quantity stored, area of storage facilities, etc). The permit paperwork looks quite comprehensive including a range of information from ownership to geological/groundwater measurements. However, once the application is complete, the Los Angeles Fire Department said they usually turn the permit around in a day. The proper fire department to contact depends on the location of the site. [LAFD - 213-485-7543]

Los Angeles County Industrial Waste permits are only required for tanks that discharge waste, so for storage, no permit is required. However, the County approves fuel storage for either a spill containment plan or double walled + leak sensor construction. Underground storage of hazardous materials is of concern to the County, but it is unclear where the fire department leaves off and the county picks up. In cities where the fire department does not process permits for fuel storage, the County plays a larger role. [LA County Environmental Programs - 626-458-3517]

California EPA License/permit processes seem to have been passed down to local levels, though I believe that EPA has installation and/or engineering requirements for fuel tanks. I was not able to reach a contact, but I was advised to speak with the Engineering Unit - 916-341-5775.

Zoning & Building Requirements Zoning restrictions exist in Los Angeles and building permits are required as in any facility. Narrowing the location or locations under consideration for the tanks will help the information search.

My initial impression is that this is a comprehensive process, but not necessarily any worse than other cities. The process is unlikely to change - for better or worse - any time real soon.

Please contact me with any questions or if you need more in-depth information - x5-2431 or Margaret.Huson@enron.com.

Regards, Maggy Huson Government Affairs

Tickets for Fiorina & Chambers at Haas CEO Exchange

Sender	owner-eveningmba@haas.berkeley.edu
Recipients	['eveningmba@haas.berkeley.edu', 'dimeff@haas.berkeley.edu', 'tj@haas.berkeley.edu', 'benson@haas.berkeley.edu...]
File	dasovich-j/all_documents/10563.

Haas CEO Exchange Tickets Available Now

Starting today, tickets are available for the CEO Exchange with HP's Carly =20 Fiorina and Cisco's CEO John Chambers on April 11 at Zellerbach Hall. ? Plea= se=20 pick up your ticket at the desk of the Evening MBA Program Office this week= =20 (one ticket per student please).

The Show: CEO Exchange takes place on Wednesday, April 11, at Zellerbach Hall. Seatin= g=20 begins at 5:30 p.m. (doors close at 5:45 p.m.; no seating is allowed after= =20 taping has begun). The show will be introduced by Dean Laura Tyson and=20 moderated by CNN=01,s Jeff Greenfield. It will air on PBS stations on or af= ter=20 October 1, 2002.

You will have the opportunity to ask questions of the CEOs toward the end o= f=20 the show. Both your questions and the answers will be recorded on camera. Y= ou=20 will be part of a television audience, so please look your best (business= =20 casual or business wear please).=20

The Raffle: The show at Zellerbach concludes with a raffle of two Pen Cams (a PC camera= ,=20 a digital camera, and a digital camcorder in one -- courtesy of AT Kearney)= =20 and Haas Gear. Please make sure that an usher takes your ticket stub before= =20 the show and hold on to your tickets for the raffle.

The Reception: Please join Dean Tyson, the speakers, Jeff Greenfield, and the CEO of AT=20 Kearney, Dietmar Ostermann, at a catered reception at the Club Room of the= 20 new Haas Pavilion following the show. The Haas Pavilion is the new stadium= 20 just west of Zellerbach Hall.=20

The event is free and open to all Haas students. However you will need a=20 ticket for admission to the show and to the reception.=20

Location: Zellerbach Hall is located near Bancroft Way and Telegraph Avenue, a=20 five-minute walk from Haas. Parking will be tight just before the show, so= 20 please leave your cars at Haas, if you can, or use other forms of=20 transportation. For more information on CEO Exchange, go to=20 <http://haas.berkeley.edu/groups/pubs/news/articles/CEOexchange41101.html>.

This event is organized by the Haas School's Marketing & Communications=20 Office. AT Kearney is the exclusive sponsor of the show.

We'll see you there. Ute Frey

AB 2xx to Suspense

Sender	cmicheli@carpentersnodgrass.com
Recipients	['wbrown@lhom.com', 'sglobby@pacbell.net', 'teresa_casazza@aeonet.org']
File	dasovich-j/all_documents/13025.

Assemblywoman Ellen Corbett took up AB 2xx this morning in the Assembly Appropriations Committee.? Although it raises revenue and is not subject to the Suspense File rule, Migden sent the bill to Suspense (to be voted upon next Wednesday, May 30). Corbett said that Californians "have suffered long enough from greedy energy sellers." She explained the bill and the 3-tier structure of the profits tax.? She said that "excessively greedy profits will be returned to the people through the General Fund." She said that the results of this greed is that budget cuts are being forced to be made.? She argues that California is a good place for the generators to do business.? According to Dept. of Finance, this bill could raise \$6 billion. Lenny Goldberg, on behalf of TURN, UCAN, and CTRA, spoke in support of the bill. Speaking in opposition were Fred Main (California Chamber) and Carrie Lee Coke (CMTA). Assemblywoman Goldberg inquired why businesses are opposed to this bill because they are suffering under higher energy prices. Assemblywoman Thom said that "a fair, healthy profit is permitted" under this bill. Assemblywoman Alquist is a supporter of the bill.? She said that the business community should back the Legislature to enact this bill. Assemblyman Ashburn asked about the base price (\$60).? He suggested amendments for long-term contracts.? He also argued more generation and supply is needed. Assemblyman Wright said that the bill will result in a reduction in output.? He stated that he would vote no on this bill. Assemblywoman Pavley said that FERC has failed to do its job.? Reasonable profits are being allowed under this bill. Assemblywoman Wiggins said that there is public clamor for this bill.? She asked for an explanation of the rebuttable presumption language. Assemblywoman Daucher asked whether the Governor has a position on this bill.? Dept. of Finance said no.? Corbett said that the Governor has indicated he might support a measure along these lines. Possible amendments to this bill were suggested to the author by Assemblywoman Migden, including: 1.? Exempt new power plants constructed in this state. 2.? Exempt long-term contracts (state only or all???) 3.? Raise the base price from \$60 to \$100 4.? Exempt QFs from the bill From what I understand, this bill was to go out today (and not to Suspense) if these amendments were made.? However, Corbett has not agreed to them yet.

File	dasovich-j/all_documents/8461.

I just penned it in my new, leather calender that Cameron gave to me so that I might become a little more organized. Do you think we might be able to snowboard (ski) instead of cross-country ski?

From: Cameron Sellers <cameron@perfect.com> To: 'Prentice Sellers' <psellers@pacbell.net>, jdasovic@enron.com, Scott Laughlin <scottwl@hotmail.com> Subject: RE: Bluegrass Weekend at Sierra Club Lodge Date: Tue, 23 Jan 2001 08:38:18 -0800 I think we should definitely go. I could not go up until Friday. Please make reservations!!! Cameron Sellers Vice President, Business Development PERFECT 1860 Embarcadero Road - Suite 210 Palo Alto, CA 94303 cameron@perfect.com

650.798.3366 (direct dial) 650.269.3366 (cell) 650.858.1095 (fax) -----Original Message----- From: Prentice Sellers [mailto:psellers@pacbell.net] Sent: Monday, January 22, 2001 6:34 PM To: Cameron Sellers; jdasovic@enron.com; Scott Laughlin Subject: Bluegrass Weekend at Sierra Club Lodge In case it's not on your calendars, the bluegrass weekend at the Sierra Club's Claire Tappan Lodge is: March 16-18 It's \$46 per person per night Includes 3 meals If we're going to go, I think we should make reservations right away. If so, do we plan on getting up there Friday night? I can make the reservations if you let me know. I haven't found any info yet on the free one... Here's some info I copied from the Claire Tappan Lodge website: <http://www.sierraclub.org/outings/lodges/ctl/index.asp> Clair Tappaan is located at 7000 feet, 45 minutes drive west of Reno - 1 mile from Sugar Bowl. The living room has an enormous stone fireplace. There is a library, a large communal dinning room, a social lounge, and a hot tub. The lodge maintains 10 to 12 kilometers of groomed cross-country ski trails and offers excellent instruction in both Nordic track and telemark techniques. Top quality cross-country skis and snowshoes are also available to rent at very reasonable rates. Guests needs to provide their own pillow, toiletries, towel, sleeping bag or comparable linens, and bathing suit if they wish to use the hot tub. We ask guests to choose a house chore to do each day they eat at the lodge. March 16-18: Blue Grass Weekend. Calling amateurs and proffesionals alike to a weekend of great jam sessions in the afternoons and a performance by the Donner Peak Pickers in the evening. The Pickers are a fantastic bunch of widely-experienced musicians playing traditional Bluegrass with superb instrumental craftsmanship.

From: Julee Ball Sent: Tuesday, November 20, 2001 12:07 PM To: Jan Smutny Jones (E-mail); Steven Kelley (E-mail); Katie Kaplan (E-mail); 'chudson@iepa.com' Subject:

Dave and I wanted to inform you and IEP of the recent merger between Edson + Modisette and another highly reputable Sacramento consulting/advocacy firm, Public Policy Advocates.

As you well know, Edson + Modisette has experienced some major changes this year, with the retirement of Karen Edson and the departure of one of our long-time consultants, Cece Martin. These changes also created a new opportunity for us to partner with others that can improve our capabilities.

The merger has given Dave and I and our clients the ability to draw upon additional people, many with valuable skills, and additional resources. Public Policy Advocates is a long-standing firm in Sacramento, founded and headed by Fred Taugher, who among other things was the Director of the Assembly Rules Committee for many years and come this January celebrates 40 years of experience in public policy. Fred gives us a new dimension of political access and strength we have never had before. There are also three other advocates in the firm that IEP could call upon if needed: Amy Zajac and Steve Cruz who each have ten years of experience in the Capitol, and Jennifer Wada who cut her teeth in public policy arena during this year's energy crisis. There will also be additional support staff, and other resources that we can draw upon.

What hasn't changed is my concentration on energy issues both in the Legislative and regulatory arenas.

Public Policy Advocates has a long client list which, if you are interested, you can see on the Secretary of State's web site at

http://cal-access.ss.ca.gov/lobbyist/detail_firm.asp?ID=1147315&SESSION=2001

Although our old phone numbers and addresses will work until the end of the year, our new contact information is the following:

Public Policy Advocates Dave Modisette - Vice President Julee Malinowski-Ball, Senior Associate 1015 K Street Sacramento CA 95814 916-441-0702 FAX-441-3549 dave@ppallc.com julee@ppallc.com

In short, I believe the merger of Edson + Modisette and PPA will have significant benefits, in terms of influence, and access, and availability of additional resources.

As IEP contemplates its agenda for the second half of the legislative session, I greatly hope you include our new team in your plans.

Should you have any questions, please do not hesitate to call me.

Julee Malinowski-Ball Senior Associate Public Policy Advocates 1015 K Street Sacramento CA 95814 916-441-0702 FAX-441-3549 julee@ppallc.com

SPECIAL EVENT AT UC BERKELEY's INTERNATIONAL HOUSE Glenn Fukushima speaking on... "Understanding and Misunderstanding Japanese Styles of Communication"

Wednesday, Sept. 5 5:00 - 6:00 pm International House, Chevron Auditorium 2299 Piedmont Avenue at Bancroft Way

FREE / NO RSVP necessary

In celebration of the 50th anniversary of the signing of the Peace Treaty with Japan, International House welcomes Mr. Glen Fukushima, who will deliver a presentation entitled "Understanding and Misunderstanding Japanese Styles of Communication" on Wednesday, September 5, from 5:00 to 6:30 pm in the I-House Chevron Auditorium, 2299 Piedmont Avenue at Bancroft Way in Berkeley. This presentation is FREE to I-House residents, members, alumni, and the general public.

Between corporations and individuals in the US and Japan, there are a plethora of cases where what one side says is not fully understood, or sometimes completely misunderstood, by the other side. This is disturbing given the numerous articles, books conferences, symposia, and studies that have proliferated during the past 50 years explaining the two countries to one and other. Of course, historical, political, economic, social, cultural and psychological differences can impede effective communication between Americans and Japanese. But beyond this, the languages of the two countries are so dissimilar that finding exact conceptual equivalents can be impossible, even with the help of the best interpreters. These are among the cross-cultural challenges Mr. Fukushima will address in his talk. Don't miss this opportunity to explore and discuss the reasons for and solutions to cross cultural differences that touch us here at International House and across the campus.

Glen Fukushima is the leader of Japan operations for Cadence Design Systems in Silicon Valley. A native of California, Fukushima was educated at Stanford University, Harvard University Graduate School of Arts and Sciences, Harvard Business School and Harvard Law School. Fukushima's publications include Nichi-Bei Keizai Masatsu no Seijigaku (The Politics of US-Japan Economic Friction), winner of the 9th Masayoshi Ohira Memorial Prize in 1993. His writings have appeared in the New York Times, Washington Post, Wall Street Journal, Los Angeles Times, International Herald Tribune, Japan Times and many more.

For more information about this event or about International House, call (510) 642-9460.

Letters to the Editor June 04, 2001 CALIF. UTILITY'S REVAMP IS NO THREAT TO ILLINOIS

Crain's does readers a disservice in an editorial by stoking groundless fears that electricity supplied by Midwest Generation is somehow threatened by a debt refinancing of Edison International, our ultimate parent company ("Feds must ensure Illinois isn't singed in Calif. crisis," May 28).

Midwest Generation, based in Chicago, stands on its own financially and has its own set of lenders and covenants that would prevent financial consequences related to the California energy crisis. Our contracts to provide electricity to ComEd give us the strongest possible financial incentive to invest in our plants.

Under the refinancing approved by the Federal Energy Regulatory Commission, the stock of Edison Mission Energy would be used as collateral by its parent, Edison International, to achieve favorable terms for the refinanced debt. Edison International also owns the Southern California Edison utility, which has been plunged into well-documented financial hardship.

Midwest Generation stock would not be used as collateral. In fact, the refinancing actually provides yet another layer of insulation between Midwest Generation and Edison International.

Georgia Nelson President Midwest Generation Chicago

Thank you,

Jennie Peebles Assistant to Freddi L. Greenberg Office of Freddi L. Greenberg 1603 Orrington Avenue Suite 1050 Evanston, Illinois 60201-5000 p. 847-864-4010 f. 847-864-4037 flgreenberg@flglaw.com

Subject: FW: where does our energy come from?

-----Original Message-----

From: Curt Pringle [mailto:Curt@curtpringle.com] Sent: Monday, July 09, 2001 6:23 PM Subject: where does our energy come from?

Assemblyman Bill Leonard's most recent e-newsletter contained the following information. I think it is very interesting to consider in light of the present energy situation in California and the comments of our present Governor.

Regards, Curt

Who Really Powers California? Governor Davis has made no secret that he believes that swashbuckling, cattle rustling, energy barons from Texas are to blame for our energy crisis. While Texas power companies make for good bad guys in the Governor's transparent Kabuki theater of blame, Leonard Letter readers may be interested to see who really provides power to Californians. The following list illustrates what percentage of our power supply each group of generators provides. (Editor's note: these percentages have been rounded up resulting in slightly more than 100%)

18%- Pacific Gas and Electric (California) 15%- Southern California Edison (California) 11%- Imported power from the Northwest (including Canada) 10%- Los Angeles Department of Water and Power (California) 10%- Imported power from the Southwest 7%- State and Federal Agencies 6%- AES power company 5%- Municipal Utilities and Irrigation Districts 5%- Reliant power company 4%- Duke power company 4%- Southern power company 4%- Dynegy power company 1%- Sacramento Municipal Utility District (California) 1%- Calpine power company 1%- San Diego Gas and Electric (California)

It should be noted that of this list, only Dynegy and Reliant are from Texas. These two companies represent a total of 9% of California's energy portfolio. By comparison, Georgia-based Southern (Mirant), Virginia's AES, and North Carolina's Duke Energy, have a 14% share of our energy portfolio.

This list does not focus on who is gaming the market. However, every provider listed benefited from skyrocketing energy prices. In trying to identify those power producers who used market power to ring up high profits on Californians, we should include ALL power producers in our investigations. State and federal agencies, independent power companies, utilities, municipal utilities, and even local irrigation districts could all be guilty of gouging consumers. Davis's focusing on only those companies from Texas does everyone in this state a disservice and is a misrepresentation of fact.

Date: 12/20/00 To: IEP PR Group From: Julee Malinowski-Ball, Edson + Modisette RE: MYTHS VS FACTS

In response to Andy Brown's suggestion for additional fact sheets, I am working on a "Myths vs Facts" paper and would like your recommendations (I'm going to leave the gas issues fact sheet to someone else). Because we already have a general restructuring and IEP solutions Frequently Asked Questions being finalized, this fact sheet should focus on those persistent myths that don't help us or the restructuring cause generally.

Attached is my top "myths" list. Please take some time to give me what your top 10 "myths" are, and if you have time, include what points we need to hit on in the "Facts."

THANKS.

Do you have a place to stay on the 1st? And how do the rest of us get back to the airport if you're not coming back until a day later? Maybe there's a limo or bus that goes from Beverly Hills to Burbank. Also, how and when are you arriving on the 24th? I remember that it's just a few minutes from the time we arrive. Scott told me some time ago, but I can't find any notes on that that I wrote down at the time.

<< File: Reservation Confirmation.txt >> This is what I received from the Westwood Marquis which has undergone a renovation. (I replied and told them to correct the address.) Let me know if this is OK. I don't know if we can find a cheaper place, but if you think this rate is too high I can try. Also, I made reservations to go to Burbank on Dec. 31 using Southwest Airlines and leaving from Oakland at 10:40 am, arriving at 11:40. Returning on Jan. 1 at 8:15 pm and arriving at 9:20. However, I learned from Cameron that all but your mother and I will be going on Dec. 30 so I will cancel that part of the reservation. I don't know what your plans are for returning so I will not be making any other reservations unless I hear from you. I originally made the returning reservation at the time I did so that if we came back to the house on Monday to watch football games and play games we would have some time to do that. If we don't do that we could possibly get an earlier flight back. Your mother doesn't want to come back too late, so your mother and I couldn't possibly watch a movie if Hef has one planned for later, but you might consider that possibility. Our check-in time at the W is 3:00 pm, possibly earlier. I assume you got my message left on the answering machine that everyone has been invited to the party.

To: 86464@WCTOPICS.djnr.com cc: Subject: Utilities, Electric: Deregulation: SoCal Ed To Consider Litigation To Recover Power Costs

[IMAGE] SoCal Ed To Consider Litigation To Recover Power Costs ? 09/26/2000 Dow Jones Energy Service (Copyright (c) 2000, Dow Jones&Company, Inc.)

LOS ANGELES -(Dow Jones)- Southern California Edison said if the state's Public Utilities Commission doesn't allow the utility to recover about \$2 billion in unpaid power costs when a state imposed rate freeze is lifted it will consider litigation to ensure recovery of electricity costs, according to a filing made late Monday with the Security and Exchange Commission.

"The CPUC has denied requests by (Southern California Edison) and other California utility companies to allow recovery of the transition revenue account undercollections after the end of the statutory rate freeze," the SEC filing states. "These decisions pre-dated the unforeseen run-up in wholesale market prices beyond the level of prices that should have been produced by functioning competitive markets."

SoCal Edison consumers are currently paying a fixed rate for electricity as required by the state's landmark 1996 deregulation law, which is far below the 20 cent/KWh wholesale rate SoCal Edison pays to procure the power from energy producers. As a result, the company's debt is growing by several million dollars a day.

If the company is unable to recoup the money from its ratepayers, shareholders would be responsible for the costs, said SoCal Edison chief financial officer John Scilacci.

The company would go to court seeking authority to have its customers pay back the debt, if required, rather than hold its shareholders liable, Scilacci said.

SoCal Edison said in the SEC filing that it has used "virtually all of its CPUC-authorized capacity for short-term borrowing."

The utility is restructuring its loan arrangements to allow for additional "short-term borrowing capacity to meet its liquidity needs."

The utility has recently received a negative rating from several Wall Street debt rating agencies.

File	dasovich-j/all_documents/8644.

colleagues:

we are less than 2 hrs short of the press conference. i just got to the computer and saw all these e-mails. i will suggest we take our local nobel prize winner's suggestion and go, for the time being, as is. we simply do not have the time to incorporate changes without violating the need for consensus. We will release the manifesto at 11am PST, at the press conference that is going to take place here at haas. Those of you from the east coast, feel free to release it at any time. Those in the west coast, i would suggest that we do not release it until 11am, but feel free to talk to whoever you want about it.

The version of the manifesto that is going to be released is the version that we sent yesterday afternoon incorporating the excellent comments by paul. also is the version that includes the list of endorsees as of the time.

if you haven't received the copy, please let me know.

thanks.

pablo

I think ABAG has a good point and the principle is one we are also trying to establish - if you weren't using DWR power, you shouldn't have to pay for it. But I wonder if Enron's endorsement of ABAG's petition wouldn't contaminate it. I think we should let them win on the merits of their own argument and use their success (if it occurs) as precedent for our position on similar issues.

Also, there is some downside if they win. Our customers were on the utility for those 3 months, and are now off - the direct opposite of the situation ABAG is in. So if they escape the burden of the 3 month surcharge, it would (should) be reimposed on customers who were on the utility at that time - which in theory could include our customers, even though they are back on DA and otherwise exempt from the surcharge.

So while I think we want them to win, like always, its hard to figure if that's good or bad so let's just stay out.

ABAG POWER Petition for Modification of D. 01-05-064 Importance: High

Attached is a petition for modification of Decision 01-05-064 (the rate design decision) filed by the Association of Bay Area Governments. The Petition requests that the decision be modified to exempt customers which were direct access for the period of March through May 2001 from the 12 month procurement surcharge which is designed to allow the utilities to collect the three cent increase authorized by the March decision which then did not go into effect until June (i.e., collect the revenues foregone due to the time lag in implementation).

Given the fact that most of Enron's customers were on bundled service during the March-June time frame, I do not believe that the requested modification would provide them any benefit. Let me know if I am wrong on this and if Enron wants to chime in in support of ABAG's petition.

New Interest Rates and Loan Consolidation

Sender	owner-eveningmba@haas.berkeley.edu
Recipients	[eveningmba@haas.berkeley.edu, 'evstaff@haas.berkeley.edu']
File	dasovich-j/all_documents/13484.

Delete if you are an international student or a domestic student not interested in Federal financial aid.

The interest rates on Federal education loans are variable and change on July 1, based on the 91-day T-Bill rate from the last Treasury auction in May plus a statutory percentage add-on (1.7% in-school, 2.3% in repayment). That auction was on May 29, 2001, with a rate of 3.688%, which rounds to 3.69%. According to the formula, the new applicable interest rates are as follows effective July 1:

In-School Rate Repayment Rate Direct Loans 5.39% 5.99%

Thus, interest rates have dropped by 2.2% and are lower than they have been in many years. Students who have not yet consolidated their federal loans should consider consolidating after July 1 in order to lock in these low rates, even (especially) if they are still in school. Consolidation is an optional process wherein the rate is a weighted average interest rate of the loans being consolidated, rounded up to the nearest 1/8th of one percent. This interest rate becomes fixed for the life of the consolidated loan.

According to Mark Kantrowitz, publisher of FinAid.com, "a student with \$16,000 in debt who consolidates at 6.0% (5.99% rounded up to the nearest 1/8th of a point) will save \$2,233.52 over the lifetime of the loan compared with consolidating at 8.25% (8.19% rounded up to the nearest 1/8th of a point). If the student consolidates while still in school to take advantage of the in-school rate, the rate used will be 5.5% (5.39% rounded up to the nearest 1/8th of a point), and will yield an additional savings of \$478.93 for a total savings \$2,712.45 over the lifetime of the loan.

"Caveat: It is possible that the Fed will continue to cut interest rates and that this will continue to be reflected in auction results, so that next May the rates will be even lower. But there is also the risk that the Fed rate cuts will end, and that the rates next May will be higher. Given that the current rates are the lowest in many years and the savings already substantial, the safest course of action is to consolidate after July 1, 2001 and before June 30, 2002."

However, if you are planning to consolidate I would suggest doing so before September 30, 2001 to take advantage of an additional 0.8% interest rate reduction. Refer to the first attached Word file for details on this and the consolidation process.

It is not too late to apply for 2001-2002 federal student loans If you are a U.S. citizen or permanent resident and are interested in borrowing a 5.39% Direct Loan, you may still apply by following the instructions in the second attached Word file.

This may seem complicated to you, but the attachments really do answer your questions, so please read them thoroughly before e-mailing me.

Greetings: In all of the craziness this morning with getting items out I neglected to attach the below Ad copy for the March California Journal. This is just the copy and as soon as it is approved we will send out the full ad copy with graphics. Please review this and keeping with our 48-hour review period please send any comments back to me by 9:00 a.m. PST on Thursday, January 25, 2001. Thank you for taking the time to review this. Please let me know if you have any questions.

Under Construction [headline]

No major power plants have been built in California for the past ten years. While population has increased 16% and the peak demand for electricity has Surged 15% (33% in Silicon Valley), power generation has inched up only 2%.

But things are changing.

Our member companies have already invested billions of dollars to buy and modernize California's vintage power plants, many of which date back to the Korean War. We're spending billions more to build new plants. (Six are already under construction. Three more have been approved. Eleven more are under review.)

Instead of risking tax money, we're using private-sector dollars to build and run our plants - to power California's economy into the future with clean, reliable and affordable electricity.

We're part of the solution.

Tomorrow at 4 EDT sounds good to me but I'm not sure we're ready. I'd like to make sure all of our sponsors like the idea of coordinating with IBER and UCEI. What say you, sponsors? The co-sponsorship decision affects our decisions on place, topics, and speakers, because IBER and UCEI would need to get involved right away.

I spoke with Borenstein last night. Shapiro's initial idea was exactly what we're planning. They appreciate and respect the fact that we've done most of the legwork. They'd like to be part of it and it sounds like they would consider it a favor if we included them. IBER has a subgroup called the Competition Policy Center which is a program meant to exploit the incredible concentration of antitrust economists at UC Berkeley. I can certainly imagine ways the school could benefit from a stronger connection with CPC and UCEI, who are so widely respected and are doing public policy. If Lee thinks its worth potentially losing a bit of limelight on this conference for the long run benefits of building resources and connections on campus, I'm all for it. Rob

File	dasovich-j/all_documents/3769.

Seab/Sabine,

Sorry for the delay in getting back to you on this important issue. The three rule changes or designs in other markets you describe look very good and are right on point. I would like to add two more to your list, namely:

1) Price caps in California

Attached is a one page memo from my colleague in California, Jeff Dasovich. Consistent with Jeff's first two points, Steve Kean has told me that in addition to chasing existing power supplies out of the state, price caps, and the uncertainty surrounding them, chase new generation away. The turbine market is a worldwide market. Firms will have difficulty committing their own capital (and borrowing from others) if they propose to put facilities in jurisdictions where rates are capped or pricing is based on something other than the operation of the market. Several generators, including Dynegy and Calpine, have said they will look for other homes for the turbines they have ordered. I have a Nov 10, 2000 Megawatt Daily article that quotes Enron and Calpine as saying that price caps in California drove both companies to withdraw proposed plants.

I recognize there is presently no price cap proposal in Alberta but I think we can draw the connection between interference through caps and interference through other forms of administrative intervention that are being considered in Alberta such as: 1) price discrimination on imports, or 2) the latest proposal I heard today from the Power Pool which is capping import offers into the Power Pool at Mid-C prices plus transmission costs.

2) FERC Staff Report on Midwest that apparently states on pages 2-15 that some market participants believe that developers sited new generation in the Midwest because there were no price caps (see attached FERC Report).

As we discussed, I will be using this information in upcoming meetings (this Friday is the next one) with the Power Pool and the Alberta Gov't in support of Enron's arguments that policy makers in Alberta must "stay the course" through the higher priced periods, failing which they will make things much worse.

In view of the fact it is U.S. Thanksgiving could you please give me a sense of Sabine's timing on this.

Regards,

Rob

Recipients	['cvavrek@deloitte.com', 'chin@haas.berkeley.edu', 'sama@haas.berkeley.edu', 'jeff.dasovich@enron.com']
File	dasovich-j/all_documents/8929.

Jeff, I assume you can coordinate a conference call from work. Call me at home: 415-388-2548.

Excellent points and I was thinking along similar lines. Questions I have:

How do you know that LT debt gives more advantageous terms? We have no yield curve info nor do we know their credit rating. At what point does their borrowing exceed their covenants? Is our strategy to not raise the required \$66million or to stop/slow PPE spending so that the \$66m is not needed?

***** Mark D. Guinney, CFA Consultant Watson Wyatt Investment Consulting 345 California Street, Ste. 1400 San Francisco, CA 94104 (415) 733-4487 ph. (415) 733-4190 fax

_____Reply Separator_____ Subject: Re: HD Case: Proposed Plan Author: Jeff.Dasovich@enron.com Date: 02/07/2001 11:25 AM

Hi folks:

Since we have only one page, the write up for number 4 will have to be very brief. Before writing it, though, I wanted to offer a few bullets regarding what angle we might take, and let folks respond, comment, counter, etc. before writing it up. I'll clean and beef up once we've agreed to the approach we'd like to take to question #4. Finally, I can work from my office on this this evening, which means that I can use the conference call capability of my office phone to patch everyone in if we'd like to do a conference call. If that's what folks would like to do, I'd prefer to do the call at around 7 PM. Just let me know.

Best, Jeff

The question for #4 is:

Stock price is down 23%, significant debt has already been tapped to support massive growth and covenants on that debt restrict taking on a lot more debt.

What should HD do w.r.t. current operations and future growth strategy? In the near term focus less on growth and more on getting margins and EBIT growth back in line with results from previous years. (Management's Letter to Shareholders alludes to this, but it's difficult to determine whether management is just paying lip service to the need to capitalize on the growth spurt and grown earnings, or continue on the growth effort.)

With respect to funding future (more moderate growth), the company does have some room to increase long-term debt (e.g., current ratio for 1986 = 2.26). It seems that HD would get better terms and have increased flexibility by issuing additional debt rather than relying on lines of credit. As such, HD ought to look those sources of funding and fill in any "funding gaps" with funds from the line of credit.

Given the significant drop in stock price, HD is likely better off in the near term 1) moderating growth, 2) improving performance to generate cash internally, and 3) using long-term debt issuance to provide the funds needed. Once performance and stock price improves, then HD should consider a stock issuance.

How can company improve operating performance? Reduce selling, store operating expenses and pre-opening expenses Improve receivables turnover Improve inventory turnover Improve per store/sales Consider closing poor-performing stores

All of which will improve margins

Should company change its strategy? If so how? Shift from meteoric growth to moderate, targeted growth, and focus on generating positive cash flow from operations Focus on improving performance at existing stores; specifically focus on controlling costs and asset turnover and productivity Consider another debt issuance rather than rely extensively on credit line in order to decrease cost of funds and increase flexibility

-----Original Message-----

From: Dasovich, Jeff [mailto:Jeff.Dasovich@ENRON.com] Sent: Wednesday, September 26, 2001 1:57 PM To: Piper, Greg; Richter, Brad Subject: Meeting with Perfect Commerce

Greg: Good talking to you. Congratulations on your new role. Sounds exciting (in addition to exhausting).

Based on our call, I contacted Perfect Commerce. The two folks from their shop that will be in Houston are:

Ian Sullivan SVP, Professional Services and all implementation of the product

Cameron Sellers VP, Business Development

They'd like to meet sometime during the week of October 15th. Let me know if that works for you and Brad. Or if you'd like to contact them directly, just let me know and I'll get you their numbers/emails.

I ran across Perfect when I was doing an MBA project--we were required to find a company that we could consult to on e-commerce strategy.

I've since found out that Perfect's doing a pilot with EES--acting as the e-procurement platform for products tied to EES' outsourcing deals. From what I hear it's going well, and EES is enthusiastic.

The technology is very interesting: soup to nuts e-procurement platform developed by Paul Milgrom (global auction guru and economist at Stanford). Glad you guys can meet with them. I think it's definitely worth the time--the technology may fit very well with Networks.

Best, Jeff

"Chris Micheli" <cmicheli@carpentersnodgrass.com> 04/30/2001 06:19 PM

As you may know, SB 1x (Soto/Scott) passed the Senate Appropriations Committee by an initial vote of 7-3 (the bare minimum). Senator Soto said that the Legislature must make a "bold proposition" with this bill. She said that this experience is "like no consumer has been gouged before." The Legislature must cap rates. This bill guarantees a generous profit to generators. Senator Scott said that these generator profits have been gained off of consumers. According to FERC, over \$500 million in excess profits have been reaped. Californians have been "royally mistreated" by generators. This "money has left the state (to Texas and other places)." This bill is the only solution. The PUC can change the \$80 rate. Based upon the January Field Poll, Californians support this concept. We have to "stand up to the generators and say no more." Supporters were: TURN and CTRA (Lenny Goldberg). Lenny said that the FERC will not give any relief to CA ratepayers, so the Legislature has to. This bill needs to be combined with the power authority by Senator Burton to hold prices down. Other supporters of the bill included: Congress of CA Seniors; CalPIRG; CA Consumer Federation; CA Labor Federation; SEIU; Public Power Now. SEIU (public employee union) said that this bill is "the only way to put caps on rates." Opponents were CMTA ("this is the wrong medicine for solving the problem"); WSPA (does nothing to resolve the shortage of energy; we should be doing bills to stimulate greater investment in supply); InterGen said that they are looking at California market, but will not build with this bill out there. CA Wind Energy Assn (QFs oppose this bill because the rate is too low); and IEP (most productive answer to our problem is the build power plants). Senator Battin said that the price cap is lower than some of the Governor's long-term contracts at \$86 per hour. Senator Scott said that the munis are, indeed, covered by the bill. He also said that the PUC can change the rates contained in this bill. Scott also said that the PUC can exempt renewables under the bill. Senator Bowen stated that the \$80 figure should be removed from the bill

("this price may be inappropriate"). She suggested using the "FERC proxy price." She suggested that they look at an exemption for contracts with the state. She saw no reason to exempt the renewables because they would make a bundle with an \$80 cap. Senator Poochigian said he was concerned about the majority vote issue (because this bill is allegedly revenue neutral). Scott said all of the money raised by the bill will go to ratepayers. He said that Legislative Counsel gave him an opinion (I don't know if it is written or verbal) that this scheme was permitted. Poochigian said it was ironic that the PUC was being given the authority to set rates under this bill. Senator Scott stated that they would take as an author's amendment to exclude all long-term contracts from the provisions of this bill. Next stop for the bill is the Senate Floor.

We should talk to commercial people and amongst our group to see if/how we should cover this new found agency. GAC

-----Original Message-----

From: Susan R. Schneider [mailto:schneider@rsvl.net] Sent: Saturday, September 15, 2001 12:22 AM To: schneider@rsvl.net Subject: Power Authority info

5061 Knightswood Way Granite Bay, CA 95746 Phone (916) 797-3106 A California Limited Liability Company

How to have information about the new California Power Authority delivered directly to your e-mail address<?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

QUICKLY, CONVENIENTLY, AND ECONOMICALLY

The California Power and Conservation Financing Authority (the "Power Authority") is an important new player in California's energy markets. Created by the State Legislature with \$5 billion in bonding authorization, the Power Authority has the ability to acquire generation, transmission, and demand-side resources to lower electricity prices to consumers.

The Authority plans to procure up to 3,000 MW of resources for operation next summer, with a longer-term target of close to 5,000 MW (greater than the peak demand of San Diego Gas and Electric). Already, the Authority has received proposals for over 115 generation and conservation/load management projects, and competitive RFPs are planned in the near future for central-station and on-site photovoltaics, central-station solar thermal plants, fuel cells, and micro-turbine resources. A proposed Bolivian LNG project could also make the Authority a major gas-market participant (up to 1.5 Bcf/d).

Clearly, this new agency will have a significant impact on California's energy markets. The pace of activities will be very fast, and staying informed will be critical for anyone in the energy industry.

Generally, that will require multiple trips to Sacramento, numerous hours attending Power Authority meetings, and downloading and wading through technical and other documents. Phoenix Consulting is offering an economical and efficient alternative - a new service, California Power Authority Letter (CAL-PAL), that can save you that time and effort by sending timely, critical information directly to your e-mail address with no effort at all on your part.

Modeled after our popular KNOW THE ISO reporting/analysis service, CAL-PAL service will include:

(1) Advance notice of important Power Authority decisions; (2) Concise, accurate, plain-English reports about Power Authority meetings and documents (e.g., competitive RFPs), within 2 days; and (3) Free Phoenix Consulting services, such as information and advice about Power Authority issues or other aspects of California electricity and natural gas markets.

ALL THIS IS INCLUDED IN THE CAL-PAL SERVICE PACKAGE FOR LESS EACH MONTH THAN THE COST OF A SINGLE HOUR OF CONSULTING SERVICES.

Finding out more is quick and easy

To receive additional information about CAL-PAL service no cost or obligation to you, just click on the "Reply" and "Send" commands on your computer screen. We'll send you promptly a full description of CAL-PAL features, along with cost and other subscription information.

I look forward to hearing from you, and to being your "eyes and ears" at the Power Authority.

Tomorrow at 4 EDT sounds good to me but I'm not sure we're ready. I'd like to make sure all of our sponsors like the idea of coordinating with IBER and UCEI. What say you, sponsors? The co-sponsorship decision affects our decisions on place, topics, and speakers, because IBER and UCEI would need to get involved right away.

I spoke with Borenstein last night. Shapiro's initial idea was exactly what we're planning. They appreciate and respect the fact that we've done most of the legwork. They'd like to be part of it and it sounds like they would consider it a favor if we included them. IBER has a subgroup called the Competition Policy Center which is a program meant to exploit the incredible concentration of antitrust economists at UC Berkeley. I can certainly imagine ways the school could benefit from a stronger connection with CPC and UCEI, who are so widely respected and are doing public policy. If Lee thinks its worth potentially losing a bit of limelight on this conference for the long run benefits of building resources and connections on campus, I'm all for it. Rob

By agreeing to pay only for "reasonable" offers, DWR left itself a loophole big enough to drive a truck through:

"DWR will assume financial responsibility for all purchases by the ISO in its ancillary services and imbalance energy markets based bids or other offers determined to be reasonable. Such determination of reasonableness will be made by DWR on a case by case basis and communicated to the ISO." (Emphasis added.)

Market Notice re Credit Issues

In response to the FERC order of April 6, 2001 re the issue of creditworthiness, the California Department of Water Resources (DWR) has authorized the ISO to make the following statement. To the extent (and only to the extent) that a purchase is not otherwise paid by any party or payable by another party meeting the credit standards set forth in the ISO Tariff (another "Qualified Party"), DWR will assume financial responsibility for all purchases by the ISO in its ancillary services and imbalance energy markets based on bids or other offers determined to be reasonable. Such determination of reasonableness will be made by DWR on a case by case basis and communicated to the ISO. All bids into the ancillary services and imbalance energy markets will be deemed to be contingent on the acceptance of financial responsibility by DWR, to the extent not paid or payable by another Qualified Party. Unless a supplier is otherwise notified, any bid accepted by the ISO will be deemed to have the financial support of another Qualified Party or DWR as specified in this notice. In addition to the foregoing, DWR will assume financial responsibility for all purchases resulting from the issuance

by the ISO of emergency dispatch instructions, to the extent not paid or payable by another Qualified Party. Payment for such purchases shall be made according to the rate specified in the ISO Tariff for emergency dispatch instructions. The ISO and/or DWR reserve the right to rescind or modify the foregoing arrangements at any time and for any reason, including a successful rehearing or appeal from the April 6 order.

As the FERC determined in its February 14 order that DWR is a creditworthy counterparty, the ISO believes that the foregoing arrangements meet the requirements of FERC's April 6 Order. Accordingly, the ISO expects that suppliers will honor their obligations under the ISO Tariff and related agreements to respond to ISO dispatch instructions.

PG&E Files Emergency Motion re URG Valuation

Sender	douglass@energyattorney.com
Recipients	[dpurdum@apx.com, 'ed@cazalet.com', 'berry@apx.com', 'tjohnso8@enron.com']
File	dasovich-j/all_documents/28301.

PG&E has filed the attached, Motion to Establish Final Market Valuation of Non-Nuclear Generating Assets Pursuant to Public Utilities Code Section 367. The motion requests that the Commission consolidate in the docket used for the recent rate stabilization decision the existing record of PG&E's remaining major non-nuclear generating asset market valuation proceedings and immediately adopt a final market valuation for all of PG&E's remaining non-nuclear generating assets. The market valuation dockets that would be consolidated in this proceeding include A.99-09-053 (hydroelectric assets); A.00-05-031 (Kern); and A.00-05-034 (Humboldt Bay).

The utility requests that this be done prior to establishing the revenue requirements and rates for PG&E's retained generating assets pursuant to the June 15 Chief ALJ's Ruling. That ruling set a hearing schedule for determining the revenue requirements of the three utilities related to retained generation, QFs, bilateral contracts, and ancillary services. PG&E asks that the Commission rule on its Motion as soon as possible and no later than July 19, so that PG&E and interested parties have the benefit of the ruling prior to the beginning of hearings on July 23, 2001.

PG&E argues that since the Commission has not completed market valuations for PG&E's generating assets, it therefore may not legally determine the value of those assets for ratemaking purposes until such time as those market valuations are complete. In fact, there has been no action whatsoever in PG&E's hydroelectric market valuation proceeding since January 22, when the Chief ALJ issued a ruling canceling a prehearing conference and public participation hearings, and extending the comment period on the draft environmental impact report.

The utility stresses that Section 367(b) of the PU Code requires the Commission to market value the utilities' generation assets no later than December 31, 2001, and that it has to be, based on appraisal, sale or other divestiture. They also note that AB 6 from the Legislature's First Extraordinary Session modified Section 377 to prohibit PG&E from selling any of its existing generating assets until at least January 1, 2006, and requires that those assets be dedicated for the benefit of California ratepayers. Since AB 6X precludes the Commission from valuing PG&E's generating assets by sale or divestiture, appraisal is the only lawful method.

PG&E concludes that effective January 1, 2002, its non-nuclear retained generation must be reflected in utility rates on the same basis as the market value determined for purposes of AB 1890 stranded cost computations. Therefore, the market valuations adopted by the Commission will have to be included in the consideration of URG ratemaking in this proceeding. The motion says that the valuations are also essential prerequisites to the determination of any amounts that might be made available under the current rate structure for payment to the DWR as provided for in AB 1X. PG&E concludes that market valuation of its retained generating assets is an essential

prerequisite to establishing their revenue requirement, which is = =20 hardly illogical.

Dan Walters: A power crisis imperils Davis (Published Nov. 26, 2000) Gov. Gray Davis would appear to be living a charmed political life. California's economy is soaring, the state's tax coffers -- and Davis' own re-election treasury -- are bulging, voters are in a complacent mood, and there have been none of the devastating disasters that plagued the state during the early 1990s. There is, however, a very dark cloud casting a shadow over Davis' governorship: the prospect of rolling blackouts as demand for electric power exceeds supply, accompanied by tremendous increases in Californians' power bills. And how Davis handles this incipient crisis could be the hallmark of his first term -- and, potentially, a re-election issue in 2002. San Diego utility customers were hit hard last summer as their local utility emerged from the mandatory rate freeze imposed by the state's 1996 utility deregulation scheme. Davis and the Legislature responded, in effect, by buying some time. They enacted legislation rolling back power bills temporarily, but leaving it unclear whether ratepayers, taxpayers, San Diego Gas and Electric Co. or power suppliers would eventually eat the wholesale costs that led to the spikes. Clearly, Davis was hoping that the Federal Energy Regulatory Commission (FERC) would step in and force the suppliers to refund hundreds of millions of dollars to SDG&E and its ratepayers. And that, Davis and other politicians hoped, would also forestall a similar, but much larger crisis looming for customers of Southern California Edison and Pacific Gas and Electric Co., the state's two largest private utilities. The two are still operating under the rate freeze, but have acquired at least \$5 billion in unanticipated wholesale power costs that they want to pass on to their ratepayers. Politically, FERC intervention would be the most palatable of the alternatives because it would place the financial onus on mostly out-of-state corporations that have little political standing. California politicians have been demonizing the power suppliers, saying they took advantage of the deregulation program's auction process to drive up costs far beyond reason. The problem for Davis and others is that FERC is not cooperating, pointedly refusing to intervene in a way that the governor wanted. Davis ripped into the FERC response during a hearing earlier this month, accusing it of "gutting (California's) ability to protect consumers" and proposing "new and completely untried market rules, making guinea pigs of California consumers in yet another reckless deregulation experiment." Davis wants to appoint himself as the California utility customer's best friend, hinting that he may lead a "ratepayer revolt" if FERC continues to refuse to order refunds from suppliers and new price controls. But it's unclear what he can do concretely, since he's on record as approving the overall thrust of deregulation and since many of the business interests he has cultivated to obtain his re-election funds have benefited from having power suppliers compete for their business. Doing nothing could mean that when Southern California Edison and PG&E emerge from the rate freeze, they will raise rates dramatically, just as Davis is seeking re-election in 2002. The utilities seem to be offering Davis a deal: allow them to begin raising rates now to recover their "stranded costs" for wholesale power and they will avoid sticker-shock raises in 2002. Another option would be for Davis to spend some of the state's billions of surplus dollars to either ease the impact on ratepayers or put the state into the power supply business itself. The only certainty is that unless FERC reverses itself, Davis will remain on the hook for whatever

happens -- the sort of unpredictable situation that he hates to encounter. DAN WALTERS' column appears daily except Saturday. Mail: P.O. Box 15779, Sacramento, 95852; phone: (916) 321-1195; fax: (916) 444-7838; e-mail: dwalters@sacbee.com

BELLS URGE FCC TO EASE SEC. 271 BARRIERS ON INFORMATION SERVICES

12/04/2000 Communications Daily (c) Copyright 2000 Warren Communications News, Inc. All Rights Reserved. Congress made it clear that information services are exempt from regulatory restraints of Sec. 271 so FCC should ease its restrictions, Bell companies told Commission in comments Nov. 29. Bells urged agency to revise rules that have kept them from offering Internet access and other information services on interLATA basis. At very least, Qwest suggested, FCC should allow Bells to offer information services when they lease transmission component from other carriers. FCC is in definitional dispute over whether information services can be defined as "telecommunications services" -- and thus subject to Sec. 271 barriers (CD Nov 29 p1). It has categorized them that way, which has kept Bells from offering information services across LATA lines. However, in response to court appeal by Verizon and Qwest, FCC asked for and got remand so it could reconsider issue. Qwest argued in its comments that definitions were clear: Telecommunications is defined in Telecom Act as transmission of information without changing form or content, and since information services change content, then can't be considered telecom. Fact that information services often include transmission components doesn't turn them into telecom services, Qwest said. At very least, Commission should rule that Bells can provide InterLATA information services if they don't use their own transmission component, Qwest said: "There is no theory under which the BOCs can be prohibited from providing these services when the transmission component is acquired from another carrier." FCC initially ruled that ban on interLATA services didn't apply to information services, then changed its mind, Verizon said. Agency "had it right" first time and later decision "was inconsistent with the definitions in the Act," Verizon said. BellSouth agreed: "Because Congress neither defined the term 'interLATA service' to include 'information services' nor expressly included 'information services' in Section 271's prohibition, a BOC's offering of an information service using interLATA telecommunications does not implicate Section 271's prohibitions." CompTel called Bells' arguments "self-serving," saying those companies have argued on both sides of issue in recent years, depending on whether it helped or hindered them. For example, CompTel said, BellSouth argued in 1997 that out-of-region interLATA services included out-of-region information services. CompTel said argument was made to gain exemption from separate affiliate requirement. Similar argument was made by Ameritech in another case, CompTel said. Assn. urged FCC not to let Bells stir up concerns of other Internet providers by saying issue could lead to regulation of all ISPs. "Congress intended to include 'information services' within the definition of 'interLATA services' in order to prevent the BOCs from abusing their local market power," CompTel said. -- Edie Herman

ENERWISE GLOBAL TECHNOLOGIES FORMED TO PROVIDE ENERGY INTELLIGENCE SOLUTIONS FOR CORPORATIONS

-- Company Provides Information on Consistency, Quality and Use of Energy --

(Kennett Square, PA) May 1, 2001 =01) Enerwise Global Technologies, a major provider of enterprise-wide energy intelligence and managed energy services for domestic and international corporations, today announced the completion of its spin-off from Conectiv, Inc. Enerwise Global Technologies was forme= d with the assets of Conectiv Inc., in conjunction with funding by EnerTech Capital Partners II L.P. and other leading energy industry venture capital firms, including CapiTech, Inc., a subsidiary of Hydro-Quebec.

Enerwise Global Technologies addresses the energy intelligence needs of medium to large enterprises in a broad range of commercial and industrial (C&I) segments for which managing the consumption, reliability, and cost of energy is mission critical. By capturing, integrating, analyzing and monitoring vital energy and operational data for its customer, Enerwise Global Technologies is able to recommend and implement solutions to improve facility operations, increase reliability and reduce costs.

"The need for meaningful energy information will continue to rise as energy supplies remain tight and energy prices prove volatile, and as many businesses become increasingly aware that the quality and reliability of th= e energy they receive can have significant impact on their operations " said Dom Geraghty, Senior Vice President of Enerwise Global Technologies. "Our vision is to transform the way businesses understand and make decisions abo= ut their energy consumption, thereby enabling them to manage their energy-related costs while maintaining their up-time objectives."

Three key elements work in harmony to enable and distinguish Enerwise Globa= l Technologies from its competitors:

~ Expedient operational tactics combining the efficiency of the centralized= , 24x7x365, remote-monitoring Information Command Centers (ICCs), with convenient and secure customer access to up-to-the-minute intelligence via the Web. ~ Reliable, robust technologies that can be seamlessly integrated into existing enterprise systems and have been fully

proven; in fact, they are already in place in hundreds of major corporations. ~ Experienced energy management professionals who truly understand the energy challenges that customers face, and who can offer real-world solutions to help them meet those challenges.

- MORE -

"No other resource offers enterprises a more comprehensive energy intelligence and management solutions set," said Scott Ungerer, Managing Director of EnerTech Capital Partners. "Enerwise Global Technologies is immediately in a market-leading position as the only organization whose solutions have been successfully implemented and are working for hundreds of demanding and satisfied customers."

From its headquarters in Kennett Square, PA, Enerwise Global Technologies provides energy intelligence and managed energy services for domestic and international C&I customers, including companies that are leaders of their industry segments. Formed with assets contributed by Conectiv Inc., Enerwise Global Technologies has been in business since 1998. Enerwise Global Technologies formally launched in 2001 with venture capital funding provided by EnerTech Capital Partners and CapiTech, Inc., a subsidiary of Hydro-Quebec.

Get The Wall Street Journal on Schwab

Sender	online.service@schwab.com
Recipients	[jeff.dasovich@enron.com]
File	dasovich-j/notes_inbox/11620.

***** GET THE WALL STREET JOURNAL, COMPLIMENTS OF CHARLES SCHWAB

Consolidate your assets at Schwab by September 30 and receive The Wall Street Journal for up to 12 months. To get started, go to:

<http://schwab.ed10.net/ud/3MOW/IE1M/3CK1/GX/QF3OEC?sa=983228445>

Today, more than ever, it's important to have a complete investment strategy that includes all your goals.

At Schwab, we're here to help. Our Investment Specialists are on hand to assist you in developing and following a comprehensive investment strategy that meets your short and long-term goals. We can also provide objective advice, recommendations and answers to your specific investing questions.

Enjoy Convenience and Control

For greater convenience and even more control over your finances, we encourage you to consider consolidating your assets at Schwab. By consolidating your investments, you can receive easy access to your portfolio, streamlined statements to keep you updated on all your holdings, online quarterly performance profiles and more.

Receive The Wall Street Journal

And, as a valued Schwab Signature Services(TM) client, for a limited time, you'll receive a special offer: a complimentary six-month subscription to The Wall Street Journal when you deposit or transfer \$50,000 to Schwab, and a 12-month subscription when you deposit or transfer \$100,000.

Our Investment Specialists would be glad to discuss the benefits of consolidation further and answer any questions you might have about your portfolio, the market or the specialized resources that are available to you as a Signature Services client. Call us today at 1-866-246-8371 to schedule a free consultation by phone or in a branch near you.

To send for our free consolidation offer package, go to:

<http://schwab.ed10.net/ud/3MOW/EKNA/3CK1/MQ/QF3OEC?sa=983228445>

This offer expires September 30, 2001.

By accepting the consolidation offer, customers are providing their information to Dow Jones & Co., Inc. The Wall Street Journal is a registered trademark of Dow Jones & Co., Inc. Charles Schwab & Co., Inc., is not affiliated with Dow Jones & Co., Inc., or any of its affiliates or subsidiaries. Any use of this information by Dow Jones & Co., Inc., is not governed by Schwab's privacy policy. Please allow four to six weeks from the time Schwab receives your transfer/deposit forms to receive your first Wall Street Journal paper. Offer does not include IRA and Schwab Institutional(R) accounts. Offer not transferable and not valid in conjunction with any other offer. Domestic customers only. Schwab reserves the right to discontinue this offer. If you work at Schwab, Dow Jones & Co., Inc., another financial institution, broker-dealer or exchange or news or financial information media company, you are not eligible for this offer. Deposits must be new to Schwab, and must remain in account for at least 180 days. Other restrictions may apply. All transfer/deposit forms must be postmarked by September 30, 2001, to receive this offer.

Access to electronic services may be limited or unavailable during periods of peak demand, market volatility, systems upgrade, maintenance, or for other reasons.

We respect your privacy. To minimize your receipt of duplicate information and for internal recordkeeping purposes, Schwab may track your responses, if any, to this offer. You can read more about the Schwab privacy policy at:

<http://schwab.ed10.net/ud/3MOW/A5SC/3CK1/AZ/QF3OEC>

If you would prefer to receive only account service emails, please reply to this email indicating your preference. Please note: doing so will not remove you from any SchwabAlerts(R) or email newsletters or information to which you have actively subscribed.

Notice: All email sent to or from the Charles Schwab corporate email system may be retained, monitored and/or reviewed by Schwab personnel.

File	dasovich-j/all_documents/1591.

I have a pretty major philosophical disagreement with AMendment 30. I come from the camp that says we want an ISO that has minimal duties. If the ISO is able to enter into forward contracts, well ... how is that any different from a vertically-integrated utility? Let's see, so the ISO controls all the T and now will control some G. Aren't we concerned about that? I have heard from some that this is the "best solution" -- I need someone to explain to me why.

To: Susan J Mara/SFO/EES@EES, Mary Hain/HOU/ECT@ECT, Jeff Dasovich/SFO/EES@EES, Jeff Brown/HOU/EES@EES, Sarah Novosel/Corp/Enron@Enron, Joe Hartsoe/Corp/Enron@Enron, James D Steffes/HOU/EES@EES, Janine Migden/DUB/EES@EES cc: Subject: Cal ISO Amendment 30 & Alliance RTO Filing

EPSA needs feedback on Cal and Alliance filings and what position EPSA can take. Thoughts? -----

Subject: Cal ISO Amendment 30 & Alliance RTO Filing

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketers Working Group

FROM: Don Santa, Regulatory Affairs Committee Chair Joe Hartsoe, Power Marketing Working Group Chair Julie Simon, Vice President of Policy Mark Bennett, Senior Manager of Policy

DATE: September 20, 2000

RE: ? Cal ISO Amendment 30 ? Alliance RTO Filing

Two issues arose on the weekly conference call today on which we need your assistance and feedback. Please forward comments to Julie Simon at 202-789-7200 or jsimon@epsa.org by close of business on Monday, September 25th.

1. Cal ISO Amendment 30

On September 11, 2000 the Cal ISO filed Amendment No. 30 to its ISO Tariff at FERC. In this filing, the Cal ISO is "reluctantly" asking FERC for authority to buy forward contracts to meet its real-time balancing obligations. Costs of the forward contracts would be allocated to Scheduling Coordinators who deviate in real time from their schedules. Interventions and protests are due on October 2nd.

While EPSA has consistently opposed an ISO role as market participant, there are concerns here about the lack of alternatives available in California. While an ISO's role in the real-time balancing market should be small, as a practical matter, the Cal ISO has been forced to procure thousands of megawatts in the real time markets. Thus, deciding how to approach this filing balances difficult competing goals. Please let us know how you would like EPSA to proceed.

2. Alliance RTO

On September 15th the Alliance RTO made a compliance filing at FERC seeking to address all of FERC's concerns about its earlier proposals and purporting to meet all the requirements of Order No. 2000. The filing retains a transco structure, with a 5 percent ownership limitation for individual market participants and a 15 percent ownership limitation on each class of market participants. It also eliminates pancaked rates in favor of zonal, or license plate, rates for deliveries within the Alliance and postage-rates for through or out deliveries. While the geographic scope is unchanged, the scope will be larger than any operating RTO. The filing includes a pro-forma inter-RTO coordination agreement to address seams issues such as security coordination, market monitoring, regional planning ATC and TTC calculations and pricing reciprocity.

Until now, EPSA has not been a party to the Alliance proceeding. With this latest filing it may be appropriate for EPSA to intervene, raising issues of support or opposition to the filing. To determine how to proceed, however, we need input from those companies that have been more closely involved in the development of the Alliance. Please let us know how EPSA should proceed with respect to this latest filing.

One caveat -- on the expedited motion -- we have to tell them whether we are in or out by 1pm EDT tomorrow. SO, we would not be discussing at in our conference call. I have already recommended internally that we go forward and join Dynegy's motion. So, by the time we have our call tomorrow, the filing will be made already.

Subject: Studies of market power in California

Alan/Jeff:

Just in case you haven't seen it, there is a new paper out from someone at Berkeley (Steven Puller?) on California market power issues. It seems to make some pretty strong statements re: market power over the previous years. If you haven't seen it let me know and I can email you a .pdf version.

All the best,

Seab

High Prices

Attached is a paper that was filed at the FERC by Paul Joskow and Ed Kahn. I assume it was attached to SCE's comments in the FERC price caps proceeding.

This study appears to be the most definite analysis so far of the question: did market fundamentals or generator market power cause the price run-ups this summer? Joskow/Kahn conclude that although much of the run up was due to gas prices and NOx costs, that the market was unworkably competitive; i.e., the cost run ups do not fully explain the price run ups. Further, they provide what they claim is evidence that individual generators withheld this summer.

Joskow/Kahn state: "Moreover, there is considerable empirical evidence to support a presumption that the high prices experienced in the summer of 2000 were the product of deliberate actions on the part of generators or marketers controlling the dispatch of generating capacity to withhold supply and increase market prices." Biggest withholders in their analysis are: AES/Williams, Reliant, and Dynegy

Marketer/traders are largely but not completely spared criticism in their analysis. Joskow/Kahn recommend that FERC staff undertake a study of the entire WSCC data to "Determine the role of marketers in the production and bidding behavior of the California generators." and to find out more why CA imports fell.

It will be interesting to see how the CA generators react to this study.

My initial read is that this is will be received as an important, influential work. It will fuel the fire for more information release, especially by the UDCs and CA regulators--at least release of physical operational data.

I would be interested in your reaction to the study. In terms of potential criticisms: I noticed that their gas prices might be low (used monthly average data rather than daily). They also did not account for generator marginal profit or margin recovery to account for possible outages and noncontiguous schedules. Finally, they do not examine the benefits that would have accrued had additional capacity come on line.

Alan Connes

Attached is a ruling issued yesterday by Commissioner Wood directing that E= SPs and customers file copies of direct access contracts with the Commissio= n by December 3. The contracts will be available to ALL other parties who = sign a "suitable" protective order. The Ordering Paragraphs read as follow= :

1. By December 3, 2001, any party who believes that it has a direct acc= ess contract or agreement potentially affected by an order to suspend direc= t access as of July 1, 2001 or a date earlier than September 20, 2001, shal= I submit a true

and correct copy of each of the actual contracts or agreements along with any arguments as to the impact of such an order. A failure to submit this information for the Commission's consideration will be considered a waiver of the arguments related to claims involving the contracts and agreements. Initially, the true and correct copy of each of the actual contracts or agreements shall be filed under seal with the Commission's Document Office and served on Administrative Law Judge (ALJ) Robert Barnett.

2. Office of Ratepayer Advocates shall work with the parties who have executed direct access contracts or agreements to develop a proposed protective order and nondisclosure agreement for Commission staff, which shall be submitted to ALJ Barnett by December 3, 2001.

3. The electric service providers and customers who are parties shall work with other parties and shall jointly submit a proposed protective order and nondisclosure agreement that will cover parties other than Commission staff by December 11, 2001.

4. Parties' supplemental comments to the comments they filed in response to the October 23rd Assigned Commissioner Ruling shall be submitted by January 4, 2002.

As a preliminary matter, of course, AREM and WPTF do not, in their own names, have direct access contracts. However, certain members of AREM and WPTF are direct parties to the proceeding and need to consider what course they wish to take. The group also needs to consider if they wish to fight this Order on Constitutional or procedural grounds. I will be considering our options and get back to you with more detail. However, as a very preliminary analysis, it is evident that the Commission does not have jurisdiction over either ESPs or the customers they serve. The request is also particularly outrageous because of the statements that, "A failure to submit this information for the Commission's consideration will be considered a waiver of the arguments related to the claims involving the contracts and agreements" and "Parties to this proceeding may have access to these contracts and agreements after the appropriate protective order and nondisclosure agreements are in effect." The former is a likely denial of due process and the latter exposes proprietary contracts and pricing information to ESP competitors and exposes sensitive pricing information to competitors of energy-dependent customers. Your thoughts would be appreciated. My initial reaction is that this is time for ESPs and customer groups, such as CMTA, ABAG, CLECA, CIU, EPUC, SPU, etc., to band together and fight this at multiple levels, from the Governor's Office on down, including in the media. Your thoughts would be very much appreciated. Dan Law Offices of Daniel W. California Generators' Shares Tumble on Bankruptcy (Update1) Bloomberg, 04/06/2001

Bear Stearns's Kevin Boone on Pacific Gas & Electric: Comment Bloomberg, 04/06/2001

California Generators' Shares Tumble on Bankruptcy (Update1)

(Adds Enron comment and updates share prices. For more on the California electricity crisis, see {EXTRA <GO>}.)

Houston, April 6 (Bloomberg) -- Shares of California power-sellers Mirant Corp., Duke Energy Corp. and Dynegy Inc. fell more than 9 percent after Pacific Gas & Electric Co., the state's largest utility, filed for Chapter 11 bankruptcy protection. "The concern with the generators is clearly that they're not going to get paid anywhere near (the price) they sold power for to the California grid," said David Schanzer, a Janney Montgomery Scott LLC analyst. Shares of Atlanta-based Mirant, which owns California plants able to produce enough power to light 3 million homes, fell as much as 10 percent to \$27.70 earlier. The stock was down 94 cents at \$29.96 in late trading. Charlotte-based Duke, which produces 3,000 megawatts, or about 5 percent of the state's power, fell \$2.20 to \$40.20 after reaching \$38.44, down 9.3 percent. A megawatt is

enough to light 1,000 typical U.S. homes. Houston-based Dynegy, which controls 2,800 megawatts of power in a partnership with NRG Energy Inc. of Minneapolis, fell \$3.11 to \$47.81 after falling as much as 9.7 percent to \$46. NRG Energy shares fell \$1.50 to \$29.90. Calpine Corp., a San Jose, California-based generator and power-plant developer, fell \$5.04, or 9.9 percent, to \$45.60. Houston-based Reliant fell \$1.85 to \$43.50. Tulsa, Oklahoma-based Williams Cos. fell \$1.17 to \$40.70. Enron Corp. of Houston, which sells power and natural gas in California, fell \$1.56 to \$54.14. Enron's exposure to Pacific Gas & Electric ``will not have any material effect on earnings or our financial condition," Enron spokesman Vance Meyer said. Enron is the world's biggest energy trader. Pacific Gas & Electric, owned by San Francisco-based PG&E Corp., and Edison International's Southern California Edison, the state's second-largest utility, together have losses of more than \$14 billion because they paid more for electricity than state regulators allowed them to charge consumers. Shares of PG&E fell \$4.31, or 38 percent, to \$7.07. Trading was halted earlier before the bankruptcy announcement. Edison fell \$4.49, or 36 percent, to \$8.15. The company said it still expected the state to work out a plan to end the energy crisis.

--Margot Habiby in the Dallas newsroom (214) 740-0873, or mhabiby@bloomberg.net, with reporting by Mark Johnson in Princeton, through the Princeton newsroom, (609) 279-4000/taw/alp/p

Bear Stearns's Kevin Boone on Pacific Gas & Electric: Comment 2001-04-06 16:47 (New York)

(For more stories on the California energy crisis, see {EXTRA <GO>}

New York, April 6 (Bloomberg) -- The following are comments made by Kevin Boone, a bond analyst at Bear Stearns & Co., on the filing for Chapter 11 bankruptcy protection by PG&E Corp.'s Pacific Gas & Electric, California's largest investor-owned utility.

``It's obviously a big surprise. I'm not sure it's going to be the most constructive way to solve the issue, but it may eliminate the political element of the equation, make it a matter of law and keep the extraneous things out of the equation.

``There really were too many cooks in the kitchen. This will isolate it, so to speak, and get the parties in a room together where they can hammer out the desired objective."

``PG&E obviously thought this was a way to push the negotiations along and create a more favorable result. Going through the channels they were going through wasn't going to get them a solution to the problem."

On Davis' televised speech on the energy crisis Thursday night:

``I thought his comments were a step in the right direction. I thought they were very positive. PG&E was not looking for a small step. They were looking for a giant leap to the solution of this problem."

On market reaction:

``Certainly with the selloff we've seen today with both Edison and PG&E in the equity market, it indicates it's a potential stumbling block" for Edison International and Sempra Energy to reach bailout agreements with the state.

To: commissionerbrown@cpuc.ca.gov cc:

Subject: JDS Uniphase Corporation Strongly Supports Retention of Direct Access and asks for CPUC Support

Dear Commissioner Geoffrey F. Brown:

My name is Kenneth D. Pietrelli, Vice President of Corporate Services for the Thin Film Products Group(formerly OCLI and Flex Products) of JDS Uniphase in Santa Rosa, California. I am asking for your support to retain Direct Access as an option for industrial energy customers such as JDS Uniphase. Electricity and natural gas are critical infrastructural requirements for our manufacturing processes. Without access to reliable sources, at high quality and competitive prices we cannot satisfy our customers needs and be a viable business in California. We fear loss of direct access will have a material, adverse effect on our business in California where we currently employ approximately 5,000 employees. JDS Uniphase is made up of such diverse groups as the original Uniphase Commercial Lasers Group in San Jose and Manteca, the E-Tek Dynamics Company in San Jose, SDLI in San Jose and Santa Clara and OCLI and Flex Products in Santa Rosa. The corporation has over 20,000 employees in over 20 countries. Of all the sites in California only the Santa Rosa site has direct access, which is due to various historical and operational reasons. We own a 22Mw substation located on our 75 acre plant site and are considered a grid level customer. Up to now we have enjoyed high quality, reliable electrical energy. In the mid 1990's we began contracting directly for natural gas from other than PG& E and are currently sourcing gas from Pan Canadian Energy via a single point gas meter for the site. In 1998 we entered into a 5 year direct access electricity contract with PG& E Energy Services. In 2000 this contract was assigned by PG&E Energy Services to Enron and is valid through June 30, 2003. Because of the importance of energy availability, quality and price to our manufacturing operations we have made business decisions on where capital investments have been made and where redundant operations would be consolidated. We are in the process of a global re-alignment program that is consolidating numerous activities to Santa Rosa, CA for a variety of reasons, to include our direct access to energy.

If direct access is eliminated in California, JDS Uniphase management will have to re-assess and re-consider actions currently underway to consolidate manufacturing from Rochester, NY; Ottawa, Canada; Dunfermline Fife, Scotland; and San Jose, Ca to the Santa Rosa, CA site. Other locations on the East Coast of the U.S., China, UK, etc. would have to be re-considered for these consolidation activities. Selfishly, we are asking you to retain direct access to keep jobs in California. Philosophically, we believe the "right to choose" is an American tradition and anyone concerned with the long-term health and viability of the California economy would want to retain the direct access option for California customers. Thanks for your time and support.

Kenneth D. Pietrelli Vice President of Corporate Services, TFPG, JDSU 2789 Northpoint Parkway Santa Rosa, CA 95407

Hot Flash:

The ALJ in the case (Tim Kenney) just advised me that he is so busy that he will not even read any responses to the PG&E petition for issuing a security interest in accounts receivable. Don't ask if this is due process--it's not. The commission is clearly going to grant this authority at the emergency meeting tomorrow at 1:30. In voice mails from Travis, he recommended voicing some concerns so that we can raise the issue later if we feel Enron's interests have been prejudiced by how PG&E implements this. I also received the indication that EES and ENA were very concerned about filing anything negative that could upset the present arrangements with PG&E on DASR matters. I recommend not filing. I do not believe we need to express any concerns to raise them later. We are not in a formal waiver situation, and the commission is acting before any reasonable responses were possible. Let me know by VOICE MAIL what you want to do. If you want something filed, please also advise my associate, Jeanne Bennett who will be monitoring this issue in the office today while I am in Sacramento. Her direct line is 415-765-8449. Thanks, Mike Day

Travis

McCullough@EC To: James D Steffes/NA/Enron@Enron T cc: Elizabeth Sager/HOU/ECT@ECT, Jeffrey T Hodge/HOU/ECT@ECT, Richard B Sanders/HOU/ECT@ECT 01/24/2001 Subject: PGE -- Securing gas suppliers issue 03:43 PM

Jim -- the following are our concerns about PG&E's proposal/possible points to make in a response:

1. Enron would be one of the largest unsecured creditors in the event of a PG&E bankruptcy; our claim may become even larger depending on the extent to which we acquire additional claims against the utilities through the PX or ISO. We are therefore interested in any action that would reduce the pool of assets available to unsecured creditors.
2. This proposal may be to our benefit, or to our detriment. There is not a great deal of detail in the proposal currently on the table, and Enron needs additional information in order to evaluate the proposal. Certainly, we need to evaluate this in light of other developments.
3. The proposal contemplates pledging "existing and future" receivables to secure obligations owed to gas suppliers; PGE shows approx. \$1.3 billion in A/R as of 9/30; will that (or an amount of like magnitude) be pledged as security under this plan? Granting gas suppliers security may be fine with us, but we don't have a great interest in OVER-collateralizing their positions. More current information on the current A/R balances and the extent to which obligations to suppliers will be secured will be helpful.

4. Do they intend to extend this security to ALL gas suppliers, or only those that are refusing to supply PGE under current circumstances?

5. Do they intend to secure obligations on a going-forward basis only, or will they also secure their obligations with respect to payables that have already accrued?

6. PG&E is scheduled to make a couple of large payments to ENE tomorrow; what is PG&E's ability to make those payments for gas already delivered?

7. Given the extension of the DOE order, it seems that consideration of this petition could be delayed for a few days to allow interested parties sufficient time to evaluate its implications.

Give me a call with any questions.

In light of the DOE extension of the emergency gas supply order, there should now be adequate time for PG&E to respond to these points and clarify their proposal.

UC Summit Conference

Sender	lfried@uclink4.berkeley.edu
Recipients	[jdasovic@enron.com]
File	dasovich-j/notes_inbox/695.

Dear Jeff:

This message provides more information about sponsoring the UC Berkeley Nov. 13 deregulation summit and the two sponsorship levels. Three UC institutions, the Goldman School of Public Policy, the Competition Policy Center, and the Energy Institute, are jointly organizing the summit. To cover the costs of the conference we need financial support.

Enron Sponsorship will support the balanced effort to review where we are in terms of the deregulation of electricity, and where we should be going, and also to disseminate the conference proceedings to a larger audience. With a contribution of \$10,000, Enron will be designated as a Major Sponsor. A contribution of \$5000 will designate Enron as a Sponsor. Contributions are fully tax deductible and will be acknowledged in all printed materials distributed to the press, the UC community, at the conference itself and in all related internet materials.

Our first large mailing to over 2500 individuals is scheduled to go out next week, and will include Sponsor acknowledgments. We will be very pleased to have your Sponsorship be a part of this first mailing. With your support, we will also be able to disseminate a summary of the conference proceedings to a broad public audience who would appreciate an objective presentation of issues raised by electricity deregulation and different viewpoints on them.

I hope this clarification is useful, and to hear from you shortly. I would be happy to provide any further information you may desire or personally answer your questions. In addition, our Special Projects Director, Heather Cameron (hcameron@uclink.berkeley.edu, 510-642-9437), will be directly responsible for all public relations, publicity and conference materials, and can answer any questions about these. For reference, I have appended a brief description of the conference below.

Best, Lee

P. S. If you wish to purchase 10 tickets at \$200 each (non-tax deductible) and make a charitable contribution of \$8,000, we will be happy to designate you as a Major Conference Sponsor. Similarly, should you wish to purchase 5 conference tickets and make a charitable contribution of \$4000, we will designate you as a Conference Sponsor. You are very

welcome to purchase as many additional tickets as you wish.

The Summit Conference on Electricity: Deregulation, Reregulation, or What? University of California's Goldman School of Public Policy, Competition Policy Center, and Energy Institute are hosting an energy summit on policy options to remedy problems with electricity de-regulation. The summit will take place this November 13, from 12:30-6PM, on the UC Berkeley Clark Kerr campus in Berkeley, CA.

The focus, and the audience, will be national but heavily informed and influenced by the California crisis. The conference will evaluate at a high level (1) the wisdom of deregulation and (2) how the many pitfalls encountered so far can be avoided and remedied. The university will convene an open, honest and reasoned exchange between high level decision-makers from various perspectives: industry, regulators, consumers, legislators, academics, and market and system operators. The format entails two roundtable discussions with six speakers and a moderator. Each speaker will make a brief opening statement that identifies key issues, followed by panel discussion and an audience Q&A period. We expect a live audience of about 200 people including a large press presence. One sponsor has tentatively offered to provide streaming video services. We hope to have a balanced group of sponsors from APPA to energy companies.

The speakers are being arranged at this time. We have confirmed positive responses from Loretta Lynch's office (Chair, CPUC) and from PJM CEO Phil Harris, and preliminary positive responses from Steven Littlechild (England's primary electricity regulator) and Laura D'Andrea Tyson (Dean, Haas School of Business and former Chair, President's Council of Economic Advisors and National Economic Council. We are awaiting responses from U.S. Representatives Edward Markey and Joe Barton, and FERC Commissioner Bill Massey. Former DOJ chief economist Carl Shapiro will be on one of the panels, as will economist and UCEI head Severin Borenstein. We also expect to have several speakers who are energy company CEOs, state legislators, and consumer advocates.

Lee S. Friedman Professor Of Public Policy Goldman School of Public Policy University of California 2607 Hearst Avenue Berkeley, CA 94720-7320 Ph: (510) 642-7513 Fax: (510) 643-9657 e-mail: lfried@uclink4.berkeley.edu

Dan Walters: Repaying huge power debts still looms as a high political hurdle

(Published June 13, 2001) Gov. Gray Davis has been running around California lately proclaiming that California is "turning the corner" on the energy crisis, explicitly citing sharply lower wholesale prices for electricity and, implicitly, his improved standing in polls. Events will reveal whether Davis' June hubris was justified. Despite the recent drop in spot power prices, however, many aspects of the energy crisis remain unresolved, and chief among them is liquidating the \$20 billion-plus in debts that utilities and the state have accumulated for power purchases. A \$13.4 billion bond issue that is supposed to reimburse the state's general fund for more than \$8 billion advanced for power purchases and then finance future electricity buys has been hung up by demands of potential bond underwriters for more assurances about repayment. The bonds may not be sold until August, if ever. And by then, nearly the entire bond issue may have to flow to the state's general fund, leaving little to finance future power buys. And then there are the \$14 billion or so in debts that the state's two big utilities, Pacific Gas and Electric and Southern California Edison, incurred for power purchases before their credit was cut off in January. PG&E already has declared bankruptcy, and Edison was on the verge when Davis hurriedly

signed a "memorandum of understanding" (MOU) on a rescue scheme, the centerpieces being state purchase of Edison's share of the intercity power grid, plus a plan for ratepayers to pay off the utility's debts. The Edison scheme has been denounced as a "bailout" by consumer activists and faces certain legislative rejection, despite a multimillion-dollar lobbying and public relations drive by the utility. And it's sparked a complex set of private maneuvers in and around the Capitol that are fraying the already cool relations between Davis and the Legislature's most powerful leader, Senate President Pro Tem John Burton. Davis called a dozen senators into his office Monday to press approval of the Edison MOU with minimal changes. Burton, who didn't attend, says the governor threatened legislators with rejection of their bills or budget appropriations if they didn't play ball, and promised retaliation if Davis uses strong-arm tactics for Edison. "On an issue like this, they (legislators) ought to be able to vote their consciences," Burton told reporters, denouncing the Edison deal as a "flat-ass bailout." Davis spokesman Steve Maviglio rejected Burton's account: "The governor's too smart to do any of that." As the public squabbling heats up, so is the private search for a compromise that Edison, consumerists and other principal players can accept -- without much confidence that it can be found. A dizzying array of MOU alternatives is being floated, including an effort by Burton and Assembly Speaker Bob Hertzberg to persuade Edison creditors to write off part of the debt, and for big industrial and power consumers to shoulder the rest in return for recapturing the authority to make power supply deals outside the utility grid. In effect, the plan would create two power systems, one with regulated rates for individual and small business customers and unregulated "direct access" for big users. Former Assemblyman Phil Isenberg, a lobbyist whose firm includes energy generators, is acting as a mediator on behalf of Hertzberg. Sources close to the negotiations say the big users won't entertain the deal until they know how much power the state has been buying, and at what prices. Davis has insisted on keeping that data secret, and has been sued by the news media and others to force release, but on Tuesday announced that he will agree to opening the supply contracts to inspection. The chances of an Edison deal coming together this summer are no better than 50-50 -- about the same odds of the state's completing its bond sale. And those uncertainties are compounded by great fears that California still faces the prospect of widespread and prolonged power blackouts this summer. "I don't think it's over," Burton said Tuesday in a jab at Davis.

The Bee's Dan Walters can be reached at (916) 321-1195 or dwalters@sacbee.com .

File	dasovich-j/all_documents/12512.

Looks complete to me. No comments.

Best, Jeff

Paul Kaufman/ENRON@enronXgate 05/15/2001 11:30 AM

To: Richard Shapiro/NA/Enron@Enron, James D Steffes/NA/Enron@Enron, Jeff Dasovich/NA/Enron@Enron cc: Subject: Utilization of Mike Day

Rick, Jim and Jeff: Here's a draft of the e-mail I intend to send to Sandy and Mike re: use of Mike Day in Sacramento. Let me know your thoughts.

It appears from talking with both of you that we have some confusion on how we will contract for legal services to support or legislative efforts. Hopefully this e-mail will clarify the process so there is no confusion in the future and so that Mike can feel comfortable he is completing work that is authorized and for which we have a budget.

1. To begin, it appears that Goodin, MacBride has billings as of May 11 for approximately \$10,000 on direct access, windfall profits, the "Global Settlement," Power Plant Siting. We will cover these amounts because of the apparent confusion with our budgeting and approval process. The amounts already incurred should be included in the RCRs discussed below.

2. As we discussed yesterday, the work associated with the billings in May was conducted without any RCR approval or any budget in place. As you know we terminated the two legislative retainers at the end of April. No RCRs were filed to cover the matters on which work was completed in May.

I did receive a budget on legislative matters on May 8. However, a decision was made only yesterday to proceed on a specific matter-by-matter basis; the work in May should not have been undertaken while we considered whether to proceed with an overall legislative budget or proceed with specific RCRs. In short, a proposed budget is not RCR approval.

3. In the future, any work undertaken by Goodin MacBride should only be conducted pursuant to an approved RCR. If an emergency arises--i.e., an issue arises that could not have been contemplated, then I should be contacted before completing any work. If I am unavailable, Jim Steffes should be contacted. If Jim is unavailable, then Rick Shapiro should be contacted. In this regard, I authorized Goodin MacBride to participate in the Direct Access coalition meetings taking place today and tomorrow. I also authorized Goodin MacBride to participate in a telephonic conference on the Calderon bill. To the maximum extent possible, I expect that Mike will include Leslie Lawner in future Direct Access meetings, legislative drafting efforts, etc.

4. If there is any confusion on whether there is RCR approval for a particular matter, I should be contacted before undertaking an assignment. If I am unavailable, Jim Steffes should be contacted. If Jim is unavailable, then Rick Shapiro should be contacted. I can be reached through my office line--503.464.7945, pager--888.916.2262, or cell phone 503.539.4733. I wear the pager at all times and respond immediately to messages left on the pager.

5. Today, Sandy is filing several RCRs for legislative support on Direct Access, Siting, Windfalls Profits, and the Global Settlement. They will be considered at next Monday's RCR conference call. If they are approved, Sandy will manage the Goodin MacBride assignments associated with Direct Access, Siting, and Windfalls Profits.

Jeff Dasovich will manage all work associated with the Global Settlement, whether it is legislative or not. This does not mean that Sandy cannot give assignments to Goodin MacBride; it simply means that before that work begins Jeff must approve the work.

This particular issue is a critical matter for our company. Jeff is involved in the strategy and business calls concerning this matter and is working on a daily basis with Jim Steffes, Rick Shapiro and Steve Kean to develop our position and advocate that position in the settlement discussions. We must ensure that our Sacramento efforts are fully coordinated with our strategy and business interests (as they develop through the settlement discussions). To avoid any confusion on the scope of Jeff's responsibility, I consider all legislation addressing the Edison MOU, any future MOUs with Sempra, and "Plan B," to be part of the Global Settlement.

Please contact me if you have any questions regarding any of the above. I recognize that Sacramento is a difficult environment and that there is substantial pressure on both of you. However, we are under an obligation to use our internal and external resources in the best and most cost-effective manner. The RCR process is designed to meet that responsibility.

Connell Press Conference

Sender	jmunoz@mcnallytemple.com
Recipients	['andybrwn@earthlink.net', 'abb@eslawfirm.com', 'cabaker@duke-energy.com']
File	dasovich-j/all_documents/12830.

State Controller Kathleen Connell held a press conference earlier today to discuss four aspects of the energy crisis: achievement of long-term energy contracts; price per megawatt-hour; property tax assessment of power plants; and possible anticipation of revenues in the coming year.

While she made mention of generators, her remarks were primarily comparing the Governor's plan, which is based upon three assumptions to the reality of the situation. The three assumptions are: success of long-term contracts; spot market prices and anticipated revenue. Specifically, she said:

In regards to long-term contracts, the Controller indicated that less than 1% of California's energy purchases are through long-term contracts compared to the anticipated 40%. In addition, most of these contracts are for prior to July 1 and after September 30. And most of the terms can be renegotiated if revenue bonds aren't approved. Governor assumes spot market prices will decrease to \$195/mwh this summer. Currently prices are higher than this, and there is no indication that they will drop. [Connell made mention of a \$533.2 million check made out to Mirant by the state for purchases in the spot market -- instead of through long term contracts. She also made mention of the Reliant purchase @ 1,900/mwh.] State may fall short \$4 billion (more or less) requiring Connell to re-lease "revenue anticipation notes in February to make up for shortfall. (These don't require approval by the legislature, and must be repaid within a year.) In her capacity at the State Board of Equalization she will hold a hearing in June to reassess property values at California's generating plants to ensure that generators are "paying their fair share" in taxes.

Below is a copy of a Dow Jones article on the event....

Thanks, Jean

-- Jean Munoz McNally Temple Associates, Inc. 916-447-8186 916-447-6326 (fx)

Calif Controller: State Behind On Long Term Contract Buys Updated: Monday, May 21, 2001 04:41 PM ET
LOS ANGELES (Dow Jones)--California State Controller Kathleen Connell said Monday that she anticipates the state will need to issue \$4 billion in revenue anticipation notes in February, because a \$13.4 billion revenue bond issue in mid-August will not be enough to cover power purchases.

The state is likely to spend more on spot market purchases than the administration has anticipated because the price of summer power will be higher than expected and because the state has secured fewer long-term contracts than expected, she said. "The administration projected we'd spend \$925 million for long-term contracts in the first six months (of 2001). We've now spent only \$36.4 million on long-term contracts of a total \$5.1 billion spent on energy purchases - less than 1%," Connell said.

It is unlikely that an additional \$890 million in long-term contracts will flow through her office in the next five weeks, Connell said.

Gov. Gray Davis' energy plan assumes that 32% of all power needs through 2001 will be met through long-term contracts, with 40% met by long-term power in the summer months, Connell said.

However, the state has not secured as many long-term contracts "as we would hope to see," and many of the contracts cover periods before July 1 or after Sept. 30, Connell said.

Connell said she had received 25 contracts with 17 generators thus far.

One of Davis' energy aides said that there were seven more contracts for=20 summer reliability and peaking power on their way to the controller's office. e.=20

He added that the controller was basing her evaluation on somewhat old=20 information, as there is a time delay between when deals are done and when= =20 the controller is notified.=20

"I don't doubt the controller is accurate in what she is seeing, but the=20 billing is done in arrears," Davis energy aide Joseph Fichera said on a=20 conference call. "For example, April contracts are billed by May 20."=20

The controller said her analysis reflects checks written as of May 17.=20

A \$5 billion rate increase approved last week for utilities may not provide= =20 adequate revenue to the CDWR, Connell said.=20

"We may be short as much as \$1.7 billion in revenues to cover the projected= =20 expenses of the CDWR," Connell said.=20

The state is now dipping below its cash flow into borrowable resources and= =20 will exhaust those resources by the end of August, making a timely revenue= =20 bond issue crucial, Connell said.=20

Connell added that she will hold hearings in June to determine whether=20 generating plants formerly owned by utilities are being assessed for proper= ty=20 taxes at an appropriate level.=20

"Given (the generators') record profits, we will review whether there needs= =20 to be an additional assessment," Connell said.=20

FW: SEC Probes Possible CFO Conflict at Enron

Sender	jeff.dasovich@enron.com
Recipients	['j..kean@enron.com', 'karen.denne@enron.com', 'pr <.palmer@enron.com']
File	dasovich-j/sent_items/1994.

FYI. Sure you've seen it, but just in case. Non-energy-related friend of mine emailed it to me.

Best, Jeff

<http://www.cfo.com>

CFO.com's Today in Finance

Monday, October 22, 2001 Related Party Crashers? SEC Looking Into Possible Conflict on Interest at Enron

By Stephen Taub

The Securities and Exchange Commission has requested that Enron provide information regarding certain related party transactions.

"We welcome this request," said Kenneth L. Lay, Enron chairman and CEO in a prepared statement. "We will cooperate fully with the SEC."

Enron, North America's biggest buyer and seller of natural gas and electricity, noted that its internal and external auditors and attorneys reviewed the related party arrangements, the Board was fully informed of and approved these arrangements, and they were disclosed in the company's SEC filings. "We believe everything that needed to be considered and done in connection with these transactions was considered and done," Lay added.

As we noted on Friday, a limited partnership organized by chief financial officer Andrew Fastow racked up millions of dollars since 1997 in profits from transactions conducted with the energy company, according to The Wall Street Journal. The partnership reportedly renegotiated the terms of deals with Enron in ways that boosted its financial positions or reduced its risk of losses.

REPORT: E&Y REVENUES NEARLY HALVED Later this week, Ernst & Young will announce that its revenue growth was nearly halved in the fiscal year ending June 30, according to the Financial Times.

Specifically, the Big 5 professional services firm will report that revenues rose by 7.2 percent to \$9.9 billion for the year. In fiscal 2000, revenues climbed by 14.1 percent, and by 13.5 percent the prior year.

The reason for the drop in revenue growth may be that E&Y fetches most of its business from the United States, and the U.S. economy tanked in the first half of this year.

"We have been successful this year, despite the economy and during a period of great challenge and change in our profession," chairman James Turley told the FT.

Rival Andersen has already reported that revenues rose 10 percent this year through August 31.

Another reason for E&Y's revenue retrenchment: the strong dollar. The firm is expected to announce that revenues increased 12.4 percent in local currency terms, according to the paper.

Turley told the FT that his clients are less focused on the longer term and are instead concentrating on watching expenses, cash management, debt covenant issues, and security concerns. "We're going to see more covenant violations and that will drive restructuring issues," Turley told the FT.

To: 123363@WCTOPICS.djnr.com cc: Subject: Telecom Services: Broadband Services: USA: Analysts still bullish on Enron broadband unit ...

USA: Analysts still bullish on Enron broadband unit prospects. By C. Bryson Hull

03/15/2001 Reuters English News Service (C) Reuters Limited 2001. HOUSTON, March 15 (Reuters) - Wall Street took a hard look at Enron Corp.'s content delivery plans this week after it ended its video-on-demand deal with Blockbuster Inc. , but remained largely unfazed by the failure of the flagship deal, analysts said on Thursday. On balance, most analysts viewed the busted 20-year exclusive agreement as disappointing, but by no means a fatal blow to Enron Broadband Services' (EBS) budding content delivery segment. Most reiterated buy or strong buy ratings for the Houston company and maintained bullish earnings targets for the Enron Broadband Services division. But all are awaiting an indication of how Enron will reconfigure the content delivery initiative. "I think Blockbuster represented kind of an anchor tenant for the broadband business, so they have lost a contract that was important," said Jeff Dietert, an analyst with Houston investment house Simmons and Co. Now EBS will have to pursue smaller contracts to make up the loss, which could mean a longer road to create as big a book of business, Dietert said. EBS executives have said they expect to have \$1 billion in total contracted business by the end of 2001. CHASING MORE CONTRACTS TO FILL VOID EBS Chairman and Chief Executive Officer Kenneth Rice on Friday said his division is already pursuing deals with content providers to send on-demand games, movies, music and television over the Enron network. UBS Warburg analyst Ronald Barone, in a research note released Monday, said he still believes Enron will hit the \$1 billion mark in 2001. "Though this announcement is clearly a disappointment we have a great deal of confidence in the judgment of Enron's senior management and of the upside associated with this business," Barone wrote. His report reiterated a strong buy recommendation and 12-month stock price target of \$102 a share, with EBS accounting for \$25 of that. One analyst remained skeptical of the content delivery plans. "Where they go from here is one of things they have to tell the market in a convincing fashion," said Commerzbank Securities analyst Andre Meade, who raised Enron to accumulate from hold on Thursday. But he also cut earnings targets for the EBS segment to \$8.40/share because of the failed Blockbuster deal. Heady cash-flow projections figured heavily in Enron's guidance for 2001, which called for a stock price of \$126, of which EBS would account for \$40, Meade said. Meade, whose company initiated coverage on Enron in late May 2000, had been alone among Enron analysts in keeping a hold rating on the stock. Merrill Lynch analyst Donato Eassey on Monday released a note reiterating his buy recommendation with a \$99/share price target. "While the separation from such a high-profile name is disappointing, we do not view this as negative," Eassey wrote. "This could in fact actually accelerate Enron's content delivery strategy." Eassey pointed out that Enron and Blockbuster's trial in Seattle, Salt Lake City, New York and Portland, Ore., proved Enron can deliver movies on demand. That gives them a track record to show to potential customers like movie studios and other entertainment concerns that want to provide content directly through their Web sites, he said. Enron's stock closed on Thursday at \$66.53, up \$3.78, compared with its 52-week range of \$59.99 to \$90.5626.

File	dasovich-j/all_documents/2641.

The trading floor needs to formulate a position on this first. When is your meeting Tom?

From: James D Steffes@ENRON on 10/24/2000 01:05 PM CDT To: Joe Hartsoe/Corp/Enron@ENRON, Mary Hain/HOU/ECT@ECT, Jeff Dasovich/NA/Enron@Enron, Susan J Mara/SFO/EES@EES cc: Tom Briggs/NA/Enron@Enron, Cynthia Sandherr/Corp/Enron@ENRON Subject: Cal-ISO Wants Pwr Generators To Forward Bid 70% -Sources

Can everyone help Tom respond within Congress to this message? Tom, also be forewarned that FERC intends to announce their "proposed remedies" on Nov 1 with about 15 days for response. We need you guys to be ready for

messaging this politically.

Jim

----- Forwarded by James D Steffes/NA/Enron on 10/24/2000 01:03 PM -----

Tom Briggs 10/24/2000 12:32 PM

To: James D Steffes/NA/Enron@Enron, Mary Hain/HOU/ECT@ECT cc: Subject: Cal-ISO Wants Pwr Generators To Forward Bid 70% -Sources

It seem sthat the Cal Iso has lost its mind. Cynthia and I have been trading phone calls with Bilbray's staff to schedule a meeting. In the event we can get one, can I have help rebutting this stuff. It seems that the England and Wales Pool, which effectively compelled 100% bidding in the day ahead market was still fraught with gaming between the day ahead market and the within day balancing market. ----- Forwarded by Tom Briggs/NA/Enron on 10/24/2000 11:22 AM -----

Cynthia Sandherr 10/24/2000 10:32 AM

To: Tom Briggs/NA/Enron@Enron cc: Subject: Cal-ISO Wants Pwr Generators To Forward Bid 70% -Sources

Tom: when we meet with Congressman Bilbray's staff, is this something we should bring up and have a position on....I would assume yes.....but wanted to close the loop..... --

Cal-ISO Wants Pwr Generators To Forward Bid 70% -Sources Copyright , 2000 Dow Jones & Company, Inc.

By JASON LEOPOLD Of DOW JONES NEWSWIRES

LOS ANGELES (Dow Jones)--The California Independent System Operator is expected to file a petition with federal regulators Friday seeking authority to force generators to bid 70% of their supply into the forward market in an effort to reduce wholesale power costs in the state, according to a source familiar with the issue.

An official with the state's Electricity Oversight Board confirmed the details of the filing.

The filing calls for FERC to set a "just and reasonable" rate for a large fraction of suppliers' capacity, while remaining supply would be able to earn market-based rates, according to the source.

In addition, major out-of-state generators would have to enter into forward contracts at FERC mandated rates for "a significant portion of their expected sales."

ISO Chairman and Chief Executive Terry Winter will hold a news conference Friday morning that will focus on possible solutions to lower wholesale energy costs. He is expected to announce how bidding into the forward market will stabilize high wholesale power costs.

The state's Public Utilities Commission is expected to make a similar filing with federal regulators in the near future, sources said.

In addition, forcing generators to bid into the forward market is a measure that would reduce market power in the state and would protect a majority of utilities served by the generators from the cost impact of market power, the ISO has said in prior meetings.

Market power is a term used by economists to describe how generators can influence power prices. According to an ISO report, market power occurred this past summer because tight power supply and concentration of generation ownership "allowed suppliers to be pivotal at relatively high demand periods."

About 50% to 60% of the power purchased this past summer was done in the spot market, an unusually high percentage, according to the ISO.

In order to mitigate market power, the filing calls for utilities to enter into two-year forward contracts with generators to shield against the daily market price fluctuations.

Regulatory constraints associated with forward contracting was a "key source of high (power) costs in the summer of 2000," according to an ISO report.

The ISO action will be taken without approval from a the grid operator's board of governors. Usually, a majority of the board is required to approve such an action.

EOB Official Surprised By ISO Action

The announcement of the ISO's expected filing came as a surprise to Gary Heath, executive director of the state's Electricity Oversight Board. Heath told Dow Jones Newswires he was aware of the filing and news conference.

"We're trying to find out what's behind this," Heath told Dow Jones Newswires. "We're not sure if they could do this without board approval. It came as a surprise."

Sources said the agency is holding the news conference in an attempt to eclipse imminent structural changes to the ISO expected to be proposed by the Federal Energy Regulatory Commission next month.

FERC launched an investigation into California's troubled power market this past summer based on allegations that the market isn't workably competitive and participants manipulate the market. Energy officials have blamed the ISO for this summer's power woes.

Sun Microsystems

Sender	karen.denne@enron.com
Recipients	['karen.denne@enron.com', 'janel.guerrero@enron.com', 'paul.kaufman@enron.com', 'james.steffes@enron.com']
File	dasovich-j/all_documents/10668.

Ken Lay put a call in today to Scott McNealy. His office called back to find out what specific bill included direct access. When I called back, they put me in touch with Mavis Toscano, who's in Sun Microsystems' state and local government affairs office. She's Scott's point person on public policy, and she's been working on the energy issue. Mavis had done some checking and no one had heard anything about direct access.

Sun is active in three main trade associations: the Chamber, the American Electronics Association (AEA) and Technet. None of those organizations said their members were asking for direct access, but Mavis promised to put calls in to them and get direct access on the radar screen. Although she said they're not inclined to send letters, Mavis said she'd make some calls into the legislators, specifically Bowen.

Contact info:

Mavis Toscano 901 San Antonio Road MS PAL 01-554 Palo Alto, CA 94303 650-336-7115 650-336-0835 - fax mavis.toscano@sun.com

Here's another direct access-related from the Riverside Press-Enterprise.

Power industry feels state's grip tightening Deregulation's hallmark right to choose a new power provider may disappear today. BY ROBERT T. GARRETT THE PRESS-ENTERPRISE SACRAMENTO Only a year or two after California lunged to the head of the pack in deregulating electricity, the state now seems headed in virtually the opposite direction: Government is in the driver's seat. By summer's end, the state may end up with more control of the electric industry than was true for several decades before a flawed deregulation plan was passed in 1996. Today, for example, the state Public Utilities Commission is expected to put an end to what was supposed to be a hallmark of the 1996 law -- the ability of residential and business customers to shop for a new electricity provider. In August, a new state Consumer Power and Conservation Financing Authority comes into being. It will be able to borrow \$5 billion to build or subsidize new power plants, make old ones cleaner and more efficient, and help homeowners and small businesses take energy-saving steps. At a Senate hearing Wednesday on the future shape of the electricity market, Democratic lawmakers, aides to Gov. Davis and consumer advocates spoke favorably of a strong state role in planning and coordinating the generation and transmission of electricity. "Never again will we embrace the free market," said David Freeman, Davis' leading energy adviser. ". . . We want something of a hybrid, (with) government restraints on market forces." But state Chamber of Commerce lobbyist Dominic DeMare said businesses fear policymakers are about to trample innovation and consumer choice. Also, the chamber's members want "the state out of the business of procuring electricity," he said. In January, the state began buying power for customers of California's three investor-owned utilities, which had been caught between soaring wholesale prices and capped retail prices. The state has signed \$43 billion in long-term contracts. But many witnesses at the Senate Energy Committee hearing extolled a greater role for the state than simply the buyer of last resort. Lenny Goldberg, a lobbyist for The Utility Reform Network, a consumer group, said the state should work toward permanent price caps on wholesale power, public ownership of all transmission lines, and regulation of retail prices that shields residents and small businesses from gyrating prices. Freeman, a long-time advocate of public power, said the long-term contracts and new state authority will help ensure a comfortable cushion of supply. "Then we can permit market forces . . . to play a vigorous role," he said. Sen. Debra Bowen, D-Marina del Rey, suggested the state should make sure its electricity supply always exceeds demand by 15 percent or more. Bowen said the price of building the extra generation could be considered insurance against blackouts and be spread across all customers in the state. The chamber's DeMare said he would prefer to leave decisions about new generation to the free market. "But are you willing to live with the results if the market does not come up with adequate supply," Bowen asked. "You can't have it both ways." Stuart Wilson, assistant

executive director of the California Municipal Utilities Association, warned that the state may bite off more than it can handle in trying to be a major power buyer, a regulator and a subsidizer of new power plants. "It's pretty complicated right now, and it's getting more complicated," Wilson said. ". . . We think it's pretty fraught with difficulty." Robert T. Garrett can be reached at (916) 445-9973 or by e-mail at rtgarrett@pe.com. Published 6/28/2001

Lawmakers debate efforts to save Edison: Competing bills range from a=20 straight bailout to purchase of transmission lines.=20 By Jim Sanders Bee Capitol Bureau (Published July 18, 2001)=20 Divided legislators began wrestling Tuesday with competing proposals to kee= p=20 one of California's largest private utilities, Southern California Edison,= =20 from going bankrupt.=20 Pressure is rising as Edison continues to struggle with more than \$3.5=20 billion in debt and a tentative plan by Gov. Gray Davis to buy the utility'= s=20 transmission lines for \$2.76 billion has attracted little support.=20 The question now is whether legislators will accept a modified version of t= he=20 governor's deal, will approve an entirely different rescue plan, or will=20 simply let Edison join Pacific Gas and Electric Co. in bankruptcy court.=20 "We're encouraged that at least there's activity and people are grappling= =20 with the issues," said John Fielder, an Edison senior vice president.=20 The Assembly's energy committee heard testimony on two of the competing=20 proposals Tuesday. The Senate's energy committee will take up the third pla= n=20 today.=20 The issue conceivably could be decided this week, since legislators are=20 scheduled to begin their summer recess Friday.=20 Of the three proposals under consideration, one would authorize state=20 purchase of Edison's transmission lines, one would provide an option to buy= ,=20 and one would simply tally Edison's debts and charge ratepayers to pay them= =20 off.=20 Some legislators favor doing nothing at all and letting a bankruptcy judge= =20 decide Edison's fate.=20 Steve Maviglio, a spokesman for Davis, said the Democratic governor support= s=20 anything that "comes close" to the tentative deal, hammered out in April, t= o=20 buy Edison's transmission lines.=20 Assemblyman Fred Keeley, D-Boulder Creek, and Assembly Speaker Robert=20 Hertzberg, D-Sherman Oaks, have proposed a rescue plan that would buy the= =20 lines at a lower price -- \$2.4 billion -- and would modify the governor's= =20 plan substantially.=20 Key elements of the bill would allow the state to buy Edison's hydroelectri= c=20 assets if the transmission-line sale falls through, allow businesses to=20 contract with private suppliers for electricity in 2003, and commit the sta= te=20 to paying only 70 cents of every dollar owed by Edison to power generators.= =20 The deal also would provide California with ownership or conservation=20 easements to more than 20,000 acres of land, and would require Edison to=20 increase its supply of alternative energy -- such as wind or solar. The=20 proposal is not expected to spark new rate hikes, Keeley said.=20 The Senate plan, like the Keeley-Hertzberg proposal, would require large an= d=20 medium businesses to pay down much of Edison's debts.=20

The Senate plan dedicates up to \$2.5 billion in large-user rates for debts involving banks and renewable energy sources known as "qualifying facilities." The plan, written by Sen. Byron Sher, D-Palo Alto, seeks to leave Edison with \$1 billion in debt from generators and marketers for the utility to work on its own. The Senate plan would give the state a five-year option to buy Edison transmission lines for book value -- about \$1.2 billion. Rather than provide conservation easements, the plan calls for Edison's environmentally sensitive acreage to be acquired by the state or a trust. Remaining parts of the proposal are similar to the governor's deal. A third proposal, pushed by several lawmakers, seeks to eliminate debt for Edison and PG&E. It would not involve transmission lines, conservation easements or other such elements. Advocates say Edison's debt stemmed largely from failed state regulatory policies, so the state should simply charge consumers a monthly fee to pay it off. "This is a straight bailout -- no hidden balls, no extras," said Assemblyman Rod Wright, D-Los Angeles. It is not yet known whether that monthly fee could fit within the existing rate structure. For homeowners, the amount is estimated at \$4 in the PG&E service area and \$2 within Edison's boundaries. Consumer groups are wary of the Edison rescue proposals, fearing the state will ultimately promise too much and get too little. "When a supermarket and dairy farmer both are forced to pay a 10-year bailout tax, the consumer pays more for milk," said Doug Heller of the Foundation for Taxpayer and Consumer Rights.

The Bee's Jim Sanders can be reached at (916) 326-5538 or jsanders@sacbee.com. Kevin Yamamura of The Bee Capitol Bureau contributed to this report.

PG&E sues state over seizure of long-term power contracts By Dale Kasler Bee Staff Writer (Published July 18, 2001) Reopening an old wound in California's energy crisis, Pacific Gas and Electric Co. has sued the state over a group of low-cost energy contracts seized almost six months ago by Gov. Gray Davis. The lawsuit, filed Monday in San Francisco Superior Court, stems from the collapse of the California Power Exchange and the state's entry into the power-buying business in January. PG&E and Southern California Edison had entered into a series of long-term purchase contracts through the exchange, a now-defunct market for buying and selling electricity. But as both utilities collapsed financially and the Power Exchange was clinging to life, the exchange seized the contracts and was about to auction them off for nonpayment of bills. That's when Davis stepped in. Using his emergency powers, the governor grabbed control of the contracts, saying he didn't want them resold at inflated prices. At the time, the exchange said the contracts were worth about \$1 billion, with PG&E's share set at \$348 million. But it's likely their value has fallen along with the spot market price of electricity. Back when the governor seized them, PG&E's contracts were for \$60 to \$130 a megawatt-hour. That was a bargain at the time, and made the contracts very valuable. Now that spot prices have plunged, those contracts are no longer such a great deal. PG&E's lawsuit didn't put a value on the contracts.

All I asked Eric to do was: ensure that there was an Enron contact if another complaint came in. find out from Alpert's office if we could call back a few of those who called to complain to find out what they perceived, correct the misperception, apologize.

From: Jeff Dasovich@ENRON on 03/19/2001 04:20 PM Sent by: Jeff Dasovich@ENRON To: Scott Govenar <sgovenar@govadv.com>, Eric Letke/DUB/EES@EES, Sandra McCubbin/NA/Enron@Enron, hgovonar@govadv.com, Susan J Mara/NA/Enron@ENRON, mpalmer@enron.com, Karen Denne/Corp/Enron@ENRON, Janel Guerrero/Corp/Enron@Enron, Paul Kaufman/PDX/ECT@ECT, Richard Shapiro/NA/Enron@Enron, James D Steffes/NA/Enron@Enron, Harry Kingerski/NA/Enron@Enron, MDay@GMSSR.com, ken@kdscommunications.com, Marty Sunde/HOU/EES@EES cc: Subject: Follow up with Alpert's Office

Thanks, Scott.

Scott/Hedy/Sandi/Bev: Erik Letke heads up the retail marketing effort underway in San Diego. Marty Sunde wants Alpert to have an EES commercial contact that she can talk to in the event she has further questions, etc., He'd like Erki to be the contact person. Erik could you copy your vitals (title, contact info) to Scott and Hedy Govenar and Sandi McCubbin so they can forward along to Alpert?

Erik, seems that it would be useful if the customer letters to Alpert could make the following points (folks please weigh in and add/subtract/modify if needed):

The customer's glad to have had the option to take Direct Access service from Enron because having the opportunity to take advantage of the offer has made the customer better off. Direct Access is an extremely important option that customers need, want and should have going forward. Any "solution" that the Legislature comes up with must therefore include the continuation of Direct Access for all customers. As such, the Legislature should immediately fix AB 1X to make sure that Direct Access remains a permanent fixture of California's energy strategy. Direct Access customers should not be forced to pay for DWR's power purchase costs, since Direct Access customers aren't benefitting from those purchases.

Best, Jeff

Scott Govenar <sgovenar@govadv.com> 03/19/2001 04:01 PM

To: Jeff Dasovich <jdasovic@enron.com> cc: Subject: Dede

As discussed, customers should send letters to Dede as follows:

The Honorable Dede Alpert California State Senate State Capitol, Room 5050 Sacramento, CA 95814

Interested companies should copy: "Honorable Members of the California State Legislature" and fax or mail me a copy for further distribution. My fax is (916) 448-0816 and my address is 1127 11th Street, Suite #400, Sacramento, CA 95814.

Scott

Power Online Newsletter -- <http://www.poweronline.com> Volume 3 Issue 80 Wednesday, August 23, 2000

Welcome to this issue of Power Online's (<http://www.poweronline.com>) electronic newsletter brought to you by VerticalNet. VerticalNet recently launched a new suite of capabilities for its Storefront customers. Among other things the suite includes an easier to navigate look and feel, and the ability to create an online catalog.

Based on customer comments, VerticalNet included in this update an expansion of its Virtual Office capabilities. The new features include enhanced reporting, greater "self-service," and fast access to information about other VerticalNet products and services--24 hours a day. In September, all Storefronts will be e-commerce enabled. To find out more and find out how you might qualify for a free, one-year Storefront, call Dale Baker, 215-361-9232, dbaker@verticalnet.com.

***** 3M SOLUTIONS *****

In response to customer requests, 3M has introduced a web-based version of its popular 3M Service Life Software. This software offers an easy method for estimating the service life of 3M gas and vapor respirator cartridges--for many organic as well as some inorganic contaminants. See <http://www.poweronline.com/ecommccenters/3m.html> for more details.

1) The Cansolv System Process: A new paradigm for SO₂ recovery and recycle The Cansolv System is an aqueous amine-based regenerative gas desulfurization process that promises SO₂ removal down to a few ppm. It is flexible, robust, easy to operate, and quickly responsive to changes in gas feed conditions. Potential uses include sulfuric acid plants, spent acid recovery plants, sulfide ore smelters, sulfur recovery units, flue gas desulfurization units, pulp mills, and SO₂ production, storage, and transportation. The first of three articles reviews the process itself.

Power firms held in contempt=20 By Emily Bazar Bee Capitol Bureau (Published June 29, 2001)=20 A special legislative committee investigating electricity price manipulation= n=20 voted Thursday to hold two power companies in contempt for refusing to turn= =20 over thousands of pages of documents.=20 By unanimously declaring Enron Corp. and Mirant in violation of its=20 subpoenas, the state Senate committee summoned powers that haven't been=20 invoked in the Legislature for more than 70 years.=20 As a result of the unusual move, power company executives could find=20 themselves facing jail time. Possible punishments include fines or the forc= ed=20 turnover of documents.=20 "There isn't a lot of legal precedent," said the chairman of the committee,= =20 Sen. Joe Dunn, D-Santa Ana, after the hearing. "Jailing an individual is an= =20 option, and we intend to preserve all of our options."=20 The committee is trying to determine whether electricity generators or=20 marketers have artificially inflated prices of wholesale electricity. Other= =20 state agencies, including the attorney general's office and the Public=20 Utilities Commission, also have initiated investigations.=20 Under the committee's 5-0 decision, Mirant and Enron have until July 10 to= =20 change course and turn over documents. If they do so, the contempt charges= =20 will be expunged. If not, the committee will forward its contempt findings = to=20 the full Senate, which will determine which punishments, if any, should be= =20 levied.=20 As part of its investigation, the committee began requesting documents from= =20 most generators in April. After receiving little or no response -- and=20 complaints from companies concerned about giving out proprietary informatio= n=20 -- the panel issued subpoenas to several companies June 11.=20 The subpoenas called for documents of all kinds, including those with=20 specific details -- prices, quantities and capacity -- of companies'=20 transactions in the state's wholesale electricity market. Telephone bills,= =20 e-mail messages and personal appointment books also were requested.=20 Many of those companies did not respond to the subpoenas until the deadline= =20 Thursday. Only two -- Dynegy Inc. and Reliant Energy Inc. -- actually=20 provided documents.=20 During the nearly four-hour meeting, Dunn interrupted the proceedings sever= al=20 times to announce that various letters or documents arrived moments before.= =20 For example, Dunn said midway through the hearing that Dynegy had just=20 delivered 18,603 documents to his Capitol office.=20 For those companies that didn't comply with the subpoena, but promised to= =20 deliver the necessary documents before July 10, the committee agreed to=20 withhold judgment until that date.=20 Robert Bittman, who represented Mirant at the hearing -- and was allowed to= =20 make a hasty phone call to the company in an attempt to avoid the contempt= =20 finding -- in the end was unable to adequately assure the senators that=20 Mirant would deliver all required documents before July 10.=20 After the hearing, Mirant spokesman Patrick Dorinson said the company will = do=20 everything it can before July 10 to resolve the dispute.=20 "What Mirant needs is assurance from the committee that the company-specifi= c=20 information in these documents doesn't find its way to some public forum=20 where it could be misused," he said.=20 Legislators were particularly irked by energy marketer Enron, which didn't= =20 send a representative to the hearing.=20 Instead, Enron delivered a letter to Dunn on Thursday questioning whether t= he=20 committee was violating the Federal Energy Regulatory Commission's=20 jurisdiction in its investigation.=20 "My great frustration here is getting a letter from Enron on the day the=20 (documents) are due explaining why we don't have jurisdiction," said Sen.= =20 Debra Bowen, D-Marina del Rey.=20 Rather than jail time, Bowen said she would like to see fines levied agains= t=20 companies that have violated the subpoenas.=20 The last time the Legislature held someone in contempt was 1929. The case= =20 involved a price-fixing conspiracy, but the commodity was concrete. Several= =20

officials from concrete companies were subpoenaed, but some declined to=20 testify or divulge documents to a Senate committee.=20

The Bee's Emily Bazar can be reached at (916) 326-5540 or ebazar@sacbee.com= .=20 =20

Edison's parent gets new cash By Dale Kasler Bee Staff Writer (Published June 29, 2001)=20 In a move that keeps creditors at bay for now, Southern California Edison's= =20 parent company obtained \$1.19 billion in fresh financing Thursday. But the= =20 troubled company had to pay a higher interest rate than it originally=20 expected, reflecting investors' anxieties about the state energy crisis.=20 The move doesn't affect the beleaguered Edison utility, which has been on t= he=20 verge of bankruptcy for months, but eases immediate financial stress on its= =20 parent Edison International.=20 The parent, through a newly created subsidiary called Mission Energy Holdin= g=20 Co., borrowed the funds at rates of up to 14 percent. That's one percentage= =20 point higher than Edison expected last week, according to Standard & Poor's= =20 Corp. The company had to restructure the deal because of investor=20 uncertainty, S&P said, and there was speculation by analysts the deal might= =20 get scrapped.=20 Even with the higher interest rate, the financing was a must-do for Edison= =20 International, said S&P analyst Richard Cortright Jr.=20 The proceeds will go to pay off numerous Edison International debts,=20 including a \$618 million bank loan due Saturday and \$250 million in bonds d= ue=20 July 18. The company has told the Securities and Exchange Commission that i= t=20 needed new financing "to meet its cash requirements."=20 The company paid a steep price for meeting those requirements. Legislative Weekly August 9, 2001 Issue 31, Volume 3

A weekly publication from the California Manufacturers & Technology Association detailing legislative and regulatory developments in Sacramento

ENERGY CASUALTY REPORT

CMTA's new Energy Casualty Report describes the impact of the massive electricity rate increase imposed on California business customers of PG&E and SCE. The rate increase went into effect June 1, and some customers are now receiving bills over 100% higher than the same time last year. This has led many to question their ability to continue doing business in California. Layoffs, canceled expansion plans, increased product prices and plant closures are already occurring. CMTA plans to issue the report on at least a monthly basis until further notice.

The Energy Casualty Report is available online at www.cmta.net. To include your story for future issues, contact Gino DiCaro at 916-441-5420.

ENVIRONMENTAL DISPATCH CONCEPT FOR BACKUP GENERATORS GETS TRACTION

In an effort to reduce the likelihood of blackouts, Assemblymember Dennis Hollingsworth (R-Murrieta) has introduced a measure, ABx2 60, to establish a voluntary program in which stationary and portable backup generators would be called upon to relieve load from the grid.

Under provisions of the bill, a customer voluntarily would register a stationary or portable backup generator for the program. The California Energy Resources Conservation and Development Commission (CEC), in cooperation with the investor-owned utilities, municipal utility districts and air districts would evaluate and rank these generators by level of oxides of nitrogen (NOx) and particulate matter (PM) emitted. The type of fuel on which the generator operates also would be considered in the following order: natural gas, liquefied petroleum gas, gasoline and diesel.

Participating operators would enter into agreements with investor-owned utilities or municipal utilities to provide energy to that utility when the Independent System Operator (ISO) determines that a blackout is imminent.

Upon such determination, utilities would contact participants, starting with the cleanest units first. Participants would be paid 20 cents per kilowatt hour regardless of whether the electricity produced was used to offset the electricity demands of the facility at which the generator is operated, or used to generate additional power for the utility.

ABX2 60 was heard by the Assembly Energy Costs and Availability Committee on July 16. At that hearing, a member of the committee expressed concern that the measure would unnecessarily increase air pollution. The author responded that the bill would have the opposite effect by targeting the cleanest burning generators to help prevent blackouts. He further stated that when a blackout does occur, all forms of backup generators are allowed to run, which could have a far more detrimental impact on air quality than dispatching cleaner-burning generators just prior to a blackout.

This measure is similar to the San Diego Gas and Electric Rolling Blackout Reduction Program, recently approved by the California Public Utilities Commission (PUC). Under the PUC order, backup generators may be called into service based on their fuel type during a Stage III alert.

Despite the virtual absence of blackouts during May, June and the first half of July, ABX2 60 passed the Assembly Energy Costs and Availability Committee (17-0). CMTA agrees that environmental dispatch is a reasonable short-term policy

given the tenuous balance between energy supply and demand. The bill will be heard in the Assembly Appropriations Committee when the Legislature reconvenes from its Summer Recess.

WORKERS' COMPENSATION BENEFITS BILL SET FOR HEARING

CMTA and other employer representatives attended a scheduled meeting with Legislative staffers representing the Assembly Insurance committee, Senate Labor and Industrial Relations committee and Senate President Pro Tempore, John Burton on August 2 to discuss SB 71 (Burton D-San Francisco), the so-called Workers' Compensation benefits bill. The purpose of the meeting was to provide employers with a verbal briefing on amendments to SB 71.

The meeting with employers was the last of several meetings held by staff with insurers, organized labor, applicant attorneys, medical providers, and others. No language was provided for the briefing and language is expected to be in print by the end of this week. The bill as amended is set to be heard in Assembly Insurance Committee on August 22 and a long and contentious hearing is expected. The main changes discussed in the meeting were:

Benefit Increases: The benefit increases (about \$2.8 billion) in SB 996 (Johnston) that were vetoed last year will be the basis for the benefit increases in SB 71. In addition, there will be an adjustment of the life pension, increasing the benefit from its 1996 levels in an amount equal to the increase in the statewide average weekly wage (SAWW) since 1996, and indexed annually to SAWW increases thereafter. Issues regarding phasing of benefits over time and in regards to system improvements are open for further discussion. **Commission Recommendations:** Staff agreed to adopt all substantive recommendations from the Commission on Safety and Health and Workers' Compensation (CSHWC) that were non-controversial verbatim. For details on the recommendations, go to the Commission's web site at <http://www.dir.ca.gov/CHSWC/chswc.html>. In addition, staff indicated that a one-year statute of limitations applicable to provider liens would also be added to the bill. **Medical Cost Control:** The focus of medical cost containment will be on the development of treatment guidelines within three years by the Industrial Medical Council. The guidelines will reference national standards (including best practices) but will likely not have to be based on them. The guidelines will be admissible before the Workers' Compensation Appeals Board (WCAB), but may not be sufficient to rebut the presumption for predesignated physicians. Obviously this will need further clarification as the process moves forward. **The Health Care Organization (HCO) program** will be retained, but additional quality of care reporting and surveillance by a yet to be determined entity will be required. More training will be required for treating physicians along with a system of tracking quality of care and utilization by treaters. **Treating Physician Presumption:** SB 996 language is included, which retains the presumption for predesignated physicians but repeals the presumption for all other treaters. This is clearly an open issue for many. It is also not clear whether the medical-legal changes in SB 996 will also be in the amended bill. **Administrative Issues:** The court administrator remains in the bill. In addition, there will be language easing the penalty problems associated with checks payable on demand and further facilitating electronic deposit of indemnity checks.

Obviously, many items of interest to employers did not make the list, such as objective medical evaluations, vocational rehabilitation and penalties under LC Sections 4650 and 5814, to name a few. Nor was insurers' desire to eliminate consultation services to insured employers and replace it with a puff safety education program (that CMTA opposes) discussed. And finally, the Director of the Department of Industrial Relations has not talked to the Legislative staffers about their interests in workers' compensation changes, so everyone is waiting for them to weigh in.

Clearly there are no significant changes proposed in SB 71 that would help offset the cost of increased benefit to employers and streamline the

Telecommunications Reports presents TR's State NewsWire February 1, 2001 A.M. Edition

STATES MISSOURI -- PSC declines to support SW Bell's market-entry bid IDAHO -- Senate confirms nomination of Hansen to PUC ILLINOIS -- Ameritech says business market is becoming more competitive WYOMING -- Senate to examine bill requiring PSC to regulate directory assistance MINN. -- Bill would authorize placement of commercial equipment on state property GEORGIA -- BellSouth and IDS Telcom dispute interconnection agreement UTAH -- Legislators take a look at using mobile phones while driving

LONG DISTANCE MISSOURI PSC declines to support SW Bell's market-entry bid

The Public Service Commission yesterday decided against supporting Southwestern Bell Telephone Co.'s efforts to obtain FCC permission provide in-region interLATA (local access and transport area) service in Missouri at this time, Commissioner Kelvin Simmons told TR. But the application could be supported if SW Bell addresses the PSC's concerns, he said. The PSC plans to deliberate on the request again as early as Feb. 6, although a final decision won't be issued at that time, Simmons said.

The PSC's concerns with SW Bell's request include pricing, interconnection agreements, access to network elements, unbundled local loops, and unbundled local transport. SW Bell intends to make changes in those areas, taking the PSC's concerns into consideration, and is confident that the PSC ultimately will approve the request, a SW Bell representative told TR. (Docket no. TO-99-227)

STATE & LOCAL GOVERNMENT IDAHO Senate confirms nomination of Hansen to PUC

The Senate unanimously has approved Gov. Dirk Kempthorne's (R.) nomination of Dennis S. Hansen (R.) to a second six-year term on the Public Utilities Commission. (1/17/01 a.m.) Hansen, who was first appointed to the commission by Gov. Phil Batt (R.), is also the PUC's president.

Before appointment to the commission, Hansen was an accountant with Monsanto Co. of Soda Springs and served in the state Senate from 1987 to 1995.

COMPETITIVE LOCAL ENTRY ILLINOIS Ameritech says business market is becoming more competitive

Ameritech-Illinois has asked the state Commerce Commission to reopen a 1998 case to allow the company to present additional information that demonstrates the growth of competition for business customers. In the 1998 case, Ameritech sought competitive classification of its business rates throughout the state and residential rates for 19 exchanges. In 1999 the ICC denied Ameritech's request, citing a lack of genuine competition.

Ameritech says the ICC should reopen the case's record because the company's total number of business lines in service has continued to decline in absolute numbers. Overall, Ameritech says, its total number of business lines in service has declined by about 7% in the last two years.

Ameritech says its new evidence relates only to the business services classification. The company notes that the growth in residential service competition in the 19 downstate exchanges has been "less robust."

An ICC spokesman noted that Ameritech holds 93% of all access lines in its Illinois service territory. (Docket no. 98-0860 - Illinois Commerce Commission vs. Illinois Bell Telephone Co., Investigation into specified competitive tariffs to determine proper classification of the tariffs and to determine whether refunds are appropriate)

FUTURE OF REGULATION WYOMING Senate to examine bill requiring PSC to regulate directory assistance

The Senate Corporations, Elections, and Political Subdivisions Committee has received a bill that would require the Public Service Commission to regulate directory assistance services under certain circumstances. HB 51 would authorize the commission to require local exchange carriers to make their listing information available to other directory service providers.

The Joint Corporations, Elections, and Political Subdivisions Committee drafted the bill during the interim session. The legislative staff explained to TR that the measure was prompted by an incident in which a local company was unable to reach an agreement with Qwest Corp. over directory assistance rates.

Because of the dispute between the companies, customers' names weren't included in the Qwest phone book, the staff said. The PSC has no authority to regulate directory assistance service, which was deregulated by the Wyoming Telecommunications Act of 1995. (10/16/00 a.m.)

The legislative staff said the bill could be discussed Feb. 6, at the earliest.

WIRELESS MINNESOTA Bill would authorize placement of commercial equipment on state property

The House Governmental Operations and Veterans Affairs Policy Committee is considering a bill to allow commercial wireless equipment to be placed on state-owned lands, buildings, and other structures.

State agencies either would have to (1) charge a site use fee for the value of the property or structure on which the equipment were placed or (2) accept improvements to state-owned communications system facilities or services provided by a commercial wireless service provider.

Rep. Thomas Bakk (D., District 6A) introduced HF 429.

SECTION 251/252 GEORGIA BellSouth and IDS Telcom dispute interconnection agreement

BellSouth Telecommunications, Inc., and IDS Telcom LLC are clashing over several issues as they shape their new interconnection agreement. IDS recently asked the Public Service Commission to arbitrate the agreement.

One contentious issue is whether BellSouth should be permitted to use the interconnection agreement to restrict its liability for negligent acts and to require indemnification from IDS for negligence on BellSouth's part that damages IDS customers. BellSouth maintains that liability for both companies should be restricted to a credit covering the expense of the services or functions performed improperly. Meanwhile, IDS argues that no restrictions should exist on liability or indemnification. BellSouth has agreed to exceptions for gross negligence, fraudulent misrepresentation, and willful or wanton misconduct, but the company won't concede to IDS' proposed exceptions for negligence or negligent misrepresentation.

BellSouth and IDS also are disputing the issue of whether BellSouth must offer combined network elements if the elements typically are combined in BellSouth's network but aren't combined already at the location requested by IDS. BellSouth says it will offer IDS combined network elements in accordance with the guidelines laid out in the federal Telecommunications Act of 1996 and other applicable rules. IDS argues that BellSouth should be required to provide IDS with combined network elements if those elements ordinarily are combined in BellSouth's network, regardless of whether the elements already are combined at the location in question. (Docket no. 13318-U, In the Matter of Petition for Arbitration of IDS Telcom, LLC, Pursuant to Section 252(B) of the Communications Act of 1934)

WIRELESS UTAH Legislators take a look at using mobile phones while driving

Rep. Kory Holdaway (R., District 34) has introduced HB 182 to ban drivers from using a telephone, computer, or fax machine while driving on a highway. The measure wouldn't apply to emergency and law enforcement personnel acting in their official capacity, any person during a medical emergency, or any person reporting a safety hazard.

Violators would be guilty of an infraction. HB 182 awaits consideration by the House Transportation Committee.

Well, the time has arrived for me to let you know what is in store for everyone at the next Government Affairs department meeting on Thursday, June 14. The meeting will take place at:

The Omni Interlocken 500 Interlocken Blvd. Broomfield, Colorado 80021 Phone# 303-438-6600 Fax# 303-464-3252
Check-in time 3:00 p.m. Check-out time 12:00 p.m. (Noon)

The Government Affairs meeting will take place on Thursday, June 14 and will begin at 8:00 am and will conclude by 11:30 am. I have arranged for box lunches to be served after the meeting. After the meeting, we will have the remainder of the day for some fun activities, along with a buffet dinner served that evening to complete the day (on-site dinner location TBD).

Block of Rooms - A block of rooms have been reserved for Government Affairs. I will be turning in a rooming list to the hotel next week so, I would like to know by Friday, April 27 your plans to attend the meeting.

Shuttle Service - See attachment for shuttle times. Please note, a return reservation from the hotel to the airport is required. Please contact the Concierge to arrange for shuttle service.

Colorado Weather - For the month of June, you can expect the following: High's - 80.....Low's - 52

Flights from Houston - I have checked with TAP for roundtrip flights from Houston - Denver, Denver - Houston and an exceptionally great (non-refundable) fare of \$190.94 is available. However, fares are not guaranteed until actually booked. Let's book early!!!!

The activities to choose from are as follows: Please let me know by May 4 your choice of activity!!!!

Whitewater Rafting - A bus will leave the Omni Interlocken Resort at 2:00pm to head for an afternoon of exciting adventure on Colorado's Clear Creek. The Arkansas River is one of the most popular whitewater adventures anywhere, combining spectacular scenery and action packed rapids. Teamwork is the name of the game as your team paddles down these tumbling cascades. Continuous class III and IV rapids will thrill guests throughout the run. Drop over Nomad, surge through the Phoenix Holes and take on the class IV climax, the Outer Limits. Good physical condition and the ability to swim are recommended. The group will have three thrilling hours on the river and will return to the Omni by 6:15pm.

Chautauqua Park Hiking Adventure - One of the most popular access points for mountain hiking trails in Boulder is Chautauqua Park. The focal point is the 100-year-old dining hall. The Colorado Chautauqua is one of only four of the original Chautauquas still operating in America, as opposed to when thousands dotted the nation and culturally enriched rural people in the early 1900s. The tour includes: transportation, professional guide service, two hours of guided hiking - total time for excursion is 4 hours. (Dress code: Shorts or hiking attire, appropriate footwear, sunglasses, sunscreen and hats). Departure time and return will be relayed at a later date.

Spa Services - The Spa at Omni Interlocken Resort offers a number of spa services (massages, facial & skin care treatments, body treatments or nail services, to name a few). If you are interested in this as an activity, please let me know and I will fax a detailed list of their services. You will need to call the spa and schedule your own appointment if this is the activity you choose.

Golf - For the golf enthusiasts, an afternoon of golf at the Omni Interlocken 27-hole championship golf course which stretches out over 300 acres of verdant fairways is another activity to select from. Spectacular panoramic views from three 9-hole courses, which feature more than 400 feet in elevation changes. If this is the activity of choice please respond via e:mail and I will add you to the list. The game of choice will be "best ball" play.

Biking - Scenic bike paths are located near the hotel for those with interest. If this is your choice of activity, please let me know and I will reserve a bike and map for you enjoyment.

After reviewing the choices above, please select an activity you prefer to take part in. Due to the fact that our group is so large, (which makes it more difficult to coordinate activities) once you select an activity, we ask that you not change your selection. So, please talk to your colleagues ahead of time before making your choice.

Thanks and don't hesitate to call me if you have any questions.

The Price Institute Gives a Boost to Lester Center Entrepreneurship

Sender	owner-eveningmba@haas.berkeley.edu
Recipients	['haasnewswire@haas.berkeley.edu']
File	dasovich-j/all_documents/1558.

Haas NewsWire September 18, 2000

CONTENTS

The Price Institute Gives a Boost to Lester Center Entrepreneurship Programs Knowledge and the Web: The Future of the New Economy The Third of Four New Faculty Profiles: Mark Seasholes New Career Center Director: Abby Scott Haas in the News Happening at Haas Haas Celebrations

THE PRICE INSTITUTE GIVES A BOOST TO LESTER CENTER ENTREPRENEURSHIP PROGRAMS The Price Institute, a longtime supporter of the Lester Center for Entrepreneurship & Innovation, has made a long-term commitment

to the Lester Center in the form of a \$750,000 gift. The money will be received over the next five years and will support the Harold Price Entrepreneurial Leadership Program, which supports the Entrepreneurs Association and its affiliated programs: the Partners for Entrepreneurial Leadership (PEL), the Berkeley Solutions Group, the venture capital internships, and other student programs.

"The Lester Center and the Haas School are very pleased with the leadership and support provided by the Price Institute and its president, Gloria Appel," says Jerry Engel, executive director of the Lester Center for Entrepreneurship and Innovation. "The Price Institute has always been interested in our students and the fine entrepreneurial experience we strive to create for them. They have been there as our partner for over a decade."

The Price Institute has been awarding fellowships to selected Haas School first-year MBA students since 1986 to recognize their entrepreneurial aspirations and development. Two \$5,000 Price Institute Fellowship awards, administered by the Lester Center for Entrepreneurship and Innovation, are awarded each year to eligible students interested in an entrepreneurial career.

Through the years, the institute has given programmatic funding, which to date totals close to \$800,000. The institute has pledged to raise its total donation to more than \$1,300,000 by the year 2004.

Founded in 1979 by Harold Price, the Price Institute is nationally known for its support and development of entrepreneurship.

KNOWLEDGE AND THE WEB: THE FUTURE OF THE NEW ECONOMY Most people doing business today have had to deal with issues of intellectual property and knowledge creation--and if that business is on the web, these issues come up at light speed. The Haas School will delve into these issues as part of a larger discussion of knowledge at the upcoming Fourth Annual Knowledge Forum.

The conference, "Creating and Exploiting Knowledge Assets in the Internet-enabled Economy," will take place at Haas on September 29 in the Arthur Andersen Auditorium.

The lineup of distinguished scholars and industry leaders includes Ikujiro Nonaka, Xerox Distinguished Professor in Knowledge at the Haas School of Business; Roger Siboni, BS 76, CEO of E.piphany and chair of the Dean's Advisory Board; Sabeer Bhatia, founder of Hotmail and CEO of Arzoo.com; and David Teece, Mitsubishi Bank Professor of International Business and Finance and director of the Institute for Management, Innovation, and Organization.?

Joining Nonaka and Bhatia in the afternoon session on "Leadership for Knowledge Based Innovation" will be Kei-ichi Enoki of NTT DoCoMo, Japan's leading mobile phone company.? In May, Enoki was named one of the 25 leaders in e-business by Business Week for his push to create i-mode, a mobile net-access service in Japan that now has 6 million users.? Teece will close the conference by moderating a panel on "Value Creation in the New Economy."

The forum registration fee is \$100 and includes lunch and conference materials.? Register by phone at 510-642-4041 or send e-mail to conference@haas.berkeley.edu.? Haas faculty and students may attend the knowledge forum lectures free of charge, but they must call or e-mail to reserve a space.? For more information, visit the Knowledge Forum web site at <http://www.haas.berkeley.edu/~imio/knowledge/index2000.htm> or call 510-642-4041.

THE THIRD OF FOUR NEW FACULTY PROFILES: MARK SEASHOLES Fresh out of Harvard with a Ph.D. in economics, Assistant Professor Mark Seasholes also brings a wealth of previous experience to the Finance Group at Haas. Seasholes held analyst and consulting jobs on Wall Street, in London, and in Warsaw before returning to school for his Ph.D. He holds an undergraduate degree in physics from Wesleyan University.

Seasholes studies international equity markets and is interested in the relationship between cross-border flows and local market prices. Next semester he will be teaching two sections of introductory finance for undergraduates.

Seasholes can be reached at 642-3421 or via e-mail at mss@haas.berkeley.edu. His office is at F694.

NEW DIRECTOR OF CAREER SERVICES Abby Scott, the new director of the Chetkovich Career Center at Haas, joins Haas after ten years of working in technology companies and earning her MBA at Kellogg. As she puts it, she hopes to bring a "different perspective with a practical, hands-on approach" to career services at Haas.

Abby is responsible for managing the many different career development services provided to MBA students and setting strategic direction for relationships with employers. Abby most recently worked in new product development at Embark.com, and before that as brand manager at Intel.

Abby's office is located in the Career Center, S420E. She can be reached via e-mail at ascott@haas.berkeley.edu or at 643-4520.

Also joining the Career Center staff is Jocelyn Newman, the new recruiting coordinator.? Jocelyn worked in career services while she was a student at UC Santa Barbara.? Jocelyn is located in the Recruitment Center in S330. Her e-mail is newman@haas.berkeley.edu or she can be reached at 643-0344.

HAAS IN THE NEWS Severin Borenstein, the E.T. Grether Professor in Public Policy and Business Administration and director of the University of California Energy Institute, was quoted in the September 18 edition of the San Francisco Chronicle on the causes of California's high gasoline prices. He attributes the chronically high price of gasoline to the high oil prices and a tight refining market in California.

Borenstein was also quoted in an article on the front page of The New York Times business section September 15 discussing the problems that electricity deregulation has run into and arguing for the need for real-time retail pricing.

"Contemporary Philanthropy," a course taught by Fran Van Loo, associate professor in the Business & Public Policy Group and the Economic Analysis & Policy Group and chair of the Public and Nonprofit Management Program, was mentioned in the lead of Peter Sinton's San Francisco Chronicle column titled "Charity Begins on the Net" on September 13. Read the entire column at <http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2000/09/13/B089423.DTL&type=business>

An interview with Dean Tyson was posted on Business Week on September 12. The video clip can be found at <http://www.businessweek.com/bschools/video/index.htm>.

Van Loo's course, "Contemporary Philanthropy" was also mentioned in the Cheers and Jeers section of the Sacramento Bee on September 12.

David Levine, associate professor in the Economic Analysis and Policy Group and the Organizational Behavior Group, was quoted on CNET.com on September 12 in the article, "Telecom companies go dot-com with options grants." Levine explained that consolidation and new executive leadership have spawned efforts to foster updated cultures in the communications industry. Read the entire article at <http://news.cnet.com/news/0-1004-200-2759859.html?tag=st.ne.1004.saslnk.saseml>.

BODY:

???State Controller Kathleen Connell released details about four of California's short-term contracts with power companies Monday, a move the governor's office said could drive up wholesale energy prices.

??Democratic Gov. Gray Davis for months refused to release details of long-term contracts the state had signed with electricity providers, saying the documents needed to remain secret. He released 38 of the contracts in June, with key portions blacked out.

??A judge ordered that the long-term contracts be released in their entirety after several news organizations sued, including The Associated Press.

??But the four short-term contracts Connell released Monday along with the long-term contracts were not part of the judge's mandate. The contracts reveal the state's strategy for making day-to-day purchases, said Steve Maviglio, spokesman for Davis. He said revealing the strategy could lead to higher wholesale prices.

??"It shows the irresponsibility of the controller and every California who gets a higher electricity bill can thank Kathleen Connell," Maviglio said.

??Connell said the judge heard all the evidence before ordering the complete contracts released and "there is no reason that information should raise prices. Today's prices aren't going to be affected by prices engineered several months ago."

??But generators can use that information to time their sales and drive up their prices, said Oscar Hidalgo, spokesman for the Department of Water Resources.

??"We still feel that those will hinder our leverage in gaining reasonably priced power on the spot market," he said "It shows our position on the daily spot market and what we're willing to pay," he said.

??Some state officials have criticized the long-term deals most of which are 10 years saying they are too long.

??By signing long-term contracts including 41 deals with 27 power generators worth about \$43 billion the state could get burned if energy prices go down, said Public Utilities Commissioner Richard Bills.

HEADLINE: Tourists to California just roll with the outages

BYLINE: By Jasmine Kripalani

BODY:

??SAN FRANCISCO _ Tourists are constantly asking the gift shop manager at Coit Tower if a blackout could occur while they ride the elevator to the top of the 210-foot fire hose nozzle-shaped landmark.

??"They're serious when they ask it. I always tell 'em, 'We got the last guy out in only three days,' " said Walt Lo.

??Tour guides, hotel managers and gift shop clerks in the Bay Area have developed a sense of humor about the California energy crisis. But for many visitors the perception of blackouts conjures up images of streets without traffic lights and people trapped in elevators.

??Before leaving their Indiana suburb for vacation, Mike and Lisa Bonahoom worried about what was ahead, but not enough to stop them from booking a three-night stay at the room designed by former Grateful Dead frontman Jerry Garcia in the Hotel Triton.

??"The perception in the Midwest is that (Californians) don't have lights," said Mike Bonahoom.

??Lisa, added: "We heard news reports that they shut the lights off every day (at a set time) in order to save electricity, and people would plan their day around that. I worried about getting stuck in an elevator for hours, but I didn't mention any of this to the kids."

??It's a fear California's travel and tourism commission is taking so seriously that it has handed a public relations firm about a half-million dollars to plan an advertising campaign that will convince the rest of the world that it's still safe to travel to the Golden State.

??Communications director Fred Sater blames visitors' fears on the

Economy Utilities Make Own Plans for CO2 Curbs --- Entergy Sets Emissions Cap As Bush Climate Policy Remains to Be Resolved By John J. Fialka Staff Reporter of The Wall Street Journal

05/04/2001 The Wall Street Journal A2 (Copyright (c) 2001, Dow Jones & Company, Inc.)

WASHINGTON -- Some major U.S. utilities are beginning to step out ahead of the Bush administration on the climate-change issue, developing their own plans for curbing emissions of carbon dioxide, the man-made gas thought to

be contributing to global warming. Meanwhile, the White House is under growing pressure to demonstrate that its plans to boost energy production can be environmentally sensitive. President Bush signed an executive order requiring the federal government to conserve energy during periods of peak demand in California and other places facing energy shortages. Mr. Bush also said the federal government would make available power generators in case of emergencies. "Conservation has got to be an integral part of making sure we've got a reasonable energy policy," Mr. Bush said. New Orleans-based Entergy Corp., the nation's third largest utility in terms of electricity produced, said that it will impose a limit on CO2 from its 25 power plants that burn natural gas, oil or coal and stay within that level of emissions for five years. "We understand that this is a very politically contentious subject," said company Vice President Jim Mutch. "If other companies do their fair share now, hopefully when there is a regulatory scheme, there will be less of a problem." By running its plants with greater efficiency, improving the efficiency of its electricity and gas transmission systems and engaging in some outside CO2 reduction efforts, such as planting trees that absorb the gases, Entergy hopes to keep its overall CO2 emissions at 50 million tons per year, Mr. Mutch said. The company, which derives 61% of its power from fossil fuels, will work with the New York-based group Environmental Defense, to make sure its efforts are effective and measurable. Meanwhile, a coalition of five other electric power companies is calling for a mandatory cap on CO2 emissions that would decline annually, if the Bush administration develops a national emissions trading system that allows a company to decide which technologies to use to reduce CO2 and other pollutants. "We're basically planning on a glide path downward" regarding emissions limits, explained Mark Irion, a spokesman for the group, which includes Enron Corp. and El Paso Energy Corp. of Houston; Calpine Corp. of San Jose, Calif.; Trigen Energy Corp. of White Plains, N.Y.; and NiSource Inc. of Merrillville, Ind. Emissions trading gives companies incentives to introduce new technology, Mr. Irion said. Under the trading scheme, which is used currently to address sulfur-dioxide pollution, a company that reduces emissions below its target level gets trading credits that it can sell to other companies, thus helping to offset the costs of new capital investment. Sulfur dioxide plays a major role in acid rain. The announcements come as the entire U.S. utility industry, which produces about a third of the nation's man-made CO2, is engaged in behind-the-scenes negotiations with the White House energy task force headed by Vice President Cheney over how to set up a meaningful, voluntary system for reducing CO2 nationwide. Meanwhile, private utilities, federally owned entities such as the Tennessee Valley Authority, and rural electric cooperatives are trying to develop an industry consensus on a voluntary program. According to one industry official involved in both discussions, who asked not to be identified, one idea of interest to the task force involves voluntary contracts that power companies would make with the government calling for CO2 emissions cuts. Once signed, the contract's target reductions would become mandatory. Called a "soft cap" program, it could become part of the U.S. position for the next round of international climate-change talks, slated for Bonn, Germany, in July. "We have only recently begun to engage the administration," said the official. Since March when the Bush administration aroused a furor among environmental groups and European allies by announcing it was no longer interested in the Kyoto Protocol to curb climate change, it has held a series of cabinet-level seminars on climate change, bringing in industry experts and a variety of government and outside scientists. President Bush will need to have some outline of a new U.S. climate-change policy by next month when he goes to Sweden for a summit with leaders of the European Union. "We're well aware of the calendar," said one U.S. official. Tom Kuhn, president of the Edison Electric Institute, a trade association here that represents private-sector utilities, said "I think the [Bush] administration is definitely interested in things that they can do to address this issue." He noted, however, that it is too early for a industry-government consensus on CO2 reduction. "Nobody's agreed upon specifics." Bob Davis contributed to this article.

Metro Desk California and the West Secretary of Energy, Davis Meet on U.S. Plan to Boost Conservation Crisis: Federal buildings and military bases, accounting for 1.5% of state's usage, will cut back. RICHARD SIMON; DAN MORAIN TIMES STAFF WRITERS

05/04/2001 Los Angeles Times Home Edition A-3 Copyright 2001 / The Times Mirror Company

SACRAMENTO -- In a visit meant to underscore the Bush administration's heightened concern about the California electricity crisis, Secretary of Energy Spencer Abraham met Thursday with Gov. Gray Davis in Sacramento to discuss federal energy conservation plans. "I think we have an approach that can result in significant savings," Abraham told Davis. The energy secretary said he was in California "to gauge what we can do to add to what California is already doing." The trip came after President Bush revealed plans for a series of conservation measures for federal buildings and military bases nationwide. Those facilities in California account for 1.5% of the state's total energy use. Today, Abraham is scheduled to meet with federal officials in San

I am cheered to see Dow Jones reporting on the ISO's illegal practices. Below are some CAISO citations I found that forbid the ISO from making OOM purchases from CDWR. Interestingly, the ISO's OOM purchases would constitute "gaming" under the CAISO tariff's Market Monitoring and Information Protocol (MMIP). We should consider having IEP request that the Market Monitoring division of the ISO investigate whether the ISO is in violation of its Tariff. Perhaps the ISO would acknowledge its errors; more likely not, but such action would only give more evidence to FERC that the ISO's governing board lacks independence.

CAISO Tariff Section 2.5.8:

"The ISO shall operate a competitive Day-ahead and Hour-Ahead market to procure Ancillary Services. It shall purchase Ancillary Services capacity at least cost to End-Use Customers consistent with maintaining system reliability. . . ."

CAISO Tariff Section 2.5.1:

". . . Those Ancillary Services which the ISO requires to be available but which are not being self provided will be competitively procured by the ISO from Scheduling Coordinators in the Day-ahead Market, the Hour-Ahead Market and in real time or by longer term contracts.

CAISO Tariff Section 2.5.12(a):

"The ISO shall not differentiate between bidders other than through price and capability to provide the [ancillary] service, and the required locational mix of services;. . . ."

CAISO Dispatch Protocol sections:

DP 8.1.1 "During real time Dispatch, the ISO will be responsible for dispatching Generating Units, Curtailable Demands and Interconnection schedules to meet real time imbalances between actual and scheduled Demand and Generation and to relieve Congestions, if necessary, to ensure System Reliability and to maintain Applicable Reliability Crister.

DP 8.2. "To achieve this, the ISO Control Center will utilize the merit order stack of available resources prepared pursuant to the SP through BEEP."

DP 8.6.3 (c): "the ISO shall select the Generating Units, Curtailable Demands and Interconnection schedules to be dispatched to meet its balancing Energy requirements based on the merit order stack of Energy bid prices produced by BEEP;"

DP 10.2.3 (b) "The ISO will not intervene in the operation of the Day-Ahead Market unless there has been a total or major collapse of the ISO Controlled Grid and the ISO is in the process of restoring it."

CAISO's Operating Procedures for Balancing Energy and Ex-Post Pricing, Section 2.2, Out of Market Request Log Example:

"This type of request [OOM purchase---sch] should not be used unless there is a valid reason, such as system emergency or rapidly deteriorating system conditions. It is important that ALL information be logged, including the reason this Generating Unit was chosen over other Generating Units."

ISO Market Monitoring and Information Protocol (MMIP)

MMIP 1.3.1: "The MMIP applies to. . . The ISO."

Practices Subject to Scrutiny: MMIP 2.1.1.3: "unusual trades or transactions;" MMIP 2.1.1.4: "pricing and bidding patterns that are inconsistent with prevailing supply and demand conditions,. . ." MMIP 2.1.2: "Where Generating Units are determined by the ISO to be Reliability Must-Run Units, circumstances indicate that such Generating Units are being operated in a manner that will adversely affect the competitive nature and efficient workings of the ISO Markets." [The Mohave Ramp-down might fall under this prohibition.] MMIP 2.1.3 "Gaming," or taking unfair advantage of the rules and procedures set forth in the PX or ISO Tariffs, Protocols or Activity Rules,. . .to the detriment of the efficiency of, and consumers in, the ISO Markets.

what I mentioned.

Also, during the meeting (and during next Tues' FERC call) I mentioned that we need more info from companies for pursuing a complaint. We have some other elements now with these articles. We've also asked to meet with price waterhouse coopers on the CAISO audit (Alan called about that & we've traded voicemail.)

Things will get pretty curious.

Physical Bandwidth Delivery Varies Among Market-Makers By Erwin Seba Of DOW JONES NEWSWIREs

04/12/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Two market-makers in the nascent bandwidth trading arena describe widely divergent levels of physical delivery to their customers. While Enron Corp. (ENE) said almost all of its trades go to physical delivery, an executive with Aquila Broadband Services, a unit of Utilicorp United Inc. (UCU), said only 10% of its deals go to physical delivery. The question of physical delivery is important because analysts and especially carriers question the accuracy of prices in the bandwidth market. While none of the critics want to be quoted, they alleged that the bandwidth market consists only of companies like Enron and Aquila swapping capacity among themselves, then settling their deals financially without delivering bandwidth. Though trading companies disagree on the number of deals going to physical delivery, they all describe huge growth in the number of transactions they have done in the first three months of this year. "In the first quarter of this year, we've well surpassed the number of trades we did in all of last year," said Shelly Mansfield, director of media relations for Enron Broadband Services, a unit of Enron. Enron did 321 trades last year. Aquila Broadband Services told Dow Jones Newswires that the number of trades it did in the first quarter this year was more than triple the number it did all of last year. In the first quarter, Aquila did 150 to 200 trades, said Sushil Nelson, senior vice president and general manager. The company did fewer than 50 trades in all of last year. About 10% of last year's trades required physical delivery of bandwidth, Nelson said. Only trades done last year would gone to physical delivery in the first quarter of this year, he said. He expects a lower percentage of this year's trades to go to physical delivery. "Right now the bandwidth market is akin to a futures market," Nelson said. "It's acting like a futures market in that it is pointing where the price should be."

Market Physical, Not Financial, Enron Says

In contrast, Enron's Mansfield said most of its trades require physical delivery. "There isn't a financial market in bandwidth," she said. "There's no index that can be settled against. Almost all go to delivery. We're definitely in a physical market." Aquila traded with 11 counterparties last year and five were other bandwidth-trading companies, Nelson said. It also traded with three major carriers and three local loop providers. In contrast, Enron said that last year it traded with 45 counterparties - 35% of them U.S. carriers and 33% network service providers. The rest were marketers, resellers or international companies. Mansfield declined to provide the number of trades Enron did in the first three months of this year. The company would give more information next week when it releases quarterly earnings and performance statistics, she said. El Paso Corp.'s (EPG) Global Networks declined to say how many of its trades required physical delivery. A

spokesman did say the number of route miles it has traded in the first quarter tripled over the fourth quarter. A Williams Communications Group (WCG) spokeswoman would say only that bandwidth trading is profitable for the company. Other bandwidth-trading companies were unable to provide information in time for this report. -By Erwin Seba, Dow Jones Newswires, 713-547-9214 erwin.seba@dowjones.com

USA: UPDATE 1-U.S. must embrace energy efficiency-report. By Matthew Robinson

04/12/2001 Reuters English News Service (C) Reuters Limited 2001.

NEW YORK, April 12 (Reuters) - The United States must adopt new conservation measures such as improved vehicle fuel efficiency if it is to ease its energy supply woes, a new report from an independent task force said on Thursday. The Bush administration's plan to increase domestic energy supplies is not enough to tackle a squeeze that has sent gasoline and heating oil costs soaring and pushed California's power system to the brink of collapse, the task force organized by the the Council on Foreign Relations (CFR) and the Baker Institute of Rice University said. "You can't have a supply side response without also taking into account a demand side effort, as well as environmental concerns. A compromise will result not in an inconsistent policy, but rather, is the only way to create a fully consistent policy," said Edward Morse, chairman of the task force and executive advisor of Hess Energy Trading Co. Oil and energy firms such as Royal Dutch/Shell , Chevron , BP Amoco ,Enron , Dynergy and Italy's ENI contributed to the task force. The panel released its findings as the administration's White House Energy Policy Development Group headed by Vice President Dick Cheney prepares for final deliberations. "The report has been presented at the highest levels of government, including President (George W.) Bush, Vice President Cheney, and (National Security Adviser) Condoleeza Rice," said Morse. Despite the Bush administrations concentration on supply side policies, Morse said that he expects the Cheney energy report "won't look much different," than the report presented by the task force. "The president has to begin educating the public about this reality and start building a broad base of popular support for the hard policy choices ahead," the report says. U.S TRAILS IN DEMAND MANAGEMENT "Supply side issues are very important, as is debottlenecking our infrastructure. But we have to look at demand management practices and fuel choice - we completely ignored that for more than a decade," said Amy Myers Jaffe, project director for the task force. The United States currently guzzles about a quarter of the 80 million barrels of oil products consumed each day worldwide, and according to the study lags other industrialized nations in exercising demand-based energy policies. The Bush administration's energy plan is currently focused on opening up more domestic land for hydrocarbon drilling, including the currently off-limits Arctic National Wildlife Refuge in Alaska to make the U.S. less reliant on foreign imports. "The United States has trailed other industrialized societies when it comes to oil-demand management," the report says. If light truck vehicles such as sport utility vehicles (SUVs) were required to have the same fuel efficiency as automobiles, it would shave five percent off U.S. demand in seven to 10 years, it said. The federal government could also stimulate development of greener transportation by purchasing vehicles for its fleet that incorporate nascent technologies, it added. Efforts toward the development of energ

Wisconsin Gas to Purchase Nine Mile Line From Northern Natural Gas

07/13/2001 PR Newswire (Copyright (c) 2001, PR Newswire)

Line Will Enhance Competition in Southeast Wisconsin and Use Existing Facilities

MILWAUKEE, July 13 /PRNewswire/ -- Wisconsin Gas, Northern Natural Gas and Guardian Pipeline announced today that Wisconsin Gas has signed an agreement with Northern Natural Gas (NNG) to purchase a nine mile, high pressure natural gas pipeline in Walworth and Waukesha counties. The purchase price is \$5 million. The proposed transaction will require approval from federal and state regulators. The pipe, known as the Eagle line, is located southeast of the Kettle Moraine Forest near Eagle, Wis. The existing line has been part of the NNG interstate transmission system. Under the new ownership, the line will become part of the Wisconsin Gas distribution system and will interconnect with Guardian Pipeline as well as the NNG system. "Northern Natural Gas is pleased to be a part of a creative, cost-effective solution to provide additional gas service to southeastern Wisconsin," said Dave Neubauer, vice president of business development and marketing, Northern Natural Gas. "This transaction enables Wisconsin Gas and its customers to obtain natural gas supplies from Guardian or NNG. Providing reliable, economical choices for consumers will benefit all of the parties involved." "We saw this as an opportunity to minimize environmental impact and still realize the benefits of increased competition in the natural gas market," said James Schott, senior vice president, Wisconsin Gas. "The purchase of the Eagle line will enable Wisconsin Gas to further our goal of providing cost-efficient natural gas service to our customers." As a result of the purchase Guardian Pipeline, the 141-mile interstate pipeline from Joliet, Ill. to Ixonia, Wis., will no longer build an 8.5-mile lateral to Eagle. The lateral was part of the originally certified Guardian Pipeline. This portion of the line would have generally run parallel to the current Northern Natural pipeline. "This sale is a win-win situation for Guardian and consumers," said George Hass, project manager of Guardian Pipeline. "The Eagle line purchase by Wisconsin Gas saves Guardian time and resources by taking away the need to build the 8.5-mile lateral and allows all three companies to create a better environment for competition in the natural gas marketplace." The existing gate stations at LaGrange and Eagle will remain in-service for regulation purposes. Odorization and measurement will take place at a new gate station that will be constructed at the interconnect with Guardian. This new gate station will be called the Bluff Creek station and will be located near Whitewater. The Bluff Creek gate station will be constructed during the construction of Guardian Pipeline. Northern Natural Gas, a subsidiary of Enron Corp., with a market area capacity of about 4.3 Bcf/d, provides natural gas transportation services to utility customers in the upper Midwestern United States through its approximately 16,000 miles of pipeline. Guardian Pipeline is a partnership of three Midwestern energy companies: CMS Energy, based in Dearborn, Mich.; Wisconsin Energy, headquartered in Milwaukee, Wis.; and Viking Gas Transmission Co., a wholly owned subsidiary of Xcel Energy Inc., and located in St. Paul, Minn. Wisconsin Electric-Wisconsin Gas, the principal utility subsidiary of Wisconsin Energy Corp. (NYSE: WEC), serves more than one million electric customers and more than 960,000 natural gas customers throughout Wisconsin and Michigan's Upper Peninsula. Commodities Review: LME Copper Hit By Another Stock Rise By Mark Long and Steve McGrath Of DOW JONES NEWSWIRES

07/13/2001 Dow Jones Commodities Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

LONDON -(Dow Jones)- Copper futures traded in London fell Friday, as a further influx of stocks into official warehouses put the copper market under pressure and dragged down the rest of the base metal complex. Three-month copper traded on the London Metal Exchange ended \$6 down from Thursday's late kerb close at \$1,554.50 a metric ton. An increase of 7,475 tons of copper into LME warehouses Friday brought total stocks up to a 12-month high of 550,300 tons. This pressured prices in early trade down to test \$1,550/ton support, although prices recovered slightly in later trade. Unconfirmed market talk said Enron is behind much of the week's stock rise, in an effort to ease nearby supply tightness and to alleviate the large short positions it is thought to have built up on the July-for-a-week spread, which is currently

showing a \$6-\$8/ton backwardation. The July futures contract will switch over to cash Monday. Enron declined to comment on the market talk Friday. A backwardation is a pricing structure in which deliveries to be made in the near future are more expensive than those set for a more distant delivery. The opposite situation is called contango. "The spreads are still tight. The major longs are still reluctant to lend, with no signs of that (tightness) dissipated," said Kevin Norrish, an analyst with Barclays Capital in London. Dealers and analysts said they expect further stock increases next week. The entire base metals complex ignored Thursday's 237-point rally in the Dow Jones Industrial Average, dealers said. "Copper has been sensitive to moves in the stock market, but not this time," Norrish said. In fact, now it appears that base metals markets ignore equities markets when they rally, but follow stocks down when they slump, he added. European Grain Futures See Profit-Taking, But More Gains Expected European grain and oilseed futures were hit by a bout of profit-taking and pre-weekend position-squaring Friday, after rising to long-time highs, brokers said. However, world and domestic crop concerns, the strength of the dollar and general bullish sentiment will carry the markets to fresh highs short term, they said. On the London International Financial Futures and Options Exchange, the benchmark November feed wheat contract ended just 25 pence up at GBP82/ton, after hitting a new two-year high of GBP83/ton in early trade. Meanwhile, Matif November rapeseed futures fell EUR2.75 on the day to EUR265/ton, after hitting a three-year high of EUR271/ton in early trade. The U.K. wheat crop and the French rapeseed crop are forecast to be well down on last year, and wheat and canola crops in some other major producing countries are also expected to fall. Meanwhile, the strength of the dollar is allowing European grain and oilseed traders to up prices and still remain competitive against U.S. imports and dollar-denominated grains on the world market. -By Mark Long and Steve McGrath, Dow Jones

Companies People Ideas Grid Lock Our energy transport system is horrible. Just the way many utilities like it. BY Daniel Fisher and Lynn Cook

06/11/2001 Forbes 080 Copyright 2001 Forbes Inc.

Our energy transport system is balkanized and horribly inefficient. Unfortunately, many of the incumbent utilities want to keep it that way. The Bush energy plan hits hard on increasing production. That alone won't solve the nation's power crunch. "Supply is not the only issue," says Michelle Michot Soss, director of the Energy Institute at the University of Houston. "The issue is bottlenecks." Some of these bottlenecks are political. A lot of them are created by incumbent utilities that do not welcome competition. Florida, for example, whose demand for electricity is growing at about 3.7% a year, is a net importer of energy. It generates around 24% of its power in aging oil-fired plants that should be replaced with more efficient combined-cycle generators. These burn natural gas in a turbine and use the hot exhaust gases to create steam, which spins a second turbine; they spew out less particulate and consume about a third less energy. So why doesn't Florida get efficient power plants? First, the state has only one main gas pipeline, though others are working their

way through the regulatory process. More vexing is a state law, zealously defended by Florida utilities, that bans outside competitors from building combined-cycle plants larger than 75 megawatts--enough to juice 75,000 households--on the dubious theory that they waste water. Duke Energy tried to challenge the law with a 500-megawatt plant in New Smyrna Beach. FPL Corp. (parent of Florida Power & Light) fought the plant all the way to the Florida Supreme Court and won. Florida's screwy power-plant law is just one example of the byzantine regulations that stymie efforts to make the nation's energy grid more efficient and prices more competitive. From laws that protect utilities against more efficient rivals to outdated state regulations that discourage the construction of transmission lines, these choke points either waste energy or make it impossible for energy to get where it should go. A series of state laws in the 1920s laid down the monopolies on grids. They were codified in the Public Utility Holding Company Act of 1935, a populist law that identified bigness with badness in the electricity business: To avoid federal scrutiny and regulation, most utilities decided not to operate outside their own state boundaries; rate setting fell to the states. But even as wholesale electricity markets have been deregulated, utilities can still bat away outsiders by reserving their own transmission lines for "native load." This allows them to keep an open lane on the energy highway, as it were, to rush electricity to certain customers when their demand suddenly spikes. In such areas as the Southeast, the owner of a transmission line has a pretty free hand in calculating what its native load is. So Southern Co., which owns utilities in Georgia and four neighboring states, can determine how much power to let into its territory. Southern Co. defends the rule, saying its primary job is ensuring customers get all the power they need. "The marketers would like to schedule another 10,000 megawatts of power to go across our lines tomorrow," says William Newman, a senior vice president. "It's not going to happen. The system wasn't designed for it." Enron disagrees. Utilization of its natural gas pipeline system increased 50% in the five years after the gas market was deregulated. Steven Kean, head of government regulations at the Houston-based giant, thinks similar gains are possible in electricity if companies like Southern are forced to hand over control of the grid to independent regional boards that will determine how to allocate power flows and where to build new lines. The utilities "don't want to accept the economically pure solution," he says. "Once utilities have been adequately compensated for their stranded costs, then it's time for them to shut up, sit in the corner and let the economists and lawyers work out the details." Lawyers and economists making decisions for us? That doesn't sound like deregulation. But there is a case to be made for separating control of power lines from control of other utility assets. Phillip G. Harris is chief executive of PJM (it stood for Pennsylvania-Jersey-Maryland), a regional power line organization. Since this independent system operator was formed in April 1997 and six local utilities ceded control over transmission lines, reliability has gone up and prices down, he says. Where Southern Co. will only add transmission capacity if it has a firm contract in hand, PJM can order lines to be built. Its member companies are spending \$311 million over the next three years on new lines to increase the flow from power-rich to energy-poor areas. Last May temperatures hit the highest levels since 1930 at the same time as 15,000 megawatts of PJM's 59,000 megawatts were out of service for maintenance. As the peak load rose to 51,000 megawatts--7,000 more than was available within PJM--power streamed in over a dozen entry points. Prices topped out at \$432 a megawatt hour. That's about four times what you are probably paying for residential service, but it stands in contrast to spikes in the thousands of dollars in California and the Midwest during similar crises. Unfortunately, what works inside PJM doesn't transfer to Los Angeles, much less to Manhattan. Different rules regarding electricity transactions and a shortage of transmission lines make it difficult to export electricity across the Hudson River. When Hydro-Quebec tried to build a power line across Long Island Sound in 1999, Connecticut nixed the idea. Ostensible reason: the possibility of harm to oyster beds. Real reason: Folks in New Haven asked, what's in it for us--and didn't see any clear benefit to them. There is, unfortunately, no mechanism for buying off losers in these deals, such as property owners near, but not under, the power line. So they hire lawyers and talk solemnly about oysters. California's bottleneck is on Path 15, a 500,000-volt transmission line that links the northern and southern halves of the state. Path 15 can't accommodate the flows of power needed when the weather is cool in San Francisco and hot in L.A. But the legal and financial chaos in California, with the state on the verge of taking over much of the transmission system, discourages investors from backing an increase in capacity. "If we put in good rules on how to operate transmission systems, you would see investment," says Lawrence Makovich, an analyst with Cambridge Energy Research Associates. "The problem is right now there is no such plan." Enron is trying to force the Federal Energy Regulatory Commission to take charge, so far to little avail. In a case pending before the U.S. Supreme Court, Enron accuses FERC of abdicating its responsibility to do for interstate trading

Telecommunications Reports presents TR's State NewsWire February 2, 2001 A.M. Edition

STATES ILLINOIS -- Legislation to rewrite telecom law introduced HAWAII -- Bill would extend franchise tax to telecom, cable TV businesses MICHIGAN -- Group begins work on telecom plan PA. -- Carrier fined \$50,000 for failing to post surcharge notice on pay phones KANSAS -- Bill would prohibit 'slamming' TEXAS -- Sen. Carona aims to enact UETA SOUTH DAKOTA -- Bill would create universal service fund HAWAII -- Bill would set up cable TV access infrastructure plan TEXAS -- PUC to hear Supra complaint against SW Bell NEW YORK -- Bill would exempt coin calls from excise tax IDAHO -- PUC holds off on area code public hearings HAWAII -- Lawmakers examine electronic forgery ARIZONA -- Qwest to bring high-speed Internet access to public schools

FUTURE OF REGULATION ILLINOIS Legislation to rewrite telecom law introduced

Several legislators yesterday introduced HB 492/SB 134 to rewrite the telecom article of the state's Public Utilities Act, which expires July 1. Connect Illinois, an advocacy group that counts Ameritech-Illinois as one of its members, joined the legislators in a news conference yesterday announcing the bill.

The major objectives of the legislation are to (1) guarantee consumers that prices for basic residential service always remain affordable, (2) allow the marketplace to increase competitive choices for business and broadband services, (3) give concise legislative direction to the future role of the state Commerce Commission, (4) modernize ICC communications rules to permit them access to the latest information, (5) require network unbundling for all carriers and cable "open access," and (6) create an atmosphere that encourages technological investment and deployment.

The bill would establish a two-year rate freeze, with future increases capped below the rate of inflation. It also would deregulate optional services, such as call waiting and Caller ID.

The sponsors of SB 134 are Sens. Steve Rauschenberger (R., Elgin) and Denny Jacobs (D., East Moline). Reps. Steve Davis (D., Bethalto) and Art Tenhouse (R., Liberty) sponsored HB 492.

The legislation is available at <http://www.legis.state.il.us/legisnet/legisnet92/hbgroups/hb/920HB0492LV.html>.

TAXATION HAWAII Bill would extend franchise tax to telecom, cable TV businesses

Rep. Calvin K.Y. Say (D., District 18) has introduced HB 1180, which would amend the state franchise tax to include telephone, telecom, and cable TV businesses. Those businesses would have to pay 2.5% of their gross receipts for the preceding calendar year.

HB 1180 awaits consideration by the House Consumer Protection and Commerce Committee and the House Finance Committee.

STATE & LOCAL GOVERNMENT MICHIGAN Group begins work on telecom plan

The Michigan Economic Development Corp. (MEDC) has begun gathering information to develop a telecommunications plan for the state, a corporation representative told TR. MEDC is quasi-governmental agency.

The MEDC's executive committee directed the corporation to begin work on the plan to learn how Michigan can develop its telecom industry and infrastructure. The executive committee didn't set any timeframe for when it would like the plan completed, the representative said.

The MEDC is in the very early stages of developing the plan and hasn't defined specifically what issues it will address yet. Mostly, the group is gathering information about what other states are doing in this area, the representative explained.

NETWORK MANAGEMENT PENNSYLVANIA Carrier fined \$50,000 for failing to post surcharge notice on pay phones

One Call Communications Inc., d/b/a Opticom, has agreed to pay a \$50,000 civil penalty for failing to post notice of a surcharge it had been assessing on intrastate calls made from pay phones. Public Utility Commission regulations require notice of such surcharges to be posted in plain view on the pay phone.

The commission said its prosecutory staff confirmed reports of the violations during an informal investigation. The company said it was unaware of the posting requirement. The PUC said local exchange carriers (LECs) own some of the pay phones served by Opticom and won't let the company place stickers on the phones.

According to the staff, Opticom immediately posted notification stickers where it could and ceased assessing the surcharge on calls made from LEC pay phones on which it couldn't post stickers.

The commission said the \$50,000 fine, which the company agreed to in a proposed settlement with staff, was sufficient given the company's cooperation during the investigation. The PUC tentatively has agreed to adopt the settlement. It asked for comments on the settlement by Feb. 13. (Docket no. M-00011449 Pennsylvania Public Utility Commission v. Opticom Division of One Call Communications)

CUSTOMER-AFFECTING KANSAS Bill would prohibit 'slamming'

The House Committee on Utilities has recommended the passage of a bill that would prohibit changing or adding to a customer's telecom services without authorization. HB 2099 would prohibit carriers from directing a local exchange carrier to change a subscriber's carrier without obtaining the subscriber's permission beforehand. Carriers requesting such a change would be responsible for proving through a "preponderance of the evidence" that the consumer authorized the transaction.

HB 2099 also would prohibit providers from engaging in any activity that could mislead the subscriber while soliciting or confirming a carrier change. In addition, the bill would prohibit the use of sweepstakes entries as a form of authorization to switch a consumer's carrier or add supplemental services to the consumer's account.

Violations of HB 2099 would be punishable by civil penalties of between \$5,000 and \$20,000 per offense. Individuals could bring a private action against any party they believed had violated HB 2099.

HB 2099's text is available at <http://www.ink.org/public/legislative/bills.cgi/bill/2002/2099.pdf>.

INTERNET TEXAS Sen. Carona aims to enact UETA

Sen. John J. Carona (R., District 16) has introduced SB 393 to enact the Uniform Electronic Transactions Act, which would make electronic signatures and records legally equivalent to traditional signatures and records. The bill wouldn't require the use of electronic records and signatures but would uphold their use when both parties involved in a transaction agreed to conduct business electronically.

SB 393 also wouldn't preempt requirements in other laws regarding the posting of a record. In addition, electronic records wouldn't be enforceable if the sender prevented the recipient from storing or printing them. The Department of Information Resources would specify the manner in which state agencies could use electronic records.

SB 393 has been referred to the Senate Business and Commerce Committee. Its text is available at <http://www.capitol.state.tx.us/tlo/77r/billtext/SB00393I.HTM>.

UNIVERSAL SERVICE SOUTH DAKOTA Bill would create universal service fund

Several legislators have introduced SB 232 to establish a state universal service fund (USF). The Public Utilities Commission would have to establish rules governing administration of the USF by Oct. 1. It would have to implement the fund by Jan. 1, 2002.

Sens. Kenneth D. Albers (R., District 16) and Gil Koetzle (D., District 15) and Reps. Mike Jaspers (R., District 11) and James Bradford (D., District 27) introduced the measure. It has been referred to the Senate Committee on State Affairs.

ADVANCED SERVICES HAWAII Bill would set up cable TV access infrastructure plan

Sen. Les Ihara Jr. (D., District 10) has introduced SB 1536, which would require the director of commerce and consumer affairs to develop a statewide

Telecommunications Reports presents TR's State NewsWire February 8, 2001 8 A.M. Edition

STATES MISSISSIPPI -- Senate passes no-call bill MINNESOTA -- PUC chair would mediate disputes under bill MASSACHUSETTS -- Eleven bills to restrict telemarketers introduced CONNECTICUT -- Bill would exempt cable TV companies from earnings tax COLORADO -- Workshops on Qwest market-entry bid continue OKLAHOMA -- SW Bell presents \$30 million grant to educational trust KANSAS -- KCC denies SW Bell request to reconsider 'recip comp' order IOWA -- Bill would restrict cellphone use while driving UTAH -- Committee to take up bill addressing rate increases for small telcos ILLINOIS -- Measure would create study of Internet voting IDAHO -- More than 7,000 join no-call list during the first month

CUSTOMER-AFFECTING MISSISSIPPI Senate passes no-call bill

The Senate has approved a bill to prevent telephone solicitors from calling consumers who inform the Public Service Commission that they object to such calls. SB 2362, sponsored by Sen. Thomas E. Robertson (R., District 51), would require the PSC to create a no-call database containing telephone numbers of consumers who don't want calls from solicitors. (1/18/01 p.m.)

Only five senators voted against SB 2362, but a motion to reconsider was entered, a legislative staff member told TR. The motion means that SB 2362 could be called up for another Senate vote before Feb. 12, the staff member said.

Rep. Les Barnett (R., District 116) has introduced a similar bill, HB 1414, which has been referred to the House Public Utilities Committee.

SB 2362 and HB 1414 have won the support of the Public Service Commission. (2/2/01 p.m.) Almost 400 consumers in the past two months have asked the commission to help limit telemarketing, and the two bills would help accomplish this, according to the PSC.

FUTURE OF REGULATION MINNESOTA PUC chair would mediate disputes under bill

A bill introduced in the House would allow the chairman of the Public Utilities Commission to mediate and resolve disputes between utility providers. The intent is to create a more efficient and informal method of dispute resolution option than can be pursued in formal proceedings before the full commission or a court, according to the measure.

The new dispute-resolution process could be initiated by a provider's written complain to the chairman or by the chairman's own motion. The chairman could designate another commissioner to hear a particular dispute.

Within 15 days of a mediation session, the parties would have to inform the chairman as to whether they had reached a resolution. If a resolution weren't reached, the chairman could issue a written decision or refer the issue to the full commission.

Reps. Loren Geo Jennings (D., District 18B) and Ken Wolf (R., District 41B) introduced HF 568. It has been referred to the House Regulated Industries Committee.

CUSTOMER-AFFECTING MASSACHUSETTS Eleven bills to restrict telemarketers introduced

The Joint Committee on Government Regulations and the Joint Committee on Commerce and Labor are considering five House bills and six Senate bills aimed at restricting telemarketers.

HB 234, HB 602, HB 1378, SB 22, SB 44, and SB 91 each would establish a statewide no-call database, with listing fees ranging from \$5 to \$10 per consumer. The bills would establish fines ranging from \$500 to \$5,000 per violation. HB 602 also would require telemarketers to pay \$500 to access the list and would require carriers to notify customers about the list and tell them how to sign up.

Two other House bills take a slightly different approach. HB 577 addresses fraud by requiring telemarketers to issue a "notice of confirmation and cancellation rights" after each transaction made by phone. The buyer could cancel the transactions up to three business days after the receipt of the notice. HB 1002 would levy fines of up to \$1,000 against telemarketers who deliberately blocked Caller ID during solicitations.

SB 55, in addition to creating a no-call list, would establish guidelines for conduct including requesting fees, telemarketing to minors, and blocking Caller ID. SB 126 would require telemarketers to submit a registration statement and a \$50,000 surety bond. SB 126 also suggests guidelines for recordkeeping, prohibited acts and practices, and cancellation of transactions.

The Joint Committee on Government Regulations is considering three bills--HB 602, sponsored by Rep. Scott P. Brown (R., Norfolk-9), HB 1378, sponsored by Rep. Charles A. Murphy (D., Middlesex-23), and HB 1002, sponsored by Rep. Mary Jane Simmons (D., Worcester-4).

The Joint Committee on Commerce and Labor is considering two of the House bills--HB 234, sponsored by Rep. William M. Straus (D., Bristol-10), and HB 577, sponsored by Rep. Bruce J. Ayers (D., Norfolk-1).

The six Senate bills have been referred to the Joint Commerce and Labor Committee. SB 22 is sponsored by Sen. Robert A. Antonioni (D., Worcester), SB 44 is sponsored by Sen. Susan C. Fargo (D., 5th Middlesex), SB 48 is sponsored by Sen. Cheryl A. Jacques (D., Norfolk), SB 55 is sponsored by Sen. Michael R. Knapik (R., 2nd Hampden), SB 91 is sponsored by Sen. David P. Magnani (D., Middlesex), and SB 126 is sponsored by Sen. Richard R. Tisei (R., 3rd Middlesex).

TAXATION CONNECTICUT Bill would exempt cable TV companies from earnings tax

Rep. Richard O. Belden (R., District 113) has introduced a bill to exempt cable TV companies from the state's 5% gross earnings tax. HB 6165 has been referred to Committee on Energy and Technology. Its text is available at <http://www.cga.state.ct.us/2001/tob/h/2001HB-06165-R00-HB.htm>.

LONG DISTANCE COLORADO Workshops on Qwest market-entry bid continue

Workshops on Qwest Corp.'s bid to enter the Colorado interLATA (local access and transport area) service market are scheduled to resume at the Public Utilities Commission Feb. 20-23. Issues that will be addressed include unbundled network element combinations, transport switching, and "dark" (unpowered) fiber, a PUC staff member told TR. The PUC plans to hold workshops monthly through the spring, the staff member said.

Section 271 of the federal Telecommunications Act of 1996 bars Bell companies from providing in-region interLATA services until the FCC finds that they have complied with certain local exchange market-opening requirements. Section 271 of the federal Telecommunications Act of 1996 requires the FCC to seek the advice of the relevant state commission. Typically Bell companies have not submitted a section 271 application to the FCC until state regulators indicate that they are satisfied that the company has complied with the Act's market-opening mandates.

ADVANCED SERVICES OKLAHOMA SW Bell presents \$30 million grant to educational trust

Southwestern Bell Telephone Co. has given \$30 million to Attorney General Drew Edmondson (D.) and trustees for the Oklahoma Education Technology Trust to establish and activate a trust designed to help schools capitalize on new computer and telecom technology. The company pledged the money during negotiations that led to the company opting out of rate-of-return regulation. (11/12/99 a.m.) The state Corporation Commission finalized the alternative regulation plan in December 1999. (12/1/99 a.m.)

The trust will assist schools across the state by funding, obtaining, installing, and integrating new computer and telecom equipment. Only the interest from the \$30 million contribution can be tapped by the appointed trustees.

Edmondson said, "The trust will oversee the placement of new computer hardware and software and other telecommunications equipment in out classrooms, so that students across out state have an opportunity to claim a place in the information a

Wall Street Reporter Interviews George A. Kast, President & CEO of Global Water Technologies

07/05/2001 Business Wire (Copyright (c) 2001, Business Wire)

GOLDEN, Colo.--(BUSINESS WIRE)--July 5, 2001--Global Water Technologies, Inc. (OTCBB: GWTR), a full-service cooling water company utilizing advanced technologies and engineered solutions to provide process cooling water to power plants, process industry and municipalities, worldwide, today announced that George A. Kast, President and CEO, has been featured in an interview by Wall Street Reporter. In the interview, Kast discussed industry trends, market potential and growth opportunities in the markets that the Company has cultivated. The interview was conducted on Tuesday, July 3, 2001, at 1:00 p.m. (MT) by Matt Cleary, and is currently audibly available, on the Wall Street Reporter's web site, www.wallstreetreporter.com, by clicking on the CEO Interviews link. Commenting on this interview, George Kast, President and CEO stated: "We are very pleased to be featured in an interview by the Wall Street Reporter. This is a very exciting time for Global Water Technologies, Inc. and we are excited that this forum gives us the opportunity to present our story to the investment community." The interview primarily covered the most recent corporate events and the Company's efforts to implement its business strategy, capitalizing on its competitive advantages in the rapidly expanding power, energy and utility sector. The Wall Street Reporter is a leading information source for professional investors seeking new investment ideas. Their in-depth interviews of CEOs with leading public companies are geared toward sophisticated investors who demand an unbiased, unscripted, first-hand perspective that enables them to make informed investment decisions.

About Global Water Technologies

Global Water Technologies, Inc. (OTCBB: GWTR) is a company with major interests in the areas of power, energy and water. The company utilizes its proprietary technology to enhance power production by providing cold, clean water to increase operating efficiencies, reduce water use and operating costs. Through this process, GWTR is able to increase their client's power output by up to 10% depending upon age, design and efficiency of the plant. GWTR's client base includes, but is not limited to, the following companies: General Electric (NYSE: GE), Enron subsidiary companies (NYSE: ENE), Raytheon Company (NYSE: RTN), Archer Daniels Midland (NYSE: ADM), British Petroleum Amoco, Mitsubishi, Mobil, Texaco (NYSE: TX), Duke Fluor Daniel, Kerr McGee (NYSE: KMD) and Calpine (NYSE: CPN).

Forward-Looking Statement

This news release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and section 21E of the Securities Exchange Act of 1934, as amended. Such statements are subject to risks and uncertainties that could cause actual results to vary materially from those projected in the forward-looking statements. The Company may experience significant fluctuations in future operating results due to a number of economic, competitive and

other factors, including, among other things, the size and timing of customer orders, changes in laws, new or increased competition, delays in new products, production problems, changes in market demand, market acceptance of new products, seasonal in product purchases, and changes in foreign exchange rates. These factors, and other factors, which could materially affect the Company and its operations are included in the Company's filings with the Securities and Exchange Commission and are incorporated herein.

07/05/2001 Associated Press Newswires Copyright 2001. The Associated Press. All Rights Reserved.

Developments in California's energy crisis: THURSDAY: - No power alerts as electricity reserves stay above 7 percent. - The Senate Judiciary Committee continues its debate at a hearing over Gov. Gray Davis' proposal to aid financially strapped Southern California Edison. - Lt. Gov. Cruz Bustamante and Assemblywoman Barbara Matthews introduce two additional whistleblowers from power plant operated by Duke Energy. - The grand jury that will probe criminal charges of price gouging by energy generators will convene this week in Sacramento. The 19 new members of the Sacramento County grand jury were assigned by State Attorney General Bill Lockyer and will assess the results of several government investigations. - The U.S. Trustee argues again in bankruptcy court that ratepayers should have a committee to represent their interests in the Pacific Gas & Electric Co. bankruptcy proceedings. WEDNESDAY: - No power alerts as electricity reserves stay above 7 percent. WHAT'S NEXT: - The Senate committee investigating possible price manipulation in California's energy market meets Tuesday. The committee will vote on contempt citations against generators Mirant and Enron who failed to comply with subpoenas for documents. Six other suppliers have until Tuesday to turn over documents. THE PROBLEM: High demand, high wholesale energy costs, transmission glitches and a tight supply worsened by scarce hydroelectric power in the Northwest and maintenance at aging California power plants are all factors in California's electricity crisis. Southern California Edison and Pacific Gas and Electric say they've lost nearly \$14 billion since June 2000 to high wholesale prices the state's electricity deregulation law bars them from passing on to consumers. PG&E, saying it hasn't received the help it needs from regulators or state lawmakers, filed for federal bankruptcy protection April 6. Electricity and natural gas suppliers, scared off by the companies' poor credit ratings, are refusing to sell to them, leading the state in January to start buying power for the utilities' nearly 9 million residential and business customers. The state is also buying power for a third investor-owned utility, San Diego Gas & Electric, which is in better financial shape than much larger Edison and PG&E but also struggling with high wholesale power costs. The Public Utilities Commission has approved average rate increases of 37 percent for the heaviest residential customers and 38 percent for commercial customers, and hikes of up to 49 percent for industrial customers and 15 percent or 20 percent for agricultural customers to help finance the state's multibillion-dollar power buys. Track the state's blackout warnings on the Web at www.caiso.com/SystemStatus.html.

Utilization of Mike Day

Sender	paul.kaufman@enron.com
Recipients	['jeff.dasovich@enron.com', 'richard.shapiro@enron.com', 'james.steffes@enron.com']
File	dasovich-j/all_documents/12506.

Rick, Jim and Jeff: Here's a draft of the e-mail I intend to send to Sandy and Mike re: use of Mike Day in Sacramento. Let me know your thoughts.

It appears from talking with both of you that we have some confusion on how we will contract for legal services to support or legislative efforts. Hopefully this e-mail will clarify the process so there is no confusion in the future and so that Mike can feel comfortable he is completing work that is authorized and for which we have a budget.

1. To begin, it appears that Goodin, MacBride has billings as of May 11 for approximately \$10,000 on direct access, windfall profits, the "Global Settlement," Power Plant Siting. We will cover these amounts because of the apparent confusion with our budgeting and approval process. The amounts already incurred should be included in the RCRs discussed below.

2. As we discussed yesterday, the work associated with the billings in May was conducted without any RCR approval or any budget in place. As you know we terminated the two legislative retainers at the end of April. No RCRs were filed to cover the matters on which work was completed in May.

I did receive a budget on legislative matters on May 8. However, a decision was made only yesterday to proceed on a specific matter-by-matter basis; the work in May should not have been undertaken while we considered whether to proceed with an overall legislative budget or proceed with specific RCRs. In short, a proposed budget is not RCR approval.

3. In the future, any work undertaken by Goodin MacBride should only be conducted pursuant to an approved RCR. If an emergency arises--i.e., an issue arises that could not have been contemplated, then I should be contacted before completing any work. If I am unavailable, Jim Steffes should be contacted. If Jim is unavailable, then Rick Shapiro should be contacted. In this regard, I authorized Goodin MacBride to participate in the Direct Access coalition meetings taking place today and tomorrow. I also authorized Goodin MacBride to participate in a telephonic conference on the Calderon bill. To the maximum extent possible, I expect that Mike will include Leslie Lawner in future Direct Access meetings, legislative drafting efforts, etc.

4. If there is any confusion on whether there is RCR approval for a particular matter, I should be contacted before undertaking an assignment. If I am unavailable, Jim Steffes should be contacted. If Jim is unavailable, then Rick Shapiro should be contacted. I can be reached through my office line--503.464.7945, pager--888.916.2262, or cell phone 503.539.4733. I wear the pager at all times and respond immediately to messages left on the pager.

5. Today, Sandy is filing several RCRs for legislative support on Direct Access, Siting, Windfalls Profits, and the Global Settlement. They will be considered at next Monday's RCR conference call. If they are approved, Sandy will manage the Goodin MacBride assignments associated with Direct Access, Siting, and Windfalls Profits.

Jeff Dasovich will manage all work associated with the Global Settlement, whether it is legislative or not. This does not mean that Sandy cannot give assignments to Goodin MacBride; it simply means that before that work begins Jeff must approve the work.

This particular issue is a critical matter for our company. Jeff is involved in the strategy and business calls concerning this matter and is working on a daily basis with Jim Steffes, Rick Shapiro and Steve Kean to develop our position and advocate that position in the settlement discussions. We must ensure that our Sacramento efforts are fully coordinated with our strategy and business interests (as they develop through the settlement discussions). To avoid any confusion on the scope of Jeff's responsibility, I consider all legislation addressing the Edison MOU, any future MOUs with Sempra, and "Plan B," to be part of the Global Settlement.

Please contact me if you have any questions regarding any of the above. I recognize that Sacramento is a difficult environment and that there is substantial pressure on both of you. However, we are under an obligation to use our internal and external resources in the best and most cost-effective manner. The RCR process is designed to meet that responsibility.

Calif Controller To Release Power Supply Contract Details ???? Updated: Monday, May 21, 2001 09:40 AM?ET ???? ? LOS ANGELES (Dow Jones)--California state Controller Kathleen Connell will release details of the state's long-term power supply contracts, including the cost per megawatt-hour, during a news conference Monday morning, according to her office.

Connell will also discuss property taxation of utilities and possible anticipation of revenues in 2002 at the 2 p.m. EST news conference in Sacramento.

Connell, a Democrat, has said the \$13.4 billion in revenue bonds the state plans to sell in August to pay for electricity will last through early 2002, if power prices are about \$195 a megawatt-hour in the summer. However, she said she fears prices will be much higher and the bonds will be exhausted sooner.

Connell attempted to release details in February and March on the price the state paid to secure long-term power supply contracts, but was told by Gov. Gray Davis' administration that if she released the information it could jeopardize the deals because of its competitiveness.

Connell has said the state should immediately stop buying power because of the impact it is having on the state's budget and the likelihood that other state-funded programs will be cut.

SHOW: CBS MORNING NEWS (6:30 AM ET)

?May 18, 2001, Friday

TYPE: Newscast

LENGTH: 386 words

HEADLINE: CALIFORNIA GOVERNOR THREATENS TO TAKE MATTERS INTO HIS OWN HANDS IF THE GOVERNMENT OFFERS NO RELIEF FOR THE STATE'S ENERGY CRISIS

ANCHORS: JULIE CHEN

REPORTERS: BILL WHITAKER

BODY:

??JULIE CHEN, anchor:

??In energy-starved California, ground zero of the power crisis, the Bush plan faces sharp criticism. ?Bill Whitaker has that.

??BILL WHITAKER reporting:

??Six times this year lights have gone out in parts of California when heat triggered a surge in demand. ?Governor Gray Davis deflected the political heat, blasting the Bush energy plan as inadequate.

??Governor GRAY DAVIS (Democrat, California): I fault the president for not providing California with any immediate relief.

??WHITAKER: In a major power play of his own, Davis has threatened to seize the facilities of Reliant Energy, a Texas-based supplier and major Bush contributor, if Reliant doesn't cut prices.

??Gov. DAVIS: But I told the generators face to face, I said, 'Your fate is in your hands. ?If you don't help me get through this summer with a minimum of disruptions, then you leave me no choice but to sign a windfall profits tax and to seize plants.'

??WHITAKER: All five of Reliant's Southern California plants are natural gas powered, supplying electricity to three million houses. ?Davis has called Reliant the greediest of all the out-of-state suppliers. ?Reliant wouldn't comment on camera, but the industry says takeover talk is more political than economic.

??Mr. JAN SMUTNY-JONES (Independent Energy Producers Association): Seizing private property didn't work in Cuba and it's not going to work in California, either.

??WHITAKER: A state takeover of Reliant could backfire, scaring off other out-of-state generators. ?But analysts say California, which already uses less energy per capita than any other state, has few options.

??Mr. MARK BERNSTEIN (Energy Analyst, Rand Corp.): The only other thing that can happen is for the federal government to take action to moderate prices. And if the gov--federal government doesn't take those actions, the governor may not have any choice.

??WHITAKER: Some California legislators suggest creating a buyers' cartel with Washington and Ore

Two more say Duke withheld power: The company says it was responding to the state grid operator. By Kevin Yamamura
Bee Capitol Bureau (Published July 6, 2001) Two more former workers from a Duke Energy power plant came forward Thursday to bolster recent claims by colleagues that the power generator withheld production to drive up prices. But Duke attributed witness accounts of fluctuating generation to instructions from the state's transmission-grid operator. Richard J. Connors, an auxiliary operator, and E. Robert Edwards, an electrician, said generation units at Duke's Chula Vista plant sat idle during emergency periods for no apparent reason. Three of their former co-workers -- two mechanics and a control room operator -- told lawmakers two weeks ago that Duke had disposed of new parts and varied its production. While that testimony drew significant attention, it was countered Monday by a report released by the state's Independent System Operator that showed the ISO had in fact ordered Duke's up-and-down output Jan. 16-18. On Thursday, the Charlotte, N.C.-based company leaned on the ISO report in its defense. "The ISO could have dispatched those units at will," said Duke spokesman Tom Williams, referring to unused equipment. But Lt. Gov. Cruz Bustamante, who has filed a lawsuit against generators, contended that the ISO had based its orders on Duke's dubious bidding history. "These ISO orders came only after Duke had continuously manipulated the market with price-gouging schemes forcing the ISO to regulate production," Bustamante said. Connors and Edwards each worked more than 20 years at the South Bay plant in Chula Vista. For most of that time, the plant was owned by San Diego Gas & Electric. Two years ago, Duke purchased South Bay and retained Connors and Edwards under state-mandated agreements that ended in April. Edwards said that during power blackouts in January, he saw a 225-megawatt unit off-line. Other units, he said, were operating far below capacity.

"Our No. 1 priority in life was to make money," Edwards said. Williams rebutted the claims as observations from those "who did not have the complete picture." "It's dead on, dead true that there are times when that plant is not running at full capacity and there is a Stage 3," Williams said. "There may be blackouts in San Francisco. But the reason why it's not running is because the power can't move up Path 15 (a north-south bottleneck)." Bustamante, however, maintained that Duke has continued to manipulate the market, calling Connors and Edwards the "tip of the iceberg" in the price-gouging investigation. State Sen. Joe Dunn, D-Santa Ana, chairman of the Senate committee investigating price manipulation, said Connors and Edwards may testify before lawmakers after further evaluation. Dunn added that his committee has talked to potential whistleblowers from other power generators who said they have seen production decreases and suspicious activities. It is undetermined whether they will testify, he said.

Lockyer seeks SEC investigation of PG&E's financial transfers By Ed Fletcher Bee Capitol Bureau (Published July 6, 2001) State Attorney General Bill Lockyer on Thursday asked the federal Securities and Exchange Commission to scrutinize financial transfers made to PG&E Corp. from its subsidiary that has filed for bankruptcy protection. "SEC scrutiny is essential to protect the public interest, ratepayers and the people of the state of California," Lockyer said in a prepared statement. Charges that PG&E Corp. hastened the bankruptcy filing of Pacific Gas and Electric Co. have been made before, responded Greg Pruett, a vice president of PG&E Corp. "That is an issue that has been investigated multiple times by the Public Utilities Commission earlier this year, by an Assembly oversight committee, and in each of these audits there has been no conclusion that the transfers were inappropriate or that they were injurious to PG&E Co.," Pruett said. In its filing with the SEC, the attorney general's office said that "without meaningful review by the SEC, it cannot be determined what impact the transfer of assets ... may have on the financial condition of the bankrupt utility." An SEC spokesman said the commission has yet to examine the petition. Among other concerns raised by Lockyer's office is the transfer of more than \$4 billion from 1997 to 1999 to PG&E Corp. from PG&E Co. The majority of the \$4 billion came from the sales of PG&E power plants, as was required by deregulation. "The bulk of the money went to pay debt that was incurred to actually build those plants," Pruett said. The rest of the transfers were to pay stockholder dividends, he said. PG&E filed for Chapter 11 bankruptcy protection in April after having run up \$6.6 billion in debt.

The Bee's Ed Fletcher can be reached at (916) 326-5548 or efletcher@sacbee.com.

Business; Financial Desk California State Seeks SEC Probe of PG&E Transfers NANCY RIVERA BROOKS ? 07/06/2001 Los Angeles Times Home Edition Page C-2 Copyright 2001 / The Times Mirror Company California Atty. Gen. Bill Lockyer on Thursday asked the Securities and Exchange Commission to investigate PG&E Corp. for potential abuses of its responsibilities as a utility holding company. At issue is a series of transactions over the last several years in which PG&E Corp. transferred funds from its utility, Pacific Gas & Electric Co., which now is operating under Bankruptcy Court protection. The money--more than \$4 billion since 1997--flowed to the parent company and to unregulated sister companies of the utilities. The transfers have been scrutinized by the California Public Utilities Commission and the state Legislature with no finding of wrongdoing, said PG&E Corp. spokesman Greg S. Pruett. The SEC currently exempts PG&E from almost all requirements of the Public Utility Holding Company Act because the San Francisco utility operates primarily within California . That law regulates transactions between holding companies and their utility subsidiaries. Lockyer wants the SEC to withdraw PG&E's exemption, citing \$13 billion in PG&E assets outside of California . "All the primary evils addressed

International Suddenly, Pipeline Project Sparks Interest --- Pakistan, India Summit Revives Plan for Gas To Travel Over
Land By Daniel Pearl Staff Reporter of The Wall Street Journal

06/27/2001 The Wall Street Journal A8 (Copyright (c) 2001, Dow Jones & Company, Inc.)

BOMBAY, India -- A planned summit of India's and Pakistan's top leaders is giving new momentum to a \$5 billion international gas-pipeline plan that was once dismissed as a pipe dream. U.S. companies may be left out, though, because the gas would originate in Iran. The decades-old pipeline idea, from gas-rich Iran east through Pakistan and into gas-hungry India, has always floundered on India's reluctance to deal with Pakistan. Since gaining independence in 1947, India and Pakistan have fought three wars and a bloody border skirmish two years ago that derailed efforts to establish some economic cooperation. On July 14, Pakistani Gen. Pervez Musharraf, who seized power in a 1999 coup and recently named himself president, is scheduled to arrive in Agra, India, for his first summit meeting with India Prime Minister Atal Bihari Vajpayee. Pakistan officials have told reporters they expect the pipeline to be discussed. India's foreign ministry won't confirm that, but Mr. Vajpayee gave a green light to pipeline discussions during a recent trip to Tehran, industry officials said. India has previously limited itself to exploring undersea pipelines that avoid Pakistan. After the trip, Iran promptly asked Australia's BHP Petroleum to launch a feasibility study on a land route. "There have been some studies before, but I think this is the most official," an Iranian official said. Pipeline talks could present a quandary for the Bush administration. Washington has encouraged India and Pakistan to reduce tensions on the subcontinent, but has strongly opposed previous energy projects involving Iran. U.S. oil companies are lobbying hard for the administration to let sanctions on Iran expire this year instead of renewing them for two years. Though the 1,500-mile pipeline remains a long shot, it may be one of the few topics India and Pakistan can discuss without fear of political backlash at home. Neither country is likely to budge from their hardened positions on the disputed Kashmir territory, and low-level talks aimed at reducing risks of nuclear weapons have so far come to naught. Pakistan stands to gain badly needed revenue from transit fees; estimates range between \$260 million and \$600 million a year. India could get relief from a gas deficit that has fertilizer plants running on reduced fuel and power plants running on more-expensive naphtha. Also, India's biggest private company appears to be shifting the balance in favor of an Iran pipeline. Reliance Industries Ltd., a Bombay-based

polyester and petroleum company that is gearing up to challenge government monopolies in telecommunications and gas supply, recently launched a \$10 million study on importation of liquefied gas from Iran to India by ship, in partnership with BP Inc. and National Iranian Oil Co. But industry officials familiar with Reliance's plans said the company is expressing interest in the pipeline option, too, because of its cost advantages and potential to provide a backup energy source for Reliance's huge industrial complex in India's northwestern Gujarat state. Reliance wouldn't comment on its gas-supply plans. If the company does insert itself as a potential buyer of the pipeline gas, a deal could become easier to negotiate than if India's state-owned gas company were the buyer. Still, "What's missing really at this moment is someone who would broker an arrangement," says Hugh McDermott, a principal of consulting firm Nexant Inc. who heads a U.S.-funded project promoting energy cooperation among South Asian countries. (Pakistan isn't yet involved). The less India and Pakistan are willing to trust each other, the bigger role Iran is likely to play in any pipeline. One scenario being discussed within the gas industry is for Iran to agree on delivery all the way to the Indian border, paying Pakistan's transit fees and guaranteeing safe passage through Pakistan. Iran and Pakistan have warmed their previously frosty relations recently, but whether Iran -- or even Pakistan itself -- could really guarantee the pipeline's security is an open question. Matthew Forman, South Asia specialist at the London-based consulting firm Control Risk Group, said the pipeline would run through the huge and remote province of Baluchistan, a lawless haven for smugglers where suspected tribal militants recently attacked a Chinese petroleum-engineering company with bullets and rockets. Pakistan "will have to work hard to give the impression [the pipeline] is safe and reliable," Mr. Forman said. "It is going to need some serious political will for it to go ahead." Several competing proposals to bring natural gas to India have run into trouble lately. Enron Corp. recently withdrew from the latest plan for an underwater pipeline from the Persian Gulf. Unocal Corp. tried to promote a pipeline through Turkmenistan, Afghanistan, Pakistan and India, but Unocal shut down its Turkmenistan office in 1999, after finding the lure of transit fees wasn't enough to make Afghanistan a stable country. Unocal, Royal Dutch/Shell Group and other oil companies have staked out gas interests in Bangladesh, but Bangladesh officials have so far spurned oil companies' pleas to allow export of gas to neighboring India.

Bush vs. price caps: Economists correct a faulty power lecture

(Published June 5, 2001)

In his recent commencement address at Yale University, President Bush saluted the C students in the graduating class: "I say you, too, can be president of the United States." But when he lectured California last week on the evils of electricity price controls, the joke seemed less funny. What America's most famous C student didn't learn in economics class is costing the state dearly. "Price caps do nothing to reduce demand, and they do nothing to increase supply," Bush said in his Los Angeles address, repeating a standard lesson out of introductory economics textbooks. Unfortunately, as 10 energy economists from universities around the nation made clear last week in an open letter on the state's electricity crisis, Bush must have missed the later chapters. The textbooks' admonitions against price controls apply to competitive markets. When competition breaks down, giving one or a few producers the ability to control prices, the textbooks are equally firm that regulation is needed to keep them from exploiting consumers. That's the situation confronting California -- and federal regulators. Electricity markets here long ago ceased to be competitive. Because of a flawed market structure and a temporary imbalance between supply and demand, generators learned last year that they had market power: By withholding supply at key times and places, they drove up the price of power beyond the level that would otherwise prevail in a competitive market. "We cannot expect a market to operate to benefit consumers ... if effective competition does not exist," the economists said in their letter. "In this case, cost-of-service prices are an obvious remedy." They noted that several useful proposals have been submitted to the Federal Energy Regulatory Commission (FERC) for temporary price restraints on wholesale prices. These would last only until new plants now being built come online to alleviate the shortage. Such restraints could meet the federal legal requirement that prices be "just and reasonable" without discouraging construction of new power plants or generation from existing plants, which is needed to keep the lights on this summer. In fact, as some economists have pointed out, the right kind of price controls could actually increase supply by removing any incentive for generators to withhold electricity to game the market. Bush's regulatory inaction is producing an unprecedented transfer of wealth from California households and businesses to the generating firms, a shift in

Legislative Weekly November 15, 2001 Issue 45, Volume 3

A weekly publication from the California Manufacturers & Technology Association detailing legislative and regulatory developments in Sacramento

PLENTY OF ENERGY, BUT LITTLE TRUST

As state and federal officials try to rebuild the defunct California energy market, the lack of supply has been replaced by a lack of trust as an ingredient in the ongoing crisis. For example:

In-state generators don't trust the ISO. They've alleged that the ISO (whose board is now all Governor Davis appointees) is buying power from DWR or the Pacific Northwest rather than the cheapest bid from generators in violation of federal law. Cal-ISO noted that DWR's so-called "out of market" purchases were more expensive than the bids to the ISO January through August. Now the price is roughly the same.

Consumer groups don't trust the DWR. They suggest that the DWR is manipulating the Cal-ISO market for last-minute electricity to help hide surplus electricity that DWR agreed to buy under \$43 billion worth of long-term power contracts signed last spring. DWR denies this.

Western states don't trust California. As FERC attempts to drum up support for a west-wide regional transmission system (RTO), they heard from other states loud and clear ? ?Please don't screw it up ? We're all saying we don't want to be with California ? Don't lump us all together.? This has led FERC Commissioners to conclude that three sub-regional organizations (one being Cal-ISO) could form under an umbrella organization, rather than a single entity.

Consumer groups don't trust the CPUC. The stealth deal struck by the CPUC to bail-out Southern California Edison caused The Utility Reform Network to ask the federal court to undo the deal. (CMTA was denied intervention.)

Legislators don't trust FERC. The bankruptcy reorganization plan for PG&E sends generation assets to the holding company, and FERC has jurisdiction over the power sale contract back to the regulated utility. Many legislators blame FERC for the market melt-down last year and object to any more FERC control over California markets.

Consumers don't trust the California Power Authority and DWR. The California Power Authority was created to ensure a 15% reserve margin in electricity supplies as insurance against blackouts and price spikes. DWR entered into \$43 billion in long term contracts, and is one of the largest single buyers of electricity in the entire West. The combination of current long-term DWR contracts and the possibility of more investment in supply by the CPA has consumer groups worrying that lower prices are only a distant and faint hope.

CPUC'S ENERGY EFFICIENCY FUNDING

The California Public Utilities Commission (CPUC) issued a draft decision this week on future energy efficiency policies in an effort to open energy efficiency funding to non-utility entities and to create competition with investor-owned utility programs.

Specifically, the decision opens public goods charge energy efficiency funding to non-utility entities such as local governments, chambers of commerce and others interested in participating in the program. The CPUC believes that this competition will spur overall program delivery improvement and encourage program continuity by creating multi-year funding opportunities.

The policy manual to be adopted defines CPUC policy rules in great detail and is intended to assist interested parties in preparing proposals in a standard format, to minimize ?apples and oranges? comparisons.

\$160 million will be provided to fund statewide programs; \$70 million in grants will be made available to fund innovative local and regional programs; and, \$6 million will be allocated to the CPUC to assess the State's energy efficiency needs.

Following, in order of importance, are the goals and objectives of the CPUC's energy efficiency programs. The point value under each objective represents their maximum possible score for each objective. A perfect score would be 100 points.

- 1). Long-Term Annual Gas and Electric Savings 25 Points The purpose of this category is to create permanent and verifiable energy savings over the life-cycle of energy efficiency measures affected by the program. In this area, the CPUC is striving for sustainability in the consumption behaviors and investment choices its programs are designed to stimulate.
- 2). Addressing Market Failures or Barriers 20 Points The proposal must include a description of the type of barrier it is designed to overcome. (For example, lack of consumer information about energy efficiency benefits; higher start-up expense for high-efficiency measures relative to standard-efficiency measures; lack of availability of high-efficiency products.)
- 3). Equity Considerations 17 Points The CPUC will generally prioritize programs that provide access to energy efficiency alternatives for under-served or hard-to-reach markets.
- 4). Cost Effectiveness 15 Points All proposals will be required to provide an estimate of the life-cycle benefits and costs.
- 5). Electric Peak Demand Savings 10 Points Programs paid for by electric public goods charge funds should emphasize long-term and permanent peak demand savings.

6). Innovation 8 Points The CPUC will prioritize programs that present new ideas, new delivery mechanisms, new providers of energy efficiency services, or new and emerging technologies.

7). Synergies and Coordination with Programs Run by Other Entities 5 Points To minimize confusion and overlap for consumers, the CPUC desires program proposals that take advantage of synergies or coordination with other existing programs, including those run by other state agencies, private entities, municipal utilities, or the federal government.

The program allows non-utility parties to submit proposals directly to the Commission for consideration, rather than to the utilities, as has been required in the past. Existing 2001 programs will be continued in the First Quarter of 2002, for a smooth transition, and most new programs will run through 2003.

For more information see the CPUC's website, <http://www.cpuc.ca.gov/>, email them at ee@cpuc.ca.gov or call the energy efficiency hotline at (415) 703-2776. The CPUC plans to hold a public workshop to assist parties in preparing proposals, once the decision is finalized.

EMPLOYERS MAY FACE RETROACTIVE UNEMPLOYMENT INSURANCE PAYMENTS

Following newspaper articles criticizing Governor Davis and the Employment Development Department (EDD) for making misleading remarks regarding SB 40's (Alarcon D-Sylmar) increase in unemployment benefits payments for laid off workers, one legislator has already initiated the process to remedy the situation at employers' expense. Assemblyman Lou Papan, (D-Millbrae) introduced a preprint of AB 1 that would retroactively increase UI benefits payments from \$230 to \$330 for workers laid off on or after July 1, 2001.

This year, the Governor signed SB 40, a bill that raises the maximum weekly payment from \$230 to \$300 for claims filed on and after January 1, 2002. The squabble is about remarks made by the Governor during the bill's signing in Los Angeles where many airline workers had been laid off. The Governor said "I want to make sure we have unemployment benefits that allow these workers to survive until the economy recovers," and "this will significantly strengthen the safety net not only for airline employees, but high-tech workers and all those who have been temporarily laid

Financial Times Ranks Haas Executive Education Custom Programs Best in the West Warren Hellman to Speak on the Nasdaq at the Business Forecast Luncheon Sun Microsystems Chooses Haas for Lessons in High-Tech Marketing Haas in the News? Happening at Haas?? Haas Celebrations

FINANCIAL TIMES RANKS HAAS EXECUTIVE EDUCATION CUSTOM PROGRAMS BEST IN THE WEST The Haas School's Center for Executive Development (CED) offers the tenth best custom enrollment programs in the US, according to the executive education rankings published in the Financial Times on June 4, 2001. Haas was the top school west of the Mississippi in terms of executive custom programs.

The top ten US custom programs included Duke, Northwestern, Harvard Business School, Wharton, University of Michigan, Darden, UNC Kenan Flagler, Babson College, Cranfield School of Management, and, of course, Haas. Columbia Business School ranked first.

The same ranking named CED's custom programs 17th in the world and the second best in the world with regard to whether its programs fulfill participants' and corporate purchasers' aims. With regard to follow-up with the customers after completion of the program, Haas ranked fourth.

"We are very encouraged with this showing," said Paul Stames, assistant dean for Executive Learning at Haas. "For the past two years we have concentrated our efforts toward increasing custom programs for client companies and this strategy is paying off. We're very pleased that our clients are so satisfied with our programs. We went from not making the ranking pool last year to placing #10 in the US."

The Financial Times ranked schools that do more than \$2 million of business in two categories: custom programs and open enrollment programs. CED ranked only in the custom programs category.

The custom programs ranking was based on responses from two questionnaires: one completed by purchasers of custom programs (which accounts for 80% of the total score) and one completed by business schools.

For more details on the ranking, visit the Financial Times web site at:

<http://career.ft.com/ft/gx.cgi/ftc?pagename=View&c=Collection&cid=FTD4PPTW1MC&live=true>.

WARREN HELLMAN TO SPEAK ON THE NASDAQ AT THE BUSINESS FORECAST LUNCHEON Financier F. Warren Hellman, BA 55, will share his formidable investment knowledge with alumni and friends at the Haas School's 2001 Business Forecast Luncheon on June 14 in San Francisco. Having just paid \$240 million for a 10% share in the Nasdaq Stock Market, Hellman will speak on the timely topic of, "NASDAQ's Strategic Restructuring into a Private, For-Profit Securities Market."

Hellman co-founded San Francisco-based Hellman & Friedman LLC 15 years ago and serves as the firm's chairman. Hellman & Friedman has raised and managed over \$4.8 billion in capital and invested in 42 companies. Business Week called Hellman the Jimmy Buffet of the West Coast in an article on his investing prowess. He is known for orchestrating the massive deal that took Levi Strauss private in 1985. Hellman currently has large investments in Levi Strauss & Co., D.N. & E. Walter & Co., and Il Fornaio (America) Corp.

Prior to founding this firm, Hellman was a founder and/or partner at Hellman, Ferri Investment Associates; Matrix Management Company; Matrix II Management Company; and Lehman Brothers. At Lehman Brothers, he served as president and head of the Investment Banking Division, as well as chairman of Lehman Corporation (a closed-end investment company). At age 26, Hellman became Lehman's youngest partner ever.

Known for his physical intensity, Hellman runs 100-mile ultramarathons and does endurance horseback riding. He is also very involved in the San Francisco Free Clinic, serves as chairman of the San Francisco Foundation, and is a member of the Haas School's Advisory Board. He proudly wears his commitment to life and work on his sleeve: he has tattoos of his horse and his company logo adorning his arm and leg.

The Business Forecast Luncheon takes place, Thursday from 11:30 a.m. to 1:30 p.m. at the City Club, located at 155 Sansome Street, 10th Floor, San Francisco. Registration is \$35 for recent graduates (1995-2001) and \$45 for other Haas alumni. Online registration is available at www.haas.berkeley.edu/alumni. For more information, contact the Haas School Alumni Relations Office at 510-642-7790 or e-mail alumni@haas.berkeley.edu.

SUN MICROSYSTEMS CHOOSES HAAS FOR LESSONS IN HIGH-TECH MARKETING The Center for Executive Development welcomed representatives from Sun Microsystems' division in the Netherlands to a half-day program today at the Haas School. The program participants include the firm's executives and its top clients from Holland, including executives from CMG, EDS, GE Access, Cap Gemini, and Ernst & Young.

The program, "Entrepreneurial Leadership in a Competitive IT Sales Environment," is designed to meet the needs of three different types of participants: distributors, systems integrators, and value added resellers. Russell Winer, the J. Gary Shansby Professor of Marketing Strategy, is presenting a session on "Channels Management in the Era of the Internet." Drew Isaacs, executive director of the Management of Technology Program, is presenting a session on new venture marketing.

For information on custom executive programs at Haas, please contact the Center for Executive Development at 510-642-4735 or via e-mail at execdev@haas.berkeley.edu.

HAAS IN THE NEWS An interview with Hal Varian, dean of the School of Information Management and Systems and Haas professor, was featured in the June 11 issue of Fortune Magazine. "Okay, Now What?" profiled four thinkers on their view of the economy.

Sea Power & Associates, the winners of the Social Venture Competition, was profiled in the Contra Costa Times on June 10. Read the full text at http://www.contracostatimes.com/cgi-bin/emailfriend/emailfriend.cgi?mode=print&doc=http://www.contracostatimes.com/news/stories_news/waves_20010610.htm.

Dwight Jaffee, professor of banking and finance and co-chair of the Fisher Center for Real Estate and Urban Economics, and Ken Rosen, the California State Professor of Real Estate and Urban Economics and chairman of the Fisher Center for Real Estate and Urban Economics, were featured on the front page of the real estate section of the San Francisco Business Times June 8 - 14 issue.?

Jaffee and California Economist Cynthia Kroll, were quoted in the San Francisco Chronicle on June 3. The article quoted their recent report on the state of the California economy.

A column by Varian appeared in The New York Times on May 31, on reasons to be wary of privatizing Social Security.

Carl Shapiro, the Transamerica Professor of Business Strategy and the director of the Institute of Business and Economics Research, was mentioned in the Los Angeles Times on May 29 in connection with General Electric's plans to purchase Honeywell International.

Rosen was quoted in the San Francisco Chronicle on May 28, commenting that Bay Area real estate market has returned to reality.

The San Francisco Business Times featured Rosen in their May 25 issue in the article "Rosen: The economic hangover has just begun".? Read at <http://sanfrancisco.bcentral/sanfrancisco/stories/2001/05/28/newscolumn5.html>

Dean Laura D'Andrea Tyson was quoted in Business Week "Financial Education for Undergrads" on May 21.? Read the text at http://www.businessweek.com/magazine/content/01_21/b3733133.htm

Jonathan Berk, associate professor of finance, and Rich Lyons, professor in the Haas Economic Analysis

Viacom Drops Blockbuster Split-Off Plan --- Rebound in Video Business Produces an About-face In Strategy for the Unit
By Martin Peers Staff Reporter of The Wall Street Journal

03/28/2001 The Wall Street Journal A3 (Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW YORK -- Viacom Inc. is finally giving up on its long-stalled plan to split off its Blockbuster Inc. unit, saying that the video-rental giant's business has turned around so well in the past few years that it wants to keep it. For more than a year Viacom has said it was waiting for a recovery in Blockbuster's stock -- long stalled below its offering price -- before it went ahead with previously announced plans to split off the remaining 82.3% of the publicly traded unit. But Viacom now has "no plans" to do the split-off, Viacom President Mel Karmazin said in an interview. Mr. Karmazin said the change in Viacom's attitude largely reflects a significant turnaround in Blockbuster's core video-rental business. "Blockbuster has been picking up market share and growing the business," Mr. Karmazin said, adding that Viacom was "very enthusiastic about its future prospects." Viacom will formalize its new stance in its 10-K annual report, expected to be filed with the Securities and Exchange Commission in the next couple of days. Viacom's change of mind is likely to spark speculation that the company will make an offer to buy the 17.7% of Blockbuster stock outstanding that is in the public's hands, to make it easier to tap the cash now being generated by the chain. Mr. Karmazin declined to comment on that yesterday. It is the latest twist in Viacom's long saga with Blockbuster. When Viacom originally acquired the business in 1994, it hoped it would be a cash cow that would help pay for the Paramount Communications acquisition that year. But instead, Blockbuster turned into a problem child, as growth in the video market ground to a near halt and the unit spent most of its cash on building new stores. By 1997, it was a drag on Viacom's stock. But the situation has turned around. Blockbuster's video-rental business is growing strongly while many of Viacom's advertising-dependent businesses, especially television and radio, are likely to be affected by the weakening economy. Blockbuster has been able to grab market share, reflecting fading competition from other chains and independent stores. It also has scaled back its store-building plan, so it is generating cash. Although Viacom started talking about creating a separate stock for Blockbuster in 1997, it wasn't until August 1999 that Viacom sold a minority stake in an initial public offering. At the time Viacom planned to unload within about a year of the IPO its remaining Blockbuster holding by offering Viacom shareholders a chance to exchange their shares for stock in the video-rental unit. But the IPO didn't do as well as expected. With new technologies on the horizon such as video-on-demand, Blockbuster was seen as vulnerable, and investors weren't attracted to the stock. Within months of the offering, Blockbuster stock was trading below the \$15-a-share offering price, which damped Viacom's enthusiasm for proceeding with the rest of the split-off. By the end of 1999, Viacom said it wouldn't proceed with the split-off unless Blockbuster's stock price rose above \$20. Blockbuster's stock remains considerably below the \$20 mark, meaning that the unit might not have been fully split off in the near term anyway. And Viacom could always change its mind if conditions shift again. But for now, Blockbuster appears to be solidly part of the Viacom family. Blockbuster stock rallied sharply in the first couple of months of this year, from around \$8 at the end of last year to a high of \$15.10 in late February. Its shares rose six cents to \$13.30 as of 4 p.m. yesterday in New York Stock Exchange composite trading. Salomon Smith Barney analyst David Riedel said the rally reflected Blockbuster's performance and expectations that it will report a "phenomenal" first quarter. Mr. Riedel said he expects Blockbuster to report EBITDA of \$582 million this year, including losses on new media, on revenue of \$5.36 billion. Last year the unit generated EBITDA of \$534.8 million on revenue of \$4.96 billion. By comparison, in 1997 Blockbuster had EBITDA of \$207.9 million on revenue of \$3.3 billion. EBITDA, often referred to loosely as operating cash flow, is earnings before interest, taxes, depreciation and amortization. John Antioco, who took over as chief executive of Blockbuster in mid-1997 and is credited with overseeing the comeback, said Blockbuster's U.S. market share has risen to 36% at the end of last year from 26% in 1997. He said the company expects Blockbuster's share to approach 40% by the end of this year and to rise to 50% over the next three years. Meanwhile, the specter that new electronic services would hurt Blockbuster has faded. Blockbuster's own efforts to roll out a video-on-demand service with energy concern Enron Corp. were recently terminated, although Blockbuster says it continues to experiment with VOD. Business is so strong that Blockbuster now is having to deal with a new problem: long

check-out lines at stores, where in some cases customers have had to wait for 45 minutes. Mr. Antioco said Blockbuster was working to relieve capacity problems, noting that the amount of business in the average Blockbuster store has grown 35% in the past three years.

National Desk; Section A Bush Names 2 to Panel Monitoring Energy Markets By JOSEPH KAHN

03/28/2001 The New York Times Page 14, Column 2 c. 2001 New York Times Company

WASHINGTON, March 27 -- President Bush named two new commissioners today to the federal agency that oversees electricity markets, a move that could lead to a shift in the agency's largely hands-off approach to California's power crisis. Mr. Bush named Patrick H. Wood III, head of the Texas Public Utility Commission and a longtime ally of the president, to fill a vacant seat on the Federal Energy Regulatory Commission. The president also named Nora M. Brownell, who serves on the Pennsylvania Public Utilities Commission, to fill a second open slot

724 Solutions to Acquire Tantau Software for \$375 Million TORONTO (VENTUREWIRE) -- 724 Solutions, an Internet infrastructure software firm that is traded on the Nasdaq and Toronto stock exchanges, said it agreed to acquire Tantau Software, an Austin, Texas-based provider of software and services that enable mobile Internet commerce. 724 Solutions will make the acquisition with 19 million shares of stock, valued at approximately \$375 million. 724 Solutions shareholders will own about 68% of Tantau. 724 Solutions founder, chairman, and CEO Greg Wolfond will continue to serve as chairman. Tantau co-founder, president, and CEO John Sims will be CEO of 724 Solutions. Four members will be added to 724 Solutions' board of directors, including Mr. Sims. Tantau Software is backed by Chase Capital Partners, General Motors Investment Management, Hewlett-Packard, Nokia, the Texas Growth Fund, Austin Ventures, Compaq Computer, and Techno Venture Management. <http://www.724.com>

El Dorado Ventures Raises \$250 Million Fund MENLO PARK, Calif (VENTUREWIRE) -- El Dorado Ventures today announced the formation of its latest fund, El Dorado Ventures VI. The \$250 million fund will continue the firm's focus on early-stage, information technology investments located in the western United States. El Dorado Ventures VI expects to fund 10 to 12 early-stage companies during 2001. Recent El Dorado investments include Appshop, Network OSS, Strix Systems, and Glow Networks. <http://www.eldoradoventures.com/>

Children's Site MaMaMedia Down to 15 Employees NEW YORK (VENTUREWIRE) -- Struggling children's Web site MaMaMedia has laid off an additional 55 staff members, leaving the company with only 15 employees. The company cut 40% of its staff in October and 20% over the summer. The company is trying to stay afloat despite tough market conditions and hopes the reduction in staff will stretch its funds until a merger or acquisition deal goes through. In the meantime, the company is looking for partners and insists it is not shutting down. The company said it is concentrating on its online property only, putting its print magazine, MaMaMedia: A Kid's Guide to the Net, on hold. MaMaMedia has received funding from BancBoston Ventures, Essex Investment Management, Intel, J. H. Whitney & Co., J & W Seligman & Co., RRE Investors, and Van Wagoner Capital. <http://www.mamamedia.com>

Ex-Prodigy Chair to Head Network Services Firm iVMG Names SAN JOSE, Calif. (VENTUREWIRE) -- iVMG, a network services firm, said it has appointed Samer Salameh as the company's first president and CEO. Mr Salameh was CEO of Prodigy Communications, a DSL Internet services provider, until June of 2000, and served as Prodigy's chairman until September. He remains on that company's board. This past May, iVMG raised \$10 million in a Series A round led by Accel Partners. <http://www.ivmg.net>

Summary first, comments second. Short read of SDGE proposal:

Plan establishes procurement and recovery strategy for SDGE as standard offer provider post Jan 1, 2003. Procurement plan would be submitted annually for PUC approval with ongoing discussions to allow modifications to plan as needed. Supply side of plan comes from URG (SONGS, QFs, PGE and other bilateral contracts - about 1/4 of total requirement), state resources (DWR and CPA), and market purchases (short and long term, fixed and variable, peaking) in that order. - SDGE takes no responsibility for administering state-owned resources. Takes only what is needed and not obligated to take anything more. Long term products procured through RFPs. - Most details of portfolio kept confidential, except load forecast and RFP process. Demand side of plan is load forecast, net of DA load. - DA load is identified through 90 day open enrollment period that starts 180 days before procurement plan is submitted. Over 20 kW customers commit to 5 year departure. Smaller customers commit to 1 year departure. - Departing customers pay exit fee for DWR and URG costs. Premature returns pay re-entry fee and spot pricing. - Departures not official until PUC rules on the procurement plan. Cost recovery through a PCAM (Procurement Cost Adjustment Mechanism). Two components - energy (including ancillary services), and a balancing account adjustment component. - each component is adjusted monthly. Other policy gems thrown out for discussion: - State must maintain strong procurement role; e.g. administer DWR contracts, consider combining generating assets under State portfolio management - PA-style auction of standard offer, with departing customers treated the same as DA.

Direction of comments (through AReM would seem fine):

Departure should not be limited to open enrollment periods. During open enrollment, certain amount of load, at least amount that would be supplied by market purchases, should be designated as fee-less. During other times, departure is permitted with appropriate exit fee. Appropriate exit fee must be based on truly unavoidable costs and have not already been recovered through AB 1890 CTCs. Re-entry fee should only be required if returning customer wants PCAM. Otherwise, customer gets spot price and there is no fee. 5-yr and 1-yr commitment periods mean nothing and should be eliminated. Returning customers get spot price or buy their way into PCAM. Pricing data used for PCAM should not be confidential. Customers should know their risk exposure when buying PCAM - what's the portfolio, term of contracts, pricing volatility, etc. Otherwise customer is kept in dark, not knowing pay they are paying for. Long term solution is auction or similar disposition of customers to market. Solution is not for state to take over power plant management.

Sue - let's you and I talk first. Is AReM going to comment?

[mailto:douglass@energyattorney.com] Sent: Saturday, August 25, 2001 2:14 PM To: Vicki Sandler; Tamara Johnson; Mara, Susan; Steve Huhman; Roger Pelote; Rob Nichol; Randy Hickok; Nam Nguyen; Jim Crossen; Dasovich, Jeff; Janie Mellon; Jack Pigott; Greg Blue; George Vaughn; Gary Ackerman; Ed Cazalet; Denise Cazalet Purdum; Curtis Kebler; Curt Hatton; Corby Gardiner; Charles Messner; Carolyn Baker; Bill Ross; Karen Shea; Max Bulk Subject: IMPORTANT ! : Motion of San Diego Gas & Electric Company (U 902-E) for Adoption of an Electric Procurement Cost Recovery Mechanism and for Order Shortening Time

Yesterday, SDG&E filed a motion for adoption of an electric procurement cost recovery mechanism and for an order shortening time for parties to file comments on the mechanism. The attached email from SDG&E contains the motion,

an executive summary, and a detailed summary of their proposals and recommendations governing procurement of the net short energy requirements for SDG&E's customers. The utility requests a 15-day comment period, which means comments would have to be filed by September 10 (September 8 is a Saturday). Reply comments would be filed 10 days later.

The filing provides the following discussion of direct access:

____ =20

"Developing the net short requirements of consumers depends on the extent to which they might be served instead by third party providers. The level of direct access will affect these net short requirements. At present, there is substantial uncertainty concerning the future disposition of direct access and third party supply of retail customers that jeopardizes creation of an optimal plan. This uncertainty has the potential for increasing costs to San Diego retail customers as a result of unnecessary over- or under commitments. To resolve this uncertainty, the Commission needs to coordinate direct access with resource planning, at least on an interim basis. SDG&E discusses below how to provide for this coordination.=20

As the retail market matures, SDG&E expects that direct access elections will gain stability and will not be characterized by severe volatility. That stability will allow planners to make reasoned assumptions on direct access and rely on them in developing a procurement plan. However, today, direct access is subject to substantial uncertainty. Before the high prices of the summer of 2000, approximately 20% of SDG&E's retail load had elected direct access. By the beginning of 2001, direct access had reduced by nearly half. More recently, SDG&E has seen an increase in direct access, perhaps as a result of two factors: first, would direct access customers be able to avoid paying a share of CDWR contract costs, and second, would the state suspend direct access, as appears to be permitted under ABx-1 1. Furthermore, the legislature is considering legislation that would permit direct access, and other bills that would encourage municipal aggregation of load. The effect of this latter bill is similar to direct access, but it could cause large quantities of load to leave or return to the system quite abruptly.=20

These events illustrate the need for added coordination between direct access and resource planning. The necessary coordination could come by using an open enrollment period each planning cycle under which direct access elections take place. During that enrollment period, the utility is provided information on the amount of load electing direct access (or municipal aggregation) and the length of the direct access commitment. This open enrollment period would last for 90 days and commence 180 days before SDG&E is scheduled to submit its procurement plan. Customers over 20kW would make commitments to service b

One More Hot Development-Mobile Outlook, June 5 & 6, San Francisco Airport Marriott

Exciting, new presentation just added to the Mobile Outlook agenda. Anthony Alles, formerly of Shasta Networks (acquired by Nortel Networks for \$340 million) is now back with a new venture called Tahoe Networks. Mobile Outlook will be the first time he publicly showcases their strategy for merging the worlds of data and mobility. This is just one example of the up 70 privately held companies to be showcased at Mobile Outlook. Don't miss out on the next big opportunity! Mobile Outlook is less than 3 weeks away, so register:<http://www.mobile2001.net/register.asp>

Beenz.com Cuts Staff Down To 30, CEO and President Step Down

mail? top

LONDON (VENTUREWIRE) -- Beenz.com, which developed an online currency, said it has cut its staff down to 30 from a high of 265 employees last year and closed offices in Japan, Hong Kong, Korea, and Italy as part of a "cost rationalization," restructuring process. A company spokesperson said a core group will remain in the London and New York offices as the company looks for a buyer or strategic alliance. Charles L. Cohen (CEO, CTO, and founder) and Donald M. Maguire (president and COO) have both stepped down in an effort to cut costs. CFO and director Stephen Limpe will now also assume the roles of president and CEO. Over the past several months the company had begun asking employees in its U.K. office to volunteer to leave the company. In December it laid off 28 people in its San Francisco and New York offices. At that time the company began marketing its new "Beenzcodes", which provide online incentives in traditional product packaging. The company spokesperson said the beenzcodes product is currently available in the UK, although there are no customers yet. He said the company will not seek another round of funding. Beenz has raised \$80 million to date. Beenz.com's investors include Apax Partners, Artemis Ventures, BayStar Capital, DRW Venture Partners, the Gefinor Group, Hikari Tsushin Capital, ING Barings, Kataweb, New World Cyberbase, Oracle Japan, Patricof & Co. Ventures, Softbank e-Commerce, Sycamore Venture Capital, and Viventures Partners. <http://www.beenz.com>

EO Broadband Firm Gets \$381M Debt & Equity in Round One

mail? top

OXON, U.K.

(VENTUREWIRE) -- EON Communications, a newly formed broad-band communications company, announced closing a GBP 265 million (\$381 million) first round of debt and equity financing. EON received a total of \$158 million in equity financing. The round was co-led by Madison Dearborn Partners with \$82 million and TD Capital Communications Partners with \$43 million. Other investors included Incepta Partners with \$18.7 million and GE Capital Telecom with \$14.4 million. TD Securities and the Bank of Scotland arranged syndicated debt financing of \$223 million. Madison Dearborn and TD Capital are both represented on EON's 11-member board of directors. EON currently employs an eight-member management team and plans to employ 240 by the end of 2002. The company said the financing will be used to lay its cable network in Southwest Scotland and

Tomorrow at 4 EDT sounds good to me but I'm not sure we're ready. I'd like to make sure all of our sponsors like the idea of coordinating with IBER and UCEI. What say you, sponsors? The co-sponsorship decision affects our decisions on place, topics, and speakers, because IBER and UCEI would need to get involved right away.

I spoke with Borenstein last night. Shapiro's initial idea was exactly what we're planning. They appreciate and respect the fact that we've done most of the legwork. They'd like to be part of it and it sounds like they would consider it a favor if we included them. IBER has a subgroup called the Competition Policy Center which is a program meant to exploit the incredible concentration of antitrust economists at UC Berkeley. I can certainly imagine ways the school could benefit from a stronger connection with CPC and UCEI, who are so widely respected and are doing public policy. If Lee thinks its worth potentially losing a bit of limelight on this conference for the long run benefits of building resources and connections on campus, I'm all for it. Rob

Many rural towns to escape blackouts, utility maps show=20 By Carrie Peyton Bee Staff Writer (Published July 5, 2001)=20 Huge stretches of Northern California, including many rural foothill and=20 valley communities, won't face rolling blackouts this summer, spared by a= =20 combination of geography and circuitry.=20 Placerville and Loomis, Esparto and Isleton are among the many towns that= =20 will be largely or entirely bypassed by deliberate blackouts, according to= =20 new Pacific Gas and Electric Co. outage maps.=20 Such communities are served by so few circuits that each one has been=20 exempted from outages because a critical facility, such as a fire station o= r=20 a water treatment plant, lies along the circuit somewhere, PG&E spokesman= =20 John Nelson said.=20 Both PG&E and the Sacramento Municipal Utility District have begun shedding= =20 more light on their strategies for rotating outages in the wake of a=20 governor's order requiring utilities to let people know where blackouts wil= l=20 strike next.=20 For PG&E, that has meant quickly posting and then updating blackout maps on= =20 its Web site. For SMUD it has meant publicly detailing, for the first time,= =20 the boundaries of 78 separate rotating outage areas and listing by number= =20 which areas could be tapped next.=20 "We were contemplating putting the map on the Web before the governor's=20 order, but the timing coincided very well," said John DiStasio, SMUD's=20 assistant general manager for customer service.=20 SMUD updated its Web site, www.smud.org, on June 22 so that now people can= =20 click on "rotating outages" and then "next likely locations and map" to see= =20 the shape of outages to come.=20 The map replaces less-precise neighborhood names, which is all SMUD supplie= d=20 until Gov. Gray Davis ordered utilities to give the public "common=20 geographical boundaries, grid or block numbers, maps or similar identifying= =20 information" about where outages will strike.=20 With six days of rolling

blackouts already behind California this year, and forecasts that more probably lie ahead, Davis has told utilities and the state Independent System Operator to give better notice of when and where blackouts might occur. Grid operators and utilities have cautioned that Davis' program of two-day, one-day and one-hour warnings could produce many false alarms because power supplies often come through at the last minute. There is also some wariness about outage maps, which SMUD and PG&E warn could change at any time. But the maps do provide insight into how each utility will roll blackouts through its territory. PG&E's maps, on the Web at www.pge.com under "find your outage block" and then "rotating outage block map," have recently been updated to be searchable by zip code. They show that the vast majority of El Dorado and Placer counties and much of Yolo County are in PG&E's "block 50," a designation for a circuit that won't be in line for rolling outages because someone along it is crucial to health or safety. Police stations, fire stations, hospitals and airports are all deemed essential customers that should keep functioning even when the state power grid is so overloaded that blackouts are needed to keep it from collapsing. In densely populated areas, circuits tend to be compact, leaving lots of neighborhoods eligible for rolling blackouts, Nelson said. But "in rural areas, particularly remote rural areas, a circuit can go on for miles and miles," Nelson said. "You can have multiple communities on one circuit (and) virtually every community has either a police station or a fire station or a hospital or a drinking water facility." That has been good news for communities like Placerville, which scrambled for traffic control earlier this year when a rolling outage took out the signal lights on Highway 50, which bisects the town of 10,000. "That has been our biggest concern because of the amount of traffic that goes through there," said City Manager John Driscoll. Placerville will be spared future outages because regulators now are protecting more hospitals from blackouts, and much of the rest of the town shares circuits with hospitals. "We didn't ask to be exempted out, but I feel very happy that we are. From a selfish standpoint, it feels very nice," Driscoll said.

Details emerge in power contracts By Carrie Peyton and Chris Bowman Bee Staff Writers (Published July 3, 2001)

California's power bills for the next decade probably will exceed the forecasts of Gov. Gray Davis, the State Controller's Office said Monday as it released unedited versions of long-term contracts in a new jab at the governor. The electricity contracts, which Davis' office sought in court to keep secret, offer a glimpse into the rapid, high-stakes deals struck early in the state's power crisis and illustrate the way deregulation's unraveling could haunt California for years to come. Some show that builders of new power plants could recoup the entire cost of those plants in four years or less. Some show lucrative swaps for power, including one arranged the same day California was rocked by rolling blackouts. More than two dozen additional administrative contracts detail the price California is paying its consultants to seek a way out of the power mess, from tens of thousands for Davis' aides down to \$51 an hour for copying and phone answering. The governor's office defended its estimates of the state's future power bill. The 41 long-term contracts, 27 consulting contracts, five short-term deals and stacks of receipts and invoices released Monday by state Controller Kathleen Connell may just be the start. Her office hopes to provide details about how much California has already paid individual power generators in the volatile short-term, or "spot," market. The deals include so many intricate pricing formulas that Connell said she couldn't immediately predict exactly how high

ACTION ITEMS from today's IEP member company lobbyist conference call:

AB 60x (Hertzberg) - Calpine will attempt to get a meeting with the Speaker on Monday regarding his interest in other "California First" avenues, and report the results to IEP.

- In anticipation of using Plan B, there will be a drafting meeting on Friday (3/16) at 11am in IEP's office to fine-tune the current IEP proposed amendments (attached).

- All available lobbyists will push the Speaker's office to hold off on moving the bill until IEP has had an opportunity to present language.

- E+M will schedule a follow-up conference call on this issue early in the week.

- IEP will explore the possibility of an editorial campaign regarding the poor direction of this "California First" issue, tying it to long-term contracting.

SB 6x (Burton) - Review IEP proposed amendments to soften the eminent domain language (attached).

- All available lobbyists will make contact with the Pro tem's office to support the IEP amendments.

AB 8x (Migden) - Review IEP comments that mitigate the EOB's authority in the coordinate of operation and maintenance scheduling (attached).

- All available lobbyists will make contact with Assembly Member Migden's office to support a stakeholder meeting taking place, because IEP would like to make this bill work.

SB 39x (Speier) - IEP will explore the possibility of including in its PR efforts on maintenance and outages, the IOU- and labor-run nuclear facility being down for an extended period of time.

PLEASE SHARE ANY INFORMATION YOU GET WITH ME FROM YOUR CONTACT WITH ANY OF THE ABOVE-NAMED MEMBER'S OFFICES.

THANKS.

FERC orders hearing on power overcharges By David Whitney Bee Washington Bureau (Published July 26, 2001)
WASHINGTON -- The Federal Energy Regulatory Commission ordered hearings Wednesday to determine how much money electricity generators will have to pay in refunds to California for wholesale power overcharges. Under the process laid out by the commission, based on the recommendations of an administrative law judge who tried to negotiate a settlement earlier this month, the dollar amounts of refunds will not be set until after a hearing to be completed in September. "Market participants need to understand that the cloud of market uncertainty will lift at some point soon," said the commission's chairman, Curtis Hebert. "Suppliers and customers soon will be able to finalize their accounting ledgers and again make rational purchasing and selling decisions." But the commission's order is unlikely to result in refunds acceptable to California, meaning that lawsuits and appeals over a final commission order are virtually certain and could stretch on for months or years. "This decision shows that there is a fundamental disconnect between FERC's responsibility to protect consumers and the actions of its commissioners," said Sen. Barbara Boxer, D-Calif. "Once again, FERC has shown that it is not up to the task, and as a result, California is left paying the price." Gov. Gray Davis insists the state was overcharged some \$8.9 billion from May 2000 until June 19, when the commission ordered new rules to prevent price gouging. He said Wednesday's FERC ruling validated the state's claim. "As for the energy profiteers and pirates, let me make clear that I will not rest until every dollar gouged from California businesses and residents return to California," Davis said. "If the FERC does not make California whole, we will see you in court." But power generators said the overcharges, if they occurred, were just a fraction of what the governor is demanding. In settlement negotiations before the administrative judge, the generators and marketers offered only about \$700 million. In his July 13 recommendations to the commission, Chief Administrative Law Judge Curtis Wagner said refunds probably "amount to hundreds of millions of dollars, probably more than a billion dollars in aggregate sum." Despite differences between the commission's three Republicans and two Democrats over some of the methodology that will be used to calculate the refunds, the five-member panel was otherwise unanimous in its decision to send the matter for a hearing. The differences on the commission focused primarily on two issues, including the inclusion of publicly owned utilities like the Sacramento Municipal Utility District and the Los Angeles Department of Water and Power in a refund order. Under the Federal Power Act, the regulatory commission does not have authority over publicly owned utilities. But the Republican majority on the commission said it thought including the publicly owned utilities was a matter of "equity," meaning they should not be permitted to escape refunds for overcharges that the private generators will have to make. Commissioner William Massey questioned why the deliberate withholding of power by generators to incite shortages and drive up electricity costs wasn't being factored into the refund calculations. But the commission's lawyers said they had looked into that question and determined that without an explicit rule against withholding power from the market, the regulatory agency was powerless to seek economic redress on that ground.

Capitol Digest: A new proposal to rescue Edison

(Published July 26, 2001) State lawmakers Wednesday released a new proposal to save Southern California Edison from bankruptcy in another attempt to send Gov. Gray Davis an agreement by Aug. 15. The new package combines parts of plans from both houses but relies more heavily on a proposal by Assembly leaders. Some lawmakers intend to review the plan informally today, and it remains unclear whether a vote will come Friday. The plan would have the state issue \$2.9 billion in bonds that customers would pay off with a portion of their electricity rates. All consumers would help pay down the debt for the first two years, while only larger users would pay thereafter. The state also would collect power generator refunds in an account with the purpose of returning them to customers. The plan would require that 10 percent of new

generation involve renewable sources, such as wind or solar. The state would not purchase Edison's transmission lines, as had been specified in an April agreement between Davis and the utility. Jones seeks SEC probe California Secretary of State Bill Jones on Wednesday asked the Securities and Exchange Commission to investigate whether energy consultants to the Davis administration engaged in insider stock trading. Citing newly filed reports that show several state energy traders owned stock in energy- related companies, Jones said a federal inquiry is warranted. Gov. Gray Davis last week required energy traders to sell their energy stocks or leave their jobs. The SEC declines to comment on its investigations. --Bee Capitol Bureau

No bailout

(Published July 26, 2001)

While most legislators are away on vacation, a few key members are meeting to put together a deal to rescue Southern California Edison. If this sounds eerily familiar, it should. California got itself into its energy mess back in 1996 when the Legislature let a few of its members, working with the utilities and business interests, write risky deregulation legislation that few lawmakers (they all voted for it) actually understood. Strangely enough, Gov. Gray Davis seeks to solve the electricity problem with the same disastrous process. He's pushing a weary Legislature to act quickly to erase Edison's d

Governor Davis' Lead Bond Counsel Holds Teleconference Today with Financial Analysts: Summary The host of the teleconference was Mr. Joseph Fichera, CEO of Saber Partners (serving as Governor's independent Bond Counsel) Mr. Fichera's goal appeared to be to calm the financial markets as the Governor is hoping under a best case scenario to put the bonds out to market sometime in June. Fichera told me yesterday that he does these calls on an "as needed" basis. There appeared to be some concern that the "media is getting ahead of the story" and the inference could be made that this is causing problems for the Governor's MOU legislation (which they also said they hope to have signed by June) and perhaps for the emerging "Plan B" as well. A replay of this teleconference is available at www.energyinfo.ca.gov.ca Mr. Fichera broke down his statement into the following sections: California State Senate: Pieces of Governor's MOU legislation moving in separate committees; in the Senate this is positive for moving it forward. Assembly Plan B Group: Assemblymembers Keeley, Dutra and Nation are working together and have good ideas to move the Governor's MOU legislation through. Fichera said that the Governor's office is meeting with both parties but the plan is still in the formative stages. He added that they still have the Senate to deal with and no movement on the proposal is imminent. They are hopeful that it will be "moving toward resolution in a week or two." Generators: Fichera stated that since the Governor's meeting with the generators, a subgroup has agreed to continue to meet with Governor's staff and advisors to resolve the issues. He stated that the issue of litigation and

investigations by the AG's office is "off the table" for discussion and that topics of discussion are limited to supply issues and managing the coming summer. QFs: Governor's team has facilitated 5 days of discussions with SCE and QFs over past two weeks; most QFs are represented at these negotiations. They continue to discuss the back payments owed and lower prices going forward to give pricing stability to CDWR and the market. Their hope is that due to negotiations, the QFS will all be fully available to the market this summer. PGE: They see the bankruptcy judge's refusal to allow certain QFs to get out of their contracts as a positive development. QFs on-line: There are currently 700 MWs off-line; this is better than their model anticipated for May. They expect more than 90% on-line by June. Last month 1700 QF MWs off-line; Fichera explained that standard QF contracts have severe penalties if not on by June 1 during peaks but that they are allowed to be off during off-peak hours. He added that they are still trying to resolve their issues. Key aspects of budget plan (by this I believe he meant energy financing, not the annual budget): conservation and contracts Conservation: They built in a 4% reduction in demand and 3% reduction for price elasticity--conservatively projecting 7% in conservation. He stated the we saw 9% conservation in March and April, "so we think our model is conservative." Fichera added that the new electricity rates go out in June and they expect that this will cause a "good reaction" due to price signals and demand reduction. They also built in 2% in natural load growth to their projections as well to further ensure a conservative estimate. Energy Costs: Projected (\$1.78 billion) vs. actual (\$1.80 billion) equals a variance of 1.4% May Energy Costs: As of May 6th, right on budget target, with a variance of less than a half percent Contracts: Fichera stated that DWR continues to execute new contracts and reduce the net short exposure in the spot market. He added that 10-20% of necessary contracts are not yet executed, but rather in the agreement in principal stage. He released the following stats: Needed executed contracts completed (these percentages must refer to projected load accounted for): 43% for May, 67% for June, 48% for July, 42% for August When agreements in principle added in: 73% for June, 67% for July, 60% for August: Questions from analysts: Have you built-in an assumption that QFs will be able to opt out of contracts? "No, we do not because we are fighting the opt-out positions. The bankruptcy judge refused to allow this and the AG is probably going to be involved to stop that. A few hundred MWs have gone into the market. We are aware of this issue, which is why we're pushing the MOUs--this litigation would stop if we get an agreement on the MOU because the back payment issue would be settled." Timing with SDG&E, where are you on MOU or Agreement in Principle? We have to constantly reevaluate our negotiations due to other decisions {happening simultaneously around us}. We are resuming face to face negotiations on Monday and we are still resolved to reach an agreement. There is no drop dead date. Generators working group? We're discussing DWR credit issues, summer, support for MOU--the generators have issues with outstanding payments due. The Governor expects them to provide haircut re: those payments and that's part of discussion. QF resolution: will gas QFs be released from contracts? We don't know what PG&E is going to do but they could do that-- release at any time--no indications yet--haven't affirmed all the contracts yet. We want to avoid this in the SCE situation. There are a lot of overlapping QFs that supply both utilities. We are trying to set a standard as to what we are looking for. Bond issue timing? The current plan, assuming there is no further action by the legislature, is to close sales 91 days after bond sales, on Aug. 14. We have sufficient cash to carry us through this period. We are making a bridge loan from the General Fund. In June we see improved revenue stream from ISO; rate increases will also improve cash stream. Can you give us any prices on new contracts? Not on new contracts, we are resisting for market reasons giving out individual prices for individual contracts. Our website has aggregated average prices for contracts signed so far. Where is the legislature? Legislators want to see sharing of the

Electricity Trading Builds Oh-So Slowly In France By Sarah Wachter Of DOW JONES NEWSWIREs

03/23/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

PARIS -(Dow Jones)- Although electricity trading volumes are creeping higher in France, activity will probably remain subdued and irregular until a satisfactory regulatory regime is put in place. Traders complain about the uncertainty caused by the temporary rules of grid operator RTE, and about tariffs for access to the network. Volumes won't take off without well-designed, permanent rules, they said. Even then Europe's second-largest electricity market may never become much of a trading hub because of the dominance of state utility Electricity de France (F.EDF) which, with its huge installed nuclear capacity, is already among Europe's cheapest electricity suppliers. "There's so much missing," said Katrin Durwald, an energy analyst with HEW Energy Trading, talking about RTE's tariffs and rules. "Nothing is really clear in France," she said. Traders are especially upset over RTE's congestion costs, which only new market entrants share and which can add as much as 50% to the price of electricity. Other traders say access charges to the medium- to low-voltage network are impossible to figure out. But permanent tariffs won't go into effect until July 1 at the earliest, French electricity regulator CRE says. Permanent grid rules won't reach the regulator's desk for review until early summer, reckons RTE President Andre Merlin. Even with clearer regulation, the dominance of EDF will hold back the market. Former monopoly supplier EDF is a formidable competitor, a predominantly nuclear power producer with some of the lowest electricity prices in Europe. Traders estimate between 20 and 50 trades are going through monthly in France, mostly for electricity delivered the next day or next week. That's a far cry from neighboring Germany before the launch of spot electricity exchanges there, when 160 short-term transactions were struck daily, HEW Energy Trading estimates. More immediately, what's missing in France is a steady stream of one-year supply deals, a sign that foreign power companies are regularly furnishing electricity to French industrial consumers. "I seriously doubt whether there are companies taking risk and supplying customers," a trader with a large European power company said. French high-voltage grid operator RTE said 325 grid access contracts were signed this year for all transactions, as of March 12, equivalent to an average of four of five deals a day. There are, nonetheless, some pockets of activity in France. Traders are exchanging blocks of electricity to help industrial consumers curb costly imbalance charges, by grouping the companies' electricity needs to even out consumption patterns. RTE says 21 companies are authorized to furnish or buy back imbalance electricity. Swiss hydro producers are also exporting spot electricity to France, analysts said, notably Elektrizitaetsgesellschaft Laufenburg AG (Z.EGL) and Aare-Tessin AG fuer Elektrizitaet (Z.AAR). "Germany and France are the biggest export countries for Swiss spot hydro," Durwald said. At the same time, two Dutch energy distributors, NUON NV (N.NUN) and REMU NV, have been active in France, traders said. NUON purchased a few small hydroelectric producers, which are bound under an eight-year contract to sell electricity exclusively to EDF. But NUON can sell electricity to new customers above the contract price EDF is obliged to pay under its single buyer obligation, Durwald said. Some traders see opportunities cropping up this year from changes to the way transport capacity is allocated on France's interconnectors with the U.K. and with Italy. "Cogenerators (gas-fired power plants) in France with surplus capacity could sell to traders in Germany looking to import electricity into Italy," a trader at a large pan-European trading organization said. RTE forbids electricity ordered and delivered on the same day sourced from Germany and Switzerland to be imported to Italy. That trader also expects the daily transfer capacity auction on the U.K.-France Interconnector, which starts March 31, to spark more electricity trading in both countries. "The day-ahead risk is rather limited, not only in France but also in the U.K.," he said. The following are traders and power companies said to be active in France, in addition to those concerns already mentioned in the article, according to a Dow Jones Newswires survey: Belgium's Electrabel SA(B.ELE) Spain's Grupo Endesa SA(E.EDS) TXU Europe Energy Trading(TXU) French independent producer SNET Enron Europe Ltd.(U.ENE) TotalFinaElf(TOT) Dynegy

Europe Ltd.(DYN) Electricite de Laufenbourg SA RWE Trading AG(G.RWE) E.On AG(G.EOA) Electricite de France(F.EDF) HEW Energy Trading AG

NEW DELHI, March 22. THE Government is awaiting the opinion of the Law Ministry on the claim of the Dabhol Power Company (DPC) for the bill of Rs 102 crore under the counter-guarantee cover, for the 740-MW Dabhol power project, before deciding on making the next payment to the utility. The Union Government has sought the opinion of the Law Ministry, as the Maharashtra Government had written to it, suggesting that the claim should not be honoured, as the DPC had not complied with load despatch instructions. The Law Ministry's views are crucial to any decision on going in later for future course of action which could be either arbitration or High Court proceedings. The Government has sought an early response from the Law Ministry as the 15-day interest free period for payment of DPCs's contentious bill for the month of December 2000 ends on Friday. According to the counter guarantee agreement, the Government will have to pay with interest (at Bank rate) the outstandings, if it is paid after 15 days of the receipt of the notice to the Government of India. The Government has one month's time from the date of presentation of the claim by the company to meet its obligations. Last time, the Maharashtra Government managed to make a payme

Mediator talked of a bigger refund: He reportedly suggested a \$4.5 billion= =20 deal midway through the failed talks. By David Whitney Bee Washington Bureau (Published July 11, 2001)=20 WASHINGTON -- Midway through the negotiations between California and power= =20 sellers to settle the myriad issues arising out of the state's energy crisi= s,=20 the mediator told California's negotiating team that he thought a deal wort= h=20 more than \$4.5 billion would be appropriate -- a much higher figure than he= =20 suggested after the talks ended Monday.=20 Whether the statement by Curtis Wagner, the chief administrative law judge= =20 for the Federal Energy Regulatory Commission, was a negotiating ploy or a= =20 reflection of his evolving beliefs is not clear.=20 Before the settlement talks began two weeks earlier, Wagner said he thought= =20 Gov. Gray Davis' demand for \$8.9 billion in refunds was too high and that a= =20 settlement probably would be in the range of \$2 billion to \$2.5 billion.=20 The disclosure that Wagner had contemplated a much higher figure midway=20 through the negotiations suggests the state had more support than the judge= =20 let on Monday when he said after the talks foundered that he thought a deal= =20 should involve "hundreds of millions, maybe a billion" dollars.=20 While the state wants \$8.9 billion, \$3 billion of that was for overcharges= =20 during the five months preceding last October and are beyond FERC's scope o= f=20 review. Even as a starting point then, the \$4.5 billion mentioned by Wagner= =20 represented 75 percent of the money the state was demanding for alleged pri= ce=20 gouging between October and May.=20 The judge's \$4.5 billion figure, divided between cash payments and savings= =20 from long-term

power contracts, was confirmed by three sources who asked to be identified only as "close to the negotiations" because participants had been required to sign confidentiality statements. The sources gave virtually identical accounts of a July 2 meeting with Wagner in which the judge also dismissed as "inadequate" a \$670 million settlement offer made by power generators and marketers. By Monday, the settlement offer had risen to \$716 million. But the state refused to back off its \$8.9 billion demand, and there never was any serious back-and-forth negotiations during the 15-day period the regulatory commission had given Wagner to craft a deal. As a consequence of the failed talks, Wagner said Monday that within a week he will send the five-member commission his recommendations on how it might approach an order refunding power overcharges. Among Wagner's suggestions is that the commission convene a hearing before a different administrative judge to take testimony from generators, marketers and the state on how to arrive at a fair settlement. The options sketchily outlined by Wagner on Monday included limiting the time when refunds are allowed -- something that could reduce state claims by about one-third -- and changing the way power plant costs are calculated to a formula more favored by generators. It is not clear whether Wagner, who moved from one negotiating team to another during his two-week quest for a deal, ever raised the \$4.5 billion settlement figure to the power marketers and generators. Joel Newton, who represented Dynegy Power, Duke Energy, Reliant Energy, Williams-AES and Mirant in the talks, said Tuesday he was bound by the confidentiality pledge to keep silent on the internal negotiations. Wagner also is refusing all media calls. According to the account of the negotiations confirmed by sources Tuesday, Wagner was angry at the snail's pace of progress after the first week of the talks. On Friday, June 29, Wagner called everyone into his hearing room and scolded them. He condemned the California team, saying they all ought to wear "crown suits" because they were "in the pocket" of Davis and refused to show any independence. He then turned to the generators and said that after a week of talks, nothing had been heard from them. He told them he wanted them to produce "real numbers, and hard numbers" over the weekend and that if they didn't, he would -- "and you're not going to like it." Wagner's admonition apparently moved no one toward a deal. On Monday, in the meeting with the California delegation, one source quoted Wagner as saying the settlement number he received from the generators and marketers "is so low I can't even present it to you." "I'm not happy with the figures, they're not adequate," others quoted the judge as saying. At that point, the sources said, Wagner said he was thinking of a settlement of \$2.5 billion in cash, \$2 billion in long-term contract savings and other money from out-of-state investor-owned utilities and even the federal Bonneville Power Administration, which markets power from dams in the Northwest. But as the clock wound down on the negotiations, nothing much happened until Friday and Saturday, when the California team met with the five largest power generators. It was at those meetings that the generators offered \$510 million in refund to settle their disputes with the state. But the money would have gone to reduce the tab for what they were owed by the state and California utilities, and it was loaded with conditions, including the state dropping all of its investigations and lawsuits. Wagner declared the talks over Monday, saying he was unable to bring the parties together.

The Bee's David Whitney can be reached at (202) 383-0004 or dwhitney@mcclatchydc.com.

Davis repeats threat to sue FERC to get full refund By Emily Bazar Bee Capitol Bureau (Published July 11, 2001) Gov. Gray Davis shot words of caution at federal regulators Tuesday, warning that he will sue them if they order power companies to refund anything less than the \$8.9 billion he and other state officials have demanded. The Democratic governor also lobbed threats at sta

In response to your requests, I have attached a copy of the final examination I used last year in the daytime version of this course. Note that because of some changes in course content and emphasis, the last two questions are outside the scope covered in E201a. The remainder of the exam is indicative of the style and range of difficulty and content of the questions typically asked in this course. - 98fq.pdf

Recipients	['scott.bolton@enron.com', 'stephen.burns@enron.com', 'eric.benson@enron.com']
File	dasovich-j/notes_inbox/11530.

Beginning tomorrow, we will be using a different bridge line number. The reason for this being that AT&T offers Enron a lower rate of \$.19/cents a minute vs. \$.24/cents a minute. In order to access the bridge line you will use the following numbers:

Toll Free Dial in Number: (888) 422-7141

International Access/Caller Paid Dial in Number: (334) 832-4208

Host Code: 203099 (you will be accessing as a host versus participant in order to have access to the bridge line).

As usual, if you need to reserve the bridge line, please let me know. Thanks.

Mendocino

Sender	afinch@iasco.com
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/deleted_items/188.

Hi Jeff,

We're trying to get final numbers for the Mendocino trip in September. The current plan is an all day ride on Sat.(Sept 22) and a four-hour ride on Sunday (Sept 23). Madeleine, Lu (from GGPS) and Jeff Walker are confirmed, as are myself and my husband. Pat S. is probably going; Nora M. is tentative and Madeleine has lined up another woman from Golden Gate Park who may also go.

SHould be a good group, so let us know if you can make it.

More Delay in Suspension of Direct Access

Sender	douglass@energyattorney.com
Recipients	['dpurdum@apx.com', 'ed@cazalet.com', 'berry@apx.com', 'tjohnso8@enron.com']
File	dasovich-j/all_documents/28272.

The attached CPUC press release says that the Commission is delaying until mid-August any action on the suspension of direct access.? This is reportedly being done at the request of DWR,?the Department of Finance, and the State Treasurer's Office.? The extension will, "allow the agencies more time to address any unresolved issues and, ultimately, provide interested parties ample opportunity for review and comment." ? We need to keep up the pressure.? This fight is not?over yet. ? Dan

File	dasovich-j/all_documents/12829.

Hi All!

We have set this Wed., May 23 at 2 PM for Catherine's baby shower. Currently, I have a \$150 target card as a present for her. Jen and I are also going to run out and grab a book and an outfit or two tomorrow. These items, as well as the cake and ice cream, will be from the entire office. If you would like to buy her something of your own feel free. Otherwise, you can make a donation to the gift card and other items. If you are looking for a donation amount, anywhere from \$5 - \$10 is adequate, but there is no pressure to give anything. I will be out of the office so Jen will be coordinating everything that day.

Attached for your information are the following two filings made at FERC on Monday on behalf of WPTF: 1.. Motion to Intervene and Protest of the Western Power Trading Forum. This was filed in connection with the ISO status report filing dealing with creditworthiness issues. 2.. Motion to Intervene and Comments of the Western Power Trading Forum. This was filed in connection with the Reliant and Mirant filing of a joint Section 206 complaint on October 18, 2001. My thanks to those who responded to the drafts with comments and suggestions.

AS7

Sender	leonard@haas.berkeley.edu
Recipients	['skkannan@us.oracle.com', 'thida@best.com', 'sbansal@cisco.com']
File	dasovich-j/mba_program/53.

I have attached AS7, the answers to the final problem set. Note that as promised, the applications to business decisions are quite direct, and you have a number of opportunities on PS7 to demonstrate your understanding of economics without using mathematics. This answer set will be discussed in section over the next 2 weeks. Some of the material on Vertical Integration will be covered in class next week. I thought it was worthwhile making sure you had all of this material in advance so you would have ample time to think about it before the final exam. - As7.pdf

AB 2xx update

Sender	cmicheli@carpentersnodgrass.com
Recipients	['teresa_casazza@aeanet.org', 'sglobby@pacbell.net', 'ron@caltax.org']
File	dasovich-j/notes_inbox/3115.

The Assembly Appropriations Committee, which had intended to hear AB 2xx (Corbett) next Wednesday, will instead hear this bill this Wednesday, May 23 at 9:30am. You should be aware that Corbett is really pushing the bill (she asked for the earlier hearing date) and that she will be holding a press conference in the morning to tout the bill.? There are significant concerns being expressed on the bill by the fiscal committee, but it is likely to be passed out. Also, the bill will not go to Suspense because it raises revenue for the State.? Therefore, it will be voted upon on Wednesday.

File	dasovich-j/all_documents/13447.

Classmates,

I am looking for contacts/collaborators interested in the Indian technology market.

My job this summer is to research the Indian tech market for an investment bank (www.broadview.com) . I will be visiting India in July to meet with VCs, Investment banks, technology firms and regulators.

If you happen to know people in the business (in India or in the US) who would be interested in collaborating with or talking to me, I would appreciate their contact info.

Thanks a bunch,

Siddharth

File	dasovich-j/all_documents/29381.

Jeff -- Here's the info for Monday:

Marathon Communications Inc. 8436 West Third Street, suite 700 Los Angeles 90048 323-655-4660

We'll be meeting with Joan Kradin (svp) and Rich Lichtenstein (president) at 11 a.m. I've told them we'll spend a couple of hours going over our issues and concerns with California (regulatory, commercial, legal, public perception, etc...) as well as our current activities (ENA, EES, etc.) and what we'd like to do going forward. They'll then put together a plan and we can get them on retainer by Nov. 1.

What other agencies do we have on retainer? (McNally Temple, the guy who did the focus groups, etc.) Do you know what their monthly retainer is? I'd like to get a sense of what we're already spending.

Looking forward to seeing you Monday. Have a great weekend! kd

TO: AD HOC GROUP

We received good coverage in the LA Times Friday, as well as CNN Financial (Street Sweep Program). We received mention in the Chronicle and NY Times Saturday. No doubt there is more to come, and much I have missed. Anita Patterson, in my office, is keeping a media file. Your additions are appreciated.

We have a chance to make a difference. There seems to be some momentum building for a rate hike. Would appreciate your reactions to Gov. Davis' latest proposal.

Thanks, David

Senate Investigative Committe Begins Hearings Today @ 1:30

Sender	jmunoz@mcnallytemple.com
Recipients	['andybrwn@earthlink.net', 'abb@eslawfirm.com', 'cabaker@duke-energy.com']
File	dasovich-j/all_documents/11236.

The State Senate begins it's investigative hearings today, April 18 @ 1:30 pm in Room 2040. The topic this week, and next week, will be to go over previous investigations into market power.

Today the committee will be hearing testimony from:

Frank Wolak, Chairman Market Surveillance Committee, CAISO. Eric Hildebrandt, Manager Market Monitoring, CAISO
Elaine Howle, State Auditor

IEP will be prepared to respond to media at the hearings, and will be distributing the attached materials:

An outline of previous investigations into market manipulation, and price gouging -- and ???their findings. ? A detailed analysis of the flaws in the CAISO reports

We will keep you posted.

Thanks, Jean

Greetings:

IEP will be making a FERC filing this week in response to the FERC staff report issued in response to the ISO Market Stabilization plan. We will have a call tomorrow to discuss the proposed language we are currently finishing drafting.

We will send out the language by COB today, please review it before the call tomorrow. If your company is also drafting language please send a copy of it to Andy ASAP.

The call will be tomorrow at 11:00 a.m. PST

The call in number is our usual number: 1-800-486-2726, The participant code 120895

JUST A REMINDER THAT IF YOU HAVE NOT SENT IN YOUR COMMITTEE COMMITMENTS TO CAROL (chudson@iepa.com) TO PLEASE DO SO ASAP!

As always, please let me know if you have any questions

Dear Friends and Colleagues:

I am truly pleased and excited to report that on 1 November I will start my new job as Director Government Affairs for Enron Corporation in its Portland, Oregon Office. I will be supporting Enron North America's Western power trading desk, which is located there. Among other people, I will be working with Tim Belden and Paul Kaufman. I will be commuting between there and my home in California until I can move the family up sometime during Q1 2001. My new contact information is as follows:

G. Alan Comnes Director, Government Affairs Enron Corporation World Trade Center 121 SW Salmon, 3WTC0306 Portland OR 97204 503-464-8129 mobile/pager phone: 510-367-5741 (for the time being) AComnes@prodigy.net (for the time being)

Please keep in touch and, if you are in Portland, give me a holler!

Cheers,

Alan Comnes

From: Dan Douglass [mailto:douglass@energyattorney.com] Sent: Monday, October 01, 2001 4:00 PM To: ARM; Gary Ackerman; Vicki Sandler; Anderson, Robert; Marilyn Ferrara; Herb Zinn; Steve Huhman; Max Bulk; John Yurkanin Subject: UC-CSU Application for Rehearing

UC/CSU has also filed an application for rehearing of D.01-09-060. The filing heavily emphasizes the DASR issue for pre-September 20 contracts. Their main point is that neither the utilities nor the Commission can lawfully set a deadline for submitting DASRs for accounts under a direct access service contract executed on or before September 20, 2001.

Dan

Gas ESPs and CPAG members:

For our meeting on Thursday, part of our agenda is a detailed review of the new gas ESP storage unbundling, and consolidated billing credits. Here is an electronic version of explanatory material that was mailed to gas ESPs early last week to prepare them for these new provisions of core gas aggregation service.

<<Open Season for Storage.doc>>

This storage unbundling will be the subject of an October through November open season, with implementation in December.

<<Billing Credits.doc>> These billing credits will be available in October.

You may wish to review these documents and generate questions for our meeting in San Francisco. If you have questions in the meantime, please call.

* Jerry Miller phone: 415.973.4104; fax 415.973.8494 123 Mission St. - Rm 2611; San Francisco, CA 94105

File	dasovich-j/all_documents/28276.

I think we'll sit on the sidelines for this one

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854

MDay <MDay@GMSSR.com> 07/02/2001 01:12 PM

To: "'Jeff Dasovich Enron SF'" <jdasovic@enron.com>, "'Paul Kaufman, Enron Portland'" <paul.kaufman@enron.com>, "'Sue Mara at Enron SF'" <smara@enron.com> cc: Subject: DWR/PG&E billing agreement

The Chief ALJ of the CPUC has put out for comment in the rate stabilization case a proposed services agreement between DWR and PG&E to cover meter reading and billing services provided to DWR by PG&E. Of note is the fact that DWR will pay \$1.7 million as a set up fee and between \$80,000 and \$115,000 a year for such services over the next four years. Please advise if you want to review this agreement. If direct access remains viable, this may represent an interesting precedent for utility billing and metering costs.

Mike Day

Drake, Heather, Rasa and Jason:

I wanted to thank you for the time you took to meet with Mona Petrochko and me regarding our commercial and industrial customers. Each of you were very helpful providing information in response to our questions. We appreciate your patience through the revision of our annual report.

As discussed, we will send you the label calculation (with the revised annual reports) for the commercial and industrial product, the letter notification to customers, the product registration and the revised monthly performance reports by the end of the week. Further, as requested, we will include a 1998 bill that notifies customers that their rates were reflective of the 1.5 cents p/kwh customer credit.

Again, we greatly appreciate your kind assistance.

Best regards, Stacey Bolton Manager, Environmental Strategies Enron 1400 Smith Street Houston, TX 77002

More Info on CPUC Draft decision to Ban Direct Access

Sender	susan.mara@enron.com
Recipients	['steven.kean@enron.com', 'don.black@enron.com', 'scott.stoness@enron.com', 'tim.belden@enron.com', 'harry.kin...]
File	dasovich-j/all_documents/13441.

From one of the ARM members below. Our latest info is that there are still 3 votes in SUPPORT of direct access. So, this measure would fail if that SUPPORT stays in place. ARM and others plan a campaign to attack this draft decision.

From Commonwealth: I have that Linda Serizawa, Commissioner Wood's advisor, has stated that Commissioner Wood is at this moment drafting the decision on direct access. She indicated that a draft order would be released, but would not say when. She stated that ABX1-1 directed the CPUC to set a date at which time a customer would no longer have the right to switch to an ESP, and indicated that this order, as it is currently drafted, establishes that date. Apparently there was great hesitant when making the statement "as it is presently drafted," indicating to that Wood is getting a lot of pressure not to set the date. Sue Mara Enron Corp. EXCELLENT NEWS!

Sender	douglass@energyattorney.com
Recipients	['paul.joe@enron.com', 'garcia@enron.com', 'arm@enron.com', 'merilyn_ferrara@apses.com', 'cgarcia@apses.com', ...]
File	dasovich-j/inbox/1103.

In the spirit of the holiday season, SDG&E has come over from the dark side and now supports the assignability of direct access contracts! The utility also supports the ability of existing direct access customers to indefinitely remain on direct access after their contracts expire with one ESP, permitting them either to renew with their existing supplier or sign a new contract with another ESP. In the attached filing, the utility argues that this is reasonable and fair to direct access customers, particularly in view of the Enron bankruptcy. This will be an excellent development to reference in the comments that are due on January 4th in the DA suspension proceeding.

Happy Holidays to each of you and your families!

Flour in Haas School

Sender	teresac@haas.berkeley.edu
Recipients	['faculty@haas.berkeley.edu', 'staff@haas.berkeley.edu']
File	dasovich-j/inbox/841.

Haas Community,

This evening at about 5:00 p.m. we received a report that several piles of white powder were placed throughout the Student Services Building and on Gayley Plaza. We barricaded as much of it as we could and the UCPD and the Fire Department responded to our call. We quickly discovered that the white powder was plain flour that had been placed in Haas and across campus by a student Ping Pong club on a cross campus footrace.

The student group is in the processing of cleaning up all of the piles of white powder. If you find any piles in the building that were missed, please let us know so that we can get it all cleaned up right away.

E206 Delay first individual report

Sender	villas@haas.berkeley.edu
Recipients	['abernath@haas.berkeley.edu', 'blanchar@haas.berkeley.edu']
File	dasovich-j/all_documents/319.

To Sections E206-1 and E206-2:

This is just to confirm that, as discussed in class, there is the following change in the syllabus and in the deadline for handing in the first individual report:

1. The first individual report is now due on Wednesday, February 16 at 6pm (for both sections). The previous deadline was February 9. This report is the analysis of the case "EMI/CT Scanner (A) & (B)". We'll discuss the case in class in the week of February 16.
2. On the week of February 9 (February 9 for Section 1 and February 10 for section 2) we'll discuss in class the "Barco" case instead of the "EMI/CT Scanner" case.
3. The lecture assignments for each class remain unchanged.

Miguel

FW: draft legislation

Sender	steven@iepa.com
Recipients	['dkk@eslawfirm.com', 'agilford@wbcounsel.com', 'abb@eslawfirm.com', 'jmball@ns.net', 'alex.sugaoka@uaecorp.co...']
File	dasovich-j/notes_inbox/5558.

Attached is IEP's draft legislative language pertaining to QFs and amending Section 390. This will be the focus of the conference call previously scheduled for 5:00 a.m. today, Tuesday.

In addition, the legislature's select energy committee reconvened at 3:30 p.m. today to discuss 1x and 18x. To the extent we have anything to report, we will report during the conference call.

Recipients	['dave.perrino@enron.com', 'pbray@newpower.com', 'rob.bakondy@enron.com', 'joseph.alamo@enron.com']
File	dasovich-j/all_documents/11788.

Hi Everybody!

You may see a new individual running around the office. Please do not turn him over to building security, he is not the Bessemer Trust thief. Dave Perrino is a new employee both in our office and with Enron. He is Corp/Gov. Affairs and works for Steve Walton. He will be working on RTO West, Desert Star Development, WSCC (general 'stuff'), and some national deregulation. Please stop by and welcome him to our office.

Cheers, April Hrach Administrative Coordinator Phone: 415-782-7825 Fax: 415-782-7851

P.S.- On a separate note: The Wall Street Journal sent a survey to Enron, and to show their appreciation they enclosed a crisp one dollar bill. Unselfishly, I decided to buy a lottery ticket for the office. I am so sorry to say we did not win Wednesday night's jackpot. On a completely separate note, I will be taking 6 months off of work to travel extensively around the world. : -)

Double Cheers, April

"Norman Plotkin" <nplotkin@rcsis.com> 07/24/2001 06:28 PM

To: <arem@electric.com> cc: Subject: legislative activity

All: The word from the Assembly is that there will be amendments to SB 78, which will be the vehicle addressing the Edison bailout, on Thursday, a hearing on Friday and Floor Session to follow to ratify whatever comes out of committee. This word comes out of the Assembly energy committee (Joe Lyons) and although Rick Simpson was with the Speaker all afternoon and didn't get back to me, numerous other Members' offices confirmed that they have been told to be in town and available Friday.

There is another working group, but I do not know who is on it, nor were we invited. I will continue to advocate for the language we were able to get into 82, as should your individual lobbyists.

More later ...

To All,

For security purposes, the custodial crew has been asked to lock classroom doors nightly at 10:00 p.m. They have been directed as follows:

If students are in a classroom when a custodian comes to lock the doors at 10:00 p.m., the students may remain in the room, but the door will be locked. If students leave the room after 10:00 p.m., they will not be able to re-enter.

As previously agreed: 1) Students will be asked to, and are expected to, leave a classroom when a custodian comes - at any time - to clean the room; 2) Students may remain in the building until midnight; and 3) If students are asked to leave the building after midnight by a member of the custodial crew or the Security Guard, they should do so.

Security is important to all of us. Your cooperation will be appreciated. Thank you.

File	dasovich-j/all_documents/9935.

I was just brainstorming on potential projects. I thought that an interesting and fairly relevant topic could be a current evaluation of Amazon.com and how the projected revenues & profits relate to the current stock price. We could also provide some historical perspective on all realistic Amazon's stock price was a year or two ago relative to a discounted cash flow. I can fairly easily get my hands on some Wall Street analyst research reports that could provide us with some insights and hints as to what Wall Street is expecting. Most of our time can be spent creating a discounted cash flow model similar to what we have been doing in class. Since the jury is still out on Amazon's business model, I think it would make for some interesting debate in class when we present our model.

RE: FW: Southern California Generation Coalition Emergency Petiti

Sender	jmctarnaghan@gmssr.com
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/5319.

It seeks to modify D90-09-089 and D97-11-070 so that SoCal can waive the 10% limit on monthly positive imbalances for noncore customers during winter daily balancing periods and that noncore customers will be permitted to combat gas price

spikes by using their previous months' accumulated positive imbalance volumes to meet "flowing supply" requirement. As of today, SCG is requiring noncore customers to meet a minimum of 90 percent of their daily burn from flowing supplies or from storage

Lynch Ruling re Market Valuation

Sender	douglass@earthlink.net
Recipients	['paul.joe@enron.com', 'hoekstra.aldyn@enron.com', 'arm@enron.com']
File	dasovich-j/inbox/1095.

President Lynch has today released the attached ACR concerning market valuation of the utilities retained assets. As you may know, AB 1890 originally required that for those generation-related assets that the Commission determines to be transition costs and that are subject to valuation, "the valuation used for the calculation of the uneconomic portion of the net book value shall be determined not later than December 31, 2001, and shall be based on appraisal, sale, or other

divestiture."

Lynch states that this requirement was changed by AB 6X and that, "I intend to recommend to my colleagues that the requirement to value generation-assets subject to valuation by December 31, 2001 has been superseded by AB 6X. Parties shall file and serve comments addressing this issue by January 15, 2002. Reply comments shall be filed and served by January 25, 2002."

File	dasovich-j/all_documents/8712.

Please read the memo I constructed using the previously forwarded work. You will see that I took the opposite tactic in approving the loan as opposed to the original memo that recommended denial.

Read it and see if you disagree or not. As you will see, I base most of the rationale on the pro forma 1996 financial statements. However, I kept most of the dissenting language in the memo to highlight our reservations and/or concerns.

My guess is that we can go either way since our beloved professor stated last week that there is no wrong answer. However, we some of the numbers in the spreadsheet forwarded to me, I couldn't recreate some of your stats and there were no formulas behind the numbers. That is why I changed some of the numbers in the memo to reflect my calculations.

Please provide me with any feedback.

***** Mark D. Guinney, CFA Consultant Watson Wyatt Investment Consulting 345 California Street, Ste. 1400 San Francisco, CA 94104 (415) 733-4487 ph. (415) 733-4190 fax - Clarkson Case Memo final.doc

Quick add on to Sue's note:

Right now, appears they're focused on the budget, but could take up energy. There appears to continue to be considerable uncertainty----seems that even many Democratic Assembly members don't know at this point what the plan is for this afternoon/evening. Our lobbyists are attempting to get more info, which we'll pass on soon as we get it.

Best, Jeff

FW: Proposed revisions to CSA Letter

Sender	mday@gmssr.com
Recipients	[rick.counihan@greenmountain.com, 'rmp@cpuc.ca.gov', 'jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/2396.

Here are some edits to our letter from soca. I do not feel they diminish the usefulness of the letter, and they moderate the tone a little, as you would expect. They also eliminate the lengthy recitation of the procedural events at the end of the letter. If this gets them on the letter, I say let's sign. I will assume everyone who signed on last week stays on the letter unless I hear differently from you by 3 pm today. I really appreciate the quick turnaround. Mike Day

Re: PG&E's Open Season --

<<PGE Open Season Application Comments.rtf>>

Attached are Pacific Gas and Electric Company's responses to Administrative Law Judge Brown's questions posed in the "Administrative Law Judge's Ruling Shortening Time for Protests or Responses and Replies to the Application Filed by Pacific Gas and Electric Company," issued June 14, in A.01-06-020 ("PG&E gas transportation open season").

These PG&E responses ("PG&E Comments") are provided to the e-mail list sent out yesterday (June 19) to recipients, per Judge Brown's request to PG&E. (Please note that a limited number of recipients subsequently notified PG&E that they did not wish to remain on the e-mail list. Accordingly, PG&E has modified the list and the instant e-mail list of recipients reflects those modifications/deletions.)

PG&E will also provide the PG&E Comments by mail to the service list in I.99-07-003.

If technical questions arise from this e-mail, please call my secretary, Amy Yu, at 415-973-2769.

Thank you,

Dave Anderson, PG&E Law Department 415-973-6659

Jimmie's the "compiler" this time. You're stuff was good. Whether he has time to incorporate remains to be seen. But I wouldn't sweat it. We can talk more tonite about our somewhat "loose" but thus far effective means for getting these things done every week.

Best, Jeff

Christine Piesco <christine.piesco@oracle.com> 10/09/2000 12:45 PM

To: Jeff.Dasovich@enron.com cc: Subject: Re: Case, #3,4

Jeff,

I emailed my answers to 3 and 4 as soon as I got home last night - did you get them and did they look OK for inclusion? I read over some of the other members answers to the same questions and it looked like we addressed slightly different areas on #3, so we should be able to merge them together. On #4 I think I had a slightly different answer, I'm not sure which is right.

Christine

To: <Sue_Nord@enron.com> cc: Subject: Fwd: Re: Set Up LLC for CLEC Activity

Here's the answer to your question of earlier in the week. Best regards.

Daniel Clearfield, Esq. Wolf, Block, Schorr and Solis-Cohen LLP 212 Locust St., Suite 200 Harrisburg, PA 17101 (717) 237-7173 (717) 237-7161 fax

----- Message from on -----

In response to the question by Enron, the state PUC will accept partnership tax return information for a LLC. The state PUC follows whatever the Department of Revenue requires to be utilized. Accordingly, where an LLC is treated for federal income tax purposes as a partnership are tax classified as a partnership for Pennsylvania purposes under the normal Personal Income Tax provisions but are still treated as a corporation for Capital Stock/Franchise Tax purposes. The LLC partnership would therefore be able to file a PA-65 form which is based on the Federal 1065 partnership return with the Department of Revenue and the PUC.

ICAF to San Francisco, week of April 8

Sender	crandallm@ndu.edu
Recipients	['jdasovic@enron.com', 'csandherr@enron.com']
File	dasovich-j/notes_inbox/5794.

Jeff - Cynthia Sandherr said you were once again the person to write to. We talked in the fall of 1999 when I was thinking about bringing the energy seminar to San Francisco in 2000. ? 17 in our group this year, really interested in gas and elec matters, especially in CA. 14 students including a BGen from Croatia, and 3 faculty. ? At this point, I am trying to juggle between an open Monday afternoon 9 April, and a very early possible morning appt on Thursday a.m., 12 April. We have asked CPUC to host us the afternoon of 11 April, but they may back out given the circumstances, but for the moment that time is spoken for. ? We did manage Alaska last year after all, so now I am trying to resume the regular alternation between California and Houston. I am several shades whiter of head as a result of bringing the Alaska trip to closure. ? Draft schedule attached for your consideration of where we are in the planning process. ? Best regards, ?

Re: SCE Plans to Implement billing and balancing account aspects of

Sender	tamara.johnson@enron.com
Recipients	['harry.kingerski@enron.com', 'susan.mara@enron.com', 'scott.stoness@enron.com']
File	dasovich-j/all_documents/12358.

Sue, I thought there was a extra rate component for SCE undercollection that the MOU would add. If so, that extra rate should not be allowed to go forward until (a) the legislation passes the MOU; and (b) the CPUC agrees how to levy it.

does anyone have clarity on this rate adder? Thanks, Tamara.

Susan J Mara@ENRON 05/11/2001 12:28 PM To: Tamara Johnson/HOU/EES@EES, Scott Stoness/HOU/EES@EES, Harry Kingerski/NA/Enron@Enron, Robert Neustaedter/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, James D Steffes/NA/Enron@Enron, jbennett@gmssr.com, Jeff Dasovich/NA/Enron@Enron, Sandra McCubbin/NA/Enron@Enron cc: Subject: SCE Plans to Implement billing and balancing account aspects of MOU as of June 3

I learned at the AREM meeting today:

SCE has informed ESPs that it will implement its advice letter on the MOU (don't recall the number) beginning with the new rates on June 3. We are planning to protest that AL. Do we care? IF we do, Jeanne, can we stop them?

Also, SCE has informed people that it is calculating the PX Charge/Credit based on its AL that was rejected by the CPUC. Do we care on that one?

Everyone,

A few months ago Enron was contacted by the firm Barnes Mosher Whitehurst Lauter & Partners. Enron was asked to join a new coalition called the California Energy Alliance. The purpose of CEA is to identify opinion leaders, union members and registered voters who can be mobilized in support of streamlining California's process for building power plants.

Both Paul and I have had conversations with the partners at BMWL. Today, I left a message for one of the partners that Enron will not be participating in the coalition and wished them well in their efforts. I wanted you all to be aware of the telephone call and understand that Enron would not be involved in the coalition's efforts.

Attached is a copy of today's FERC filing that advocates adoption of a circuit breaker price for the coming winter, as opposed to the existing price cap mechanism. As you know, we usually circulate these filings in draft form so that funders can see and provide comments in advance. I was under the mistaken impression that this filing was only to be reviewed by Gary Ackerman, so he was the only recipient of the earlier drafts and the attached copy bears all of his input and suggestions. My apologies for not circulating it more broadly, as we normally do.

Dan

Mark:

I agree that you should use an appropriate discount rate to discount a set of cash flows. The cash flows in the case of a tax shield are not risky and therefore they need to be discounted by the riskless rate. The only risk of not obtaining the monies generated by the shield are that the government would repeal the interest rate deduction or that AHP will not have income to shield. Given the financial state of the company neither are likely. That is why I used the riskless rate to discount.

If you guys disagree with my analysis feel free to change it. You would need to multiply the number I provided by .357 to come up with the new number.

Dylan

FW: Proposed NARUC resolution on hedging

Sender	bkc7@pge.com
Recipients	['jdasovic@enron.com']
File	dasovich-j/notes_inbox/2649.

Something you guys might want to support....

-----Original Message-----

From: Hill, Karen [mailto:khill@aga.org] Sent: Wednesday, June 06, 2001 2:08 PM To: #FRCEMAIL; State Regulatory Committee; RATECTE-LDCs Subject: Proposed NARUC resolution on hedging

Attached below is a resolution that EEI is considering proposing to NARUC recommending that regulators allow utilities to recover the costs of hedging. Please let me know if the language of this resolution is acceptable to your company. One

concern that has occurred to me is whether we would always want to pass along to consumers the gains and losses incurred under risk mitigation programs. If not, then we might want to suggest adding some language to the effect that while such rate treatment would certainly be appropriate, companies might opt for a program where gains or losses incurred under risk mitigation programs are not reflected in rates at all. Thanks for your attention and input. EEI is looking for comments by June 13.

A. Karen Hill Vice President Regulatory Affairs American Gas Association 400 North Capitol Street Washington, DC 20001 202-824-7225 202-824-9125 (fax) khill@aga.org <mailto:khill@aga.org>

Here is the link for the load data on the CA ISO's web site. Although the ISO has some time limit on keeping data, it goes back at least as far as Jan '01. We didn't check any earlier. Feel free to call with any questions.

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 07/20/2001 04:45 PM -----

Dave Perrino@ECT 07/20/2001 03:00 PM

To: Susan J Mara/NA/Enron@ENRON cc: Subject: CAISO Historic Load Data

Sue,

From this link: <http://oasis.caiso.com/> the information your are looking for can be obtained. Once the CA ISO OASIS homepage comes up, click on the "System Load" tab in the upper righthand corner, this will bring you to the "System Load Reports" page. From this page you can query the ISO's database. From trying to query the data, I have found out that you can request no more than 31 days of data at a time.

Hope this helps, any questions, just let me know.

Kind Regards,

Dave

Update Load Management Subcommittee Meeting

Sender	lgoldseth@svmg.org
Recipients	['lgoldseth@svmg.org']
File	dasovich-j/all_documents/29090.

Here is an update on the major discussion items:

Real Time Pricing: Please review the enclosed proposed decision of July 19. We need to have our comments in by Thursday, July 25.

Conservation Voltage Reduction project: At our last load management subcommittee, we voted to recommend CEC to fund a proposal from EPRI to answer some critical issues related to conservation voltage reduction so that we all can make informed decisions. The project required continual update on the project from EPRI and our feedback to EPRI/CEC. Please find the updated scope of work on this project. If you have any specific questions or issues that you want addressed, please let us know.

Energy baseline adjustment with ambient temperature: Our loads in the Silicon Valley are very temperature sensitive which can have enormous effects on ho baseline loads are calculated. I have some data to share. It is important to all who are participating or planning to participate in any demand responsive programs.

See you at 1:30PM!/? ?

To ensure that we don't miss any of the reporting dates and requirements that FERC has established, we asked Bracewell & Patterson to prepare a memorandum laying out the various reporting times and requirements. Andrea Settanni at Bracewell has reviewed FERC's December 15 order and prepared the attached memo.

Alan, it is my understanding that you will be responsible for ensuring that we meet all of these reporting requirements. I will call you to make sure that we're on track for the first report which is due on January 2.

Please call me if you have any questions.

Sarah

Kent Wheatland Memorial Award

Sender	susan.mara@enron.com
Recipients	['karen.denne@enron.com', 'jeff.dasovich@enron.com']
File	dasovich-j/notes_inbox/12574.

This was a really sweet message. I wanted to share it. By the way, I learned from Kent's brother just yesterday that Kent's death was attributed to viral meningitis. Just goes to show that you need to live each day to the fullest.

Sue Mara Enron Corp. Tel: (415) 782-7802 Fax:(415) 782-7854 ----- Forwarded by Susan J Mara/NA/Enron on 06/13/2001 11:16 AM -----

"Thompson, Thomas W." <ttt@cpuc.ca.gov> 06/12/2001 10:00 AM

To: "'susan_j_mara@enron.com'" <susan_j_mara@enron.com> cc: Subject: Kent Wheatland Memorial Award

Sue - I'm Tom Thompson. Kent was a long-time friend, a fishing buddy, and a bad golf mate (but lots of fun). When Gary Ackerman announced at services for Kent the creation of the award, I was deeply touched and impressed. My good friend Jeff Dasovich told me this weekend that you received the very first award, and well, I must say I became a bit teary-eyed.

You probably don't know me, but I've seen you at Commission meetings and have heard your name over the recent years. My other fishing friend, Bill Sandoval, who was also at the services, says whomever received this award "must be a real tiger" and we need more people like that in California. I am happy that Kent's memorial award will go to someone so deserving. --- Tom Thompson

Attached for your review and comment is a revised draft of the application for rehearing to be filed on Friday the 28th. There are two primary changes. The California Chamber of Commerce has been added to the application and an argument has been added that the Decision contradicts the most recent legislative intent expressed in ABX2 9 that direct access continue, at least for aggregation and community choice purposes.

Any and all comments will be very much appreciated. Also, I would appreciate it if Sue Mara would forward the document to her contact at the Chamber so that they can also review the draft. Thanks!

HI E204 team -

As we (minus Jeff) discussed last night, we won't meet this w-end since Shawne and Pat have their Public Policy presentation on Tuesday. However, we should all probably read through the problems and be prepared to meet to discuss sometime next week. I will be at Haas on Wednesday night manning a table at the s-t-s job fair. How does next Wednesday in Berkeley sound?

We should probably also carve some time out next weekend to meet. I know I am completely booked Sat all day (California AIDS ride crew training). I can meet on Sunday or Sat after 5pm.

What does everyone else's schedule look like on Wednesday night and next weekend?

I'm hoping this is all quick and painless!

Thanks, Carolyn

DISCOUNT ON FINANCIAL REPORTING CONFERENCE

Sender	haugh@haas.berkeley.edu
Recipients	['eveningmba@haas.berkeley.edu']
File	dasovich-j/mba_program/47.

To: Evening MBA Students

From: Nils Hakansson, Program Chair

The Center for Financial Reporting and Management in the Haas School is hosting its Tenth Annual Conference on Financial Reporting at the San Francisco Marriott Hotel on Friday, November 5.

As a special offer to Evening MBA Program students, we are offering a seat to each student at the discounted price of \$145 per seat. This can be used by you or by a person in your firm whom you wish to designate.

A copy of the program is attached. If you or an associate wish to attend, please send an e-mail to Dayna Haugh at haugh@haas.berkeley.edu and request a brochure with registration form. She will leave a brochure in your box. Please fill out the registration form, endorse it with "EVENING PROGRAM", and return it with the \$145 fee to the Center for Financial Reporting and Management in the School. The CFRM office is located in room 502D Faculty building, or you can leave it in Dayna Haugh's mailbox #50 in the student services building mailroom.

If you have questions, you can contact Dayna Haugh at 642-6334.

2002 Budget

Sender	susan.mara@enron.com
Recipients	['paul.kaufman@enron.com', 'alan.comnes@enron.com', 'joseph.alamo@enron.com', 'jeff.dasovich@enron.com']
File	dasovich-j/all_documents/29367.

Here it is. To explain, I left the sheet you saw previously as Sheet 1. Sheet 2 is the new employee and business expense budget. It shows expenditures through 7/09/01 in the first column, our 2001 budget in the second column, and a proposed 2002 budget in the third column. Some of the expenditures are kind of kooky -- because of miscoding or other reasons.

For example, payments to IEP appear under "Employee Pers --Other" and "Outside Serv - Prof". There are many examples of kooky things -- so don't worry about it.

We ended up getting charged for things this year that we didn't put in our budget, such as AT&T calling cards and Edith's time -- so I've tried to include all the items -- even if I put them in another category (for example, I don't use the category "EIS Allocation" in our budget). I included those wacky categories that we don't use in our budget at the bottom of column 1 just to get the correct total for the year to date.

Sheet 3 is outside expenses such as contributions, retainers and memberships. Column 1 shows our 2001 budget and column 3 shows our projected 2002 budget. I added some dollars to the retainers to cover some minimal expenses that we get charged. Other than that, it's pretty much what we discussed last week.

Have fun, Paul! Call with any questions.

Agenda - Government Affairs/The Americas Meetings, March 8th & 9th,

Sender	linda.noske@enron.com
Recipients	['margaret.carson@enron.com', 'cruane@quinngillespie.com', 'donna.lowry@enron.com', 'robert.bruce@enron.com', ...]
File	dasovich-j/all_documents/9734.

First and most important, for those of you that have room reservations at The Woodlands Resort and Conference Center, if you have any changes that need to be made or have decided NOT to stay, I need to know immediately so that we can cancel and are not charged for those rooms. Please call me directly and do not contact The Woodlands Resort. Please see the "revised" Agenda and review the Rooming List for accuracy and advise of any corrections at this time.

Gerianne Warner and I will be out at the Woodlands for the March 9th meeting only. We will be in the office on Thursday if anyone needs assistance. Please have your presentation to me by Thursday for those of you who are giving presentations. If we need to make copies of your presentation, please advise as well. Eric Benson will be present for the March 8th meeting. Again, the location of the meeting will be: The Woodlands Resort 2301 North Millbend Drive The Woodlands, TX 77380 Phone# 281-367-1100 Fax# 281-364-6274 Check-In time is 3:00pm Check-Out time is 12:00pm

The Woodlands Resort provides transportation service to and from the airport on a scheduled basis from 6:00am - 10:00pm at a cost of \$32.00 per person, per trip. Reservations must be made a minimum of 24 hours in advance for both arrivals and departures. If you have an interest in using this service, please call the resort directly. MAP:

File	dasovich-j/notes_inbox/5554.

Team,

I've started the project and am still trying to figure out exactly what our dear prof. is looking for. My guess is that the assignment is a review how the ROA ratios would change or have changed when one takes into account various one-off charges, restructurings, accounting changes, and off-balance sheet items. I'm in LA tomorrow and will send you all my work tomorrow night. I suggest that everyone take a crack at reviewing the data and coming with your own insights. One person should be responsible for bringing it all together. Any volunteers?

Hey Guys,

Just sat down to read about the first write up that is due this Thursday, and realized that this is supposed to be a group assignment!! Ooops - I had no idea... Did you ;-) Anyone read the case and/or taken a crack at it? Should we try and co-ordinate a conference call?

Carolyn is out for the week and excused from the assignment - just had a baby girl last Fri!! Jeff, did you hear from teacher if OK to join ?

July 6th EMBA Happy Hour

Sender	owner-evmba_social@haas.berkeley.edu
Recipients	['pey_ning@yahoo.com', 'admittedf01evmba@haas.berkeley.edu', 'llien@resonate.com', 'ben@woodward.ucsf.edu', 'e...']
File	dasovich-j/all_documents/28250.

Hello fellow HAAS classmates and friends,

It's time for Happy Hour of the Month again!! This time it's going to take place in Mountain View. For all you South Bay people, it's only less than 15 min drive from the heart of Silicon Valley. There isn't any excuse for you not to show up and hang with your classmates. For the SF crowd, it's a quick 45 minute trip down Hwy 280, or better yet, ride the CalTrain down to Castro station. All of our activities for the night are within 2 blks from CalTrain station. For the East Bay group, be patient, the next one is in your neighborhood.

Here is the lineup for July 6th:

5:30pm - 8:00pm Pockets Billiards/Bar 251 Castro St. 8:00pm - 10:00pm Dinner Break (See below for restaurant recommendations) 10:00pm - ?? Molly McGee's 241 Castro St.

Dinner options: Since downtown MV used to be my neighborhood, I have tried out most of the restaurants in the area. All these restaurants are highly recommended and within 1 blk vicinity from Pockets. If you want something else, talk to me! There are more choices. Italian: Don Giovanni <http://www.dongiovanni.com/> Chinese: Hunan Gourmet <http://www.waiter.com/hunan/> Japanese: Tomi Sushi 650-968-3227

Since a number of faces are new, check with Pockets' front desk and ask for the "HAAS Group". Otherwise, call me on my cell phone at 650-996-2947 if can't find us.

See you all on Friday! Tony Tai and Cindy Best

Request for Assistance in Updating California RED Index

Sender	n.etkin@verizon.net
Recipients	['jdasovic@enron.com', 'counihan@greenmountain.com']
File	dasovich-j/all_documents/13455.

Dear Rick and Jeff: I'm the Project Director for the CAEM RED Index and Ken Malloy suggested I send this request to you. We have contacted the CPUC for their response to our survey update, but their press of business results in no response from them to us. The dramatic changes in California from December 2000 to June 2001 makes it imperative that we have some intelligence on updating the individual attributes. Based on the attached PDF file description of the attributes and the Word document table of characterizations which shows year end 2000 and a blank for May 2001, could you help me by filling in those blanks based on your knowledge of state legislation, CPUC orders or anything else official that has changed the way they implement their electric restructuring plan? I don't expect an answer to the seven survey questions, but feel free to provide your response just for my education.

I've sent this request to Commissioner Bilas, who works with Ken, but he couldn't offer any assistance, so I'm relying on the industry to fill in the blanks. If you have any other suggestions of who might be able to respond to this information, it would be greatly appreciated. Thanks for your help.

File	dasovich-j/deleted_items/308.

Dear Evening MBA Students: The Center for Financial Reporting and Management in the Haas School is hosting a conference: Business Combinations and Goodwill--What the New FASB Rulings Mean to You on Friday, Sept. 7, 2001 at the San Francisco Airport Marriott Hotel. As a special offer to Evening MBA Program students, we are offering one seat to each student at the discounted price of \$100 per seat. This can be used by you or by a person in your firm whom you wish to designate. A copy of the program is attached. If you or an associate wish to attend, please register on-line at: <http://www.haas.berkeley.edu/accounting/cfrm/registration.htm> . When filling out the registration form, please write: "EVENING PROGRAM" in the "additional registrants" space on the form. Dayna will contact you regarding payment after August 23 when she returns from vacation. If you prefer to pay by check, you may print the registration form and mail it or leave it in Dayna Haugh's mailbox in the student services building mailroom with a check. If you have questions, you can contact Dayna Haugh at 642-6334. Dayna Haugh Assistant Director Center for Financial Reporting and Management Haas School of Business University of California 502D Faculty Building, #1900 Berkeley, CA 94720-1900 510-642-6334 (Phone) 510-643-7218 (Fax) <http://www.haas.berkeley.edu/accounting/cfrm/cfrm.htm>

Reporting on CPUC Ability to Change Direct Access Rules

Sender	susan.mara@enron.com
Recipients	['paul.kaufman@enron.com', 'richard.shapiro@enron.com', 'james.steffes@enron.com']
File	dasovich-j/notes_inbox/11555.

As we discussed in our special call last week, I asked Brian Cragg from Goodin McBride to look into the issue of what, if anything, the CPUC can do in lieu of suspending direct access.

ABX 1 says the CPUC "shall suspend" DA, but does not give any time line for doing so, nor any criteria to use in making the determination to suspend it. This gives the CPUC ample ability to delay suspending DA, especially while bills affecting DA are in play in Sacramento. The President could have her own investigation or propose her own solutions -- all the while delaying the suspension. Brian also thought she could possibly put her own DA plan in place -- although he said it was a "stretch." Brian said she could, for example, argue that limiting DA to the net short position was a way of implementing ABX 1. He felt that adding an exit fee as well was, however, stretching the concept a bit too far. Nonetheless, limiting DA to a net short position could be argued to be within her existing authority under the law. She could also institute an "open season" through some defined date, such as Jan 1, 2002, and suspend DA thereafter.

She could take this action subject to the passage of superceding legislation -- which, of course, could either kill DA altogether or implement some combination of exit fee/DA open season/DA limitation.

Let's discuss strategy on our next call.

Jeff:

Thanks for your attention on this matter. I am leaving for China tomorrow (Saturday 6/9) and will return on Saturday 6/16. I am confirmed to depart for Sao Paulo on 6/19. Is there a phone # I can reach Joe Kaischkill on? If so, I would contact him when I get settled in in Shanghai. On the contrary, I can be reached on Monday 6/18 in my office in Miami at 305-443-6665 or on my mobile 305-773-0319.

Thanks again for your help.

Best regards, Joe Alcantara

On Fri, 08 June 2001, Jeff.Dasovich@enron.com wrote:

FISHER CENTER FOR THE STRATEGIC USE OF INFORMATION TECHNOLOGY Haas School of Business is pleased to present in its E-Biz Executive Seminar Series

Stuck in the Bozo Filter Reputation management -- How startups can escape fuzzy branding and bad media relations

Tom Gable Chairman and CEO, The Gable Group

Friday, November 17, 2000, 5:00 p.m. Wells Fargo Room, Haas School of Business

ABSTRACT

Startups can't cross the chasm or ride the tornado weighted down with fuzzy branding and bad media relations. There is no denying the power of good public relations to launch a company from the ground up, build the brand and support a company's business and marketing plans over time. But in today's fast-moving economy, clutter abounds. News about a company is often ignored if it doesn't have a big number attached to it, tell a bigger story or have a unique twist. Editors and writers filter out pitches and releases that sound alike. How to break through the clutter? In this talk, we will review the nine easy ways to kill a startup with PR, see "worst of PR" examples the media hate and learn a few secrets of proper

positioning -- methods companies have used to make a difference with intelligence and personality.

This Saturday--FORD TAILGATE in HAAS COURTYARD

Sender	rowe@haas.berkeley.edu
Recipients	['mba03@haas.berkeley.edu', 'mba02@haas.berkeley.edu']
File	dasovich-j/deleted_items/1843.

Join Ford Motor Company for an informal pre-game BBQ this Saturday, September 8. Come meet representatives from diverse functions including IT, Finance, Manufacturing Leadership and Engineering and see select products from our stable of automotive brands: Ford, Lincoln, Mercury, Mazda, Volvo, Jaguar, Land Rover and Austin Martin. With our new offices for the Premier Automotive Group in Irvine, California and our numerous e-business and joint venture initiatives, our opportunities continue to grow throughout the country and the world as we expand in emerging markets such as China, India, Russia and Southeast Asia.

This is a casual event to kick-off the 2001-2002 academic year and celebrate the continued close relationship between the Haas School of Business and Ford Motor Company, so stop by, see some cars and grab some food & drink.

Time: Noon, prior to the 2:30 kick-off Location: Haas Courtyard

If you are unable to attend and would like to learn more about opportunities at Ford Motor Company, please visit us on the web at www.mycareer.ford.com or feel free to contact me directly (Matt Field, Haas MBA00 - contact details below).

Best wishes for an enjoyable year, Matt

Welcome to Traffic School To Go!

Sender	help@trafficschooltogo.com
Recipients	['jeff.dasovich@enron.com']
File	dasovich-j/all_documents/164.

Nov 7, 1999 12:48 PM

Jeffrey Dasovich,

Your registration for the Traffic School To Go program has been recorded. We hope that everything is clear and that you will have no problem successfully completing the program but if you need help, please reply to this Email with your questions or phone toll free - (888) 349-8425.

Remember, this is EXACTLY how you will need to re-enter your information when logging back in to the program:

license state = California license number= N7889351

To log into the course, visit the following URL: <http://www.trafficschooltogo.com/students/>

If you find you have made an error in entering your license information, use the incorrect information to log in. Once logged in, you will have the option of correcting the error by hitting the "Personal Information" button on your "Student Control Panel" at the bottom of any page. Thereafter, the corrected license information will log you in.

Oh, and just to confirm, we have the following mailing address information for you:

366 Dolores St., #3 San Francisco, CA 94110

If this is incorrect, use your "Personal Information" button to fix it. In fact, please be sure to double-check (and change if necessary) all of your "Personal Information" sometime before you finish so that we can reach you if there's a problem or so that your certificate does not go astray due to a typo in your mailing address. Thanks.

Sincerely,

Peggy Goldman Traffic School To Go <http://www.trafficschooltogo.com> (888) 349-8425

WPTF WestConnect Protest

Sender	douglass@earthlink.net
Recipients	['blood.peter@enron.com', 'glenn.martin@enron.com', 'schleimer.steve@enron.com']
File	dasovich-j/inbox/1652.

Attached for your review and comment is a first draft of the WPTF motion to intervene and protest the WestConnect filing. The major points made in it are as follows: ? The Commission should convene a technical conference to deals with areas in the WestConnect filing that require further clarification, such as congestion management. Moreover, the analysis of congestion management issues must focus on the equitable allocation of transmission rights;

? The Commission should require WestConnect to establish an independent board, with an accompanying stakeholder process that complies with commission precedent;
