File	dean-c/deleted_items/324.

Due to the scheduling of the RMS meetings for Oct. 31 & Nov. 1 - we will have to reschedule our TDTWG meeting.

i.e. - please cancel the TDTWG Oct. 31 meeting on your calendars.

I will send out a re-schedule on this as soon as possible.

Thanks, Dave

Subject:

Today the Protocol Review Subcommittee passed unanimously a revision request that will allow ercot to grant "provisional authorization" to QSE to provide ancillary services for a period of 90 days while any deficiencies in the certification can be corrected. The request will be sent to the TAC where it will have an e-mail vote and I would not anticipate any opposition.

To receive the "provisional authorization" the QSE needs to have performed an Ancillary Services qualification test in good faith but failed to qualify due to problems that in the opinion of ERCOT, are noncritical for providing one or more ancillary services. My understanding is that Frontera has not had the primary test. According to John Adams at ERCOT four have been scheduled and subsequently cancelled. It will be critical to schedule and complete the test to be considered for the "provisional authorization".

I spoke with John Adams regarding staffing to help perform the qualification tests and he said that they would be able to do the certification tests at about any time without any major scheduling delays. The only time when they would not be able to do the tests would be when ESCA will take control of the systems to perform cut-over operations.

Subject: Texas Data Transport Work Group (TDTWG) Conference Call - Tuesday 27 November 2001 4:00 pm CST

There will be a RMS meeting Wednesday November 28 in which I will give an update on our (TDTWG) activities, so this conference call is being set up for us to discuss current activities, issues, and status.

Please RSVP to me directly (not to the list) - I will publish the conference call dial in number information to those who RSVP.

Note.. there are ERCOT committee and work group meetings scheduled every day this week so there did not appear to be a convenient mid-day time to schedule this meeting. Sorry if the timing is not good for you.

Best Regards, Dave ~~~~~ Dave Darnell Systrends, Inc 7855 South River Parkway, Suite 111 Tempe, Arizona 85284 Web: www.systrends.com Phone:480.756.6777 x201, Mobile:602.432.3353,eFax:208.441.6982

STSW day-ahead deal number is 815078.

-----Original Message-----

From: Symes, Kate Sent: Thursday, October 11, 2001 10:15 AM To: DL-Portland Real Time Shift Subject: STSW Parking - 10/13

For Saturday -

STSW will be 13 mw long, HE 13-20, at West Wing-500KV. Day ahead purchase (made under STSW book) is from PNM. Price is \$22.

Please enter an inter-desk purchase (under STWHOURLY book) from STSW for these hours. Make sure this purchase price covers any transmission costs the West Hourly book incurs to sell off this power. Enter all transmission deals and respective sales under the STWHOURLY book. Again, please refer to Bill's inter-desk swap detail if you run into problems.

Note about Transmission: EPMI owns transmission from Pinnacle Peak to Mead-230 that can be re-directed from West Wing to Mead if necessary. Deal number is 426856. Oasis numbers is 26034. Please see the 2001\_Available\_Transmission worksheet for more information.

Jefferson LB Lance McFarland Says He Is Committing to Horns

Linebacker Lance McFarland, 6-1, 225, 4.6, of Jefferson told me tonight (Tuesday) he is trying to call UT assistant coach Darryl Drake to commit to the Longhorns. "I just decided I was ready to get the recruiting process behind me," he said. "I have always liked Texas and I'm ready to give my commitment." He said he has scholarship offers from Texas, Oklahoma, Colorado, Arkansas, Kansas State and LSU. McFarland has great speed for a linebacker. He won the so-called "fat boy 100" at an East Texas track meet with an 11.3 clocking after his sophomore year. Only players who weighed more than 200 pounds competed in the event. He will be the Longhorns' 14th commitment. The others are super RB Cedric Benson of Midland Lee, OLs Jonathan Scott of Dallas Carter, Abe Robinson of Jersey Village, Matt Garcia of Galena Park, Will Allen of Cypress Falls, Roman Reeves of Livingston, Terrance Young of Longview and Alfio Randall of Blinn JC; LB Yamil Lebron of Killeen Ellison, CB Cedric Griffin of San Antonio Holmes, WR-CB Brian Carter of The Woodlands, DB Braden Johnson of Euless Trinity and QB/S Kendal Briles of Wolfforth Frenship. Benson and Scott are national top 25 players and Robinson and Briles also have made some national top 100 lists. FB James Buchanon of Sarasota, Fla., DE Kaelen Jakes of Valencia, Cal., and OL Williams Winston of Houston Madison all say they plan to come to the UT-Houston game Sept. 23. Buchanon and Jakes will be taking their official visits to Texas that weekend. I said I wouldn't have any more faxes this week, and here this one is, but it is shorter than usual because I have a very early flight to California Wednesday and I have to get this going so I can shut everything down before I leave. For those of you who normally get late faxes early the next morning, I apologize for sending this one so late, but it was either do it now or at 4:30 a.m. tomorrow. \* \* \* \* The True Orange Fax Service includes at least 99 faxes a year and costs \$99 (\$79 by E-Mail). The True Orange Newsletter includes 26 newsletters and is published weekly during football season and twice monthly during most of the other months. It costs \$45. Save by subscribing to both for \$130 (or \$110 if you take the faxes via E-Mail or \$99 if you take the faxes and newsletter via E-Mail). Send check to address at the top of page. Nordgren, State's Top QB, Picks Texas over LSU

Dallas Bishop Lynch QB Matt Nordgren, 6-5, 222, 4.6, is the Longhorns' 18th commitment, and he said he came aboard this week to show his support for the UT coaches and to express his confidence in their ability. Nordgren, the state's top quarterback prospect and one of the top 10 passers in the country, chose Texas over LSU, Tennessee and Colorado. He also was recruited by most of the top programs, but had narrowed his choices to those four schools. He told me had had 21 scholarship offers. "It was really a close call between Texas and LSU," he said, "but I decided I wanted to play for the Longhorns." He called me late Wednesday night to give me the news, but asked me to hold it until around noon today. He and Bishop Lynch coach Gary Oliver are going to announce Nordgren's decision to sign with Texas at a pep rally at Bishop Lynch at 7 p.m. today. Bishop Lynch is 6-0 and plays defending state TAPPs champion Houston Stake Jesuit, also 6-0, this Friday. "I just wanted to get it out of the way before our game and I wanted to let the Texas coaches know," he said. Oliver, who is a former wide receiver at Texas A&M, said Nordgren checked out a lot of schools before making his decision. "He is an outstanding quarterback and an outstanding young man," Oliver said. Nordgren is a 4.0 student who also is a 6-6 high-jumper and 39.5 intermediate hurdler in track. He also starts for the basketball team. "It came down to a great list of schools," Nordgren said, "but I felt at home at the UT campus. It's a football program that I know I can help lead to a national championship." \* \* \* \* Redshirt freshman Dakarai Pearson will start at safety Saturday, and Lee Jackson will back up Pearson and fellow safety Greg Brown. Defensive coordinator Carl Reese said freshman cornerback Nathan Vasher will be his nickel back Saturday. DT Shaun Rogers practiced Wednesday and coach Mack Brown and Reese said they hope his sore ankle will allow him to play 15 to 20 plays Saturday. Redshirt freshman Marcus Tubbs will continue to start at right DT. Brown also said sophomore LB O. J. McClintock under arthroscopic surgery on his right knee Tuesday and "he'll be out two to four weeks. It went well, and they think he'll have a quick rehab." Brown also said true freshman Adam Doiron, who has not played this year, probably will play at DT at Colorado. Doiron, a high school DE, has been working at DT, recently, and Brown said he is making good progress. "With Shaun Rogers and Stevie Lee both out, we're a little thin at defensive tackle," Brown said. "We'll probably take the redshirt year away and play Doiron Saturday. He also said another true freshman who hasn't seen action, LB Austin Sendlein, might have to play Saturday if any more linebackers are injured. Brown said the team realizes it has a lot of work to do to get ready for Colorado. \* \* \* \* My next fax will be whenever events warrant. \* \* \* \* The True Orange Fax Service includes at least 99 faxes a year and costs \$99 (\$79 by E-Mail). Longhorns Getting Thinner at TE; Fall Signings Impressive

Coach Mack Brown said Wednesday TE Brock Edwards is questionable for the Kansas game because his sore calf felt worse Wednesday than it did earlier in the week. As it stands now, he said Chad Stevens will start against Kansas Saturday. The Longhorns have had an incredible run of bad luck at TE. First, budding star Bo Scaife tore an ACL on the first day of pre-season workouts. That moved Mike Jones into the starting lineup and he, too, tore an ACL, although he did get to play in six games before incurring the injury. That moved true freshman Edwards, the only remaining scholarship TE, into the starting lineup. Stevens, a high school TE, had been moved to FB, but has moved back to TE full time. It was cold and rainy Tuesday and Wednesday in Austin and Brown said he was happy about it because there is a very good chance it will be cold and rainy Saturday in Lawrence. \* \* \* \* FOOTBALL RECRUITING NOTES: DT Marquise Hill, 6-6, 300, 5.0, of New Orleans De La Salle, says he will take an official visit to Texas the Thanksgiving weekend and wsiill attend the Texas-A&M game. Hill is visiting LSU this week, Michigan the Dec. 1 weekend, Georgia the Dec. 8 weekend and Georgia Tech the Dec. 15 weekend. He said his big three are Michigan, LSU and Texas. . . The Longhorns are still at 19 commitments and are still expected to wind up with 25 or 26 signees. \* \* \* \* FALL SIGNING ROUNDUP The Longhorns cleaned up on the first day of the fall signing period Wednesday. BASKETBALL RECRUITING NOTES: Point guard T.J. Ford, 5-11, 165, of Sugar Land Willowridge, and center Chris Wright, 6-10, 235, of Redwater, signed basketball letters of intent with Texas Wednesday, the first day of the fall signing period. Coach Rick Barnes said Ford is ranked as the nation's top point guard by Bob Gibbons' All-Star Report and Wright is rated as the No. 25 prospect in the country by Gibbons. For those of you who like to keep up with future prospects, 6-7 Louisiana star Derek Burditt of Marrero Ehret is the cousin of former Longhorn star Albert Burditt. He is one of the nation's top juniors. The next great player in Texas might be 6-8 sophomore Kendrick Perkins of Beaumont Ozen. The Longhorns are recruiting both these underclassmen. \* \* \* \* Texas women's coach Jody Conradt signed three players, including two high school All-Americans. Joining the Longhorn program next year will be 6-2 forward Kala Bowers of Woodward, Oklahoma , a USA Today and Street & Smith All-American who is rated as the 16th best player in the nation by one recruiting service; 6-2 forward Heather Schreiber of Windthorst, an AAU All-American and three-time First Team All-State performer rated as the No. 1 player in the state of

Texas by the Texas Girls Basketball Report and by the Texas Hoops recruiting service, and 5-11 All-State guard Colencia "Coco" Reed of Houston Jersey Village. \* \* \* \* BASEBALL RECRUITING NOTES: Head coach Augie Garrido signed 12 top prospects Wednesday, including right-handed pitchers Luis Cortez of Sinton, Joey Guajardo of Round Rock, Donald Levinski of Weimar, Kole Strayhorn of Shawnee, Oklahoma, and Huston Street and Chaz Taylor, both of Austin Westlake. He also inked shortstop Michael Hollimon of Dallas Jesuit. Texas also signed catchers James Sweeney of Houston Bellaire and Curtis Thigpen of Forney. Other signhees included infielders Seth Johnston of Boerne and Ryan Olivo of Grapevine, and pitcher-infielder J. D. Reininger of Smithson Valley. Hollimon and Sweeney are the state's best at their positions and Guajardo and Levinski are two of the top three pitchers. \* \* \* \* My next e-mail/fax will be whenever events warrant. \* \* \* \* The True Orange Fax Service includes at least 99 faxes a year and costs \$99 (\$79 by E-Mail). Barnes Hires New Assistant; Summer Football Camps Start Next Week

Texas basketball coach Rick Barnes announced Tuesday he has hired South=20 Carolina assistant coach Frank Haith to replace Rob Lanier as one of his top= =20 assistants. The 35-year-old Haith, who joined coach Dave Odom's staff at South Carolina=20 on April 16 after spending the past four seasons under Odom at Atlantic Coas= t=20 Conference member Wake Forest, will begin his post at Texas immediately. =20 Haith assumes the post vacated by Lanier, who left the Texas coaching staff=20 on April 18 to take the head coaching position at Siena College. While at Wake Forest, Haith was instrumental in leading the Demon Deacons to= =20 four consecutive postseason tournament appearances, including an NCAA First=20 Round showing last season. He also helped Wake Forest secure one of the=20 nation's Top 10 recruiting classes during the 1999-2000 campaign.=20 "In Frank Haith, we have hired one of the top assistant coaches in the=20 nation," Barnes said. "He came very highly recommended from many of the=20 high school coaches in the state of Texas and around the nation. Frank also= =20 brings a great deal of familiarity with coaching and recruiting in this area= =20 of the country. There is no question that it is just a matter of time befor= e=20 he becomes a head coach at this level." Prior to joining the staff at Wake Forest, Haith served one year as the=20 associate head coach at Texas A&M (1996-97). He spent one season (1995-96)=20 as an assistant coach at Penn State, helping the Nittany Lions to a 21-7=20 overall record. During the year, Penn State was ranked as high as ninth in=20 the national polls before placing second in the Big Ten Conference=20 regular-season standings and earning the school's first NCAA Tournament bid=20 in 31 years. "I am extremely excited about the opportunity to coach at The University of=20 Texas," Haith said. "There were two things that proved to be the key factor= s=20 in my decision to come to Austin. One is the opportunity to work for Rick=20 Barnes. And second, having worked in College Station for four years, I know= =20 the potential that exists in Austin. The Texas

program is one that can win=20 the National Championship." \* \* \* \* ILB Aaron Harris of Mesquite, RB Albert Hardy of Galena Park, DE Travis=20 Leitko of The Woodlands and C Bob Morton of McKinney have at least two thing= s=20 in common. They are the state's best players at their respective positions=20 and they have already achieved qualifying scores on the SAT. Morton is committed to Texas A&M. Hardy favors Texas very strongly, and=20 Harris and Leitko are considering several schools, including UT. This is a year when many of the top junior recruits have awesome test scores= .=20 OL Josiah Vinson of Irving has a 1,500 SAT score and Leitko and Morton are i= n=20 the 1,400 range. Unfortunately, it's also a year when many of the super recruits will wind up= =20 having to go to the junior college ranks unless they sign with Oklahoma. Two= =20 top Sooner recruits from Texas are full qualifiers now and they were about=20 300 points away from qualifying when they signed back in February. Coach Mack Brown and his assistants might seem to be starting a little bit=20 slow in recruiting this year, but they actually are right on schedule. June=20 is summer camp month at Texas and it's also when the Longhorn coaches start=20 racking up pledges from top recruits. They have been doing it ever since the= y=20 got here, and they will do it again this year. Look for the Horns to get at=20 least five or six top commitments next month. The summer camps start one week from Saturday, so get ready for some hot=20 recruiting news. \* \* \* \* My next e-mail/fax will be whenever events warrant. \* \* \* \* The True Orange Fax Service includes at least 99 fax/e-mails a year and=20 costs \$99 (\$79 by E-Mail). The True Orange Newsletter includes 26 newslette rs and is published weekly during football season and twice monthly during=20 most of the other months. It costs \$45. Save by subscribing to both for \$130= =20 (or \$110 if you take the faxes via E-Mail or \$99 if you take the faxes and=20 newsletter via E-Mail). Send check to address at the top of page. RMS met on 11/13 to establish guidelines for retesting. A small team left that meeting with the assignment to compile those guidelines into a coherent document. Attached is the first draft of that document. All comments on the attached draft should be submitted to that subteam (addresses in CC area above) prior to Wed 11/28.

Thanks in advance.

| File       | dean-c/notes_inbox/33.                                                                                           |

A while back we were pursuing getting a master in place with TIE but it stalled when we requested financials from them. We now have a few trades that we/they want to do so we are making another effort to get the master in place. TIE is forwarding financials to Rhonda asap and they have requested financials from us. Rhonda/Ed - could you please FEDEX financials on EPMI to TIE today in order to help push this effort along.

Send to:

Tim Grigg Manager - Power Marketing Texas Independent Energy 13760 Noel Road Dallas, TX 75240-1300  
972-628-2753

Please expedite getting this master in place. Thanks for your assistance, - Mike

## Harbor Supplementals

|            |                                 |
|------------|---------------------------------|
| Sender     | stanley.cocke@enron.com         |
| Recipients | ['shift.dl-portland@enron.com'] |
| File       | dean-c/inbox/713.               |

Group,

I was informed this afternoon, around 1530 PDT, by Mike at the ISO, that Harbor's wavier rights were taken away due to higher than normal loads expected for tomorrow, Tuesday 10/2. So, we need to put in supplemental energy bids in for both Harbor units, HARBGN\_7\_UNITS (80mw) and HARBGN\_7\_PL2X3 (17.9mw). Please submit bids as soon as possible, at least by HE20 Monday, 10/1, going through HE24 on Tuesday, 10/2, for both units, at the real-time price cap, of \$91. If the ISO hits the bid, go ahead and accept the bid, and then call the control room to tell them to ramp up.

Thanks a bunch,

Stan Cocke Enron North America 121 SW Salmon Portland, OR 97204 503-464-3829 (w) 503-819-1132 (c)

| Sender     | stanley.cocke@enron.com                                |
| Recipients | ['shift.dl-portland@enron.com', 'h..foster@enron.com'] |
| File       | dean-c/inbox/678.                                      |

Group,

Just wanted to give you an update on the Wheelabrator Martel outage. They are currently only producing 9mw (they are prescheduled at 13mw), and we are selling them 4mw back real-time in order to cover their preschedule. I just spoke with Mike Burt at the plant, and he said that they will continue producing 9mw through HE4 on Thursday, 9/27. Beginning HE5, they will be going down to 0mw, so at that point we need to sell them 13mw, through HE16. At that point in time they should be back to full power and producing 13mw (their full preschedule).

I'll keep you posted on any changes. Thanks,

Stan Cocke Enron North America 121 SW Salmon Portland, OR 97204 503-464-3829 (w) 503-819-1132 (c)

### Morrow Power

|            |                                 |
|------------|---------------------------------|
| Sender     | stanley.cocke@enron.com         |
| Recipients | ['shift.dl-portland@enron.com'] |
| File       | dean-c/inbox/740.               |

Group,

Morrow Power came on line today to sell 24mw, for 24 hours, for testing. They began, Thursday, 10/4, HE13, and will run through HE12 on Friday, 10/5. Please sell for the best price possible. You will also need to call in to BPA numbers desk, transmission, and real-time (just like you did for Grays Harbor and Frontier).

Also, BPA has been calling a few times today to ask us to schedule losses for control area reserves from Morrow, Grays Harbor, and Frontier. If they call again, please tell them that we are not responsible for the scheduling of Grays Harbor any more, and we are working on dispute resolutions for Morrow and Frontier. Once we get the resolutions worked out, and if we still owe them losses, then we will return them at that time.

Thanks,

Stan Cocke Enron North America 121 SW Salmon Portland, OR 97204 503-464-3829 (w) 503-819-1132 (c)

### Electronic Pay Stubs

|            |                          |
|------------|--------------------------|
| Sender     | enron.payroll@enron.com  |
| Recipients | ['clint.dean@enron.com'] |
| File       | dean-c/info3/7.          |

Get ready. Beginning in November, electronic pay stubs will be available to all employees who have their paychecks direct deposited into their bank account. Electronic pay stubs are an easy, fast, and efficient way for you to get your payroll information. They will also help Enron to realize a considerable savings in time and dollars spent over traditional printed pay stubs.

If you prefer to receive a hardcopy of your pay stub, click on the link below to complete a request form. This form must be submitted to Payroll by October 15, 2001. Unless you submit a form your pay stub information will default to electronic viewing.

Please click on the link below.

Name: CLINT DEAN Personnel number: P00509091 Phone: 7138530484

If you have questions about electronic pay stubs, please contact Janice Priddy (Payroll) 713-853-7839 or Marie Newhouse (ClickAtHome) at 713-345-4185 or send an email to [Enron.Payroll@enron.com](mailto:Enron.Payroll@enron.com) (Enron Payroll in Outlook).

Stay tuned for more details in the coming weeks.

| File       | dean-c/discussion_threads/284.                                                                                       |

Thank you to everyone that attended the meeting on energy product definition on Tuesday, May 7th at Tractebel's offices in Houston. The objective of this meeting was to define the initially offered energy product that will be available for electronic matching transactions on the APX Trading Exchange that will open June 1st in the ERCOT market. This objective was realized.

The first energy product that will be offered on the APX Trading Exchange is defined as follows:

**FIRM ENERGY/HOURLY (FEH)**

\* Supply or pay \* He who moves the power pays \* Marked one of four ways when posted: \* North Zone \* West Zone \* South Zone \* Any Zone \* Traded hourly \* Trading period extends out 72 hours from the end of the Adjustment Period \* Trading period closes 15 minutes before the Operating Period

At the request of meeting participants, I am also including a definition for a Firm Energy/Daily Product. This definition might be considered as a market standard definition for daily energy bilateral trading as of June 1st. This product will not be offered on the APX Trading Exchange on June 1st but, with consensus, could be used for daily energy transactions between market participants.

**FIRM ENERGY/DAILY (FED)**

\* Supply or pay \* Seller's choice \* Sink pays congestion

I'm also attaching the Powerpoint slides that were used to kick-off the brainstorming session during the meeting. If I've missed any crucial information, or any decisions that were made during the meeting, please refresh my memory. If you have any additional comments or feedback, please contact me.

Thank you again for taking the time to work as a market team in developing a strategy to create a vibrant and liquid market. If you do not already have desktop access to APX trading technology, please let me know and we will provide you with additional information.

Wendy Brown Manager, Market Development Automated Power Exchange 3800 Buffalo Speedway, Suite 150 Houston, TX 77098 713-850-9515 office 832-444-8402 cellular www.apx.com

Top of the morning to ya

Yes its true !!

Some have heard the rumor but have no fear " Stumptown bike and brew " is coming to a neighborhood near.

We did a "test ride" the other weekend and this drunken debacle proved to be quality mahem for sure.

Just to give you an idea for Saturday. The test ride was out to Alameda Brewery, Loralwood brewery, Moon and Six Pence, Goodfoot and then "we closed up Dots".

You can meet us while on the ride if 3 is a bad time, we'll be out for the night.

Any questions, give a call,

Cheers,

PK ----- Forwarded Message: ----- From: "Hiram Henry" <hiramhenry@hotmail.com> To: mcunico@hotmail.com, jakub21@hotmail.com, griswold@pdx.edu, landslidedude@yahoo.com, robj@pdx.edu, psu21973@odin.pdx.edu, evel42@hotmail.com, meganlunney@hotmail.com, jmelady@odin.pdx.edu, ekrapp@pdx.edu, vugs@hotmail.com, sierraconder@hotmail.com, kjanzen@pdx.edu, becky@psg.com, pinchmagos@hotmail.com, kc@iq-9.com, landon\_holt@hotmail.com, pkrain@att.net, joel.much@adidasus.com, marnemail@yahoo.com, dalloway42@cs.com, cg@humanclock.com Subject: Oct. 6 Bicycle Pub Crawl and Maylay Date: Sun, 30 Sep 2001 15:02:15 -0700

SATURDAY, OCT 6: SECOND INCEDENT OF THE BICYCLY PUB CRAWL/MALAY!

THE OBJECTIVE: A band of geeks on bikes tours a loose agenda of multiple micro brewpubs with eager attention to quality beer and bad humor. General chaos, mayhem and entropy is predicted and encouraged. It's an amalgamation of those invited directly, indirectly and whoever is taken hostage. Quaility of beer is usually maintained throughout the endeavour, although reputation of drinking establishments deteriorates. Pimpin' hot tub available afterhours at homebase for post-event analysis.

THE RENDEZVOUS: Meet Saturday, Oct. 6, 3:00 at home of Phil, hiram, John and Brian. (2921 SE Franklin Av: Up Hawthorne, Right onto SE 20th, Left onto Division, Right onto SE 29th, past Clinton & Brooklyn and left onto Franklin). (503) 236-3342 if you're lost.

Keg will be tapped, bikestand available for last minute repairs and our cat and dog will be fighting in the driveway for pre-game entertainment. Pre-game activities will also include...

BICYCLE HOOD ORNAMENTS! Bring your favorite Lego Man, rubber squeaky animal or StarWars figure. Everyone rides better with a Mojo! Glue and Zip-ties will be provided.

WHAT TO BRING: -Rubber chickens and hood ornaments. -Yes, you must have a bike! (Duh!...Just steal your roommate's!) -For Chrissake, bring a helmet...If you don't, you probably didn't have that much to protect anyhow. -It'll get dark and bikes are invisible so lights are wise -Darts are handy at a couple of pubs. -Yes you CAN get a DUI on a bike but has that ever actually stopped you?

hiram 2921 SE Franklin Portland, OR 97202 (503) 236-3342

We are talking to people about providing this same scheduling service. APX will probably be one of our biggest competitors. We need to get a software system that is able to automate our trading schedules to the ISO, as well as, schedules for anyone else we sign up to represent them as their QSE. - Mike

Subject: ERCOT Market Readiness Meeting #5 Follow-up

On the day after the ERCOT Market Readiness Meeting, all market participants are keenly aware of the limited amount of time left before system testing, the mock market and the opening of the pilot market in June 2001. Regardless of the amount of energy and resources invested, time seems to be accelerating toward deadlines.

One of the complex development projects is the Qualified Scheduling Entity (QSE) function. Market participants may still be resolving development, implementation, communication and staffing issues. The financial costs related to self-providing QSE services are substantial, and for some participants, a major barrier.

Automated Power Exchange (APX) is an independent entity (takes no position in the market) that will operate in ERCOT as a QSE. APX currently operates as an independent Scheduling Coordinator to the CalSO in California. APX is offering a variety of flexible solutions for the QSE function. These solutions include:

APX acts as the QSE for a market participant: market participants can select APX as their QSE. APX provides the platform for participants to schedule energy and ancillary services to ERCOT, and provides settlement support. Participants can also access the APX energy and ancillary services trading exchanges continuously. Because APX is an independent provider, participants are assured that their market information is confidential. The fee for this service is volumetric and affordable.

APX as an Application Service Provider (ASP) to a participating QSE: APX offers other QSEs the opportunity to utilize APX technology for any or all of the following functions: scheduling energy and ancillary services to ERCOT, creating settlement statements and other functionality that a market participant may need. Since APX is utilizing the same technology for its own QSE service, participants who choose to utilize APX as their ASP are assured that the technology exists and is ready for each testing phase, the mock market and the pilot market. The fees for this service can either be volumetric or annual, based upon individual participant preferences.

As your organization continues to make decisions about the implementation of the QSE function, APX is ready to discuss ways to assist the process and ease the time constraints that all market participants are facing. Contact me for a more detailed discussion.

Wendy Brown Manager, Market Development Automated Power Exchange 3800 Buffalo Speedway, Suite 150 Houston, TX 77098 713-850-9515 office 832-444-8402 cellular www.apx.com

Cara,

Alicia @ Dynegy ultimately decided to cut this schedule as per my call with her at 16:54 PPT I notified Karen of this cut at 16:55 and Steve @PPM @ 17:21, (because he called me)

Karen maintains that stateline energy is delivered to Grant's Interconnect and not to a valid Mid C delivery point. I gave Alicia BPA (T) and WWP (T) as valid wheels to deliver, but she had already decided to cut and L & D upstream (ultimately PSCO)

I had a long conversation w/ Matt (Pacifcorp) Steve (PPM) and Karen (Chelan) -We talked mainly about the reliability of the energy and the details of the path, but nobody offered a viable solution. I pointed out the two wheels that could be purchased real time, but this is not there obligation.

Note: Steve (PPM) asked me @ 17:21 if Chelan still wants the energy ( I didn't know and Karen is gone at this time)

Call me with any question, Craig 503.880.5303

This is a follow up reminder about the ERCOT Retail Transition to Open Market Meeting for tomorrow, November 27 at ERCOT. If you haven't RSVP'd for this meeting and plan to come, please reply to this email to confirm your spot. Space is still available for this meeting.

Terri Waggoner desk: 512-225-7027 fax: 512-225-7058

-----Original Message----- From: Bergman, Karen Sent: Wednesday, November 14, 2001 4:10 PM To: 1 Texas Test Plan Team; 1 Standard Electronic Transactions; 1 Retail Pilot; 1 2001 RMS and others(Retail Market Sub.) Cc: 1 ERCOT SCS Leads; Hailu, Ted; Bojorquez, William "Bill"; Jones, Sam; Noel, Tom; Tindall, Heather; Waggoner, Terri; Broadrick, Cherie; Hetrick, Nancy; Patel, Roshni; Morales, Rita; 1 ERCOT Client Service Reps; Registration Subject: ERCOT Retail Transition to Open Market - Meeting 11/27/01 Importance: High Subject - ERCOT Retail Transition to Open Market Date - Tuesday, November 27, 2001 Time - 9:30 am - 4:00 pm. Lunch will be provided. Location - ERCOT Met Center (directions - <http://www.ercot.com/AboutERCOT/DrivingDirections.htm>) ERCOT is hosting this meeting to provide an orientation to the Competitive Retailers about what will transpire between now and January 1, 2002 for the Texas Retail Market. Included in the presentation will be an overview of the migration to production, the switching process, the ERCOT portal, as well as communicating with ERCOT. Please review the attached agenda for the full list of items that will be covered. << File: Retail Market Transition to Open Market.doc >> This meeting is open to all CRs but will focus on topics to help the new CRs in making the transition. Attendance is limited to 100 people. Please RSVP to Terri Waggoner (twaggoner@ercot.com) by Tuesday, November 20th. Enclosed is a progress report towards the transition to the full retail market operation. The first attached file was used at a presentation made to the ERCOT Technical Advisory Committee (TAC) on Thursday November 8, 2001. The presentation contains the status of switch requests submitted by Competitive Retailers (CRs) as of that date. It also presents key retail market milestones on a timeline for the transition to full market operations on January 1, 2002. A second file detailing the Texas SET version 1.4 migration plan approved by the Retail Market Subcommittee (RMS) is also attached. << File: Transition Update.zip >> If you have questions, please contact Karen Bergman at 512-248-3171 or Ted Hailu at 512-248-3873. Thank you. Karen Bergman Senior Client Services Representative ERCOT 512-248-3171 kbergman@ercot.com ps - I apologize if you received this email more than once.

| File       | dean-c/notes_inbox/8.                                           |

FYI. Lower TXU's load by 100,000 customers due to ice induced outages (see= =20 below). - Mike -----  
Forwarded by Mike Curry/HOU/ECT on 12/13/2000 12:12 = PM=20

TXU <webmaster@www.txu.com>@www.txu.com on 12/13/2000 12:08:23 PM Sent by: media-request@www.txu.com  
To: <media@www.txu.com> cc: =20 Subject: New TXU Press Release

A new press release has been posted to the TXU web site. Content of this= =20 release is included below.

You may also view a comprehensive list of TXU press releases at=20  
<http://www.txu.com/news/mediacenter/newsindex.asp> ICE EMERGENCY PROCEDURES ACTIVATED BY TXU  
ELECTRIC & GAS

Dallas, TX - December 13, 2000 - TXU Electric & Gas has initiated emergency= =20 procedures to restore service to customers following the ice storm that hit= =20 North Texas.

TXU Electric & Gas activated its System Emergency Center to speed up the=20 repair process. Company officials say the highest priority is the safe=20 restoration of electricity to customers who have been affected by adverse= =20 weather.

As of 11:00 a.m. TXU Electric & Gas officials say:

- Crews have been working since 6:00 p.m. Tuesday, December 12, when the= =20 first outage calls came in related to ice. - Customers are constantly being restored; however melting ice may create= =20 additional outages. - Crews are being strategically shifted around where they can do the most= =20 good. - An estimated total of 100,000 customers are without service as of 10 a.m.= =20 This is less than 4 percent of TXU Electric & Gas customers. About 50=20 percent of the affected customers are in East Texas. The other 50 percent= =20 are in the Metroplex and south along the I-35 Corridor. - TXU Electric & Gas has sent extra crews to South and East Texas and is= =20 assessing the need to send additional repair crews to these areas. - TXU Electric & Gas officials are hopeful they will have service restore= d=20 within 48 hours for most customers, weather permitting.

Anyone who has lost electrical service is urged to call: (toll free)=20 800-242-9113.

TXU Electric & Gas officials regret any inconvenience and hope customers=20 understand an ice storm is an extraordinary event. TXU crews are committed = to=20 restoring service as quickly as possible. # # #

Did anyone take care of Powerex cuts on Friday?

I've entered a sale to Powerex to bookout for two hours in which they cut a preschedule (deal 795777/tag 16EV) and were unable to resupply the entire 25 mw. Sale is for HE 13 - 13 mw @ \$46, and HE 21 - 6 mw @ \$31. Prices are EPE's incremental costs for those hours, used per Steve at El Paso.

If any of you have more information about these cuts and how they should have been handled, please let me know.

FYI - Cuts were not handled correctly if Real Time Position Manager is not flat when you leave.

| File       | dean-c/inbox/71.                                                         |

I met with the Research team responsible for building a model for EES and ran through the model. The model can be used to value ERCOT deals or at least we can use it as a benchmark for pricing. I have attached a document that summarizes what EES is using the model to price, and how we can use it to price our deals. I am out tomorrow but will be back in the office Wed. morning. Research is looking at historical ERCOT prices and customer load data (TXI). I will set up a meeting on Wednesday to further discuss the model and other issues associated with deal valuation. Call me on my cell if you need to reach me, (832) 275-8212

#### New EOL Download - PLEASE READ

|            |                                 |
|------------|---------------------------------|
| Sender     | kate.symes@enron.com            |
| Recipients | ['shift.dl-portland@enron.com'] |
| File       | dean-c/inbox/178.               |

FYI -

I've had a few requests for changes to and enhancements of the EOL Download sheet. Dan Maxwell - of the 4th floor IT group - sent me those changes today. The download now allows you to sort by delivery point, or by hour, and has an added "refresh" feature. The date has also been reformatted to fit into our inc sheets (two digit instead of four digit year). Most importantly, the query now pulls in inter-desk swaps done on EOL.

The new EOL download is saved in p://real time/increment/windows 2000/NEW EOL DOWNLOAD

The sheet is still very basic and self-explanatory, so if you have anything to add, or questions about how to use it, please let me know.

#### Quick Reminders - PLEASE READ

|            |                                 |
|------------|---------------------------------|
| Sender     | kate.symes@enron.com            |
| Recipients | ['shift.dl-portland@enron.com'] |
| File       | dean-c/inbox/916.               |

FYI -

1. Please do not ever, under any circumstances, modify EOL deals in any way. These deals have an embedded contract in them which is created at the moment a counterparty hits your bid or lifts your offer. Also, EOL deals may not be extended in Deal Scheduling.

2. When entering deals to account for ancillary services (i.e. deals with no fixed price, only demand charge price), please make any changes or extensions in Deal Entry rather than Deal Scheduling. Demand charge price is not accounted for when the deal is only extended in Scheduling.

Let me know if you have questions about either of these reminders. Thanks for reading this all the way through.

In California -

STWBOM is 50 mw short on peak @ SP15. Day-ahead price is \$27.60. Purchase to cover the short under the STWHOURLY book. Complete an inter-desk sale from STWHOURLY to STWBOM and enter a sale to the Cal-Imbalance under STWBOM to complete the deal.

STCALI is 48 mw long off peak @ SP15. Day-ahead price is \$21.54. Purchase from the Cal-Imbalance under STCALI. Enter an inter-desk purchase from STCALI under the STWHOURLY book.

In the Northwest -

STNW is 22 mw short on peak @ Mid-C. Please purchase to fill this short at PGE System under the STWHOURLY book and enter an inter-desk sale to STNW. This lending deal is in through Thursday.

Please let me know if you have any questions.

| File       | dean-c/inbox/230.               |

For Thursday -

STWBOM will be short 75 mw on peak @ SP15. The three day-ahead pieces were sold @ \$27.20 and \$28 (BOM sales) and \$29.97 (SP15 Peak Day-Ahead Index).

Make real time purchases to cover the short under the STWHOURLY book. Enter an inter-desk sale from STWHOURLY to STWBOM. Then make a sale under the STWBOM book to the Cal-Imbalance to complete the deal.

Also, STWBOM will be long 20 mw HE 2-5 @ PV. This is a parking deal with PNM done at \$16 (\$14 purchase price + \$2 buy-resale fee). You'll notice we'll be long 20 mw for these hours in Real Time Position Manager. Please enter an inter-desk purchase from STWBOM under the STWHOURLY book @ PV and sell this off real time under STWHOURLY.

Let me know if you have questions.

Dear Ms. Roffmann:

I am with Enron Power Marketing Inc. and have been working on our effort to test as an LSE in flight 1001. I have a couple of questions regarding transmission services and hope that you can answer them or direct me to the person who can.

We need to speak with someone who can assist us in getting a service agreement set up for the Reliant control area in order for us to operate as a Load Serving Entity. If someone can explain or provide information regarding the basic service package or other available packages that would be extremely helpful.

Any help you can offer would be greatly appreciated.

Regards,

At RMS' October 11, 2001 meeting, Nancy Hetrick, RMS Chair, announced that an effort was underway to create an integrated planning calendar for the 1.4 Migration Plan and mass customer move from TDSPs to the Affiliated Retailer. On October 16, 2001, RMS sponsored a workshop on the 1.4 Migration Plan. The selected strawman was Option B rev 01, which was review at the next workshop of the mass customer move held on October 17, 2001. That meeting's attendees asked clarifying questions, however did not add additional dates to the integrated planning calendar. Attached file is the presentation from 1.4 Migration Plan Workshop. Attendees selected Option B Rev 01 as the strawman. Please be prepared to discuss the selected strawman integrated migration plan at RMS' October 25th meeting. | <b>File</b>       | dean-c/inbox/307.               |

For Saturday:

STWBOM will be long 20 mw HE 2-5 @ PV due to a parking deal with PNM. Day-ahead price is \$15.50.

Make real time sales to take care of this length under the STWHOURLY book. Enter an inter-desk purchase from STWBOM under the STWHOURLY book.

For Saturday and Monday:

STWBOM will be short 50 mw on peak @ SP15. Day-ahead price is \$27.60.

Make real time purchases to cover the short under the STWHOURLY book. Enter an inter-desk sale from STWHOURLY to STWBOM. Then make a sale under the STWBOM book to the Cal-Imbalance to complete the deal.

For Saturday and Sunday:

STNW will be short 44 mw off peak @ PGE System due to a lending deal with PGE. Day-ahead deals are at the Mid-C Index.

Make real time purchases and any transmission necessary to cover the short under the STWHOURLY book. Enter an inter-desk sale from STWHOURLY to STNW. Link real time purchases to STNW deal 828626.

**Inter-Desk Swaps - HOW TO**

|                   |                                 |
|-------------------|---------------------------------|
| <b>Sender</b>     | kate.symes@enron.com            |
| <b>Recipients</b> | ['shift.dl-portland@enron.com'] |
| <b>File</b>       | dean-c/inbox/884.               |

FYI -

It appears the issue of how to execute inter-desk swaps is still not resolved. I've attached the instructional worksheet Bill sent out awhile ago - it is actually a very coherent rendering of the intricacies involved in entering these enigmatic deals. (Read: Inter-desk swaps are not real easy to understand. This worksheet is.)

One tip: If STCA is long or short going into the Real Time market, they will have entered a purchase from or sale to the California Imbalance as a sort of "place holder." An offsetting purchase or sale will need to be made under the STCA book in order to complete the deal and keep STCA flat.

If you're feeling ambitious and want to see the direct effects of putting deals in under the wrong book, run a Forward Obligation report (in Enpower Reports under the Risk tab) for the day, desk, and region in question. If you did everything correctly, the report should produce nothing but zeroes.

Jerry/Eric/Frank,

Attached please find a "Unit Contingent" call option proposal that I had promised you at our last meeting. The thought here is Frontera could sell energy firm from the plant (once you become comfortable with its operation) and hedge most of the risk of a unit outage with this product. The time to do this is when the premium for a firm product (roughly \$5/MWh) is greater than the price of this product (roughly mid to high \$2's). You will find both an indicative proposal for Jun-Sep01 (I am not suggesting this term but wanted to give you a feel for the pricing) and the entire standard contract attached below for your review.

This may require further explanation on my part but I thought I would send it to you now so you can become familiar with it. Please call if you have any questions, - Mike 713-853-4258

**New EOL Download - PLEASE USE**

|                   |                                |
|-------------------|--------------------------------|
| <b>Sender</b>     | kate.symes@enron.com           |
| <b>Recipients</b> | [shift.dl-portland@enron.com'] |
| <b>File</b>       | dean-c/inbox/881.              |

FYI -

We have a new tool at our disposal to assist in the transfer of EOL information from Enpower to the Inc sheets. I've saved it as the "EOL Download" in P://Real Time/Increment/Windows 2000/EOL Download.

You can use this workbook to download EOL deals throughout the day. It's fairly self-explanatory, but here are a few suggestions:

1. If necessary, limit your query to one region using the boxes in the upper-left-hand corner.
2. Click "Download Deals," and enter your Enpower password when prompted. Be sure to check that you are downloading for the current day.
3. Once deals have populated the screen (should take no more than 30-45 seconds), filter for the hour and/or delivery point you need.
4. Copy all relevant rows and paste directly into the appropriate Inc sheet.

This sheet has just enough flexibility to make it functional and keep it simple. All it does is download EOL deals from Enpower - nothing more. If you'd like to see this expanded upon, feel free to give me suggestions.

Thanks.

**Deal Blotter Problem Solved**

|            |                               |
|------------|-------------------------------|
| Sender     | kate.symes@enron.com          |
| Recipients | [shift.dl-portland@enron.com] |
| File       | dean-c/inbox/681.             |

FYI -

We now have access to a program that should help us to use Deal Blotter as a viable tool for online trading. As you know, no more than one trader may access a given blotter at one time ("Trader ID locked" error message). Instead, DEAL TICKER can be used by those members of the group not currently trading online, as it allows all users read-only access to STWHOURLY deals done on EOL. It also features a handy "refresh" function which will allow you to see Real Time deals in a real time fashion. Here's how to use Deal Ticker:

1. Open DEAL TICKER from the Enpower Launch Pad 2. Click the big plus sign 3. Under desk, specify "EPMI Short Term West Hourly" 4. Specify correct date and time zone 5. Select "Group 1" deal type (Cash Forwards & Index Forwards) 6. Select "Show EOL ID" 7. Click OK

You should see a format similar to the blotter on your screen within seconds. From there you can monitor STWHOURLY online trading regardless of who's doing it by hitting the "Refresh" button periodically.

Please let me know if you have any questions about this.

| File       | dean-c/inbox/690.                                     |

REVISION:

PLEASE CHANGE THE PRICE ON DAY-AHEAD EL PASO PURCHASE (794022) TO \$2.25 - THIS WILL COVER OUR LENDING SERVICE FEE AS WELL AS OUR NEGOTIATED SCHEDULING FEE WITH EL PASO.

THANK YOU.

-----Original Message-----

From: Symes, Kate Sent: Thursday, September 27, 2001 12:33 PM To: DL-Portland Real Time Shift Cc: Gang, Lisa; Salisbury, Holden Subject: EPE Lending for 9/28

We're lending again....

The STSW desk will be 20 mw short per the El Paso lending agreement, on peak @ 4C-345kv. The day-ahead sale price is \$27.05. Please purchase to cover this position under the STWHOURLY desk and complete an inter-desk sale to STSW to tie out our positions.

PLEASE NOTE: INTER-DESK SWAPS ARE NOT THE SAME AS ANNUITIES. YOU CANNOT NET THE DAY'S VOLUME AND SWAP OUT AT ONLY ONE HOUR. YOU MUST BUY AND SELL THE SAME AMOUNT EACH HOUR TO REMAIN AT ZERO EACH HOUR.

It's been awhile since we've done this, so here's a reminder of the procedure. Once you've purchased to cover this short in the real time market, you must sell back to El Paso @ \$0 to keep our position net zero. Then reduce the day-ahead

purchase price from El Paso (794022) to \$2 to cover the lending service fee.

Please, please, please ask me if you have ANY questions about how to do this.

On Monday, the day-ahead market traded for 3 days out, so these positions will remain in effect for Wednesday and Thursday.

PLEASE NOTE: STNW HAS NEGOTIATED A LENDING DEAL WITH PGE. DEAL 831616 IS IN ENPOWER @ MID-C; HOWEVER, PGE MAY REQUEST TO HAVE THE POWER DELIVERED AT THEIR SYSTEM INSTEAD. PLEASE COMMUNICATE WITH PGE REAL TIME AND ACCOMMODATE THEIR NEEDS WHETHER THEY BE AT MID-C OR PGE SYSTEM.

-----Original Message-----

From: Symes, Kate Sent: Monday, October 22, 2001 5:25 PM To: DL-Portland Real Time Shift Subject: Positions for Tuesday

In California -

STWBOM is 50 mw short on peak @ SP15. Day-ahead price is \$27.60. Purchase to cover the short under the STWHOURLY book. Complete an inter-desk sale from STWHOURLY to STWBOM and enter a sale to the Cal-Imbalance under STWBOM to complete the deal.

STCALI is 48 mw long off peak @ SP15. Day-ahead price is \$21.54. Purchase from the Cal-Imbalance under STCALI. Enter an inter-desk purchase from STCALI under the STWHOURLY book.

In the Northwest -

STNW is 22 mw short on peak @ Mid-C. Please purchase to fill this short at either Mid-C or PGE System, per PGE's request, under the STWHOURLY book and enter an inter-desk sale to STNW. This lending deal is in through Thursday.

Please let me know if you have any questions.

As I'm sure you're all aware, it took the group a day or two to hit its stride after EOL was launched on Aug. 20. We have already received approximately 30 disputes filed by various counterparties regarding deals that flowed on the 20th and 21st. Many of these will be especially difficult to settle correctly given the fact there is virtually no documentation or information to be found regarding the original deal. Some deals done on EOL were altered; other bilateral trades were

simply zeroed out; and still others exist only in the Inc sheets.

This situation outlines the extreme importance of documenting changes in deals as they're being made. If you have reason to zero out a trade done by an earlier shift, or to alter a trade executed online, please convey that reason. Some suggestions:

1. If you have a notebook, and use it, please enter the date on the top of the page every time you start a shift. Without that, your notes are pretty much worthless.
2. Type a short note into the Scheduling Comments section of deals you zero out or change, especially if you're changing them much later than the time they were entered.
3. Use the superfluity of spreadsheets, discussion databases, reports, Enpower applications, cut sheets, and other pieces of paper available to the Real Time group as evidence of your activity while on shift.

If this sounds unreasonable, I would welcome suggestions for an alternative. Thanks for your help.

Kate

"Shirley Whyte" <swwhyte@mindspring.com> 10/24/01 11:37 AM To: <careed@aep.com> cc: "Glen Wingerd" <gwingerd@ercot.com> Subject: Re: Change Control conference call 10/24

Glen incorporated the wrong bulletin into the guideline. Not his fault, though. George's website obviously had a problem and they recovered back to an old backup without knowing that they were affecting the validity of the bulletins. I requested that someone initiate a change control to repair the examples, but I don't know who is working on this.

The initial bulleting was revised a couple of times to include new revelations from RMS workshops and actual experience.

Regards,

Shirley Whyte 713.906.5224

Testing Website: <http://65.67.37.96> ----- Original Message ----- From: careed@aep.com To: swwhyte@mindspring.com Cc: heidi.schrab@greenmountain.com Sent: Wednesday, October 24, 2001 11:10 AM Subject: Change Control conference call 10/24 Shirley, these questions came up on the change control conference call this morning and Texas Set members could not understand the disparity between the bulletin and transaction set. Can you help us? Question: 6) Question 2 is also related to bulletin A0056 attached. In the examples provided in the document the Service Period Start Dates in the BO and PM Loops do not match the Service Period Start Date in the PP Loop. The 810\_02 Service Period Start and Service Period End states: "Monthly Invoice: Required - The full service period should match the applicable PTD loops from the 867." A. If the Service Period End Dates in the PP loop is different from the BO and PL Loops, what date should be used for the Service Period End Date on the 810\_02? Question: 7) Question 3 is once again related to bulletin A0056. A. Should the overlapping dates apply to the IA Loop as well, (i.e., since the IA Loop did not exist at the time the bulletin was created) or should they match the dates in the PP Loop?
