F.Y.I. As we briefly discussed at the end of last week, I will be out of town on previously scheduled vacation from July 14th through July 20th. This time was allocated as vacation as per the original shift schedules drafted by Kayne Coulter while he was Real Time Manager. Travel plans have already been made at this point. Thanks for your understanding.

File	forney-j/sent_items/233.

I am very interested and I will be available at any time for training. JMF

-----Original Message-----

From: May, Tom Sent: Thursday, June 21, 2001 7:32 PM To: Forney, John M.; Coulter, Kayne; Miller, Jeffrey; Hernandez, Juan; Baughman Jr., Don; Comeaux, Keith; Day, Smith L.; Thomas, Paul D. Cc: Cunningham, Lance; Will, Lloyd Subject: FW: Power World Training

Folks,

Please let Lance and myself know if any of you are interested in attending the Power World training. Power World provides visual representation of an optimal power flow model that can help make decisions regarding potential TLR's and price impacts of congestion. We have the program now and the intent is to make more use of it over the next few months and as RTO's and congestion pricing becomes more prevalent.

Thanks,

Tom.

Power World will be in next week to conduct training.

We plan to begin at 11:00 AM on Wednesday (6/27) and end about 6:00 PM, to accommodate the trading floor's schedule.

On Thursday (6/28), we will begin at 11:00 AM and end about 4:00 PM.

All participants will need to have a laptop and an external mouse. I will get back to everyone on the room number later.

Joy,

We spoke with John at your office about a proposed idea where EPMI and COB book both sides of the parking agreements and then any power COB keeps is sold to COB at a price plus \$4 to zero out the parking. This is acceptable for us, and I have tried to get in touch with John several times so that he can instruct whoever to make the changes in your system and to confirm that this is ok so we can change our system. However, I am not getting any response. Do you know if any changes have been made to your numbers? If you could get with him and give me a call, we could try to close out May! Thanks.

File	forney-j/inbox/136.

I am working with the David Cummings to lock down the timing and details on the 800 numbers.

We are creating a new MAPP PC and getting it tested this week. We will move the MAPP Printer over on Monday morning at 6AM.

We are deploying the 4 machines (EB3114A / 3114 / 3122D that will be used for weekend work to the 31st floor today. We will take the user's original machine and pre-deploy it.

Genco operations are totally up and running. The following systems have been setup and tested at ECS. 2 New ops / 1 old ops console 2 new charts/ 1 old 1 MAIN/ 1 ECAR 1 Programmer console 4 Corp machines

I am putting together a full sheet with all of these details I will get out by tomorrow morning.

Lloyd: If you want me to change anything let me know .

Thank you all for the help.

Daniel

Real time 24 hour 1-800-349-5527 and 1-877-367-6601 Genco 1-877-294-3900 Services 1-800-611-1282

How will the cutover work. If a trader, operator logins in at the new building will the 800 numbers not follow. If so then we will bring in an extra crew at noon to login and get set up in the new building with a planned cut over around 3pm. Once the transfer is done you will relocate the mapp equipment as well as the remaining ercot, midwest, southeast and northeast equipment to the new building.

The night shift will report to the new building at 6pm.

Thanks.

Breakfast & Lunch - \$5.00 ea

Sender	jae.black@enron.com
Recipients	[]
File	forney-j/deleted_items/114.

Starting tomorrow, 11/28/01 we will be included with the Gas Breakfast and Lunches. However, there will be a cost of \$5.00 each or \$10.00 total when breakfast is provided. They will have lunch everyday and breakfast only three days of the month, which will be during bid week.

I will come around every morning and collect your money...I will then have to provide a list to the Gas people who will be checking your name off as you enter the breakfast/lunch line.

Please let me know if you have any questions.

REMEMBER...ONLY THOSE WHO GIVE THE \$5.00 WILL BE EATING.

Thanks for your cooperation,

Gentlemen:

As a result of changes at ERCOT we will have to revise the Position manager and QSE MOS to incorporate the new ercot zones. If the ESCA team can come up with an implementation plan that would be great.

Also, we have not heard a thing about testing for daylight savings time. Are we ready for the switch?

The ERCOT Board approved the congestion zones for next year, 2001. The ERCOT Board accepted the 3 CSC 4 CM Zone model for use in commercial congestion management for 2002. Effective date is January 1, 2002. The three CSC's are Graham-Parker 345 kV DCKT, Sandow-Temple 345 kV DCKT and STP-DOW 345 kV DCKT. The four CM Zones are West02, North02, South02 and Houston02. A power point presentation along with a map is available at <ftp://ftp.ercot.com/CSCDATA/csc.htm>.

Alex traded an hourly deal (HE 18 & 19 for 30 mws from CPSB City of San Antonio to Reliant HLP) on Tuesday afternoon, however, did not get the deal entered into the new ERCOT portal. The scheulde was input into the old ERCOT oasis and the power flowed as scheduled. I tried to input the schedule into the new ERCOT portal, however, it was not accpeted b/c it was not recieved prior to 2hour hourly ercot deadline. This is for your information.

Hey John! I'm glad got through to you and that your settling into Texas life. I did not know Brett was at the ISO now. How long ago did he make the switch? If you have an email addr. for Brett, I would appreciate touching bases with him also.

Not sure if you remember me telling you before I left PDX, but Phoenix is my home town. I have been loving it! And the family really likes it here too. Went javalina hunting with my son for the first time back in Feb. and love camping out in the desert. We did not kill any of those little pigs (did not even see one), but it was still a blast.

Of course it is hot as hell here too. Not a lot of humidity, which is a life saver, but still keeps a fellow inside were the AC is working. From October to May, the weather is great, and that's when we do most of our out door stuff. My son is 12 years old now and already as tall as dad. Man! Does that ever make a fellow realize he is getting "old." If I'm ever in Houston John, I'll look you up. I usually bring my wife (Joy) along on business trips, so maybe we could meet you for one of those famous Texas steaks one evening?

Take care John and may God continue to bless you!

Ercot has a problem that could cause us great financial pain: Sometimes when we are submitting an hourly schedule, through the Ercot Portal, the Day-ahead schedules are affected. Mismatches for every counterparty occur. We are subject to the hourly price for mismatches and this could prove extremely costly, even for one hour. Eric Saibi spoke with the Ercot help desk who indicated that the problem was on our side.

I called Ercot and after some time, they relayed that they were experiencing server problems.

Attached below is the ticket number related to this problem. If this occurs again, make sure that you reference this number.

Sunday Weather Update

Sender	dryan1@houston.rr.com
Recipients	['pace.andy@enron.com', 'david.ryan@enron.com', 'davis.dana@enron.com']
File	forney-j/deleted_items/65.

Fundamentals of the weather for the next 10-14 days remain the same as last week. The MRF and especially European models have been the most consistent lately. I am following the Euro here, but the MRF and Euro are not that much different and share the following....

- 1) A change to much cooler weather than recently begining this week. Weather pattern will become stormier and cooler overall, and we will see some daily variability as storms cross the nation.
- 2) No major Arctic air intrusions through the balance of the month and probably very early Dec.
- 3) Snowcover remains minimal in Southern Canada and in the U.S. This will be changing somewhat over the next couple of weeks.
- 4) I have no changes to the far long term for early to mid December. There is reason to believe that the upcoming pattern will last for a period of time, then change again. When it changes, there is a greater probability than not of it shifting to even colder for the East. It will be our challenge for the next couple of weeks to determine timing and intensity of this change.
- 5) Tomorrow's 6 to 10 day and 11 to 15 day forecasts hitting the market should be neutral to bearish overall, but certainly not as warm / mild as recent weeks.

Dave

Saturday Update

Sender	dryan1@houston.rr.com
Recipients	['pace.andy@enron.com', 'david.ryan@enron.com', 'davis.dana@enron.com']
File	forney-j/deleted_items/112.

I have no major changes, but Arctic air mass plunging into Plains now on short range models.

Overall, the progression of ideas from last week look to hold true for this week and beyond. The very cold weather will probably be a bit more expansive by the end of the week than I had originally planned for, which means colder for Texas, the Tennessee Valley, the Midwest and Ohio Valley later this week. The deep Southeast and along the East coast it will turn colder later this week but the coldest of air will not reach those areas.

Snow and ice will probably reach as far south as Oklahoma City in the Plains and western PJM in the East during mid to late week. Houston may have trouble getting out of the 40s for highs Thursday as compared to near 80 degree temps currently. A large area of snowcover will become established over the next 5-10 days over the northern and central U.S.

I continue to believe the models look too warm in the long range, especially in Canada. Once Canada gets cold at this time of year, it will likely stay very cold. This will set the stage for additional cold air to spread across the United States east of the Rockies in the long range.

Bottom line - true Winter is about to begin, the bear show is over.

We received your order through the Signature Shop for Astros tickets. However, at this time we do request that when placing any orders via credit card, that you also provided us with your Enron coding (Co/Rc). This is used for tracking purposes and will ONLY be charged, if payment can not be made by the credit card given. We also need your EB location to have tickets delivered. Your order is on hold until information is received. You must send by replying to this message. If you have any questions please feel free to call.

***Please note- that due to the volume of orders received and the limited quantity, if we receive no response in 24hrs your order will be canceled and you will have to reorder via on-line.

Thank you Micael Shea 713-853-5418 713-646-8037

Dave, its good to hear from you. We are in Houston and its hot! My wife is doing great and we are still trying to get used to life in Houston. I am trading in Ercot region (Texas) and, of course, Brett is now working at the ISO. MY WIFE AND I MISS PORTLAND Working in the main office isnt as much fun as working in Portland. There is a good chance that I will return to PDX, as there are so many good people there and so much to do outdoors. So, tell me what you are doing now in Phoenix. Everyone that I've met from SRP has been very nice, (Perry, John Sullivan, etc.). Hope you enjoy working there and all is well with your family.

JMF

Subject: You! Hi John, Have not talked with you in quite a while. I'm not even sure if this will get through to you, but thought I would try it anyway. The reason I'm writing is to wish you a Happy Birthday! It seems like I remember your special day happening sometime this month (can't remember the exact date). Hope your wife (Debbie?) treats you right and that life is good for you all! I heard quite a while ago that you went back to Houston (met your replacement, Bill? who told me). It sounds like there's not a lot of the original crew left in Portland. Have some good memories of those days. Anyway, just wanted to wish you a great Birthday John. I will always remember you as the kind of person who took the time to patiently train a "wet behind the ears kid." I will always respect you and Brett Hunsucker for the times you trained me and helped me grow into this business. Take care my friend, and did I say, "Happy Birthday?" Your friend, Dave Olander SRP Forward Trading & Marketing (602) 236-4575

File	forney-j/inbox/55.

I need to make a couple of clarifications to Rahul's message.

First, the proposed contract has a 10% band for all zones. It is not 15% for Houston.

Second, the 4% fee they are unhappy with applies to energy as well as ancillaries. They would like a fixed price adder defined for both. What would you like us to charge for these adders?

We need to get an answer by mid-morning. They expect to decide by the end of this week who they will go to contract with.

Thanks, Terrell

From: Seksaria, Rahul Sent: Tuesday, November 27, 2001 6:32 PM To: Forney, John M.; Gilbert-smith, Doug; Benke, Terrell Subject: BOC Gases Contract Importance: High

Terrel and I had a conference call with BOC this morning. The call was very positive as they were still interested in talking with us. They had a number of questions regarding the contract terms and seems like they want to sign something by week end. I need clarification on a few issues that they raised. We need to give them answers tomorrow.

Proposed Contract terms: 1. Houston Zone: 1.95 MW +/- 15% per settlement Interval 2. South Zone: 2.75 MW +/- 10% per settlement Interval 3. North Zone: 15 MW +/- 10% per settlement Interval 4. West Zone: 1.75 MW +/- 10% per settlement Interval ** BOC going to Balancing Energy (+4% charges) outside the band **

1. Interruptibility - BOC wanted to understand the mechanics. Specifically, they wanted to know how Enron would work with them to maximize curtailment opportunities. They also wanted to know the quantity they could curtail (e.g. If deal is 15 MW +/- 10%, can BOC curtail 16.5 MW, or just 15 MW). Also, do they pay any penalty when they curtail (4%, etc.)

2. Scheduled maintenance - Can they sell contract power a week forward. Is there any penalty for not being within the band during those hours.

3. BOC wants a fixed price quote for all Ancillaries and ERCOT Passthroughs. However they want the ability to unwind this fixed price position should they feel they are better off with ERCOT market prices once the market becomes more transparent. What is Enron's ability to provide such a service?

4. BOC doesn't like the 4% charge in excess of Balancing Energy everytime they are outside the Quantity Band. They said that they don't want to pay more when prices are high and they are outside the band. They want a fixed fee instead of 4% of BES price. Given the bands we have placed in the contract, BOC was outside the band a. 15% of the time in their Houston Zone Interval Load b. 10% of the time in their South Zone Interval Load c. less than 1% of the time in their North Zone Interval Load d. 3% of the time in their South Zone Interval Load

Regards

Doug, I am planning on attending this settlements deal; we plan on meeting Mark Patterson there. JMF [Forney, John M.] I am planning on attending -----Original Message----- From: Miller, Jeffrey Sent: Tuesday, August 07, 2001 6:24 AM To: Allen, Thresa A. Cc: Forney, John M. Subject: FW: ERCOT and QSE Finances - Meeting with QSE Financial Personnel

Thresa--I plan to attend this meeting...Let me know if you're going, as well.

JM -----Original Message----- From: Will, Lloyd Sent: Monday, August 06, 2001 10:05 PM To: Allen, Thresa A.; Day, Smith L.; Bailey, Debra; Sacks, Edward; Miller, Jeffrey Cc: Forney, John M.; May, Tom Subject: FW: ERCOT and QSE Finances - Meeting with QSE Financial Personnel

Looks like we should be in attendance.

Please consider having the Esca folks in attendance with you if it will help.

I will be out all week. sorry

Buckles, Maxine; Tindall, Heather; Moseley, Cheryl; 1 Client Service Reps Subject: ERCOT and QSE Finances - Meeting with QSE Financial Personnel

ERCOT will conduct an informational session related to QSE credit requirements, settlement statements and invoices. Financial personnel who are involved in the processing and payment of settlement invoices within QSE organizations are invited to attend this session. The meeting will provide your staff with an overall awareness of the credit requirements and settlement and billing processes as well as provide an exchange of ideas that is critical for making this an optimum process for all. Additionally, this session will provide your staff an opportunity to meet face to face with the ERCOT staff who are involved in this processes.

The meeting has been planned for Friday August 17th, 2001 from 9:00 a.m. to 2:00 p.m. An agenda for the meeting is attached. A brief tour of the ERCOT facilities will be arranged at the end of the meeting. Please RSVP by Friday August 10, 2001 by responding to this e-mail with the number of attendees from your organization. The new ERCOT Met Center facility is located at 7620 Metro Center Drive in Austin, TX (located two miles west of Austin Bergstrom International Airport, at the corner of Ben White and Riverside Drive, behind the AmeriSuites currently under construction). See the "ERCOT Austin" link at <<http://www.ercot.com/calendar/2001calendar/2001cal.htm>> <<<http://www.ercot.com/calendar/2001calendar/2001cal.htm>>> for a map.
