RE: Examples in Response to Staff Request in Project No. 23220

Sender	dljones@cps-satx.com
Recipients	['operations@ercot.com', 'Jerry Ward']
File	gilbertsmith-d/all_documents/54.

Regarding the response to question no. 2:

In my reading and understanding of the Protocols, the only requirement for the submission by QSEs of monotonically increasing ordered pair bids is for balancing energy service bids. This requirement does not appear to apply to the submission of AS capacity bids by QSEs, although the selection process does require the stacking of all bids in a monotonically increasing fashion.

Also, my understanding is that "monotonically increasing ordered pairs" does not necessarily mean a linear function, i.e., there does not have to be a "straight-line" relationship between all QSE bids.

thanks,

Dan Jones Market Policy & Planning City Public Service of San Antonio 401 W. 15th Street, Ste. 800 Austin, TX 78701

From: Brad Jones [mailto:BJONES5@txu.com] Sent: Thursday, January 11, 2001 5:00 PM To: Operations@ercot.com
Cc: Jerry Ward Subject: Examples in Response to Staff Request in Project No. 23220

OWG members,

Jerry Ward has prepared the following set of responses to the request of the Commission Staff for several examples of the operation and clearing of Ancillary Services markets. The Staff has asked that the examples be provided prior to the next Technical Conference scheduled for January 19.

As chair of the Operations Workgroup, I had asked Jerry to develop the first draft of responses so that each of you could then review and provide comments upon them. Comments should be provided by the close of business on Monday,

January 16th. All comments should be copied to the full workgroup by e-mailing them to operations@ercot.com. Jerry and I will then incorporate the comments, as appropriate, into the examples and communicate to the workgroup the final version of the examples prior to sending them to the Staff on the 17th.

(See attached file: 23220 Examples.doc)

Thanks -- Brad

PUC Staff's Second List of Questions for January 19 Technical Con

Sender	parviz.adib@puc.state.tx.us
Recipients	['isonp@ercot.com', 'danielle.jaussaud@puc.state.tx.us', 'eric.schubert@puc.state.tx.us', 'sheino@ercot-iso.co...]
File	gilbertsmith-d/all_documents/56.

Staff distributed another list of ten questions to those who attended today's pre-hearing conference at the PUC regarding Docket No. 23220 (ERCOT Protocols). A copy is attached for your information that includes a question related to confidential documents filed by ERCOT. ERCOT did not object to sharing this question with you.

You may remember that an early commitment was made on behalf of ERCOT to file written answers to question numbers 2 through 5 of Staff's first list of ten questions. (You got that list as an attachment to my earlier e-mail on January 4, 2001.) Today, we also requested that written answers to be filed by ERCOT on January 17 to cover question numbers 3 & 4 in this attachment. In addition, a draft copy of a paper by Dr. Shams Siddiqi, "ERCOT Local Congestion Management: Potential for Market Abuse," was distributed today to facilitate related discussion on January 19. Unfortunately, I do not have an electronic copy of that paper to share with you.

See you on January 19 Technical Conference.

FW: Interchange Acknowledgments - TA1 Segment

Sender	dave.darnell@systrends.com
Recipients	['tdtwg@ercot.com', 'set@ercot.com']
File	gilbertsmith-d/deleted_items/4.

Info related to the TA1 action item given in the RMS meeting today.

Also attached is the email I originally sent to SET on August 1, 2001.

Thanks, Dave Darnell

602-432-3353 - X12-5v4010.pdf - ISA_IEA.doc Content-Transfer-Encoding: 7bit Reply-To:
<dave.darnell@systrends.com> From: "Dave Darnell" <dave.darnell@systrends.com> To: <set@ercot.com> Cc:
<tdtwg@ercot.com> Subject: ISA/IEA and GS/GE Control Segments doc - FA Reconciliation Date: Wed, 1 Aug 2001
15:50:37 -0700 Message-ID: <005901c11adc\$63c77d70\$a815a8c0@tecradaved> MIME-Version: 1.0 Content-Type:
text/plain; charset="iso-8859-1" X-Priority: 3 (Normal) X-MSMail-Priority: Normal X-Mailer: Microsoft Outlook, Build
10.0.2627 Importance: Normal X-MimeOLE: Produced By Microsoft MimeOLE V6.00.2600.0000

Who owns the ISA/IEA and GS/GE Control Segments doc?

I have a suggestion for it...

It might be helpful to have information something like this in it:

The GS06 (Group Control Number) of the sender's EDI GS envelope is used in the responding 997 transaction to enable 997 reconciliation. It is returned to the sender in the 997's AK102 element.

In other words, the GS06 and AK102 elements are used in reconciling outbound EDI transactions with the inbound Functional Acknowledgments (997).

There is no provision in the ANSI X12.5 standard for returning an ISA number in a 997.

Interchange acknowledgment and reconciliation is enabled with the responding TA1 segment:

<<QUOTE FROM X12 standard>> Interchange Acknowledgment TA1

To report the status of processing a received interchange header and trailer or the non-delivery by a network provider

CONTROL SEGMENT TRANSACTION SETS USED IN: None REF ELE ID ATTRIBUTES NAME 01 I12 Interchange
Control Number N0 9/9 M 02 I08 Interchange Date DT 6/6 M 03 I09 Interchange Time TM 4/4 M 04 I17 Interchange
Acknowledgment Code ID 1/1 M 05 I18 Interchange Note Code ID 3/3 M <<ENDQUOTE FROM X12 standard>>

<<<NOTE FROM D.DARNELL>>> I could find no reference to TA1 segments in our TX SET documents.. so if there is somebody please point me to it. The TA1 segment may be worthy of future discussion in the TX SET work group.

Meanwhile I would recommend that the GS06 (GS control number) always be unique for a trading partner/functional group. You could do this by incrementing by one every time you ran a map... and then storing the last GS06 sent for use by the map (to increment) next time around. If you ALWAYS have only one Functional Group per ISA.. then you could make the GS06 the same as the ISA control number (ISA13).

COMMENTS??

Doug - if we can participate, are you interested?

-----Original Message-----

From: Dautel, Pamela [mailto:PDautel@ercot.com] Sent: Wednesday, January 02, 2002 4:53 PM To: 1 2002 WMS and others(Wholesale Market Sub.) Cc: Middleton, Scott; Ringling, Julie; McCoy, Roy Subject: Announcement for TCR Mock Auction Importance: High

You are invited to participate in ERCOT's Mock TCR Auction scheduled for January 2002. The purpose of the mock auction is to give stakeholders an opportunity to become familiar with the TCR software before the first "live" auction takes place.

Bidding will begin at 10 a.m. January 9, 2002 and bidding will stop at 10 a.m. on January 14, 15, and 16 for each of the corresponding CSCs. Results of the mock auction will be posted on the TCR website shortly after each CSC auction ends.

Anyone interested in participating in the Mock TCR Auction should email either Pamela Dautel at pdautel@ercot.com or Julie Ringling at jringling@ercot.com and request a logon id and password. Please submit your request to participate by January 8, 2002. After you receive a logon id and password, please go to <http://stage.ercot.com/tcr> to participate in the mock auction.

We look forward to your participation in the TCR Mock Auction.

Heidi,

I have no way of being able to discuss cost implications of changing the post card language, since I do not know the current costs and have not reviewed the ERCOT contract for the customer care center. Prior to the meeting, could someone at ERCOT forward that information including a break out for the mailing cost and also invite a person from the subcontractor to prepare estimates on the costs associated with the changes (such as going to a larger card or envelope to assure that customers get all the necessary information to make an informed decision)?

Also, could we begin at 2 instead of 1? Three hours should be more than adequate and the time conflicts with another PUC/Gov. office function.

Guys,

This is different than my previous conversation with Thane....In my previous conversation, Thane indicated that we could do a 2 month contract (for example) and not have to pay the "LDs" for 60 days. Point 2 indicates we WILL have to pay \$20K (\$10K monthly minimum \* 2) if we cancel prior to 60 days' notice.

-----Original Message-----

From: Thane Twiggs <ttwiggs@apx.com>@ENRON Sent: Thursday, January 31, 2002 5:41 PM To: Miller, Jeffrey Subject: Additional Information and Answers

Jeff here is some additional information.

- 1) Inside the APX QSE we offer a "short" facility/ or "long" facility that allows you want to take a position up to 50 MW a zone. This is our way of allowing our clients two work within the balance schedule requirement in ERCOT.
- 2) For the no-term, there is a 60 day termination policy that cannot be waived. The short of it is that if you want service for only thirty days, you would need to pay the monthly minimum for two month (\$20,000) plus whatever volumetric that you incurred while you were using the service.
- 3) For the standard service there are 10 logins. Additional logins are \$150 per login.
- 4) For the ASP service, where your are your own QSE and we provide the application and support, the minimum term is one year. I have attached a pricing sheet for the service. Note that it compares the pricing for the QSE service, one-year term ASP service without operations and one-year term with operations.

Liz -- I've been unable to discuss this with Doug, as he's been out of the office. I'm not even sure if he's terribly interested in this product being promulgated -- the UBSWenergy ERCOT products he will first offer are confined to specific zones. This product definition would presumably be used to support a "Seller's choice" ERCOT-wide product spanning the four current zones, and the Market Clearing Price ("MCP") applicable would be in that zone the Seller specified day-ahead. (That is, there are several moving parts to this.) The denomination 'Hourly Firm' was also a matter I wished to explore with him. Attached is a markup with my thoughts on the draft product, and this morning I'm going to talk to some other folks who might have a read on the operation of the MCP in relation to the LDs calculation. Please note that if one specifies that the MCP is the cap on the Replacement Price, then a presumption is being made that no additional costs are being incurred in purchasing substitute product. I think this is an acceptable assumption but Doug may think different. The corrections on the attachment include some intended merely to use the defined terms actually stated in the Protocols. The changes in the second paragraph are intended to reverse any implication that the settlement on LDs would be held open a month or even 6 months until a final MCP value is identified by ERCOT -- I'd confine the window for recalculation to one month. --DP =20 =20 =20 =20

Somewhat regretfully, I have decided to resign from ENE. I have taken a position with Raintree Capital located in Houston. My first day should be Wednesday, April 25. While I have thoroughly enjoyed my nearly three years at ENE, the opportunity at Raintree is directly in line with my long term professional goals and was an opportunity I could not pass up. I enjoyed working with (or the interaction with) each of you and look forward to meeting again in the future. Please make a note of my new contact information and do not hesitate to give me a call.

Webb Jennings Raintree Capital 10000 Memorial Drive, Ste. 480 Houston, TX 77024 (713) 613-2800

## Electronic Pay Stubs

|            |                                  |
|------------|----------------------------------|
| Sender     | enron.payroll@enron.com          |
| Recipients | ['doug.gilbert-smith@enron.com'] |
| File       | gilbertsmith-d/personal/7.       |

Get ready. Beginning in November, electronic pay stubs will be available to all employees who have their paychecks direct deposited into their bank account. Electronic pay stubs are an easy, fast, and efficient way for you to get your payroll information. They will also help Enron to realize a considerable savings in time and dollars spent over traditional printed pay stubs.

If you prefer to receive a hardcopy of your pay stub, click on the link below to complete a request form. This form must be submitted to Payroll by October 15, 2001. Unless you submit a form your pay stub information will default to electronic viewing.

Please click on the link below.

Name: DOUGLAS GILBERT-SMITH Personnel number: P00503942 Phone: 7138539310

If you have questions about electronic pay stubs, please contact Janice Priddy (Payroll) 713-853-7839 or Marie Newhouse (ClickAtHome) at 713-345-4185 or send an email to Enron.Payroll@enron.com (Enron Payroll in Outlook).

Stay tuned for more details in the coming weeks.

## NOIE BUL Participation

|            |                                  |
|------------|----------------------------------|
| Sender     | dljones@cps-satx.com             |
| Recipients | ['isonp@ercot.com']              |
| File       | gilbertsmith-d/all_documents/12. |

Pursuant to my assignment from the last RUG meeting and for consideration at the next RUG meeting, attached is a redline of Section 6 to include language to allow IDR-metered loads in NOIEs to have the right to participate through their respective NOIEs in the Balancing Up Load bids (BUL).

To make the current revisions easy to spot, the attached document is redlined version of Floyd Trefny's draft of Section 6 with the OWG revisions from 11/14/01 with all changes accepted.

There are four changes: (1) pg. 28 -- language to define BUL participation requirements by a dynamically scheduling QSE. (2) pg. 50 -- language to account for BUL participation by a dynamically scheduling QSE in the uninstructed deviation calculation. (3) pg. 78 -- language to recognize that NOIE BUL loads will not have an ESI Id, and providing an alternative form of identification. (4) pg. 86 -- language to account for BUL participation by a dynamically scheduling QSE in the SCE calculation.

Changes (1), (2), and (4) apply only to dynamically scheduled QSEs with BULs. Change (3) applies to all NOIE BULs.

### Answer to Generation shift factors

**Sender** lance.cunningham@enron.com

**Recipients** ['Ken', 'Jose; Donohoo', 'devans@ercot.com', 'Conto', 'evans@enron.com']

**File** gilbertsmith-d/inbox/142.

Doug,

Thanks for the update, glad to know that I wasn't going completely crazy.

Lance

-----Original Message-----

From: Evans, Doug [mailto:DEvans@ercot.com] Sent: Tuesday, November 20, 2001 3:02 PM To: Cunningham, Lance Cc: Conto, Jose; Donohoo, Ken Subject: RE: Generation shift factors

Lance, You are correct. I had corrected the idevs that TXU had sent to leave everything in area 51, but the old data was not being extracted properly. Delete the raws that you had previously downloaded. They will have extra busses and lines due to the error. TXU has a process to put their data into the old areas for their internal use.

I fixed the idevs to remove the old data and have sent them to our IT department along with the new raw data (even included the line upratings from TXU for the sum, fal, and win cases). The summer raw data is attached.

have a good thanksgiving, doug <<SS02sum1r.zip>>

-----Original Message----- From: Cunningham, Lance Sent: Thursday, November 15, 2001 3:19 PM To: Evans, Doug Cc: Conto, Jose; Donohoo, Ken Subject: FW: Generation shift factors Doug, Could you please help me with this. I talked with Jose on the phone and he said that the eight buses that are in my case are the ones that are present if the TXU IDEV is not run on

the case. Thanks, Lance -----Original Message----- From: Cunningham, Lance Sent: Thursday, November 15, 2001 10:21 AM To: Joe Conto (E-mail) Cc: Ken Donohoo (E-mail); Lin, Martin Subject: Generation shift factors Jose, As we discussed, I am still getting different shift factors for the buses compared to your computations. Since we are using the same software, we should get the same results. I have attached a spreadsheet that compares my GSFs to your GSFs. My GSFs have been computed from the 2002 Summer Peak basecase that is posted on the ERCOT system planning web page. If you download the 2002 Summer peak file you can verify my GSFs, it would only take about five minutes for one CSC. I have had this independently verified by a third party that the process that I have used and the results I have presented are correct. If you look at my results, you will find that my case has 8 additional buses that your case doesn't have. The buses are: 1247 WINK BET 1421 WILLOWCK 1880 ROCKY CK 1881 ROCKY CK 2007 IV VALV2 6023 ESTEL2WT 6491 PAVEPAW2 6492 PAVEPAW 4 I think that Shannon Caraway of TXU had already brought up four of the buses on the list; 1247, 6023, 6491, and 6492. Ken responded to that e-mail that the buses were "code 4" and were not connected in the case. I haven't researched the other four to see if that is also true. I have looked at the IDEV files on your website and noticed that in the TXU IDEV file that TXU is listed as area 1. However in the load flow cases, ERCOT has only three areas. ERCOT is listed as area 51, DCEAST is listed as area 52, and DCNORTH is listed as area 53. The following is an assumption on my part: if you try to run the IDEV on the three area cases posted on the website, since there is no area 1 in the case, the IDEV will not remove the area and replace it with the updated TXU data. Therefore, the cases that are posted on your website (8/24/01) actually have not had the IDEV run on them. I appreciate your help on this. I have to be able to duplicate you results for internal purposes and I'm only trying to understand what is going on with these cases. << File: 2002SP GSF for CSCs.xls >> Thanks again and I look forward to hearing from you Lance B. "Odle, David" <DOdle@ercot.com> To: "1 Standard dElectronic Transactions" 02/05/02 05:59 PM <set@ercot.com> cc: Subject: Change Control Conference Call 2/8/02

Due to a family emergency, I will not be able to facilitate the Change Control Conference Call this Friday, 2/8/02.

We have two options: 1. Cancel the call until next week. 2. Someone else facilitate... if you choose this option, I will rely on Kyle Patricks excellent notes to get the logs and everything updated.

The log will be a week delayed in getting updated, however, I will make this a priority when I return next week. I will be available by Cell Phone.

Thank You, Dave Odle

Dave:

I just spoke with Mark Patterson at ERCOT (he is Enron's Client rep.) He will speak with Richard Howard to confirm but he believes that if you only wish to send QSE to QSE trades that a WAN agreement and connection is not necessary. We would simply send the XML file via the internet using the tool that ERCOT devised for this.

As for item 4 the answer is no. The portal does not have the capability of attaching a file and sending it to ERCOT but the tool referenced above would have the same function using the digital certificates. This would save the \$10,000 WAN connectivity and test fee as well with ERCOT.

Doug wants a cost associated with being a full service QSE for a generator. This would mean setting up the WAN for UBS and licensing the ESCA MOS and other tools. Steve was working on this. Do we have an estimate? Off hand Lloyd believes about \$750,000.00. Also we would have to bring in system operations personnel as ERCOT requires 24hr coverage for this.

Regards,

Smith L. Day Enron Power Marketing, Inc. Ph. 713-853-4201 Fax: 713-646-8272 Pager: 877-306-9429

-----Original Message-----

From: Poston, David Sent: Wednesday, January 30, 2002 12:19 PM To: Day, Smith L. Subject: RE: QSE project timeline

As per our discussion.

Item 1. Quick updates to the project plan

<< File: poston\_ercot.mpp >> Item 2. Example of another plan

<< File: Netco\_unit\_testing.mpp >>

Item 3. Question? Is a thorough WAN setup and site survey required to submit QSE trade schedules Response: Based on the reading we have completed so far, it looks like for standard XML template submission, you only need DIGITAL certificates and an internet connect. The digital certificates are issued by ERCOT and can be installed on the desktop. I will follow-up with Pat Most to confirm this assumption. So, in summary the WAN stuff will hopefully not be required.

Item 4. Confirmation of an assumption If we cannot complete the communication work required for ERCOT for initial scheduling (we are hoping we can), FSP will still provide an XML file output that can be uploaded through the ERCOT Portal. Is this correct Smith?

Thanks, Poston

To: Hailu, Ted Cc: 1 ERCOT Client Service Reps; Mickey, Joel; Doggett, Trip; Grendel, Steven; Bojorquez, William "Bill"; Noel, Tom; Jones, Sam; Tindall, Heather; Buckles, Maxine; Saathoff, Kent; Galvin, Jim; Spells, Vanessa; Dautel, Pamela; Donohoo, Ken Subject: Invitation to a web seminar on TCRs

ERCOT will be conducting a web seminar on the Transmission Congestion Right (TCR) program which will be implemented in conjunction with the direct assignments of congestion costs beginning February 15th, 2002. TCRs function as financial hedges against marginal costs associated with Zonal Congestion. TCRs are a financial right on a specified directional Commercially Significant Constraint (CSC) for a particular date and hour that entitles the TCR holder to receive remuneration from ERCOT for congestion costs. The TCR Program is open to any entity that qualifies as a TCR Account Holder, except for Transmission and Distribution Service Providers. Bidding on the first TCR auction is scheduled to start on January 30, 2002. The first auction for the TCR Program will be for 100% of the TCRs from February 15 - 28, 2002. The notice for the February auction will be posted on ERCOT's website by January 25, 2002.

Training on TCRs was conducted at the ERCOT facilities in Austin during the week of January 7th. This web seminar was arranged to meet requests from participants to make the same material available to for those who were not able to come to Austin. Please follow the instructions below to attend the web seminar at the specified date and time. There are a limited number of lines available for the conference call. Your cooperation in sharing one phone line with a speakerphone for multiple attendees from the same entity is greatly appreciated.

The web seminar will begin with an introduction to TCRs and their use in the ERCOT market. The presentation will be followed by overview of the process to register and participate in the ERCOT TCR auction process, financial security requirements and settlement implications of TCRs. A follow up demonstration of the website and software that will be used to administer the auction is scheduled for Wednesday, January 23, 2002 from 9:00 a.m. to 11:00 a.m. You will receive a separate e-mail notification on this web seminar.

If you have further questions, please call your ERCOT client representative or call the general client relations number at (512) 248-3900.

Details of the web conference:

When: January 22nd, 2002 9:00 AM (GMT -06:00) Central Time (US and Canada)

Before The Meeting:

To ensure that your browser is configured properly click on this link:

RMS decided at its last meeting to select January 29th as the starting date for the 867.03 Contingency Plan. One of the activities during the trial use of this plan was to conduct a conference call with MPs to kick-off this effort. Late this afternoon, we were able to resolve some coordination miss-cues which resulted in this late meeting notice, and to that extent, I apologized to everyone. Tuesday, January 29th at 10am - 11am CDT will be the kick-off conference call. The phone number is 1-800-373-0950 with an Access Code of 1014. The suggested agenda is: Market Participant Roll Call; Don Bender Sign Off of Test Plan; Shirley Whyte Readiness of TDSPs to Implement; TDSPs CR Readiness to Receive 867.03's from TDSPs; CR CR Reconciliation of TDSP & ERCOT Information; Don Bender Next Call

David, I havent spoken to you for awhile. I hope that everything is going as well as can be. Teco has contacted me and asked whether we were going to honor the call options that they bought from us for cal 2002. These options are in the money for us and I am sure that the estate would like to honor these agreements.

If Teco is asking, I am guessing that they did not take the proper steps to terminate these agreements.

Paula Castoro listed below the Enpower #'s for these three options, but I can give you an unofficial detail of the contracts:

1. 150 mw's @ \$50 2. 50 mw's @ \$50 3. 50 mw's @ \$40

The premiums paid are unimportant, but I have them if you need them.

Teco is looking for an answer ( from the estate) on this issue.

Can you give me a call on this?

Thanks, JMF

John, I know we've played telephone tag quite a bit, thought I would attempt e-mail. Called this morning before you were in.

Jerry Brown would like to know the status of the above call options in light of the recent acquisition by UBS. Are you the individual that can provide some clarifications for us??

If so:

Will Enron be honoring these calls??

Have these been assigned to any other counterparty?

If not, would you kindly refer us to the appropriate person??

Thanks in advance.

Paula A. Castoro Manager, Contracts Administration TECO EnergySource, Inc. (813) 228-1303 (Office) (813) 228-1308 (Fax)

I found that doc with the mistake in the ISA14 (Interchange Acknowledgement request) data item? that I referred to in the last RMS meeting:

<http://www.ercot.com/texaschoiceprogram/conversion.htm>

[http://www.ercot.com/texaschoiceprogram/documentation/conversion/ISA\\_IEA.doc](http://www.ercot.com/texaschoiceprogram/documentation/conversion/ISA_IEA.doc)

Texas SET might not own this document? so we need to decide who will be responsible for it.

Also this doc (on the same page) will need updating by the TDTWG:

<http://www.ercot.com/texaschoiceprogram/documentation/conversion/FTP.pdf>

| Examples in Response to Staff Request in Project No. 23220 | |
|--|--|
| Sender | bjones5@txu.com |
| Recipients | ['gward1@txu.com', 'operations@ercot.com'] |
| File | gilbertsmith-d/all_documents/53. |

OWG members,

Jerry Ward has prepared the following set of responses to the request of the Commission Staff for several examples of the operation and clearing of Ancillary Services markets. The Staff has asked that the examples be provided prior to the next Technical Conference scheduled for January 19.

As chair of the Operations Workgroup, I had asked Jerry to develop the first draft of responses so that each of you could then review and provide comments upon them. Comments should be provided by the close of business on Monday, January 16th. All comments should be copied to the full workgroup by e-mailing them to operations@ercot.com. Jerry and I will then incorporate the comments, as appropriate, into the examples and communicate to the workgroup the final version of the examples prior to sending them to the Staff on the 17th.

(See attached file: 23220 Examples.doc)

Thanks -- Brad

Attached is the most recent version of the RMS 2002 planning calendar. Thanks to all the working group chairs that provided their standing working group meeting dates. Working group chairs and ad hoc working chairs, should provide Larry Grimm and myself of any additions/changes to the calendar. We are attempting for the first time, to have a planning calendar of the key system scheduled dates, standing meeting dates and other general RMS dates as the members wish. The only dates that are not on the calendar are the ad hoc conference calls/meetings that do occur on a short notice basis. Larry Grimm will coordinate with the appropriate ERCOT resource to place this in RMS' Key Document folder on the ERCOT website.

| Recipients | [] |
| File | gilbertsmith-d/inbox/53. |

There will be a UBSWE Migration TONIGHT....please make sure that you LOG OFF before you leave today.

Monday morning, (2/4/02), you will logon with your Enron NT Account and Password. You will immediately be forced to change your password (following Enron rules) and your NT ID will stay the same. Once you've changed your password,

and logged off AGAIN, you will see the UBS Warburg Energy Screen....email will not be affected until day one.

Starting Monday, you will receive emails from IT support to explain the HOW TO's for your data that YOU will need to begin transferring over to UBS. All material will need to be in compliance with UBS standards and NO documents or emails are to be deleted. In Outlook the following information will be transferred over by IT: Calendar, Contacts, Tasks, and Notes. Emails (Inbox, Sent Items and Deleted Items) and folder structure will NOT be migrated.

ALL data MUST be migrated PRIOR to day one (estimated to be 02/08/02), as access to Enron data will be disabled Day 1.

Thanks for your immediate help in this matter.

| File | gilbertsmith-d/inbox/118. |

Shelley, the market left the 814_PC transaction (Maintain customer Information request) in place so that the CR could notify the TDSP when changes like the one you mention were necessary. It is a point to point transaction from the CR to the TDSP. Blake A. Gross AEP Business Standards Consultant Phone: 918.594.4022 Fax: 918.594.3969 WT2-Tulsa 6S-426 Audinet: 8.700.4022 bagross@aep.com slmckain@aep.com 01/18/2002 08:48 AM To: set@ercot.com cc: Subject: premise address changes

Is there a standard process for each TDSP on how CR's should handle notifying a TDSP if they are aware that a premise address needs to be changed? Couple of examples below. A customer is notified by the post office that the post office is changing their premise address and they call their CR to notify them in order to receive their bill correctly. CR receives information from return mail processing, etc, that a premise address should be changed. The 814_20 is for communications from the TDSP to Ercot to the CR, but does not provide for communication back the other way. Should the customer be directed to the TDSP phone centers or what is the best means to communicate these change requests? System Change Request Prioritization Process

| | |
|------------|--|
| Sender | aepin@aep.com |
| Recipients | ['testplan@ercot.com', 'set@ercot.com', 'rms@ercot.com'] |
| File | gilbertsmith-d/deleted_items/25. |

In an earlier note this week, you receive information on Protocol Revision Subcommittee's (PRS) next meeting scheduled for January 28 -29, 2002 at ERCOT's Met Center. Most of their two day agenda is to prioritize all the received system change requests. RMS will have a number of Texas SET representatives there and some companies are sending additional employees who are familiar with our Protocol Revision Requests (PRR). Susan Neel, Texas SET Chair, will be our primary representative. If you are sending additional representatives, please inform Susan who will be attending from your company. Subsequent to my earlier note, I received a request from the PRS Chair for RMS to collectively as a subcommittee, prioritized all RMS approved PRRs. That list was to be submitted to PRS this afternoon. I expressed my concerns to the PRS Chair of the short turn around time on this request (48 hours) and the challenges RMS voting members and RMS market participants will face in accomplishing this with such short notice. Come to find out, PRS' see

the PRR prioritization process as just getting started, with additional opportunities for RMS to provide input on our priorities. Thus, no harm done for now by not prioritizing our PRRs. Susan Neel will provide us an update from this PRS meeting at our January 31st RMS meeting. At that time, we may need to develop a process for RMS to prioritize its PRRs. Charles:

EPMI has established an ERCOT LSE account (agreement) on its own and separate from EES's. There has been zero activity on the account. As for the IT issues, we contracted with a company called ESG to facilitate all communication (software, etc) for the LSE account. The ESG contract is assignable and the people at ESG are eager for that to happen.

Regards,

Smith L. Day Enron Power Marketing, Inc. Ph. 713-853-4201 Fax: 713-646-8272 Pager: 877-306-9429

From: Yeung, Charles Sent: Tuesday, January 08, 2002 4:00 PM To: Gilbert-smith, Doug Cc: Day, Smith L.; Nicolay, Christi L. Subject: RE: ERCOT Registration Requirements

A question, am I correct that the LSE status being referred to is NOT EPMI - if so, is it with EES? or what entity?

-----Original Message----- From: Gilbert-smith, Doug Sent: Tuesday, January 08, 2002 9:32 AM To: Yeung, Charles Cc: Day, Smith L. Subject: RE: ERCOT Registration Requirements

Charles,

I think that we are better off just conveying the clean LSE over to NETCO and then registering as an REP in the event we need to. The QSE needs to be re done as the last one is messy.

Thanks,

Doug

Doug,

This is the one that I asked you about.

LBC -----Original Message----- From: Jester, Larry Sent: Tuesday, May 29, 2001 8:58 AM To: Curry, Mike; Cunningham, Lance Subject: FW: ERCOT Message: New South to North Line Limits

-----Original Message-----

From: Smith, D. Eric Sent: Thursday, May 24, 2001 3:50 PM To: Gilbert-Smith, Doug; Dean, Clint; Jester, Larry Subject: ERCOT Message: New South to North Line Limits

Here is a message that came in from ERCOT. Due to the size of the message, it seems to have choked the database. I will fix that problem but in the meantime, here is the text of the message in case it is important information for you guys.

The completion of the Limestone-Watermill 345 double circuit has made a significant change in the North/South interchange flows. Previously a set of limits was calculated daily by ERCOT. With the new transmission lines the old calculation is no longer valid. ERCOT is now observing the South-North transfer as affected by the ATC calculator. At this time we have adopted a set of not to exceed limits for the major 345 circuits in the transfer path. These limits are:

Good Weather

Trading House-Venus 345 kv Double Circuit 1260 MVA
Jewet-Big Brown 345 kv Double Circuit 1200 MVA
Limestone-Watermill 345 kv Double Circuit 1500 MVA

All Bad Weather & North

Trading House-Venus 345 kv Double Circuit 750 MVA
Jewet-Big Brown 345 kv Double Circuit 1200 MVA
Limestone-Watermill 345 kv Double Circuit 1400 MVA

Direct comments or questions about this posting to Lee Caylor at 512-225-7136.

To: QSE Contacts under ERCOT-QSE Agreement

This is a notification from ERCOT staff of the suspension of ENRON Power Marketing, Inc. (EPM) as a QSE in the ERCOT market in accordance with the ERCOT Protocols. ERCOT has suspended the QSE qualification status of EPM effective midnight November 30, 2001. Load Serving Entities (LSEs) and Resources represented by ENRON have been notified of EPM's suspension. These entities will be assigned to Automated Power Exchange (APX), the current default QSE in the ERCOT market, effective at midnight tonight. APX will assume scheduling responsibilities for these entities beginning with the day-ahead schedules on Saturday December 1, 2001, for the operating day of Sunday, December 2, 2001.

EPM's day-ahead schedules submitted on Friday, November 30, 2001 will be used for the operating day of Saturday, December 1, 2001. These Saturday schedules, including trades, will be "locked-in" and will not be available for adjustments by EPM during the ERCOT Adjustment Periods. APX will continue to provide default QSE services for 72 hours ending at midnight Monday, December 3, 2001. ERCOT will work with the entities affected to assist them in making the transition to a permanent QSE.

This notice is being provided by ERCOT to officially registered contacts of all active QSEs and project managers. If you have any questions, please call Ted Hailu, ERCOT's client relations manager, at (512) 248-3873.

TIME SENSITIVE: Executive Impact & Influence Program Survey

| | |
|------------|----------------------------------|
| Sender | enron-admin@fsddatasvc.com |
| Recipients | ['doug.gilbert-smith@enron.com'] |
| File | gilbertsmith-d/performance/1. |

REMINDER

We have not yet received your feedback. Your input is very valuable and to be included in the participant's summary report, it must be received NO LATER THAN CLOSE OF BUSINESS on Tuesday, August 28, 2001. Without your feedback, the participant may not receive a summary report or be eligible to attend the program.

* IMMEDIATE ACTION REQUIRED - Do Not Delete * Executive Impact & Influence Program

Dear Doug Gilbert-smith,

As part of the Executive Impact and Influence Program, each participant is asked to gather input on the participant's own management styles and practices as experienced by their immediate manager, each direct report, and up to eight colleagues/peers.

You have been requested to provide feedback for a participant attending the next program. Your input (i.e., a Self assessment, if you are a participant in this program, Manager assessment, Direct Report assessment, or Colleague/Peer assessment) will be combined with the input of others and used by the program participant to develop an action plan to improve his/her management styles and practices. If you are providing feedback as a Manager of the participant, please note that your feedback will be identified in the summary report.

It is important that you complete this assessment NO LATER THAN CLOSE OF BUSINESS on Tuesday, August 28, 2001.

To begin the online administration process, you will need the following Internet address and Password(s). NOTE: If you are providing feedback for more than one person, each password and participant name is individually listed below.

Open your Internet browser e.g., Internet Explorer or Netscape Navigator, and please type or copy the URL address below into your Internet browser (please DO NOT go through Lotus Notes):

www.fsddatasvc.com/enron

RKMPT8 (Bill Windle)

If you experience technical problems, please call Dennis Ward at FSD Data Services, 713-942-8436. If you have any questions about this process, you may contact LeRea Pharr at Enron, 713-345-8434, or Christi Smith at Leadership Research Institute, 619-216-0404.

Thank you for your participation.

Kyle,

Hot topics make it even more important to reschedule this meeting.

We get into problems by rushing into making decisions when we are not prepared. We decide something without the correct information and then later, after we spend resources on this, we make additional changes which cost additional resources.

One week would not hurt us. In my opinion, it makes sense to take an extra week or so to have the information provided up front for review and get prepared for a meeting.

Also, it is hard to rearrange a work schedule at the last minute.

Some people who might want to attend/participate may not be able to do so. There may not be anyone from Entergy attending and participating. And, as you know, we do attend and participate.

Dave Entergy 504 576 2571

Michael Payne@ENRON_DEVELOPMENT 01/10/2001 02:18 PM To: Mike Curry@ECT, Edith Cross@ECT cc: Bob Gates@ENRON, Michael Miller@enron, John Lamb@ENRON Subject: IM2 PPA

Mike,

By now Dave Delainey's office should have received by fax signed copies of the PPA and GPSA. I am attaching a redline version of both documents for your review as well.

I am also attaching a copy of the most recent Garrad Hassan letter describing their view on the project at this time.

Concerning your question about the timing of the energy production, as we discussed the GH analysis is focused on the factors which decrease the energy production of the project. They have not questioned the accuracy of our hourly data collection, or when the wind blows. As you can imagine, determining when the wind is blowing is the science and definable part of this work. The art and interpretation lies in forecasting the factors which decrease the energy. As a result, there have been no changes in the on-peak off-peak ratio. In other words, the production curve should be identical other than the downward shift. Please don't hesitate to call me if you would like to discuss this further.

I will be in CA and reachable at 661-823-6855, or by cell until 11:00AM PST Thursday, returning to the Houston office Friday morning. Please also feel free to contact Bob Gates at 661-823-6730 should I be unavailable.

Thank you, Michael

I think the confusion begins with the fact that the contingency plan was developed before the 824 work group met to develop the plan. Don Bender worked on the contingency plan and will bring this issue up at the RMS meeting tomorrow. Cary Reed Sr Business Standards Consultant 918 594 4026 audinet 700-4026

I agree that the Contingency Plan will need to be updated if this change control is approved.

I have a clarification question. As I understand this question relates to change control #2001-232 which is to have all 824's for 867's go point-to-point instead of thru ERCOT. The notes say that it is hoped that this process will be implemented by mid-January. In some of the last notes I saw from the RMS 867 Contingency Plan - the plan referenced that 824's for 867 rejects would go to ERCOT but 824's for duplicates would not. It seems the two are in conflict. When the change control gets implemented - is the plan to update the 867 Contingency plan so that no 824's will go to ERCOT. In developing our systems we are trying to determine if all 824's will be point-to-point in the future. Thanks for any clarification. Jennifer

"Schrab, Heidi" <Heidi.Schrab@greenmountain.com> To: <set@ercot.com> cc: 01/03/02 09:33 PM Subject: 824 Readiness Survey

Please respond to Cary (careed@aep.com) and me, the results will be announced on the change control call next week. Thanks - Heidi TDSPs: when will you be able to receive 824s direct from the CRs? CRs: when will you be able to send 824s direct to the TDSPs?

not much new news.....

AvWeek: Chinese Downplay Report That Jiang's 767 Was Bugged

By Michael Mecham and David A. Fulghum/Aviation Week & Space Technology

28-Jan-2002 11:06 AM U.S. EST

A month before President George W. Bush is to visit President Jiang Zemin in Beijing, the Chinese Foreign Ministry is taking a see-no-evil/speak-no-evil approach to allegations that somebody in the U.S. bugged a Boeing 767-300ER outfitted last year as a presidential transport for Jiang.

News of the apparent bugging, which was reported Jan. 18 on Aviation Week's AviationNow.com, entered the rumor mill in Beijing after routine tests of the aircraft revealed the devices last October, officials familiar with the situation said.

But Chinese reluctance to complain kept a lid on it, at least in official circles. Despite the time lapse since the bugs were reportedly found, Secretary of State Colin Powell said the Chinese have never raised the issue and he doesn't expect it to interfere with plans for Bush to visit China on the 30th anniversary of President Nixon's historic trip that reopened relations between the two countries after decades of mistrust.

LAST WEEK, CHINESE Foreign Ministry spokesman Sun Yuxi said the episode would not affect Sino-U.S. relations. Other than hearing reports, Sun said, "I don't know what it is about. The Chinese Foreign Ministry is not apprised of the specific situation." White House officials said they don't discuss such allegations.

It's unclear how the "bugs" were uncovered, but various news reports said that up to 27 transmitters were found, including in Jiang's lavatory, in the headboard of his bed, and in a Rockwell Collins SAT 906 satellite communications device. A Rockwell Collins official said a satcom is buyer-furnished equipment; late last week the company was still checking what equipment it might have had on board the aircraft. Exactly how signals might be transmitted also is unclear. The aircraft

itself is a good shield of internal emissions. They could be sent through the aircraft's satcom system, providing a power source and an antenna were tapped, but that raises the question of how to mask the transmissions so that others could not detect them.

The aircraft was part of an order for Delta Air Lines, Boeing's largest 767 operator, and was delivered June 15, 2000, but never put in service. Instead, on July 7, 2000, Delta informed Boeing that it had sold the aircraft to state-owned China United Airlines (CUA) in Beijing. The refurbishment contract was signed Oct. 1, 2000, and was conducted even as the U.S. and China were at loggerheads over the forced landing of a U.S. Navy EP-3E signals intelligence aircraft last April. The aircraft left Texas on Aug. 10, 2001, for China via Hawaii, according to U.S. officials involved in the project.

CUA contracted with Avitra Aviation Services Ltd. of Singapore to customize its interior; Avitra, in turn, subcontracted work to Decrane Corp., Gore Design Completion Ltd. and Dee Howard Aircraft Maintenance Co. to prepare the aircraft at San Antonio International Airport. Avionics were installed separately under a Chinese government contract.

In a statement, Gore Design and Dee Howard said the Chinese have not complained to them. Gore and Avitra officials doubted that any security breach had occurred while their work was underway.

The guessing game as to who did what extended to China, as well. Analysts suggested that conservatives in the Chinese military might be behind the episode as a way to embarrass Jiang or to intimidate whoever succeeds him. He is due to step down as president and head of the Communist Party this year, but would stay on as a "paramount" leader and remain chairman of the powerful Central Military Commission.

The aircraft was said to have been kept under round-the-clock security by Avitra, Howard and Chinese government security, according to U.S. officials involved in the project. But an official familiar with such arrangements said that may not mean much. He said security personnel would have to be expert in all aspects of aircraft systems to even recognize if listening or transmitting devices were being installed. Second, since special-purpose outfitting jobs take months to complete, it's easy for security personnel to lose their vigilance.

Indeed, various news reports said up to 26 Chinese military and civilian officials have been detained on suspicion of negligence and corruption in the incident. The references to civilian officials prompted an indignant response from the Civil Aviation Administration of China that no one from its China Aviation Supplies Export & Import Corp. subsidiary was involved. CASC most likely would have been the agency responsible for importing the aircraft.

AFTER THE EP-3 downing, the strained relations between the two countries spilled over into commercial aircraft orders as the CAAC held back approval of the acquisition of Boeing transports.

The ice thawed late last year when CASC bought 30 737s. The CAAC and Boeing are said to be discussing a larger order. China often announces large orders when heads of state visit.
