Hello brothers,

Beaver football is amazing this year! Next weekend is Homecoming and presents a great opportunity for us all to visit the Teke house and all the new members who we have not yet met. The house has strong membership numbers and is very present on campus. We are definitely on the upswing! What we can improve on is our Alumni support. I know that going back and not knowing anyone at the house is frustrating, but that is more the reason to get over and learn their names and faces. After talking with several Tekes who graduated in the past few years, we decided that instead of waiting for the house to ask us for support we would like to raise money ourselves and purchase a new Big Screen TV for the Teke house basement. The old TV is just about dead and this is a great way to help out the house (not to mention a good reason to go over to the house). We are hoping to surprise them THIS Saturday morning before the game. We are asking for a minimum donation of \$50 dollars. We would need about 30 people to make this happen, so are you going to step up and support Your house? I am personally going to give \$100 and I have two other members who have pledged the same. Please help us make this happen. You can write a check to ME or to TKE. We do not want the house knowing about this until we are sure that it is going to happen. So send the checks to me and please write back or call me to let me know that you will supporting this before FRIDAY at NOON. Thank you for all you participate and those of you who do not, let me know how I can get your support on future efforts!

Yours in the Bond,

Dustin Sievers T773

To: mleslie@amgen.com Subject: Re: Fiesta Bowl Dude I hear you are going to be in town this weekend. Unfortunately I will be gone, I am going to SF to hang with Burnsy as i have a six day break from work. I will however, be back in town on Sunday night. If you are going to be in town still maybe we could grab a beer late sunday night (I don't get in until 10) or grab lunch on Monday as I don't work monday. Give me a call on my cell and let me know. Oh, by the way i will be going out with the one and only Marc Johnson for some beers in the city on Friday night. He is in the country for a month. If you want to have a chat with the man give us a call that night 503-702-0463. Take care buddy and happy holidays! Oh yeah, what is your address. I am

sending out some x-mas cards.

Guz,

We're still having a party on Saturday night. I didn't get the invitations out in a timely fashion, so here is your official invitation complete with directions.

When: Saturday night 9pm or so.

Where: 7616 NE Andover St. Hillsboro, OR 97124 503-648-8276

How: Take 26 to Cornelius Pass Road. You will cross back over 26 going the correct direction on Cornelius Pass Road. Head straight 3 miles to Quatama (look for the Elks Lodge sign), take right onto Quatama... 50 yards take an immediate left. We are in the first condo on your left. There are 3 under construction across the street, and it will be very hard to miss. Call us if you get lost, but you should be all good.

Bring a friend if you want and a beverage of your choice. We will have beer, vino, and some food....

Hope you can make it and sorry about the delay getting this to you. -Boyd

I was tired of the "softball" subject line ok, its been a while since you have heard from me, mostly because i have been out of the office and also out of town. so, without further delay, i need to get some \$money\$ from you guys so we can get registered. here then is the deal, i need \$60 from each of you to cover the fee, game balls, new bats, and fees for a practice field. i also need it fairly quickly, so sorry to pass on my deadlines to you guys, but hey payday is coming up. you can send me a check at home which is chris hartman 4936 SW 60th Place, #2 Portland, OR 97221 or you can call me at home at 503-296-0782 or at work at 503-273-0361 and we can make arrangements. i will come by your house if i have to or if you guys want to meet me downtown for some happy hour we can do that to. whatever it takes, and i will go out of my way to accomodate you. once we are registered, i will then want to find out what people want to do as far as practices go. since last years practices were such a rousing success (the best one had 6 people show up) i want to get your input so we dont waste time or money. and i also want to do some batting cages. anyways i'm getting ahead of myself, just show me the money. and let me know if you have any questions. chris

File	guzman-m/discussion_threads/213.

Greeting gentlemen,

Last time I wrote the Beavers were 6-1 and looking great. Now we are 8-1 for the first time ever and?Rose bowl contenders! GO Beavers!!! I was also looking for you to support the Teke house and trying to revive a little Alumni presence at the house. I got a good deal of response and at Homecoming there were many of us who stopped by the house. The current members were very impressed and I was told by lots of the guys that really enjoyed hearing our stories and memories. We can have animpact on the men currently in the house and help give a positive direction for them to follow. One aspect that is on top of my list to promote in the house is brotherhood. Through brotherhood they can support one another in the real reason they are there: Education. With a strong brotherhood they will use each other more for help and guidance, instead of roommates. I have begun to raise money for a new TV in the basement, which they can gather around, bond, and just spend more time with one another. The amount of money that I have raised is still a bit short of the goal to present it before the Civil War game. We need your support! It is not necessary to give a large amount if you are unable, any amount helps toward the goal. We are greatly thankful for any help you can give. I also would like suggestions for Alumni functions. I feel that many of us would like to renew the brotherhood and start to be a presence again as Alumni of Tau chapter. Thanks you guys and cheer for for the Beavers this weekend.

YITB,

Dustin Sievers T 773

Willamette BOM Sale Rev. 2

Sender	lester.rawson@enron.com
Recipients	['stanley.cocke@enron.com', 'greg.wolfe@enron.com', 'portland.shift@enron.com']
File	guzman-m/notes_inbox/1418.

Per my previous memo Services Desk has a unit contingent sale for the balance of the month to WWP. The energy is coming from Willamette and services bought transmission from Pac to move from Willamette busbar to BPA System. Then Snohomish transmission to move from Pac's system to WWP system.

The Pac transmission is Firm and is for 10 mw around the clock so any off peak energy coming out of Willamette can be sold at the Pac system intertie with BPA for no additional charge.

If there are curtailments don't resupply the schedule. Call WWP at 509-495-8534 then PAC Trans. at 503-251-5230 and Snohomish Trans. at 425-304-1620 to have the counterparties take the schedule to zero.

For Enpower the deals are as follows:

WWP Sale 471884 Willemette Buy 471891

In deal scheduling take the affected hours to zero and note that the unit was out.

Snohomish Trans. 471938 Pacificorp Trans. 471943

In deal scheduling change the delivery point on Pac. transmission from Willamette Busbar to show it delivered at Mid-C. This will allow the transmission pieces to be linked together and not cause position manager to be out of balance. Since this transmission is take or pay we will be billed for the transmission if we use it or not so leave the volume at 10 Mw.

My Willamette contact is Doug Reiner his cell phone is 541-979-3493 his office number is 541-926-2281.

I'd like to be called if there are any unit outages or if there are any questions. My cell number is 503-807-2826, home is 503-579-1615.

Les

Willamette BOM Sale

Sender	lester.rawson@enron.com
Recipients	['paul.choi@enron.com', 'stanley.cocke@enron.com', 'greg.wolfe@enron.com', 'portland.shift@enron.com']
File	guzman-m/notes_inbox/1459.

Real Time Traders,

The Services Desk has sold 10 Mw of Willamette Ind. energy, Balance of the Month, to Avista/WWP, On Peak, beginning 12/4 through 12/30. The energy is unit contingent power at the WWP system. I have placed copies of the tags and oasis requests in the Services Books.

I have purchased PacifiCorp Firm transmission to move from the Willamette Busbar to the BPA system interconnect. Then Snohomish network transmission to move from PacifiCorp's system to Avista's system.

I have requested that Willamette give Enron a phone number to allow us to communicate Real Time with their generation staff. I will pass this along when it's received.

Although the schedule is unit contingent I would like to make a reasonable effort to keep the schedule whole when Willamette has unit problems. If we can show that this energy is a reasonably reliable energy source it will open up future opportunities. If there are curtailments call Pac Transmission at 503-251-5230, Snohomish Transmission at 425-304-1620 and WWP at 509-495-8534 and inform them of the cut and whatever resupply source that maybe used.

Feel free to call me at home (503-579-1615) or on my Cell (503-807-2826) if there are ever any questions.

13:16 GMT 13 December 2000 =DJ Edison To Call For End To Calif Elec Dereg Wed -Sources (This article was originally published Tuesday)

By Jason Leopold Of DOW JONES NEWSWIRES

LOS ANGELES (Dow Jones)--Edison International (EIX), saying the current state of California's power markets threatens the company with bankruptcy, will call Wednesday for an end to California's four-year experiment with deregulation, sources familiar with the issue told Dow Jones Newswires. John Bryson, chief executive of Edison International, is expected to announce that the company's regulated utility unit, Southern California Edison, won't be able to recover more than \$3 billion in losses related to power purchases and continue serving its retail customers unless the state's deregulated market structure is scrapped. In a move tantamount to a call for reregulation, Edison will propose to break ground on new power plants within 90 days and re-enter the power-generation business Southern California Edison was required to exit under the state's landmark 1996 deregulation law, the sources said. Edison plans to follow the announcement by filing a request with state regulators to increase retail electricity rates by as much as 20%, the sources

said, even though regulators rejected Edison's request for a rate increase of 10% last week. The utility has lined up the support of some state lawmakers for the broader proposal, which would require action by the state legislature, the sources said. Southern California Edison, with 4.2 million customers, is one of the country's largest electric utilities. Edison was the first of the state's utilities to sign on to the deregulation effort and, as it says on its Web site, "played a central role in the restructuring of the electric industry in California." Among the concessions won by utilities in 1996 is the rate freeze, which they demanded to help them recover costs related to deregulation but which is now producing huge losses. Edison's current losses stem from an imbalance between the soaring prices it must pay to purchase power on the wholesale markets and the fixed rate at which it can sell power to its customers. About half of those losses are offset the utility's own power sales revenues, which are accounted for separately and used to pay down deregulation-related debt. Rising power costs have produced a surplus in that account. Edison wouldn't reveal the current size of the surplus, but said previously that the California Power Exchange paid the utility \$1.3 billion over its generating costs for power through the end of September, at a time when its power-purchase losses were \$2.4 billion.

Power-Purchase Losses Mounting

The net losses continue to mount. California's wholesale power prices hovered at record levels all summer and spiked even higher in the past two weeks, as colder weather arrived in the Northwest at a time when much of California's power supply was down for maintenance. The price of power for delivery Wednesday in California hit an average of \$1,182 a megawatt-hour Tuesday, up from \$250 a megawatt-hour a week ago, the result of high demand and a decision by California's wholesale market operator to lift its cap on prices. The rate Southern California Edison can charge its retail customers, however, is fixed at \$66/MWh. Last week, Merrill Lynch & Co. (MER) downgraded its ratings for Edison International and PG&E Corp. (PCG), the parent of California's other major utility, Pacific Gas & Electric, to neutral, saying the utilities may be forced to file for bankruptcy if the state doesn't allow them to raise their retail rates. A Morgan Stanley Dean Witter (MWD) analyst drew the same conclusion Monday, also cutting his rating to neutral. Edison to this point has kept its power-purchase losses off its earnings statement, in hopes that a political or regulatory solution will allow them to be collected later. The California Public Utilities Commission put the hope of such a solution further out of reach last week, however, when it ruled against rate increases sought by Edison and PG&E. Credit rating agency Fitch Inc. on Monday lowered its ratings for Edison International and Southern California Edison's senior unsecured debt to the A-minus level, citing "increased liquidity pressure" and uncertainty about the utilities' ability to recover the costs of their power purchases. The agency downgraded Edison International, the parent, because half its consolidated cash flow is provided by Southern California Edison. Edison - which sources said plans to remain in the retail electricity business - said late last week that it has secured a \$1 billion line of credit and expects to have enough cash on hand to continue to pay for wholesale electricity for the next several months. California paid more than \$1 billion for power last week, sources said. Some of that, however, was paid to Southern California Edison, which still generates about 2,800 megawatts of power in the state. Shares in Edison International have fallen 21% over the past three weeks. They closed Wednesday at \$18.56, down \$0.06. -By Jason Leopold, Dow Jones Newswires; 323-658-3874; jason.leopold@dowjones.com (Mark Golden contributed to this article.) (END) Dow Jones Newswires 13-12-00 1316GMT Copyright (c) 2000, Dow Jones & Company Inc 13:16 GMT 13 December 2000 DJ Calif PUC Proposes To Let Utilities Out of CalPX (This article was originally published Tuesday) NEW YORK (Dow Jones)--The California Public Utilities Commission has proposed letting the state's three investor-owned utilities out of the requirement that they purchase their power through the California Power Exchange. The proposed ruling, written by Commissioner Carl Wood, would direct "jurisdictional utilities to serve their native load, to the extent possible, with their retained generation and power purchase contracts, rather than through a bidding process." Commissioners will take a final vote on the ruling Dec. 21, but the three Democrats on the five-member commission - including Wood - usually agree on proposed rulings before the rulings are put on the voting agenda, which was posted Tuesday. The change is in line with the U.S. Federal Energy Regulatory Commission's proposed ruling Nov. 1, which will get a final vote Friday, to remove the mandate that the utilities buy their power from the state-chartered California Power Exchange. The PX has been a lynchpin of the state's electric utility deregulation, passed in 1996. It was to be a clearing house for a multitude of bulk power producers and sellers, and its market prices were to be passed on to remaining customers of the utilities after the deregulation transition to free markets. But Sempra Energy (SRE) unit San Diego Gas & Electric Co, which emerged from the transition period a year ago, was passing on CalPX prices to customer until this summer, when electricity prices tripled and the PUC fixed SDG&E rates again. -By Mark Golden, Dow Jones Newswires; 201-938-4604; mark.golden@dowjones.com

RE: Portland St. Patty's Day

Sender	pmains@n2h2.com
Recipients	['mark.guzman@enron.com']
File	guzman-m/all_documents/782.

Guz,

Dahl and I will be heading down early on Friday. I have to be fitted with a tux, rehearsal dinner, etc... More worried about what effect the green brew will have on my system....

Give me a call this week or I will call you closer to Friday.

Patrick 206.660.6248 (cell)

-----Original Message----- From: Mark.Guzman@enron.com [mailto:Mark.Guzman@enron.com] Sent: Wednesday, March 07, 2001 4:34 PM To: pmains@n2h2.com Subject: Re: Portland St. Patty's Day Portland actually becomes a happening town for one day a year and that day is St Patricks Day. There are several pretty cool places that we can go downtown that will be having pretty decent sized parties. What is your schedule for the weekend? I have Thursday off, work Friday, Have Saturday off and work Sunday, howe-ver, I think I have someone to work for me on Sunday. Anyway, let me know your plans, here is my phone number in case Dahl doesn't have it. Home 503-228-7767 Cell 503-702-0463. Lets grab some green beers!

Counterparty Phone #'s

Sender	bill.iii@enron.com
Recipients	['portland.shift@enron.com']
File	guzman-m/notes_inbox/1170.

Group, We recently have had new counterparties express in interest in doing business with us... The telephone numbers are as follows:

Enmax(City of Calgary) 1-403-268-2018 TransCanada 1-403-216-2905 Florida Power and Light 1-561-625-7100

The Canadian companies primarily deliver at the BC border(they are typically sourcing from the Alberta Power Pool), please be sure to agree to terms for this energy(firm, non-firm, trans-contingent, etc.), in the case of a cut. TransAlta will also source from the Power Pool at times(otherwise they use the Centrailia plant), please keep this in mind. FPL has a geothermal plant in SP-15 and some wind generation(?) in NP-15. Typically they have 12 mws in SP and 31 mws in NP. Their SC is currently the APX.

And finally as the credit situations change, or if you have any doubts be sure to talk with Tracy or call the credit hotline (6-853-1803). Remember that you may be able to use other counterparties to buy or sell when needed (ie. SnoPUD will buy from POWX for us).

Good Luck.

Bill

To: Portland Shift cc:

Subject: NOB TO COB FOR CISO HELP

Group,

California has asked us to swing energy up from NOB around to COB...We do this by using the following account #'s. 1. The CISO provides us with energy at NOB 2. We then use BPA(t) to take it to SNOPUD-BPA account #682840 3. We do a buy/resale with SNOPUD for \$25 4. SNOPUD gives us the energy at their system and we take it to PGE at John Day- BPA account #840542 5. We use PGE direct from John Day down to the CISO. 6. We collect \$150 from the CISO for the service.

Phone numbers are: BPA(t):9-1-360-418-2581 SNOPUD:9-1-425-304-1620 PGE(t):8650

The CISO would like to be able to call upon this when PATH 15 problems occur and they are in an emergency situation. When the CISO asks, please put this deal in as early as possible, and then be sure to check out closely with all counterparties including the CISO at NOB and COB.

As always, please ask me if you have any questions. I can be reached on my cell phone at 503-887-3889.

Thank you,

Bill

MORE BPA account #'s!!!

Sender	bill.iii@enron.com
Recipients	['portland.shift@enron.com']
File	guzman-m/notes_inbox/1171.

We have some new opportunities with Modesto Irrigation District in Northern California. MID is their own schedule coordinator (SC id for caps -- MID1), and has a very flexible system that we can frequently help them run more efficiently. MID has partial ownership in San Juan, and can buy in the SW at PV or Mead 230(some wheels to San Juan may be needed). MID also has the capability to buy/sell in the SW or at Capt Jack in the NW and then buy/sell respectively with us in NP-15. MID's real time # is 1-209-527-3185, the RT guys at MID are not marketers, they are system reliability folks(dispatchers like EPE--old school), be aware and prepared for this when talking to them. If we are going to make use of their system flexibility, we should set it up WELL ahead of time with Blair Jackson(209-526-7505) or Matt Ray(209-527-8001), it also would likely be helpful to reference these two when talking to the dispatchers.

We have also had BPA build us some new account #'s that may help you. They are as follows

#682608 Enron on the intertie and the network, CISO to SnoPUD, Captain Jack to Snohomish System, \$5.06 #882616 Enron on the intertie and the network, CISO to Puget Sound Energy, Captain Jack to PSPL System, \$5.06 #882409 Enron on the intertie and the network, SnoPUD to CISO, Snohomish System to Malin, \$5.06 #840542 Enron on the network, SnoPUD to JD, Snohomish System to John Day, \$2.52 #682485 Enron on the intertie and the network, BC Hydro to CISO, BC Border to Malin, \$5.06

If you need other accounts built with different counterparties please let me know. Bill

19:05 GMT 21 December 2000 *DJ Calif PUC OKs PG&E Issuance Of \$2B In Long-Term Debt (MORE) Dow Jones Newswires 21-12-00 1905GMT Issuance To Fund \$4.5B Undercollections LOS ANGELES (Dow Jones)--The California Public Utilities Commission Thursday swiftly granted Pacific Gas and Electric Co.'s request to issue up to \$2 billion in long-term debt to finance undercollections of wholesale power costs. The PG&E Corp.(PCG) unit has undercollections totalling \$4.5 billion as it is unable to pass high wholesale electricity costs to customers due to a rate freeze. The utility has

filed a request with the PUC to end that rate freeze and allow rate hikes. In its application, Pacific Gas and Electric said the size of its undercollection made it difficult to obtain short-term debt, and that long-term debt issuance was therefore necessary, the PUC said. The PUC decision also allows the utility to use \$370 million of the \$2 billion for other purposes if those funds are not needed to finance undercollections. It was not immediate clear what other purposes those funds could be used for, however. PG&E's request for perpetual authority to issue \$2 billion in long-term debt was denied. -By Jessica Berthold; Dow Jones Newswires; 323-658-3872; jessica.berthold@dowjones.com (END) Dow Jones Newswires 21-12-00 1929GMT

19:18 GMT 13 December 2000 *DJ Calif ISO: Stage 2 Power Alert Seen Before 5 PM PST Wed (MORE) Dow Jones Newswires 13-12-00 1918GMT Cold Weather In US Northwest Limits Imports LOS ANGELES (Dow Jones)--A spokeswoman for the California Independent System Operator said she expected the ISO would need to declare a stage two power emergency at an earlier time Wednesday than Tuesday, when the alert was called at 5:10 PM PST (0110 GMT Wednesday). Temperatures in the Northwest are once again colder than expected, meaning there are practically no electricity imports from that region, the ISO's Stephanie McCorkle said. About 8,500 megawatts remain off the power grid, as has been the case for several days, McCorkle said. The ISO currently has a request out for bids for up to 5,000 MW of out-of-state power. Recent requests have been between 3,000 MW to 4,000 MW. The ISO's Tuesday stage two emergency, which means power reserves are below 5%, was precipitated by a unit off line at the Intermountain Power Agency in Utah. That plant provides about 840 MW of generation to California and Utah municipal utilities, and about 840 MW to the Los Angeles Department of Water and Power, which in turn can sell the power to the ISO.

Holiday party info/reminder

Sender	grace.rodriguez@enron.com
Recipients	['jeffrey.oh@enron.com', 'todd.perry@enron.com', 'jamiestoner@hotmail.com']
File	guzman-m/notes_inbox/1311.

Hello all! I hope things are doing well for you!

I just wanted to send out a reminder about the holiday party... If you have not yet responded, please let me know if you are available (even for an hour or so early in the party). Your friends are welcome to come as well!

A few things to keep in mind: 1) This is a Bring Your Own Alcohol event. Mixers will be available; however, if you anticipate that you will need mixers other than sodas, bloody mary mix, or juice (and ice and limes and lemons...) please let me know today. 2) The party hostess would like everyone to drink responsibly. If you anticipate you will be consuming large amounts of "cheer", please bring a pillow and blanket (sorry, I don't have enough), or plan on taking a cab to/from the party. BE SAFE! 3) Finally, DIRECTIONS: I am located on Naito Pkwy/Front Ave south of the Broadway Bridge and north of the Steel Bridge. I'm in the wonderfully colorful orange-red/yucky-green apartments across from the red apartments. Get on to Front Ave/Naito Pkwy (if you don't know how, look at a map or give me a call) From Front/Naito going NORTH: go underneath the Steel Bridge and over the railroad tracks. My apartment is on the left. From Front/Naito going SOUTH: go underneath the Broadway bridge. My apartment is to the right. Park at a meter. =) My building number is 815. Dial 214 on the callbox to be buzzed in. [Alternate entrance: walk up the stairs next to the leasing office. My apartment (back entry) is the THIRD patio on the right.]

Let me know if you have any questions.

Thanks, G 503.242.1315-hm 503.807.7858-cell

----- Forwarded by Grace Rodriguez/PDX/ECT on 12/21/2000

09:16 AM -----

HAPPY HOLIDAYS!!!

You are invited to

Grace's 2nd Annual Holiday Party

7pm, Friday, December 22nd

815 NW Naito Parkway, Apartment 214

Light hors d'oeuvres, non-alcoholic beverages and mixers will be provided.

Please BYO-liquor, beer & wobbly pops (<--MP)

?

Floor, couch, chair or table space will be provided for those who drink too much and can't drive home. (Bring your own blankets!)

?

Sorry for the late notice, but let me know if you can make it by Wednesday, December 20th. (503) 242-1315.

See you then!

-Grace

To: undisclosed-recipients;; cc: Subject: DJ Calif ISO Board: Mgmt Can Sign Deals On New Generators

14:26 GMT 31 October 2000 DJ Calif ISO Board: Mgmt Can Sign Deals On New Generators NEW YORK (Dow Jones)--The governing board of the California Independent System operator confirmed Monday night that the ISO's management is authorized to pay for new generating capacity to be built in California. An emergency board meeting was called to vote on the resolution, which said that ISO staff "is authorized to enter into contract for approximately 2,000 MW of peaking capacity for a period of three years at a total cost for capacity not to exceed \$255 million per year." The resolution passed 15-3, with four abstentions and one absence. It was Monday's only vote. The confirmation, on the eve of the ISO signing contracts for the new generators, became necessary when the California Public Utilities Commission and the California Electric Oversight Board told the ISO on Thursday that they wanted to approve any such contracts before the ISO signed them. Some of the supply, the PUC and EOB said, may be too expensive. The ISO, in turn, asked the PUC and EOB to share any information they had on less expensive new power supplies by noon Monday, but no such information was submitted. The new peaking capacity is to be on line in the state by June 1. The contracts to build them are the result of a request for proposals issued in August. -By Mark Golden, Dow Jones Newswires 201-938-4604; mark.golden@dowjones.com (END) DOW JONES NEWS 10-31-00 09:26 AM Copyright (c) 1998, Dow Jones & Company Inc

17:16 GMT 7 December 2000 *DJ Calif. ISO Solicits Bids For Short-Term Power Contracts (MORE) Dow Jones Newswires 12-07-00 1216EST *DJ Calif ISO Seeks Cost-Based Power Contracts Beginning Sat (MORE) Dow Jones Newswires 12-07-00 1217EST Bids Due 2 P.M. PST Thu LOS ANGELES (Dow Jones)--Faced with a severe power supply deficiency for the remainder of the year, California's grid operator is seeking short-term, cost-based electricity contracts that could begin as early as Saturday, according to documents obtained by Dow Jones Newswires Thursday. Bids are due 2 p.m. PST (2200 GMT) Thursday, and contracts are expected to be signed 5 p.m. PST. The state's Independent System Operator sent a notice to generators appealing for additional resources equal to 5% of the ISO's projected peak load for the month of December, according to the notice. The actual number of megawatts was undetermined. However, market sources put the figure around 5,000 MW. The ISO is looking for the lowest possible bid. "Cost-recovery will be limited to verifiable start-up costs, fuel costs, emissions costs, and an amount equal to the lessor of 10% of production costs or \$25 a megawatt-hour," the notice states. With 11,000 MW of generation off-line - about one-quarter of the state's capacity - due to planned and unplanned outages and colder-than-normal temperatures in the Northwest that limit the amount of power California can import, the ISO has been forced to go out of market and pay premium rates for wholesale electricity in order to keep the state plugged in.

To: undisclosed-recipients;; cc: Subject: DJ Puget Sound Asks FERC For Price Caps In Western Region

17:22 GMT 30 October 2000 DJ Puget Sound Asks FERC For Price Caps In Western Region NEW YORK (Dow Jones)--Puget Sound Energy Inc.(PSD) has requested that federal regulators impose price caps on sellers of wholesale electricity in the California and Pacific Northwest power markets. "Generally we do not favor price caps since they do not allow a wholesale market to work competitively," said William Gaines, Puget Sound Vice President of energy supply, in a prepared statement. "But in this case the only thing worse than a price cap is a price cap on only part of the market." Puget Sound said in an Oct. 26 complaint filed with the Federal Energy Regulatory Commission that it is "unfair and unduly discriminatory to protect wholesale purchasers in California with a price cap and yet deny similar protection to wholesale purchasers in another part of essentially the same market." Thousands of energy transactions occur each month between the Pacific Northwest and California, according to Puget Sound. "While Puget Sound Energy strongly supports a competitive marketplace, any federal action that will alter the wholesale electric market in one region needs to apply to all affected parts of that region," Gaines said. Price caps imposed only in California would result in the state buying power in the Pacific Northwest at lower prices and customers in the Pacific Northwest paying higher costs when that region

purchases power from California, according to the company. -By Jason Leopold; Dow Jones Newswires; 323-658-3874; jason.leopold@dowjones.com (END) Dow Jones Newswires 30-10-00 1722GMT Copyright (c) 1998, Dow Jones & Company Inc

14:15 GMT 7 December 2000 *DJ Nymex Natural Gas Futures Seen Opening 75C-80C Higher (MORE) Dow Jones Newswires 07-12-00 1415GMT Traders Calling 'Foul' HOUSTON (Dow Jones)--The New York Mercantile Exchange natural gas futures contracts are expected to open 75 cents to 80 cents higher again Thursday in a march toward \$10 per million British thermal units gas prices, traders said. ACCESS trading again pushed the numbers, with January gas trading in a wide \$8.61-\$9.539/MMBtu range, with the last deal done at \$9.95/MMBtu, \$1.465 higher than Wednesday's already record \$8.485/MMBtu settlement. "This market resembles a classic bull blow-off market," said Charlie Sanchez of Gelber Associates in Houston. Over-the-counter market was trading early Thursday at \$9.28-\$9.34/MMBtu, with physical gas at the Henry Hub seen at \$9.35-\$9.43/MMBtu, traders said, compared with Wednesday's closing range of \$8.53-\$9.30. Traders see options at \$9.00/MMBtu, with 8,200 positions and another 4,600 holding option calls at \$10/MMBtu. Swing swap physical trade has topped \$10/MMBtu, a trader said. "Trees don't grow to the sky," an East Coast trader said early Thursday. "Not even manipulated ones." "I've worked in gold markets and in potatoes," a trader said. "I know a manipulated market when I see one." Forecasters are predicting colder weather through December, a trader said, but several traders have come down hard in complaints about the volatility of a market jerked skyward in late night, low-volume ACCESS trading. Support remains at \$8.10 and \$7.43, with resistance at \$10 and \$11.10, traders said. -By John Edmiston, Dow Jones Newswires, 713-547-9209; john.edmiston@dowjones.com (END) Dow Jones Newswires 07-12-00 1421GMT

21:05 GMT 30 October 2000 *DJ FERC Probe Doesn't Find Calif Pwr Rates Unjust -Official (MORE) Dow Jones Newswires 30-10-00 2105GMT Details Of Report A Blow To State, Utills NEW YORK (Dow Jones)--A federal regulatory report into California's wholesale electricity market couldn't find evidence that power rates were "unjust and unreasonable," a Democratic commissioner with the Federal Energy Regulatory Commission told Dow Jones Newswires Monday. The probe, details of which are scheduled to be released Wednesday, is a blow to California's three investor-owned utilities, state officials and millions of retail electricity consumers - all of whom have accused generators of manipulating the market, collusion and "profiteering." The commissioner, who spoke on condition of anonymity, said "the report couldn't find that power rates in California were unjust and unreasonable." Dow Jones Newswires reported Friday that the FERC report also found no evidence of abuse by energy companies operating in the state, and wouldn't be ordering tens of millions of dollars in refunds to consumers and utilities. Instead, the commissioner said the market structure resulted, in part, in higher wholesale electricity costs, and several changes, such as price caps, exacerbated the situation. The commissioner said the report would address sweeping structural changes to the state's Independent System Operator, which controls the high-voltage transmission grid, and the state's Power Exchange, where power is bought and sold. Gov. Gray Davis reacted to the news with disappointment, according to his press secretary, Steve Maviglio. The governor is expected to address details of the FERC report Wednesday. -By Jason Leopold, Dow Jones Newswires; 323-658-3874; jason.leopold@dowjones.com (END) Dow Jones Newswires 30-10-00 2136GMT

18:59 GMT 12 December 2000 DJ US Energy Secretary Warns Pwr Producers In West On Prices WASHINGTON (Dow Jones)--As California's electricity system teeters on the brink of collapse, U.S. Energy Secretary Bill Richardson warned power producers not to attempt to take advantage of the power-supply crisis. "I am very concerned about the condition of power markets in the West. Electricity supplies in parts of the region are tight and prices charged for wholesale power in the region continue to spiral out of control," Richardson said in a press release late Monday. Richardson urged power providers not to attempt to take advantage of the crisis by price gouging. "While I have no specific knowledge of any such activities, it is important that generators located throughout the region and in Canada and Mexico understand that the administration won't tolerate any actions designed to take advantage of the situation," Richardson said. The energy secretary criticized a decision by Kaiser Aluminum Corp. (KLU) to shut down an aluminum smelter in the Pacific Northwest that receives low-cost power from the Bonneville Power Administration and resell that power in open markets for a profit of \$52 million. "I have instructed Bonneville to explore all necessary actions to prevent Kaiser from remarketing this power," Richardson said.

To: undisclosed-recipients;; cc: Subject: DJ Locals Seen 'Yelling' At Nymex Board Members Touring Pits

16:38 GMT 7 December 2000 DJ Locals Seen 'Yelling' At Nymex Board Members Touring Pits HOUSTON (Dow Jones)--Locals were seen openly haranguing New York Mercantile Exchange board and committee members in the pits at mid-morning Thursday during a suspension of trading, traders in the pits told Dow Jones Newswires. "They're yelling at board members, they're freaking out," an oil and gas pit trader said. "They're not happy - they're losing money." The trader,

who also trades in the natural gas pit, said pit participants are concerned that ACCESS trading on low volume has run the price of natural gas up so much. But, he said, when the market reopens at 11:30 a.m. Thursday after an hour of suspended trade, expect the market to fall "decidedly lower." The market subsequently reopened at \$8.35, down 13 cents. Locals, he said, want the Nymex to set \$1.50 up and down limits and stay with them, he said. The market has initiated initial price limits of \$1, expanding to \$2, but that decision by the Nymex board late Tuesday still has to be approved by the Commodity Futures Trading Commission. A Nymex spokeswoman expects that decision to come soon. ACCESS trading had pushed the market to \$9.235 per million British thermal units, up 75 cents from the \$8.485/MMBtu settlement. The market then fell 75 cents back to the settlement price, and the Nymex suspended trading for an hour. "That is really crazy," a Midwest trader said. The market shut trading at 10:30:06 a.m. EST Thursday (1530 GMT), according to a Nymex spokeswoman. It will resume at 11:30 a.m., she said, with 75-cents down limits in effect. On Enron Online, the January contract was trading at \$8.35-\$8.41/MMBtu, a Houston trader said, oscillating between \$8.47-\$8.53 at 11:25 a.m. EST (1625 GMT). Physical gas at the Henry Hub is trading around \$8.21-\$8.28, and swing swaps for the rest of the month is at \$8.70-\$8.88, he said. - By John Edmiston, Dow Jones Newswires; 713-547-9209; john.edmiston@dowjones.com (END) Dow Jones Newswires 07-12-00 1638GMT Copyright (c) 2000, Dow Jones & Company Inc

To: undisclosed-recipients;; cc: Subject: DJ Class Action/Calif Generators-3: Antitrust Law Violated

19:42 GMT 28 November 2000 DJ Class Action/Calif Generators-3: Antitrust Law Violated The "class" - the plaintiffs - are defined as anybody who bought power through the California Power Exchange last summer, but largely represents the 1.2 million customers of Sempra Energy unit (SRE) San Diego Gas & Electric Co., according to the complaint. The complaint alleges the defendants violated antitrust laws. The plaintiffs allege that the generators named in the suit deliberately withheld their power supply from the CalPX forward market, scheduled unplanned power plant outages and congested transmission lines last summer in an effort to drive up wholesale power prices. Houston-based Reliant Energy Inc. (REI), operates five power plants in California. Atlanta-based Southern Company (SO) operates six generation units in the state; Houston-based Duke Energy (DUK) operates four power plants; Houston-based Dynegy (DYN) operates eight power plants in California; Arlington, Va.-based AES operates four, Tulsa, Okla.-based Williams Energy operates three generation units and Minneapolis-based NRG operates eight power plants. In addition, the suit claims the California Independent System Operator, manager of the state's high voltage transmission system, wrongfully supplied the Western Systems Coordinating Council, an agency that manages electricity reliability in the west, with real-time information about power plant outages and electricity generating and capacity levels that was used by generators to manipulate the market. "Through the WSCC Internet web site, wholesale electricity market participants ... were thereby given access to real-time data as to their competitors' actions, although access to such data was forbidden by the ISO's (rules)," the complaint

states. "Starting on or about May 22, 2000, defendants used such real-time data to exercise market power, by among other things, reducing their (electricity) output, strategically underbidding supply to the forward markets and exporting electricity from the state in order to drive up" power prices, the complaint further states. The defendants weren't immediately available for comment. -By Jason Leopold, Dow Jones Newswires; 323-658-3874; jason.leopold@dowjones.com (END) Dow Jones Newswires 28-11-00 1942GMT Copyright (c) 2000, Dow Jones & Company Inc

20:26 GMT 4 December 2000 *DJ CalPX Day-Ahead Prices At \$250 Cap For Every Hr - Source (MORE) Dow Jones Newswires 04-12-00 2026GMT Prices Suggest What ISO Pays - Source LOS ANGELES (Dow Jones)--Monday day-ahead prices into the California Power Exchange hit a state-mandated \$250 per megawatt hour price cap for every single hour, the first time that has happened in the history of the CalPX, said a source close to the issue. "Our on-peak prices are at the cap, our off-peak prices are at the cap, our average price is at the cap," the source said. The prices are in line with December balance-of-month forward prices in the Mid Columbia River market electricity hub, which hit \$525/MWh, and January forward prices, which hit \$475/MWh on Monday. Prices in the CalPX, which operates the state's day-of, day-ahead and block forward electricity market, are likely an indication of the prices the Independent System Operator is paying to secure that out-of-state generation, the CalPX source said. The California ISO, which must ensure the state's grid reliability and operates 75% of the state real-time market, declared a stage-one electrical emergency Monday, meaning operating reserves were below 7%. The ISO said 10,000 MW of power was off line, and issued a call to buy 3,000 MW out of state. It is strange that the CalPX would hit an across-the-board cap in the winter, as opposed to the traditional high-peak summer season, market sources said. The ISO has had an unusual winter, however, having declared an unprecedented five stage-two power emergencies in November due to a large amount of generation off line for planned and unplanned maintenace. -By Jessica Berthold, Dow Jones Newswire; 323-658-3872; jessica.berthold@dowjones.com

13:15 GMT 30 November 2000 =DJ Calif Gov Considers Rereg, Ban On Power Exports (This article was originally published Wednesday)

By JASON LEOPOLD Of DOW JONES NEWSWIREs

LOS ANGELES (Dow Jones)--California Gov. Gray Davis is considering a number of steps to repair the state's flawed deregulated wholesale electricity market, including banning the export of power from the state, according to a draft report. The two-paged draft, titled "Options Regarding California Electricity: For Discussion Purposes Only," is being circulated by the governor's office to lawmakers and energy officials, sources close to the issue said Wednesday. The document, obtained by Dow Jones Newswires, details steps the state could take to fix its troubled wholesale power market. All of the items in the draft were under consideration, including a return to regulated markets, said Steve Maviglio, the governor's press secretary. Maviglio said Davis will announce some details of his energy plan Friday, the deadline for the governor to reply to the Federal Energy Regulatory Commission's proposals for repairing the state's power markets. One proposal that the governor is expected to adopt is to develop a state power authority to build power plants and own and operate transmission systems, the source said. Among the ideas under consideration are the following: -Eliminate the California Independent System Operator, manager of one of the state's two wholesale power markets and much of its power grid. -Extend the freeze on retail electricity rates charged by Edison International (EIX) unit Southern California Edison and PG&E Corp. (PCG) unit Pacific Gas & Electric Co. -Require utilities to retain existing generation and to build new power plants. -Consider re-asserting state authority over the operation, maintenance and safety practices of all in-state generating facilities for public health and safety purposes. -Authorize California's publically held utilities to purchase the majority of their power in forward markets. -Pressure the FERC to "do its job" by imposing a regional price cap on wholesale energy that varies by time of day and year. -Continue to lobby for billions of dollars in refunds for "unjust and unreasonable" rates charged to California consumers. -By Jason Leopold, Dow Jones Newswires; 323-568-3874; jason.leopold@dowjones.com (END) Dow Jones Newswires 30-11-00 1315GMT Copyright (c) 2000, Dow Jones & Company Inc

Fiesta Bowl Ticket Info

Sender	osualum@orst.edu
Recipients	['bowlgame@pluto.sparklist.com']
File	guzman-m/discussion_threads/403.

Now that the Beavers are in the Fiesta Bowl, Oregon State University fans everywhere are scrambling to get tickets for the big game. Athletic Director Mitch Barnhart said on Sunday, "I have just been told by Fiesta Bowl officials that the maximum number of tickets Oregon State University will receive is 17,500, which is about 5,000 less than the original number that was first discussed. I encourage fans in any way possible to use their resources to obtain tickets."

According to the Tostitos Fiesta Bowl web site, "A limited number of Standee Room Only tickets for the Tostitos Fiesta Bowl will be available for sale on Monday, December 4th at 2:00 p.m. MST through Ticketmaster at \$75.00 each. They are located at the top row of the stadium. All other tickets are sold out."
<http://www.tostitosfiestabowl.com/calendar/detail.cfm?ID=3D35>

Don't have your tickets? Don't start worrying yet. Many fans have already found that the easiest way to get a ticket to the game AND take care of lodging, travel, pre-game events and other bowl-related activities is to join the Official OSU Bowl Tour. The tour offers something for every budget, ranging from all-inclusive trips with airfare to a no-frills land-only package. (Plus, the Official Bowl Tour still has game tickets!) To make your reservations, call toll free, 877-305-3759. Sign up soon, space is limited. To learn more about the Official Bowl Tour, or to see recent news articles, game related merchandise, and other information, check out the bowl game website:
<http://bowlgame.orst.edu/>

As if Beaver fans weren't already excited enough, you can now show your enthusiasm and public support for Oregon State University by joining us for Fly Your Flag Fridays! Every Friday during the month of December, Beavers around the nation are encouraged to fly their car flags, house flags and to wear Orange and Black! Show the nation that we are rooting for an Oregon State victory at the Fiesta Bowl! Tell all your Beaver friends about Fly Your Flag Fridays!

Don't have a flag? Again, don't start worrying yet. As a FREE bonus for joining the OSU Alumni Association, Orange and Black Club membership, you will receive a FREE Beaver car flag and a FREE Beaver luggage tag. Get yours in time for Fly Your Flag Fridays! Call Membership Services toll free, 866-416-8454 to sign up today! For more on the OSU Alumni Association membership program, click here:
<http://alumni.orst.edu/osuaa.html>

BONUS!! Join the Orange and Black Club by noon on Friday, December 15, 2000 and become eligible for a drawing for two game tickets to the Tostitos Fiesta Bowl and two tickets to an OSU Alumni Association event (to be determined) in Tempe, Arizona! This is an incredible value for FREE to the Orange and Black Club winner! Call today, 866-416-8454!

To: undisclosed-recipients;; cc: Subject: DJ Calif Sen Introduces Bill To Change ISO, CalPX Board

13:16 GMT 5 December 2000 DJ Calif Sen Introduces Bill To Change ISO, CalPX Board (This article was originally published Monday) LOS ANGELES (Dow Jones)--California State Senator Debra Bowen, D-Redondo Beach, introduced a bill Monday at the senate's new session that, if approved, would replace the governing boards of the state's Independent System Operator and Power Exchange with a governor-appointed three-member independent board. In addition, Senate President Pro-Tem John Burton said he will introduce legislation that would require power suppliers to register with the state before doing business here and report all wholesale electricity sales and bids to the state. The CalPX governing board consists of 28 members and the ISO has 29. The senate bill, backed by Senate President Pro-Tem John Burton, seeks to eliminate a conflict of interest that currently exists on the boards because its members are made up of individuals from utilities and generations companies. Lawmakers said the companies represented by members of the boards benefit from high wholesale electricity prices and therefore they are unable to make objective decisions that represent the interests of California's consumers. The energy stakeholder boards were created as a result of the state's 1996 landmark deregulation law and was seen as an entity that could counsel the operation of the ISO and CalPX while the state moved toward a fully deregulated market. The ISO manages the high-voltage transmission system and real-time power market. The CalPX is the market where electricity is bought and sold. The bill will go through a 30-day waiting period at the democratic-majority senate before it is discussed in early January, but it must be passed by the senate and state assembly before it can be signed into law by the governor. If signed into law by the governor, the bill "would prohibit a member of the independent governing board appointed by the governor from being affiliated with any actual or potential participant in any market administered by the (ISO or CalPX)," according to a copy of the Bowen Bill. Electricity is proving to be the hottest topic of the new legislative session, said Lawrence Lingbloom, consultant on Sen. Bowen's Energy, Utilities and Communications Committee. In addition to the Bowen Bill, legislation was also introduced that would require the state's three investor-owned utilities, Edison International unit (EIX) Southern California Edison, PG&E Corp. unit (PCG) Pacific Gas & Electric, and Sempra Energy unit (SRE) San Diego Gas & Electric Co., to buy a majority of their electricity needs in advance in the forward market, in order to protect consumers from volatile spot markets. -By Jason Leopold, Dow Jones Newswires; 323-658-3874; jason.leopold@dowjones.com (END) Dow Jones Newswires 05-12-00 1316GMT Copyright (c) 2000, Dow Jones & Company Inc

17:13 GMT 12 December 2000 DJ US Southwest Pwr Mkt Rises On Unit Outage, CalPX Chaos NEW YORK (Dow Jones)--Prices for prescheduled power in the southwestern U.S. rose Tuesday due to a unit outage and uncertainty about the market rules of the California Power Exchange, traders said. The 498-megawatt San Juan coal-fired unit 4 in New Mexico tripped off the grid Monday due to a tube leak, but it is expected back on line Tuesday night. Traders also said total uncertainty about the market rules in California have thrown the market into chaos. On Sunday, the California Power Exchange cleared power sales at prices above \$250/MWh because the Federal Energy Regulatory Commission approved an emergency request from the California Independent System Operator to move to a new "soft" price cap. The ISO asked to be able to purchase power for more than \$250 a megawatt-hour, so long as any seller agrees to provide documentation on costs to justify the high price. In time, the FERC could reduce prices for any sales above \$250/MWh if the FERC deems the price unreasonable, according to the "soft" cap rules originally proposed by FERC. The CalPX says that its day-ahead market has also moved to the soft price cap, but the ISO on Sunday constrained almost all CalPX prices for Monday down to \$250/MWh, from an average of \$611.53/MWh. The ISO staff and middle managers apparently don't believe the new soft-cap applies to the CalPX market, though late Monday the ISO constrained some prices for Tuesday down to \$250-\$500/MWh but left the CalPX clearing prices for nine hours unchanged at \$926.34-\$1,020.99/MWh. Traders said Tuesday that no ISO constrained pricing formula comes up with even figures as \$280/MWh and \$500/MWh, and that somebody at the ISO is just making up prices arbitrarily. With all the uncertainty about what final prices will be, suppliers avoided the CalPX market Monday and Tuesday. With fewer sell offers and steady demand, the CalPX has risen sharply higher than the bilateral market. The much-higher CalPX clearing prices Monday, in turn, pushed the southwest bilateral market higher early Tuesday, traders said

On-Peak/MWh 1 Day Previous Palo Verde \$ 400.00-\$ 520.00 \$ 300.00-\$ 375.00 Mid-Columbia 650.00- 850.00 750.00-1,000.00 COB 600.00- 800.00 700.00- 900.00

After the bilateral market completed most of its trading, the CalPX posted Wednesday on-peak clearing prices that averaged \$1,406.76/MWh, up \$417. How the ISO may change those prices later Tuesday is unknown. The CalPX made an emergency filing late Monday with the FERC to include its market in the new "soft" cap rules. -By Mark Golden, Dow Jones Newswires; 201-938-4604; mark.golden@dowjones.com

17:20 GMT 27 October 2000 DJ House Votes, But FERC Unswayed On Calif Pwr Probe Release WASHINGTON (Dow Jones)--The Federal Energy Regulatory Commission said Friday it won't be swayed by a House vote urging immediate release of the results of a staff probe into recent problems in California's power market. FERC announced last week that it had received the results of an eagerly anticipated staff investigation of market conditions that sent power costs in California soaring over the summer. The agency scheduled an extraordinary meeting for Nov. 1, at which it plans to vote on proposed remedies based on the report's findings, but declined to make public the staff's report before then. "We plan to release the report on the first of November. The date hasn't changed," said FERC spokesman Hedley Burrell. The unprecedented high power prices in California this year have generated a fierce political backlash in the state, as retail consumers in San Diego were exposed to market-based prices this summer two to three times higher than what they paid the previous year. At the same time, utility companies outside of San Diego lost hundreds of millions buying high-cost power at wholesale and selling it at retail at a loss under a state-mandated retail rate freeze. The decision to keep the staff report under wraps until Wednesday was objected to by FERC Commissioner Curtis Hebert, the lone Republican among the four sitting commissioners at FERC. "The people of California should have as much time as possible to digest our staff's findings and consider the options presented," Hebert said. "It can only help heal the raw emotions rampant in the state of California." Rep. Brian Bilbray, R-Calif., whose district is in the San Diego region where retail consumers were hit by the high-flying wholesale prices this summer, sponsored the non-binding resolution the House approved Friday urging immediate release of the report. Bilbray is locked in a tight re-election campaign against Susan Davis, a Democratic state assemblywoman, who was a sponsor of the legislation that created the state's retail power restructuring initiative blamed for creating the crisis. The power price crunch has factored prominently in the race, in which Bilbray has run advertisements likening Davis to a Dr. Frankenstein whose electricity deregulation monster has run amok. The House debated Bilbray's resolution late Thursday, but the lawmaker was unable to attend due to a death in the family. Similarly, Bilbray was unavailable for the House session Friday when the measure was passed in an unrecorded voice vote, nor was he available to comment Friday. Another San Diego-area lawmaker, Rep. Bob Filner, D-Calif., in a telephone interview Friday, dismissed the Bilbray resolution as "a meaningless thing."

The non-binding resolution "doesn't do much," Filner said, arguing the House instead should take up his legislation directing FERC to roll back power prices in the state and direct power sellers to provide retroactive refunds to consumers. Bilbray's resolution is "a politically generated thing to assure he is covered for his re-election," Filner said. "His party will not let him do something significant." -By Bryan Lee, Dow Jones Newswires, 202-862-6647, bryan.lee@dowjones.com (END) Dow Jones Newswires 27-10-00 1720GMT Copyright (c) 1998, Dow Jones & Company Inc

19:04 GMT 13 December 2000 =DJ PG&E: Will Keep Borrowing Until Lenders Say 'No More'

By Mark Golden Of DOW JONES NEWSWIRES

NEW YORK (Dow Jones)--How long can PG&E Corp. (PCG) continue to buy power at \$500 a megawatt-hour and sell it at \$54? As long as banks continue to say it can, according to the spokesman for PG&E's regulated utility Pacific Gas & Electric Co. "That decision belongs to the lending institutions. They have to make the decision if lending us money is a prudent investment for them," utility spokesman Ron Low said in an interview late Tuesday. From May through November, the utility spent \$4.6 billion more to buy electricity in skyrocketing bulk power markets than it can charge its customers, who have frozen rates. And December purchases so far have been more expensive than those of any previous month. Since the California Independent System operator lifted its \$250/MWh price cap over the weekend, the northern California wholesale power market has traded between \$450-\$1,000/MWh. Such prices are expected to be common this winter. About two-thirds of the \$4.6 billion difference was paid by PG&E to outside electricity suppliers. PG&E had to borrow this amount from the credit markets. About one-third of the \$4.6 billion was paid into an account for income from power plants that PG&E still owns, funds which the company controls. The California Public Utilities Commission indicated Tuesday that it will authorize the state's utilities to use power plant profits to pay off some of their debts. That CPUC move will be totally inadequate, according to the PG&E and Edison International's (EIX) Southern California Edison. Their request for a customer rate increase was rejected by the CPUC last week. On Tuesday, the PUC proposed an order rejecting the utilities' overall approach to fixing California's power market. The PUC will take a final vote on Dec. 21 on that order, which promises to "continue to monitor the impact on the utilities." For now, PG&E is left to borrow about \$750 million a month to fund the electricity losses. "We need the state to begin immediately addressing the issue. There is time to avoid a very serious problem which would affect all of California, but inaction will rapidly result in a collapse of the entire energy system and with it the economy," Low said. Presumably, that means the collapse of Pacific Gas & Electric as well. "That's up to the institutions that are lending us money. The company has a strong financial history, which allows us to go out and borrow money and buy power for our customers. It can't go on forever," said Low. Almost all of the utility's debt is recourse debt of the parent company, PG&E Corp. The corporation spokesman, Greg Pruett, said that for now the parent company is actively engaged in helping the utility fund the power purchases. "We review this on a daily basis, but it can't go on forever. The two-minute warning has sounded and there are seconds remaining in the game," Pruett said. "This debt - \$4.6 billion - is more than half of the market capitalization of PG&E Corp. That's huge and it's got to stop," Pruett said. When asked if California Governor Gray Davis is willing to let the state's utilities go bankrupt, Davis' spokesman said Wednesday that "the governor doesn't want to comment until he finds out more about the situation." Enron Corp. (ENE),

as one of the big beneficiaries of the higher prices for bulk power supplies, has some concern about the credit strain, "but I can't imagine the state letting the utilities go into bankruptcy," Enron Chairman Kenneth Lay said Wednesday. "The utilities will have a difficult time raising the funds unless state gives a guarantee," Lay said. -By Mark Golden, Dow Jones Newswires; 201-938-4604; mark.golden@dowjones.com

DJ PG&E: Util Has "Virtually Exhausted" Financial Resources

To: undisclosed-recipients;; cc: Subject: DJ PG&E: Util Has "Virtually Exhausted" Financial Resources

14:05 GMT 21 December 2000 DJ PG&E: Util Has "Virtually Exhausted" Financial Resources (This article was originally published Wednesday) NEW YORK (Dow Jones)--With rate hike negotiations at a standstill and forward supply talks in Washington yielding nothing, PG&E Corp.'s (PCG) regulated utility subsidiary Pacific Gas and Electric Co. reiterated Wednesday that it has "virtually exhausted its financial resources." "We have been borrowing an average of \$1 million per hour to pay for the power we deliver to Californians," utility president Gordon Smith said in a press release. "No company can continue to operate indefinitely under such conditions." Since May, PG&E has spent about \$5 billion more on electricity than it gets paid by its customers, but about a third of that amount has been paid into a PG&E account for profits from the generators it still owns. The generation profits, which for now are kept separate from other revenues, are expected to be used to pay down the utility's debt. PG&E and Edison International's (EIX) Southern California Edison have said for two weeks that they could go bankrupt if they don't get a rate increase immediately. Almost all of the utilities' bonds are recourse to the parent companies. Standard & Poor's analysts said Wednesday that the utilities' bonds will be downgraded severely and immediately if a rate increase isn't agreed to this week. "Today's S&P conference call sends a message to Governor Davis and California's leadership that now is the time for action," Smith said. "The governor and the California Public Utilities Commission ultimately will determine if Pacific Gas and Electric Company can continue to provide essential services to the 14 million Californians in PG&E's service territory." The state's Public Utilities Commission is scheduled to meet Thursday on the issue, and has listed on its agenda the possibility of increasing the utilities' rates. California Gov. Gray Davis, state lawmakers and utility executives were also working on a deal. Those discussions were at a stalemate. There were no talks Wednesday, Davis spokesman Steve Maviglio said, but the governor updated financial analysts that consumers are inevitably going to face a rate hike. Customers pay PG&E \$54/MWh for energy, while SCE gets \$66/MWh. Both companies are paid additionally for transmission and distribution. The utilities have told Davis that they need at least \$20/MWh - a rate increase of about 20% - more for electricity, but the governor wants to keep the increase to about 10% of rates S&P analysts said a 10% increase wouldn't be enough to keep the utilities from defaulting, but the governor's office said an agreement wasn't likely to be reached soon. "There's not going to be a percentage deal announced," Maviglio said. "We're going to ask for greater scrutiny of the utilities' claims."

Consumer groups dismissed the utilities' talk of bankruptcy as "crying wolf." "Edison wouldn't have issued a dividend on preferred stock last week if they were going bankrupt," said Doug Heller of the Foundation for Taxpayer and Consumer Rights. But if they are really going bankrupt, the state should let them, Heller said. "Better a buyout than a bailout," Heller said. "They're not going bankrupt. But if they do, the better outcome would be a public power system. Under deregulation, (their inefficiency) it only gets worse." Also Wednesday, negotiations on long-term supply contracts with western U.S. electricity suppliers ordered by the Federal Energy Regulatory Commission adjourned with little progress. Such deals could have rescued the utilities from the astronomical prices of the spot market, where power has been trading at \$250 a megawatt-hour to \$600/MWh. Five-year supply contracts starting Jan. 1 have been trading at about \$80/MWh. -By Mark Golden, Dow Jones Newswires; 201-938-4604; mark.golden@dowjones.com

New E-awards From Alaska Airlines

Sender	email.announcement@alaskaair.com
Recipients	['mileagepromotions@gromit.alaskaair.com']
File	guzman-m/notes_inbox/1396.

***** Here's What's Happening in Alaska's World

Alaska Airlines Mileage Plan is committed to keeping you informed. Our monthly email newsletter lets you be the first to know about great offers available to our members as well as important changes to the services we provide.

IN THIS ISSUE Mileage Plan Introduces E-Awards Bonus Miles for Web Check-In Changes to Electronic Bonuses Online Auction Closes Soon Preferred Weekends

ALASKA AIRLINES MILEAGE PLAN ANNOUNCES E-AWARDS

Effective December 15, 2000, one call does it all! That's right, when you want to redeem your Mileage Plan miles for travel on Alaska Airlines, Horizon Air, or our partners, you can book your flights and have the miles deducted from your account at the same time. You no longer have to wait for award certificates to be mailed or take those certificates to the airport to get your tickets! Simply call these numbers to get your awards:

If your travel plans include flights on both Alaska Airlines and Horizon Air, call 1-800-ALASKAAIR. Flying only on Horizon Air? Call 1-800-547-9308. Want to use your miles for travel on one of our partner airlines? Call 1-800-307-6912.

E-awards! Making your travel as easy as possible.

500 BONUS MILES FOR CHECKING IN AT ALASKAAIR.COM

Did you know you can check in online for Alaska Airlines and Horizon Air flights? Customers who purchase Instant Travel, our easy-to-use electronic tickets, may check in at the alaskaair.com home page up to one hour prior to scheduled departure. Just enter your six letter confirmation code, print your boarding pass, then show your ID at the gate and you're ready to fly. Earn 500 bonus Alaska Airlines Mileage Plan miles and avoid airport lines at the same time. For full details go to <http://www2.alaskaair.com/it/WCI.asp>.
