We have attempted to operationalize the Alliance - AOS contract between Enron North America and Crestar (now Keyspan) as follows:

8:00 am - Alliance announce the % of AOS that will flow the next gas day (weekend)

9:00 am - Crestar (Keyspan) determines economic viability and informs Enron , by phone, of AOS volumes to Enron's central cash desk

(Patrice Thurston) *** The deal will be 'done' at this time as per the AOS contract.

(Note -- Crestar is in the process of assigning a portion the AOS contract to BP. After this assignment has been approved by Enron, BP and Crestar will notify Enron of daily AOS volumes)

9:45 am - Enron informs Crestar (Keyspan) { and BP after contract assignment} the contract numbers, volumes, pipelines, and other required nominations information - Crestar (Keyspan) {and BP after contract assignment} will nominate on Alliance to ENA

10:30 - Nominations deadline (1st cycle)

12:00 - Pipelines will (should) confirm all nominations

(all times are MST)

If you have any questions please contact me ASAP.

Teresa, I think that the problem is what is meant by "these costs". Currently we think that it will be negative, but until we get the allocations, we won't know. That is the reason we want to go monthly. Is there a problem getting them to sign something if we need to do it for another month. The terms may be different with regard to next months deal. Teresa, I have reviewed the revisions to the VPP transaction with Charlie Otto. We have a concern relating to the term. The term of this letter should be for the period ending April 30, 2001. The reason for our reluctance in extending the term is that we do not know what conditions Texas Gas may put on the next OFO nor do we know what conditions El Paso may put on the processing.

As I made Alan Aronowitz's changes yesterday, I also generated a non-Enfolio form of Gas Contract in case we need it. A clean version of this is attached, as well as a copy marked against the second draft of the Oil Contract distributed last night. There are three kinds of changes: (1) additional recitals to make it clear that this is an output contract, not a firm contract, (2) modifications to reflect the fact that the gas will be sold on a daily basis, and (3) various additional provisions from the old Cactus gas contract.

Perhaps this will be helpful.

Subject: Master Oil Contract for Brazos VPP Limited Partnership

Here is my attempt to blend together the requirements of our new deal, as expressed in the term sheet, with the old Cactus oil sales agreement, the inserts Alan has sent me, and the sections of the Enfolio contract that seemed to me to be applicable to this kind of financial deal. This draft agreement:

1. has a term that lasts as long as the VPPs.
2. contemplates written Confirmations only.
3. provides a price adjustment mechanism for under-deliveries, but does not characterize under or over-deliveries as breaches that justify damages.
4. does not give Brazos, as Seller, any special remedies if ERAC fails to take.
5. provides for netting across all transactions on a single monthly payment date that matches the settlement date under the interest rate swaps.
6. has a very limited ability for the Buyer to terminate upon default (and even this may be too much for the Banks).
7. includes the limitation of damages provisions and arbitration provisions from the Enfolio Gas Contract.
8. references the Conoco General Provisions.
9. in general, recognizes that the party on the other side from ERAC is a partnership controlled by an Enron general partner.

If this draft agreement represents a good compromise, I suppose no one will be really happy with it. In any event, this is my attempt to give the Banks what we said in the term sheet that we would provide and also give as much protection as possible to ERAC.

One issue is not covered in the attached draft, and that is what the Contract Price and the Index Price will be. In order to fit well with the other components of the deal, the Contract Price needs to be the floating price that is swapped with ENA and the Index Price needs to be the spot market price that is named as the "Index Price" in each Production Payment Conveyance. If the Index Price named in the two existing Conveyances is not satisfactory to ERAC, I suppose that the oil

desk and the VPP origination group will need to settle up outside the boundaries of the deal documents to which the Banks are parties, because I believe the Banks will consider it a fatal flaw in the deal if the Adjustment Quantities of Oil provided under the Conveyances cannot be converted into the necessary amounts of sales proceeds under this Master Oil Sales Agreement.

Please let me know how you want to proceed from here with this document. We need to get it to the Banks as soon as possible, but we need to know first whether it is correct. Here it is:

Cheryl, I am the person who asked Debra if she could find the confirms for the deal. The system indicated that the deals were confirmed in legal and I knew that I had not received a request for any deals covering the time period post of 3/31/99 under that GISB. If done in legal it should have been by me or Debra. In any case if a confirm was done, it should have been filed with the confirm desk, and not with the HPL contract. I apologize for not contacting you directly. We needed the document immediately and the HPL contract group has already indicated that they did not have it.

Debra,

The only confirm I've been able to print is for Sitara deal 131153 (Tagg N47394.1) and this one is weird: the deal was a two-month firm deal covering 12/01/99 - 01/31/00. Since firm deals over a month should not be confirmed under a GISB, this deal was split and 01/00 was moved to Sitara deal 133958 (cannot find Tagg number). Deal 131153 was originally confirmed under a Master Purchase Sale Firm but moved to the GISB following the correction of the CP name on the deal ticket. The deal was not reconfirmed under the GISB to the best of my knowledge; I couldn't locate the deal in Livelink (the only confirms under that deal number were for EPMI deals) and could only print the confirm out of Tagg.

I could not locate the other deal numbers at all in Tagg and there are no records in Livelink of the confirms either (only EPMI deals). I'm guessing the deals were confirmed out of DCAF, but I don't have access to that. Someone in the Confirms group will have to print those for you. One note: The last deal, Sitara 107197, is a five-month firm deal that should NOT have been attached to the GISB.

Since these are HPL deals, I'm not sure who confirms them, but you could probably get some help from either Ellen Wallumrod, Ann Osire, or Richard Deming. On the contract side, Cheryl Dudley or Amelia Alland should be able to help. I'm afraid I've done all I can on this end.

I'm getting ready to fax the confirm for deal 131153 (before it was split) since it's the only record I could pull up.

Sorry I couldn't find you everything! SBR

Dan,

Per Debra's e-mail to me, why can we not include other entities on this guaranty, it seems we have got guaranty's in place with other counterparty's in which they reference specific contracts as well as entities not related to the contract, i.e.

Sempre, Duke, Aquila, Dynegy,.....

Dan, I see the execution of this contract as a priority considering the trading volumes on Enron Online and current market conditions. I know in the past, we have been unable to negotiate a Master Firm with Engage US, although their legal group is fully aware of our request to negotiate a contract. Please send the draft out to the contact listed on the credit worksheet and prioritize the negotiation of this contract.

Dan,

I provided all the information that you are asking for on the original credit worksheet I e-mailed to ENA legal on August 29. You will notice in the comments section the Enron entities I wanted covered in the guaranty along with the Contracts that needed to be reference. If you need a copy the specific contracts that need to be covered they can be obtained through the documentation group, or through 'Live Link' on our computers. Please make note of the name change that has now occurred with respect to Engage.

If you can give me the specific contracts for each of the other enron entities you want covered by the Gas physical master contract of ENA whose payment obligations to Engage Energy Marketing, L.P. you want guaranteed by Enron, I will take the lead to draft the guaranty and have it forward to Enron Corp for approval prior to sending it out as a draft to Engage Energy Marketing, L.P.

Dan,

This is in response to my continued efforts with legal to make note of my intended priority of executing a Master Firm with Coastal Energy (formerly Engage US). As previous e-mails below indicate and phone calls with the ENA legal group and Coastal, the draft has yet to be sent out. I have confirmed with Coastal today, they have STILL not received the draft although are expecting this from ENA. We have outstanding exposure with this entity and is important from a credit, legal, and contractual standpoint that an agreement is executed. I understand that in the past they have been unwilling to negotiate a Master although I want one put in place. Please do what you need to, to get this draft sent to the counterparty.

Travis, Peter Keohane was the attorney who was working with PG&E to put a contract in place similar to what ENA agreed to. I have not seen any amendments proposed by PG&E, did they get omitted from my email? I am attaching the proposed amendment which I had forwarded to PG&E last year to enable them to trade on Enron Online. Please let me know if you need anything further.

PG&E made a proposal to John Lavorato and Bill Bradford today to secure some additional gas supplies from ENA and Enron Canada. I am faxing a copy of the presentation and relevant documents to each of you. I think that this is a deal that we are interested in looking at.

John and Jim, I think the only question we will have for you immediately are the bankruptcy implications associated with the advance payments. PG&E claims there are none (of course).

Dan, since you reviewed the original PG&E (Core) Master Agreement, can you review the proposed amendments to that Master?

Mark -- I don't think Enron Canada is a party to the PGE Master. Can you take a look at the form ENA executed and see if there is any reason why Enron Canada couldn't execute the same form?

Note that PG&E also wants to be re-established to trade on EnronOnline. I understand the only impediment to that is that the masters need to be amended to provide that Enron, not PG&E, is the confirming party, and that we were on our way to documenting those amendments when this all blew up a few months ago. Dan, can you resurrect those amendments so we can see if we can weave them into these amendments?

Exhibit C Delivery Points

File	hyvl-d/all_documents/231.

I need some further clarification. As I understand it, some, if not all, of the meters that reside in Beaumont and South Texas Divisions are included in Exhibit C. Are we saying that the "extend and blend" transaction excluded some volume previously included? That is inconsistent with the analysis performed when the renegotiated transactions were analyzed and booked.

I have asked Arhur Andersen for a copy of the amended Exhibit C so I can fully understand. Maybe that will help clear my confusion also. ----- Forwarded by Brenda F Herod/HOU/ECT on 06/09/2000 06:33 AM -----

Subject: Exhibit C Delivery Points

Ami,

As discussed earlier, the issue is whether all of the Delivery Points appearing on Exhibit C to the 76 Agreement, as amended, are subject to the audit of General Service Customers, or whether the audit should narrow the focus to the Houston, East Texas and Gulf Coast Divisions. Stated differently, the issue is whether quantities of gas required by General Service Customers in the Beaumont Division or the South Texas Division should be considered part of the Basket.

Transaction No. 1 - Revision No. 1 under the ENFOLIO Agreement states that the DCQ obligations apply to "Customer's Houston, East Texas and Gulf Coast Divisions." Therefore, although this Transaction identifies the Delivery Point(s) as those appearing on Exhibit C to the 76 Agreement, the intent was to exclude Beaumont and South Texas. In an earlier conversation today, Dan Hyvl confirmed that the foregoing was the appropriate analysis of this Transaction.

Based on this call, it would appear that, although Exhibit C to the 76 Agreement lists multiple Delivery Points, the intent was to limit the Delivery Point to the Customer group referenced in the heading of the applicable ENFOLIO Agreement.

Dan further stated that the boundary lines were redrawn at some time prior to December 29, 1998 (the date of the Restructuring Agreement). We have not seen documentation evidencing these changes. In addition, it was discovered that the "Texas Coast Division" (referenced on Exhibit C, as amended) is actually the "Gulf Coast Division." Dan mentioned that it would be prudent for all parties to outline definitive boundaries of divisions for future clarification. Finally, he stated he would meet with you personally to discuss these issues with you further.

I hope you find this information useful. If you have any questions or comments, please do not hesitate to call me or Aaron Roffwarg at (713) 221-1117.

Dan,

Attached is my attempt at rewriting the Kaiser Agency Agreement that I sent you last. Please have a look at it and let me
what additional changes are needed. The basic concept of the deal is simple:

Enron sells Kaiser Gas at index price Enron agrees to provide market and pricing information Kaiser designates Enron as agent to manage its pipeline capacity Kaiser can purchase incremental quantities of gas pursuant to the Enfolio agreement Kaiser can sell back unwanted quantities of gas pursuant to the Enfolio agreement

Please let me know how quickly we can turn this around, I'd like to get him something this week.

Sincerely,

Hi Dan:

Just an update to let you know the status of the agreements between Reliant and Enovate and Enron. They are both being routed internally prior to execution. However, due to the "Notices" section missing from the Enovate contract, Legal has asked that I forward that to you for execution prior to Reliant's execution. I hope that this is not a problem.

Dan, I don't want this contract to get misdirected, Enron's so large and that could easily happen. Could you please send me your direct mailing address so that I may send it directly to you for your further handling? Thanks, I appreciate so much your help in getting these two agreements completed.

YYou can either call me or email me your direct mailing address and I'll send you the Enovate contract as soon as I receive it.

Thank you, Ellen 713.207.3266 ellen_r_dailey@reliantenergy.com

Dan, I need a Master Firm Purchase/Sale Agreement in place with Intercontinental Terminals Company. This company is located at 1943 Battleground Road, P.O. Box 698, Deer Park Texas 77536-0698. My contact is Lynn Bingham (281) 884-0312. They have showed interest in doing a fixed rate. That is why I would like for them to sign a Master contract at this time. That way when we agree on a price we can act on it without having to wait on getting them approved. They passed along to me that they are a sister company of Global Octane. Call me with any questions.

Doug, this is more or less the draft for the letter that i need. I would like to get an original by tuesday of next week so i can send it. I appreciate your help.

To whom it may concern,

This letter is to confirm that Vitol S.A, Inc has been a reliable supplier of No. 2 Fuel Oil and No. 6 Fuel Oil under contract to Enron into Puerto Plata, Dominican Republic since April, 1995. Currently, they supply approximately 3600 Barrels/day of No. 2 fuel Oil, and 3500 Barrels/day of No. 6 Fuel Oil.

Vitol S.A, Inc has performed well and has fulfilled all their contractual obligations to date.

Please do not hesitate to call me if you need any additional information.

Jared, As we discussed earlier today, FGU is interested in purchasing firm supply at a fixed price for summer and/or winter. Currently, Enron and FGU only have an interruptible contract in place for supply purchases. In order to get a firm contract in place in a short amount of time, I think we should execute a GISB contract if Enron is acceptable to that. I have attached two word documents to be implemented into the GISB contract. One is FGU's general information and the other is our special provisions. Please have your contract department implement the attached information into a GISB contract and have it sent to me for review and execution. Jared, The CES GISB was never entered into between CES and FGU. I have reviewed their requested special provisions and they do not make any sense. Why should we pay the 5 days before they pay us if we are each selling to the other, the imbalance provisions works the way it is set up in the GISB and their language does not. Theirs attempts to roll defaults and imbalances together and those are two separate concepts. As such I have instructed Debra to prepare our standard GISB with our standard special provisions and forward same to Michelle and yourself. If you have any questions please call me and we can discuss.

Subject: Sample Enfolio Contract Form Attached

Dave, I have attached the above sample form for your review. I have been unable to find any documentation where we act as an agent for the shipper and contractually agree to remarket their unused capacity. As soon as I find some language, I will forward same to you. As we discussed, the major concerns that I have concerning the Energy Marketing Services Agreement form that Kaiser provided relates to the duties of the Marketer thereunder. ENA is in the business of buying and selling natural gas for its own account and as such any services it agreed to provide relating to most of the items under Articles III and IV would be subject to claims of abuse or violation of fiduciary duties. Specifically, ENA should not agree to perform the items under Article IV, Section A. Parts 1-8, 11; Article IV, Section B. Parts 1-2, 4, 6; Article IV, Sections C, E, and F. Otherwise, ENA sales obligations should be patterned in the manner set forth in the Enfolio Contract which provides safeguards for both parties in the event of a default by either. Therefore, we need to work from our Enfolio contract and I will get you some agency language for the confirm to address how we would share any transportation savings that we were able to obtain for them during the term of our sales transaction with them. Please call me after you have had a chance to review the contract.

George,

The meters listed below flow into a section of line in East Texas that feeds a paper mill. The gas currently being produced is rich, if we lose the market the gas production will have to be processed. Processing will cost HPL a minimum of \$250k. Here's the kicker, need this ASAP because the market wants to pull the trigger by Friday.

Here are the questions by meter, (this is important because processing options are different for every meter:

1. who are the supply contracts with 2. can HPL terminate the contract for gas quality or did we waive the quality requirements 3. what is the status of each contract, when does it terminate, is it in evergreen, what are the notification procedures 4. what is the price on each contract 5. what did the wells produce in the latest available month 6. last but not least, do the contracts let us charge the producer for costs incurred to bring the production up to pipeline quality

4112 9650 6027 5189 6411

Jim, are these meters correct?

Are there any questions I did not address?

Dan, Brent, Shari -

Please let me know as soon as possible what the status of your review of the True Quote site is as we are getting closer to the anticipated completion date of March 12 - Monday.

I have already prepared comments to the access agreements for the site, but need to have your comments, if any, to present all Enron comments.

Thanks for the assistance.

Dan, Brent, Shari -

We have been asked to review the provisions of Truequote - a third party trading platform - on which Enron may possibly trade. I have requested access for each of you to the site (www.truequote.com) and hope to have this for each of you a bit later today. In order to get you started, I have provided the general product descriptions below.

The use of this system is in conjunction with another deal we are currently working on with Truequote which will enable counterparties to hit Enron posted prices and transact with Enron through the Truequote site.

Timing on this matter is rather tight as we need to finalize all agreements and be ready to begin using the Truequote site on Monday, March 12. Therefore, please initiate a review of the descriptions pertinent to your area as soon as possible so that I can coordinate any comments you may have with my general comments to the access agreement. Travis is also working on a piece of this deal and will be interested in your comments.

Thanks to each of you. If you should need anything further, please do not hesitate to call me.

Officer's Certificate for EPOS

Sender	dan.hyvl@enron.com
Recipients	['larry.pardue@enron.com', 'doug.leach@enron.com']
File	hyvl-d/all_documents/672.

Doug, As we discussed, Larry Pardue has requested that I get you to sign an officer's certificate regarding the execution and delivery of the Fuel Supply Agreements. The document that he forwarded to me does not define the agreements that he wants you to certify as to. They are vaguely referred to as Transaction Agreements which have been delivered. As far as I know, he may be wanting a certification as to the Consent documents. If they get back to me, I will request that they modify the document to reflect the Fuel Supply Agreements only and that you are not aware of any reason why they would not be valid under New York law, that you are not aware of any lawsuit threatened against EPOS as a result of it entering into these Fuel Supply Agreements and that so far as you know, EPOS is not an investment company as such term is defined. I will let you know what Larry is able to modify. ----- Forwarded by Dan J Hyvl/HOU/ECT on 12/14/2000 10:41 AM -----

Dan, The Campbell county clerk refused to record the State of WY Lease because it does not contain an acknowledgment. The clerk, however, said that they would record a certified copy. The State Land Office no longer provides certified copies of their oil and gas leases, ergo, we could not record a certified copy of the lease.

If you want to record the lease, I'll have Gregg Colton at Pioneer Oil and Gas send the original lease to you to be recorded as an attachment to an affidavit of identification. At this stage of the process, I think it more expeditious for you to control that process too.

Short of recording the lease, you can confirm the ownership of the lease through the WY Office of State Lands and Investments, Phone # 307 777 7331; fax 307 777 5400; email slfmail@missc.state.wy.us.

EOW can send it for recording also as an attachment to an affidavit but the recording process is slow in the county because of the tremendous volume of recording transactions ie., 2 weeks plus.

Your call.

Brent -

Attached are the spreadsheets proposed by HoustonStreet for the short descriptions. The concept with the attached is that HoustonStreet will post the spreadsheets to the website and use them to ensure that customers can identify - by

cross-checking the spreadsheet - the description applicable to the price/product. In other words, this spreadsheet is intended to give the customer a cross-reference list between our description and the matching HoustonStreet description.

Please take a look at this at your convenience and let me know your thoughts. I understand through Bob Shults that there is some urgency to this review. Any assistance is appreciated.

Health Tips and News The Straight Dope On Food, Health, & Exercise:

Q: I've heard that cardiovascular exercise can prolong life. Is this true? A: Your heart is only good for so many beats, and that's it. Everything wears out eventually. Speeding up your heart will not make you live longer; that's like saying you can extend the life of your car by driving it faster. Want to live longer? Take a nap.

Q: Should I cut down on meat and eat more fruits and vegetables? A: You must grasp logistical efficiencies. What does a cow eat? Hay and corn. And what are these? Vegetables. So a steak is nothing more than an efficient mechanism of delivering vegetables to your system. Need grain? Eat chicken. Beef is also a good source of field grass (green leafy vegetable). And a pork chop can give you 100% of your recommended daily allowance of vegetable slop.

Q: Is beer or wine bad for me? A: Look, it goes to the earlier point about fruits and vegetables. As we all know, scientists divide everything in the world into three categories= : animal, mineral, and vegetable. We all know that beer and wine are not animal, and they are not on the periodic table of elements, so that only leaves one thing, right? My advice: Have a burger and a beer and enjoy your liquid vegetables.

Q: How can I calculate my body/fat ratio? A: Well, if you have a body, and you have body fat, your ratio is one to one. If you have two bodies, your ratio is two to one, etc.

Q: At the gym, a guy asked me to "spot" for him while he did the bench press. What did he mean? A: "Spotting" for someone means you stand over him while he blows air up your shorts. It's an accepted practice at health clubs; though if you find that it becomes the ONLY reason why you're going in, you probably ought to reevaluate your exercise program.

Q: What are some of the advantages of participating in a regular exercise program? A: Can't think of a single one, sorry. My philosophy is: No Pain-No Pain.
