File	kaminski-v/deleted_items/1371.

Jeff,

Chris told me you are helping us to update FEA @Energy2.1. What is status now ?

We are testing FEA storage model, could you install the license key for the storage model ASAP because it will be expire in 20 days. So please help ! If you could get it done today

Zimin

From: "Sue Choi" <sue@fea.com>@ENRON
[mailto:IMCEANOTES-+22Sue+20Choi+22+20+3Csue+40fea+2Ecom+3E+40ENRON@ENRON.com] Sent: Thursday, May 31, 2001 6:28 PM To: Lu, Zimin Subject: storage beta

Hi Zimin,

This key should be installed on your FEA license server.

Server code: 30784/8254654498510533729072764 Expiration date: Fri Jun 22 23:59:59 2001 (22.32 days from now.)
Key: 7218 2803 2744 2904 4151 1632 9

If you currently do not have any FEA software installed on your PC, install any FEA product on your PC and select 'product purchase' and 'use license server from my network'.

The attached zipped file contains a template, the Excel add-in and documentation. After the key has been installed, simply open the template and double click on the energy32_5.xll to activate the program.

Feel free to contact me with any comments or questions.

Best,

Sue

Oh Dear!

I thought it was all straight. EB1931 was my room on the original floor plan, but somehow they changed the numbers. We were all packed, everything was ready for the move and I just happened to come to the 19th floor the day of the move and noticed that they had renumbered all of the rooms! The move team hurriedly put stickers (with the old numbers) on the doors of each room.

I am now in EB 1961. Vince Kaminski is in 1962. If you need the names for all of the other rooms, let me know.

Sorry!

To: Shirley Crenshaw/HOU/ECT@ECT cc: Subject: Re: Rent R/C Updates - 19th Floor & 29th Floor

Shirley,

Although the rent for your locations on the 19th floor has been updated, I've just received a relocation update for some folks moving from the 45th floor to the 19th floor tonight. The odd thing is that among many other locations, the following locations were included (which you've already requested be assigned to 0011/100038):

EB 1930 EB 1931 EB 1932 EB 1933 EB 1934 EB 1935 EB 1936

Please let me know if they should stay assigned to your group or should they be assigned to this other group's R/C.

Thank you.

Jo Ann x35957

ABSTRACT:

SUBJECT AREAS: Risk management, financial innovation, options and derivatives. CASE SETTING: 2000, U.S.

In October 2000, the chief financial officer of Pacific Northwest Electric (PNW) is considering whether to use weather derivatives to reduce the weather-related risk in the volume of megawatt hours (MWh) sold.

The (A) case may be used to stimulate student discussion of how the derivative contracts work, why one might want or not want to take such a contract, and how one would decide whether to use the weather protection. No prior exposure to options or derivatives is needed for this discussion; indeed, the case may be used as an introduction to options.

The (B) case involves valuing the available contracts and deciding, which, if any, is the best contract for PNW. Spreadsheet simulation can be used to determine the probability distribution of the payout of the contract and the probability distribution for the net operating contribution including the contract payout, which is the basis for comparing alternatives. It is instructive for the students to think about what would be the ideal contract to reduce exposure to the greatest extent. This pushes students towards the optimal hedge ratio.

Specific learning objectives of these cases include these:

- to expose students to the cutting edge in financial innovation
- to illustrate the use of options to reduce business risk
- to challenge the students to value options where the Black-Scholes model cannot be used, and simulation can be readily employed
- to experience the perspective of top management in risk management activities.

"Dave Boone" <dboone@sweci.com> on 05/18/2000 12:47:41 PM To: <Vince.J.Kaminski@enron.com> cc: Subject: 45 MW

PROPOSAL FOR THE SALE OF CAPACITY AND ENERGY

Buyer: _____

Seller: Southwestern Electric Cooperative ("SWEC")

Facility: SWEC's St. Peter Project ("St. Peter"), in Fayette County, Illinois.

Effective Date and Term: The term shall be June 1, 2001 through May 31, 2004

Project Configuration: New gas fired single cycle 45 MW GE LM 6000-PC with Enhanced Sprint option.

Product: Capacity, associated energy and ancillary services.

Firmness: Capacity and energy, as offered hereunder, shall be considered unit firm.

Point of Delivery: The Point of Delivery for capacity and energy shall be at the generator bus bar interface at the high voltage side of the St. Peter switchyard substation located at the St. Peter plant ("Into Ameren").

Contract Quantity: SWEC will guarantee delivery of 45 MW at the delivery point although actual capacity could be 47 MW or more.

Heat Rate: SWEC will guarantee a heat rate of 9,750 Btu/kWh for all MWh's scheduled and received by BUYER

Energy Charge: BUYER shall pay to SWEC \$3.50/MWh for all energy purchased for associated variable O&M.

Capacity Charges: \$8.40/kW-month

Fuel Supply: BUYER shall procure, nominate, schedule and deliver the natural gas necessary to generate the energy requirements. BUYER shall pay all applicable transportation costs and taxes required to deliver natural gas to the meter at the St. Peter plant.

Start Up: In the event the St. Peter plant is not available by June 1, 2001, the capacity payment to be paid by BUYER will be reduced by \$8,000/day (the "Capacity Credit") for each day, Monday through Friday, that the St. Peter plant is not available after June 1, 2001. In the event the reduction exceeds the monthly capacity payment, the amount of penalty in excess of the monthly capacity payment shall be applied pro-rata to the remaining months in the year the deficit occurred. For purposes of the Transaction Agreement, the term "available" shall mean the St. Peter plant is capable of producing 45 Megawatts of electric power at the Delivery Point. Energy Scheduling: BUYER shall have the right, but not the obligation to notify SWEC of its intention to receive energy with a minimum of four hours notice prior to delivery. When scheduled, energy must be taken a minimum of 4 hours. Such scheduled hours shall not be included as Scheduled Hours in the calculation of the Annual Capacity Payment Refund below. In the event BUYER Schedules Hours for energy delivery on a Business Day (Monday through Friday) ahead basis by 2:00 PM CPT and the St. Peter plant is unavailable for such Scheduled Hours, BUYER shall reduce its Annual Capacity Payment to SWEC on a pro-rata basis for each Scheduled Hour that the plant is unavailable through an Annual Capacity Payment Refund. For purposes of this provision, the Annual Capacity Payment shall be pro-rated over the number of Scheduled Hours in each year as follows: $ACPR = [(Yearly\ Scheduled\ Hours - Yearly\ Delivered\ Hours) / Yearly\ Scheduled\ Hours] \times (Capacity\ Payment \times 12)$. In the event BUYER has scheduled and is receiving energy on an intra-day basis and SWEC's unit becomes unavailable, no reduction in capacity payment shall occur. However, SWEC shall make a commercially reasonable effort to deliver the scheduled energy. Scheduled Maintenance: SWEC shall not schedule any routine scheduled maintenance on the St. Peter plant during the period beginning May 1 through September 30 of each year. Scheduled Maintenance shall be defined as the shutdown of a generating unit, transmission line, or other facility, for inspection or maintenance, in accordance with an advance schedule.

Required Maintenance: Any required maintenance during the period beginning May 1 through September 30 of each year shall be coordinated between SWEC and BUYER.

Transmission: BUYER shall purchase and arrange for all necessary transmission from the Delivery Point

Response Due Date: May 31, 2000

Vince,

Good morning. Unfortunately I'll be in Milwaukee visiting Harley-Davidson about a book revision project both Thursday and Friday. How about early next week. I appreciate your patience with me. When you suggested a time last week I was "unprepared" and embarrassed to call and expose my ignorance. Since then I have re-read the Enron Gas Services case and have a pretty good feel for how you guys have melded the physical and financial sides of the business. The other theme that I have heard many Enron speakers use is the "de-regulation" of markets. This certainly played a factor in the power business and presumably was behind the water business.

If you'll let me know when it's convenient to call next week I'll have some notes put together. I'm teaching a class for a colleague on Monday so anytime after that is great.

Thanks and hope you had a pleasant trip.

John

p.s. I saw that the Univ of New Orleans has an Energy Finance endowed chair for a financial economist open. If you ever decide to move back to the life of poverty of an academic I would love to recommend you for such a post.

ABSTRACT: Event risk is the risk that a portfolio's value can be affected by large jumps in market prices. Event risk is synonymous with "fat tails" or "jump risk". Event risk is one component of "specific risk", defined by bank supervisors as the component of market risk not driven by market-wide shocks. Standard Value-at-Risk (VaR) models used by banks to measure market risk do not do a good job of capturing event risk. In this paper, I discuss the issues involved in incorporating event risk into VaR. To illustrate these issues, I develop a VaR model that incorporates event risk, which I call the Jump-VaR model. The Jump-VaR model uses any standard VaR model to handle "ordinary" price fluctuations and grafts on a simple model of price jumps. The effect is to "fatten" the tails of the distribution of portfolio returns that is used to estimate VaR, thus increasing VaR. I note that regulatory capital could rise or fall when jumps are added, since the increase in VaR would be offset by a decline in the regulatory capital multiplier on specific risk from 4 to 3. In an empirical application, I use the Jump-VaR model to compute VaR for two equity portfolios. I note that, in practice, special attention must be paid to the issues of correlated jumps and double-counting of jumps. As expected, the estimates of VaR increase when jumps are added. In some cases, the increases are substantial. As expected, VaR increases by more for the portfolio with more specific risk.

Keywords: Specific risk, market risk, jump risk, jump diffusion, default risk

We have been able to secure rooms at the Claremont Hotel in Berkeley. Please note the confirmation numbers listed below. Thanks!

Claremont Resort and Spa - Berkeley 41 Tunnel Road Berkeley, CA 94705 510-843-3000

FROM OAKLAND AIRPORT: Go straight out of the airport on Airport Blvd. Turn right on Hegenberger Road. From Hegenberger follow signs for 880 North. Follow Hwy 880 North and follow signs for Hwy 24 to Walnut Creek. Take the Claremont Avenue exit, turning left at the bottom of the exit onto Claremont. Turn right on Ashby Avenue (5th stoplight) and the Hotel's entrance is two blocks ahead on the left.

FROM SAN FRANCISCO AIRPORT: Follow signs for Hwy 101 North to San Francisco, take Hwy 80 East to the Bay Bridge to Oakland. Cross Bay Bridge on Hwy 80, follow to 580 East, and exit onto HWY 24 to Berkeley/Walnut Creek. Follow Hwy 880 North and follow signs for Hwy 24 to Walnut Creek. Take the Claremont Avenue exit, turning left at the bottom of the exit onto Claremont. Turn right on Ashby Avenue (5th stoplight) and the Hotel's entrance is two blocks ahead on the left.

Subject: Cal Berkeley General Presentation Confirmation - 10/16/00

Cal Berkeley General Presentation Monday, October 16th

This note is to confirm that you are scheduled to attend the Cal Berkeley General Presentation on Monday October 16th. This e-mail should contain any information that you need to know pertaining to your trip. Please print out a hard copy and bring with you in case of emergency. If you have any questions, there is a list of contacts listed below.

Once again, thank you for offering to help with technology recruiting at Cal Berkeley. See you on campus!

Lara

The General Presentation will be held:

Monday, October 16th The Faculty Club Seaborg Room - 2nd Floor 7:00 p.m. to 9:00 p.m. **Please plan on arriving at the General Presentation by 6:00 p.m.

The General Presentation is designed to educate the students on Enron and the Global Technology Track. Following the presentation we will invite the students to ask questions about Enron and the Global Technology Track. Please plan to arrive at the General Presentation by 6:00 p.m. It is business casual attire.

FLIGHT ARRANGEMENTS:

You are responsible for scheduling your own flight arrangements with your preferred airline provider. Please schedule your flight to arrive to the San Francisco airport on Monday, October 16th. Please remember that there can be significant traffic over the Bay Bridge and to get into town at least an hour prior to the event. Please make all flight arrangements through the Travel Agency in the Park so that we are able to take advantage of discount fares. If you do not have a representative that you currently use at the Travel Agency in the Park - feel free to contact Liz Mendiola at 713-860-1140.

RENTAL CAR ARRANGEMENTS:

Once again, you are responsible for scheduling your own rental car arrangements with your preferred provider. Your Travel Agency in the Park representative should be able to assist you with rental car reservations.

HOTEL ARRANGEMENTS:

Hotel reservations are currently being made by our representative at the Travel Agency in the Park.

As soon as we have confirmation numbers, I will let you know.

San Francisco Airport to The Faculty Club

Take 101 Northbound Exit to San Francisco/Oakland Bay Bridge Exit to 1-80 East Exit on University Ave. East on University Avenue for 1.5 miles to Oxford St. Right on Oxford St., left on Durant Ave., left on Piedmont You will see parking on the right side

Once again, thank you so much for helping with the General Presentation. Below are some last minute tips to keep in mind:

Please remember to dress business casual. Please remember to bring some business cards for students. I have attached a pdf version of the Global Technology Track brochure. Please forward all expense receipts to Grace Garcia. She will handle any expenses incurred for this recruiting trip including: flight costs, hotel, car, food, valet, etc. However, you must turn in some sort of receipt - so be sure and save them!

Ashley Baxter work: 713-853-3589 cell: 281-793-0567

Lara Berry work: 713-345-8320 cell: 713-857-1034

Grace Garcia work: 713-853-7252

Simone Lewis work: 713-853-1645

reminder

Sender	chonawee@umich.edu
Recipients	[j.kaminski@enron.com]
File	kaminski-v/deleted_items/597.

Dear Vince,

This is a kindly reminder for the recommendation letters for my academic faculty application. There are total of 11 schools that I am applying. Four of them will contact you and ask for the recommendation letter only if they want to pursue further (Prof. Nau from Duke is one of them). For the other seven schools, they have asked for the recommendation letters at the first stage of the application process. The deadline for these seven schools (listed below) is next Tuesday (1/15/02). I do understand totally on how busy you are at this critical moment of our group. For your convenient, I have attached the old recommendation letter you gave me for my greencard application in August. We can just use this letter if you agree.

1) Stanford Business School

Please email Letters of Recommendation as either PDF files or MS Word documents to
faculty_recruiter@gsb.stanford.edu.

2) Stanford MS&Eng Production & Operations Management:

Professor Hau Lee Department of Management Science & Engineering Terman Engineering Center, Room 350 Stanford University Stanford, CA 94305-4026

3) Purdue IE:

Professor N. Prabhu Chair, Industrial Engineering Faculty Search Committee 1287 Grissom Hall Purdue University West Lafayette, IN 47907-1287

4) Northwestern IE&MS:

Please send an electronic version to Prof. Mark S. Daskin at m-daskin@northwestern.edu and please follow up with a signed original letter to him at Prof. Mark S. Daskin Chairman, Faculty Recruiting Committee Department of Industrial Engineering and Management Sciences Northwestern University Evanston, IL 60208-3119

5) Stanford MS&Eng Information Science and Technology:

Chair of the IST Search Committee c/o Pat Emslie, Search Coordinator Department of Management Science & Engineering 350 Terman Engineering Center Stanford University Stanford, CA 94305-4026

6) UC Berkley IEOR:

Search Committee Chair Department of Industrial Engineering & Operations Research University of California 4135 Etcheverry Hall Berkeley, CA 94720-1777 Telephone: (510) 642-5484 FAX: (510) 642-1403

7) Cornell OR&IE

ABSTRACT: Fundamental properties of conditional value-at-risk, as a measure of risk with significant advantages over value-at-risk, are derived for loss distributions in finance that can involve discreteness. Such distributions are of particular importance in applications because of the prevalence of models based on scenarios and finite sampling. Conditional value-at-risk is able to quantify dangers beyond value-at-risk, and moreover it is coherent. It provides optimization shortcuts which, through linear programming techniques, make practical many large-scale calculations that could otherwise be out of reach. The numerical efficiency and stability of such calculations, shown in several case studies, are illustrated further with an example of index tracking.

Keywords: Value-at-risk, conditional value-at-risk, mean shortfall, coherent risk measures, risk sampling, scenarios, hedging, index tracking, portfolio optimization, risk management

Vince,

I got the zipped version fine. Thanks The only outstanding items relate to the complete references for your papers (the book publisher and dates). I spoke with Shirley this morning and she is tracing this down for me.

I re-read the Gas Market paper segment on the take-or-pay contracts and corrected my "oversight". By the end of the day I hope to have all the corrections that you gave me incorporated in the manuscript. We will make them on the galley pages

of the article when it arrives.

thanks again for all your help.

John

p.s. I also spoke with Mary Joyce (she returned my earlier call a week ago when I was trying to ask Cindy something). All is well. At 10:15 AM 2/5/01 -0600, you wrote:

John, HTML version of Enron article: Vince (See attached file: b3719001.htm)(See attached file: b3719003.htm)(See attached file: b3719004.htm)(See attached file: b3719005.htm)(See attached file: b3719006.htm)(See attached file: b3719007.htm)(See attached file: b3719008.htm)(See attached file: b3719009.htm)(See attached file: b3719010.htm) "John D. Hi Vince,

Thank you again for being my reference. If you remember you wrote one letter for me already for my greencard application. So you might want to refer to it to save your time. Here is the list of schools that I am applying.

1) Northwestern IE&MS 2) UC Berkley IEOR 3) Stanford MS&Eng Information Science and Technology 4) Stanford MS&Eng Production & Operations Management 5) Princeton OR&FE 6) Cornell OR&IE 7) U.of.Wisconsin, Madison IE 8) Purdue IE 9) UT Austin OR&IE

and business schools 1) U. of Michigan Business school 2) Stanford Business school 3) University Of California, Berkeley Business school 4) Duke Fuqua

Some schools will contact you directly for the reference letter. There are seven schools, however, that we need to send the reference letters to them. Please send them at your earliest convenient. I am truly sorry for this rush. I was busy on job searching to find a new company to sponsor my visa so I did not have time to prepare the academic applications.

Deadline: ASAP: Please send the reference letter at your earliest convenient.

1) Stanford Business School

Please email Letters of Recommendation as either PDF files or MS Word documents to
faculty_recruiter@gsb.stanford.edu.

2) Stanford MS&Eng Production & Operations Management:

Professor Hau Lee Department of Management Science & Engineering Terman Engineering Center, Room 350 Stanford University Stanford, CA 94305-4026

3) Purdue IE:

Professor N. Prabhu Chair, Industrial Engineering Faculty Search Committee 1287 Grissom Hall Purdue University West Lafayette, IN 47907-1287

4) Northwestern IE&MS:

Prof. Mark S. Daskin Chairman, Faculty Recruiting Committee Department of Industrial Engineering and Management Sciences Northwestern University Evanston, IL 60208-3119

Deadline: 1/15/02

5) Stanford MS&Eng Information Science and Technology:

Chair of the IST Search Committee c/o Pat Emslie, Search Coordinator Department of Management Science & Engineering 350 Terman Engineering Center Stanford University Stanford, CA 94305-4026

6) UC Berkley IEOR:

Search Committee Chair Department of Industrial Engineering & Operations Research University of California 4135 Etcheverry Hall Berkeley, CA 94720-1777 Telephone: (510) 642-5484 FAX: (510) 642-1403

7) Cornell OR&IE

Faculty Search Committee, School of ORIE, Rhodes Hall, Cornell University, Ithaca, NY 14853.

Thank you very much, Vince. I really appreciate it. -Chonawee.

Vince:

Ken Rice received a call through a friend's referral from Dr. Tom Limperis (a professor at the University of Michigan). Dr. Limperis has developed a statistical database management system he would like to show Enron. Ken would like you to return this call on his behalf. He feels that you are probably the only person who will understand and be able to determine if Enron should have an interest.

Do you mind returning this call? Please let me know.

Thanks!

MIT/Sloan Team:

I am pleased to announce that the two candidates below were extended offers for Enron's Summer Associate Program:

Hakeem Sanusi 617-576-7570 hsanusi@mit.edu Offer Pending Jozef Lieskovsky 617-905-5633 jlieskov@mit.edu Offer Pending

As we discussed, there were a number of excellent candidates that we met while interviewing for Summer Associates. In an effort to strengthen our name on campus and to cultivate relationships with these individuals, we want to make a concerted effort to keep up with them for our Fall recruiting effort. I have attached a template for us to use and refer to for both the offers and the cultivations. This serves as a two-fold communication tool: a tool for the team members to use in contacting the candidates and a tool for me to use when tracking any issues or concerns the candidates may have. Please feel free to add to it and e-mail it back to me or give me a call (EXT. 37632) and I will update it.

I will also be using this to report back to A&A management.

Below are the names of the candidates that made it to the second round. We want to call on all of them.

Blaise Nietcho 617-225-2598 blaise@mit.edu Rocco Paduano 617-742-2085 rpaduano@mit.edu Samuel Vainstein 617-266-7257 samuva@mit.edu Diego Silva Robert 617-441-6999 dsilva@mit.edu

Should you have any questions, please feel free to give me a call.

Thanks,

Karen Marshall Recruiting Manager

Dear Vince,

I am curious whether you are familiar with the attached Darden school case on Enron... FYI.

John Martin and I would really like to try to interest you in coming to campus sometime this fall to present a faculty seminar. Selfishly, I would also like to try arrange such a visit so that I can have you present to my risk management class. I called Shirley Crenshaw today, and she mentioned that you were on your way back from Poland, so I hope we'll be able to talk soon about the possibility of a visit this fall. The best number for reaching me is 512-751-3709.

Thanks,

Jim Garven

Cole/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Jirayut
Rungsrithong/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Vince J Kaminski/HOU/ECT@ECT Subject:
Dragon Curves

Maureen,

We are currently in the RAC process for Dragon, and I understand RAC has requested updated curves. We are currently using the following country curves you provided previously:

- 1) Philippines: 90700
- 2) Thailand: 51500
- 3) Korea: 62300
- 4) China: 50900
- 5) Taiwan: 20800
- 6) US: 81700

I agree in principal with the methodology and understand the approach, given the info you have. However, you have just provided a new curve for Thailand, which, was just provided to us in May. Given the methodolgy you explained earlier, I find it hard to believe we would see such a huge impact (35% decrease on a 25 year PV basis) on our COCO valuation (Thai project).

It appears that this Thai curve is not using PPP, and I'm not saying your analysis has to be PPP, but most would expect that given the varying economic environments and market places we deal with, PPP is a widely accepted practice/method, as we cannot predict the future. Please provide us a detailed reconciliation among the two curves and the Country rational in coming up with the revised curves from 4 months ago.

Please contact me if you have any questions at 011-852-2588-1234.

Regards,

Ramon

Vince,

Please send a package of article reprints to the attention of Joan Payne at the following address:

Joan Payne Department of Finance E. J. Ourso College of Business Administration Louisiana State University 2163 CEBA Baton Rouge, LA 70803

In your package, please indicate which presentation each reprint is intended for; i.e., whether it is for student consumption on Thursday afternoon or finance faculty/doctoral student consumption on Friday morning. Joan can make sure that we get the right number of copies produced for the respective audiences.

Concerning powerpoints-- just email these files to me and if it is all right with you I will make them available for download by the faculty and students on the class and research seminar webpages.

Thanks again for being willing to visit LSU and present your knowledge to our faculty and students.

Sincerely,

Jim Garven

At 01:39 PM 1/18/2000 +0000, you wrote:

Jim, I can send you copies of the reprints of some papers I wrote or co-authored. Please, let me know how many copies do you need. I shall prepare power point presentations for the student meeting and for the faculty meeting. For the students: review of my group (things we work on) with an intention of generating some interest among the students and soliciting resumes. For the

faculty meeting: challenges that energy markets pose to financial modeling. I shall be able to E-mail the Power Point presentations later this month. Re: Action Learning Project Information

Sender	spradlin@rice.edu
Recipients	['vince.j.kaminski@enron.com']
File	kaminski-v/rice/224.

Vince,

Thanks for the information.

Kathy

At 01:03 PM 1/8/01 -0600, you wrote:

Kathy, Enron will be represented by myself (Vince Kaminski) and Kenneth Parkhill. Vince Kathy Spradling <spradlin@rice.edu> on 01/05/2001 05:04:21 PM To: (Recipient list suppressed) cc: chamberl@rice.edu, castro@rice.edu, spradlin@rice.edu Subject: Action Learning Project Information Dear Company Representative, We are pleased to announce that your company's proposal has been selected as a potential project in the Jones Graduate School of Management's Action Learning Project (ALP) Program. As indicated in the ALP brochure, company representatives are invited to attend the ALP Program Introduction and Student Networking Session on Wednesday, January 10. Please RSVP to Kathy Spradling, MBA Program Coordinator, at 713-348-3313 or e-mail her at spradlin@rice.edu by Monday, January 8 to let her know if you plan to attend the session. Please provide your company name and the names of representatives attending the session so nametags can be prepared. Dress is business casual. Below is the schedule of events: 8:30 9:00 a.m. ? Continental Breakfast and setup of your company table ? Farnsworth Pavilion (located in Rice Student Center) 9:00 9:45 a.m. ? Introduction and Program Overview with company representatives, ALP administration and faculty liaisons ? Farnsworth Pavilion (located in Rice Student Center) 10:00 12:00 p.m. ? Student Networking Session with company representatives and first-year students ? Grand Hall (located in Rice Student Center) The ALP Program Introduction and Student Networking Session will be held in the Rice Student Center (numbers 10 and 11 on the campus map sent with your acceptance letter). Please contact Kathy Spradling if you need an additional map faxed to you. There is a large amount of construction taking place on campus. Once the Visitor's lot near the Rice Memorial Center is full, we recommend you park in the stadium lot in the designated Visitor area and take the shuttle bus to the Rice Memorial Center. Make sure to let the bus driver know your destination. The MBA Program Office has reserved the Grand Hall for the Student Networking Session. Each company represented will have a table set up with signage for your company. You may bring additional materials you feel might be of interest to students such as company brochures, articles and packets. Due to the limited space, we are discouraging the use of display boards in the networking session. Unfortunately, no

internet connections will be available for use during the session. Again, thank you for your interest in Rice. We look forward to working with you, and hope to see you on Wednesday, January 10. Hello Mr. Kaminski,

I am available to meet with you for lunch this week on Tuesday (2/1), Wednesday (2/2). or Friday (2/4). Which day would be more convenient for you? Please let me know.

I am planning to meet with Mr. Chris Holmes (introduced by a mutual family friend) of Enron's Energy Services next week. Mr. Holmes also suggested that I meet with you.

Looking forward to the meeting. I will call you to follow up. For convenience I am attaching my latest resume.

Thank you.

Subject: ANNOUNCEMENT: Executive Program on Credit Risk Modeling

Credit Risk Modeling for Financial Institutions February 27 - March 2, 2000 in London, at the Lanesborough Hotel

Risk management specialists, Stanford Business School professors of finance Darrell Duffie and Kenneth Singleton will be repeating their successful executive program on Credit Risk Pricing and Risk Management for Financial Institutions. The course is created for risk managers, research staff, and traders with responsibility for credit risk or credit-related products, including bond and loan portfolios, OTC derivative portfolios, and credit derivatives.

This program includes: * valuation models for corporate and sovereign bonds, defaultable OTC derivatives, and credit derivatives * models for measuring credit risk, with correlation, for portfolios * analyses of the empirical behavior of returns and credit risk * the strengths and limitations of current practice in modeling credit risk * practical issues in implementing credit modeling systems

Application Form: Credit Risk Modeling for Financial Institutions London, February 27 - March 2, 2000

This form may be completed and returned by email, or may be printed and sent by fax to:

Stanford GSB Executive Education Programs Fax Number: 650 723 3950

You may also apply and see more detailed information by visiting our web site at:

Mr. Kaminski;

I will fax the Faculty Information Sheet to you so that you may check for accuracy. Also, I will fax your formal offer letter to you this afternoon.

Please allow by Dec. 15 for your paperwork to be processed. After that date, you should contact Bill Ciminelli, Director of Administration, (713) 348-5377. Bill can assist you with assigning your mailbox and office space, membership for Faculty Club Card (campus cafeteria for faculty and staff only!), Rice I.D. card, and parking decal. Also, Suzana Vazquez, Bill's Assistant, (713) 348-3736, can assist you with any materials that you want to be copied and/or distributed to your students.

If you need to order any required or suggested book(s) for your course, please contact the campus bookstore at (713) 348-4052. The bookstore does not order examination copies for faculty. You must contact the publisher if you are wanting an examination or desk copy of a book.

If you have any questions, please feel free to contact me at my office (713) 348-3733 or email.

Mike,

Here are the particulars of the trial run of our service, including the times for the telephone contact from WSI. Remember this will be a bilateral, not a conference, call.

On the ESAI side, while I will be out of town, Peter Ingraham (781 245 2036) is available to answer questions or take suggestions. We look forward to working with you next week.

Ed

-----Original Message-----

From: Shorter, Jeffrey [mailto:jshorter@wsicorp.com] Sent: Tuesday, July 25, 2000 11:36 AM To: Bosse, John; Ed Krapels (E-mail); Peter Ingraham (E-mail) Cc: Weather Effects Subject:

Ed,

We are set with a evaluation of the service covering the period from Monday to Thursday July 31 to Aug 3. We will activate the web access on Friday afternoon and initiate calls Monday morning. The call schedule is:

short range: 8:40 east coast time mid range: 9:20 east coast time

if there is a conflict with these times, please notify me. We will need a number to call into, typically we call directly onto the trading floor. The username and password are the same as the initial viewing:

username: enron password: stros00 (zero zero)

It is important to make the point this is for evaluation purposes since we are not under a contract with liability issues addressed.

I am sure Enron will love it like the rest of our clients!!

Dear Colleague:

I would like to call your attention to three fine Penn students on the job market this year, Sean Campbell, Clara Vega, and Canlin Li. Their interests and skills span time series econometrics, financial economics and macroeconomics. I have attached my letters of recommendation, which provide much more detail.

I hope that you will seriously consider interviewing them if their skill match your needs; please simply contact them directly if you want to do so and/or if you would like more materials from them (their contact information follows at the end of this email). In addition, please don't hesitate to contact me if I can be of further assistance in any way.

Finally, I hope that you will excuse the intrusion caused by this communication, but email is the least intrusive and most efficient way that I know to get the message out.

With best regards,

Frank Diebold

Dear Dr. Kaminski, I'm an economist (M.Sc., Caltech, Ph.D., Iowa) who has been working for the Alberta government for the last seven years on electricity deregulation in Alberta, Canada. I have been looking for research papers on the measurement and causes of price volatility in electricity markets.

As a policy maker, I am interested in the implications of government policy decisions on price volatility. As an economist who has had a hand in designing the electricity markets here, I am also interested in how the design of electricity markets and the associated institutions affect price volatility.

I've found two references to a seminar talk you have given recently at Berkeley and Carnegie Mellon called "Volatility of Electricity Prices - Measurement and Analysis of Underlying Causes." (I've also found a multitude of references to other work that you've done, but this seemed closest to what I'm looking for.)

Was there a paper associated with your talk that I could get a copy of? Any help you can give me on finding information on this topic would be greatly appreciated.

Thank you for your time.

Sincerely,

Sid Carlson

Frank,

Dec 14 would be better for us. We have already scheduled an internal presentation on December 7. Please, go ahead and make a reservation. The best place to stay is Hyatt Regency Downtown or Doubletree Downtown (within a walking distance to Enron). It is important to specify the downtown location for both hotels.

Dear Vince:

I was referred by Rita Hartfield of EBS. I am the Director of Marketing for the Digital Content Services Team (David Cox, Frank Bay, et. al.). We are identifying and evaluating features and functions that will be a part of the next generation Entertainment on Demand (EoD) product.

The e-mail I've excerpted below contains two links to a company that offers a "preferencing" service that we know is quite popular and important to entertainment consumers. I have some questions about the statistics, sampling methodology, explained variance etc. of the model that The StyleLogic group employs.

Do you have a member of your team that could assist on this project?

Thanks for your help,

Randall Hicks Director - Marketing Enron Broadband Services 1400 Smith Street - EB 4589A Houston, TX 77002 work - 713.853.9970 randall_hicks@enron.net

- Brad,

I would appreciate a chance to talk with you regarding Enron's VOD plans. We have developed movie selection and recommendation/prediction functionality that we can manage for EBS.

If you would like to read about what we have to offer, you may go to: <http://www.stylelogic.com/Predict>

I also invite you to see our functionality at: <http://www.reviewmovies.com/>

I look forward to a chance to speak with you at your earliest convenience.

Latha

Thanks for asking!

I'd like to leave San Francisco non-stop to Houston on United 1556 at 11:10 am Jan 9, arriving 4:44pm, then go to Austin on the late afternoon of the 10th (for a seminar at UT), then I need to get from Austin to San Francisco on the evening of the 11th. (There is a United flight 419 connecting through Denver that leaves Austin at 5:30 pm, connecting to United 409 out of Denver). If there is a non-stop from Austin to San Francisco or San Jose, that is even better. (United, my preferred, does not have a non-stop from Austin to the Bay Area.)

The cost will be shared 50-50 with U. Texas, if that's OK with you and them. I have copied the organizer of the seminar there, Professor Ron Kaniel.

Warm regards,

Darrell

Vince:

I attach a report, prepared under my direction by my research assistant, Dr. Taiichi Hoshino, now employed with Goldman Sachs, on the Enron storage valuation model that you asked me to review.

This report contains some details that you didn't ask for, but that your research staff might appreciate.

The model and software are appropriate to the task they are designed for, in my opinion, based on the code and the documentation that you sent. Some suggestions for potential improvement are noted in the attached report, but these are either minor or not critical to the current business objectives of the model, in my view.

If this email is not sufficient, or you would prefer a hard-copy opinion letter, please let me know.

Meanwhile, I hope life at Enron is as exciting as usual!

Sincere regards,

Darrell

PS I will bill you separately for my time (1.5 hours) and the time of Dr. Hoshino.

UT McCombs research project on online energy trading exchanges -

Sender	eronn@mail.utexas.edu
Recipients	['vince.j.kaminski@enron.com']
File	kaminski-v/notes_inbox/165.

Vince,

Greetings. I am forwarding to you the following research request from three of my Business School colleagues.

Best, Ehud

Dear Trustee of the Center for Energy Finance:

Three professors of the McCombs business school, Dr. Sirkka Jarvenpaa, Dr. Emerson Tiller, and Dr. Kerem Tomak are conducting a research project in alliance with the Center for Energy Finance on B2B online energy trading systems. All three researchers both conduct research and teach in the area of electronic commerce (strategy & policy, economics, and technology).

They are seeking your help at this time. They would like to interview an executive in your firm who is in charge of managing or participating in an online energy trading exchange. They are looking beyond the first-order effects of B2B exchanges-- benefits of dramatically reduced costs, greater access to buyers and sellers, and improved market liquidity -- to second order effects (e.g., redesign of broader firm processes, greater innovation, standardization, etc.) and broader organizational and environmental drivers and barriers (institutional and regulatory structures, associations, and alliances). This is a research project that aims to accumulate insight into firm capabilities and environmental complexities involved in B2B energy exchanges. At this time, they are focusing on one industry, energy trading. They are conducting interviews with owners and operators of proprietary exchanges as well as owners of member-based exchanges in energy trading.

The researchers would like you to kindly pass this request for a 45 minute phone interview to a person in your firm whom most closely deals with your firm's strategy for B2B exchanges. We would like to conduct the interviews during December and January. The appropriate executive or his/her assistant can directly contact Dr. Sirkka Jarvenpaa for scheduling the interview.

Thank you so much for your assistance and support.

Email: Sirkka.Jarvenpaa@bus.utexas.edu Phone: 512-471-1751 Mobile: 512-415-8570 Secretary: Glenda Lee, 512-232-6112, Glenda.Lee@bus.utexas.edu

Beth,

I enjoyed talking with you this afternoon regarding possible Enron/Argonne National Laboratory collaboration. As I mentioned, one of our divisions, Decision Information Sciences has built state of the art tools for modeling and simulating energy use. They have trained many country energy ministries on the use of their tools as well as solved complex energy technology issues.

I've attached a presentation which describes some of their capabilities in this area. Decision Information Sciences also has done much work in studying critical infrastructure issues in both gas and electric systems which also may be of interest. Finally, they have been pioneers in the development of agent based complex adaptive systems for modeling very complex systems that are impossible to view with over approaches.

I will also include a copy of my correspondences with one of your e-business groups under separate transmission.

Regards,

Stephan Lake Manager, Business Development and Marketing Argonne National Laboratory 630-252-5685 telephone 630-252-5230 fax

Sent: Friday, May 11, 2001 3:33 PM To: 'vkamins@enron.com' Subject: Invitation to Speak

Dear Mr. Kaminski:

Hope your day is going well. Philip Merrill suggested I contact you regarding a conference I'm organizing on Implementing the Commodities Futures Modernization Act. The conference will include sections on Single Stock Futures, Clearing and Trading Facilities. The latter section will include a session on the new electronic exchanges and I would like to invite Enron to speak on their electronic energy trading exchange.

The conference will take place September 20 - 21, 2001 at The Drake Hotel in Chicago. The session will be in the afternoon on Thursday, September 20. I expect the conference will draw 100 executives from broker dealers, futures commissions merchants, commodity trading advisors, commodity pool operators, introducing brokers, investment banks, exchanges, and clearing firms.

The Institute for International Research (IIR) is the world's largest international conference company with 120 different business units and 4,000 employees in 36 countries. Founded in 1973 by Irvine Laidlaw, the current Chairman, IIR

continues to provide unbiased, bleeding-edge business information through our conferences, workshops, seminars, and the Internet. For more information on IIR, please visit our website at <http://www.iirusa.com>.

A draft agenda is attached for your review. Please note it is a work in progress and I will be finalizing it over the next week. I welcome any feedback on how to improve the program, as well as any speaker suggestions.

Thanks again for your assistance. I'll follow-up with you next week, but please feel free to contact me in the interim with any questions.

Enjoy your weekend. Jennie D'Apice

"Masiello, Ralph" <ralph.masiello@caminus.com> 05/10 2:15 PM >>>

Richard, glad you found me.

Caminus (hit our web site, caminus.com) does software and consulting for energy trading and risk management. Given
 that the California utilities were forbidden to buy forward, much less hedge, etc., and now the state has to buy forward and
 hedge without much experience, we have been thinking that

they need help big time.

A special course on energy trading and risk management, especially if it emphasized the perspective of the side that has
 to fulfill retail load, might be very timely.

We could put together a good course and get a couple of non-Caminus speakers in as well.

What time frame would you be thinking about? PS - an alternate location that is in many ways preferable could be Houston, much of the industry is there

Hi Ralph,

Assuming this got through the rolling "brown-outs" greetings.

Since Felix retired and George moved to Illinois, we haven't done any power-related courses at UC Extension with the exception of that one course on deregulation a few years ago.

Given the serious energy problems around here, do you think it might be time for a course on the issues? I'd be delighted to discuss this if you do.

Best regards,

Dick Tsina

Dear Andreas,

Thanks for the very useful response and information on positions. I have handed over primary responsibility for metals VaR to Kirstee Hewitt (at least as far as London is concerned) and she will follow up on the points you kindly reported, although I am of course available to assist where necessary. Tanya will remain the point of contact for VaR modelling in Houston, and of course Kirstee and Tanya will work together on this to resolve these and further issues. I would be happy to help set up meetings for you in the London office when you visit next week, with Kirstee, myself and anyone else that you would like to meet with and we very much look forward to your visit - please let me know if you need any help with the arrangements.

Regards,

Anjam

To: Anjam.Ahmad@enron.com, Kirstee.Hewitt@enron.com cc: Bjorn_Hagelmann@mgusa.com

Subject: Re:VARMODEL_Live.XLS

Anjam, thanks for your VAR Model. I would like to point out the following: 1) Position data: I noted that the outright (longs + Shorts) for copper include positions which we should not use, i.e. R. Wolff quantities. This positions are imputed into the system at their integrity (some legs/hedges are missing) This affects copper and Lead position for now. The issues should be have been sorted out by the end of this month, ie next week. So in Copper you have 25,487 mt to much and with Lead you have 13,579mt to much.(as of June 19)

2) Looking at copper position you calculate a VAR of -3,100,568 with a total outright of 63.765 mt. This seems too low. if I calculate $63765 \times 1807 \times 3.99\% = 4.218$ mil. US\$. VAR (outright qty x price levelx risk factor, riskfctr as per Mercur). In my view we have been understating VaR in Mercur because we do not consider the spread position correctly (i.e. in detail). On a position like that I would expect a figure of around 6 mil US\$. I guess the issue is in the volatility and in the holding period.

3) your correlation matrix for the commodities is not final i assume as many fields are blank.

Lets talk tomorrow on the phone.

Attached please find the Position summary for the last week #30 (since June 19) as requested by Kirstee. Re: Hello from Vince Kaminski at Enron

Sender	ashley.baxter@enron.com
Recipients	['donna.jones@enron.com', 'vince.kaminski@enron.com']
File	kaminski-v/all_documents/4563.

Vince,

Thank you for forwarding the following messages. I am sorry that I am just now getting back to you, my lotus notes was down all afternoon yesterday.

We currently have the Cal Berkeley General Presentation set for Wednesday, October 18th at 7:00 p.m. which works out well because it is just prior to the time deadline for students to submit their resumes. The General Presentation is a general overview of Enron, the Program, the interview process, as well as a chance for students to meet and chat with Enron reps. Since this is the first year that we are recruiting from Cal Berkeley, I think that it is important that I attend this event on campus so that I can answer any interview process questions. I will check the schedule and see if it is possible to move the presentation to the 23rd. The only negative is that I will not be able to attend because I will be conducting interviews at Rice that day. Also, it is very difficult to find a location to hold the presentation, and I need to check on location availability on the 23rd.

However, I do think that we should take advantage of the seminar on campus. This may mean that they are two separate trips to campus. Perhaps, we can also set up some other presentations for the 23rd or even the Monday prior. Although I would like to be able to attend the class/seminar presentations, I don't think that it is as vital as the General Presentation.

What are your thoughts?

Thanks, Ashley

RiskCenter.com/Flatiron Group Alliance Announce GARP Risk Review

Sender	helland@riskcenter.com
Recipients	['helland@riskcenter.com']
File	kaminski-v/discussion_threads/2716.

FOR IMMEDIATE RELEASE

CONTACT: Tom Groenfeldt The Flatiron Group Corp. 973-925-9748 973-925-9681 fax groenfeldt@aol.com

GARP Leverages RiskCenter.com/Flatiron Group Corp. Alliance to Produce GARP Risk Review and Daily Online Risk News

New York, New York (01 January 17th, 2001) After a competitive bidding process, the Global Association of Risk Professionals (GARP) has chosen an alliance formed by RiskCenter.com and the Flatiron Group Corp. to produce and manage GARP's (www.garp.com) new proprietary online and print magazine publishing efforts.

GARP is the industry association that represents risk managers in the securities industry. To serve these professionals, GARP has publications, events, advocacy and 35 regional chapters worldwide. GARP Risk Review will serve as the flagship communication piece that unites all of these elements. In the alliance, RiskCenter.com will provide the daily risk management news coverage on the GARP Web site. The Flatiron Group Corp. will produce and publish the hard copy magazine called GARP Risk Review.

"We are very excited about the publication of the online risk management news and the GARP Risk Review," says Adam Davids, CEO GARP. "Both the daily news and the GARP Risk Review will provide our members with the information they need to stay current on both a periodical and real-time basis. With information delivered in print and online, readers will be able to get the information that they need in the method that works best for that information. GARP represents a community of risk managers that are changing the definition of their roles and developing their profession rapidly. We are extremely

pleased to advance the growth of our profession with this excellent marriage of content and medium through the combined efforts of RiskCenter.com and the Flatiron Group."

RiskCenter.com, a financial risk management content media company, syndicates financial risk management news stories (www.riskcenter.com) focused on six risk categories--credit, market, operational, eCommerce, energy and commodity--that help financial executives make better decisions. The Flatiron Group Corp. (www.flatirongroup.com) publishes Windows in Financial Services, a quarterly magazine covering the expanding use of Microsoft technologies in the financial enterprise, and an accompanying newsletter for developers working in financial services.

"I think our combination of news delivered over the Internet in conjunction with the GARP Risk Review publication will play an important role in educating and informing risk professionals around the world," says Joseph Viviani, president and publisher, the Flatiron Group. "With our GARP affiliation, we will have an unparalleled understanding of what our readers need to know, and we will have access to the leading experts to impart the best thinking in the field. This will be a must-read magazine in risk management."

About GARP

The Global Association of Risk Professionals (GARP) is an independent organization of 15,000 financial risk management practitioners and researchers. GARP is a diverse international association of professionals from a variety of backgrounds and organizations who share a common interest in the field. GARP's mission is to serve its members by facilitating the exchange of information, developing educational programs, and promoting standards in the area of financial risk management. GARP members discuss current practices and regulation, and help bring forth potential risks in the financial markets to the attention of other members and the public.

About RiskCenter.com

RiskCenter.com is a media company that provides a daily Web-based news service that delivers original stories on six financial risk management categories: market, credit, operational, eCommerce, commodity and energy. The stories explain risk measurement and management issues, as well as the use of risk information in capital allocation strategies.

About the Flatiron Group Corporation

The Flatiron Group is a publishing company that currently produces a portfolio of products, including a magazine and a newsletter. Its Windows in Financial Services magazine focuses exclusively on the rapidly expanding use of Microsoft technologies in financial services, from front office applications to back office processing. It provides real-world case studies showing how firms are implementing new solutions built on the Microsoft platform.

Hi Vince, I can't believe this is actually it? what a waste. I have so enjoyed working with you over the years. You are one of the reasons Enron was a great place to be.

Thank you for offering to be a reference for me. I really appreciate your support.

Below, I've listed my personal info so we can stay in touch.

Take care and all the very best, Andrea

Dear Vince and Gary,

We are all speaking at the March Real Options Session in NY. My work in real options in the energy field has come, to a large part, from my casewriting in your two organizations, so I feel that we should probably allocate more time toward your presentations and less to mine. While we have a two hour block among the three of us, I think we can freely re-arrange things to produce the best result. Would you two like to schedule a brief conference call to coordinate our talks? I am free virtually all of next Wednesday 2/23, perhaps we could talk at 10 am (EST) or 2 pm (EST)? I am happy to arrange the call, if you send me your phone numbers. Thanks.

An Inbound Message For You Has Been Quarantined

Sender	enron.mailsweeper.admin@enron.com
Recipients	['vkamins@notes.enron.com']
File	kaminski-v/inbox/48.

You have received this message because someone has attempted to send you an e-mail from outside of Enron with an attachment type that Enron does not allow into our messaging environment. Your e-mail has been quarantined and is being held at the MailSweeper server.

Sender: VKaminski@aol.com Date: Thu, 24 Jan 2002 20:51:39 EST Subject: Fwd: FW: EIA to Display Draft of New Storage Survey at GasMart/Power 2002 Attachment Type: Scenarios/Incoming/Inbound URL Catcher: A filename matching the file mask was detected: '~~dlnk0.url'. Scenarios/Incoming/Inbound URL Catcher: A filename matching the file mask was detected: '~~dlnk1.url'. Scenarios/Incoming/Inbound URL Catcher: A filename matching the file mask was detected: '~~dlnk2.url'. Scenarios/Incoming/Inbound URL Catcher: A filename matching the file mask was detected: '~~dlnk3.url'.

If the intended email is of valid business-related content and you believe it requires Enron resources to retrieve it, you may call your Help Desk and ask to have it released from quarantine and delivered to your e-mail Inbox. Your message will be scanned and checked for viruses prior to requested release. If it contains a virus or there is reason to suspect it is malicious code, it will not be delivered.

North American Resolution Center: 713 853 1411 European Resolution Center: 0044 207 78 36777 EES Help Desk: 888 853 9797 ETS Solution Center: 713 345 4745 (Houston) or 402 398 7454 (Omaha)

Please DO NOT reply to this address as it is not a monitored system mailbox.

File	kaminski-v/inbox/644.

Vincent....on behalf of Toshiba Corporation, we wanted to thank you for the valuable time you spent with us on Tuesday and also for the great Brennan's Lunch!

We hope you and your team felt that the time was well spent and you found the Boltzmann concepts and model to be both interesting and compelling.

We know that we threw alot of very detailed information at you in a relatively small amount of time and of course it will take some time to digest.

We're thinking that the best way forward may be a small research or prototype project where Enron and Toshiba may be able to jointly test, analyze and benchmark the application of this concept -- to determine it's feasibility and potential business benefit. We are very interested in your thoughts about this idea.

We have attached the 2 briefings that were given for your use and internal distribution as appropriate. We have also attached other potentially useful information (published papers, etc.) for your use as you attempt to better understand the Boltzmann Model and underlying concepts.

Thanks again and we look forward to the opportunity for mutually beneficial collaboration between Toshiba's eSolutions Company and ENRON.

Sincerely,

Tom Murphy

From: bounce-alliance_info-90961@listserver.eei.org@ENRON On Behalf Of "The Alliance of Energy Suppliers" <alliance@eei.org> Sent: Wednesday, January 02, 2002 3:15 PM To: Alliance Information Cc: jonathan.w.gottlieb@BAKERNET.com; Samir.S.Desai@BAKERNET.com Subject: Conference Call- Interconnection Issues Update- Mon. Jan. 7 at 1PM (EST)

The Alliance of Energy Suppliers will conduct a conference call to apprise the generator community of the recent progress of the Interconnection Agreement and Interconnection Procedures drafting groups and their work-product, solicit input on content of comments to the ANOPR, and begin discussion of Phase II- Cost Responsibility and Cost Allocation of Interconnection Upgrades.

The Alliance's outside counsel, Jonathan Gottlieb, will be the co-conductor of this call to provide first-hand knowledge of the drafting process, since he is actively participating on the drafting committee, and assist in identifying outstanding interconnection issues.

We encourage all to participate on the call and prepare to express any questions, comments or concerns.

Attached is the agenda for the conference call. Please reply back to this e-mail if you plan to participate on the call. If you have questions or need additional information, please do not hesitate to contact Chuck Linderman (x5652) or myself (x5098).

Call in number: (800) 860-2442. Call Name: Alliance Interconnection Call Date: Monday, Jan. 7 at 1PM (EST)

Thanks, Tonja Wicks

Frank,

I am definitely interested in the resume. I can meet the candidate on campus when I visit my son. I am planning to come to Palo Alto around Thanksgiving.

Also, Energy and Power Risk Management (an English publication) organizes every year in Houston a POWER RISK conference (typically in May). They ask me for recommendations regarding speakers. Would you be interested in participating?

Vince

Vince,

I am writing about a student of mine who is on the job market this year. When you stopped by my office, about 18 months ago you asked if I had any students that might be appropriate for your group. Although I didn't at the time, now I do. This student has excellent technical skills, including an M.S. in Statistics and a Ph.D. in Economics by the end of the current academic year. His dissertation research is on the investment behavior of Independent Power Producers in the US. As a result of research assistance he has done for me, he knows the California market very well and is familiar with the other ISOs. I think he would be an excellent match for you. The only problem is that he will probably have many other options available. However, I definitely think he's worth a look. If you'd like him to send you a CV, please let me know. Thanks.

Vince, it was an excellent presentation to get some discussion going among the practitioners on how to map the volatility process. I think we will never be able to build a single black box to value volatility, otherwise markets will cease to exist and we in risk will be out of business. However, it will be possible to build a framework to structure volatility modeling process. Like the general equilibrium modeling approach you proposed. Atleast we can agree on the key drivers of supply and demand and the significant variables of a fundamental model.

I hope we get to have a continuing discussion on this topic.

I would also request if you could please send me a copy of you power point presentation.

Thanks

Seminars-on-Demand Press Release

Sender	john@pgsenergy.com
Recipients	[vkamins@ect.enron.com]
File	kaminski-v/deleted_items/2150.

The press release below may be of interest to you or to someone you know.

John Adamiak

"PGS Energy Training Announces Breakthrough New Training Product for Energy Derivatives and Electricity Trading."

FOR IMMEDIATE RELEASE

John Adamiak PGS Energy Training 412-279-9298 www.seminars-on-demand.com john@pgsenergy.com

Pittsburgh, Pennsylvania - October 10, 2001 - PGS Energy Training announced today the official release of its innovative new training product Seminars-on-Demand (version 2.1) for the energy and electric power industries.

Seminars-on-Demand is a completely new way to train employees in the critical subject areas of energy derivatives, electricity trading, and proper deal structuring techniques. It eliminates the time and distance constraints that frequently preclude live classroom training and enables employees to increase their value in a cost-effective and time-efficient manner. <http://www.seminars-on-demand.com/whatis.html>

"In today's marketplace, a well-trained staff is a firm's most powerful strategic weapon. This new product finally allows a company to deliver training across the entire organization in a cost-effective and timely manner", said PGS Energy Training CEO John Adamiak.

Seminars-on-Demand works by combining an innovative CD-ROM seminar presentation with a matching instructional manual and phone-based instructor/student interaction. Two-week, annual and unlimited corporate enterprise licenses are available.

Free Preview CDs are available by calling 412-279-9298, visiting www.seminars-on-demand.com, or by visiting the PGS Energy Training booth at PowerMart in Houston next week.

Established in 1990, PGS Energy Training delivers in-depth training programs in energy derivatives, electricity trading and gas-to-electricity arbitrage. In addition to its new Seminars-on-Demand CD-ROM based training, PGS Energy Training offers on-site classroom programs, open registration public seminars and confidential training for senior executives.

PGS ENERGY TRAINING 600 North Bell Avenue, Carnegie Office Park Bldg. 2, Suite 2708 Carnegie, PA 15106 Phone: 412-279-9298 Fax: 412-276-4676

Vince,

Pierre has informed me that (if you can so co-ordinate with Alison Bailey) you would like to move the recruiting event on campus for Comp Finance to Nov 3 in order to co-ordinate with Pierre's invitation to speak in the MSCF Speaker Series the same day. I contacted our recruiting center about availability on that date and have forwarded below his response. Let me know how else I can help and, again, thanks for your kind words about the program and you obvious interest in meeting with us.

Rick

From: "Ken Keeley" <kk4p@andrew.cmu.edu> To: "Rick Bryant" <rlbryant@andrew.cmu.edu> Cc: "Sally E Gould" <sgould@andrew.cmu.edu> Sent: Thursday, August 03, 2000 1:32 PM Subject: Re: Fw: MSCF Speaker Series

Enron currently has 8 interview rooms scheduled on December 11, 2000... As we have 10 interview rooms available to us and as on 11/3 we currently have nine rooms booked, if Enron wants to move all 8 schedules to 11/3, we probably will not be able to host them on-campus unless [the firm currently holding the rooms] moves off (and there is a possibility of that - this is like a game of dominos). However, Enron could interview off campus, but that is not as convenient for the students and it increases the cost for the employer. If Enron wants to move only one or two schedules to 11/3 for just Comp Finance, we would find a way to accomodate them. Our Recruiting Coordinator, Sally Gould, will do everything she can to make this work for Enron. Please suggest that Enron re-contact her as soon as they know what their preferences are. Alison knows how to reach her.

Dear Vince:

I received the contract you faxed today. I think the changes look ok, but it needs to be approved by the university lawyers. The following is a letter I sent to Traci regarding our broadband conversation. This was also sent to your Enron email address but it bounced back.

regards,

Sheridan

Dear Traci:

Thank you for the information about Enron Broadband services. I have contacted Bob May, the Dean of the UT business school, the two Associate Deans in charge of program development and George Gau, my department chairman. I will try to set up a meeting with them next week to discuss our current distant learning initiatives and the potential for collaborating with Enron.

Please let me know if you have any materials that I should show them at the meeting.

I'll let you know what develops. We view Enron as one of our most important strategic partners and if we are considering offering courses over the internet I'm sure that our Dean will want to discuss this with you further.

regards,

Sheridan

Ehud,

We shall make reservations for dinner at Vincent's on West Dallas (2701 West Dallas, 713 528 4313). We shall make reservations fro 7:00 p.m. You can call me on my cell phone (713 410 5396) if there is a problem.

We shall have about 25-30 people at the meeting on Thu at 11:30.

See you tomorrow.

Vince

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 06/19/2000 02:32:36 PM To: Vince.J.Kaminski@enron.com cc: Shirley.Crenshaw@enron.com Subject: Re: Prospective 6/22 Houston Visit

Vince,

Greetings, and thanks for your 6/12 e-mail.

We can meet for dinner on the 21st. Then you can visit with us on the 22nd in the morning and have individual meetings. At 11:30 you can meet the entire Research Group at our weekly lunch meeting. We can continue individual meetings in the afternoon.

I thank you once again for your invitation and look forward to my visit this Wed. My current schedule calls for a Hobby arrival on Wed. at 6:23 p.m., in time for the dinner scheduled for that evening. (I can take a cab directly to the restaurant if you're scheduling a circa 6:45 - 7 p.m. dinner.) Further, I have tentatively set up the Thur. return flight to Austin at 3:38 p.m., and that can be modified as desired.

Please, make a reservation at Hyatt Regency Downtown or Double Tree Downtown (there are several hotels with the same names).

When I made the room reservation last Mon. 6/12, it turned out that these hotels showed no vacancy (is there a conference in town?), so the nearest I could obtain is the Hilton Houston Plaza (6633 Travis) some 3.5 miles away from Enron. (If it is important that I stay at the closer hotels, Shirley might ascertain whether Enron's travel agent can obtain a room there.)

I take this opportunity to request of Shirley that, subject to your approval, an overhead projector, screen and small lectern be made available for the room where the 11:30 luncheon meeting takes place. Also, since I would like each participant to have his/her own copy, I would ask her to advise me as to the number of participants expected to attend, or alternatively, Shirley could make copies of the presentation handout when I bring the "master" copy in Thur. morn.

I look forward to seeing you Wed. and Thur. Best Regards, Ehud

Vince J Kaminski 10/09/2000 10:56 AM To: cc: Vince J Kaminski/HOU/ECT@ECT, Shirley Crenshaw/HOU/ECT@ECT
Subject: Fwd: hello from Charles Shen at Williams Co.

Toni,

I would like to bring two people for an interview

One of them sent me a message that is attached below. I am including the info about the 2nd gentleman below.

I would like to include myself, Vasant Shnabhogue, Tanya Tamarchenko Stinson Gibner, Zimin Lu, Paulo Issler, Alex Tang on the interview list.

It would be great if we could bring them this week on Friday. Tanya will be at a training course next week. This means that if Friday this week is too aggressive, we should shoot for interviews in 2 weeks.

Sorry for a short notice.

Vince

Dear Vince:

How are you? I am not sure whether you still remember me, we met in a conference last year in Houston. After having been working for Williams for about two years, now I am ready to make a move. I have heard Enron is a great company, I am wondering whether there is any opportunity for me, either in research group or in structure group

Here is brief description about myself: Right after I got my Ph.D. on finance and econometrics from Duke University in 1998, I joined Williams Energy Trading company as a Quantitative Analyst. Now I am Lead Quant and in charge of the quantitative research group with 7 highly talented people. I have done extensive research and modeling about electricity, load-following deal and tolling deals.

If you need any additional information, please feel free to call me at 918-409-4308. I look forward to hearing from you soon, thank you.

sincerely, Charles

Ravi,

At some point we would like to include bandwidth under AOL. This clause may be very restrictive.

Vince

Ravi Thuraisingham@ENRON COMMUNICATIONS on 02/15/2000 09:57:17 AM To: Mark Holsworth/Corp/Enron@ENRON cc: Vince Kaminski, Stinson Gibner/HOU/ECT@ECT Subject: Spreadsheet database for purchase

Hi Mark, as per our discussion earlier today, here is the contract that KMI wants us to sign. Please review as soon as you can. As I mentioned in our discussion, I am heading up the EBS research group reporting to Vince Kaminski and Stinson Gibner (MDand VP of Enron Global Research, respectively). Vince has asked me to talk you directly on matter such as this rather than using EBS service since we will be performing much of the work stationed out of Enron Corp and the database itself and any resulting analysis will reside in Research.

I took a quick look at the contract and already found some things that seems too restrictive. For example, the following clause may need to be removed unless you think it would not affect us:

Fourth paragraph: " (ii) that you are in a business that does not include the operating of an online exchange or auction for bandwidth"

Strictly speaking, we are NOT in the business of online exchange or auction for bandwidth (since that is how we differentiate our market-making activity from other online exchange players such as Band-x and Rate exchange), our trading activity can be loosely defined as such in an very immature trading market such as the current status of telecom market. What do you think? I would like to set up a meeting with you to discuss EBS and our role and how this database will be used, etc... Please have your assistant call Kristy Carnes to set up this meeting this week.

I thank you very much for offering to take a look at this at such a short notice.

Regards,

Ravi. ----- Forwarded by Ravi Thuraisingham/Enron Communications on 02/15/00 09:32 AM -----

Dear Dr. Kaminski,

Let me briefly introduce myself, I am the Director of Corporate Relations for the School of Engineering at Stanford University. In this role, I am always on the watch for ways to bring our faculty together with companies that have an appetite for engagement with top tier research institutions.

I believe you know Hill Huntington, who is a senior researcher with Stanford's Energy Modeling Forum. He suggested I get in touch with you for some ideas about contacts at Enron. I'm in the process of planning a trip to Texas in early May along with my colleague Donna Lawrence, the university's Director of Corporate Relations. We were hoping to be able to include a stop at Enron on our itinerary. Right now it appears that Friday, May 4th would work best for us but we're at the very beginning of our trip planning.

The purpose of our visit would be to review the current relationship between Enron and Stanford, to give you an overview of current priorities in the School of Engineering, and ask for your help in identifying the best points of contact.

I look forward to hearing from you about your availability,

Sincerely, Susan Hansen

Hello all,

The program for the 2000 Texas Finance Festival has been formalized and can be found on our web site at

<http://hsb.baylor.edu/html/martinj/festival2.html>

I do need to remind you of a few things before we converge on San Antonio. First, be sure to contact the convention hotel and make your reservations. At last count there were only 6 rooms left. Second, I need a completed application form from everyone so that we can get an accurate meal count. I am attaching the program announcement so you can fill out the appropriate boxes for meals and numbers of guests in the event you have not sent in a form.

Remember that we are starting the conference off with a luncheon on Friday so plan on arriving early Friday or coming in on Thursday evening if you can. Our hotel is right on the river and there are lots of restaurants and interesting things to visit in the immediate area (the Alamo is across the plaza from the hotel).

We are making plans for spouses and children to attend both the dinner on Friday and Saturday evenings. The Friday evening dinner begins at 6 p.m. so that we can be done in plenty of time for our private guided tour of the Alamo at 8:00 p.m. For Saturday we are still working out plans for the evening so stay tuned.

There will be more information later as the conference nears. Looking forward to seeing you all and in beautiful, sunny San Antonio.

John - announcerev.doc

FW: INFORMS Presentation

Sender	chonawee.supatgiat@enron.com
Recipients	['martin.lin@enron.com', 'j.kaminski@enron.com', 'Suvrajeet Sen', 'vasant.shanbhogue@enron.com']
File	kaminski-v/inbox/462.

About the INFORMS presentation, there were many people showing their interests, including Prof. Suvrajeet Sen from Arizona, Prof. Jussi Keppo from Michigan, and couple of students from U. of Pittsburgh, CMU, and U of Maryland. Prof. Sen invited me to meet his group there, Prof. Keppo wants to join effort in writing a paper, and a CMU student offer to join work for his Ph.D. requirement. (See their e-mails below).

Those opportunities sound interesting. I think it will be good for the company too because we will have additional people working on the problems that will benefit us. If you have any research problems that you want me to work on please let me know then.

On the other hand, I will not give away our secret. I will consult with you first if I am not sure how secret it is.

Thank you, -Chonawee

FYI: Three weeks ago, my previous lawyer Lisa Ried told me that she transferred my greencard case to another Lawyer Kristen Burke. So now she is handling my case. She will file the petition this week.

Hi,

I attended your talk at the INFORMS meeting, and found that your goals (valuing long term contracts) have a lot in common with goals of our research. I would like to invite you to come and meet my team which includes a fair number of Ph.D students, one of whom is from economics, and the others are from Systems and Industrial Eng. This would give us an opportunity to discuss common themes in our work. Would you have any interest in doing so? If so, we can discuss ways to make this happen.

- With best regards, Suvrajeet

Dear Chonawee Supatgiat, This is Wei Yang from Carnegie Mellon University. I am working on pricing and operation management in energy markets, especially on natural gas. My last paper was about equilibrium analysis of a natural gas supply chain. I was in the INFORMS conference last week. Unfortunately I missed your presentation on Sunday. My friend was in the session and he told me that your talk was very interesting.

Could you please email me your slides/paper? If you happen to need Ph.D. students to work on some problem together, please let me know too. I am looking for a topic for my next paper to finish my doctoral degree. Thanks in advance. -wei

July 02, 2001 2:11 PM To: vkamins@enron.com Subject: FEA Announces the Release of @GLOBAL 5.0

July 02, 2001

Enron North America Corp. Vince Kaminski 1400 Smith Street 30th Floor, Rm. 3036B Houston, TX 77002-7361 1
713-853-3848

Dear Vince Kaminski,

This is to inform you of the release of @GLOBAL v5.0. FTP download instructions are available immediately. The download instructions are included at the end of this email. Your CD's and manuals will be shipped to you within 2 weeks. Please see below for more information regarding this new release.

Please confirm that you are the correct recipient for this shipment and your address above is correct by clicking reply and send. If any changes need to be made, please make the changes above and reply.

Here is an overview of the new features from the release notes:

New License Keys Required

FEAs new licensing scheme requires new keys. If you received new @GLOBAL license keys recently (within the last 6 months to a year), you need do nothing, otherwise contact FEA to receive updated license keys. To get new keys, contact FEA by email info@fea.com, fax +1-510-548-0332, or telephone +1-510-548-6200. *To avoid downtime we strongly recommend you get and install the new keys before installing the new software.

New Functions

The following functions have been added:

Function Module Description

MCEAPO 2 Monte Carlo based, European average (inverse) price option. CPAMW 4 Cash-or-nothing digital barrier option (hit in time window, pay at maturity). EPINM 4 Kick-in at maturity option. REVEADOM 4 Reverse knock-out at maturity option. EURO_BESTOF 5 Best-Worse of (two/three) assets. EURO_DBESTOF 5 Best-Worse of (two/three) assets, digital payment. MCEQUITY_ASAIN 5 Monte Carlo European average-returns option (up to 12 equities). MCEQUITY_ASIAN_CLIQUET 5 Monte Carlo European average-returns option (up to 12 equities) with cliquet features.

New Add-in Manager

@GLOBAL 5.0 comes with a new add-in manager that makes navigating between different FEA templates very easy. Simply open the fea\xlutil\readme.xls and follow the instructions specified in the spreadsheet.

New Module

@GLOBAL.5 Baskets & Averages has been added. Prior to this release, functions in this module were part of the SPAV product.

New Templates

Templates have been added for the new functions and existing templates have been updated.

New Features

All options now allow for positive or negative input amount. Negative amounts can be useful to represent short positions. All options can now be consistently evaluated on expiration date (zero time to expiry). An error is still returned if the option has already expired (negative time to expiry). European spread option models (EUDU, ECMXX, EPMNX) now support an alternative tree implementation.

Speed Improvement

Our tests show a substantial speed improvement (40%-60%) from version 4.2, especially for computationally demanding models.

If you have any questions please feel free to contact us. We appreciate this opportunity to be of continuing service to Enron North America Corp..

To download @GLOBAL via FTP, follow the following instructions:

NOTE: Using EXPLORER leads to unpredictable results, so we suggest using NETSCAPE or a DOS shell.

USING NETSCAPE:

In the Location box type: ftp://global@ftp.fea.com Password: 9cmccfd

global-5.0-win32.exe is for Excel 7 or 97SR1, 2000 or XP, download and run on a local drive.

global40-unix.tar.Z is for Applix, download, unzip, and untar and then follow the instructions in Readme_Install.

USING A DOS SHELL:

At a DOS prompt type: ftp ftp.fea.com User: global Password: 9cmccfd

Type "binary" and hit 'return'. Type "ls" for a list of available files. Type "get" global-5.0-win32.exe and wait for the ftp> prompt. Type "quit".

The file will be downloaded into the directory at which you entered the ftp site. Double click on the exe and follow the instructions on the screen.

N.B.: The password is only valid until the first Friday of next month.

File	kaminski-v/sent_items/2421.

Lexi,

Looks great.

Vince

-----Original Message-----

From: Elliott, Lexi Sent: Monday, August 06, 2001 4:14 PM To: Lemmons Jr., Billy; Crenshaw, Shirley Cc: Kaminski, Vince J Subject: RE: Vince's Presentation at the UT Foundations of Energy Finance Class and Subsequent Enron Reception

We're ready to go. I have set up the reception from 5:00 - 6:00 September 10th. It will be held at the Hall of Honors (in the CBA) and the Energy Finance Group will also be invited. After the reception, I think it would be wisest to have Billy and Vince join the corporate presentation, which is scheduled from 6:00 - 9:00pm. The summer interns receiving full-time offers will be invited to attend. That way, they can share their summer experiences with the audience.

I think Professor Ronn's itinerary is great!

Please let me know if you have any additions or corrections to the plan.

Thanks!

lexi

i'll be there....maxine, pls put it on my calendar....thx, billy

-----Original Message-----

From: Crenshaw, Shirley Sent: Friday, August 03, 2001 12:43 PM To: 'Ehud I. Ronn'; Lemmons Jr., Billy; Elliott, Lexi Cc: Kaminski, Vince J Subject: RE: Vince's Presentation at the UT Foundations of Energy Finance Class and Subsequent Enron Reception

Professor Ronn, Billy and Lexi:

September 10th works great for Vince. He suggests the following if it works for your schedules:

1. Lunch on the 10th with Professor Ronn and colleagues (to be coordinated by Professor Ronn) 2. Vince's presentation to MBA students: 2:00 - 5:00 PM 3. Associate/Analyst Reception: 5:00 - 7:00 (?) (to be coordinated by the Associate/Analyst Program) 4. Dinner with the Associate Analyst group: 7:30 PM or whenever the reception is over. (to be coordinated by the Associate/Analyst Program)

Please let me know if this is workable with everyone or if you have other suggestions.

Regards,

Shirley Crenshaw Administrative Coordinator Enron Research Group 713-853-5290 Email: Shirley.Crenshaw@enron.com

-----Original Message-----

From: Ehud I. Ronn [mailto:eronn@mail.utexas.edu] Sent: Friday, August 03, 2001 11:53 AM To: Crenshaw, Shirley
Cc: Kaminski, Vince J; Lemmons Jr., Billy; Elliott, Lexi Subject: Re: Vince's Presentation at the UT Foundations of Energy Finance Class and Subsequent Enron Reception

Shirley:

Hope all is well with you and you are surviving the "hot" summer.

Greetings. Not to worry: I like heat and thaw out in the '90's.

I am forwarding a message from Lexi Elliott with our Associate/Analyst program. She suggests that Vince come to the university on September 10 or 17th so that his presentation coincides with their calendar. Is this feasible from your stand point?
Sep. 10th is indeed feasible.

I scheduled the invitation dates of 9/24 - 10/17 to give me time to make progress in my class presentations so that students would have more of a background in listening to Vince's presentation. If select the 9/10 date, I would ask Vince to take into account in the level of his presentation that by that date the students will only have had 6 hrs. of the Foundations of Energy Finance class (classes begin 8/29 and Labor Day intervenes). On the plus side, the students do come in with three finance courses (core course, investments, advanced corporate) as prerequisites to my class.

In sum, I appreciate the importance of recruiting and can accommodate Vince's presentation Sep. 10th. Please advise if Vince would like the 2 1/2 hr. (2 to 5 p.m., including breaks) time slot, or the 75-min. subset thereof.

Perhaps we could arrange lunch or dinner the day of the presentation for yourself and our 5 summer associate interns. That way, we are making the most of your time in Austin.

I had planned on hosting Vince for lunch with my faculty colleagues. If his presence is called for at a lunch scheduled by your Associate/Analyst Program, we will plan his schedule around that. By this e-mail I also inquire of Lexi whether Enron intends to host a reception at the 5 p.m. end of the class: If so, she should contact Energy Finance Center Assist. Director Angela Dorsey at Angela.Dorsey@bus.utexas.edu (or 512-232-7386) to coordinate matters.

Sincerely, Ehud Ronn

Vince,

I am delighted that you accept our invitation. We hope it works out that you can attend the whole conference as we are confident that you will find the program stimulating and will enjoy getting to know our participants. The pleasure will certainly be mutual. You will bring a new and different perspective from which we can all benefit.

Michael

05:01 PM -----

"Kleindorfer, Paul" on 03/08/2001 03:41:21 PM

To: "vkamins@enron.com" cc: "mcrew@andromeda.rutgers.edu" Subject: Invitation to the 20th Annual Rutgers Conference

Vince:

For two decades now, I have been a member of the faculty helping to organize the Eastern Conferences on Regulation and Competition that Michael Crew of Rutgers has chaired. This year will be, in fact, the 20th anniversary conference and a number of notable personages will be joining us to celebrate what we have learned and what we haven't about the economics of network industries. Fred Kahn, Al Philipps, Bill Hogan and a number of other distinguished academics will be reviewing our progress and the prospects for the future. The conference will take place at a beautiful site in the Poconos, about 90 minutes north of Philadelphia, from Wednesday afternoon May 24th to Friday afternoon May 26th. You can check for yourself the nature of the program and the conference site/hotel at the following website URL:

<http://www.rci.rutgers.edu/~crr/WS.htm>

Michael Crew and I would both be delighted if you would be willing to be an after dinner speaker on Thursday evening (May 25th), just before the key research reviews of Friday morning take place on the electricity, telephone and gas industries, and following a day of special topics on emerging power markets and other developments in network industries. Naturally we would be pleased if you would be able to stay for the entire conference, but knowing your schedule, you may only have time for a part of it. That would not be a problem. The usual after-dinner address is for 30 minutes, followed by a short Q&A period.

Your presentation would help to underline the tremendous importance of Enron in driving the development of new risk instruments to assist in price discovery and efficient risk management for market participants, in energy markets and more generally. Both Michael and I feel that your perspectives on the "new science of risk management" and what can be expected from it could be a very important addition to this special anniversary event.

Please let me know (and please do copy Michael on your response) whether your schedule will allow your participation in this very special event. Michael and I would, of course, be very happy to follow up with you in discussing the nature of the presentation, participants and so forth, if this is a go. I look forward to hearing from you.

Regards,

Paul Paul Kleindorfer 215 898-5830

TFF Participants,

We are looking forward to seeing everyone in San Antonio this Friday. Attached is a welcome letter that indicates the meeting room and describes the two evenings (Friday dinner and tour of the Alamo and Saturday barbeque dinner at a ranch outside of San Antonio). We have arranged for five horses for the brave at heart and a hayride for the interested so come with jeans and boots.

See you Friday

Vince,

Two things. Do you have any comments on the interview document? Second, I want to submit a proposal to the European Financial Management Association meetings for next May based on our paper. The meeting is in May and is held in Paris. Hope you can come (assuming the program committee likes our proposal--I won the best paper award at last year's meeting so maybe we can do it again).

Looking forward to hearing from you so I can get Bob's response to the questions.

John

This summer may prove to be an especially?crucial period for the economy, with the California power crisis possibly spreading to other regions and gasoline prices likely to skyrocket.

This coupled with continuing recessionary pressures in other sectors of the global economy has greatly increased the importance of re-evaluating business strategies and developing scenario plans to mitigate the growing financial risks.

I am attaching a list that highlights activities that?could be of value to you in this environment.? If we?may be of assistance to you, please do call me (972-539-2868).

With best regards, Shannon Burchett

re:- developing electricity model at Enron

Sender	al3v@andrew.cmu.edu
Recipients	[vince.j.kaminski@enron.com]
File	kaminski-v/all_documents/6032.

Dr. Kaminski:

Thanks very much for taking the time to talk with me about my electricity model when you visited Carnegie Mellon. (I was the PhD student in Finance who had a two-factor model for pricing electricity. My model incorporated strategic behaviour and varying price elasticities across different consumers of electricity). While here, you mentioned the possibility of further developing my model at Enron. One avenue you suggested was through the summer internship program at Enron. If this is still an option, I would very much like to talk with you or one of your associates about working with or at Enron on my model.

I can be reached by phone at (412) 683-9085.

Sincerely,

Aziz A. Lookman Graduate School of Industrial Administration 5000 Forbes Avenue Carnegie Mellon University Pittsburgh, PA 15213 Tel: 412-268-3681 Fax: 412-268-6837 (pls. mark the fax c/o Jackie Cavendish)

From: "Balsen, William" <wbalsen@crai.com>@ENRON Sent: Monday, December 10, 2001 5:14 PM To: 'vkamins@enron.com' Subject: I've joined Charles River Associates

Hi Vince - Its very sad to see what has happened. I hope you are doing OK under the circumstances. I wanted also to let you know that I'm transitioning to an advisory role at Opt4 since they are now in a more operational mode, rather than developmental. I've joined Charles River Associates in the Palo Alto office. What are your plans for the future? I would like to extend an invitation to get to know us better, and perhaps to collaborate if our interests coincide. When do you get back

from vacation?

Bill Balson Vice President Charles River Associates 285 Hamilton Avenue Palo Alto, CA 94301 Direct: 650-847-2227 Cell: 650-823-2510 FAX: 650-325-2488 wbalson@crai.com

Proposal	
Sender	j_martin@baylor.edu
Recipients	[vkamins@enron.com', 'christie_patrick@enron.com']
File	kaminski-v/universities/265.

Christie,

Thanks for helping out. Attached is a one page "intro" to the project that Vince and I are undertaking. Please let me know how you would like it "transformed" before passing it along to the leadership at Enron.

You have the basic story--Enron's leadership purposefully and very successfully transformed the company. We plan to document in broad strokes the "plan" as it was set out, and trace its evolution through the history of Enron's history. The final result will be a 20-40 page paper written in the style of a Harvard Business Review piece.

Please let me know what else you may need. I'll put it together for you.

Thanks again,

John

Vince,

Two items. Unless you have an objection, I plan to ship the paper on to Don Chew at the journal this morning. We can still work on the article but he needs something to begin the editing process.

Second, in the same issue as our paper will appear the transcript of a roundtable discussion involving Sheridan titman, John McCormack (Stern Stewart), Ron Erd (Southern Energy), Jeff Sandifer (president of Sandifer Capital--\$700 million undermanagement), and Gene Humphries. Attached you will find a section THAT WILL NOT BE IN THE FINAL DOCUMENT, but that I thought you might like to read in light of our own discussions over the course of writing this paper.

Have a great day.

John,

Per our discussion, Nov 13 is fine.

Vince

"John D. Martin" <J_Martin@baylor.edu> on 10/09/2000 05:27:30 PM To: vkamins@enron.com cc: Subject: Waco visit

Vince,

I have penciled you in for Nov 13th for my class. Does this work for you? This is a Monday and I would suggest you come up Monday afternoon, you can give a brief talk to our department late in the afternoon, and then you can talk to my Ex MBAs at 6 p.m. for an hour or so. I'll get you to the hotel for the evening and we can work on the paper Tuesday morning. I recommend this Mon noon through Tue noon arrangement since I will be out of town the weekend before the 13th. If this needs reshuffling let me know. We'll make it work.

I look forward to talking with you later this week along with Mark Palmer.

Just wanted to share the list of "one-page" bios and summary statements that I have collected to this point. I have two more yet to come and will share them ASAP. Have a great weekend and I look forward to seeing everyone in "sunny/warm Waco" next week.

By the way, Bill Petty has challenged everyone to a 40 minute jog along the river on Friday morning at 6:45 a.m. so bring your jogging gear. I also have heard from very reliable sources that Bennett Stewart is the odds on favorite to "win the race" (Cynthia leaked the story that he's been in training now for several months).

I'll also be sending you driving/parking, etc. instructions early next week.

Have a great weekend,

John

John,

I shall see Christie tomorrow and I shall talk to her about the project.

Friday, Feb 23 works for me.

Vince

"John D. Martin" <J_Martin@baylor.edu> on 10/18/2000 10:00:57 AM To: vkamins@enron.com cc: Subject: Good morning

Vince,

Just an update for you and a question. First, I have talked to Christie and corresponded via e-mail. We don't have dates to talk to Lay, Skilling and Fastow as yet but Christie is working on it. I will prompt her again next week.

The second item of business is a question. I want to see if we can move our meeting in Spring (Business education and the new economy workshop) back a week to Friday February 23rd. One of the attendees has a conference he wants to attend on March 2nd. Let me know asap if the 23rd works for you. I have commitments from a number of folks for the workshop and I think it will be great fun and a wonderful learning experience for us all.

Dear Vince,

Thank you for agreeing to take part in our annual US congress. There were 2 things that I would ideally like you to be involved in. The first would be to present any new research you may have. This would be part of stream 3 (see attached) which looks at new research in derivatives modelling and analysis. If you would like to present any new research that fits into the rough areas outlined that would be great. The second would be part of a panel discussion on weather derivatives (number 44 attached). I have also invited Jeff Porter (Koch) and Ravi Nathan (Aquila). Please let me know if you would like to present any new research and/or take part in the panel.

i look forward to hearing from you soon.

Best regards, Oliver

John,

This is the paper that outlines history of the natural gas business in the US.

Vince

"John D. Martin" <J_Martin@baylor.edu> on 01/26/2001 05:56:07 PM To: vkamins@enron.com cc: Subject: Remaining work

Vince,

I shipped you the paper along with my note to Don. However, I wanted to share with you what I feel are the remaining "to dos". Specifically,

1. We need to document carefully the forces that were behind the original transformation of Enron. Specifically, the fallout from deregulation (take or pay contract defaults, etc.), the impact of the losses from the oil trading operation, the nationalization of the Peruvian pipeline, and the leveraging up to fend off the Carl Ichan takeover attempt.
2. We need to complete/beef up the network strategy section.
3. Finally, the concluding section needs to be carefully crafted to "hammer home" the basic principles underlying the transformation.

What do you think?

Hope you have a great weekend.

John

Gentlemen:

Attached is a schedule of activities as well as maps and driving instructions for those who are driving to campus Friday morning. The dress for Friday is casual (no ties, sport shirts and jackets if you wish).

For those of you who have asked about Thursday night's dinner please note that we have pushed it up to 6-8pm at Ninfa's Mexican Restaurant. At this point I plan to pick up Bennett S. and Don C. from the Marriott before 6 and will do the same for anyone else (let me know). The restaurant is in easy walking distance of the Hilton and Marriott.

Please note the times for your individual interviews/video taping on Friday. Some of you are leaving early so we are taping you from 11-12 Friday morning while others are being taped after the program is over.

I'm sure I've forgotten something so you'll probably get more e-mails. However, this should take care of the primary stuff. I'm really looking forward to seeing all of you and to hearing your thoughts in the workshops.

more later,

john

John,

HTML version of Enron article:

Vince

"John D. Martin" <J_Martin@baylor.edu> on 02/04/2001 06:37:47 PM To: vkamins@enron.com cc: Subject: Latest revision

Vince,

I have made bold face edits to the attached document. I still have two edits to make but am concerned that you were not reading the most recent version. Sorry for any confusion but the editor doesn't use the edit function in word so I have ended up making edits on new versions of the paper.

I still haven't made the change regarding the take-or-pay problem (I left that paper at home in my briefcase and will make the change tomorrow morning). Also, I haven't added anything regarding the conflict that arose over pay for new hires nor have I received the Business Week e-mail from you.

However, if the paper looks ok to Mark Palmer we can make these minor edits on the galley pages of the article.

thanks

john

p.s. i am very disappointed about the scheduling conflict you have on Feb 23rd. you will be greatly missed but i certainly understand. John D. Martin Carr P. Subject: confirmation of Vince Kaminski's 11/15-11/16 campus visit to Baylor University Importance: High

Dear Shirley,

I have emailed and voice mailed Vince about confirming his scheduled 11/15-11/16 campus visit to Baylor University, but I haven't heard back from him yet. I have him scheduled to present to students on 11/15 from 11-2, and on 11/16 to present a seminar to the finance faculty. I also have a room reserved for him at the Judge Baylor house in Waco for the evening of

11/15. My colleagues and I plan to take him out to dinner on the evening of 11/15.

Anyway, can you confirm these plans for me?

Thanks,

Jim Garven

Hi Michelle,

Thanks for your input. we are moving ahead to offer Sevil a summer internship with us.

Vince

Michelle Michot Foss <mmfoss@UH.EDU> on 02/21/2000 05:29:36 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: Sevil Yaman

Hi-- one of the Ph.D.-econ students over here, Sevil Yaman, has been talking with you. She's interested in a summer internship that will help her "ground" her dissertation. With our help, Sevil has become totally corrupted (!). I have successfully impacted her view of the world re. academic economics v. industry. She would like her diss to be as relevant as possible, and with that in mind already moved from a pure electricity transmission pricing topic to focusing more on congestion management and trying to address practical market problems. She has in mind to work in industry when her degree is finished. I recommend her to you highly. She is extremely bright and competent, needs some guidance and input to get going in the right direction to finish up. Talk soon--

Luigi Zingales Seminar on April 27

Sender	wangfa@rice.edu
Recipients	['daveike@rice.edu', 'grullon@rice.edu', 'jfleming@ruf.rice.edu', 'jain@rice.edu']
File	kaminski-v/rice/44.

Rice/Enron Finance Seminar Participants: Luigi Zingales will present a paper co-authored with Raghuram G. Rajan, entitled "The Great Reversals: The Politics of Financial Development in the 20th Century." The full text of the paper is available in PDF form on the seminar website:<http://www.ruf.rice.edu/~jgsfss> The baton for organizing the seminar series has been passed from Barbara Ost diek to myself. If you have questions regarding the series, please contact me (wangfa@rice.edu or 713-348-5404). As we have done in the past, we will post the abstract and a downloadable version of the paper (if available) to the website a week or two before the seminar. The website will also provide a link to the speaker's homepage so you can access his or her biographical information. If the paper is not available at the website, I will send a hardcopy to interested Jones School faculty, to Felecia Jones (Economics), Sorin Sorescu (University of Houston), and Vince Kaminski (Enron). I will e-mail an announcement before each seminar, reminding you of the seminar date, time, and location. The distribution list will include everyone that receives this e-mail. Please let me know if you would like to be deleted from the mailing list or if you know of someone who should be added. Vince,

This is my latest effort and I would appreciate your thoughts. I know that we haven't written together before so let me assure me that you will not hurt my feelings by "slashing away" with a red pen. I think that I have put all the clay on the table for this piece of sculpture but it is still pretty crude. Help me "refine" the work to create something we can both be very proud of.

By the way, I know you are extremely busy right now so don't feel pressured to spend lots of time here. Any guidance you can offer will be appreciated. I don't know what the editor's time schedule is but he asked me to send him a draft on Monday. You and I will still be able to edit the manuscript but he will begin reading and editing it too. I'll let you know as soon as I have a final deadline.

Your friend,

John

p.s. Hope life is a bit calmer for you. By the way, I'm reading an interesting book entitled "The Four Agreements" by Miguel Ruiz that documents the Toltec philosophy of life in the context of the dreams of reality that we all create. You might enjoy it. - Enron_Paper_1_16_01.doc

-----Original Message-----

From: Deborah Barrett <barrett@rice.edu>@ENRON Sent: Wednesday, November 21, 2001 12:17 PM To: vkamins@enron.com Cc: Crenshaw, Shirley; betho@rice.edu Subject: Workshop Invoice

Dear Vince,

I have attached the invoice for the workshop that Beth O'Sullivan and I conducted for your group last month as well as a summary of the workshop evaluation. I am sorry for the delay, but we were waiting to receive more of the workshop evaluations so that we could provide you a more complete assessment of the workshop by the attendees. As it is, we only collected 11 responses of the 17 attendees.

I will also send you a copy of this invoice in the mail and will be glad to send you the actual evaluation forms completed by the attendees if you would like to have them.

As mentioned in the attached, we enjoyed working with your group and hope that you can see the difference the training made in the presentation ability of the attendees.

If you have any questions about the attached invoice, please do not hesitate to call me at 713-348-5394.

Again, thanks for bringing us in to conduct the workshop. I sincerely hope that you are well despite any changes taking place around you and that you have a great Thanksgiving holiday.

Sincerely,

Deborah

your upcoming visit

Sender	james_garven@baylor.edu
Recipients	['vince_j_kaminski@enron.com']
File	kaminski-v/inbox/404.

Dear Vince,

In view of all the turmoil at your company these days, I thought that it might be a good idea to check in with you and confirm that you are still planning to come to campus on 11/15-11/16. We have you scheduled to present to students on 11/15 from 11-2, and on 11/16 to present a seminar to the finance faculty. We also have a room reserved for you at the Judge Baylor house in Waco for the evening of 11/15.

Besides confirming your visit, I am wondering whether you would recommend that I have my students read any articles in preparation for your talk. Would it be okay for me to assign your paper with John Martin (forthcoming in the JACF) entitled "Transforming Enron Corporation - the Value of Active Management"? Also, would there be a seminar paper that I could distribute for the faculty seminar, or would you prefer to have more of a free flowing presentation along the lines of what you did for me during spring 2000 at LSU?

Finally, if you want me to distribute any other materials to the students or faculty, please let me know. We are looking forward to your visit!

Sincerely,

Jim Garven

Dear Vince,

Since we last corresponded, I have left LSU and am now Professor of Finance & Insurance at Baylor University in Waco, TX.? My colleague at Baylor, John Martin, mentioned that you will be coming to campus for a conference on Friday, February 23 that he is organizing.?? I am curious whether your schedule might permit staying over that evening so that we can feature you as our dinner speaker for the chartering ceremony of Gamma Iota Sigma, a national risk management fraternity.? For that matter, would you also possibly be available to make any presentations to undergraduate and graduate students on the previous day (Thursday, February 22)?? What I have in mind is a presentation similar to the presentations you made last spring to my LSU classes.?

Thank you for your consideration of this request.? I am looking forward to seeing you once again.

John,

I shall be traveling Thu and Fri this week and Mon and Tue next week. Please, give me a call Tuesday morning and I shall carve out an hour from my schedule to discuss the paper. Stinson will be gone for three weeks so we have to do the work without him.

Alternatively, we can delay the conversation till next week.

Vince

"John D. Martin" <J_Martin@baylor.edu> on 09/12/2000 04:23:34 PM To: vkamins@enron.com cc: Subject: Update

Vince,

Sorry I haven't been pressing you on the paper but there's always more to do than we have time for. However, I had a phone call from the editor encouraging me to get the paper to him by Christmas so it could serve as the centerpiece of his energy issue. His comment to me was "everyone wants to know what Enron's doing". So, with that said I'll try to put together a list of materials that I have collected and maybe we can have a phone conversation to get your ideas on a plan to put the paper together. The Harvard cases do a nice job of laying out institutional and historical details but we will need a "tack" or theme to begin the writing process.

By the way, we have managed to delay the Spring Texas Finance Festival one week so that it will not coincide with Easter (hope you can now attend). We didn't have too many problems with the Easter weekend but there were some and we would prefer not to use that weekend either.

Hope all is going well for you guys. Tell Stinson hello for me.

Your friend,

John

John,

It does not sound silly to me. I don't get that many opportunities to sit down with those guys in a relaxed atmosphere and chat.

I shall read the notes and get back to you. I have just come back from Philadelphia and have to catch up with a few things.

Vince

"John D. Martin" <J_Martin@baylor.edu> on 12/06/2000 09:39:50 AM To: vkamins@enron.com cc: Subject: Good morning

Vince,

i know that you are in Philadelphia today but wanted to ship you my "first pass notes" before I leave town in the morning. Please edit/add to or delete anything you think is appropriate. My objective in the notes is just to get things down on paper before too much time has passed. When I place something in quotes this indicates a direct quote.

I'll give you a call next week when I get back to town. Thanks again for a truly memorable experience. I plan to frame Jeff's Enron model. It may sound silly to you guys but we academics really appreciate opportunities like the one I got on Monday. What a truly spectacular day.

Take care,

John

p.s. Andy gave me his note card describing the demand for a peaking plant but I wasn't able to get him to sign it. I hope I did not offend him by asking for his signature on that silly graph. After I left his office it occurred to me that he might think I was making light of him. Please explain to him that I was not and will treasure his simple model as capturing the essence of optionality in a real asset. - EnronInterviewNotes.doc

MathWorks Training in Austin, TX

Sender	mathworks-mail@mathworks.com
Recipients	[' vkamins@enron.com ']
File	kaminski-v/deleted_items/2396.

Dear Vince Kaminski,

We are pleased to announce that The MathWorks will be conducting training courses for beginner and intermediate users of MATLAB, Simulink and Stateflow in Austin, TX on December 3 - 7.

The following courses will be offered: -MATLAB Fundamentals and Programming Techniques (two-day course, \$1000.00) December 3 - 4

- Modeling with Simulink (two-day course, \$1000.00) December 5 - 6

- Modeling with Stateflow (one-day course, \$500.00) December 7

All courses are taught in an interactive, hands-on setting by an experienced MathWorks engineer. To learn more about individual classes, visit: www.mathworks.com/support/training/courses.shtml

There are three easy ways to register: - Visit The MathWorks Web Store at: www.mathworks.com/store (for credit card registration only) - FAX your purchase order to 508-647-4468 (Attn: Training Coordinator) - Send a check (payable to The MathWorks, Inc.) to: Training/Shirley Jeffreys The MathWorks, Inc. 3 Apple Hill Drive Natick, MA 01760

Courses will be held at: Knowledge Alliance 2113 Wells Branch Parkway Suite 500A Austin, TX 78728 (512) 989-8588

If you are unable to attend training in Austin, we would like to invite you train on-site at our Natick, MA facilities. Visit www.mathworks.com/support/training/schedule.shtml for a complete schedule of training dates and locations.

We look forward to seeing you in Texas in December!

Sincerely,

The MathWorks Training Services

Proposal submission

Sender	j_martin@baylor.edu
Recipients	['sgibner@ect.enron.com', 'vkamins@enron.com', 'paris@fma.org']
File	kaminski-v/all_documents/3029.

Francois and Kent,

Hope this proposal reaches you in time for consideration for the upcoming FMA-European meeting. I normally don't like to commit myself to a proposal but in this case I'm very comfortable doing so in light of the status of the project. As you will see this "clinical" paper is a study of strategy formulation in a very innovative company that uses financial derivatives in conjunction with real asset investments. The firm, Enron, has been the most innovative company in America for more than five years now and has expanded its strategy abroad. We have the unique opportunity to document the firm's strategy from the inside with my co-authors being members of the corporate research staff that manage the pricing of the energy derivatives in which the firm makes a market, as well as provide the analysis upon which firm risk positions are managed. Although, specific Enron projects have been documented and published, noone has captured the story of the company visionaries that formulated and executed the firm's business strategy. Of course, what makes the story of particular interest to finance scholars is the fact that the strategy hinges in very important ways on financial innovations. This is going to be a very informative and fun story to tell and I hope to bring along my colleagues from Enron to Paris for the meeting.

Thanks for asking me to join the program advisory board and I look forward to your comments on the attached proposal.

Sincerely yours,

John - Enron Transformation Paper.doc

Donna,

Jeff Shankman will join me for the kickoff. We would like to invite the students and faculty members to dinner, following the presentation.

Any recommendations regarding the restaurant?

Vince

Tiger Team Hosts, Faculty, Students and Teaching Assistants:

This is to confirm the date, time and location for the upcoming Tiger Team Kick-Off. The Enron project date will be Wed., Dec 6 at VH 210 from 3:00-5:00pm. The purpose of the Kick-Off Meeting is for the teams, faculty, TA's and hosts to meet, learn more about the hosting organization and to further discuss the project.

For hosts who may need a campus map, please see <http://www.upenn.edu/fm/map.html> From the 30th Street train station, it is a quick taxi ride to Spruce St and 37th St.

The Inn at Penn, a new hotel, is one block from campus, if lodging is necessary. The phone number there is 215.222.0200. Please mention you will be at Penn for business. The address is : The Inn at Penn Sansom Common 3600 Sansom Street Philadelphia, PA 19104

Hosts, please let me know the names and titles of those representatives who will be attending the Kick-Off. Also, let me know if you will need technology (laptop for ppt or overhead for slides) for presentation purposes.

If you have any questions, please feel free to contact me.

Sincerely, Donna Piazzese Program Director Field Application Project The Wharton School Univ. of Pennsylvania (215) 573-8394 (215) 573-5727 fax fap@management.wharton.upenn.edu piazzese@wharton.upenn.edu

Dear Vince,

I am following up concerning your upcoming speaking engagement at Baylor on evening of February 23. Of course, I'll plan to see you during the afternoon at John Martin's "new economy" conference. That evening, you will be the dinner speaker for the official chartering ceremony of the Gamma Iota Sigma Risk Management and Insurance fraternity. We are hoping for a really good turnout that evening, and expect guests not only from around Texas but also possibly other parts of the country. I am not sure what your travel plans are, but I did take the liberty of setting up a guaranteed reservation for you at the Marriott Courtyard (Confirmation #84857419). Let me know if you don't need the reservation, but otherwise it will be available to you.

I also am interested in finding out whether I might be able to attract you to campus on another occasion to speak to my corporate risk management classes. Perhaps we can discuss this possibility when we see each other about three weeks from now.

Sincerely, with best regards,

Jim Garven

Dear Stinson,

I would like to call your attention to Rusty Parks, who is an MBA student here and has been serving as my research assistant since last fall.? Rusty is a very outstanding individual with a very impressive work ethic and interest in topics such as financial engineering and technology, particularly as these issues pertain to the energy industry.?? In fact, you met Rusty during your recent visit to Baylor (specifically, last month over dinner at the Gamma Iota Sigma chartering ceremony).

I happen to know that Rusty is already scheduled to visit Enron for an interview for a summer internship on April 19.? He has been invited by Althea Gordon.? If there is any possibility that you could meet with him during his visit, I am sure that he would be most grateful.? Rusty is one of the very best research assistants I have ever had, and I am sure that Enron would benefit from having him aboard during the coming summer.

Sincerely,

Jim Garven

P.S.: Please find Rusty's resume attached to this email.

Sheridan Titman <titman@mail.utexas.edu> on 02/29/2000 05:29:19 PM To: Vince J Kaminski/HOU/ECT@ECT cc:
Subject: this and that

Hi Vince:

I haven't talked to you in a while and wanted to touch base with you on a couple of issues.

1. Is there someone at Enron who would be interested in speaking to our MBAs about real options? Jim Dyer from our management science group is interested in having someone for his decision analysis class this spring. Also, I am thinking about having a panel discussion in the Fall on valuation issues.
2. I recently received a phone call from the editor of the Journal of Applied Corporate Finance, which is a practioner journal sponsored by the Bank of America and Stern Stewart which is distributed to academics and major corporations. They are doing a special issue on Energy and are interested in an article on how energy derivatives are used for risk management. Are you aware of anyone from Enron who has written such an article?
3. Last fall when you visited us at UT we discussed the possibility of giving lectures to Enron employees on valuation. Ehud and I sent you a proposal but didn't get a response. Is there still an interest in this.
4. Murray Carlson and I are developing a general equilibrium model that we think is potentially useful for valuing oil and gas derivatives as well as real investments. If you think this approach might be potentially useful for Enron, we would be interested in presenting our model to your research group.

I look forward to hearing from you soon.

Best regards,

Cindy,

Yes, it's just around the corner and we have our very best program ever. Our web site is up at

<http://hsb.baylor.edu/html/martinj/festival2.html>

check it out. Actually, I was waiting for the final version of the program from Sheridan to post it before getting in touch with you this week. We are planning on a room capacity group of 45-50 folks and are finalizing the plans for entertainment for Friday and Saturday night on the riverwalk. Bill is handling the arrangements this year and I'll pass this message on to him as well.

Do you think we could get an Enron speaker for Saturday's luncheon? Last year was fabulous and would be hard to top but we'd like to try. San Antonio should be a bit easier on the speaker too. Let me know what your thoughts are on everything including the speaker.

Bill and I are leaving town Wed afternoon to go to a Harvard conference so maybe we could talk before then.

We're getting excited and want to get you guys involved for it is your personal (and financial) support that makes the conference really work.

John

Vince,

I appologize for shipping another version of the paper so soon after the last. However, my wife picked me up for some last minute shopping at noon and I wasn't sure I would get back to this before leaving tomorrow. The only changes in the two documents related to a sentence or two in the intro plus the addition of "Unused information" at the end of the document. The unused stuff is made up of notes I made from Hamel, some news stories, press releases, and random thoughts. We probably won't use any of this stuff but I wanted you to have it just in case it might prove useful.

The challenge we face at this stage (and where I can most use your help) is in documenting Enron's risk management functions in a meaningful way. This may be best done through examples or in some other way. I think that our audience would appreciate our including some numerical and detailed examples (even if they are to be placed in boxes or sidebars that don't interrupt the flow of the article. If you'll make a pass at what you feel is appropriate I'll gladly polish on the words as i try to learn about what you are doing myself.

Vince, I really am enjoying this learning experience. You guys make a wonderful "lab".

Sally and I are driving to Louisiana to pick up her mom tomorrow and then driving to New Orleans and back to Waco by Saturday. However, I will check in my e-mail regularly.

Your friend,

John

Deborah,

Thanks for your message and the update about the course. I have received very good feedback about the workshop and I can only regret I could not attend it myself.

Your invoice has been entered into the system for immediate processing.

Vince

-----Original Message-----

From: Deborah Barrett <barrett@rice.edu>@ENRON Sent: Wednesday, November 21, 2001 12:17 PM To: vkamins@enron.com Cc: Crenshaw, Shirley; betho@rice.edu Subject: Workshop Invoice

Dear Vince,

I have attached the invoice for the workshop that Beth O'Sullivan and I conducted for your group last month as well as a summary of the workshop evaluation. I am sorry for the delay, but we were waiting to receive more of the workshop evaluations so that we could provide you a more complete assessment of the workshop by the attendees. As it is, we only collected 11 responses of the 17 attendees.

I will also send you a copy of this invoice in the mail and will be glad to send you the actual evaluation forms completed by the attendees if you would like to have them.

As mentioned in the attached, we enjoyed working with your group and hope that you can see the difference the training made in the presentation ability of the attendees.

If you have any questions about the attached invoice, please do not hesitate to call me at 713-348-5394.

Again, thanks for bringing us in to conduct the workshop. I sincerely hope that you are well despite any changes taking place around you and that you have a great Thanksgiving holiday.

Sincerely,

Deborah

Hello all,

The program for the 2000 Texas Finance Festival has been formalized and can be found on our web site at

<http://hsb.baylor.edu/html/martinj/festival2.html>

I do need to remind you of a few things before we converge on San Antonio. First, be sure to contact the convention hotel and make your reservations. At last count there were only 6 rooms left. Second, I need a completed application form from everyone so that we can get an accurate meal count. I am attaching the program announcement so you can fill out the appropriate boxes for meals and numbers of guests in the event you have not sent in a form.

Remember that we are starting the conference off with a luncheon on Friday so plan on arriving early Friday or coming in on Thursday evening if you can. Our hotel is right on the river and there are lots of restaurants and interesting things to visit in the immediate area (the Alamo is across the plaza from the hotel).

We are making plans for spouses and children to attend both the dinner on Friday and Saturday evenings. The Friday evening dinner begins at 6 p.m. so that we can be done in plenty of time for our private guided tour of the Alamo at 8:00 p.m. For Saturday we are still working out plans for the evening so stay tuned.

There will be more information later as the conference nears. Looking forward to seeing you all and in beautiful, sunny San Antonio.

John

"John D. Martin" <J_Martin@baylor.edu> on 11/05/2000 05:55:41 PM To: vkamins@enron.com cc: Subject: Hello Vince
Vince,

A couple of things. First, I'm planning on your arrival at Baylor sometime the afternoon of Monday, November 13. I want to set up a small seminar for our faculty if you want to do it. I will schedule it for 4 pm so if you can arrive in Waco (Continental has several flights in each day) sometime in early afternoon I'll pick you up. The Ex MBA class begins at 6 p.m. and I'll set you up to speak first for about an hour with q&a to follow. How about putting together some thoughts related to our paper? You can do the same talk for the faculty in the early afternoon. You and I can get then together on Tuesday morning to work on the paper. I have a 1 p.m. class on Tuesday is my only constraint. If you have time to hang around we'll do the talk a third time in that class. By then I suspect we will have made some real progress.

Next point, we have both Ken Lay and Jeff Skilling set up for Dec 4th in the afternoon. I plan to get some questions together for them based on our discussions next Monday and Tuesday.

I'm really looking forward to seeing you next week and to working on our paper.

Have a great week. I'm off to Austin and New Orleans this week, thus the reason for the early message on the class a week from tomorrow.

Take care.

John

p.s. Take a look at my web site for a review of the spring "new economy and business education conference". By the by, I need a short bio-sketch on you for the site and for my introduction to the faculty and the class.

FW: Draft of Hogan/Harvey Paper on FERC's Market Based Rate

Sender	j.kaminski@enron.com
Recipients	['vkaminski@aol.com']
File	kaminski-v/sent_items/254.

-----Original Message-----

From: bounce-alliance_info-90961@listserver.eei.org@ENRON On Behalf Of "The Alliance of Energy Suppliers" <alliance@eei.org> Sent: Tuesday, December 18, 2001 4:22 PM To: Alliance Information Subject: Draft of Hogan/Harvey Paper on FERC's Market Based Rate Initiatives Impacts and Remedies

Please review the attached documents and provide us comments by COB tomorrow, Wednesday, December 19, to assist in finalizing EEI and the Alliance of Energy Suppliers filing in the Market Based Rate proceedings. Attached you will find a market assessment and impact predictions of noted economists, Bill Hogan and Steve Harvey.

If you have any questions, please do not hesitate to contact us at alliance@eei.org or (202) 508-5098

EEI's Comments/Recommendations on Hogan/Harvey Paper The theoretical discussion (from the second full paragraph on page 3 through the end of page 5) should be moved to the end as a technical appendix. I'm concerned that if it stays in its current place, readers will be thrown off track and maybe even stop there.

The last two paragraphs of section III.A. are very hard to read (page 7). Whether they are necessary is a question I have not yet considered.

Their advisement against price caps (see section V.i. at pages 19-20) will run counter against some of our wires members.

Their recommended alternatives (section VI, pages 20-23) are only loosely tied to my work request. I am uncomfortable with proposals related to plant divestiture for large sellers (pages 21-22) and minimum interconnection standards (page 22.)

On another front, a comment came in suggesting that the definition of incremental cost should include accelerated (physical) depreciation.

Vince

"Kathy Ensor" <kathy@stat.rice.edu> on 04/18/2000 11:32:27 AM To: <vkamins@enron.com> cc: Subject: Possible hire?

Dear Vince,

A faculty member in our department, namely Dr. Keith Baggerly, is interested in pursuing other employment. He is currently an assistant professor in our program and a highly valued member of our department. We hate to lose him, however his interest has shifted from the academic arena to one of high level but practical application and development of statistical methodologies including stochastic modeling.

Keith is actually a graduate of our Ph.D. program; he was in the same group of students as Martin Lawera. Keith spent several years at Los Alamos National Lab before we recruited him back to Rice. He has been on our faculty now for three years and it is my expectation (and that of my colleagues) that if he remained he would receive tenure.

Keith has a strong interest in financial models and the background to support his interest. He is also a leading expert in statistical computing, empirical likelihood, categorical models and areas of statistics falling under the general bailiwick of "data mining". He is a creative thinker.

I do not know if there are possibilities for Keith within your group, however I believe it is an excellent match of talent and objectives. Would you have an interest in speaking with Keith? If so, I will suggest that he contact you.

Best regards,

Kathy Ensor

Dear Dr. Kaminski,

Let me briefly introduce myself, I am the Director of Corporate Relations for the School of Engineering at Stanford University. In this role, I am always on the watch for ways to bring our faculty together with companies that have an appetite for engagement with top tier research institutions.

I believe you know Hill Huntington, who is a senior researcher with Stanford's Energy Modeling Forum. He suggested I get in touch with you for some ideas about contacts at Enron. I'm in the process of planning a trip to Texas in early May along with my colleague Donna Lawrence, the university's Director of Corporate Relations. We were hoping to be able to include a stop at Enron on our itinerary. Right now it appears that Friday, May 4th would work best for us but we're at the very beginning of our trip planning.

The purpose of our visit would be to review the current relationship between Enron and Stanford, to give you an overview of current priorities in the School of Engineering, and ask for your help in identifying the best points of contact.

I look forward to hearing from you about your availability,

Sincerely, Susan Hansen

Good afternoon,

I just want to give you a reminder about the one-page questionnaire regarding arrival and departure times for the workshop. Your responses will make planning a bit easier on this end. Also, please get me your "one-page" background statement as soon as possible. I am attaching Michael Froehl's to give you some guidance (thanks Michael, I thought I was going to have to prepare mine first).

Let me also tell you that the television producer has requested 15 minutes of each of your time either the morning of the 23rd before the luncheon or after the workshops to do individual interviews. They will then work these individual shots into the final edited program (bring your best TV smiles). By the way, I have been assured by the producer that we have final

say over whether particular comments are edited in or out of the final product so we can all relax, this is not live TV.

I'll be out of town the end of next week but hope to have all my plans put together the following week so please respond to both the questionnaire and the request for a one-page background/positions/ideas write-up.

Thanks guys and I'm looking forward to seeing you all very soon.

John

p.s. In case you've misplaced it I have appended a copy of the questionnaire.

Vince,

one of my colleagues here at Baylor is writing a book about "the business of heaven" in which he interviews prominent business leaders. Bob Darden is his name and he's a former journalist and nice guy. He would like to contact Ken Lay about being one of his interviews. Do you think this is possible? If so, could you give me an address/phone numbers that Bob might use to contact Ken's secretary about setting up an interview?

If this is in any way "not ok" please just say so.

See ya,

John

Date: Fri, 30 Mar 2001 11:35:03 -0600 From: Robert Darden <rfd3@flash.net> Subject: Yo! X-Sender: "Robert Darden" <rfd3@pop.flash.net> (Unverified) To: J_Martin@baylor.edu Organization: The Door X-Mailer: Mozilla 4.04 [en]C-FLASHNET (Win95; I) Hi John -- I enjoyed our meeting yesterday. This looks VERY promising. Meanwhile, as I mentioned at the table, I'm getting a little nervous about the book that is due June 1. One of the names on our "wish" list of interviewees for "The Business of Heaven" is Ken Lay at Enron. Would it be possible for you to give me a good address and phone number for Mr. Lay's office? And may I mention your name in the cover letter? I would be forever indebted. I might even buy the next lunch. Bob P.S. Thanks for sharing your concerns about church yesterday, too. I'm genuinely sorry things didn't work out better and feel more than a little embarrassed that I didn't work harder to make you guys feel more welcome and connected. On the other hand, please know that Mary and I will always love you and consider you both friends. I know you'll be happy at Lake Shore -- even as we miss you at 7th!

Vince J Cc: Rosen, Michael B. Subject: Your Presentation at the UT Foundations of Energy Finance Class and
Subsequent Enron Reception

Vince:

Greetings.

Let me once again acknowledge with thanks Enron's generosity in hosting us to a baseball game 7/16. It was only upon reviewing the ticket price at home that I recognized just how generous Enron's hosting was.

As we agreed July 16 - 17, I write at this time regarding the first of three e-mails. In this one, I seek your annual participation in the Foundations of Energy Finance class at UT. Subsequent to your presentation, your Public Affairs colleagues may choose to schedule a reception at which Enron-specific recruiting, internship and other information may be disseminated. For this reason, I cc Director of Public Affairs Mike Rosen.

You sought a proposal of several alternate dates for your presentation. I am pleased to offer the following as alternative dates: Sep. 24, Sep. 26, Oct. 1, Oct. 8, Oct. 10, Oct. 15 and Oct. 17. Let me know if your schedule requires a wider set of alternatives. Also, please advise if you would like the entire 2 1/2 hr. (2 to 5 p.m., including breaks) time slot, or whether you would prefer a subset thereof.

Once we have determined a date, and if a same-day 5 p.m. Enron reception is deemed desirable, I ask Mike or his designee to contact my Assist. Energy Finance Director Angela Dorsey at Angela.Dorsey@bus.utexas.edu (Tel.: 512-232-7386) to coordinate matters.

Best, Ehud

Jim Garven <James_Garven@baylor.edu> on 03/28/2001 01:01:42 PM To: Stinson_Gibner@enron.com cc: vince_j_kaminski@enron.com Subject: recommendation of an outstanding Baylor MBA student for summer internship

Dear Stinson,

I would like to call your attention to Rusty Parks, who is an MBA student here and has been serving as my research assistant since last fall. Rusty is a very outstanding individual with a very impressive work ethic and interest in topics such as financial engineering and technology, particularly as these issues pertain to the energy industry. In fact, you met Rusty during your recent visit to Baylor (specifically, last month over dinner at the Gamma Iota Sigma chartering ceremony).

I happen to know that Rusty is already scheduled to visit Enron for an interview for a summer internship on April 19. He has been invited by Althea Gordon. If there is any possibility that you could meet with him during his visit, I am sure that he would be most grateful. Rusty is one of the very best research assistants I have ever had, and I am sure that Enron would benefit from having him aboard during the coming summer.

Sincerely,

Jim Garven

P.S.: Please find Rusty's resume attached to this email.

Vince,

Great to talk with you this morning and hear that you are well (if not connected). Here's my suggestion for "setting my work platform on fire". On July 27th I am teaching in the Dallas Executive MBA program. John McCormack (Stern-Stewart, NY) is going to come down to help out with the class and I would like you to come as well. If you would like to come in on Thursday evening then you, John, and I can meet and work on a joint project. What I have in mind, generally, is delving more deeply into the actual use of real options in creating synthetic multi-fuel power plants. I have a paper that I assign the class which introduces real options as an attribute of the physical power plant that can switch from oil to gas. When I was writing our paper I read one of your papers that suggested the use of energy swaps to accomplish the same end in a synthetic manner. I would like to "learn more" about how this might actually be done (costs/benefits, etc) and write-up a case study surrounding a specific application. I know this is not rocket science to you but I believe there is value in "translating practice and science to application in the form of educational materials". My standard of "what's valuable" relies on my own ignorance here. I figure that if I don't know it then there are a lot of folks in the profession that might benefit from my learning. Both you and John are very knowledgeable here so I will again sit at the feet of the masters.

That's the project, now let's talk about the class. The idea of the class is to let John do some Stern-Stewart stuff (performance measurement and compensation) and let you talk about how Enron uses energy derivatives to facilitate trade in the energy business. I'm sure we will have had some brownouts in California by the time of the class will be very interested in the energy business and the way that Enron has redefined it.

Hope you can make it.

John

Engineering meetings in Broomfield CO on March 9 and 10

Sender	ravi.thuraisingham@enron.com
Recipients	['vince.kaminski@enron.com', 'stinson.gibner@enron.com']
File	kaminski-v/all_documents/10162.

Hi Stinson, as per our discussion, which we will expand upon when we meet later today, my currently role in Hamachi is better characterize as combination of deal support (from the engineering perspective), facilitating my work with Jean Mrha (via Erik Simpson) on the initial load forecast and general requirements document development. None of this is technical by any means. If anything, it is more like engineering consulting (from deal perspective) by EBS Research to John's group. I will bring it up with John tomorrow night about bringing our technical guys on such road trips so that they can get involved with his group even though no optimization modeling work may need to be done. For this I will use Samer and/or Chonawee but we need to be certain that they are available on such on-call basis as stated below. John is very clear and specific about who he ask to be at such meeting and when, etc. Normally he does not want any deviations. So if we put someone on such jobs, they have to be able to travel on-call anywhere, any place. That is the time pressure he is working with.

He want me to be the primary contact for such deal support effort. But I will ask to bring along our technical guys on such trips so that they are plugged in etc... I will recommend this to John for the next deal that he is planning.

06:46 PM -----

tomczyk@wharton.upenn.edu (Michael Tomczyk) on 05/18/2000 10:56:08 AM To: vkamins@enron.com cc: Thomas.Piazze@wharton.upenn.edu Subject: Wharton Event-June10-Insead

Vincent,

It was truly a pleasure getting to know you in our meeting yesterday, and I look forward to the prospect of exchanging views in the future on a variety of topics pertaining to emerging technologies.

Per our discussion, I've enclosed three files that include an invitation, agenda and rsvp form for the June 10 symposium on High Tech Acquisitions at Insead. If you or the individual(s) who will be attending have any questions, please email: Phanish Puranam at: PHANIS20@WHARTON.UPENN.EDU or you can call him at 215-898-1231.

This initiative will be expanded during the coming year and I believe that Enron's involvement will give the company access to some of the early research in progress as it unfolds, and of course, if you become involved as a partner in the Emerging Technologies Program you would have opportunities to help guide the direction of the research which is one of the partnership "benefits."

Our next upcoming events are scheduled for:

Friday, September 8 "WHAT NEXT ON THE INTERNET?" This is a faculty update day with industry partners also invited. We will co-sponsor this with Wharton's major e-Business initiative. Major issues addresses include "New Economics of the Web" and "Internet, Anywhere."

Friday, October 20 "FIRST MOVER ADVANTAGE, SHAKEOUTS & SURVIVAL STRATEGIES" Designed by the ET core group and presented in collaboration with the e-Commerce Forum.

As I indicated during our discussion, participation in the Emerging Technologies Management Research Program is by invitation and on behalf of our core faculty, I am pleased to extend an invitation for Enron to join the program.

To assist in your decision, we recommend having a representative attend the symposium in Paris on June 10 to "test drive" the program.

I'll send you a formal invitation which you are free to accept at your convenience, should you agree that Enron's participation in the ET Program would be of value.

Please call or email if you have any comments or questions.

best regards, Michael

To: vkamins@ect.enron.com cc: mmfoss@uh.edu Subject: Dr. Michelle Foss- Energy Institute

Dear Mr. Kaminski,

I am writing to ask a favor for Dr. Michelle Foss. As you know we will be running our "New Era" program from May 14- May 25th. Dr. Foss was wondering if on May 22nd (between 1:30pm and 4:00pm) , we would be able to bring our participants for a tour of your trading floor. At this time we will have 30-40 people, and since only 10 people maximum should really be

on a trading floor we need to have 4 companies among which to divide our participants. At this time, we have a floor from Coral Energy, and are working with Duke, and I will be contacting Mr. Paul Roberts to arrange for the Reliant Energy trading floor. I was hoping very much that you would be able to direct me to the right person to contact to arrange this tour. Will this be a possibility? I really appreciate your help very much. Thank you!

Best Regards,

Aisha Jamal Energy Institute 713-743-4634

Latest draft

Sender	j_martin@baylor.edu
Recipients	['dchew@sternstewart.com', 'vkamins@enron.com']
File	kaminski-v/all_documents/1806.

Don,

Attached is my latest effort. It entailed fairly drastic "restructuring and reorganization" of the earlier draft. My revision effort has been directed at improving the focus of the paper. The new story is the following:

1. Enron was formed as a regulated gas pipeline company in the mid-eighties. 2. Economic and competitive conditions conspired to force a dramatic reorganization of the company almost immediately. The result was the creation of a new, unregulated energy trading operation. The strategy of the new unit was to capitalize on business opportunities in the deregulation of markets that was occurring at the time (mid-eighties until now). 3. The business model adopted for the new unregulated business was that of a "gas bank". The analogy to a commercial bank posed a very difficult problem to Enron's management in that there was no source of liquidity to the market from a central bank authority. As a consequence Enron had to develop its own very elaborate risk management procedures. 4. Another consequence of the new business model was that it required a different set of employee skills and talents. Specifically, it required were bright, energetic and innovative individuals capable of identifying entrepreneurial opportunities and starting new businesses. Furthermore, a new, flatter organizational structure entailing decentralized decision making was required to facilitate quick response to changing market conditions. To monitor and manage this new "empowered" labor force required that the firm develop new personnel policies and procedures. 5. Three primary tools of personnel management were adopted: (i) measure performance semi-annually, (ii) tie compensation closely to performance, and (iii) allow personnel free movement within Enron to seek out the best opportunities. 6. Other attributes of the Enron model include consideration for asset optionality, recognition of the value of networks in adding value to trading platforms, and the use of mark-to-market accounting for business transactions as a means of ensuring transparency and promoting prompt actions.

If my "story line" sounds better than the draft I have attached its because its the last thing I've written. At any rate I look forward to hearing your comments and to getting this wrapped up.

Thanks and i look forward to seeing you in February.

John

Mid-Year 2000 Performance Feedback

Sender	perfmgmt@enron.com
Recipients	['vkamins@enron.com']
File	kaminski-v/all_documents/11193.

NOTE: YOU WILL RECEIVE THIS MESSAGE EACH TIME YOU ARE SELECTED AS A REVIEWER.

PLEASE NOTE THAT THERE IS ONLY TWO DAYS REMAINING TO COMPLETE FEEDBACK IN THE SYSTEM

You have been selected to participate in the Mid-Year 2000 Performance Management process by providing meaningful feedback on specific employee(s) that have been identified for you. Your feedback plays an important role in the performance management process, and your participation is very critical to the success of Enron's Performance Management goals.

Please provide feedback on the employee(s) listed below by accessing the Performance Management System (PEP) and completing an online feedback form as described in the "Performance Management Quick Reference Guide". You may begin your feedback input immediately. Please have all feedback forms completed by the date noted below.

If you have any questions regarding PEP or your responsibility in the process, please call the PEP Help Desk at the following numbers:

In the U.S.: 1-713-853-4777, Option 4 In Europe: 44-207-783-4040, Option 4 In Canada: 1-403-974-6724 (Canada employees only)

Or e-mail your questions to: perfmgmt@enron.com

Thank you for your participation in this important process.

The following list of employees is a CUMULATIVE list of all feedback requests, by operating company, that have an "OPEN" feedback status. An employee's name will no longer appear once you have completed the feedback form and select the "SUBMIT" button in PEP.

Christie,

Look fwd to the trip.

Shirley is sending you my itinerary. When are you flying back? What about a dinner on Tuesday?

Vince

From: Christie Patrick on 02/16/2001 10:10 AM To: stamer@wharton.upenn.edu, piazzet@wharton.upenn.edu cc: Vince J Kaminski/HOU/ECT@ECT, Jeffrey A Shankman/HOU/ECT@ECT Subject: Wharton Business Plan Competition

Hi Anne!

I'll be at Wharton on Tuesday the 20th--perhaps we can get together to discuss this sometime later in the afternoon. What does your schedule look like?

Thanks!

--Christie. ----- Forwarded by Christie Patrick/HOU/ECT on 02/16/2001 10:08 AM -----

"Stamer, Anne" <stamer@wharton.upenn.edu> 01/26/2001 03:47 PM

To: "'christie_patrick@enron.com'" <christie_patrick@enron.com> cc: Subject: Wharton Business Plan Competition

Dear Christie:

Thank you for your voice mail. Things are moving along nicely with the competition. Phase II deadline was today, so we hope to have some statistics in the next few weeks. I have attached the statistics from Phase I, for your files. Listed below are ways that Enron could be involved, let me know in which (or all) of these Enron would be interested in participating.

* We want to start listing our sponsors, so it would be really good if we could get your logo.

* Also, does Enron wish to be a Judge in Phase III and the Venture Fair (VF)? For Phase III, we would mail each Judge about 3 full blown business plans to be ranked. We anticipate this taking no more than 1 afternoon

* For the VF, we would need a Judge to be present for the entire day. The VF is by invitation only and we anticipate about 350 students, venture capitalists, business entrepreneurs and faculty. The VF will be held in Philadelphia on April 30th.

* At the VF we will provide an opportunity for our sponsors with a 6 foot table for exhibits or materials to hand out. We will need to know if you wish to use the exhibit space.

* We plan on providing our 25 semi-finalist teams with one-on-one mentoring. If Enron is interested, that would be about 1/2 or 1 day commitment.

* There might be an opportunity for a workshop to the University community. Would Enron be interested in participating in something like this?

I look forward to working with you to make this year's BPC a success. Thank you.

04:16 PM -----

<avi.hauser@effem.com> on 06/20/2000 03:12:53 PM To: "Vince J Kaminski" <Vince.J.Kaminski@enron.com> cc: richard.larsen@effem.com Subject: Introduction

Vince:

As way of introduction, I wanted to write a bit about Mars inc. and then about CDS, the unit I head. Mars is a private company, considered to be the largest privately owned manufacturing company in the world. Mars is not in the habit of disclosing its finances, so the best I could do is refer to Forbes' estimate of \$15 Billion annual revenue and to the profit margins of similar companies between 5-12%. Mars is in the business of manufacturing confectionery (m&m, Dove bar, skittles, twix, - all (R)) food (Uncle Ben rice (R)) pet food (Pedigree, Whiskas Waltham (R)) and other products.

Mars has prospered during the years because of a unique philosophy that emphasizes the long term goals of the company. Part of the philosophy is to look for win-win solutions with its suppliers, customers and partners.

As can be understood from the nature of the company, a large chunk of its expenses goes towards purchasing commodity like products, and hence the history of researching those commodities and the weather that influences their supply and the demand (people eat less ice cream in the winter and less chocolate in the summer).

CDS has a history of few decades in forecasting weather and has been very successful, with an envious track record, in helping Mars get a competitive advantage in these arenas. CDS is a global group (in 4 countries across two continents) which supports the purchasing function and the corporate at large in these and other arenas. It is a multidiscipline and multinational team with a lot to offer.

Not having a ready access to the energy markets, and with a risk profile based on manufacturing expertise, Mars has decided to look for potential partners in this area. Enron presence in the market place certainly makes it an interesting party to talk to.

In talking to Enron, we are careful to suggest that Mars is not committing to anything at this point, and all we are after is to find out if there is an interest to pursue the opportunity we discussed in the future.

I am looking forward to our video conference call.

Kind regards,

Avi

Dear Stinson,

I would like to call your attention to Rusty Parks, who is an MBA student here and has been serving as my research assistant since last fall.? Rusty is a very outstanding individual with a very impressive work ethic and interest in topics such as financial engineering and technology, particularly as these issues pertain to the energy industry.?? In fact, you met Rusty during your recent visit to Baylor (specifically, last month over dinner at the Gamma Iota Sigma chartering ceremony).

I happen to know that Rusty is already scheduled to visit Enron for an interview for a summer internship on April 19.? He has been invited by Althea Gordon.? If there is any possibility that you could meet with him during his visit, I am sure that he would be most grateful.? Rusty is one of the very best research assistants I have ever had, and I am sure that Enron would benefit from having him aboard during the coming summer.

Sincerely,

Jim Garven

P.S.: Please find Rusty's resume attached to this email.

Jim Garven <James_Garven@baylor.edu> on 03/28/2001 01:01:42 PM To: Stinson_Gibner@enron.com cc: vince_j_kaminski@enron.com Subject: recommendation of an outstanding Baylor MBA student for summer internship

Dear Stinson,

I would like to call your attention to Rusty Parks, who is an MBA student here and has been serving as my research assistant since last fall. Rusty is a very outstanding individual with a very impressive work ethic and interest in topics such as financial engineering and technology, particularly as these issues pertain to the energy industry. In fact, you met Rusty during your recent visit to Baylor (specifically, last month over dinner at the Gamma Iota Sigma chartering ceremony).

I happen to know that Rusty is already scheduled to visit Enron for an interview for a summer internship on April 19. He has been invited by Althea Gordon. If there is any possibility that you could meet with him during his visit, I am sure that he would be most grateful. Rusty is one of the very best research assistants I have ever had, and I am sure that Enron would benefit from having him aboard during the coming summer.

Sincerely,

Jim Garven

P.S.: Please find Rusty's resume attached to this email.

Vince ----- Forwarded by Vince J Kaminski/HOU/ECT on 02/05/2001 11:59 AM -----

"John D. Martin" <J_Martin@baylor.edu> on 12/19/2000 10:10:11 AM To: TimOpler@Yahoo.com, dpalumbo@sapient.com, Raj_Srivastava@bus.emory.edu, vaysman@mail.utexas.edu, vkamins@enron.com, Cynthia.Paoli.cpaoli@sternstewart.com, Bill.Petty.Bill_Petty@baylor.edu, michael_froehls@mckinsey.com, Corey.carbonara@systems.tstc.edu, Michael_Korpi@baylor.edu, Klifford_Kuehl@baylor.edu, Terry_Maness@baylor.edu, dpalumbo@sapient.com, J_Martin@baylor.edu cc: Subject: Update on Spring conference

Hello everyone,

I wanted to get a message out to each of you to update you on the February 23 conference plans. The conference promises to provide an exciting opportunity to share the ideas of a diverse group of academic and industry professionals on a topic that is dear to all our hearts, the future of business education in the new economy. I will be sharing updates and information with you over the weeks to come but thought it might be useful to start before the holidays.

I am attaching the most recent "description of the program of events" which remains somewhat fluid as we develop it. However, there are some new developments that you will find interesting. First, I have arranged for "filming" of the event by our local public TV station and we will be working toward the development of the best product possible out of the sessions. Second, David Palumbo (Human Code--an internet content provider-http://www.humancode.com/index2.htm-

now owned by Sapient) will join us. David is very knowledgeable about both educational issues (he served on the faculty of the University of Houston for 10 years before joining Human Code). He has some very interesting insights to offer on the future of higher education having now worked from the industry side of the equation). Finally, I am currently reading a couple of books that you may find interesting (Telecosm and The New Barbarian Manifesto). I'm sure there are many more interesting sources of information that you are each aware of and it would be helpful if we all began sharing our notes.

Finally, let me suggest that each of you begin thinking about the issue(s) that you feel most comfortable commenting upon and phrasing "lead in" questions for me. I would like to build a list of such questions to circulate among all so that we begin to get a feel for the range of topics we will encounter in the discussion and begin to formulate our individual opinions.

I hope that this note finds you all anticipating a wonderful holiday season and thank you for participating in this inaugural "think tank" conference on the future of business education.

Sincerely yours,

John - Revised Workshop- Planning.doc

Re: Action Learning Project Information

Sender	vince.kaminski@enron.com
Recipients	['vince.kaminski@enron.com', 'kenneth.parkhill@enron.com', 'spradlin@rice.edu']
File	kaminski-v/_sent_mail/1052.

Kathy,

Enron will be represented by myself (Vince Kaminski) and Kenneth Parkhill.

Vince

Kathy Spradling <spradlin@rice.edu> on 01/05/2001 05:04:21 PM To: (Recipient list suppressed) cc: chamberl@rice.edu, castro@rice.edu, spradlin@rice.edu=20 Subject: Action Learning Project Information

Dear Company Representative,

We are pleased to announce that your company's proposal has been selected as a potential project in the Jones Graduate School of Management's Action Learning Project (ALP) Program. As indicated in the ALP brochure, company representatives are invited to attend the ALP Program Introduction and Student Networking Session on Wednesday, January 10. Please RSVP to Kathy Spradling, MBA Program Coordinator, at 713-348-3313 or e-mail her at spradlin@rice.edu by Monday, January 8 to let her know if you plan to attend the session. Please provide your company name and the names of representatives attending the session so nametags can be prepared. Dress is business casual. Below is the schedule of events:

8:30 9:00 a.m. ? Continental Breakfast and setup of your company table ? Farnsworth Pavilion (located in Rice Student Center)

9:00 9:45 a.m. ? Introduction and Program Overview with company representatives, ALP administration and faculty liaisons ? Farnsworth Pavilion (located in Rice Student Center)

10:00 12:00 p.m. ? Student Networking Session with company representatives and first-year students ? Grand Hall (located in Rice Student Center)

The ALP Program Introduction and Student Networking Session will be held in the Rice Student Center (numbers 10 and 11 on the campus map sent with your acceptance letter). Please contact Kathy Spradling if you need an additional map faxed to you. There is a large amount of construction taking place on campus. Once the Visitor's lot near the Rice

Memorial Center is full, we recommend you park in the stadium lot in the designated Visitor area and take the shuttle bus to the Rice Memorial Center. Make sure to let the bus driver know your destination.

The MBA Program Office has reserved the Grand Hall for the Student Networking Session. Each company represented will have a table set up with signage for your company. You may bring additional materials you feel might be of interest to students such as company brochures, articles and packets. Due to the limited space, we are discouraging the use of display boards in the networking session. Unfortunately, no internet connections will be available for use during the session.

Again, thank you for your interest in Rice. We look forward to working with you, and hope to see you on Wednesday, January 10.

Wharton Business Plan Competition

Sender	christie.patrick@enron.com
Recipients	['melinda.mccarty@enron.com', 'cindy.derecskey@enron.com', 'stamer@wharton.upenn.edu']
File	kaminski-v/all_documents/1804.

Hi Anne!

Thank you for your reply. Enron is delighted to be a part of the Wharton Business Plan Competition!

First, our assistant in the University Affairs Group, Melinda McCarty, will provide you with our logo.

Enron would definitely like to be Judge in Phase III and Participate in the Venture Fair, including the display table.

As to the mentoring and University community program, let's discuss that further so I can better judge our way forward.

After I've had the chance to discuss all of this with our entire University Affairs and Wharton team here at Enron, you and I can get together to plan a more definitive participatory strategy for Enron. I will call you next week.

Again, we at Enron are very enthusiastic about participation with Wharton in this mutually interesting endeavor.!

Best regards!

--Christie. ----- Forwarded by Christie Patrick/HOU/ECT on 01/26/2001 06:33 PM -----

"Stamer, Anne" <stamer@wharton.upenn.edu> on 01/26/2001 03:47:39 PM To: "christie_patrick@enron.com" <christie_patrick@enron.com> cc: Subject: Wharton Business Plan Competition

Dear Christie:

Thank you for your voice mail. Things are moving along nicely with the competition. Phase II deadline was today, so we hope to have some statistics in the next few weeks. I have attached the statistics from Phase I, for your files. Listed below are ways that Enron could be involved, let me know in which (or all) of these Enron would be interested in participating.

* We want to start listing our sponsors, so it would be really good if we could get your logo.

* Also, does Enron wish to be a Judge in Phase III and the Venture Fair (VF)? For Phase III, we would mail each Judge about 3 full blown business plans to be ranked. We anticipate this taking no more than 1 afternoon

* For the VF, we would need a Judge to be present for the entire day. The VF is by invitation only and we anticipate about 350 students, venture capitalists, business entrepreneurs and faculty. The VF will be held in Philadelphia on April 30th.

- Phase I Overview.doc

We are trying to set up our meeting date for the 2001 conference and have run into a snag. We cannot get our San Antonio hotel on the first weekend in April (as last year). However, we can get the hotel and make all our "fun" arrangements for the second weekend in April. However, this is Easter weekend. The good news is that the room rates are substantially lower because it's a holiday. However, we are concerned that holding the meeting on this particular Friday-Saturday will interfere with family plans such that some or many of you may not be able to attend.

My related question to you is this:

Does holding the meeting on the second weekend in April (Easter weekend) pose a problem for you? Please give us your thoughts ASAP even if you think you may not be able to attend this year's conference. We need your opinion to guide our decision.

Thanks and I hope to see you all again next April (sometime)!

John

p.s. We are very fortunate to have Enron return as our corporate sponsor again this year. John D. Martin Carr P. Dear Valued Member ;

Thank you for taking time to write us. I apologize for the frustration you are experiencing with America Online. I appreciate your patience and understanding regarding this matter.

Upon reviewing your account record there was a Failed transaction on your account which was the amount of your subscription to AOL Annual Plan, this bill was just been "Resubmitted" on your next month billing date. So that we can answer your questions and concerns in a timely manner it is requested that along with your response, please include your correct last four numbers of your current payment method.

You may of course contact our Billing department directly at 1-800-827-6364 or 1-888-265-8003 toll free number between 6:00 am to 2:00 am EST. seven days a week and they will be happy to assist You. I do apologized for any inconvenienced this matter has may caused You.

We hope we have provided you with useful information about your inquiry. If you have any further questions, please feel free to write us back. Take care and Wishing you all the best and happiness in Life . We greatly appreciate your AOL membership and Customer Service is important to us. We hope that you were satisfied with the service you have received.

Alaina, Richard, Vince, Tony, Elizabeth and Paula - following are directions to Paula's birthday dinner (6:30 pm) at my house on Saturday night, the 29th

NOTE TO ALL I hope these directions are somewhat clear but.... before you read my directions please be advised that it is a well known fact that Marie Thibaut has absolutely "no sense of direction" !!

Directions to my house - coming in from Beltway 8 North/Sam Houston Tollway - exit onto Tomball Parkway/249 N and exit towards FM1960, turn right on 1960, stay on 1960 for approximately 3 miles.

Turn left on Wunderlich (there is a 24 Hour Gym on the corner) Stay on Wunderlich until you come to 14515 Trophy Club Condos - on the left side of street. Turn left into the condos and press *6070 at the gate entrance. Continue to the left (which bears slightly to the right), pass over 2 speed bumps until you come to the end of street. Turn left and my unit is on the right side upstairs #706. Call me at 281-587-2029 if you have trouble with my directions.

Directions to my house - coming in from I45 - exit at 1960 going West, stay on 1960 for approximately 9 miles. Turn right on Wunderlich until you come to the 14515 Trophy Club Condos - on the left side of street. Turn left into the condos and press *6070 at the gate entrance. Continue to the left (which bears slightly to the right), pass over 2 speed bumps until you come to the end of street. Turn left and my unit is on the right side upstairs #706. Recipients	[shirley.crenshaw@enron.com', 'barb.vanbeyrer@sycamorenet.com', 'vince.kaminski@enron.com']
File	kaminski-v/all_documents/10665.

Hi Barb, please add the following Enron names to your list. I will call to confirm this later today (1/28/00). Krishna and Samer, please go ahead and arrange the travel plans as per the following schedule and my e-mail before.

Kind regards,

Ravi. ----- Forwarded by Ravi Thuraisingham/Enron Communications on 01/28/00 11:10 AM -----

Barb.VanBeyrer@sycamorenet.com 01/28/00 08:56 AM

To: Phil Markwart/Enron Communications@Enron Communications cc: Ravi Thuraisingham/Enron Communications@Enron Communications, Erik Simpson/Enron Communications@Enron Communications, Stinson Gibner@ect, John Griebing/Enron Communications@Enron Communications, Allan Grimm/Enron Communications@Enron Communications, Dorn Hetzel/Enron Communications@Enron Communications, Michael Baker/Enron Communications@Enron Communications, Nicole Gilson/Enron Communications@Enron Communications, Hardeep Luthra/Contractor/Enron Communications@Enron Communications, Larry.Sakauye@sycamorenet.com, Richard Reichardt/Enron Communications@Enron Communications, Susan Wadle/Enron Communications@Enron Communications Subject: Logistics for the Sycamore meeting in Chelmsford next week

Hi Phil, here are the logistical details for our meetings next week at Sycamore in Chelmsford (10 Elizabeth Drive).

Hotel: Double Tree in Lowell. Transportation: Everyone should fly into Boston Monday afternoon/early evening. Chelmsford is about 40-45 minutes from the airport, more in traffic. I can arrange for a car service from the Airport to the Restaurant Monday night for everyone, and have the limo wait for you until we are through with dinner (then everyone can leave there bags in the limo). If some or all want to use this car service, I'll need their flight information by Friday afternoon so I can make arrangements.

Here is the agenda for next week:

Monday: Dinner at 7:30pm - Agresti's restaurant, 175 Littleton Rd, Westford, MA. Directions will immediately follow this email.

Tuesday Meetings at Sycamore 8:30am - 5:00pm Planning Session: - Enron's Business Drivers/Vision - Enron's Optical Networking Architecture - Dinner planned-- location TBD

Wednesday Meetings at Sycamore 8:30am - 5:00pm Planning Session: - Detailed Route Design - Deployment Planning - Dinner planned-- location TBD (Boston?)

Thursday Meetings at Sycamore 8:30am - 4:00pm - Review detailed route designs - Metro area services: access partners - Depart for Airport at 4pm Thursday, or Friday morning depending on flight availability

As of this morning, here is the list of Enron attendees that we are expecting:

John Griebing Dorn Hetzel Phil Markwart Ravi Thuraisingham Stinson Gibner Allan Grimm Erik Simpson Mike Baker Nicole Gilson Hardeep Luthra Richard Reichardt Valient employee (I have no name as of today)

Can you please let me know of any additions or changes to the attendee list? And please send this email to anyone planning to attend that is not on the cc'd list. Thanks.

Please call me today, or over the weekend if you have any questions. My cell phone number is listed below. Look forward to seeing everyone next week!

I still do not have a job description for Vincent's position. Maybe Enron does not have one?

Candace, here is a sample job description. Please check with Vincent's supervisor on modifying this for the job description. This was my best guess, but I may be way off... If so, we have many other generic examples to use instead. Just let me know.

Generic title: Operations Research Analyst (Alternate Titles Analyst Operations Research; Research Analyst) Overview: Provides research support for specific projects and programs. Essential Functions: Projects may involve collecting and analyses data to formulate recommendations, policies or solutions. Marginal Functions: May involve mathematical or simulation models of problem for solution by computers or other methods: Analyzes problem in terms of information and conceptualizes and defines problem. Studies information and selects plan from competitive proposals that affords maximum probability of profit or effectiveness in relation to cost or risk. Prepares model of problem in form of one or several equations that relates constants and variables, restrictions, alternatives, conflicting objectives and their numerical parameters. Defines data requirements and gathers and validates information applying judgment and statistical tests. Specifies manipulative or computational methods to be applied to model. Performs validation and testing of model to ensure adequacy, or determines need for reformulation. Prepares reports to management defining problem, evaluation, and possible solution. Evaluates implementation and effectiveness of research. May design, conduct, and evaluate experimental operational models where insufficient data exists to formulate model. May specialize in research and preparation of contract proposals specifying competence of organization to perform research, development, or production work. May develop and apply time and cost networks, such as Program Evaluation and Review Techniques (PERT), to plan and control large projects. May work in association with engineers, scientists, and management personnel in

business, government, health, transportation, energy, manufacturing, environmental sciences or other technologies.

I look forward to your response.

File	kaminski-v/all_documents/10055.

Hello Nick:

I agree e-mail is much easier.

There is a two-hour time difference between Calif and Texas, i.e., 1:00 pm Texas Time - 11:00 am Calif time.

Would tomorrow at 11:00 am Calif time be ok with you (1:00 pm Texas)? This time is fine for Vince, Tom Gros and Stinson Gibner.

Can they call you and if so, what number?

Please let me know.

Thanks!

Shirley 713-853-5290

Nick Bambos <bambos@stanford.edu> on 03/16/2000 12:28:58 PM To: Shirley.Crenshaw@enron.com cc: bambos@stanford.Stanford.EDU Subject: Re: Visit to Enron

Shirley,

It's easier to communicate by e-mail, since I am moving from meeting to meeting (but I have the laptop always with me).

Please give me a phone number that I could call tomorrow. What is the time difference between California and your location? I think it's 2 hours (CA->TX) - is that right?

I can do the conference call any time from 9-11 CA time. Would that be OK on your side?

Thanks,

Nick

Vince.J.Kaminski@enron.com wrote:

Nick, We can close the loop on our commitment to support the research projects before your visit to Enron. My assistant, Shirley Crenshaw, will call you to set up a conference call with me, Stinson Gibner, and Tom Gros from Enron Broadband Services to discuss all the issues. Friday this week would work for both Tom and me. I think we need about 15 minutes. Vince P.S. Shirley, Nick's phone number is 650 796 8163 (cell), 650-725-5525 (office). Nick Bambos <bambos@stanford.edu> on 03/12/2000 05:32:35 PM To: Vince.J.Kaminski@enron.com, bambos@stanford.Stanford.EDU cc: Subject: Visit to Enron Hello Vince, It was nice seeing you at Stanford and many thanks for the lunch we had together. I really enjoyed our discussions, both at the technical level and otherwise. I promised to send you an e-mail regarding possible dates for a visit to Enron. I delayed it for a week till my schedule was clearer. Let's see if we can get a match with your schedule - mine is rather terrible: Friday, 21st of April looks good. But April 23rd is Easter Sunday, so that may make it difficult for some people at Enron to be around. Let me know if that is the case. I am willing to visit then, because the week after that I am scheduled to be in Japan and in the previous weeks I am all committed on Fridays. Friday, 19th of May is the next possibility, but this probably is too far out. The main problem is that I am operating within a window of opportunity for attracting top students for this research. This window closes by

the end of April, and it would be important for the student support funds to be in place then, so that I can make hard commitments to students and attract top talent. I am already reviewing files of students who have approached me for PhD advising, and I am in a mode of doing "soft commitments to star-level students" to get this research and its potential on their radar screen. Top students are highly sought after by advisors and I want to be an early player in this competition. Does my visit to Enron have to happen before we can set up the project and student support at Stanford? If so, doing it before the end of April is important for getting top people. If the visit can happen after we get the ball rolling, then we can schedule it in May. I assume there will be multiple visits both ways when the project gets going. Please let me know what you think. Best Regards, Nick

Sent: Tuesday, July 31, 2001 5:15 PM To: Kaminski, Vince J Cc: Rosen, Michael B. Subject: Your Presentation at the UT Foundations of Energy Finance Class and Subsequent Enron Reception

Vince:

Greetings.

Let me once again acknowledge with thanks Enron's generosity in hosting us to a baseball game 7/16. It was only upon reviewing the ticket price at home that I recognized just how generous Enron's hosting was.

As we agreed July 16 - 17, I write at this time regarding the first of three e-mails. In this one, I seek your annual participation in the Foundations of Energy Finance class at UT. Subsequent to your presentation, your Public Affairs colleagues may choose to schedule a reception at which Enron-specific recruiting, internship and other information may be disseminated. For this reason, I cc Director of Public Affairs Mike Rosen.

You sought a proposal of several alternate dates for your presentation. I am pleased to offer the following as alternative dates: Sep. 24, Sep. 26, Oct. 1, Oct. 8, Oct. 10, Oct. 15 and Oct. 17. Let me know if your schedule requires a wider set of alternatives. Also, please advise if you would like the entire 2 1/2 hr. (2 to 5 p.m., including breaks) time slot, or whether you would prefer a subset thereof.

Once we have determined a date, and if a same-day 5 p.m. Enron reception is deemed desirable, I ask Mike or his designee to contact my Assist. Energy Finance Director Angela Dorsey at Angela.Dorsey@bus.utexas.edu (Tel.: 512-232-7386) to coordinate matters.

Best, Ehud

Nov. 2, 2000 ? Michael Roberts, Vice President, Reseach Stinson Gibner, Vice President, Reseach Vincent Kaminsik, Managing Director, Research Enron Corp. ? Gentlemen, Thank you for the opportunity to learn about a new communication position within your group.??Based on our discussions, here are some initial thoughts/observations on the job and the task. ? *Daily email newsletter for primarily two audiences: ??? ??? ??? ??? ??? 1.? internal for employees available via the Enron intranet ??? ??? ??? ??? ??? 2.? external for clients, industry at large ? *Also suggest the newsletter be sent to a targeted group of trade press. ? As this information tool builds momentum and credibility, it will support the leadership positioning of?Enron's Trading Group.?? Plus, it could become a driver for media inquiries and?requests for further information or interviews with Enron?trading experts. ? *I heard you wanting internal and external versions for both morning and afternoon distribution.??That is an aggressive set of daily mailings. I would want to review the scope of the content and look at the frequency. ? Just like print publications,?email newsletters are?now the rage and too many are?landing in the email inboxes.??My counsel would be to start with a manageable number and do it well.?You can always increase frequency. ? Difficult to cut back on frequency without it appearing as a take away or lack of commitment to the product. Staffing?? ? *Invite outside industry analysts or clients to provide commentary. ? *Consider developing an "editorial advisory board" to govern the content.??Traders,?legal department, communications dept. A multidisciplinary group that?can add value to the publication. ? *Suggest finding an IMS or IT resource from within Enron to be assigned to this communications effort.??Database set up for the email addresses, technical issues arise?for?creating the links etc. ? Managing an e-newsletter in my current position, I can?tell you that a writer/editor has enough to do to compile content.??You want mailings to go off without any glitches. ? Or if there are glitches, he or she can?solve quickly. ? What are the implications of these mailings on the company's computer systems?? ? *Budget. ? Although not a typical print publication, this effort should have a budget. ? Graphics, freelance or contract writing, photography?any special software or hardware needs associated with this effort?? ? *Review process. ? What is the review process for?this publication. ? Legal guidelines?? Corporate guidelines with regards to style, graphics etc.??Technical review of the material for accuracy?? A clear policy should be established?up front for the review process

so everyone involved knows and understands their role and responsibilities? towards this communication effort. ? *Have you surveyed what is out in the marketplace??? Gather samples of? newsletters that you like or don't like for discussion purposes. ? *Measurement/evaluation of the newsletter.?? How? will the effectiveness of the newsletter be measured?? Hits on the website.? Inquiries from clients?? Don't have a quick answer but? some goals should be set to measure against. ? *Maintenance of the mailing lists should reside with the individual groups participating in the newsletter.?? Maintenance of the newsletter databases should not be the responsibility of the communications representative. ? ? ? This sent to you in the spirit of exploring the position further.? Look forward to your feedback.?? Thank you for your consideration.? ? Sincerely, Susan V. Gonzalez 11822 Poplar Creek Houston, TX? 77077 (281) 497-7185 home (281) 877-5853 work

Mark!

Please review the attached article and forward your comments/authorization for its use to John Martin at Baylor, copying me and Vince.

John and Vince,

I have a few simple comments:

1. Please use "Enron Corp." [rather than "Enron Corporation"]
2. page 3: as of yesterday, Fortune Magazine named Enron "most innovative" for the SIXTH year in a row
3. page 5: 2nd paragraph: regarding the "gas bank" concept--I believe when Jeff first introduced it, it fell flat. I think John pick's that up (and Enron's subsequent recovery of a version of the concept on p.6), but it's probably accurate to mention that at first, it didn't go over.
4. page 13: re: Cindy Olson's comment on a possible 5 X difference between a "satisfactory" and "superior" VP--the difference referred to is probably the "bonus" rather than "compensation" (which , to me, is generally means base salary); also, it varies for each review period, as comparative performance might vary; further, we might want to run that quote by Cindy just to make sure she's OK with it's publication (she might have no problem with it whatsoever, but I know for other articles, she's been more reluctant to provide that kind of statistic).
5. page 17 (after Annual report quote): I suggest changing "Enron's wholesale business... provides" to "...businesses..provide"; also, rather than "Enron Wholesale" we might want to define this by the term Enron uses: "Enron Wholesale Services"
6. page 18: 2nd paragraph: the tense switching from past to present is technically correct if read carefully , but seems awkward when reading it

7. page 19: effective February, Jeff Skilling is "CEO".

...that's my 2-cents worth!! I think the article is great...even interesting (ha!)...even to non-MBA's like me!!

Thanks!

--Christie.

Hey guys, I just wanted to update everybody on what's going on up here in Chicago. We've finally got our computers hooked up, so we are off and running now. Actually, we got quite of few projects going on up here (yes, these are real projects) and we are going to need the Houston Structuring group for support. I don't know if you guys are still short-handed and what kind of projects you may already have lined-up, but I wanted list out some of the projects that we are currently working on.

GAS

LRG project - Deirde is currently working on this with Russell

NSS storage - Sean Boyle helped value both their current and new NSS. We are currently working on negotiating with People's for these, and I expect that there may be additional requests in the future.

Manlove Summer Withdraw program - Yes this is not a typo. Surprise, Surprise... Manlove can do a lot more than we thought. I've talked to Deirdre about it and created a simple model, but I would like to better analyze this with your help.

Capital Improvements - We've got People's Christmas list of capital projects that we are going to help them analyze and seek if any of these make sense.

Sendout model - We would like to help them better optimize their morning sendout taking into account current market pricing and the Enron supply deal.

PBR - We are not sure when or if People's will file a PBR, but I think that there are a lot of things that we learned during our previous experience that we can do to help them prepare for a competitive marketplace (ie transport customers tariff restructuring)

PESC - People's is looking for assistance in understanding load following and helping them build models to optimize their retail gas effort

San Juan pricing - Evan has been working with the Desk to provide indicative pricing with regard to PEC hedging out some of their San Juan production reserves

Power

Power project development - we have several power projects underway and the CTG group (Billy Lemmons) is helping us create necessary models

PESC - the retail power stuff lives. I've think that Fallon has a new attitude on these deals and Enron has committed to help them figure out this market.

Power plant balancing model - we have in our portfolio and will be offering balancing/storage services for Chicago area power projects. We would like to have a model or at least a better understanding to help us with this endeavor.

We have resources in Chicago dedicated to these projects, as well as the other stuff we're trying to do like negotiate contracts and set up the Chicago back office function. We plan on adding our own structuring resources (in Chicago or Houston), but we felt that we ought to start by figuring out what support the Houston office will be able to provide. I will be in the office this Monday (Jan 17), so I hope to be able to catch up with you and discuss some of these items then. Feel free to contact me if you need to before then at 312.357.8876 or pager 800.778.0291. Thanks

Richard

Jim,

I can take a cab or get a rental car from the airport (thanks for your kind offer). I shall appreciate, however, if you could drop me off at the hotel before dinner.

The time allocation for my speech is about right. I think I shall need about 90 minutes.

Please let me know where we can meet on Thursday. I shall be at an off-site on Wednesday but you can reach me on my cell phone (713 410 5396) and by sending a cc message to my AOL address: vkaminski@aol.com.

I look forward to meeting you.

Vince

Jim Dyer <Jim.Dyer@bus.utexas.edu> on 05/01/2000 01:42:44 PM To: ""Vince.J.Kaminski@enron.com""
<Vince.J.Kaminski@enron.com> cc: Sheridan Titman <Sheridan.Titman@bus.utexas.edu> Subject: RE: Real Options

Vince,

I could pick you up at the airport, or you could rent a car and come to campus. I have made tentative plans for us to go to lunch with some other faculty between 11:30 and 12:00, and then you would have some time to visit with Sheridan and perhaps with some other faculty members as well between lunch and my class.

Sheridan and a guest speaker from his class, Suresh Sundaresan from Columbia, will be joining us for dinner. I could provide transportation to your hotel, and pick you up for dinner as well if you consider that to be the most convenient alternative.

I will have a PC available in the classroom, with Office 2000 and windows NT. You could use powerpoint with no difficulty from that machine, if that's most convenient. You could simply email the presentation, and I would have it for you if you prefer.

How much time would you like? I would like to reserve about 30 minutes at the end for a general discussion of issues related to real options, and about 30 minutes at the beginning of class for some remarks regarding the final assignment and a class evaluation by the students (which is required for all classes). At some point, we should take a brief break, so that would leave approximately 1.5 to 2 hours for your presentation if you would like that flexibility. Otherwise, I could take up the "slack".

I look forward to seeing you on Thursday.

Jim

Jim,

I am scheduled to arrive in Austin on May 4 at 10:32 a.m. I shall be glad to join you and a group of your colleagues for lunch. I am flying back to Houston Friday morning and we can meet for dinner after the class.

I shall have a Power Point presentation on my PC. I can also prepare a set of transparencies if this is more convenient for you.

Vince

Jim Dyer <Jim.Dyer@bus.utexas.edu> on 04/27/2000 05:44:51 AM

<Sheridan.Titman@bus.utexas.edu> Subject: Real Options

Vince,

I am traveling at this time, attending a NSF meeting in Washington. However, I wanted to touch base regarding plans for your presentation in my class on real options next Thursday (May 4). As you recall, the class is from 3:30 to 6:30, and you could plan to take a significant part of that time for your presentation. Sheridan Titman has agreed to join us after his class at about 6:00 for a 30 minute "panel discussion" with the students on issues related to real options in practice.I

I am not sure about your travel plans, but we would be happy to plan lunch on Thursday with several of my colleagues. I would also be delighted to be your host for dinner on Thursday night if that is convenient for you.

I'll be back in my office on Monday, and will look forward to hearing from you.

SUMMARY

Business Analysis Manager * Quantitative analysis and modeling of business economics * Strategic implications and opportunities * Hands-on team leader

ACCOMPLISHMENTS

Industry Structure and Forecasting * Developed a quantitative model predicting long-term natural gas prices for a major oil company, and later for the consulting firm's marketing efforts. In the early nineties, model correctly predicted price increases to oil parity by around the year 2000. * Documented the changing structure of the office furniture industry. Formulated strategy to regain profitable growth.

Financial and Operational Modeling of Asset Deployment Decisions * Based on the interaction of logistics and manufacturing economics and market research, developed business strategy for a leading insulation manufacturer. Early results allowed maintaining both price and volume in the down cycle of commodity market. * Validated strategy of leading automotive aftermarket manufacturer based on distribution economics. Validated economic model with top management.

Supply Chain Improvement * Led the inventory management function through the integration of a major automotive aftermarket distributor acquisition, involving consolidation of two warehouse networks and multiple line changeovers. Reduced inventories by \$30 million while improving fill rates. * Led the inventory management function in the improvement of shipping performance, resulting in an additional profit of \$5 million per year. * Improved the integration of suppliers and other functions in the overall supply chain.

Process Redesign * Led client teams through the fundamental redesign of financial processes, typically identifying cost reduction opportunities of 20% to 50%. * Implemented variety of business processes and controls: production scheduling, financial and cost accounting, sales and pricing policies, project documentation.

WORK HISTORY

PROFESSIONAL SIGNWORX, Houston, Texas 1997-2001 A manufacturer and erector of custom signage President

APS, Houston, Texas 1996-1997 A major automotive aftermarket distributor Senior Director of Supply Chain Management

I still do not have a job description for Vincent's position. Maybe Enron does not have one?

Candace, here is a sample job description. Please check with Vincent's supervisor on modifying this for the job description. This was my best guess, but I may be way off... If so, we have many other generic examples to use instead. Just let me know.

Generic title: Operations Research Analyst (Alternate Titles Analyst Operations Research; Research Analyst) Overview: Provides research support for specific projects and programs. Essential Functions: Projects may involve collecting and analyses data to formulate recommendations, policies or solutions. Marginal Functions: May involve mathematical or simulation models of problem for solution by computers or other methods: Analyzes problem in terms of information and conceptualizes and defines problem. Studies information and selects plan from competitive proposals that affords maximum probability of profit or effectiveness in relation to cost or risk. Prepares model of problem in form of one or several equations that relates constants and variables, restrictions, alternatives, conflicting objectives and their numerical parameters. Defines data requirements and gathers and validates information applying judgment and statistical tests. Specifies manipulative or computational methods to be applied to model. Performs validation and testing of model to ensure adequacy, or determines need for reformulation. Prepares reports to management defining problem, evaluation, and possible solution. Evaluates implementation and effectiveness of research. May design, conduct, and evaluate experimental operational models where insufficient data exists to formulate model. May specialize in research and preparation of contract proposals specifying competence of organization to perform research, development, or production work. May develop and apply time and cost networks, such as Program Evaluation and Review Techniques (PERT), to plan and control large projects. May work in association with engineers, scientists, and management personnel in business, government, health, transportation, energy, manufacturing, environmental sciences or other technologies.

I look forward to your response.

Vince,

Bryan has been unable to find anyone suitable to attend this symposium on Saturday, so has suggested I attend, which I am happy to do. My only reservation is that my knowledge of this area is very limited, so it is likely I would just be an observer, rather than a participant. Anyway just so that I am adequately prepared could you briefly describe our current

relationship with this project, and also suggest any reading, like a magazine or paper, that would quickly aid my understanding of the topics to be discussed.

Many thanks,

Ben ----- Forwarded by Benjamin Parsons/LON/ECT on 08/06/2000 08:36 -----

Subject: Wharton Event-June10-Insead

Bryan,

I shall call you later today when I have a chance to read the message from Ben.

I wanted to ask you for a favor (on a very short notice). We are talking to the Wharton School about setting up a relationship with them and getting involved in one or more research projects with them.

One of the potential topics is emerging technologies. The Wharton offers a symposium in Paris on June 10 on High Tech Acquisitions and it would make a lot of sense if you (or somebody from London you could identify) could attend and help us to evaluate the usefulness of this project.

I am enclosing the message from the person in Wharton running this program.

Vince

09:08 AM -----

tomczyk@wharton.upenn.edu (Michael Tomczyk) on 05/18/2000 10:56:08 AM To: vkamins@enron.com cc: Thomas.Piazz@wharton.upenn.edu Subject: Wharton Event-June10-Insead

Vincent,

It was truly a pleasure getting to know you in our meeting yesterday, and I look forward to the prospect of exchanging views in the future on a variety of topics pertaining to emerging technologies.

Per our discussion, I've enclosed three files that include an invitation, agenda and rsvp form for the June 10 symposium on High Tech Acquisitions at Insead. If you or the individual(s) who will be attending have any questions, please email: Phanish Puranam at: PHANIS20@WHARTON.UPENN.EDU or you can call him at 215-898-1231.

This initiative will be expanded during the coming year and I believe that Enron's involvement will give the company access to some of the early research in progress as it unfolds, and of course, if you become involved as a partner in the Emerging Technologies Program you would have opportunities to help guide the direction of the research which is one of the partnership "benefits."

Our next upcoming events are scheduled for:

Friday, September 8 "WHAT NEXT ON THE INTERNET?" This is a faculty update day with industry partners also invited. We will co-sponsor this with Wharton's major e-Business initiative. Major issues addresses include "New Economics of the Web" and "Internet, Anywhere."

Friday, October 20 "FIRST MOVER ADVANTAGE, SHAKEOUTS & SURVIVAL STRATEGIES" Designed by the ET core group and presented in collaboration with the e-Commerce Forum.

As I indicated during our discussion, participation in the Emerging Technologies Management Research Program is by invitation and on behalf of our core faculty, I am pleased to extend an invitation for Enron to join the program.

To assist in your decision, we recommend having a representative attend the symposium in Paris on June 10 to "test drive" the program.

I'll send you a formal invitation which you are free to accept at your convenience, should you agree that Enron's participation in the ET Program would be of value.

Please call or email if you have any comments or questions.

best regards, Michael

Jim Garven <James_Garven@baylor.edu> on 12/14/2000 03:33:52 PM To: Vince.J.Kaminski@enron.com cc: Subject: Re: Greetings from Baylor University

Dear Vince,

Thanks for writing back.?? I am glad to hear that Shane Green is working there and doing so well.? Please give him my regards.?

Let's plan on having you speak for our Gamma Iota Sigma dinner on the evening of 2/23.? It is my understanding that you are going to be in town anyway for John Martin's "new economy" seminar.? Will you be needing a hotel accommodation for that evening?? If so, please let me know and I will have my secretary arrange accommodations for you.

Concerning class presentations, I am curious when whether we can try to arrange a date.? I am teaching two undergraduate sections of a business risk management course from 11-12:20 and 12:30-1:50 on Tuesdays and Thursdays this spring.?? I also am teaching a graduate version of the same course from 3:30-4:50 on Tuesdays and Thursdays, but when you come I will probably have you speak to the undergraduate classes and have my graduate students attend either of those sessions.? The spring semester starts January 9 and ends May 1, and the following dates are already taken for other speakers, exams, or spring break:

Thursday, February 15 - Midterm exam 1 Tuesday, March 6 and Thursday, March 8 - no class (spring break) Thursday, March 15 - presentation on risk adjusted discount rate methodologies by Dr. Richard Derrig, Automobile Insurers Bureau of Massachusetts Tuesday, April 3 - Midterm exam 2

Please let me know at your earliest convenience when you would like to schedule a presentation.? Considering the fact that the presentation would be scheduled for around the middle of the day, it would probably be technically possible for you to make your visit into a day trip (back and forth from Houston) in case if you are pressed for time.? Continental flies here from Houston, but unfortunately the morning flight doesn't come in until 10:45 a.m., which would be too late for a presentation to the 11 a.m. class.

Thanks again,

Jim

At 01:57 PM 12/12/2000 -0600, Vince.J.Kaminski@enron.com wrote:

Jim,

Sorry for the delay in responding to your message. I was traveling extensively and was overwhelmed with many different projects.

I shall be glad to speak at the Gamma Iota Sigma dinner. Unfortunately, cannot make a presentation to your class (it would require leaving the office for two days in a row).

I can, however, promise to come on another day and speak to your students.

I hope everything is going well for you. By the way, your former student, Shane Green, has joined us for 12 month and is doing exceptionally well.

Vince

Jim Garven <James_Garven@baylor.edu> on 11/28/2000 05:10:55 PM

To:?? "Vince J Kaminski" <Vince_J_Kaminski@enron.com> cc: Subject:? Greetings from Baylor University

Dear Vince,

Since we last corresponded, I have left LSU and am now Professor of Finance & Insurance at Baylor University in Waco, TX.? My colleague at Baylor, John Martin, mentioned that you will be coming to campus for a conference on Friday, February 23 that he is organizing.?? I am curious whether your schedule might permit staying over that evening so that we can feature you as our dinner speaker for the chartering ceremony of Gamma Iota Sigma, national risk management fraternity.? For that matter, would you also possibly be available to make any presentations to undergraduate and graduate students on the previous day (Thursday, February 22)?? What I have in mind is a presentation similar to the presentations you made last spring to my LSU classes.

Thank you for your consideration of this request.? I am looking forward to seeing you once again.

Sincerely,

Jim Garven

Best regards, Michael Tomczyk

MANAGING STRATEGIC PARTNERSHIPS? FRIDAY APRIL 20, 2001 -- 8:30am to 400pm Location - Room 1206
Steinberg-Dietrich Hall - WHARTON SCHOOL - Philadelphia

We have designed this conference as an insight-building event, to present current industry experience from best practice firms, as well as our most recent research findings on best practices and strategies for developing and managing alliances, mergers and high tech acquisitions.? We will include research in progress from our ongoing long term studies on Alliances and Acquisitions. This is part of our research activity and there is no conference fee.

The Emerging Technologies Management Research Program/Mack Center is working to identify and develop best practices, competitive strategies and management approaches for industry decision makers in industries that are being created or transformed by emerging technologies.

Our industry partners include: Bank of Montreal, Charles Schwab, DuPont, Enron, General Motors, GlaxoSmithkline, Hewlett-Packard, IBM, Independence/Blue Cross, McKinsey, NSA, Procter & Gamble, Sprint, 3M and Xerox.

The agenda is included below and more information can also be found on our website:
?http://emertech.wharton.upenn.edu .

Please call or email if you have any questions or comments about any aspect of this event? - 215-573-7722.

AGENDA

MANAGING STRATEGIC PARTNERSHIPS An insight-building conference including new Wharton research on best practices and successful strategies for achieving corporate growth through alliances, mergers and acquisitions.

Friday, April 20, 2001 - 8:30 to 4:30 1206 Steinberg-Dietrich Hall, Wharton School

Presented for our industry partners and guests by the Emerging Technologies Management Research Program, Mack Center on Managing Technological Innovation

Faculty Research Presentations by: ? Harbir Singh, Paul Schoemaker, Lori Rosenkopf, Phanish Puranam and Prashant Kale

Industry Best Practice Presentations by: Sun Microsystems, Cybersource, Broadview and Pfizer.

AGENDA & CONFERENCE TOPICS

8:00-8:30 ?- ?Continental Breakfast and Informal Networking

8:30-8:45 Introduction: Strategic Partnering for Growth and Innovation

8:45-10:00 Managing Strategic Networking

10:00-10:30 - Break

10:30-11:30 Building Partnering Skills and Capabilities

11:30 - 12:00 Success and Failure Factors in Strategic Partnering

12:00-1:30 Working Lunch - Strategies

1:30-2:30 Small Group Reports

2:30-2:45 - Break

2:45-3:40 Managing High Technology Acquisitions

3:40 - 4:00 Summary of Key Insights and Future Research Goals

4:00 - Adjourn

Directions:? Take a taxi to the corner of 37th and Walnut.? At that intersection, turn left and take the broad walkway onto campus.? Turn LEFT at the first intersection (you will see a lifesize statue of Ben Franklin sitting on a park bench).? This is LOCUST WALK.? The Steinberg-Dietrich Hall is the large brick building immediately behind "Ben" - if you turn left and proceed down the walk you will come to the large entrance with cantilevered steps on the RIGHT side of the walk.? The room iw Room 1206 and there is an information desk straight back from the entrance, to guide you to the room.

If you are staying at the INN AT PENN, which is directly across the street from campus on Walnut (between 36th and 37th) - take the WALNUT STREET EXIT from the hotel (where the restaurant is), turn RIGHT from the entrance and walk to 37th street, cross the street and continue onto campus following the directions (above paragraph).

Wharton is 30-40 minutes from the airport, 10-15 minutes from the 30th St. Train Station and about 15-20 minutes from most hotels in Center City. -- Michael S. Tomczyk Managing Director Emerging Technologies Management Research Program 1400 SH-DH/6371 The Wharton School Philadelphia, PA 19104-6371

Vince and Stinson,

I have successfully downloaded the @energy2.0. I am working with IT to update the license before we can use the software.

Zimin

Vince J Kaminski 01/31/2001 11:20 AM To: Zimin Lu/HOU/ECT@ECT cc: Vince J Kaminski/HOU/ECT@ECT, Stinson Gibner/HOU/ECT@ECT Subject: FEA announces the release of @ENERGY 2.0

Zimin,

Please, take a look at it. I think we should download the update.

Vince ----- Forwarded by Vince J Kaminski/HOU/ECT on 01/31/2001 11:21 AM -----

"Michelle Mendoza" <michelle@fea.com> on 01/26/2001 02:33:14 PM To: <Vince.J.Kaminski@enron.com> cc: Subject: FEA announces the release of @ENERGY 2.0

January 26, 2001

Vince Kaminski Enron North America Corp. 1400 Smith Street 30th Floor, Rm. 3036B Houston, TX 77251-1188 1
713-853-3848

Dear Vince Kaminski,

This is to inform you of the release of @ENERGY 2.0. FTP download instructions are available immediately. The download instructions are included at the end of this email. Your CD's and manuals will be shipped to you within 2 weeks.

Please see below for more information regarding this new release.

Please confirm that you are the correct recipient for this shipment and your address above is correct by clicking reply and send. If any changes need to be made, please make the changes above and reply.

****WARNING: PLEASE NOTE THAT IF YOU DID NOT RECEIVED A LICENSE KEY FOR @ENERGY AFTER JUNE 2000, YOU WILL NEED TO CONTACT SUPPORT@FEA.COM OR CALL 510.548.6200 TO OBTAIN A NEW LICENSE KEY TO ENABLE THE NEW VERSION.****

****Swing users: @ENERGY/Swing now replaces the "SWING" product. See the @ENERGY user manual for a discussion of the changes. Contact FEA for the necessary license keys. You will be able to run both the new and old SWING simultaneously.**

Heres an overview of the new and changed features since version 1.6:

@ENERGY (Forward Curve) Jump parameters are now calibrated for use in other @ENERGY functions. Inputs and outputs to POWERCALIB and COMCALIB have changed. See the corresponding function syntax in the User Guide for additional information. 35-40% speed improvement. The module is now out of beta.

@ENERGY (Basics) Different interpolation schemes on forward prices are now supported. If you use INDEXSWAP , EXOTICSWAP, or OPTINDEXSWAP with floating price linked to a series of futures dates, such futures dates need not be close to dates specified in the forward curve input. A new utility function, PATHUTIL, allows you to simulate and visualize price paths consistent with the models supported by @ENERGY. 25-30% speed improvement.

@ENERGY (Advanced) Different interpolation schemes on forward prices are now supported. If you use OPTDIFFSWAP or DIFFSWAP with floating price linked to a series of futures dates, such futures dates need not be close to dates specified in the forward curve input. CALSPREADOPT now allows for the specification of two different mean reversion rates. 30-35% speed improvement.

@ENERGY (Swing) SWINGOPT and STRIPSWINGOPT now allow for valuation of swing straddle contracts with overall load constraints. 65-70% speed improvement. The module is now out of beta.

@ENERGY (Weather) 30-35% speed improvement.

If you have any questions please feel free to contact us. We appreciate this opportunity to be of continuing service to Enron North America Corp..

Regards,

Michelle Mendoza Support@fea.com +1-510-548-6200 Financial Engineering Associates, Inc. (FEA)

***** To download @ENERGY 2.0 via FTP, follow the following instructions:

NOTE: Using EXPLORER leads to unpredictable results, so we suggest using NETSCAPE or a DOS shell.

USING NETSCAPE:

In the Location box type: ftp://energy@ftp.fea.com Password: 2rbzxgv5

energy-2.0-win32.exe is for Windows 95/98/2000/NT. Download and run on a local drive.

USING A DOS SHELL:

At a DOS prompt type: ftp ftp.fea.com User: energy Password: 2rbzxgv5

Type "binary" and hit 'return'. Type "ls" for a list of available files. Type "get" energy-2.0-win32.exe and and wait for the ftp> prompt. Type "quit".

The file will be downloaded into the directory at which you entered the ftp site. Double click on the exe and follow the instructions on the screen.

-----Original Message-----

From: Steven Shreve <shreve@matt.math.cmu.edu>@ENRON Sent: Tuesday, December 18, 2001 6:50 PM To: Kaminski, Vince J Cc: shreve@cmu.edu; rlbryant+@andrew.cmu.edu Subject: MSCF Advisory Board

Dear Dr. Kaminski:

Following this e-mail is a summary of the recent meeting of the Advisory Board of the Carnegie Mellon Master's program in Computational Finance. We would appreciate hearing your views on the subjects discussed.

Best wishes, Steve

-- Steven E. Shreve Department of Mathematical Sciences Carnegie Mellon University Pittsburgh, PA 15213-3890

shreve@cmu.edu <http://www.math.cmu.edu/users/shreve> Direct Telephone: 412-268-8484 Department Telephone: 412-268-2545 Fax: 412-268-6380

Summary of MSCF Advisory Board Meeting December 12, 2001

Advisory Board Members in attendance:

Ashvin Chhabra First Vice President Director of Financial Strategies and Analytics Merrill Lynch

Joseph Langsam Managing Director Morgan Stanley

Art Mbanefo Managing Director Equity Derivatives and Convertible Trading Credit Suisse First Boston

James Vinci Partner Paloma Partners Management

David Waldman Senior Portfolio Manager and Director Fixed Income Quantitative Research Group Putnam Investments

Carnegie Mellon Faculty in attendance:

Richard Bryant Director M.S. program in Computational Finance

David Heath Hoch Professor of Mathematical Sciences

John Lehoczky Lord Professor of Statistics Dean, College of Humanities and Social Sciences

Steve Shreve Professor of Mathematical Sciences

The three new members of the board, Ashvin Chhabra, Art Mbanefo and David Waldman, were asked to present their perspective on future human resource needs of the industry.

David reported that Putnam relies on both fundamental and quantitative analysis. In fixed income markets, he noted the shift from treasuries to mortgages and corporate bonds, and pointed out the accompanying rise in the importance of credit risk analysis. Although Putnam has been a major employer of MSCF students, he noted that increased emphasis in our program on the asset management industry would be welcomed. He pointed out the need for our students to understand how to translate theory into practice and to communicate to audiences of various backgrounds. For David, applicants should be able to pass the "airport test:" if you are stuck with this guy for half a day in the airport, will it be a reasonably interesting experience.

Art also emphasized the key role of communication skills. He wants people who are very focussed and who can find practical solutions. He welcomes applicants who have prior accomplishments which show they can be trained and have discipline. He cited music and athletics as areas in which these traits can be demonstrated.

Ashvin proposed that students should prepare for the "elevator test:" if you happen to ride the elevator with a managing director, between the sixth floor and the lobby can you explain something to him in a way that he appreciates. Ashvin believes that MSCF students, and quants in general, must either be able to work on the trading desk or have management skills if they are to survive in the long term. He expects there to be growth in demand for people who understand technology and business. He thinks personal finance services will also be an area of growth.

Echoing one of Ashvin's points, Joe would be interested in people with the skills to manage IT projects.

Two subjects raised by Rick are whether the MSCF program should specialize, say into energy or asset management, and whether there should be additional courses in subjects such as accounting and corporate finance. The consensus was that the MSCF program should stay general, within the quantitative finance niche, and should remain highly quantitative rather than tipping toward an MBA.

There was discussion of the desirability of internships. Joe pointed out that 80% of the Morgan Stanley hiring is from internships. An internship doesn't have to be for a summer; eight weeks is possible. Steve observed that we have not in the past had difficulty placing students even though our program does not include an internship and that an internship would lengthen the program beyond 12 months. Joe said that a longer MSCF program with internships would permit different student cohorts to overlap so new students could learn from those who had interned. Faculty would also be enriched by students who had interned.

Gwyn,

As we discussed earlier, there are no firm due dates set for asset models mentioned in my curve request. I discussed the timeframe with Andre again and we agreed that our best estimate would be that we should have all models by end of this month.

Thanks again for working with us on a rather "vague deadline"!

Hi Jana,

The trip was very interesting and I am still recovering.

On Friday we can meet at the restaurant. It's on the edge of the Woodlands. We can then go to our home and have drinks and chat.

The restaurant is:

Amerigo's Grill 25250 Grogans Park Dr Spring, TX 77380-2175 Phone: 281-362-0808

I have sent you an URL of the map of the part of the Woodlands where Amerigo's is located. It's a red dot on the map.

What about 7:00 p.m.?

Look forward to meeting you.

Vince

Jlpnymex@aol.com on 07/26/2000 03:07:34 PM To: vkamins@enron.com cc: Subject: Friday

Vince I hope you had a good trip to Australia.

Are we still on for Friday evening? Let me know what time, what dress, and how to get to your home.

We are looking forward to meeting your family.

Let me know if I can bring something.

File	kaminski-v/conferences/111.

Hello Andreas,

My title is Managing Director, Research, Enron North America Enron Corp. 1400 Smith Room EB1962 Houston, TX 77002 (713) 853 3848 (713) 646 2503 (fax)

Bullet points:

1. The challenge of modeling price dynamics in the energy markets. - seasonality - fat tails - jumps - mean (or floor) reversion
2. Price volatility in the energy markets: definition and estimation
3. Adapting value-at-risk for the energy markets: - combination of physical and financial contracts - correct representation of price dynamics and inter-market price relationships - capturing complexity of energy contracts
4. Historical vs. Monte Carlo simulation vs. scenario analysis. Pros and cons of different approaches.
5. Regulatory uncertainty and value-at-risk

Feel free to edit the bullet points if you see a typo (no spell checker on my laptop for AOL).

Vince

Thank you for registering for Henwood's ERCOT Symposium on January 23, 2001. We are pleased to confirm your attendance. Attached is a copy of the program agenda. As indicated, registration will begin at 9:30am. The program begins at 10:00am and runs until 3:00pm. Lunch along with refreshments will be provided. Demonstrations of Henwood's software applications and eBusiness solutions will be available following the workshop for interested parties.

Directions to the Hyatt Regency Houston are attached for your convenience. Please do not hesitate to contact me with any questions or concerns that you may have.

We look forward to seeing you in Houston!

Hi Darlene:

Vince Kaminski and the Research Group would like to bring Todd Perry in for an interview.

They have already had a "telephone interview" and feel like he may be a good fit somewhere in the Research Group. A copy of his resume is attached.

He will be able to come on Friday, June 2.

Please contact him and arrange his travel. When this is completed, call me and we will set up the interview schedule.

The Interviewers would be:

Vince Kaminski Stinson Gibner Krishna Krishnarao Grant Masson Zimin Lu Vasant Shanbhogue

If you have any questions, please call me.

Thanks!

Shirley

From: Kolodgie, Jim Sent: Friday, June 01, 2001 3:16 PM To: Kaminski, Vince J Cc: Perlman, Beth; Wasaff, George Subject: Expert Systems - Textual Mining

Vince,

Enclosed is information on textual mining and expert systems I spoke to you about in the lobby.

EDS is currently providing commercial applications using experts systems and textual mining to derive value for our customers. The presentation below has two examples of current applications. It seems to me that there a multiple applications for this type of program within Enron which would have short payback periods.

Please let me know if you wish to investigate further.

Cheers, Jim Kolodgie EDS Client Executive - Enron 1400 Smith St EB 4072 Houston, Texas 77002 w (713) 853-1635 c (832) 656-6777 jim.kolodgie@eds.com

Coffee Colloquium this morning

Sender	spradlin@rice.edu
Recipients	[]
File	kaminski-v/deleted_items/2380.

Students, Faculty, and Staff,

Don't forget to participate in the Coffee Colloquium this morning (10-24-01) from 9:45 to 10:45 held outside room 124.

The Coffee Colloquium is an informal gathering which will allow faculty, administration, and students an opportunity to talk, exchange ideas and get to know each other better. The Jones School Coffee Colloquium will be a regular gathering every Wednesday (same time, same place) unless there is another scheduled event (Dean's Lecture, exam day, holiday). We usually have coffee, juice, soft drinks, and some light snacks.

File	kaminski-v/all_documents/11073.

Dear CERAWeek 2000 registrant,

Thank you for your recent registration to CERAWeek 2000, CERA's 19th Annual Executive Conference and related events, February 8-10, 2000 in Houston, TX.

CERAWeek 2000 promises to be a premier international event offering senior energy executives new ideas, insight, and strategic thinking, as well as opportunities for discussion on the major issues facing the global energy industries.

To keep abreast of new speakers and agenda changes, we recommend that you visit our website at <http://www.cera.com/ceraweek/>. Please note that there have been slight changes to the agenda and schedule.

If you have questions or concerns regarding CERAWeek 2000 please contact CERA Registration at register@cera.com or 800 879-2372 ext. 800 (Outside the U.S. (617) 497-6446 ext. 800.)

We look forward to seeing you in Houston.

Sincerely,

CERA Registration

Congratulations! Your company project was selected by the students for the 2001 Action Learning Project program at Rice University. The Company Day was a huge success last week, and we appreciate all your time and effort. On Monday, January 22, we will send you a list of your team members via email with a hard copy to follow. Student team members will be in touch soon so that you can plan your first meeting.

Thanks for your continued support and interest in the Jones School.

Vince

EnergyWriter@aol.com on 10/11/2000 10:54:39 AM Please respond to EnergyWriter@aol.com To: energywriter@aol.com cc: Subject: Report Research

I am writing a management report on weather risk management. The story will discuss different weather risk management tools used by power marketers in the energy industry. It also looks at weather prediction and analysis services available to energy traders.

I am looking for a list and description of the weather risk management products, and how each can benefit an energy trader. I would also like to know what traders' reactions to significant weather are. And where can I find a list of popular weather instruments with descriptions?

I appreciate any help you can give me. I would like to set up a chat with you this week if you have the time, or simply email me your input. Thanks in advance!

Vince,

I am attaching the most recent versions of the "business plan" relating to the Energy Markets Institute (EMI)---this includes a detailed concept paper with curriculum of the degree and specialized programs, a note on resource requirements, the marketing plan, and the execution time-table. The EMI has recently been established at the Bauer College, and we would like as soon as possible to get together with crucial people in the industry and get feedback and suggestions. Our aim is to make this into a world class energy education and research center as expeditiously as we can. Your input and help will be absolutely central to our efforts. We are proposing to hold a presentation and discussion session with key industry executives, and trying to firm November 14 as a date for this meeting. I will contact you soon about your availability for this date. Thank you.

Best regards,

Praveen

Subject: internships at Enron?

Mr. Kindall:

I am a PhD student at GSIA whho has been working on modeling energy commodities.

When you and Mr. Kaminski visited Carnegie Mellon, I had the opportunity to talk with Mr. Kaminski about a model for electricity that I am trying to develop. During our conversation, Mr. Kaminski suggested the possibility of developing the model at Enron. I have tried contacting Mr. Kaminski subsequently, to find out whether my working at Enron, possibly as an intern, was still an option, but have been unable to reach him. I have his email address as: vince.j.kaminski@enron.com. Is this the correct address?

Alternately, could I talk with someone else regarding internship opportunities at Enron.

Thank You

Vince,

FEA has arrived at a very simple, direct, and inexpensive approach to licensing our two VaR-related patents as a package. I hope that you will agree that our proposed license fee of \$2,500 plus \$1 per employee, with licenses to go to all of your affiliates, would be an attractive offer. I would love to sign up Enron for this package as an early customer. Do you think you could forward the attached pdf license agreement to the appropriate people at Enron, together with your recommendation? I am highly motivated to get Enron as a licensee, and I strongly believe that it will be a worthwhile effort for both parties.

Best regards,

Mark B. Garman President, Financial Engineering Associates, Inc. 2484 Shattuck Avenue, Suite 225 Berkeley CA 94704-2029 Tel +1-510-548-6200 Fax +1-510-548-0332 <http://www.fea.com/>

Hi Kate,

Firstly it was very useful to hold the informal discussion with him. Sharad seemed hesitant due to the offer not being what he expected. He asked me some questions about the "bonus culture" at Enron and suggested that it was not as good as at investment banks that he is interviewing with. I sold him on the value he can extract from the excellence within the Research Group and the ability to join a growing organisation at a critical point in, but he still seemed reticent saying that he "needs time" which I understood to mean that he was looking for a better offer elsewhere. He is a great candidate and it would be a real shame to lose him, given the difficulty of getting good candidates.

I discussed this with Vince and given how much we need him in Research in London and Vince agreed to discuss the possibility of an element of guarantee or sign on to help him make the right decision.

I think Vince will call you or Dale to discuss this.

Regards,

Anjam

Aziz,

Please, contact me before or after the presentation and we can find a time slot to chat later on Friday.

Vince

al3v <al3v@andrew.cmu.edu> on 10/31/2000 01:59:11 PM To: Vince.J.Kaminski@enron.com cc: Subject: meet during CMU visit?

Dr. Kaminski:

I am a Ph.D. student here at Carnegie Mellon who has a long-standing interest in the energy industry.

I have recently developed the framework of a simple model for electricity prices that I would like your opinion on. Could you please chalk out some time for me during your CMU visit this Friday?

Unlike traditional electricity pricing models, which assume that the log-price is a sum of a couple of stochastic factors, I assume that some fundamentals of the electricity market are driven by stochastic factors. Next, given the current values of these factors, price is determined by economic forces of profit maximization by price setting electricity generators. Unlike typical factor models, the factors in my model are potentially observable.

Thank You,

Aziz A. Lookman Graduate School of Industrial Administration 5000 Forbes Avenue Carnegie Mellon University Pittsburgh, PA 15213 Tel: 412-268-3681 Fax: 412-268-6837 (pls. mark the fax c/o Jackie Cavendish)

Vince,

Thank you for making the visit to Pittsburgh and learning first-hand of the MSCF program. It was a pleasure having dinner with Kevin and yourself.

Jean Eisel has been in touch with me (and others) to follow up on your interest in establishing "liaisons" at CMU. We have a number of faculty in the business school keenly interested in the energy field and in energy derivatives particularly that it might make sense for you to meet.

Indeed, there are many avenues we could explore. If your interest lies more in broadband than energy, we might consider possibilities with faculty conducting research in wireless technologies. Alternatively, I would be pleased to offer our distance-ed program (currently running live interactive video broadcasts via ISDN to London, Frankfurt and Bangalore, India) as a "testing ground for internet-based transmissions.

Let me know how you would like me to proceed. (If any or all of the above is "off-the-mark," my apologies. As they say, things sometimes get lost in translation!)

Rick

Hello,

I just received your message.

Are still in NYC? I like it a lot. I wish my job was associated with traveling.

According to Saturday meeting - I will be there.

Have a save trip back home.

patrycja

Hello Patrycja,

Greetings from the Big Apple.

Saturday works for me. Let's meet at 4:00 p.m. at Carrabba's. It's an Italian restaurant on I-45 in the Woodlands. After you pass Conroe, take the Research Forest exit (5-10 miles past Conroe) and stay on the feeder road. Go through the lights (Research Forest intersection with I-45). As you continue along the feeder road you will pass on your right the Woodlands Mall and the ExxonMobil building,. The restaurant will be on your right, about 200-300 yards before the next lights (I-45 and Sawdust).

I shall have my cell phone with me (713 898 9960). In case you arrive early you can stop at my home: 10 Snowbird Place, (281) 367 5377. I shall send you later the instructions how to get there. I shall leave home around 3:45.

Look forward to meeting you.

Vince

I'm not sure what to think, other than we really don't have a credible way to determine what will happen with the PDO. One factor that provides insight into the climate outlook for the next few months and next few seasons is the expected changes with ENSO (for which there is some demonstrated skill in forecasting). The latest observations show trends to near-normal ENSO conditions, with some indication that ocean temperatures will likely be a bit warmer than normal in the tropics. If this is true, I'd expect a slight bias toward El Nino-like climate over North America, which would tend to go against the continuation of cold phase PDO conditions.

best wishes,

Nate Mantua

Dear Vince:

I enjoyed talking with you on the telephone on Friday and look forward to working with you on this project.

Just to confirm, we decided to have a conference call on February 5th and that I would come to Houston later in the month. The week of February 12th is not good for me, (I will be at Yale), but I am free on Tuesday and Wednesday of the following week. Also, note that I will be seeing you in Austin for the energy finance conference on Thursday and Friday of that week.

I will spend a few hours thinking about the issues we discussed in Houston before our conference call. Specifically, issues relating to appropriate discount rates and the concept of risk capital. If you have other issues that you would like me to start thinking about prior to the call, please let me know.

I look forward to talking with you about this in more detail.

regards,

File	kaminski-v/conferences/298.

Vince and Chistie, Sorry you won't be attending our April 20 ET event, but of course we realize that many of our partners can't attend every event. With this in mind, we put conference reports online in a "quick read" format for busy executives. Our site is located at: <http://emertech.wharton.upenn.edu> - we'll be adding new reports in the coming 2 weeks. I would also ask, is there anyone else at Enron involved in mergers and acquisitions who would benefit from the April 20 event? This will be one of our most "content-rich" events - reporting on surveys on high tech acquisitions as well as best practices in successful mergers and partnerships. Please feel free to pass on the invitation to colleagues at Enron who you feel might find this worthwhile, or you can give me email addresses if you'd like me to extend the invitation with the most recent agenda. We very much appreciate Enron's support of the ET Program and look forward to your participation in the future. Best regards, Michael

hi Michael! Sorry I will be unable to attend! I believe both Vince and I are previously committed. Thanks! --christie. --

Hello. I will find out what is going on, and get back to you later this week. We are undergoing a systems migration, so some emails may not have been forwarded properly: try this email: vkamins@enron.com

I will be in Pittsburgh Monday and Tuesday if you would like to talk to me.

Regards, Kevin Kindall

al3v <al3v@andrew.cmu.edu> on 12/07/2000 08:56:19 AM To: kevin.kindall@enron.com cc:

Subject: internships at Enron?

Mr. Kindall:

I am a PhD student at GSIA whho has been working on modeling energy commodities.

When you and Mr. Kaminski visited Carnegie Mellon, I had the opportunity to talk with Mr. Kaminski about a model for electricity that I am trying to develop. During our conversation, Mr. Kaminski suggested the possibility of developing the model at Enron. I have tried contacting Mr. Kaminski subsequently, to find out whether my working at Enron, possibly as an intern, was still an option, but have been unable to reach him. I have his email address as:
vince.j.kaminski@enron.com. Is this the correct address?

Alternately, could I talk with someone else regarding internship opportunities at Enron.

Thank You

File	kaminski-v/all_documents/5559.

Hi Professor Ronn:

I have ordered a flip chart and markers and an overhead projector.

There were 11 pages in your presentation and they look fine. We have already made the copies.

I believe everything is set - if you think of anything else, please let me know.

Enjoy your dinner tonight and we will see you tomorrow.

Regards,

Shirley Crenshaw

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 06/21/2000 02:03:03 PM To: Shirley.Crenshaw@enron.com cc: Subject: Re: Prospective 6/22 Houston Visit

Shirley:

Please let me know if you need anything else.

There is one additional item I would request: If the room does not contain a blackboard or whiteboard, I would appreciate a flip chart and markers.

I am faxing you my Presentation Handout for tomorrow. I would be grateful if your produced copies in sufficient number for tomorrow's 11:30 a.m. meeting; Vince advises me the number of attendees will be in the 25 - 30 range. I will also bring along a "master copy" in case the trasmission unduly mangles the fax.

Thanks, Ehud

Praveen,

I shall try to attend Peter Carr's seminar. Of course, given the level of turbulence we have been experiencing my plans may change on a very short notice. We can chat for a few minutes before or after the seminar about my association with UofH.

Vince

-----Original Message-----

From: Praveen Kumar <pkumar@uh.edu>@ENRON Sent: Monday, November 26, 2001 4:43 PM To: vkamins@enron.com Subject: Seminars

Vince,

Two recruiting seminars this week for the Finance Department that may be of interest to you.

(1)Thursday, November 29: Evgenia Portniaguina (University of Utah). She is completing here Ph.D., and is one of their strongest students ever. She is originally from Russia with a BS in Exploration Geophysics (4.0 GPA), Oil & Gas Academy, Russia. She will now speak on a Financial Market MicroStructure topic, but she could be of great interest from the Energy Institute point of view. Her seminar is in Room 256, Melcher Hall, 10:30 -12 noon.

(2) Friday, November 30: Peter Carr, Adjunct Professor at Courant Institute, NYU...His specialization is in derivatives (although he will talk on "Hedging with Incomplete Markets"). His talk is also in Room 256, 1:30-3 p.m.

Best,

Praveen

FEA News: Website Upgrade and New Building

Sender laurent.birade@fea.com

Recipients [vkamins@enron.com]

File kaminski-v/inbox/451.

FEA is happy to announce:

1. We have completed a major upgrade to our website. Please take a moment to check out the changes we have made by visiting <http://www.fea.com/?cld=11>.

The newly redesigned site offers:

7 Software Downloads - Visitors can now download software directly from the Support section of our website.

7 Enhanced Navigation - New search function, site map, and additional navigation menus.

7 Expanded Content - Our Browse by Industry section explains how companies use FEA software across industry sectors.

2. *****FEA IS MOVING***** : The demands of continued growth have prompted FEA to move into a new headquarters building in Berkeley, California. As of November 9, 2001, our new address will be:.

2201 Dwight Way Berkeley, CA 94704-2114

FEA phone and fax numbers will NOT change. However, the weekend we move (November 8 thru November 11) it may be intermittently difficult to reach us by phone and possibly email. Be sure to use email during this time. And if you're planning a visit, be sure to verify our physical location first!

Telephone and fax numbers: T. +1 510-548-6200 F. +1 510-548-0332

Please Note: The move will take place on November 9, 2001. FEA will be open for business during the move. However, please expect slower response times to your emails and voice messages that day.

Best Regards,

Financial Engineering Associates, Inc.

discount rates and risk capital

Sender	titman@mail.utexas.edu
Recipients	['vince.j.kaminski@enron.com']
File	kaminski-v/ut/11.

Dear Vince:

I spent a little bit longer putting together my initial thoughts on determining discount rates than I originally anticipated. It is somewhat surprising, but there really isn't much academic work that I am aware of that addresses these issues.

Very briefly,

1. I think we need to come up with a way to define the concept of risk capital simultaneously with the appropriate discount rate.
2. I think it is important to model Enron's opportunity cost of capital and how that changes over time. The liquidity of a project will affect its value in a very significant way when the opportunity cost of capital changes over time. There is also likely to be a relation between duration and discount rates that depends on the factors generating Enron's opportunity cost of capital.
3. I have vague ideas about possible simulations that may help us quantify some of the issues that I have raised.

Please take a look at the attached document. You might find this somewhat confusing, so I will give you a call later in the week to discuss this.

Please let me know when you will be free. I look forward to hearing from you.

regards,

Sheridan

File	kaminski-v/resumes/303.

Jim Coffey, Vince Kaminski, Mark Palmer and James Scribner,

Thank you all for taking time out of your busy schedules to conduct the following interviews. Included is the itinerary for each of your phone interviews with Zachary Inman from MIT.

You may reach Zach at 617-577-1565.

Vince Kaminski- Please call Zach at 7:30 AM. This will be 8:30 AM Zach's time. Mark Palmer - Please call Zach at 10:30 AM. This will be 11:30 AM Zach's time James Scribner- Please call Zach at 11:30 AM. This will be 12:30 PM Zach's time. Jim Coffey - Please call Zach at 1:30 PM. This will be 2:30 PM Zach's time.

The four phone interviews will determine if we are going to invite Zach to our December 8th and 9th Analyst Super Saturday.

I will send you a packet with all the pertinent details that you will need to conduct the 30-minute phone interview. The packet will contain his resume and an evaluation form, which structures the format of your interview. If you have any questions please feel free to give me a call.

Please interoffice the evaluation form, once you have completed the interview, to EB1167. It is important that I receive this evaluation promptly.

If there are any changes, due to the unforeseen, I will call you prior to the scheduled interviews.

Thanks so much for your help!

From: Praveen Kumar <pkumar@uh.edu>@ENRON Sent: Tuesday, November 13, 2001 4:10 PM To: Kaminski, Vince J
Subject: Energy Committee

Dear Vince,

I hope that you would have received by now (through e-mail) the invitation from the Dean for the Energy Committee and the Advisory Board, the complete business plan for the Institute, and the list of the energy committee members. We are very excited to have you on board with us. Since you will not be able to attend the first meeting, I would like to arrange a visit by you to the Bauer College sometime in the near future, at your convenience. In this visit, we would like to summarize the proceedings of the first meeting, get further input from you, and also show you the recently completed AIM Trading Center (even prior to the official opening ceremony in January). It would be great if we could entertain you for lunch as part of the visit. Please let me know of some days/time-slots that are open to you in the next couple of weeks, and we will try and firm up the visit. Many thanks again.

Best wishes,

Praveen

Praveen Kumar Chair and Professor of Finance C.T. Bauer College of Business 334 Melcher Hall University of Houston

Subject: Spring 2001 Conference Participation by Jeffrey K. Skilling

Rick / Vince,

Good morning.

In my 9/14 e-mail, I advised you of the practitioner-industry CEFER (Center for Energy Finance Education and Research) Conference we are planning for Spring 2001. As you know, we would like to invite Jeff Skilling to be the keynote speaker at the Thur. evening dinner. The following day's four topics consist of Risk management, Deregulation, Real options, and International/globalization. The majority of invitees would be (predominantly U. S.-based) energy-industry practitioners, as well as several academics.

Given lead time issues in these matters, we have reserved hotel rooms in Austin for Feb. 22, 2001. Could I ask you to ascertain Jeff Skilling's availability for that evening?

Thanks, Ehud Ronn

IMPORTANT - Module 5 Book Orders

Sender	spradlin@rice.edu
Recipients	['castro@rice.edu', 'spradlin@rice.edu', 'cmiller@rice.edu']
File	kaminski-v/inbox/31.

Module 5 - Spring 2002 Faculty,

I am contacting you today to remind you book orders for your Module 5 course needs to be placed through the Campus Book Store.

Below is the web address you will need to access in order to place your book order for your course.

<http://www.dacnet.rice.edu/~rcstore/bookzone/login/>

If you have any questions regarding enrollment numbers (for book orders) for your course please contact Pam Castro at castro@rice.edu or call her at 6223 and she will be glad to assist you. Faculty please order for the TOTAL number of students in your course (example: MGMT 501 - 001 = 58 students, MGMT 501 - 002 = 59 students, MGMT 501 - 003 = 58 students - the TOTAL NUMBER OF BOOKS YOU WILL ORDER for MGMT 501 will be 175).

All book orders need to be placed ASAP (NOTE: once orders have been placed it can take 2 to 4 weeks before they come in). I will be contacting you on Monday, February 4, 2002 to make sure all book orders have been placed. Please let me know if you do not plan to order books for your course so I will not contact you with reminders. Thanks in advance for your help in this matter.

Sender	vince.kaminski@enron.com
Recipients	['eronn@mail.utexas.edu', 'vince.kaminski@enron.com']
File	kaminski-v/_sent_mail/1186.

Ehud,

Best holiday wishes to you and your family.

I owe you an apology for dropping the ball on the conference

I have approached a number of executives at Enron. Greg Whalley speaks in London a day before. Louise Kitchen, the mother of EnronOnline will ski (this is the week of school holidays in England and her family will come here).

One suggestion I want to make is Rick Causey. I talked to him and he is willing to be a speaker. He is a very senior and important executive of Enron and a UT grad.

Any thoughts?

Vince

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 12/19/2000 02:09:41 PM To: Vince.J.Kaminski@enron.com cc: Subject: Best Wishes for the Holiday Period

Vince,

At the conclusion of another year, and prior to my departure tomorrow with my family for our annual Florida vacation, Best Wishes for the Holiday Period to you and your family.

Regarding the Spring 2001 Energy Finance Conference Participation, we still lack that all-important 2/22 Enron energy-related high-level keynote speaker. Let me know if you think we should look elsewhere.

Best Regards, Ehud

Ehud I. Ronn Jack S. Josey Professor in Energy Studies Department of Finance McCombs School of Business University of Texas at Austin Austin, TX. 78712-1179 Voice: (512) 471-5853 FAX: (512) 471-5073 Internet: eronn@mail.utexas.edu

File	kaminski-v/all_documents/9126.

Barbara,

We shall extend the funding for the seminar in the fall for the next season.

I shall be glad to cover the cost of a coffee mug with our logos. Can you identify a producer who can come up with a design? I think that we may use the company that produces RICE memorabilia.

I shall run the design through our PR Department and then we can have it produced.

Vince

Barbara Ost diek <ostdiek@rice.edu> on 05/24/2000 01:15:12 PM To: Vince.J.Kaminski@enron.com (Vince Kaminski) cc: Subject: Rice/Enron Finance Seminar Series

Vince:

I have checked with our accounting folks and it looks like the balance in the seminar account is under \$5000. This will get us going in the fall so we have some flexibility for the next Enron funding - whatever works best on your end.

Also, I am interested in pursuing the idea of designing some sort of a gift - a coffee cup perhaps - to give to our seminar guests. I think we could do something neat with the Enron and Rice/JGS logos that folks would be happy to display on their shelf or desk top. What do you think?

As always, thank you so much for your support of our efforts over here. It is truly appreciated.

Dear Dr. Shanboghe:

I certainly understand that it would be difficult for you to contribute a chapter. I thought of an alternative: would Dr. Kaminski be willing to allow us to reprint his article (in an abridged form) on "Energy Exotic Options" published in his excellent book "Managing Energy Price Risk" as I would really like to have a contribution from Enron on energy derivatives. Would you be willing to talk to Dr. Kaminski about my proposal ?

In any event I appreciate your interest in the conference and I only regret that hurricane Floyd prevented us from meeting in person.

With very best wishes in the New Year/Millennium

Ehud,

Thanks for your message.

I have talked briefly to Rick about it and we came to the conclusion that we could substitute Greg Whalley for Jeff. I assume that your interest is more in having a speaker from Enron than a specific person.

Of course, we have to get on Greg's calendar but I can make these arrangements as soon as I hear from you.

Vince

To:? Participants (and those who could not attend) ?????? the April 20 Wharton ET Conference

Thanks for participating in the recent Strategic Partnerships conference at Wharton, and contributing to making it such a great success.

We are enclosing with this email a presentation that we unfortunately had to cancel due to time constraints and we wanted to make sure you saw this because it involves some very interesting statistics involving EMAIL and informal organizational structure.

Ruhul Quddus, an MBA student here at Wharton, with advice from several faculty and researchers (including us) has developed a procedure that allows firms to map their informal organization structure using email logs from the email server (note: the content of the emails is NOT required; just the data on who emails whom).

Ruhul's initial results are very interesting and thought provoking in that they show that consideration of informal organization structure can potentially enhance the value of decision making in situations such as integrating acquisitions and coordinating alliances.? We hope you will look through the attached slides which outline some of his findings.

Ruhul's contact information can be found on the slides.

To whom it may concern: I would appreciate if you could forward to the editors my formal complaint regarding the behavior of one of the reporters working for your organization. Complaint My name is Vince Kaminski and I was quoted by Ms. Kristen Hays in her article on Enron (the link is provided below). Her behavior represents in my view a violation of ethical standards that every journalist should observe. I did not talk to Ms. Hays. She did not ask me any questions. She might have been the lady sitting at my table at the luncheon and she may have overheard bits and pieces of conversation I had with my friend. I shall be glad to submit the name of a witness who was talking to me and sitting next to me through the entire meeting and who walked out with me from the building. I am not sure if an organization of your reputation can tolerate similar questionable practices of collecting information. Eavesdropping on a private conversation is not an acceptable behavior in a civilized society. If you would like to endorse such behavior, you should provide Ms. Hays with a hearing aid. <Vince.J.Kaminski@enron.com> cc: Sheridan Titman <Sheridan.Titman@bus.utexas.edu> Subject: Real Options

Vince,

I am traveling at this time, attending a NSF meeting in Washington. However, I wanted to touch base regarding plans for your presentation in my class on real options next Thursday (May 4). As you recall, the class is from 3:30 to 6:30, and you could plan to take a significant part of that time for your presentation. Sheridan Titman has agreed to join us after his class at about 6:00 for a 30 minute "panel discussion" with the students on issues related to real options in practice.I

I am not sure about your travel plans, but we would be happy to plan lunch on Thursday with several of my colleagues. I would also be delighted to be your host for dinner on Thursday night if that is convenient for you.

I'll be back in my office on Monday, and will look forward to hearing from you.

Your Thur./Fri. Austin Trip; 2. Presentation of My Risk-Management Optimization Model; 3. Enron On-Line

Vince,

Greetings.

I am following up at this time with respect to the above issues we discussed in San Antonio.

1. I am leaving Thur. morn for Philadelphia, and shall not be back until late Fri. (My ETD is 9:40 a.m., which I understand is less than an hour before your arrival ...) Thus I shall regrettably miss your current UT visit, which we had hoped to also use as an opportunity to present/discuss my enterprise-wide risk management model.

2. That said, I shall be presenting an abridged version of this model at Power 2000's first day, 5/9 4:15 - 4:55 p.m. While I realize you'll be very busy over Power 2000's two days, should your schedule permit, I should most welcome the opportunity for you to see the model.

3. Per your suggestion in San Antonio, I would like to take this opportunity to inquire whether I might obtain an Enron On-Line account to obtain electricity prices quoted by Enron.

I look forward to seeing you at Power 2000. Best Regards, Ehud

Ehud I. Ronn Department of Finance College and Graduate School of Business University of Texas at Austin Austin, TX.

cc: Subject:

Hi Vince,

I had intended to call as soon as I set up another meeting in Houston but that had to be put off due to scheduling problems and a heavier than usual workload here.

I would like to get together sometime after the first of the year to discuss some research initiatives. I may also be interested in the position at Enron that you mentioned the last time we spoke. I am currently considering a few new positions and would like to expand my search. If you have an interest in discussing the position then just let me know. I'll be leaving town on Wednesday, December 22, and returning December 29 but I am always virtually here at any of my addresses, e.g., <mailto:macminn@cheerful.com> <<mailto:macminn@cheerful.com>> .

Merry Christmas, Richard

Vince --

Thanks for participating in the INFOCAST volatility conference in Houston 10 days ago. Your penetrating analysis of the current state of electricity markets, and what the trends may be, was a very useful contribution to the conference.

Happy holidays, and wishing you a healthy and prosperous new year / century / millenium.

Mr. Whalley:

Greetings.

Further to my discussions with your colleague Vince Kaminski, I write you at this time in my capacity as Director of the Center for Energy Finance Education and Research (CEFER) at the McCombs School of Business, University of Texas at Austin.

Following the first University of Texas Energy Finance Conference in Feb. 2001, my colleagues and I are planning a second annual practitioner-industry Conference in the Spring 2002, scheduled for 2/21 - 2/22/02, planning for which is on-going with your Enron colleagues. The Conference will kick off with a dinner and keynote address Thur. evening, then continue all day Fri.

I write to extend an invitation for you to be the keynote speaker at the Thur. evening dinner, or the Fri. lunch if your schedule precludes a Thur. evening presentation.

Although the format for the 2002 conference may differ from that used in Feb. 2001, for completeness I enclose herewith a copy of the 2001 Conference Program.

You may recall meeting my UT Finance Dept. colleagues and I during our day-long visit to Enron two years ago on Aug. 27, 1999. I look forward to seeing you again, this time on the UT campus. With Best Regards, Ehud Ronn - 2001 Conference schedule1.doc

Barbara Ostdiek <ostdiek@rice.edu> on 03/08/2001 05:04:29 PM To: Vince.J.Kaminski@enron.com cc: Subject: Karolyi Visit

Vince:

We are having some scheduling conflicts for Andrew visit this coming Monday. As the schedule currently, his seminar will be at 1:00 pm in the Dean's Conference Room. I realize that this is not the best time for you and I apologize for any inconvenience. We may also need to use the same time slot for Philippe's visit on the 19th.

We plan to meet somewhere in the Village for an informal reception at 5:30 Monday afternoon. I will let you know the specifics on that once I have figured them out! From there you, George, Dave, and Jeff are scheduled to go to dinner with

Andrew around 7:00 pm. You may join in for cocktails or meet up with the other group for dinner - your choice. Dave or Jeff will let you know the dinner plan.

Please let me know if you have any questions.

I have attached PDF files with the papers for both Andrew and Philippe's seminars.

You can get to Andrew's vitae through this link <http://fisher.osu.edu/fin/faculty/karolyi/resume.htm> and Philippe's vitae through this link <http://www.gsm.uci.edu/~jorion/resume.pdf>.

Thank you.

Jim,

I can send you copies of the reprints of some papers I wrote or co-authored. Please, let me know how many copies do you need.

I shall prepare power point presentations for the student meeting and for the faculty meeting.

For the students: review of my group (things we work on) with an intention of generating some interest among the students and soliciting resumes.

For the faculty meeting: challenges that energy markets pose to financial modeling. I shall be able to E-mail the Power Point presentations later this month.

Vince

eRisks Event Information

Sender	support@communicast.com
Recipients	['vkamins@enron.com']
File	kaminski-v/discussion_threads/1328.

Thank you for registering for the eRisks iConference "Quantifying Mid-Market Default Risk: Estimation & Validation of Internal Grades for Basle & Securitization"

Featuring Eric Falkenstein, Vice President of Moody's Risk Management Services

The iConference is scheduled for Wednesday, October 18, 2000 at 12:00 noon EDT, 5:00 p.m. London.

Following are the details you will need to access the event. You may wish to save or print this page for future reference.

1. Dial 1-800-275-3210 (U.S.) or 973-628-6885 (International) to listen to the audio for this program. Audio is available by telephone only.
2. Wait for an operator and give the following code: "eRisks iConference." Music will play until the webconference begins.
3. Join the web-based portion of the program to see slides, participate in polls and ask questions. - Open Netscape or Internet Explorer 3.0 or higher. - Enter the following web address: <http://www.communicast.com/login>
4. Fill out the form on this page and enter the following confirmation number: 10006.
5. Click the "Communicast Now" button. In a few moments you will be placed in the eRisks conference.

Communicast System Requirements: - Communicast requires the ability to run Java applets. - Netscape or Internet Explorer browsers 3.0 or higher.

If this is your first Communicast event, you may wish to test your computer. Visit <http://www.communicast.com/login> at any time and click the "Test" button at the bottom of the page. For this conference, you may skip the last three tests relating to streaming audio. You will NOT need RealPlayer to participate in this conference.

If you require further assistance, contact support@communicast.com.

-----Original Message-----

From: "Dennis W. Loughridge" <loughrid@ruf.rice.edu>@ENRON Sent: Monday, January 28, 2002 3:39 PM To: Kaminski, Vince J Cc: Wilfred Uecker Subject: Rice Executive Education

Vince You and I met last year when I had to opportunity to sit in your Energy Derivatives class.

I work with Wil Uecker and have been trying to expand our executive education programs for energy companies. The area that seems to have to most interest is trading and risk management. There seems to be a market, some of the faculty is working in this area, and it would leverage the facilities in the new building.

We are in the very early stages of thinking about this and would welcome your input and involvement. I have proposed that we design a fairly comprehensive program to cover the essential competencies which professionals in these areas master. The design should have input from both academics and practitioners. Once we have some outline of the content, we can address delivery options.

This is obviously vague, but I believe that it has the potential to be of significance for the Jones School. I am also aware that other schools are working on similar concepts. Please let me know if you have any interest in this initiative. I would welcome your ideas and the chance to meet with you.

Dennis W. Loughridge Director of Energy Consortium Rice University 713-348-2812

Dear Vince,

Thanks for your note. I look forward to seeing you on the 20th.

We usually recommend our visitors to stay at the Park Hyatt on Battery Street. It's a 5 minute cab ride (or an easy 15 minute walk) to our offices. Should you decide to walk, it is important that you take Sansome Street rather than Montgomery. They are one block apart, but one goes up to the top of Telegraph hill and ends before continuing at the bottom of a cliff and the other is relatively flat and is continuous. There are detailed directions on our website (www.kmv.com).

See you on the 20th.

Regards,

Rob

Recommendation for John Gordon

Sender	vince.kaminski@enron.com
Recipients	['andrew.miles@enron.com', 'mark.courtney@enron.com', 'celeste.roberts@enron.com']
File	kaminski-v/discussion_threads/5603.

Celeste,

I am forwarding you a letter from Prof. Duane Seppi from Carnegie Mellon University. I have known Duane for many years and I know that he does not make his recommendations without very good reasons.

I would recommend looking at John Gordon as a very strong candidate: I think he will make a terrific contribution to Enron.

Vince

----- Forwarded by Vince J Kaminski/HOU/ECT on 05/15/2000

09:25 AM -----

ds64@MAIL1.ANDREW.CMU.EDU on 05/12/2000 01:30:14 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: Recommendation for John Gordon

Dear Vince,

I am writing to bring to your attention a GSIA student, John Gordon, who is currently being considered for Enron's Associates program. My understanding is that Mark Courtney and Andrew Miles at Enron are championing John as a late addition to the program.

While I know Enron doesn't routinely recruit at GSIA, John would be an ideal candidate if you are willing to make an exception. He is a terrific finance student with a strong transcript; including an A+ in my Options class. Since John has an engineering/energy background, he asked early on for additional background reading about finance and energy. John is personable and outgoing. Normally the job market for someone of John's caliber would have already cleared, but I have been told that there are dual career issues at play here.

I would be very appreciative if you would take a look at John. A copy of his resume is attached to this email.

Best regards, Duane

Louise,

Would you consider being a keynote speaker at this conference (Feb 22 evening)?

The conference will be held in Austin.

We have a very good relationship with UT and we are helping them to organize this conference.

I shall be glad to provide you more information about the event.

Vince ----- Forwarded by Vince J Kaminski/HOU/ECT on 11/02/2000 02:52 PM -----

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 11/02/2000 10:57:00 AM To: Vince.J.Kaminski@enron.com cc: Subject: Spring 2001 Energy Finance Conference Participation

Vince,

As promised, enclosed please find a brief description of the proposed Feb. 22 - 23 Energy Finance Conference, suitable for dissemination to your colleagues:

"As Director of the Center for Energy Finance Education and Research (CEFER), my colleagues and I are planning a practitioner-industry Conference in Spring 2001, Feb. 22 - 23, to discuss four topics: Risk management, Deregulation, Real options, and International/globalization. Other than the Univ. of Texas participants and selected academics from other institutions, we expect most participants at the Conference to be energy practitioners from Houston. The Conference will begin with a dinner and address Thur. evening, then continue all day Fri."

Given the energy-finance focus of the Conference, do you believe the Networks topics is sufficiently energy-related?

Best, Ehud

Vince Kaminsky Subject: MSCF Advisory Board Membership

Vince,

I am pleased to hear you will be returning to MSCF this year, participating in the Speaker Series on December 7. Enron has a tremendous reputation in quantitative finance circles and your obvious interest in our students is deeply appreciated. I know, too, our students are very much looking forward to your visit.

On a separate but definitely related matter, would you consider serving on our Advisory Board? You will note our present membership (<http://student.gsia.cmu.edu/mscf/advisory.html>) reflects no representation from an energy firm. I speak on behalf of the MSCF Steering Committee in expressing our hope that you would be willing to correct this!

The Advisory Board meets once a year, usually in the late fall in New York. Its six (or so) members serve for a three year term. Enron's participation on the MSCF Board would allow you to influence the direction of the program to the advantage of the energy companies and give you access to a "first look" at the "MSCF Resume Book." From our standpoint, your experience and counsel would be of tremendous benefit to us as we consider challenges and opportunities in the MSCF program in the years ahead.

Our 2001 meeting is scheduled for Wednesday, Dec. 12 in mid-town Manhattan. Would you be willing join us?

Rick

Mr. Richard L. Bryant Director, Computational Finance Program Graduate School of Industrial Administration Carnegie Mellon University Pittsburgh, PA 15213 (412) 268-4592/(412) 268-6837 (fax) rlbryant@andrew.cmu.edu

Re: MATLAB, Simulink and Stateflow Training in Houston !!!

Sender	vince.kaminski@enron.com
Recipients	['training@mathworks.com']
File	kaminski-v/sent/4376.

Thanks for the message. I am traveling on the days when you offer the class. Please, keep me in mind.

Vince

The MathWorks <mathworks-mail@mathworks.com> on 03/08/2000 12:59:24 PM Please respond to training@mathworks.com To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: MATLAB, Simulink and Stateflow Training in Houston !!!

Dear Wincenty Kaminski,

In response to your requests we have scheduled a week of training in Houston. Learn MATLAB, Simulink, and Stateflow as taught by our expert trainers.

We have confirmed a time and place, now we just need your commitment to attend. Please share this information with your colleagues !!

Location :

5555 San Felipe, Suite 1500 Houston, TX 77056

Dates :

4/3, 4/4 MATLAB Training \$990.00 4/4, 4/6 Simulink Training \$990.00 4/7 Stateflow Training \$495.00

How to sign up for a course :

Use a Credit Card and sign up at our web store : <http://www.mathworks.com/store/index.html>

or

Fax your P.O. to 508-647-4468

Contact Scott Wakefield if you have additional questions.

Reserve your spot quickly !!!! Only 12 spots are available and will fill quickly.

Cancellation Policy Tuition is fully refundable if we receive written notification (via mail or email) of cancellation on or before 7 business days prior to class. Cancellations made less than 7 business days prior to class will be charged 25% of the class tuition fee. If you fail to show up to class without written notice, you will be charged for the full tuition. A substitute may be sent in your place to avoid a fee.

I look forward to helping you attend this valuable training

Re: Research Resumes

Sender	stinson.gibner@enron.com
Recipients	['molly.magee@enron.com', 'vince.kaminski@enron.com']
File	kaminski-v/resumes/164.

Molly,

Below are the resumes sent to us by Focus. Vince suggested that we interview one person plus Sriram, who already lives in Houston. Karim looks like the most qualified, but my fear is that we may not be able to afford him. I am assuming that Vince will want to hire at most at the manager level. Can you first check and see if Karim would consider coming at a manager level salary before we spend time talking with him. If he is too senior, then we should talk to Samir, who looks like a more junior level person.

Thanks,

Stinson

----- Forwarded by Stinson Gibner/HOU/ECT on 04/05/2001

Visit to Wharton, December 6

Sender	vince.kaminski@enron.com
Recipients	['vince.kaminski@enron.com', 'george.carrick@enron.com', 'vasant.shanbhogue@enron.com', 'dhoog@att.net']
File	kaminski-v/discussion_threads/1937.

I would like to invite you to join mewhen I visit to the Wharton Risk Management and Decision Processes Center on December 6. The meeting will take place in the morning, 9:00 - 12:00, followed by lunch.

The description of the Center is at the bottom of the message. The Web site address is <http://grace.wharton.upenn.edu/risk/index.html>.

The objective of the trip is to discuss joint research projects in the area of risk management and alternative risk transfer.

Please, feel free to contact me with recommendations regarding discussion and potential research topics.

The best hotel to stay in is The Inn at Penn.

<http://www.innatpenn.com/contact.html> THE INN AT PENN Sansom Common, 3600 Sansom Street Philadelphia, PA. 19104 Phone: 1-800-809-7001 Fax: 215-222-4600

Vince Kaminski

The mission of the Wharton Risk Management and Decision Processes Center is to carry out a program of basic and applied research to promote effective policies and programs for low-probability events with potentially catastrophic consequences. The Center is especially concerned with natural and technological hazards and with the integration of industrial risk management policies with insurance. The Center is also concerned with promoting a dialogue among industry, government, interest groups and academics through its research and policy publications and through sponsored workshops, roundtables and forums.

retail markets conference

Sender	hillh@stanford.edu
Recipients	['vkamins@enron.com', 'pinnamaneni.krishnarao@enron.com', 'osezgen@enron.com']
File	kaminski-v/all_documents/723.

I would like to invite you to participate in a conference on "Retail Participation in Competitive Power Markets" to be held at Stanford University on June 21-22, 2001. Although California and other regional markets will likely be introducing some demand-response programs by June, there is a clear need for continual evaluation of these nascent efforts to transform the market. The conference provides an opportunity to learn from different experiences.

This policy research meeting will focus on establishing a foundation for understanding the key concepts and methods for demand response programs and to provide an opportunity for participants to raise questions and recommend directions for additional research and analysis. Participants will come from companies, government, and universities. You can obtain more information about the conference by checking under "Meetings" on our EMF website listed below.

Please let me know if you plan on attending. Also, if you would like to make a brief 15-minute presentation, please let me know your topic and describe it in a few sentences. I will try to choose speakers that will cover the full range of interests represented by this group. Researchers should focus on the implications of their analysis for designing demand response

programs rather than on the technical details of their methodology. I would also encourage practitioners to discuss their experience in implementing demand response programs or in raising selected issues.

Thank you, Hill Huntington

***** Hillard G. Huntington EMF - an international forum on energy and environmental markets Voice: (650) 723-1050 408 Terman Center Fax: (650) 725-5362 Stanford University Email: hillh@stanford.edu Stanford, CA 94305-4026

Ehud,

Sorry for the delay in replying to your message. I was on the road a lot. I am in London right now and plan to attend the conference.

I am leaving on Saturday morning for Houston.

I have asked Shirley to get tickets for one of the evening you mentioned. I should know by Thursday if the tickets are available.

Vince

-----Original Message-----

From: "Ehud I. Ronn" <eronn@mail.utexas.edu>@ENRON [mailto:IMCEANOTES-+22Ehud+20I+2E+20Ronn+22+20+3Ceronn+40mail+2Eutexas+2Eedu+3E+40ENRON@ENRON.com] Sent: Wednesday, June 20, 2001 11:08 PM To: Kaminski, Vince J Subject: 1. London, June 28 - 29; 2. Houston, July 16 - 17

Vince:

Greetings.

I write at this time for two reasons. First, w.r.t. 6/28 - 6/29 London, I remain uncertain whether you intend personally to attend and present at that EPRM Financial Math course. I wanted to advise you know that, in addition to the sightseeing/theatre we traditionally do at these events, we -- you, Duane Seppi, Peter Nance and I -- have been invited to dinner at the home of Klaus and Renee Toft Sat. evening 6/30.

Second, w.r.t. the subsequent mid-July Houston training course, I write to remind you that at EPRM 2001 we discussed the possibility of jointly attending a baseball game at Enron Field 7/16 or 7/17. Per the Astros' schedule, it turns out the Cleveland Indians will be in town both nights for a 7:05 p.m. first-pitch start time at the Field. Let me know if either 7/16 or 7/17 works out from your perspective.

Hope all is well. Best, Ehud

Ehud I. Ronn Jack S. Josey Professor in Energy Studies Department of Finance McCombs School of Business University of Texas at Austin Austin, TX. 78712-1179 Voice: (512) 471-5853 FAX: (512) 471-5073 Internet: eronn@mail.utexas.edu

Re: 1. Your Thur./Fri. Austin Trip; 2. Presentation of My

Sender	vince.kaminski@enron.com
Recipients	['eronn@mail.utexas.edu', 'vince.kaminski@enron.com']
File	kaminski-v/ut/93.

Ehud,

Sorry I shall miss you on Thursday.

I shall definitely attend you presentation at Power 2000.

I shall ask about a guest account on EOL. Typically, such an account allows an outside user to take a look at the system, but I don't think the traders will allow systematic access to the price data over a long period of time by a third party.

Vince

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 05/01/2000 05:54:50 PM To: Vince.J.Kaminski@enron.com cc: Subject: 1. Your Thur./Fri. Austin Trip; 2. Presentation of My Risk-Management Optimization Model; 3. Enron On-Line

Vince,

Greetings.

I am following up at this time with respect to the above issues we discussed in San Antonio.

1. I am leaving Thur. morn for Philadelphia, and shall not be back until late Fri. (My ETD is 9:40 a.m., which I understand is less than an hour before your arrival ...) Thus I shall regrettably miss your current UT visit, which we had hoped to also use as an opportunity to present/discuss my enterprise-wide risk management model.

2. That said, I shall be presenting an abridged version of this model at Power 2000's first day, 5/9 4:15 - 4:55 p.m. While I realize you'll be very busy over Power 2000's two days, should your schedule permit, I should most welcome the opportunity for you to see the model.

3. Per your suggestion in San Antonio, I would like to take this opportunity to inquire whether I might obtain an Enron On-Line account to obtain electricity prices quoted by Enron.

I look forward to seeing you at Power 2000. Best Regards, Ehud

Ehud I. Ronn Department of Finance College and Graduate School of Business University of Texas at Austin Austin, TX.

02:31 PM -----

"Michael A. Crew" <mcrew@andromeda.rutgers.edu> on 03/21/2001 10:07:52 AM To: shirley.crenshaw@enron.com cc: vkamins@enron.com, crri@andromeda.rutgers.edu, kleindorfer@wharton.upenn.edu Subject: Dinner speaker - May 23

Shirley,

This is to follow up today's conversation with Anita. As mentioned Paul Kleindorfer invited Vince to be our dinner speaker on Thursday, May 24. On reflection given the strong line up for Wednesday - Fred Kahn et al - we would very much like Vince to be the speaker on Wednesday. This will conclude the day very well giving participants a strong incentive to be there for the Wednesday.

I gather that this change should be acceptable to Vince.

We will show Vince's name as follows:

Wincety J. Kaminski

Managing Director - Research

ENRON

Jeremy will be emailing you the program with this information immediately.

We would like to go to press today. Failing that we can go to press tomorrow. We would very much appreciate your confirming this and making any corrections or changes. If you would respond to all of us it would be appreciated.

File	kaminski-v/deleted_items/749.

Praveen,

Sorry for not getting back to you earlier. The last few weeks were extremely hectic for obvious reasons. Would you like to visit, together with Arthur, Enron's trading floors? This week may be the last chance, as the results of the auction of our gas and power trading units will be announced Thursday. Wednesday or Friday would work for me.

My employment situation has not been resolved yet but it may finally happen later this week.

I shall see at the Darrell's seminar on Thursday and I can give you more details.

Vince

-----Original Message-----

From: Praveen Kumar <kumar@uh.edu>@ENRON Sent: Thursday, October 25, 2001 10:33 AM To: Kaminski, Vince J
Subject: Energy Executive Committee

Vince,

As you have seen in the write-ups I have been sending you, we have established the Energy Markets Institute here to provide a world class recruitment, specialized training, and research resource for the energy industry. The clear challenge now is to deliver on this as expeditiously as possible, and we need help and input from industry leaders. We have set up an Energy Executive Committee to work with us on making this a valuable resource for the industry. So far, Bruce Williamson (CEO, Duke Energy Global Markets), Gerald McElvey (Upstream Controller, ExxonMobil), Fran Keeth (Exec. VP, Shell Oil), Donna Pedersen-McGinnis (VP, Dynegy), Bruce Sukaly (Sr. VP, Cinergy), Bob Peebler (Retired, Halliburton) have agreed to be on the committee. The committee is being put together by Lane Sloan (Retired, Shell Oil).

Both Lane and I very much want to have your input. Enron is a leading energy firm (and from my perspective, it is the future of the industry). So we would like Enron to be represented, and I personally would be delighted and gratified to have your advice and evaluation. We plan to organize subcommittees dealing with Education, Research, and Trading---so it may just involve two meetings a year. We are looking at November 14 (5-7 p.m.) for the first meeting of the committee. Please let me know if you would agree to be on the Committee.

We are now in the process of recruiting top-name in energy-finance for the Bauer chair (endowment \$3 million). I also want to discuss any suggestion you may have on people we should be trying to recruit for this.

Best wishes,

Praveen

Rick / Vince,

Good morning.

In my 9/14 e-mail, I advised you of the practitioner-industry CEFER (Center for Energy Finance Education and Research) Conference we are planning for Spring 2001. As you know, we would like to invite Jeff Skilling to be the keynote speaker at the Thur. evening dinner. The following day's four topics consist of Risk management, Deregulation, Real options, and International/globalization. The majority of invitees would be (predominantly U. S.-based) energy-industry practitioners, as well as several academics.

Given lead time issues in these matters, we have reserved hotel rooms in Austin for Feb. 22, 2001. Could I ask you to ascertain Jeff Skilling's availability for that evening?

Thanks, Ehud Ronn

Ehud I. Ronn Professor of Finance and Jack S. Josey Professor in Energy Studies Director, Center for Energy Finance Education and Research McCombs School of Business University of Texas at Austin Austin, TX. 78712-1179 Voice: (512) 471-5853 FAX: (512) 471-5073 Internet: eronn@mail.utexas.edu

Vasant Shanbhogue 01/06/2000 08:28 AM To: Katja Schilling/LON/ECT@ECT cc: Vince J Kaminski/HOU/ECT@ECT
Subject: Re: Credit Article

I do not think minor changes would allow you to just use the same file. You will have to check with Risk. This is Risk Books, a specialist division of Risk Publications in London. Address: Haymarket House, 28-29 Haymarket, London SW1Y 4RX.

The publication was in a book, entitled "Credit Derivatives: Applications for Risk Management, Investment and Portfolio Optimisation," published in 1998. I am not sure if a lawyer was involved, maybe Vince will know.

Vasant

Katja Schilling 01/05/2000 05:47 AM To: Vasant Shanbhogue/HOU/ECT@ECT cc: Bijoya Banerjea/LON/ECT@ECT
Subject: Credit Article

Hello Vasant!

Bijoya has updated me on the discussion you have been having on the article from Risk Magazine about Credit.

We have found that the attachments you sent her are actually not word-for-word the same as the published version we have - the changes are only minor, wever, and have not altered the article in any way.

My question now concerns the copyrights. Since the version you sent is slightly different, do you think this gives us the freedom to publish it without the consent of Risk?

And if not - can you tell me if it was published by Risk UK or Risk in the States? And which issue was it? I just want to have all of the details if I need to call someone at the magazine ...

Also - was there a lawyer involved in the publication procedure, or was this handled by London/Houston PR? Or by Vince himself?

Sorry about all of the questions ... I just want to avoid problems well in advance.

Thank you!

Regards,

Katja

RICE/ENRON FINANCE SEMINAR SERIES

Sender	ostdiek@rice.edu
Recipients	['ostdiek@rice.edu']
File	kaminski-v/rice/235.

Rice/Enron Finance Seminar Series Participants:

We are getting ready to kick off the 2000/2001 Enron Finance Seminar Series at Rice University.

You can find the current schedule at <http://www.ruf.rice.edu/~jgsfss/> . Note that this is a new web address.

For your convenience, here are the dates and speakers lined up so far:

Sept 22 Jeff Pontiff, U. of Washington Sept 29 Len Mirman, U. of Virginia Oct 6 Charles Lee, Cornell Oct 13 George Allayannis, Darden Oct 20 William Goetzmann, Yale Nov 17 Yacine Ait-Sahalia, Princeton (joint seminar with Rice Economics)

Mar 9 Paul Schultz, Notre Dame Apr 27 Luigi Zingales, U. of Chicago

Lined up for the spring but date not yet scheduled:

Tim Bollerslev, Duke University Matthew Richardson, New York University

As changes are made to the schedule, I will notify the distribution list.

In addition, as we have done in the past, we will post the abstract and a downloadable version of the paper (if available) to the website a week or two before the seminar. The website will also provide a link to the speaker's homepage so you can access his or her biographical information. If the paper is not available at the website, I will send a hardcopy to interested Jones School faculty, to Felecia Jones (Economics), Latha Ramchand (University of Houston), and Vince Kaminski (Enron).

I will e-mail an announcement before each seminar, reminding you of the seminar date, time, and location. The distribution list will include everyone that receives this e-mail. Please contact me at ostdiek@rice.edu if you would like to be deleted from the mailing list or if you know of someone who should be added (new PhD students, new faculty, etc.).

----- Forwarded by Vince J Kaminski/HOU/ECT on 03/12/2001

05:17 PM -----

Hill Huntington <hillh@stanford.edu> on 03/01/2001 04:29:29 PM To: vkamins@enron.com cc: Subject: possible RTP conference

Dear Mr. Kaminski:

Thank you for talking with me about a possible RTP conference. I would like to include some discussions of what has been learned in other industries.

As I indicated, Frank Wolak suggested that I contact you. In discussing power markets with Frank and other colleagues at Stanford and EPRI, it seems quite evident that real-time pricing for retail customers is the "forgotten resource" in more efficient power markets. There seems to be a lot of confusion about what RTP means and it also seems that many researchers need to address some practical but important problems. I was asked whether a group like Stanford's EMF might explore this topic and give it the visibility that would have it considered more seriously by policymakers.

Frank thought that you might be someone who could help me structure a useful approach and who might also see whether Enron could become a major sponsor. I was hoping that this issue was sufficiently important to Enron that the company might consider providing \$25,000. As you may appreciate, it requires some thought and effort to make sure that the product of the conference is widely circulated among key government groups.

I would be very interested in hearing from you if you can provide ideas and recommendations for people (perhaps yourself or a colleague) to participate. I would also appreciate any consideration by Enron of providing funding for this effort.

Thank you, Hill Huntington

Greetings All,

On October 7th at 2:57 p.m. (CST), Cindy gave birth to our son, Andrew Joseph Edward. Andrew weighed in at 6 lbs. 12 oz. and is 19 3/4 inches long. This makes him a very light feather weight, but we intend to get his weight up for future Olympic competition. Mom is doing fine but feels like she has been hit by a truck.

We thank you in advance for all of your good wishes!

I hope this e-mail finds everyone in good health...and perhaps with a renewed desire to baby sit in the bayou.

We are currently space constrained but we shall always take a qualified candidate. Please, ask George to send me a resume and we shall get in touch with him to arrange a phone/on-location interview.

Vince

Tom Arnold <tmarnol@lsu.edu> on 04/25/2001 09:15:09 AM To: Vince.J.Kaminski@enron.com cc: Subject: Potential Prospect

Hey Vince,

Given that the Eastern Finance Conference is already taking place, I think it is safe to assume that they did not desire an energy derivative round table discussion. However, I appreciate you volunteering to potentially having been on such a round table discussion.

I've been teaching a "real options" course that has the students performing monte carlo analysis, Black-Scholes pricing, and binomial pricing along with a heavy dosage of understanding risk neutral pricing. A few of your new hires from the undergraduate program will be coming from this course. However, I have a student who will be finishing his MBA next spring that is particularly good. He is genuinely interested and curious about option pricing, trading, and hedging with Excel/VBA skills. In fact, he usually figures out when I make even very small mistakes in my calculations.

This is not to say that some of my other students aren't very talented themselves, but that this person really stands out. Do you think you and/or Enron would be interested in such a person? If so, what do you recommend that he do to get his foot in the door?

His intention is to finish the MBA, but I do not know if this would preclude you from hiring or at least taking a look at him now. His name is George Moss and I ordinarily would not bother you directly about a potential employee. I am making an exception in this case because he is a particularly good talent without being the slightest bit arrogant.

Otherwise, I hope this e-mail finds you doing well and not travelling too much.

Tom Professor Tom Arnold E.J. Ourso College of Business Administration Department of Finance 2155 CEBA Louisiana State University Baton Rouge, LA 70803 O: 225-388-6369 F: 225-388-6366

Sender	hea@houstonenergy.org
Recipients	['vkamins@enron.com']
File	kaminski-v/personal/167.

This member favorite is just a few weeks away, and there's still time for you to register and be eligible for the private drawing for a Remington 1187! Just send in your form and payment by August 1, and remember YOU MUST BE PRESENT TO WIN!

The Sporting Clays Committee and HEA want to thank this year's sponsors to date and encourage other companies to participate if possible. If you'd like to join this elite list, contact Jim Cody (713/230-3550), T. Kemp Jones (713/207-5189) or Jeff Eatherton (713/529-5247).

DUKE FIELD SERVICES; CORAL ENERGY/TEJAS ENERGY; SANCHEZ OIL & GAS CORP; EL PASO FIELD SERVICES; RELIANT ENERGY GAS TRANSMISSION; RELIANT ENERGY FIELD SERVICES; MITCHELL GAS SERVICES; COASTAL FIELD SERVICES; AND RELIANT ENERGY PIPELINE SERVICES. The continued success of this tournament through the enhanced quality of the prizes, dinner and services are made affordable only through your

contributions and we appreciate your support!

Other door prizes this year include a Browning Citori and several other guns! All prizes will be awarded during dinner in the air conditioned pavilion. The Two Man Flush will be shot from a newly covered deck, and other areas on the courses have been covered as well.

So visit the website, www.houstonenergy.org, and fill out a registration form under "next event". That's August 15 at the American Shooting Centers (16500 Westheimer Parkway), and choose between 50 and 100 targets. Even non-shooters can come out, eat dinner, have some drinks and possibly win a door prize and have lots of fun. If you have other questions, contact Eva Pollard at 713/651-0551.

File	kaminski-v/c/technote/mail/projects/89.

Neil,

You must have already gotten my earlier mail of clarification. Going forward, I agree with you that we should start the assignment early rather than late.

However, I would not necessarily like to wait till even Feb 5. The bids for LNG must go out by the 15th of Feb, and we need to do a lot of fuel based analysis before then. Hence, if it is possible for Anshuman to be available before then, I would greatly appreciate it. Perhaps even as early as Monday or Tuesday if possible ??

Regards, Sandeep.

Neil McGregor@ENRON_DEVELOPMENT 01/25/2001 10:19 AM To: Vince J Kaminski/HOU/ECT@ECT cc: Neil McGregor/SIN/ECT@ECT, Molly Magee/HOU/ECT@ECT, Vince J Kaminski/HOU/ECT@ECT, Sandeep Kohli@Enron@ECT Subject: Re: Anshuman

Thanks for the clarification Vince I appreciate it. We have a significant resource problem here in India, given we have a renegotiation about fall in our laps. Anshuman is one of our key analysts and we are very proud of his abilities and future potential for Enron. Once we have Dabhol off the "life support system" we could look at a longer assignment. As far as the present one month assignment is concerned, I would rather go for an early start say 5th Feb till 5th March. Is this convenient to you and Jeff. Neil

Vince J Kaminski@ECT 01/24/2001 10:41 PM To: Neil McGregor/SIN/ECT@ECT cc: Molly Magee/HOU/ECT@ECT, Vince J Kaminski/HOU/ECT@ECT, Sandeep Kohli@Enron

Subject: Anshuman

Neil,

I would like to apologize for the confusion regarding Anshuman. We have floated a number of possible scenarios regarding his trip to Houston and there was a lot of confusion regarding the terms (given that I was talking to Sandeep

every few days).

Currently, we expect Anshuman to come to Houston for one month to work on the DPC project (at Jeff Shankman's request). The lawyers advised me that we need an L1 visa for him, irrespective of the duration of his stay.

Sorry for the confusion.

Northern Light Search Tips: Using the Shopping Cart

Sender	e..taylor@enron.com
Recipients	['anjali.abraham@enron.com', 'ees <.adams@enron.com', 'john.addison@enron.com']
File	kaminski-v/inbox/441.

From: Lainie Goldberg [mailto:lgoldberg@northernlight.com] Sent: Thursday, November 01, 2001 2:03 PM To: SearchTips@northernlight.com <mailto:SearchTips@northernlight.com> Subject: Search Tips: Using the Shopping Cart

This SearchTips e-mail installment is being sent to all Northern Light Account Administrators. If you could forward this to all desktop users of Northern Light and invite them to sign up to receive more SearchTips, we would appreciate it.

The Northern Light Shopping Cart is fast, easy and a helpful tool for managing your document needs. Just like shopping in a supermarket, you can put all your items in the cart and then check out only once, leaving the downloading for when you are finished searching. Then when you are ready to view your documents, you can choose to save/print them as a single file or as separate files.

Doing research with the Northern Light Shopping Cart is simple and convenient. You can follow these five steps to use the shopping cart: 1. Click the "Add to Cart" button to the right of your results list to add a document 2. When done searching, click the "Go To Cart" button either below your search results or beneath the Custom Search Folders on the left: 3. After reviewing the contents of your cart, click the "Purchase Documents" button to retrieve your documents: 4. Then, enter your username and password (unless you have already logged into your account) 5. Next, choose to view, download, and/or print your documents as separate files or all in one file.

For more information on this helpful tool, please see:

<http://nlresearch.northernlight.com/docs/scmanager_help.html>To Subscribe to SearchTips, or to suggest a Tip, e-mail SearchTips@NorthernLight.com To be removed from the SearchTips mailing list, e-mail SearchTips@NorthernLight.com with "remove" in the Subject line.

Vincent,

We met last year when you were visiting The University, and talking primarily with our finance faculty. As you may have heard, I tried to call to talk with you about the possibility of a guest speaker in my class on real options from your group at Enron. Naturally, I would be delighted if you could speak, but I could also appreciate the possibility that someone else might also be a good choice.

I have attached a copy of the course syllabus for your information. This is the first time this course has been offered at UT, and I was motivated to do so because of the "buzz" regarding the topic in industry. I have about 30 MBA students in the class, many of whom were in the energy finance classes offered by Sheridan Titman and Ehud Ronn (both of whom have been very supportive of the development of this class). My own background is decision analysis rather than finance, so I tend to approach the topic with that perspective. As you can see, I have covered both traditional decision analysis topics and a review of the options literature. At the present time, I don't think there is a really complete textbook that fits the course at the MBA level, so I've tried to focus on how to do things in practice, and have provided software (DPL, spreadsheets, @Risk, etc) as tools for the students to use.

The course is scheduled on Thursday afternoons from 3:30 to 6:30, which is a time that I chose to make possible the participation of some Executive MBA students from Houston (3 are participating). I look forward to hearing from you about the possibility of a speaker, or any other suggestions that you might have.

File	kaminski-v/all_documents/3988.

FYI

Vince

----- Forwarded by Vince J Kaminski/HOU/ECT on 10/10/2000

01:26 PM ----- From: Richard Reichardt@ENRON COMMUNICATIONS on 10/10/2000 12:30 PM To: Mike McConnell/HOU/ECT@ECT cc: Larry Lawyer/Enron Communications@Enron Communications, Tom Gros/Enron Communications@Enron Communications, Vince J Kaminski/HOU/ECT@ECT, Kevin Garland/Enron Communications@Enron Communications, Richard DiMichele/Enron Communications@Enron Communications, Ken Rice/Enron Communications@Enron Communications Subject: Seismic Data on Oil & Gas field Development via Satellite

Mike,

Using NASA satellite transmission of maritime data and establishing a Houston Data Center to consolidate and centrally process 3D seismic data surveys for oil and gas extraction, exploration and development could save the petroleum

industry more than \$300 million dollars annually through reduced operational expenses. Added value in shortening the time to process and deliver the finished surveys should generate more than \$26 million per site (based upon \$15/barrel for average oil well production to market 30 days sooner) in revenue. By re-selling this data to market analysts or by internally using this data for forecasting future oil/gas production Enron could increase the accuracy of forecasting reserves and production capabilities globally. By holding the data as exclusive (or partially exclusive), Enron would have a significant market advantage in futures pricing for oil and gas. (Vince's team is quantifying the valuation of this information)

Attached please find an updated version of the business case for seismic data transfer via satellite, by a geophysicist at SpaceData - William K. Aylor, calculated using \$22/barrel oil.

Based upon your availability, Jon Adler and I would like to make a presentation to you (or your designated representative) on the Enron potential of this opportunity, sometime next week (17-20 October).

Thanks for the invitation. I shall attend.

Vince Kaminski Enron

Marc Epstein <epstein@rice.edu> (by way of Kathy Spradling <spradlin on 01/22/2001 03:41:13 PM To: (Recipient list suppressed) cc: Subject: Liz Demers research seminar

Dear faculty

Bob Westbrook and the accounting group has asked me to put together a continuing series of research workshops in accounting. My intention is to invite four or five researchers from around the country to present workshops on topics of interest each year. These are in addition to the normal recruiting seminars that we will have. The researchers will be a combination of senior and junior researchers. In addition to adding to our own research culture, the seminars should help promote the Jones School in the academic accounting community.

My intention is to invite people that are doing very interesting work that will be of interest to a large portion of the faculty. Given the small size of the accounting group, success of the seminars is dependent in part on the participation of faculty from other disciplines.

Our first seminar will be on February 16 from 10:30-12:00 and will be conducted by Elizabeth Demers, a Stanford PhD and presently an assistant professor at Rochester. Her paper is titled "A Rude Awakening: Internet Shakeout in 2000" and co-authored with Baruch Lev (a senior accounting researcher at NYU).

The work should be of particular interest to faculty in Finance and those interested in the valuation of internet companies and the value of intellectual capital and non financial information. I expect that it will be a very interesting seminar. Liz will arrive Thursday late afternoon and be here all day on Friday. I invite any of you who would like to meet with her or join us for a meal, to please let me know.

I will appreciate it if you could plan on attending at least some of our seminars. I hope that the topics and presenters will be of interest.

Thanks for your support.

Marc

Real Options Conf. Call

Sender	vince.kaminski@enron.com
Recipients	['ptufano@hbs.edu', 'vkaminski@aol.com']
File	kaminski-v/discussion_threads/4907.

----- Forwarded by Vince J Kaminski/HOU/ECT on 02/24/2000

03:29 PM -----

Rachel Vargas <rvargas@hbs.edu> on 02/23/2000 01:40:29 PM To: gljackson2@tva.gov, "Vince J Kaminski" <Vince.J.Kaminski@enron.com> cc: ptufano@hbs.edu Subject: Real Options Conf. Call

Good afternoon!

This is just to confirm that the Real Options Conference call will be Thursday, February 24 at 1:30pm Central Time, 2:30pm Eastern Standard Time.

Thank you all for your patience and co-operation with this matter.

Sincerely,

Rachel Vargas Asst. to Prof. Tufano

I have just been informed from Mr. Kaminski's assistant, Shirley, that his flight was cancelled and he will, therefore, be unavailable to participate in the conference call on Thursday, February 24.? Therefore, Mr. Kaminski's office proposes to reschedule the call to a new time of 1:30pm Central Time, 2:30pm Eastern Time on Thursday, February 24 (same day).

Please let me know as soon as possible if all parties can participate at this time.? If not, we will need to reschedule until next week.

Many thanks,

Rachel Vargas Asst. to Prof. Tufano

Dear Mr. Jackson and Mr. Kaminski:

Good afternoon!

I just wanted to make sure you both understood that the Real Options Conference, being held on Thursday, February 24 from 1:30-2pm, will be Eastern Standard Time.

Many thanks,

Rachel Vargas Asst. to Prof. Tufano

Dear Mr. Jackson and Mr. Kaminski:

This is to confirm that the March Real Options Conference call with Peter Tufano will be held on Thursday, February 24 from 1:30-2pm. Mr. Jackson, I have spoken with Suzanne and confirmed that the conference call will originate from Peter

Tufano's office.? Mr. Kaminski, I left a message in your assistant's voicemail (Shirley), and I also spoke with Mr. Kevin Moore to arrange this time.? Again, Professor Tufano will initiate this conference call.

Many thanks.

Sincerely,

Rachel Vargas Asst. to Prof. Tufano

Ph.D. Student Interest in Enron Employment; 2. Wharton MBA Grad Interest in Enron Employment

Vince:

In this third e-mail, I write you concerning the interest expressed by two colleagues in being considered for employment by Enron Corp.:

1. The first candidate is UT Finance Ph.D. student James Doran, who is confidentially re-evaluating his interest in the Ph.D. program. James has done some consulting work with me in the energy area, and thus has some background in the field. Although his quantitative/computing skills do not quite match those of Cantekin, I strongly believe they warrant an invitation for interview at Enron, and recommend you consider such an invitation affirmatively.

I enclose James' resume in Resume2001.doc.

2. The second candidate is David B. Good, formerly of the Nucleus Corp. A resident of Houston, Dave has an MBA from Wharton and several years experience in the energy sector. You met Dave during the recent EPRM training course in Houston. I have had occasion to work with Dave whilst he was director of quantitative analysis at Nucleus Corp. and have found him an MBA with good quantitative skills and excellent intuition. While I cannot recommend him for your Research Group, I believe he is well suited for a structuring/marketing position within Enron.

Dave's resume is also enclosed herewith in DBG resume.doc.

Should you and/or your colleagues have any questions regarding James or Dave, please feel free to contact me.

Best, Ehud

Skilling

Rick / Vince:

Greetings. I trust this e-mail finds you both well.

Further to my discussions with Vince two weeks ago, I write you at this time in my capacity as Director of the Center for Energy Finance Education and Research (CEFER). As we did in Feb. '01, my colleagues and I are planning a practitioner-industry Conference in Spring 2002, tentatively scheduled for 2/21 - 2/22/02. The Conference will kick off with a dinner/keynote address Thur. evening, then continue all day Fri.

I would like to extend an invitation to Enron Corp. President Jeff Skilling to be the keynote speaker at the Thur. evening dinner or the Fri. lunch (whichever he prefers). I appreciate your kind offer to relay this invitation to Mr. Skilling's office for his consideration. If at this stage he has timing constraints in the late Feb. - early March 2002 period, we would be happy to work around them in the scheduling of the Conference.

Although the format for 2002's conference may differ from that used in Feb. 2001, for completeness I enclose herewith a copy of the 2001 Conference Program.

With thanks for your intercession on our behalf, Ehud Ronn

Howard,

Thanks for the message and the paper. We shall hold an internal follow-up meeting next Monday to review potential projects on which we could cooperate in the future.

Vasant and I will contact you to discuss our recommendations regarding the future research agenda.

Vince

"Kunreuther, Howard" <kunreuth@wharton.upenn.edu> on 12/14/2000 10:07:11 AM To: "Bouillion (E-mail)" <james.l.bouillion@enron.com>, "Carrick (E-mail)" <george.carrick@enron.com>, "Hoog (E-mail)" <david.hoog@enron.com>, "Kaminski (E-mail)" <vkamins@enron.com>, "Vasant (E-mail)" <vshanbh@ect.enron.com> cc: "Doherty, Neil A" <doherty@wharton.upenn.edu>, "Kleindorfer, Paul" <kleindorfer@wharton.upenn.edu>, "Thomas, Louis A" <thomas@wharton.upenn.edu>, "Weigelt, Keith W" <weigelt@wharton.upenn.edu> Subject: Working with ENRON on catastrophic risk

Dear Vince, Jim, George, David and Vasant:

Neil Doherty, Paul Kleindorfer and I very much enjoyed our discussion last Wednesday at Wharton with you on future joint research with Enron over the coming year. In particular, we see the whole area of capital management and catastrophic risk as a fruitful area for joint collaboration. I am sharing this message with Louis Thomas and Keith Weigelt who direct the FAP MBA program in the hopes that we can find a team to work with us on these issues next semester.

Attached is a revised version of our paper on "Evaluating Risk Bearing, Mitigation and Risk Transfer Using Exceedance Probability Curves: Project Update". We would greatly appreciate you and your colleagues looking at the section on "Cat Bonds Covering Multiple Risks" (pp. 15-19) to see whether our example and conclusions make sense to you. We look forward to working with your team at Enron regarding ways that we can build on these preliminary findings to make cat bonds for weather risks more attractive.

Best wishes for the holiday.

Dear Vince,

Do you think you would be able to confirm a talk title and bullet points for your 'new research' talk by the end of the first week of January? In terms of the panel discussion we will confirm the actual content and structure closer to the date of the conference - in the meantime, if you have any ideas as to how we can make the panel as discussive as possible that would be great.

Best regards, Oliver

Dear Vince,

Thank you for agreeing to take part in our annual US congress. There were 2 things that I would ideally like you to be involved in. The first would be to present any new research you may have. This would be part of stream 3 (see attached) which looks at new research in derivatives modelling and analysis. If you would like to present any new research that fits into the rough areas outlined that would be great. The second would be part of a panel discussion on weather derivatives (number 44 attached). I have also invited Jeff Porter (Koch) and Ravi Nathan (Aquila). Please let me know if you would like to present any new research and/or take part in the panel.

i look forward to hearing from you soon.

Best regards, Oliver

Sent: Friday, May 11, 2001 3:33 PM To: 'vkamins@enron.com' Subject: Invitation to Speak

Dear Mr. Kaminski:

Hope your day is going well. Philip Merrill suggested I contact you regarding a conference I'm organizing on Implementing the Commodities Futures Modernization Act. The conference will include sections on Single Stock Futures, Clearing and Trading Facilities. The latter section will include a session on the new electronic exchanges and I would like to invite Enron to speak on their electronic energy trading exchange.

The conference will take place September 20 - 21, 2001 at The Drake Hotel in Chicago. The session will be in the afternoon on Thursday, September 20. I expect the conference will draw 100 executives from broker dealers, futures commissions merchants, commodity trading advisors, commodity pool operators, introducing brokers, investment banks, exchanges, and clearing firms.

The Institute for International Research (IIR) is the world's largest international conference company with 120 different business units and 4,000 employees in 36 countries. Founded in 1973 by Irvine Laidlaw, the current Chairman, IIR continues to provide unbiased, bleeding-edge business information through our conferences, workshops, seminars, and the Internet. For more information on IIR, please visit our website at <http://www.iirusa.com>.

A draft agenda is attached for your review. Please note it is a work in progress and I will be finalizing it over the next week. I welcome any feedback on how to improve the program, as well as any speaker suggestions.

Thanks again for your assistance. I'll follow-up with you next week, but please feel free to contact me in the interim with any questions.

Enjoy your weekend. Jennie D'Apice

File	kaminski-v/universities/355.

Rick,

Thanks for your message. I am familiar with the Computational Finance program and value its high quality.

Please, call me next week. The best time is between 7:00 and 8:30 a.m. CST.

Vince

"Rick Bryant" <rlbryant@andrew.cmu.edu> on 07/26/2000 01:27:23 PM To: Vince J Kaminski/HOU/ECT@ECT cc: "Kevin Kindall" <kkindall@enron.com>, "Ken Keeley" <kk4p@andrew.cmu.edu>, "Sanjay Srivastava" <ss1g@andrew.cmu.edu>
Subject: Recruiting at CMU Computational Finance Program

Vince,

Greetings! I am the director of the MS in Computational Finance program at Carnegie Mellon. I am following up on a conversation I had with Kevin Kindall, a graduate of our program, who gave me your e-mail address and suggested I contact you as the individual making the recruiting decisions for the Research Group at Enron.

In speaking with the director of the Career Opportunity Center at the business school, I am told that although an Alison Bailey from Enron (mary.alison.bailey@enron.com) has arranged for a sizable block of rooms in which to conduct interviews on campus on December 11th, there is as yet no indication of whether the Comp Finance students will have opportunity to compete for these spaces.

We are regarded by many in the industry as the top quantitative finance program in the country. Focused on derivative pricing, econometrics, VAR and portfolio management, our graduates should be an excellent fit for your business. I would be happy to talk with you further about our program(<http://student.gsia.cmu.edu/mscf/>) as well as our students' interest in Enron (the name comes up a lot!). Also, if you are interested, we run a "Speaker Series" on most Friday's during the fall and spring that would give you (or another in your group) the opportunity to address our students in an area of interest. Such a meeting would, I think, help you better understand the careers our students are preparing to pursue as well as give our students first hand knowledge of Enron and its future.

When might be a good time to contact you by telephone?

Thank you for your time.

Rick

Vasant Shanbhogue 01/06/2000 08:28 AM To: Katja Schilling/LON/ECT@ECT cc: Vince J Kaminski/HOU/ECT@ECT
Subject: Re: Credit Article

I do not think minor changes would allow you to just use the same file. You will have to check with Risk. This is Risk Books, a specialist division of Risk Publications in London. Address: Haymarket House, 28-29 Haymarket, London SW1Y 4RX.

The publication was in a book, entitled "Credit Derivatives: Applications for Risk Management, Investment and Portfolio Optimisation," published in 1998. I am not sure if a lawyer was involved, maybe Vince will know.

Vasant

Katja Schilling 01/05/2000 05:47 AM To: Vasant Shanbhogue/HOU/ECT@ECT cc: Bijoya Banerjea/LON/ECT@ECT
Subject: Credit Article

Hello Vasant!

Bijoya has updated me on the discussion you have been having on the article from Risk Magazine about Credit.

We have found that the attachments you sent her are actually not word-for-word the same as the published version we have - the changes are only minor, wever, and have not altered the article in any way.

My question now concerns the copyrights. Since the version you sent is slightly different, do you think this gives us the freedom to publish it without the consent of Risk?

And if not - can you tell me if it was published by Risk UK or Risk in the States? And which issue was it? I just want to have all of the details if I need to call someone at the magazine ...

Also - was there a lawyer involved in the publication procedure, or was this handled by London/Houston PR? Or by Vince himself?

Sorry about all of the questions ... I just want to avoid problems well in advance.

Thank you!

Regards,

Katja

Nick,

We can close the loop on our commitment to support the research projects before your visit to Enron.

My assistant, Shirley Crenshaw, will call you to set up a conference call with me, Stinson Gibner, and Tom Gros from Enron Broadband Services to discuss all the issues. Friday this week would work for both Tom and me. I think we need about 15 minutes.

Vince

P.S. Shirley, Nick's phone number is 650 796 8163 (cell), 650-725-5525 (office).

Nick Bambos <bambos@stanford.edu> on 03/12/2000 05:32:35 PM To: Vince.J.Kaminski@enron.com, bambos@stanford.Stanford.EDU cc: Subject: Visit to Enron

Hello Vince,

It was nice seeing you at Stanford and many thanks for the lunch we had together. I really enjoyed our discussions, both at the technical level and otherwise.

I promised to send you an e-mail regarding possible dates for a visit to Enron. I delayed it for a week till my schedule was clearer. Let's see if we can get a match with your schedule - mine is rather terrible:

Friday, 21st of April looks good. But April 23rd is Easter Sunday, so that may make it difficult for some people at Enron to be around. Let me know if that is the case. I am willing to visit then, because the week after that I am scheduled to be in Japan and in the previous weeks I am all committed on Fridays.

Friday, 19th of May is the next possibility, but this probably is too far out. The main problem is that I am operating within a window of opportunity for attracting top students for this research. This window closes by the end of April, and it would be important for the student support funds to be in place then, so that I can make hard commitments to students and attract top talent. I am already reviewing files of students who have approached me for PhD advising, and I am in a mode of doing "soft commitments to star-level students" to get this research and its potential on their radar screen. Top students are highly sought after by advisors and I want to be an early player in this competition.

Does my visit to Enron have to happen before we can set up the project and student support at Stanford? If so, doing it before the end of April is important for getting top people. If the visit can happen after we get the ball rolling, then we can schedule it in May. I assume there will be multiple visits both ways when the project gets going. Please let me know what you think.

Best Regards,

Nick

Hi Vince -- I hope all is well and that you have recovered from the flooding!

Just want to follow-up on a couple of things:

Firstly I haven't received your packet of information yet, which I'm looking forward to reviewing.

Secondly, I just found out that a couple of our business guys may be coming to your area. So thought it may be interesting for them to meet up with you. Would you be interested/available?

Regards, Aruna

Van,

Thanks for your message. We are taking a number of interns this summer, but the A&A program has closed the books for this year. We were able to reopen the list to add one candidate a few weeks ago, but cannot do it again. We promised it would be the last addition.

Vince

Van Ngo <vnngo@rice.edu> on 04/23/2000 11:42:54 AM To: Vince Kaminski <vkamins@enron.com> cc: Subject: summer

Dear Vince,

I'm writing to let you know that I have been in touch with Christy Young from the A&A Program and will be finding out my assignment for this summer soon.? I am very excited to be back at Enron, and I hope to see the Research team again.

I'd also like to inquire about summer positions within Research.? Will the Research group be taking on another intern this summer?? Since I know there is no busier place at Enron than the Research Group, if there is a position available for this summer that you are looking to fill or that may be open for consideration, I would love to connect you to another Rice student.

Please let me know if the Group is considering receiving a new intern this summer.? If so, I would be thrilled to put you in touch with Brad Aimone, a senior chemical engineering student here at Rice who will be graduating with both his B.S. and his Masters in Chemical Engineering next May.? Brad has gained extensive laboratory research experience over the past two years.? His academic focus gives him a strong mathematical, quantitative background and excellent computer skills.? I believe his skills are transferable and relevant to the Group, and he is a deeply dedicated individual.? If the Research Group is looking for a summer intern, I hope it will continue Enron's strong support and recruit of Rice University students.

Please feel free to contact Brad directly to pursue this discussion. (As I realize the summer months are not far off, if it is easier, an arrangement through ProStaff may be made similar to my work extension at the end of last summer).? I have attached a copy of his resume for your review.? Brad will be in Houston this summer.? His contact information is given below.

James Bradley (Brad) Aimone 6320 Main, Houston, TX? 77005 713-630-8035 imaknee@rice.edu ?

Also, please feel free to contact me if you have any questions.? I sincerely hope that you will have the opportunity to discover the contributions Brad can make to the Research Group.? I certainly know that he would gain tremendously from the experience as I did last summer.

Thank you very much for your consideration.

Sincerely, Van

*Message 426 of 681***Energy Institute Curriculum**

Sender	pkumar@uh.edu
Recipients	[j.kaminski@enron.com]
File	kaminski-v/inbox/678.

Dear Vince,

We have been working on the curriculum for some of the educational programs to be offered by the Energy Markets Institute that Arthur Warga and I discussed with you in the summer. I am attaching (tentative) curricula for two important programs: (1) A graduate certificate in Energy Finance, (2) A 5-year BBA/MS program in Energy Finance. Briefly, the certificate is a 5-course for-credit program that is available to people with sufficient basic background in finance, economics, statistics and mathematics. This certificate includes coursework in accounting issues specific to the energy industry, basic aspects of energy sources and the organization and regulation of energy industry, forecasting and time-series econometric methodologies, basics of financial engineering and derivatives, real-options and project analysis as it applies to the energy industry, and energy derivatives and risk-managment. The 5-year program is more ambitious. It seeks to provide a broad but rigorous curriculum for future energy industry professionals and managers. In the undergraduate component students take rigorous courses in math, probability and statistics, economics, chemistry and physics, and accounting and finance. This is conceived to be an "elite" and highly demanding program where students have to handle the more demanding courses in a variety of areas. The 5th or graduate year of the program is given over to the energy certificate and additional graduate courses in finance and accounting. I know you are extremely busy, but it would be very helpful to get your reaction (even at a broad level) to these programs and the type of courses that are envisaged. We view these programs to potentially form the core of the educational activities of the Institute, but the next step would be to develop more specialized programs (of shorter duration) aimed at professionals already working on challenging problems in the industry. We are in the process of setting up the Institute and developing its governance and administrative structure. I will give you more details very shortly. On another topic, Darrell Duffie (with whom I interacted with a lot during our student days at Stanford) will be coming to present a seminar at the Bauer College on January 10. We very much hope to see you and the Enron group there. Finally, I hope that you and all of your loved ones and colleagues are as well as possible in light of the recent tragedies. We can only hope, pray and work to see that these senseless acts never again occur anywhere.

Best wishes,

Praveen

Praveen Kumar Chair and Professor of Finance C.T. Bauer College of Business 334 Melcher Hall University of Houston

Christie,

Let's meet to discuss this project. I need more information from you about it. By the way, I shall meet Bob Westbrook on Wednesday to discuss unrelated issues.

Vince

Christie Patrick 11/02/2000 12:33 AM To: cmiller@rice.edu, Cindy Derecskey/Corp/Enron@Enron, Michael B Rosen/HOU/ECT@ECT, Steven J Kean/NA/Enron@Enron, Vince J Kaminski/HOU/ECT@ECT, grwhit@rice.edu, westbro@rice.edu, Mark Palmer/Corp/Enron@ENRON cc: Subject: Action Learning Project and Enron tour

Hi Carrie,

It was great meeting with you and Dean Whitaker again last Friday, as well as Mr. Westbrook. As we discussed, I have submitted the Action Learning Program materials to Vince Kaminski, our managing director of Risk analysis and Corporate Research. I'll be following up with him, and his recommendations for project proposals next week. Also, I've discussed with our University Affairs team setting up the faculty tours--we're ready when you are!! The sooner the better--I'd love to get these in pretty immediately, and in any event, before the reception at the end of the month. I'll have Cindy Derecskey in my group eMail you--she is prepared to set these tours up.

I look forward to continuing to develop the multiple potential dynamics of the Enron-Rice relationship!

Thanks!

--Christie.

ps: Thanks so much for the Crystal Rice Owl--my participation as a judge in the Rice Invitational Case Competition was my pleasure indeed! ----- Forwarded by Christie Patrick/HOU/ECT on 11/02/2000 12:23 AM

Christie,

I enjoyed visiting with you last week at the Jones School. Thanks for taking time to come see us. I wanted to follow up with you regarding the Action Learning Project program and Enron tour. We hope to have Enron as part of the program in 2001. Please let me know how I can help make this happen. I look for the program to be full before the deadline of December 1st. Also, I am happy to help organize a group to tour Enron. If you were to participate in the ALP program, January/February might be a good time to put something together with key faculty and the ALP team. Let me know your thoughts.

Again, many thanks for your continued support of the Jones School. I look forward to hearing from you soon.

RE: Spring 2001 Energy Finance Conference Participation by Jeffrey

Sender	j.kaminski@enron.com
Recipients	[titman@mail.utexas.edu]
File	kaminski-v/sent_items/2398.

Sheridan,

I am aware of the duplicate check problem and I owe you phone call about this. I am still trying to mobilize internal support for the valuation study we discussed at San Antonio. Mark Ruane whom you met, moved on to a new job and his successor is a bit skeptical about the need for a study. Internal Enron perception is that we understand the process of

decision making inside big financial institutions (or lack of it), especially in the energy area, regarding valuation of investment projects. Any study would just reveal what we already understand about quite simplistic tools they use: DCF with a discount rate being subject to negotiations within a very broad band of potential values.

It will help if I get the agenda of the conference soon to pass it on to Jeff Skilling. It would also help if you could write a formal letter to him.

Vince

-----Original Message-----

From: Sheridan Titman <titman@mail.utexas.edu>@ENRON
[mailto:IMCEANOTES-Sheridan+20Titman+20+3Ctitman+40mail+2Eutexas+2Eedu+3E+40ENRON@ENRON.com] Sent:
Thursday, August 02, 2001 3:49 PM To: Kaminski, Vince J Subject: RE: Spring 2001 Energy Finance Conference
Participation by Jeffrey K. Skilling

Dear Vince:

That is great news that Jeffrey Skilling will be speaking at our conference. By getting Skillings involvement we should be able to increase the quality of the conference by at least a few notches.

By the way, Shirley may have mentioned to you that I somehow received two checks for the work I did last spring. I went off to Hong Kong this summer and didn't follow up on this other than to mention it to Shirley before I left. (I just got back last Friday.) Shirley left me a phone message to mail the check back to her. If you can email Shirley's last name and mailing address to me I'll send her the check. Also, if you are interested in having me do some work on the valuation issues we discussed at the Texas Finance Festival please let me know.

One more thing: The university that I'm affiliated with in Hong Kong (HKUST) just hired a new president, Paul Chu, who is from Houston and has some sort of relationship with Ken Lay. The Dean at the HKUST business school mentioned that Paul Chu was meeting with Ken Lay this summer and would discuss possible avenues of collaboration. If you can think of anything that you would be interested in let me know and I can discuss it with the Dean.

I hope you are having a great summer and look forward to seeing you when you come to Austin this fall for our energy finance class and in February for the conference.

regards,

Sheridan Sheridan Titman Department of Finance College of Business Administration University of Texas Austin, Texas

Subject: Re: Seismic Data on Oil & Gas field Development via Satellite

There may be a business opportunity with this company, but I would not advise making an investment. Kevin Garland

Richard Reichardt 10/10/00 12:30 PM

To: Mike McConnell/HOU/ECT@ECT cc: Larry Lawyer/Enron Communications@Enron Communications, Tom Gros/Enron Communications@Enron Communications, Vince J Kaminski/HOU/ECT@ECT, Kevin Garland/Enron Communications@Enron Communications, Richard DiMichele/Enron Communications@Enron Communications, Ken Rice/Enron Communications@Enron Communications Subject: Seismic Data on Oil & Gas field Development via Satellite

Mike,

Using NASA satellite transmission of maritime data and establishing a Houston Data Center to consolidate and centrally process 3D seismic data surveys for oil and gas extraction, exploration and development could save the petroleum industry more than \$300 million dollars annually through reduced operational expenses. Added value in shortening the time to process and deliver the finished surveys should generate more than \$26 million per site (based upon \$15/barrel for average oil well production to market 30 days sooner) in revenue. By re-selling this data to market analysts or by internally using this data for forecasting future oil/gas production Enron could increase the accuracy of forecasting reserves and production capabilities globally. By holding the data as exclusive (or partially exclusive), Enron would have a significant market advantage in futures pricing for oil and gas. (Vince's team is quantifying the valuation of this information)

Attached please find an updated version of the business case for seismic data transfer via satellite, by a geophysicist at SpaceData - William K. Aylor, calculated using \$22/barrel oil.

Based upon your availability, Jon Adler and I would like to make a presentation to you (or your designated representative) on the Enron potential of this opportunity, sometime next week (17-20 October).

Re: My model for spikes

Sender	vince.kaminski@enron.com
Recipients	['vkholod1@txu.com', 'vince.kaminski@enron.com']
File	kaminski-v/all_documents/2449.

Valery,

I am interested in receiving the preprint. On another note, I would be glad to meet you for lunch/dinner sometimes during the next few weeks.

Please, let me know what would be the best time to meet.

Vince

Vincent Kaminski Managing Director - Research Enron Corp. 1400 Smith Street Room EB1962 Houston, TX 77002-7361

Phone: (713) 853 3848 Fax : (713) 646 2503 E-mail: vkamins@enron.com

"Valery Kholodnyi" <vkholod1@txu.com> on 12/20/2000 03:13:09 PM To: vkamins@enron.com cc: Subject: My model for spikes

Dear Dr. Kaminski,

I was recently allowed to release into the public domain on the limited basis the first of the preprints that I recently authored on my model for spikes in power prices and for the valuation of the contingent claims on power. In this regard, I have just given a talk on this model at the joint seminar of the Center for Energy Finance Education and Research and the Institute for Computational Finance at the UT Austin. Right now I am also in the process of forming a list of specialists both in the industry and academia who might be interested in receiving this preprint. Please let me know if you might be interested in receiving this preprint.

I look forward to hearing from you.

Sincerely yours,

Valery Kholodnyi Manager of Quantitative Analysis Research and Analytics Group TXU Energy Trading

PS. Here are the main preprints that I have recently authored on my model for spikes in power prices and valuation of contingent claims on power:

1. Valery A. Kholodnyi, The Stochastic Process for Power Prices with Spikes and Valuation of European Contingent Claims on Power, Preprint, TXU-RAG-01/00, July 2000. 2. Valery A. Kholodnyi, Valuation of a Swing Option on Power with Spikes, Preprint TXU-RAG-05/00, August, 2000. 3. Valery A. Kholodnyi, Valuation of a Spark Spread Option on Power with Spikes, Preprint TXU-RAG-21/00, November 2000. 4. Valery A. Kholodnyi, Valuation of European Contingent Claims on Power at Two Distinct Points on the Grid with Spikes in Both Power Prices, Preprint TXU-RAG-24/00, November 2000. 5. Valery A. Kholodnyi, Valuation of a Transmission Option on Power with Spikes, Preprint TXU-RAG-25/00, November 2000.

As I have indicated to you in my previous e-mail, contrary to the standard approaches, I model spikes directly, as self-reversing jumps on top of a stochastic process for the regular dynamics of power prices in the absence of spikes. In this way the dynamics of power prices is modeled as a non-Markovian process, even if the process for the regular dynamics of power prices is Markovian. Among other things my model for spikes allows for the explicit valuation and hedging of contingent claims on power with spikes, provided that the corresponding contingent claims on power can be valued and hedged in the absence of spikes.

713-853-3848

Dear Vince Kaminski,

This is to inform you of the release of @GLOBAL v5.0.3. FTP download instructions are available immediately. The download instructions are included at the end of this email. If you wish to receive a CD, please send an email to info@fea.com. Please see below for more information regarding this new release.

Here's an overview of the new and changed features since version 5.0.2.

Bug Fixes

A bug was fixed for window barrier options (@GLOBAL Barrier & Digitals). The bug affected results when the window period starts at time zero, or has already started, and different yields are specified over and outside the window period.

Here's an overview of the new and changed features in version 5.0.2 since 5.0.1.

Bug Fixes

MCEQUITY_ASIAN and MCEQUITY_ASIAN_CLIQUET can now be evaluated on expiration date. A bug was fixed in MCEQUITY_ASIAN_CLIQUET that affected valuation when value_date was equal to the last averaging date of any reset period.

If you have any questions please feel free to contact us. We appreciate this opportunity to be of continuing service to Enron North America Corp..

Regards, Michelle Mendoza Email to: Support@fea.com or michelle@fea.com Direct Tel: +1-510-549-8702 *111 Financial Engineering Associates, Inc.

P.S. We apologize in advanced if you have received this email multiple times.

@GLOBAL and supporting documents are now available directly from the new FEA web site.

Go to the Products Downloads page of the web site: http://www.fea.com/web/support/product_downloads/

Log in to the @GLOBAL support area: Login: global Password: vjh6eier and press the <Submit> button.

N.B.: The password is only valid until the first Friday of next month. New passwords are issued on a regular basis. Contact support@fea.com if your password is out of date.

At the top of the download page you will find a list of the files on the site together with descriptions of what they contain. Below this is the actual download area. Decide which file you want and click on the highlighted file name in the download area. Follow your browser's instructions for downloading the file.

If you prefer to use the old-style direct FTP access, the following instructions apply:

NOTE: Using EXPLORER leads to unpredictable results, so we suggest using NETSCAPE or a DOS shell.

USING NETSCAPE:

In the Location box type: <ftp://global@ftp.fea.com> Password: vjh6eier

global-5.0.3-win32.exe is for Excel 7 or 97SR1, 2000 or XP, download and run on a local drive.

global-4.0-unix.tar.Z is for Applix, download, unzip, and untar and then follow the instructions in Readme_Install.

Rick, Thanks for your message. I am familiar with the Computational Finance program

and value its high quality. Please, call me next week. The best time is between 7:00 and 8:30 a.m. CST. Vince "Rick Bryant" <rlbryant@andrew.cmu.edu> on 07/26/2000 01:27:23 PM To: Vince J Kaminski/HOU/ECT@ECT cc: "Kevin Kindall" <kkindal@enron.com>, "Ken Keeley"

<kk4p@andrew.cmu.edu>,

"Sanjay Srivastava" <ss1g@andrew.cmu.edu> Subject: Recruiting at CMU Computational Finance Program Vince, Greetings! I am the director of the MS in Computational Finance program

at

Carnegie Mellon. I am following up on a conversation I had with Kevin Kindall, a graduate of our program, who gave me your e-mail address and suggested I contact you as the individual making the recruiting decisions for the Research Group at Enron. In speaking with the director of the Career Opportunity Center at the business school, I am told that although an Alison Bailey from Enron (mary.alison.bailey@enron.com) has arranged for a sizable block of rooms

in

which to conduct interviews on campus on December 11th, there is as yet no indication of whether the Comp Finance students will have opportunity to compete for these spaces. We are regarded by many in the industry as the top quantitative finance program in the country. Focused on derivative pricing, econometrics, VAR and portfolio management, our graduates should be an excellent fit for

your

business. I would be happy to talk with you further about our rogram(<http://student.gsia.cmu.edu/mscf/>) as well as our students'

interest

in Enron (the name comes up a lot!). Also, if you are interested, we run

a

"Speaker Series" on most Friday's during the fall and spring that would give you (or another in your group) the opportunity to address our

students

in an area of interest. Such a meeting would, I think, help you better understand the careers our students are preparing to pursue as well as

give

our students first hand knowledge of Enron and its future. When might be a good time to contact you by telephone? Thank you for your time. Rick Richard L. Invitation - Wharton ET Events

Sender	vince.kaminski@enron.com
Recipients	['mark.palmer@enron.com', 'vince.kaminski@enron.com']
File	kaminski-v/_sent_mail/2150.

Mark,

FYI.

What about going to Wharton in October to attend the E-commerce conference?

Vince

----- Forwarded by Vince J Kaminski/HOU/ECT on 08/18/2000

11:56 AM -----

tomczyk@wharton.upenn.edu (Michael Tomczyk) on 08/15/2000 01:37:34 PM To: vkamins@enron.com cc: Thomas.Piazza@wharton.upenn.edu Subject: Invitation - Wharton ET Events

Vince hello,

I just wanted to followup up on our meeting at Wharton and let you know that there are two upcoming events that you may want to attend - or designate others from Enron to attend. Both of these events are good opportunities to "test drive" the Emerging Technologies program and see if there is an interest in joining our partner group.

SEPTEMBER 8 - WHAT NEXT ON THE INTERNET?

Our next insight-building event will be held at Wharton on Friday, September 8 and is entitled "What Next On the Internet?"

This is primarily a Wharton faculty event and we will be exploring 3 areas: 1) the New Economics on the Web, 2) Internet, Anywhere, and 3) Implications for (academic) Research and Education. Speakers will include Jay Walker (Priceline.com), David Farber (Chief Technologist at the FCC) and Mohan Sawhney (Kellog Univ., one of the nation's thought leaders on e-Commerce), along with several senior Wharton faculty members.

There will be considerable discussion on how the next generation of the Internet will evolve and the implications for management and management research. We are inviting our industry partners to join us at this event, and participate in the discussion, which should contain some valuable insights and also provides an opportunity to help set our research agenda. You are most welcome to participate, or designate a colleague, if you like.

OCTOBER 19&20 - WINNERS & LOSERS IN THE E-COMMERCE SHAKEOUT

This will be a major Impact Conference to explore the coming Internet shakeout, and apply some of the traditional shakeout measures to E-Commerce and try to determine what we can expect. It should be an intriguing day. If you plan to attend please RSVP early since we are sure to be "overbooked" for this event. This is probably the best showcase for our insight-building activities, if you would like to invite any colleagues help determine if it makes sense for Enron to become a partner in the ET Program.

If you'd like to RSVP for you and any colleagues who would like to attend one or both of the events described above, send me an email reply and I'll send you a more detailed agenda and speaker description, etc.

I'll be on vacation the rest of this week but if you have any questions or comments you can call or email me next week.

best regards, Michael

Rick,

Would you look us to make a joint appeal to Jeff to speak at this conference? Our friends at UT were very disappointed last time that Jeff had other commitments and I suggested they should try to get on his schedule early for the 2002 event.

Vince -----Original Message----- From: "Ehud I. Ronn" <eronn@mail.utexas.edu>@ENRON [mailto:IMCEANOTES-+22Ehud+20I+2E+20Ronn+22+20+3Ceronn+40mail+2Eutexas+2Eedu+3E+40ENRON@ENRON.com] Sent: Tuesday, July 31, 2001 5:39 PM To: Causey, Richard; Kaminski, Vince J Cc: George Gau; titman@mail.utexas.edu Subject: Spring 2001 Energy Finance Conference Participation by Jeffrey K. Skilling

Rick / Vince:

Greetings. I trust this e-mail finds you both well.

Further to my discussions with Vince two weeks ago, I write you at this time in my capacity as Director of the Center for Energy Finance Education and Research (CEFER). As we did in Feb. '01, my colleagues and I are planning a practitioner-industry Conference in Spring 2002, tentatively scheduled for 2/21 - 2/22/02. The Conference will kick off with a dinner/keynote address Thur. evening, then continue all day Fri.

I would like to extend an invitation to Enron Corp. President Jeff Skilling to be the keynote speaker at the Thur. evening dinner or the Fri. lunch (whichever he prefers). I appreciate your kind offer to relay this invitation to Mr. Skilling's office for his consideration. If at this stage he has timing constraints in the late Feb. - early March 2002 period, we would be happy to work around them in the scheduling of the Conference.

Although the format for 2002's conference may differ from that used in Feb. 2001, for completeness I enclose herewith a copy of the 2001 Conference Program.

With thanks for your intercession on our behalf, Ehud Ronn

Vince,

The previous time I sent this it appeared not to be delivered by your system. I am resending. I apologize if you get more than one of these emails. We are looking forward to you presenting at the conference. In regards to your topic for the conference, the theme of the 2001 Electric Market Forecasting Conference market volatility and risks regional markets. Several of the presenters will explore the underlying drivers in the respective markets that will effect market price and value of positions. Others will be exploring Electric and Gas Forward Markets and Gas and Oil Hedging Strategies.

Please consider one of the following topics: * Western U.S. Markets: Issues and Understanding Western Markets * Key Principles (and Strategies) for Managing Positions in Volatile Energy Markets The intent of the presentations is to get to the heart of emerging electric market issues and increase awareness of the big issues and principles that will give the attendees insights. However, as Warren indicated, please feel free to select your own topic related to the conference theme.

Listed below are the topics by the other presenters.

Just let me know the topic you would like to address. I am very willing to discuss this with you over the phone if that would be helpful. Regards, Lee

Lee A. Barney EPIS, Inc. 1800 Blankenship Road, Suite 350 West Linn, OR 97068 (503) 722-2023 x203 (503) 722-7130

Recipients	['lance.cunningham@enron.com', 'vince.kaminski@enron.com']
File	kaminski-v/discussion_threads/3542.

That should be fine, as long as you keep to a general overview and dissertation work. You can talk about different modeling approaches in the industry, and indicate, if asked, that Enron looks at all approaches but not be specific about which particular one we believe in.

Can you give me more details on the meeting? I may like to attend as well.

Thanks, Vasant

Lance Cunningham@ENRON on 03/27/2001 10:37:02 AM To: vkaminski@aol.com, Vasant Shanbhogue/HOU/ECT@ECT, Vince J Kaminski/HOU/ECT@ECT cc: Subject: Panel session at 2001 PES Summer Meeting

Vince and Vasant,

I was asked by one of my advisors to be on a panel for the summer Power Engineering Society. I stated that I couldn't divulge any information on modeling efforts at Enron but could give a general overview and cover my dissertation work. He stated that he understood and other companies had expressed similar concerns.

I guess that I need your OK to attend this presentation and present.

Thanks, Lance ----- Forwarded by Lance Cunningham/NA/Enron on 03/27/2001 10:24 AM

Subject: Panel session at 2001 PES Summer Meeting

Gentlemen:

Thank you for agreeing to participate on the panel. To comply with the quality control requirements of the society I must request from each of you the following: 1. Name, affiliation, and title of presentation as you want it listed in program.

2. A 2-6 summary of the presentation. These summaries will appear in the proceedings. Many speakers simply provide a few powerpoint slides that contain this information, or alternatively, a few paragraphs of text summarizing the points they intend to make in their presentations.

Please provide this information to me by April 2.

Here is the status of the panel so far.

Title: Power Trading and Asset Management: Tools of the Trade Requested Day and Time: Wed July 18 morning session

Summary A number of sophisticated analytical tools are used in support power trading and asset management activities. These include various time-series, stochastic, and physical models of quantities and prices, portfolio and risk analysis tools, and other risk management tools. In this panel, the analytical approaches are surveyed and discussed.

Panelists: Lance Cunningham/ confirmed Manager, Research Enron North America

Micahel Rosenberg/ confirmed TXU

Shams Siddiqi/ confirmed LCRA

Harry Singh/ confirmed Director, Market Economics PG&E National Energy Group

Robert Camporeale ConEd Energy

From: J D Duffie <duffie@smtp1.stanford.edu>@ENRON

[mailto:IMCEANOTES-J+20D+20Duffie+20+3Cduffie+40smtp1+2Estanford+2Eedu+3E+40ENRON@ENRON.com] Sent: Sunday, August 19, 2001 12:33 PM To: Kaminski, Vince J Cc: duffie@smtp1.stanford.edu Subject: Re: The first document for audit

Vince:

I read the reliability-based VAR method document with interest.

Here are some comments:

1. The document falls short of describing how to use the method in practice, but rather gives some general motivation. I am confident that I myself could not develop an algorithm based on this document, unless all of the derivative valuation functions are explicit (and rather nice) functions with explicit derivatives of the underlying variables, in which case the VAR problem is not so hard in any case, as Monte Carlo is very effective in this case. (My comment here is critical of exposition. I do not suggest that the proposed method is weak!)
2. The remark (p. 2) that my paper with Jun Pan addresses only normal returns is not correct. The main point of our paper was to allow for jumps, including fat tails and skewness. The comment that we rely on delta-gamma is a good criticism, and the main potential advantage of the reliability approach, if it works in practical cases.
3. There is a typo at page 2, at 9 lines from the bottom, where I presume $g(T(u))$, not $g(T(x))$
4. There is a missing 'we' on page 5, 9 lines from the bottom.
5. The remark on CPU time (page 7) does not mention what machine was used.
6. The example (page 8) does not really have much non-normality. Skewness=0, and kurtosis (4) (is this excess kurtosis?) are not much compared to most practical cases, in which kurtosis is an extra order of magnitude, with lots of skewness.

Overall, the paper piqued my curiosity a lot, and left me wanting more clarity, and a cookbook.

I hope 'events' at Enron have not made things difficult for you.

I will later bill you for one hour, if that is OK.

Warmest personal regards, Darrell

RE: Seeking opportunity in computational finance

Sender epr@pipeline.com

Recipients ['vince.j.kaminski@enron.com']

File kaminski-v/resumes/329.

Dear Vince:

Thanks for your response.

I am not a programmer, nor a "quant". I am an expert in Excel and otherwise have advanced skills in the remaining MSOffice Suite. Beyond that I have extensive experience working with research and computer programming personnel on projects from networks to databases, and in particular, automation.

For instance, the first generation of the risk analytics system that I designed for Quantlab was done in Excel. In subsequent generations of the system, Excel served only as the GUI - given its extreme flexibility - and a SQL database operated underneath (Compaq servers, RAID array), integrating real-time operations for all components of the system.

The research team at Quantlab used many leading edge modelling methodologies, such as genetic algorithms, neural networks, principal component analysis, kernel density estimation, fast kernel regression, Hidden Markov Modelling and many other pattern recognition, walk-forward back testing, and other simulation techniques.

I was the sole individual on a team of 17 that had any practical trading experience, and therefore, felt that I played a critical role in the application and implementation of each of the system components from data mining to research to signal generation to execution. Beyond that, I was uniquely qualified to articulate the project's mission to investors, and therefore, was highly successful in spearheading support - financial and otherwise - from our network.

Although I did not ask specifically, I surmise from your question that you are leading a research effort. I believe that my skill set is best served as a liaison between research and trading, since I speak both languages. I believe that I possess great vision and enthusiasm that could be leveraged in a group, project or product management role to integrate and streamline diverse systems and processes; a common scenario in most proprietary development settings today.

In closing, I would like to learn more about Enron and the financial technology effort therein through further discussion with you, or if that is not appropriate, someone to whom you would be comfortable referring me.

I look forward to your thoughts.

Best regards,

Paul

Dear Ms. Magee:

It was a great pleasure to meet you at the NSHMBA Career Fair in San Antonio, Texas and to learn more about employment opportunities at Enron. Our conversation reinforced my desire to join Enron's Associate Program. I am positive that my strong analytical skills, specific knowledge of industry regulation and working experience overseas, particularly in the energy sector would be great assets to your organization.

As I mentioned to you during the conference, through my career and during my MBA studies at the Simon School (University of Rochester) and the London School of Economics (LSE), where I earned a MS in Industry Regulation, I have gained strong analytical skills and an excellent understanding of the global trends in the energy sector, especially of those

related to the deregulation of the industry. Furthermore, working as an economist at the Vice-Ministry of the Treasury in Bolivia allowed me to gain hands-on experience in quantitative and financial analysis. These experiences have been complemented by my recent summer internship with British Petroleum (BP) Latin America where I was responsible for developing a valuation model to determine the acquisition price of a liquefied petroleum gas distributing company. As a result, I was directly exposed to the extraordinary prospects of the energy sector and to the expectations and needs of energy companies.

My current studies at the Simon School have also helped me further develop my finance and communication skills, which are essential for a position with Enron. I am confident I will be able to contribute positively to your organizations success. I would appreciate the opportunity to further discuss how my professional qualifications and personal qualities fit Enron present activities and its plans for the future. If you have any questions or would like to discuss any specific related to my credentials, please do not hesitate to contact me to the following telephone number: (716) 271 0934.

Sincerely,

Marcos A. Tapia

File	kaminski-v/universities/218.

Hi Vince!

I'll call you Monday to further discuss this! I'll be heading to Atlanta for a Forbes conference and meeting at Emory, but will call you at my first opportunity!

Thanks for the information about the meeting with Bob!

Thanks!

--Christie.

----- Forwarded by Christie Patrick/HOU/ECT on 11/04/2000

Vince J Kaminski 11/02/2000 01:55 PM To: Christie Patrick/HOU/ECT@ECT cc: Vince J Kaminski/HOU/ECT@ECT, vkaminski@aol.com Subject: Re: Action Learning Project and Enron tour

Christie,

Let's meet to discuss this project. I need more information from you about it. By the way, I shall meet Bob Westbrook on Wednesday to discuss unrelated issues.

Vince

Christie Patrick 11/02/2000 12:33 AM To: cmiller@rice.edu, Cindy Derecskey/Corp/Enron@Enron, Michael B Rosen/HOU/ECT@ECT, Steven J Kean/NA/Enron@Enron, Vince J Kaminski/HOU/ECT@ECT, grwhit@rice.edu, westbro@rice.edu, Mark Palmer/Corp/Enron@ENRON cc: Subject: Action Learning Project and Enron tour

Hi Carrie,

It was great meeting with you and Dean Whitaker again last Friday, as well as Mr. Westbrook. As we discussed, I have submitted the Action Learning Program materials to Vince Kaminski, our managing director of Risk analysis and Corporate Research. I'll be following up with him, and his recommendations for project proposals next week. Also, I've discussed with

our University Affairs team setting up the faculty tours--we're ready when you are!! The sooner the better--I'd love to get these in pretty immediately, and in any event, before the reception at the end of the month. I'll have Cindy Derecskey in my group eMail you--she is prepared to set these tours up.

I look forward to continuing to develop the multiple potential dynamics of the Enron-Rice relationship!

Thanks!

--Christie.

ps: Thanks so much for the Crystal Rice Owl--my participation as a judge in the Rice Invitational Case Competition was my pleasure indeed! ----- Forwarded by Christie Patrick/HOU/ECT on 11/02/2000 12:23 AM -----

Carrie Miller <cmiller@rice.edu> on 11/01/2000 12:47:17 PM To: christie_patrick@enron.com cc: grwhit@rice.edu, westbro@rice.edu Subject: Action Learning Project and Enron tour

Christie,

I enjoyed visiting with you last week at the Jones School. Thanks for taking time to come see us. I wanted to follow up with you regarding the Action Learning Project program and Enron tour. We hope to have Enron as part of the program in 2001. Please let me know how I can help make this happen. I look for the program to be full before the deadline of December 1st. Also, I am happy to help organize a group to tour Enron. If you were to participate in the ALP program, January/February might be a good time to put something together with key faculty and the ALP team. Let me know your thoughts.

Again, many thanks for your continued support of the Jones School. I look forward to hearing from you soon.

Badri,

In the event DPC signs the contract, we would need to make it Indian tax efficient. Please suggest the structure/clauses/information required by which we need not pay withholding taxes. If you need more info on the scope of work contemplated you can talk to Wade/Neil/Sandeep.

Regards Mohan

Sandeep Kohli 01/22/2001 07:11 AM To: Wade Cline/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Mohan Gurunath cc: Stinson Gibner@ECT, Vince J Kaminski@ECT, Bruce Lundstrom/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Bonnie Nelson/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Lauren Haggety

Subject: Re: CA for Henwood engagement

Wade/Mohan,

Please find below the last draft copy of the Henwood Consulting Agreement. We need to sign this asap so as to not be in violation of ENE policies.

As you will see, the draft Agreement is made out with Enron in mind, even though we have left the company name blank in the agreement.

Mohan - Last when we spoke (Friday), you were going to explore the tax aspects of having DPC be the signing company. Please tell us if that works.

Separately, you and Wade may need to consider how DPC lenders may look upon some of the information emerging from this study, and whether you want all of it in lender domain.

Based on the same you may want to decide whether this needs to be EIPL, ENE Houston, or DPC. We could also have a version where ENE Houston is signing the contract on behalf of DPC.

Please let me know what you decide, and we will proceed accordingly. If you would like someone in EIPL/DPC to be signing the contract, please let me know, who the signing authority is. I suspect, that even I could sign on behalf of DPC or ENE ?? If so, I will be in Houston on Wednesday, and sign at the time. If not, you can assign someone to sign.

Regards, Sandeep.

Stinson,

Please find attached a revised version of the draft Consulting Agreement with Henwood. FYI, I am attaching both a clean version and one marked to show changes from the last draft I sent you. Please let me know if you have any questions or comments on the agreement or the most recent changes.

What is the status of Henwood? Do you still want to engage them and what is the timeframe for their work (the dates in the draft may need to be corrected).

Bruce and Lauren: please advise on which Enron entity should be the party to this Consulting Agreement.

Thanks, Bonnie

[mailto:IMCEANOTES+22Amy+20A+2E+20Winter+22+20+3Camy+40epis+2Ecom+3E+40ENRON@ENRON.com] Sent: Wednesday, June 27, 2001 12:30 AM To: undisclosed-recipients:;@ENRON Subject: 2001 Electric Market Forecasting Conference

We hope to see you at this year's Electric Market Forecasting Conference. The purpose of this email is to recap the conference, give you the latest agenda, and to remind you of the approaching deadline for early registration. If you register by June 30th the early registration fee is only \$399.00. I recommend that you reserve your room at Skamania Lodge as soon as possible. They go quickly. For more information see below and on the attachment. Or, go to our website at www.epis.com. The conference information is at www.epis.com/Event/2001_conference.htm We look forward to seeing you. Regards, Lee Barney Forecasting Challenges in Electricity Markets 2001 Electric Market Forecasting Conference Skamania Lodge, Washington ? September 12-14, 2001 [IMAGE] Today's electricity markets are more challenging to predict than ever. Discover the keys to managing risk in volatile energy markets. The conference venue is the beautiful Skamania Lodge in the scenic Columbia River Gorge--45 minutes East of Portland International Airport, Portland, Oregon. A mind expanding setting for an executive-and professional level exchange of information and strategies concerning North American energy markets. Navigating Today's Energy Markets The challenges of taming energy markets don't begin and end in California. Volatility and risk are present in every market region, forcing all participants to carefully examine the underlying factors and accurately assess their current and future market positions. For the 4th year, EPIS, Inc., developer of the AURORA? electric market model, has assembled a stimulating program of interest to any company exposed to energy market risks. This year's agenda includes a detailed look at the various energy trading regions in the U.S. and Canada - an exploration of market conditions and market dynamics. This year's conference will feature thoughtful exchanges on: Electric and Gas Markets - 2001 and Beyond U.S. Markets: Crisis in the West, Emerging Issues in the East and ERCOT Keys to U.S. Electric and Gas Forward Markets Issues in Canadian Markets Gas Hedging Strategies and Electric Markets Price and Volume Volatility in Turbulent Markets New Resources: When and Where to Develop?

You'll hear from top-level speakers representing companies that have been there - Williams Energy Marketing, FPL Energy, NYMEX, ENRON, DTE Energy, Deutsche Bank and others. Plus there will be informative "roll-up-your-sleeves" sessions on applied forecasting techniques by Williams Energy Marketing, Pinnacle West, GenerSys, Southern California Edison. Register for Conference Register by sending the registration information on the attachment to EPIS by: Fax (503) 722-7130 MAIL 1800 Blankenship Rd., Suite 350, West Linn, OR 97068 Or register by phone at (503) 722-2023 x201. <<Agenda 2001 Electric Market Forecasting Conference.doc>>

Stinson, Enclosed are the details of the CPLEX purchase. If everyone agrees, I will assume that EBS is responsible for 1/3 of the cost (with Taxes etc. must be close to \$15,000). Krishna and Grant, what do you think? -Samer

"Kim Turley" <kturley@ilog.com> on 05/25/2000 02:22:30 PM

Please respond to <kturley@ilog.com>

To: <Chonawee.Supatgiat@enron.com> cc: <samer_takriti@enron.net>

Subject: Revised ILOG quote 5-25-00

Hi Chonawee,

You are right, I did make a mistake on the calculation, though it isn't exactly 2/3 of the previous 3 pak quote. Sorry about that and so glad you caught it. I multiplied by 1.5 and I meant to use 1.3. We have discounted deployment paks which we discount by quantity. Our chart starts with a 3 pak so I took that number from our price list and multiplied by 1.3 to get 14,560.00. For 2 deployments, I take \$4,500 for one, plus 10% off for the second license 4,050, then times 1.3 = 11,115.00. Here is the revised quote. I checked the other numbers again and they are correct. Again, I am sorry for the mistake.

Regards,

***** May 25, 2000 Enron Corporation

A Single User CPLEX v 6.6 Development License with Callable Library and Mixed Integer, 2 CPLEX Floating Deployment licenses with Mixed Integer and 2 OPL Studios, all with First Year's maintenance and on Win NT on an Intel PC.

Once you have a CPLEX Development License with Maintenance and Update Services, then you can purchase Deployment Licenses (run time/license derivative works)

~~~~~  
Item 1 Description Fee ----- 1 1 CPLEX Floating Development license, Callable Library, Mixed Integer \$15,300.00 2 Maintenance on Item 1 2,295.00 3 2 OPL Studio 10,000.00 4 Maintenance on Item 3 3,000.00 5 2 CPLEX Floating Deployment/Mixed Integer 11,115.00 6 Maintenance on Item 5 1,667.25

---

Total \$43,377.25

The cost of (optional) annual Maintenance and Update Services is 15% of the license fees.

The customer is responsible for and must add any applicable sales tax, value-added (ad valorem) tax, duty or other transaction tax associated with the sale.

This quotation is firm for 30 days and subject to the terms of the ILOG License Agreement and the ILOG Maintenance Agreement.

#### ORDER INFORMATION

Fax a purchase order (with clear shipping and billing address) to match the above items, attention Kim Turley. As soon as we receive your purchase order, we will ship the software and simultaneously send you an invoice by separate mail for payment.

Kevin Kindall 11/07/2000 03:12 PM To: jean eisel &lt;je2n@andrew.cmu.edu&gt; cc:

Subject: Re: Recruiting

Good afternoon. Packing emails--its just my style :)

Currently, it is my understanding that we would like to interview the Comp. Fin. students during the same period that we interview the MBA's. Tentatively speaking, one schedule should be sufficient. I will attempt to produce an official job description shortly. Kristen is out of town for the remainder of the week, so her response to any inquiries may be delayed. Her contact info: kristin.gandy@enron.com 713 345 3214 Regarding the satellite program, Vince is interested in the ECommerce program. We think that it would be easier to keep the program full as compared to the Comp. Fin. program.

It was a pleasure to be back in Pittsburgh and I enjoyed meeting all the students from this year's Comp. Fin. class. I look forward to seeing you in a few weeks.

-Kevin Kindall

jean eisel <je2n@andrew.cmu.edu> on 11/06/2000 03:34:05 PM To: Kevin.Kindall@enron.com cc: sgould@andrew.cmu.edu

Subject: Re: Recruiting

Hi Kevin

Wow you sure do pack one e-mail. I will try to answer questions...after each of you...look in the email for answers.

--On Monday, November 06, 2000, 2:39 PM -0600 Kevin.Kindall@enron.com wrote:

*Hello. It was a pleasure to come back to CMU, and I enjoyed interacting with the students. Vince K. has expressed interest in interviewing the Computational Finance students. Enron will conduct first round interviews with the MBA students in December, and would like to set up seperate interviews for the Comp. Fin. students. Enron would like to interview all the Pittsburgh based Comp. Fin students, and we need to select a date and a time.*

We are excited that you want to interview the Comp finance students.

Do you want to do it in Dec. or before? Let me know what best suits you. Since there are only 16 individuals in the Pittsburgh area... we should be able to accomodate you...Would you want one or two schedules..?

What is the formal protocol in such matters?

All you need to do is let me know some ideal dates...and you send a job description and names of the students you want to interview.

We will try to be as accomodating as possible.

*Enron is also interested in the ECommerce students as we have ecommerce initiatives underway. It is my understanding that Kristen Gandy will be the contact for such activities.*

If you can send me an e-mail address for Kristen, I can get this strating asap.

*Regarding a Houston based satellite program, Vince needs a proposal in writing. Would you be so kind as to send one?*

What program is Vince interested in having a satellite program? When he was here he seemed less intererted in Comp finance and more interested in E-commerce.

I sent a note to Michael Shamos and Tridas discussing this.

Let me know which program and I will see if we can work anything out?

*Thanks so much, and I look forward to seeing you again in a few weeks.*

Thanks Kevin for you speedy response.

Hello Darrell,

Many changes in Enron kept me busy during the last few days.

Rabi and Tanya are working on a new version of the documentation and we hope to send it to you in a few days.

I agree with you that the document we sent you was rather cryptic and apologize for not screening it more effectively. I agree with you regarding point # 2 and so does Tanya. I think she did not explain precisely what she meant by her comment.

I hope to talk to you soon.

Vince

P.S. We still owe you money for work done over the last 18 months.

-----Original Message-----

From: J D Duffie <duffie@smtp1.stanford.edu>@ENRON

[mailto:IMCEANOTES-J+20D+20Duffie+20+3Cduffie+40smtp1+2Estanford+2Eedu+3E+40ENRON@ENRON.com] Sent: Sunday, August 19, 2001 12:33 PM To: Kaminski, Vince J Cc: duffie@smtp1.stanford.edu Subject: Re: The first document for audit

Vince:

I read the reliability-based VAR method document with interest.

Here are some comments:

1. The document falls short of describing how to use the method in practice, but rather gives some general motivation. I am confident that I myself could not develop an algorithm based on this document, unless all of the derivative valuation functions are explicit (and rather nice) functions with explicit derivatives of the underlying variables, in which case the VAR problem is not so hard in any case, as Monte Carlo is very effective in this case. (My comment here is critical of exposition. I do not suggest that the proposed method is weak!)
2. The remark (p. 2) that my paper with Jun Pan addresses only normal returns is not correct. The main point of our paper was to allow for jumps, including fat tails and skewness. The comment that we rely on delta-gamma is a good criticism, and the main potential advantage of the reliability approach, if it works in practical cases.
3. There is a typo at page 2, at 9 lines from the bottom, where I presume  $g(T(u))$ , not  $g(T(x))$

4. There is a missing `we' on page 5, 9 lines from the bottom.
5. The remark on CPU time (page 7) does not mention what machine was used.
6. The example (page 8) does not really have much non-normality. Skewness=0, and kurtosis (4) (is this excess kurtosis?) are not much compared to most practical cases, in which kurtosis is an extra order of magnitude, with lots of skewness.

Overall, the paper piqued my curiosity a lot, and left me wanting more clarity, and a cookbook.

I hope `events' at Enron have not made things difficult for you.

I will later bill you for one hour, if that is OK.

Warmest personal regards, Darrell

"Joseph A. Cherian" <cherian@bu.edu> on 05/09/2000 08:10:19 AM To: "Jeffrey K. Skilling" <sreinar@enron.com> cc:  
Vince J Kaminski <vkamins@ect.enron.com>, "Robert A. Jarrow" <raj15@cornell.edu>, "Robert C. Merton"  
<rmerton@hbs.edu>

Subject:

Mr. Jeffrey K. Skilling President and C.O.O., Enron Corp.

Dear Jeff,

This email is from Robert Jarrow (Cornell) and myself (Joe Cherian). I hope you recall meeting/lunching with Bob Jarrow & me when you keynoted at my 1999 Math Finance Day conference here at Boston University. I wanted to introduce you to SKG Inc., a startup that is focused on providing an innovative service to the electronic trading community. Messers Kuppuswamy Seshadhri, Sriketan Mahanti, and Gaurav Mallik are the principal founders of SKG, Inc. Bob Jarrow and I represent the company's Scientific Advisory Board. Nobel laureate Robert Merton, who also sat on our table during your keynote address, very kindly serves as an ad hoc Senior Advisor to SKG and has been an invaluable resource to SKG, including putting us in touch with JP Morgan. Coincidentally, the C.O.O. of JP Morgan Capital Corp. Ed Colloton, in an April 7 meeting told us he would introduce us to the C.F.O. of Enron Online, whom he knows and at which he felt SKG would have huge value-adding opportunities. However, given Ed's busy travel schedule, I don't believe he has been able

to do that yet. Hence this joint decision by Bob Jarrow and myself to send you this email.

SKG's solution is to provide dynamic pricing and value maximization in electronic trading of securities/commodities on ECNs and ATSS (Alternative Trading Systems). It achieves this through a process of "strategic negotiation" using automated agents (intelligent software manifestations). Our system should not be viewed as an ECN, but rather as an enhancement to any extant trading system, be it an ECN, ATS, CLOB, NASDAQ, etc. Our initial system design has been conducted for financial instruments trading, e.g. bonds/equities, but our strategy is as much applicable to energy/power instruments trading, high speed communications bandwidth trading, and other web-based commodities trading, which we believe is of interest to Enron Online.

SKG is superior to existing solutions in the following way: 1) It considers multiple attributes, e.g., price, time, volatility, bandwidth. (In high speed communication bandwidth scenarios, for example, the dimensions could be price, bandwidth size, time for which bandwidth available, contiguity of the allocation, and such.) 2) It involves dynamic matching as opposed to "static" matching. 3) It is multi-lateral. 4) It adapts itself dynamically to changing market conditions. 5) It allows traders to make important trade-offs, as they do in traditional markets.

Currently, SKG is involved in discussions with the Heads of Trading at Fidelity, Putnam Investments, Lehman Bros., KPMG, Meridien Research, Salomon Smith Barney, JP Morgan, State Street, Banc of America, McKinsey, Citizens Power, and a host of other folks.

We think we have a value-adding service to provide to Enron Online or any other Enron subsidiary that the SKG offering matches and that you deem fit. SKG's founders and I will be very happy to provide you or your representative(s) with more details, including a demo of the prototype, in a meeting. We are therefore hopeful that you will be able to arrange something appropriate.

Thanks very much, Jeff! We look forward to hearing from you.

With warm regards, Joseph Cherian and Robert Jarrow

Dear Wincently,

We at America Online would like to thank you for spending the time to write us. My name is Ellen and I appreciate the opportunity to assist you regarding your recent e-mail.

After reviewing your account, it shows that the annual prepaid fee was not successfully collected. I suggest that you contact your bank regarding this matter. You may also want to contact our Billing Department at 1-888-265-8003 or at 1-800-827-6364 toll free should you want to resubmit the bill.

If there has been a problem billing your account, America Online may send a billing popup screen that states you need to update your billing information at Keyword: Billing. America Online does NOT request this information be placed anywhere other than at Keyword: <A HREF="aol://4344:2452.MSbill2.26154197.604872267">BILLING</A>. (If you're unfamiliar with keywords you can start using them by typing CTRL - K. When the Keyword "box" appears, type the keyword in the space provided and click the GO button). It is possible that you will receive the popup more than once in a 24 hour period, as we update our database every 24 hours.

The message that America Online sends states:

An Important Message from AOL Member Services

Our records indicate that the credit card information on file for your AOL account may not be up-to-date. Outdated information on your AOL account may cause bill processing problems with in some cases could lead to service interruptions!

Please take a minute now to update your AOL account information. Just click on the Update Billing Information button below. This update will only take a few moments and the information you provide will be kept completely confidential.

Note: If you have recently updated your billing information, please ignore this additional reminder while we process your changes.

IF YOU HAVE QUESTIONS concerning this message, please call Member Services at 1-888/265-8003 between the hours or 6:00 AM - 2:00 AM EST seven days a week.

UPDATE BILLING INFORMATION (text on button appears in white on the actual popup)

We greatly appreciate your America Online membership. If you have any further questions, please do not hesitate to contact us again. Thank you for using America Online. Have a wonderful day. :-)

Ellen L. Customer Care Consultant The Billing Department America Online, Inc.

Cindy,

October 11 would work for me. This is the date of my visit to Austin to make a presentation Ehud's MBA class. If you need me to go to Austin on a different day, please, let me know. I shall be glad to help you, my schedule permitting.

Vince

Cindy Justice 07/05/2000 03:51 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: Vince Kaminski's Oct. 11 Presentation -- "Enron Day at the Energy Finance Program"

Vince -

Christy Young is the UT MBA recruiter. She is taking a couple of weeks off to get married and will return on July 19th as Christy Meador. In her absence, I wanted to make sure we coordinated our efforts with you.

Below are a few key UT recruiting dates. Ideally, we would like for your presentation to occur a week or so before our interview list is due to the Career Services Office. This will allow for additional candidates to submit their resumes for our review before we turn in the interview list.

Wed., Sept. 13 - Corporate Presentation & Reception - Alumni Center Fri., Sept. 22 - Eye's of Texas Career Fair - Campus Thurs., Sept. 28 - Enron Interview List due to Career Services Office Wed., Oct. 11 - Pre-interview Reception - selected candidates only Thurs., Oct. 12 - First Round Interviews Fri., Oct. 13 - Second Round Interviews Sat., Oct. 28 - Super Saturday for UT Candidates

Please let me know what works best with your schedule. Note that October 11 is the same date as our pre-interview reception.

We look forward to working with you on this.

Thanks, Cindy Justice x57339

Can you guys followup with him to coordinate an Enron reception following a presentation that Vince Kaminiski will give during their annual UT Foundations of Energy Finance class. We do want to do this, and of course need to coordinate with Vince and your dates on campus to ensure that we have no conflicts.

I am not sure if this falls into the Associate or Analyst camp. You can best determine who the appropriate contact should be. Leave me an e-mail to confirm.

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 07/05/2000 10:35:57 AM To: Celeste Roberts/HOU/ECT@ECT, Celeste Roberts/HOU/ECT@ECT cc: Subject: Vince Kaminski's Oct. 11 Presentation -- "Enron Day at the Energy Finance Program"

Celeste,

Greetings.

As you may recall, I am the Director of the Univ. of Texas Center for Energy Finance (CEFER). I would like at this time to initiate planning for your colleague Vince Kaminski's annual presentation to the UT Foundations of Energy Finance class which I will be presenting as usual the first half of the Fall Semester.

Thus, to begin, I wonder whether either the above is your current e-mail account, and, with the departure of Meryl Barnett (with whom I believe we coordinated this in the past), whether this is an issue within your scope.

With respect to this reception, I appreciate that there may be other Enron receptions scheduled for this Fall. However, if you so choose, I would like to afford you the opportunity of scheduling an Enron reception following Vince's presentation. If you would indeed like to do so, I suggest we coordinate with Vince the date for the presentation/reception.

Sincerely, Ehud

#### FEA Announces the release of @ENERGY v2.2

|            |                                                              |
|------------|--------------------------------------------------------------|
| Sender     | erin@fea.com                                                 |
| Recipients | [ <a href="mailto:vkamins@enron.com">vkamins@enron.com</a> ] |
| File       | <a href="#">kaminski-v/inbox/659.</a>                        |

August 27, 2001

Enron North America Corp. Vince Kaminski 1400 Smith Street 30th Floor, Rm. 3036B Houston, TX 77002-7361 1  
713-853-3848

Dear Vince Kaminski,

This is to inform you of the release of @ENERGY v2.2. FTP download instructions are available immediately. The download instructions are included at the end of this email. Please see below for more information regarding this new release.

Please confirm that your address above is correct by clicking reply and send. If any changes need to be made, please make the changes above and reply.

Here is an overview of the new features from the release notes:

@ENERGY (Forward Curve) No change.

@ENERGY (Basics) No change.

@ENERGY (Advanced) No change.

@ENERGY (Swing) No change.

@ENERGY (Weather) No change.

@ENERGY (Storage) Module @ENERGY (Storage) is the new module for analyzing storage contracts. The two new functions specifically designed for valuation and management of storage contracts are: 7 STORAGEOPT and MCSTORAGEOPT

To get familiar with these new functions, we recommend that you first read the brief description of the type of storage contracts supported in the Instruments section. A description of the methodology used for valuation is provided in Storage Methodology. The template storage.xls will help you understand in details input requirements, as well as the output generated by these functions.

See the file fea\energy\ergnote.txt in your distribution for a list of bug fixes.

Here is an overview of the new and changed features since Version 2.0.

@ENERGY (Forward Curve) No change.

@ENERGY (Basics) A control variate methodology Hull (1997) has been implemented for valuation of American options (OPT), Black and Mean-reverting models. It greatly improves accuracy at minimal cost in speed. All models now supports new scalar risk measures corresponding to parallel displacement delta, hedge, and gamma. Average price/strike options now support an alternative way of computing theta. The definition of Gamma curves has been modified for all models.

@ENERGY (Advanced) A faster and more accurate methodology is used to value spread options. Models affected are SPREADOPT, STRIPSPREADOPT, OPTSPREADOPT, OPTSTRIPSPREADOPT. The new methodology dramatically improves speed. All models now supports new scalar risk measures corresponding to parallel displacement delta, hedge, and gamma. Average price/strike options now support an alternative way of computing theta. The definition of Gamma curves has been modified for all models.

@ENERGY (Swing) The definition of Gamma curves has been modified for all models.

@ENERGY (Weather) No change.

See the file fea\energy\ergnote.txt in your distribution for a list of bug fixes.

Your input into the refinement of this product is welcome and greatly appreciated. Any comments or suggestions may be sent to support@fea.com .

If you have any questions please feel free to contact us. We appreciate this opportunity to be of continuing service to Enron North America Corp..

Regards, Michelle Mendoza Email to: Support@fea.com or michelle@fea.com Direct Tel: +1-510-549-8702 \*111 Financial Engineering Associates, Inc.

\*\*\*\*\*

To download @ENERGY via FTP, follow these instructions:

NOTE: Using EXPLORER leads to unpredictable results, so we suggest using NETSCAPE or a DOS shell.

USING NETSCAPE:

In the Location box type: ftp://energy@ftp.fea.com Password: a9uk4xxk

energy-2.2-win32.exe is for Excel 7, 97SR1, 2000, XP; for Windows 95/96/2000/NT/ME; download and run on a local drive.

USING A DOS SHELL:

At a DOS prompt type: ftp ftp.fea.com User: energy Password: a9uk4xxk

Type "binary" and hit 'return'. Type "ls" for a list of available files. Type "get" energy-2.2-win32.exe and wait for the ftp> prompt. Type "quit".

The file will be downloaded into the directory at which you entered the ftp site. Double click on the exe and follow the instructions on the screen.

---

There is also a readme file which contains installation instructions. You may wish to print this out for easy reference.

N.B.: The password is only valid until the first Friday of next month.

---

**New TimeSheet Procedures**

|            |                                                          |
|------------|----------------------------------------------------------|
| Sender     | shirley.crenshaw@enron.com                               |
| Recipients | ['stinson.gibner@enron.com', 'vince.kaminski@enron.com'] |
| File       | kaminski-v/all_documents/5524.                           |

Hello everyone: =20 Just when you get used to something it changes!

As you may have heard, Enron is implementing a new time entry system as par= t=20 of the July 1 SAP implementation. Time entry for the June 16th- 30th perio= d=20 must be entered into SAP by 3:00 pm CST on June 30th. As your Timekeeper, = l=20 will assist with this process and ensure that we meet this very important= =20 deadline.

I will continue to do the time sheets for the 19th floor and for Osman and= =20 Samer.

Sam Smith and/or Kevin Moore will be responsible for the timesheets for the= =20 weather group on the 32nd Floor. =20

Time can be entered in SAP in two ways: ? you can enter your time yourself using the new eHRonline feature; or,=20 ? timekeepers can enter time on your behalf. =20

If you are unsure as to which approach you should use, please call me. =20 Please remember that all time for this period must be submitted before 3:00= =20 pm CST, on June 30th.

For those of you using eHRonline: First of all, congratulations on taking this next step toward Enron=01,s vi= sion=20 of empowering the employee. By using the new eHRonline feature, you are=20 helping Enron to realize the value in this SAP implementation. Hopefully,= =20 you too, will receive value from having instant access to your personal=20 information.

The new eHRonline functionality is: ? easy to use ? accessible through the Enron intranet at eHRonline.enron.com

Using this feature, you can not only enter your own time, but also maintain= : ? your profile information (skills, education, and experience) ? home address ? phone numbers ? W-4 changes ? emergency contact information

Additionally, you will be able to view your individual pay advice and benef= it=20 elections.

You will receive your personal ID and password via e-mail from SAP\_Security= =20 by June 22nd. Because of the confidentiality of the information accessible= =20 using eHRonline, it is important that you keep your ID and password=20 confidential. If you do not receive your information by the end of the day= =20 on June 22nd, please call the COE at (713) 345-4SAP to obtain your ID and= =20 password.

The Apollo & Beyond team has teamed with EBS to deliver training on how to= =20 enter time using eHRonline via EBS=01, new product EnronCast. This tool is= =20 available to you on your desktop. You can access EnronCast at=20 [www.enroncast.com](http://www.enroncast.com) and follow the instructions.

STEP BY STEP GUIDES - <http://sap.enron.com/coe> ? ENTER TIME VIA EHROLINE (EMPLOYEE) STEP BY STEP PROCEDURE ? CORRECT TIME VIA EHROLINE (EMPLOYEE) STEP BY STEP PROCEDURE ? ENTER TIME VIA EHROLINE (NON-EMPLOYEE CONTRACTOR) STEP BY STEP PROCEDURE ? CORRECT TIME VIA EHROLINE (NON-EMPLOYEE CONTRACTOR) STEP BY STEP PROCEDU= RE]

For those of you who need me to enter your time: Attached is a manual time entry form that I must have completed and return= d=20 by June 28th. Please estimate the last two days of the period as accuratel= y=20 as possible. If necessary, I can make corrections on the next time entry= =20 period. If you do not want to use this form, I will have hard copies at my= =20 desk and will be glad to help you fill them out. I know this is creating more work for everyone, but what can I say?

Where can you get help? I am here to help you with the new coding necessary on your timesheet. Als= o,=20 if you do not know which Absence or Attendance Type you should use, please= =20 come see me or give me a call.

If you have other questions or are experiencing problems, you can also get= =20 help from any of the following places:

Center of Expertise (COE) The Center of Expertise can help answer many of your questions and provide= =20 you with assistance if you are experiencing problems. The COE is available= =20 24 hours a day from Monday at 7:00 am CST

through Friday at 7:00 pm CST. You can contact the COE at (713) 345-4SAP.

Dedicated Support Personnel During the time period right after the initial go live the project team has dedicated additional resources to help support you. These resources can be contacted at:

Marla Hernandez at x 39763 for now and after 6/22 at x31645 at workstation = EB3661B Mark Timmons at 57919 for now, pager number 888-620-3896, at workstation = EB3667A

Regards,

Shirley 3-5290

-----Original Message-----

From: Granville Paules <Paules@aspentech.com>@ENRON [NOTES:Granville Paules <Paules@aspentech.com>@ENRON] To: 'vkamins@enron.com' <vkamins@enron.com> Sent: Thu Jan 03 13:55:01 2002 Subject: Price Dynamics and Risk Management in the Energy Markets

Mr. Kaminski,

Greetings. I work for Aspen Technology Inc. [www.aspentech.com](http://www.aspentech.com) We have not met, but a colleague of mine forwarded a copy of your presentation on Price Dynamics in the Energy Markets from the SIAM conference last April and am writing to you to encourage you to consider making a presentation at Aspen's corporate world conference Aspen World 2002 in October in Washington DC on this topic as well as the broader topic of Risk assessment and management in the energy markets. I know this seems a little strange making a "cold-call" in this manner, but I am reaching out in the community of Risk and Uncertainty management in the Supply Chain, Process and Energy markets to identify and solicit compelling speakers. AspenTech does not have a traditionally strong or well developed business or application layer in this realm, but, as our enterprise-wide reach and activities in planning, forecasting and supply chain have grown and integrated, I and the technology drivers in the company have been cultivating a demand and recognition for risk management and pricing activities to BE the next logical dimension to our growth and technology. Therefore, the session I am chairing (see the abstract below) will be one intended to educate, entice, and compel our clientele, business partners and staff on the business value, technology and mathematical and modeling technique. I would be happy to elaborate on the intended audience and opportunity for the conference. Please contact me at your earliest convenience by email or phone at the numbers below to discuss things if you think it would be a possibility or, if you would like more information on the context of the work and subject matter in AspenTech's core businesses.

Thanks in advance for your time.

Sincerely, Skip Paules

Uncertainty and Risk Management in Supply Chain and Process Modeling

This session will examine the assessment and quantification of uncertainties and risk in the supply chain and process modeling arena. The emphasis is on the modeling and enterprise business process aspects. Topics should include: point solution methods, such as design and real-time optimization application at the process level; planning and scheduling applications; as well as enterprise level solution strategies that balance forecasting, supply chain, planning, scheduling and operations. Commodities trading models, strategies and techniques are also included in this scope. What developments in the applications and theory of the field will allow us to take collections of deterministic modeling tools to

the next strategic level where objectives for capital projects, operations, and supply chain optimization models incorporate not only economics, but also value-at-risk and/or robustness elements to create more broadly applicable or hedged strategies to achieve the desired goals.

Possible presentation topics will include:

\* Uncertain supply, demand in planning and scheduling \* Robust plant-wide optimization (real-time) \* Robust control \* Value-at-risk (VAR) quantification in modeling applications \* Dynamic hedging in commodities trading (e.g. energy markets) \* Flexible design and synthesis \* Model sensitivities to uncertain parameters or demand \* General algorithmic and modeling strategies for incorporating Risk, Sensitivity, and/or Uncertainty

Granville (Skip) E. Paules IV, Ph.D. Principal Technologist - Advanced Technology Group AspenTech process. to the power of e. Ten Canal Park Cambridge, MA 02141-2201 USA 617-949-1501 (Phone) 617-949-1030 (Fax) email: <mailto:granville.paules@aspentech.com> Web: <http://www.aspentech.com>

I find the great thing in this world is not so much where we stand, as in what direction we are moving: To reach the port of heaven, we must sail sometimes with the wind and sometimes against it - but we must sail, and not drift, nor lie at anchor.  
-- Oliver Wendell Holmes

It's important to dream, and to live your dream. I dream everyday. At one moment or another, you have to live your dream. You have to do it, to make it real. -- Bernard Stamm, transatlantic monohull sailing record holder

Dear Mr. Kaminski:

?

Shmuel Oren indicated that you said that you were interested in learning mo= re=20 about the Power Systems Engineering Research Center=01,s upcoming Industria= l=20 Advisory Board meeting. Thanks for your interest.=20

?

Attached is file that describes the meeting=01,s objectives, agenda and=20 attendees. It will be a very stimulating meeting given the mix of academic= =20 and industry attendees. We=01,re looking forward to the attendance by peopl= e=20 from several ISO=01,s around the country as well =01) a new addition to our= =20 attendee list.

?

I hope you will consider joining us. If you=01,d like more information abou= t=20 PSERC, you can find it on the web at [www.pserc.wisc.edu](http://www.pserc.wisc.edu). We=01,ll also be= =20 sending you some information.

?

By the way, you might be interested in an internet seminar we're running tomorrow. The information is given below. It's free except for the cost of learning how to use NetMeeting if you've not already been using it.

?

Please do not hesitate to contact me if you have any questions.

?

Regards,

?

Dennis Ray

Efficient Available Transfer Capability Analysis using Linear Methods

Jamie Weber

PowerWorld Corporation

2004 S. Wright St, Suite 102, Urbana, IL 61801

weber@powerworld.com

?

Abstract

?

While the concept of ATC has been around for decades, the desire to calculate its value on a large scale is new. Organizations responsible for the reliable operation of the transmission system are given the task of determining ATC values on a daily basis. ATC calculations typically include a large number of contingencies as well as multiple transfer directions and multiple system conditions. This presents a labor-intensive task for those required to calculate ATC values.

?

Because of these circumstances, Powerworld Corporation was approached by the Bonneville Power Administration (BPA) to develop a new software product for their use in calculating ATC values. The new ATC tool, integrated into the

Simulator OPF/ATC software product, was the culmination of this work.? This talk will cover the basic engineering requirements and mathematics that governed the development of the ATC tool.? The concept of Linear ATC analysis will be introduced, along with the underlying mathematics of Linear ATC analysis including

?

\*? Power Transfer Distribution Factors (PTDFs)

\*? Line Outage and Closure Distribution Factors (LODFs/LCDFs)

\*? Outage Transfer Distribution Factors (OTDFs)

?

Attention will be paid to demonstrating the accuracy of Linear ATC on large systems as well as demonstrating what Linear ATC does not model.? Examples will be shown on both small and large-scale systems using Simulator OPF/ATC= .

?

Other special topics integrated into PowerWorld Simulator OPF/ATC will also be discussed such as (1) the inclusion of phase-shifting transformers directly in linear analysis, and (2) the iteration of linear ATC for use in modeling controller changes.

?

?

Instructions for Audio Connection

?

Dial in #:??? (505) 242-2420? you will then be prompted to enter the participant code.? At that time punch in the number below.

?

Participant code:?? 193953

?

?

IP Address for Netmeeting

?

Read the instructions to download and install Netmeeting.? At about 12.50 PM Central Time on November 7, 2000, dial the following IP address in Netmeeting?? 128.174.115.8.? Please make sure the resolution on your machine is set to 1024 x 768 .? This will be the setting on the machine at which the Power Point slides originate.? If your machine is not set to the same

Vince,

I am on the road traveling right now and am just getting to check my=20 email.? Thanks for your messages.? The project idea looks great=20 -- it will be a challenging project for the students.? My only=20 request is that you follow you follow our sample format which is provided= =20 in the brochure (there is a sample application) -- you can easily cut and= =20 paste your description below into the standard format.? Please let=20 me know if you need the sample project and I can email it to you (it=20 should be with the brochure).

Thanks again for your interest in Rice and the ALP program.

Carrie Miller

Carrie,

I am sending you, as promised, the draft of my proposal. Please, let me know if it meets your requirements. I shall be glad to revise it and send you the final version.

Vince Kaminski

\*\*\*\*\*  
\*\*\*\*\*

One of the most important trends in the energy industry during the last year was proliferation of electronic, Internet based, trading platforms for wholesale markets and for retail operations. Websites such as [www.houstonstreet.com](http://www.houstonstreet.com) and [www.altranet.com](http://www.altranet.com) provide facilities for matching buyers and sellers. The website operated by Enron Corp. (EnronOnline) represents an alternative solution under which Enron acts as a principal in every transaction. On the retail side, many retail e-commerce companies offering auctions, reverse auctions and platforms for creation of buyers clubs challenge incumbent utilities. The objective of this project is to evaluate the impact of e-commerce (both at the wholesale and retail levels) on the energy industry. The study will start with comparative analysis of different wholesale trading and retail e-commerce business models and evaluation of their long-term viability. The next step will be assessment of the impact of e-commerce on price dynamics, profit margins and the level of competition in different energy markets. A separate section will be devoted to analysis of reaction of companies and organizations affected by e-commerce (incumbent utilities, organized exchanges, energy brokers) to the new competitive threat, and different strategies they implement to meet the challenge. Organized exchanges have accelerated in many cases the transition to screen-based trading that has been already replacing open outcry technology. Power and natural gas marketers have created alliances (with other industry players, software companies and electronic exchanges) to create their own trading platforms. Gas and electric utilities embarked on development of vertical and horizontal e-commerce platforms, offering services to households and other companies in the energy industry. The critical question is how quickly different companies should react to the competitive threats and how fast they should exploit opportunities created by the Internet based economy. It's quite obvious that the Internet revolution

<http://www.ruf.rice.edu/~jgs/>

of Texas at Austin

Colleagues and Friends of the Center for Energy Finance Education and Research (CEFER):

Happy New Year! Hope you all had a wonderful holiday season.

On behalf of the University of Texas Finance Department and CEFER, we would like to cordially invite you to attend our:

2001 Energy Finance Conference Austin, Texas February 22 - 23, 2001 Hosted by the University of Texas Finance Department Center for Energy Finance Education and Research

Dr. Ehud I. Ronn and Dr. Sheridan Titman are currently in the process of finalizing the details of the conference agenda. We have listed the agenda outline below to assist you in your travel planning. Each conference session will be composed of a panel discussion between 3 - 4 guest speakers on the designated topic.

As supporters of the Center for Energy Finance Education and Research, representatives of our trustee corporations (Enron, El Paso, Reliant, Conoco, and Southern) will have the \$500 conference fee waived. The conference package includes Thursday evening's cocktails & dinner and hotel/UT shuttle service, as well as Friday's conference meals, session materials and shuttle service. Travel to Austin and hotel reservations are each participant's responsibility.

A limited number of hotel rooms are being tentatively held at the Radisson Hotel on Town Lake under the group name "University of Texas Finance Department" for the nights of Thursday, 2/22/01 and Friday, 2/23/01 (the latter evening for those who choose to stay in Austin after the Conference's conclusion). To guarantee room reservations, you will need to contact the Radisson Hotel at (512) 478-9611 no later than Monday, January 22nd, and make your reservations with a credit card. Please let me know when you have made those arrangements so that I can make sure the Radisson gives you the special room rate of \$129/night.

Please RSVP your interest in attending this conference NO LATER THAN JANUARY 22nd to [angela.dorsey@bus.utexas.edu](mailto:angela.dorsey@bus.utexas.edu), or (512) 232-7386, as seating availability is limited. Please feel free to extend this invitation to your colleagues who might be interested in attending this Conference.

Center for Energy Finance Education and Research PROGRAM OF THE 2001 ENERGY FINANCE CONFERENCE  
February 22 - 23, 2001

Thursday, Feb 22:

3:00 p.m. Reserved rooms at the Radisson Hotel available for check-in 5:30 p.m. Bus will pick up guests at the Radisson for transport to UT Club\* 6:00 p.m. Cocktails, UT Club 9th Floor 7:00 p.m. Dinner, UT Club 8:00 p.m. Keynote Speaker 9:00 p.m. Bus will transport guests back to hotel

Friday, Feb 23:

7:45 a.m. Bus will pick up at the Radisson for transport to UT

8:30 a.m. Session 1 - REAL OPTIONS Panelists: Jim Dyer, UT (Chair) Sheridan Titman, UT John McCormack, Stern Stewart & Co.

10:00 a.m. Coffee Break

10:15 a.m. Session 2 - DEREGULATION Panelists: David Eaton, UT (Chair) David Spence, UT Jeff Sandefer, Sandefer Capital Partners/UT Peter Nance, Teknecon Energy Risk Advisors

11:45 a.m. Catered Lunch & Keynote Speaker

1:30 p.m. Guest Tour - EDS Financial Trading & Technology Center

2:00 p.m. Session 3 - RISK MANAGEMENT Panelists: Keith Brown, UT (Chair) Vince Kaminski, Enron Alexander Eydeland, Southern Co. Ehud I. Ronn, UT

3:30 p.m. Snack Break

3:45 p.m. Session 4 - GLOBALIZATION OF THE ENERGY BUSINESS Panelists: Laura Starks, UT (Chair) Bob Goldman, Conoco Ray Hill, Southern Co.

5:15 p.m. Wrap-Up

5:30 p.m. Bus picks up for transport to airport/dinner

6:30 p.m. Working dinner for senior officers of Energy Finance Center Trustees

\*We have made arrangements to provide shuttle service between the Radisson hotel and UT during the conference. However, if you choose to stay at an alternative hotel, then transportation to conference events will become your responsibility.

Joannie:

Thanks Here is the message for Jeff:

Jeff,

I am asking you on my behalf and on behalf of Rick Causey to make a keynote presentation at the annual Energy Finance Conference at the University of Texas at Austin. The conference is tentatively scheduled to take place on February 21 - 22, 2002. Depending on your calendar, the conference organizers can reserve a time slot for your presentation at the conference dinner (February 21, 2002, Thursday) or lunch (February 22, 2002, Friday).

This annual conference is devoted to financial engineering in the energy business. The topics covered in the past meetings included applications of real options technology to the energy business, risk management and the future of deregulation. The agenda of the last conference is attached for your review; the agenda for the 2002 event is under development.

Given Enron's relationship with UT and our interest in the Energy Finance program, a great source of highly skilled talent for our Analyst / Associate Program, we think that your participation will benefit the company. The conference is widely attended by senior executives of other energy companies and is an excellent forum to present Enron's accomplishments and the agenda for the future.

Vince Kaminski

Energy Finance Conference Participation by Jeffrey K. Skilling

Rick / Vince:

Greetings. I trust this e-mail finds you both well.

Further to my discussions with Vince two weeks ago, I write you at this time in my capacity as Director of the Center for Energy Finance Education and Research (CEFER). As we did in Feb. '01, my colleagues and I are planning a practitioner-industry Conference in Spring 2002, tentatively scheduled for 2/21 - 2/22/02. The Conference will kick off with a dinner/keynote address Thur. evening, then continue all day Fri.

I would like to extend an invitation to Enron Corp. President Jeff Skilling to be the keynote speaker at the Thur. evening dinner or the Fri. lunch (whichever he prefers). I appreciate your kind offer to relay this invitation to Mr. Skilling's office for his consideration. If at this stage he has timing constraints in the late Feb. - early March 2002 period, we would be happy to work around them in the scheduling of the Conference.

Although the format for 2002's conference may differ from that used in Feb. 2001, for completeness I enclose herewith a copy of the 2001 Conference Program.

With thanks for your intercession on our behalf, Ehud Ronn

05:21 PM -----

"Ehud I. Ronn" <eronn@mail.utexas.edu> on 09/14/2000 10:15:33 AM To: vkamins@enron.com cc: Subject: Update on UT - Enron Activities: My Conversation with Rick Causey

Vince,

Good morning.

As you may know, last Thur. Enron honored this year's recipients of the Enron MBA Excellence Fund Scholars at a dinner in Austin. In addition to the three recipients, Business School Dean May and several of my colleagues, Enron attendees included Sally Beck, Cindy Justice, Karen Marshall (newly-appointed coordinator of higher education initiatives for Enron Community Relations Dept.) and Rick Causey.

I write you at this time to advise you I had occasion to discuss two current Enron/UT issues with Rick: I. Spring 2001 Conference Participation by Jeffrey K. Skilling II. UT Participation in Enron Training Activities Per my conversation with Rick last Thur., I followed up on that discussion with an e-mail this morn that touched on those two topics.

I. With respect to the first, I wrote Rick this morning that:

1. We at the UT Center for Energy Finance Education and Research (CEFER) are planning a practitioner-industry Conference in Spring 2001 (late Feb. or early March) to discuss four topics: Risk management, Deregulation, Real options, and International/globalization. 2. The Conference will kick off with a dinner/keynote address Thur. evening, then continue all day Fri. 3. I have had several discussions with you regarding Conference timing, structure, participation and content. 4. Further to Rick's agreement to do so during our discussion last Thur., in today's e-mail I asked Rick to extend an invitation to Jeff Skilling to be the keynote speaker at the Thur. evening dinner.

II. With respect to the second topic, Rick and I also discussed UT participation in Enron Corp. internal training for incoming Enron Corp. analysts and associates. Consequently, I e-mailed Rick this morning a specific set of issues -- "Valuation and Risk Management in Energy Markets" -- which my UT colleagues and I have covered in public as well as customized executive settings, and which we would be pleased to customize for presentation at Enron. FYI, I am enclosing a copy of said topics at the end of this e-mail.

I look forward to seeing you again soon, and to your UT visit on 10/11. Best, Ehud

Training Program: "Valuation and Risk Management in Energy Markets"

Target Audience: Associates, Analysts, Traders, Marketing/Sales, Risk managers, Financial analysts

Program Objectives: 1. Understanding the physical and financial U. S. markets for electricity and natural gas 2. Understanding the structuring, reverse engineering and valuation of exchange-traded and OTC energy derivatives, including "exotic" options, structured products, and spread and basis products 3. Promoting a common language between trading and marketing personnel regarding valuation and hedging of structured products 4. Risk-management

Program Contents: I. "Electricity 101" -- Problems in pricing -- Spot markets -- Forward markets -- Trading: Basis, fixed-price, volatility -- Markets: Characteristics and participants

II. Valuation/Structuring/Hedging 1. Fundamentals of Forwards and Futures Contracts: -- Forward Contracts: Definition, Payoff Diagram, Pricing by Arbitrage -- Futures vs. Forwards -- Commodity Futures -- Swaps -- Constructing Forward Curves: Contrast with price forecast; Using the spark spread; Incorporating regional bases

2. Introduction to Option Pricing: -- Payoffs -- Put-Call Parity -- Binomial Model -- Black-Scholes Formula -- Option "Sensitivities" (the "Greeks"); Delta and Gamma

3. Uniqueness of Energy Derivatives: -- "Term Structure" of Volatility -- Convenience Yield / Seasonality -- Basis

4. Estimating Volatility in Energy Markets: -- Estimating Volatility in Financial Markets -- Hourly vs. Daily Vols -- Historical or Implied Vols? -- Characterizing the Volatility "Surface" Across Time and Strike

5. Design and Valuation of Structured Products in Commodity Markets: -- Valuation of European Call Options in Energy Markets -- Average Options on Oil Futures Contracts -- Spread and Basis Products -- "Swing" Options in Power Markets -- Weather Derivatives

6. Risk-Management -- Motivation for Structured Trades -- Valuation of real options (e.g., valuation of power plant or gas field) -- Value-at-Risk (one- and multi-factor models) -- Repowering option

7. Advanced Topics (for qualified audiences) -- Relationship between forward prices and expected spot prices -- The Importance of Hedging Volatility Changes -- Consistent Method for Estimating Hourly, Daily and Monthly Term Structures of Volatility -- Practical Alternatives to Vega-Hedging -- Applying Options Theory to the Valuation of Power Plants -- Valuation of "Swing" Options under Ruthless and Non-Ruthless Exercise

Ehud I. Ronn Professor of Finance and Jack S. Josey Professor in Energy Studies Director, Center for Energy Finance Education and Research McCombs School of Business University of Texas at Austin Austin, TX. 78712-1179 Voice: (512) 471-5853 FAX: (512) 471-5073 Internet: eronn@mail.utexas.edu

Good afternoon Sandeep:

I sent Krishna's expenses for his recent trip to our accounting dept. this morning and expensed them to the Research Group's Co and RC#. However, we need to be reimbursed for these expenses and I would like to know the best way to do this. Our accounting dept. thought we should just send an invoice with the back up material to Dabhol Power Co. asking them to cut a check made payable to Enron Corp. and then it would be credited to our Co# and RC#.

Please let me know if this is acceptable, and if so, who the invoice should be made out to and where I should send it.

I appreciate your assistance in this matter.

Have a great day!

Dear Vince,

As the above event is drawing closer, I thought I would write a quick email to finalise a few things with you. I understand that you would like a guest to attend, please can you let me know their name and job title. Also, if you could send me your conference checklist I would appreciate it, so that I can finalise details with my audio visual company.

In the meantime, if there is anything I can do for you, please do not hesitate to let me know on 0171-915-5116.

Kind Regards Crystal

### The GARP 2002 Convention

**Sender** andreas.simou@garp.com

**Recipients** [shirley.crenshaw@enron.com]

**File** kaminski-v/inbox/398.

I am pleased to announce that the GARP 2002 Convention, which will be held in New York on 12 and 13 February 2002, will be held at The Roosevelt Hotel.

The hotel is situated at:

Madison Avenue at 45th Street New York NY 10017 Tel: 212 661 9600www.theroosevelthotel.com

I am sorry for any delay in informing you, but we have only just managed to finalise the details and locate a venue that could hold the GARP Convention.

I will of course be in touch again in the near future concerning logistical matters, as well as sending you copies of the printed brochure.

If you have any questions or queries, please do not hesitate to contact me. I look forward to meeting you in New York next year.

Kind regards

Andreas

**File** kaminski-v/sent\_items/77.

Michael,

I really appreciate it. It will be a great opportunity to give you an update about my plans. I hope to continue working in the energy industry and continue as a customer of CERA once I move to a new position. My last day at Enron will be January the 31st. My personal E-mail address in the interim period is vkaminski@aol.com.

I assume I can just show up on the first day of your conference.

Vince

Dear Mr Kaminski,

I do hope that you had a pleasant Christmas and New Year, like ourselves at Risk.

I am currently producing the Author Cards which you discussed with my Manager, Paula Soutinho, and would like to know where you would like them delivered to. I have ordered a quantity of 200 which I hope is to your satisfaction.

If you have any queries please do not hesitate in contacting either myself or Paula,

Kind Regards

Yes please - SAS. I think I just need to renew - I haven't actually used it on my new machine but I believe it is there.

David,

I'll renew SAS but I would like to get the CDs to install it at home as well.

Jana,

Thanks again for the invitation to join you at the Rodeo. It was a great pleasure to meet you and your husband.

What about getting together next week for a movie and/or dinner? I shall call you later this week to find out when you are free. I have a trip to NYC on Tuesday and Wednesday, but Thursday or Friday should be fine.

I have a speaking engagement on April 6 in Florida (a conference organized by Florida Power and Light). This means I shall miss the meeting of the Symphony Partners on that day. Please, keep me in mind for the following meetings and I shall be very glad to join you.

Vince

Vince, It was a pleasure to meet you last week at our Rodeo night. I am glad you could join us.

I am going to fax you the invitation to the Houston Symphony Partners party that we discussed. I hope you can attend.

Keep in touch and let's get together for lunch and/or seeing "American Beauty."

Jana Phillips 713-658-9296

Vince,

Last week I was contacted by one of my friends who is very interested in becoming an Enron employee. He has a PHD and several years research and lab experience.

Richard is afraid that being a PHD is a dying breed and may need to go back to school to obtain an MBA. I was wondering if you would mind looking at the attached resume to assess if you have any interest in Richard, or if you feel I should encourage him to go back to school. I am unclear as to the qualifications for your group so I apologize if this request is way off base.

Thank you for your help,

Hello Helyette,

I am in California this week, vacationing with my family. It is a spring break week at Stanford and we shall spend a few days in Calistoga, north of Napa Valley, a place famous for mineral water and geysers.

I shall talk to Karla when I come back to Houston about the speeding up the process on our side. Our lawyers typically sit on a contract for a few weeks unless we put a lot of pressure on them. American lawyers tend to be very meticulous: this is why the city of Los Angeles alone has more lawyers than entire Japan. I think about two sites for your software: Houston and Europe (most likely London).

I shall be honored to chair a session during the Bachelier World Congress at College de France. Please, let me know which session you have in mind for me.

The repeat the Francfort presentation in Paris on October 4 & 5 is fine with me. I think the Frankfurt presentation went quite well and it will be nice to work wih you and Alex again.

Regards

Vince

P.S. I shall keep my office cell phone on all the time, in case you need to call me: 713 410 5396

Nick,

I shall be in Stanford for Parents' Weekend (my son is a junior at Stanford). I plan to be on the campus Friday through Sunday this week. I shall be glad to meet you anytime during the weekend. What about a lunch on Friday? I would like to talk to you about Enron underwriting research projects by the graduate students at your department.

You can reach me at Stanford at my son's phone number: 650 497 6938. Please, let me know if you are free for lunch and I shall make the reservation

Vince

Nick Bambos <bambos@stanford.edu> on 02/22/2000 12:54:15 PM To: Vince.J.Kaminski@enron.com cc: Ravi.Thuraisingham.Enron\_Communications@enron.com, gappy@stanford.edu Subject: Stanford Meeting

Dear Vince,

Giuseppe tells me that you will be visiting Stanford soon and you you would like to meet with me. I would definitely be glad to meet you and talk further.

Would you please let me know about the time of your visit and your availability to meet. I look forward to seeing you.

Best Regards,

Nick

PS: Giuseppe and Amy came back very impressed by you are doing at Enron! Thanks for hosting them.

Hi, David,

I need to renew both SAS and SPSS in my computer. Thanks a lot!

Best,

Anthea

-----Original Message-----

From: JGSFAC -- Jones Graduate School faculty [mailto:JGSFAC@listserv.rice.edu] On Behalf Of David Kilgore Sent: Wednesday, October 24, 2001 5:21 PM To: JGSFAC@listserv.rice.edu Subject: [JGSFAC] SAS and SPSS Renewals

I need to coordinate our order for SAS and SPSS both renewals and new orders. These are on a university license and each one costs about \$80 per license. The charge will be passed on to your research account.

Those of you with existing SAS installations, your version will keep working until December. At that time it will stop working unless renewed.

SPSS is coming out with a version 11 and I have asked Mudd to let me know when that is available.

If you 1) need either of these packages now for a fresh installation or 2) plan on renewing the software that you currently have installed, please let me know.

Carlos,

Vince Kaminski, the head of our group is quite interested in meeting you and discussing ways in which we might be able to help your students. I will be out of the office until October 16th. You can talk to Vince before I get back or wait to see both of us; whatever you wish. Should you want to schedule a time to talk with Vince, contact his assistant, Shirley Crenshaw, at 713 853 5290.

I look forward to meeting you in person.

Stinson Gibner

P.S.

My address at Enron is:

P.O. Box 1188 Houston, TX 77251-1188

The physical address is 1400 Smith Street.

carlos ordonez <ordonez@shasta.phys.uh.edu> on 09/15/2000 03:29:28 PM To: sgibner@enron.com cc: Subject: Greetings

Dear Stinson,

I enjoyed our conversation this morning. I would love to meet with your people to discuss collaborations that will be of mutual benefit to me and the students and postdocs and your company. I am available on Mondays, Wednesdays or Fridays, at just about any time (early mornings or afternoons best). We'll probably need up to a couple of hours.

Please send me your address to mail you some info.

Best,

Carlos

Dear Dr. Kaminski:

I am interested in working on a part-time, telecommuting basis (roughly the equivalent of 1 to 2 days a week) for about a year or two. I can visit as necessary. I am attaching a brief resume.

Is this something that might be of interest to you? Should you have no opportunities, can you suggest other groups? I look forward to hearing from you.

Regards Reddy

Dear Dr. Kaminski,

I invite you to apply for the recently announced endowed chair position in our department. The position, James R. Moffett Chair, is named after the CEO of Freeport McMoran. You come highly recommended by John martin of Baylor whose opinion we value greatly.

The attached file provides more information regarding the required qualification and responsibilities of the Chair. If you have any question, please feel free to contact me (I am co-chair of the search committee), Professor Gerald Whitney (gwhitney@uno.edu, Co-chair of the search committee), or Dr. Walter (Dub) Lane (wlane@uno.edu, the Department Head).

We look forward to receiving your application soon.

Tarun K. Mukherjee Professor of Finance and Co-Chair, James R. Moffett Search Committee Department of Economics and Finance University of New Orleans New Orleans, LA 70148 (504)280-7146-Work (504)-280-6397--Fax

### A resume

|            |                                |
|------------|--------------------------------|
| Sender     | vince.kaminski@enron.com       |
| Recipients | ['jeffrey.shankman@enron.com'] |
| File       | kaminski-v/_sent_mail/954.     |

Jeff,

Please, take a look at the resume I got from my friend.

Vince

P.S. what follows is a copy of his message to me:

Dear Vincent,

I very much would like to ask you for a career advice. I am looking for new challenges and new professional opportunities. Possibly there would be such opportunity around yourself at Enron Corporation.

I trust that my strongest asset is my intellectual capital and ability to look from new angles into complex issues. Beside of the experience of working under Jacob Goldfield an Paul Jacobson at Goldman on the interest rate swaps and proprietary desks, I was a part of research effort of John Meriwether group at Salomon Brothers, I headed the European interest options desk at DKBI in London and I have managed a small hedge fund in partnership with Albert Friedberg.

I hold Ph.D. in mathematics from MIT and I have studied under Nobel Laureate in Economics, Bob Merton.

I very much would like to apply my knowledge of capital markets, trading and research in the field of energy markets.

With my very best regards and personal wishes,

Mark Kierlanczyk Godel Partners LLC 67 Wall Street, Suite 1901 New York, NY 10005 Tel 212 943 5300

Vince, As I mention Milan Kratka mentioned your name to me. I am a financial recruiter with about 15 years of experience. My practice involves financial engineers up and down the seniority ranks in many roles....derivative trading & research, Risk Mgt, statistical equity trading, convertible arb, commodity derivatives....etc. Currently I am working with a specialty financial products company looking for a 2 to 5 year desk level quantitative analyst. Probably a math or physics Phd....but one who can and has worked on day to day issues of a trading environment. The products involved are weather and energy derivatives. Position is in the New York Area. If anyone comes to mind a referral would be appreciated. I am always open to talking to people whether they fit this particular role or others Happy Holidays...Best of luck Bob Long

Gentlemen,

Thank you for your time and consideration yesterday. I am excited about working for Enron and gladly accept your offer.

To reiterate our consensus today, I will be working an average of 10 hours a week, mostly early mornings from around 5 to 7. Another option for me might be to work Mondays, Wednesdays, and Fridays from around 5 to 8 or 9.

Toni Graham was my contact in HR six months ago. She is probably more familiar with my previous file than anyone else. If you have any questions or concerns please don't hesitate to contact me.

Thank you, Chris Pernoud

Dear Vince,

As the holidays approach, I am excited by my coming break from classes but also about the opportunity to see everyone at Enron again and to work with you and them soon. I am writing to let you know that I would be very happy to work at Enron over my break and I would like to plan out a schedule.

My semester officially ends Dec. 20th but I may be out of town the week before Christmas. I will be available the following three weeks, from Monday, Dec. 27 to Friday, Jan. 14. Please let me know if during those three weeks, you would like me to work and for what dates you would need the most help so that we can arrange a schedule that would be most helpful to you and so that I can contact Andrea at ProStaff soon. Please let me know if you have any concerns or questions about a possible work schedule for me.

Give my regards to everyone at the office and wishes for a very happy holiday season! I look forward to seeing you soon.

Sincerely, Van Ngo

This is the letter I am going to send out to Duffie. Any comments ? If you can think a better name for our model (ESVM), also let me know.

Zimin

Professor Darrel Duffie 450 Miramonte Avenue Palo Alto, CA 94306

May 5, 2000

Dear Professor Duffie,

I enclosed with this e-mail Enron Storage Valuation Model (ESVM) for your review. The attached files include: 1) a brief documentation of the model (ESVM.doc), 2) c-code of the main routines, 3) Excel spreadsheet interface, 4) ESVM.dll .

Dr. Vince Kaminski, Dr. Stinson Gibner and myself have spent about one year in developing this model. With traders' feedback incorporated, the model results are close to reality. Although there are features to be included, we believe the model is ready for your review. We look forward to your comments and suggestions.

Please feel free to contact me should you need additional detail.

Sincerely,

Zimin Lu

Dear Vince,

It is my great pleasure to confirm your participation at Energy & Power Risk Management 2001 on May 14th. Please take a moment to look at the current line-up on the attached draft program. I have held a position on the panel discussion if you wish to take part. The current talk titles are based upon our telephone conversations and I am happy to discuss any potential changes. I would like to confirm the following details by Thursday, January 18th:

Final talk title Bullet points (5-6) Full name, job title, company title Postal address

I am sure that you will agree that this year, Energy & Power Risk Management's annual event provides a wide range of highly topical sessions. I look forward to receiving your full presentation details and meeting you in May.

Yours sincerely,

Paul Bristow Conferences Manager, US Risk Waters Group 270 Lafayette Street Suite 7 New York 10012 212 925 6990 ext 225 pbristow@riskwaters.com

Vince

"Angela Adedeji" <aadedeji@risk.co.uk> on 01/24/2000 12:05:11 PM Please respond to "Angela Adedeji" <aadedeji@risk.co.uk> To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: European Energy 2000, April, Amsterdam

Dear Vince The brochure has now been printed and we are in the process of marketing this event. Please can you confirm the correct person and/or dept. (eg. marketing or PR) that I would need to speak to as I would like to discuss the following marketing ideas which could be of interest to your company:

- I would like to send a quantity of brochures out to your clients/ contacts. We would of course cover any postage costs this incurs. We could also include a personalised letter from you (written by us or you) and offering a discount. - If you have a newsletter that you send to your clients, we may be able to include a copy of the brochure or a notice, highlighting your company's/ speaker's involvement. - Alternatively, we could place our EPRM logo and details of the conference on your website

I hope one or more of these ideas are of interest to you. I look forward to hearing from you soon. Kind Regards Angela Adedeji Tel - +44 20 7484 9886 Fax - +44 20 7484 9888 Email - aadedeji@risk.co.uk

Vince - Hrvojesuggested that I drop you a note. I am with an Austin Ventures portfolio company and we may have room for junior research people (1 or 2). If there are some analysts or associates in your group who would be interested in talking to us and need a home, please feel free to have them call me or send a resume. We would talk to anyone who can code option pricing formulas. JAVA skills, or good Object Oriented programming experience and sufficient mathematical background for the FE work are priorities. Our Chief Architect would like to see some Database understanding, but that is somewhat more flexible. American options and Swing options are current issues, although any exotics experience is fine. I would consider contract/part-time if someone would like to take a project while looking for positions with another larger company.

My thoughts and prayers are with you and your group. I wish we had more immediate needs, but perhaps at the margin this can help.

Warm Regards, Ashley

"Susan C. Hansen" <susan.hansen@stanford.edu> on 04/17/2001 10:47:38 AM To: Shirley.Crenshaw@enron.com cc: clovell@stanford.edu, donna Lawrence <donna.lawrence@stanford.edu> Subject: Visit May 4th

Hi Shirley,

thanks for corresponding with Carol during my absence, and confirming our meeting with Vince Kaminski at 1:30 on May 4th. I have a question about the logistics. I believe Dr. Kaminski has received an invitation to an event in Houston: new Stanford president John Hennessy is visiting a number of cities on a "welcome tour," and it just so happens he is hosting a luncheon in Houston on May 4th. If Dr. Kaminski wants to attend the Hennessy Welcome Tour luncheon, Donna Lawrence and I could meet with him at 1:30 somewhere in the hotel. If he's not attending the presidential event, please let me know where you are located, and we'll plan travel time accordingly.

Regards, Susan

Heather,

I am forwarding this message to 2 groups in Enron that may be interested.

Vince

"Heather Thorne" <hethorne@wharton.upenn.edu> on 04/26/2001 08:55:56 PM To: "Christie Patrick" <christie.patrick@enron.com>, "Vince Kaminsky" <vkamins@enron.com> cc: "Greg Hunt home" <gregoryhunt@home.com> Subject: Recruiting for weather risk management group

Dear Vince and Christie,

I hope that you are both well, and are ready for the onset of summer in Houston! I was disappointed that I was not able to see you at the final Tiger Team presentations last month due to a family emergency. I hope that the teams' analyses will be helpful to your work, and echo their appreciation of your involvement and support.

I am writing with a question regarding recruiting for Enron's weather risk management group. My boyfriend, Greg Hunt, is currently seeking opportunities to combine his background in meteorology (MS and 2 years of research at Lawrence Livermore Nat'l Lab) and an MBA in finance and information technology. I began thinking about Enron's work in weather derivatives, and realized that there could possibly be a great fit there.

I have copied Greg on this message, and would appreciate any suggestions you can offer regarding opportunities in this group. Thank you very much!

Best regards,

Heather

Hi Vince,

How are you. It was really a pleasure meeting you and talking to you at the Toronto energy derivative conference. Thank you for speaking with me about the possibility of visiting your research group. It will be great if I could have such opportunity whenever you see your schedule fits. I am very much open for the last week of July and early August. I'm looking forward to hearing from you soon.

Best,

Shijie

Todd,

Thanks for the opportunity to speak at the conference. It was a great pleasure to see you again.

Zimin Lu briefed me about Tuesday and Wednesday and told me the presentations were very interesting.

Vince

-----Original Message-----

From: "Strauss, Todd" <Todd.Strauss@neg.pge.com>@ENRON Sent: Thursday, November 01, 2001 9:10 AM To: Kaminski, Vince J Subject: FW: Gas Volatility and Storage Valuation conference

Vince --

Thanks again for participating in Monday's preconference workshop on Volatility. Your remarks on modeling volatility and option valuation were most appreciated by the attendees and me.

I am sorry you weren't able to make the storage conference on Tuesday and Wednesday. It was a very engaging discussion of valuation issues, from many different perspectives.

Best wishes in your business activities during these volatile times.

Alberto,

We would definitely be interested in talking to you when you get to Houston. I will have our assistant, Shirley Crenshaw, set up some time for you to meet with people in our group, which would include myself, Zimin Lu, and Vince Kaminski.

Best regards, --Stinson

"Alberto jimenez crespo" <a\_jimenezcrespo@mailcity.com> on 01/24/2000 11:43:53 AM Please respond to a\_jimenezcrespo@mailcity.com To: Stinson Gibner/HOU/ECT@ECT cc: Subject: Alberto Jimenez (Analyst Program)

Dear Mr. Gibner:

It was very interesting talking to you during Enron's recruiting weekend the first week of last December.

I am starting as an Analyst next February and I have a lot of interest in real options. I have done much of my research in the application of real options in the valuation of oil and mining properties using Black-Scholes, Merton, Binomial Lattices, etc. I have also done forecast of commodity prices such as copper and oil using both, a Geometric Brownian Motion and a Mean Reverting Process.

I remember in our conversation you told me that your department is very involved with real options so I would like to know if there is an opportunity to talk either on the phone or once I am in Houston the first week for the orientation. Because I am very interested in working in your department. I won't be in Houston until February 6th, but you can reach me at 310 390 7817 or ajimenez@mines.edu

Looking forward to hearing from you.

Sincerely,

Alberto Jimenez

From: Kaminski, Vince Sent: Wednesday, May 02, 2001 8:27 AM To: Gandy, Kristin Subject: Re: A friend of mine

Kristin,

Thanks a lot for the resume. We shall arrange a phone interview with Richard. This is out standard procedure. A phone interview is followed by the on-site interview, after we determine what is the best team to interview the candidate.

Vince

From: Kristin Gandy/ENRON@enronXgate on 05/01/2001 05:14 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: A friend of mine

Vince,

Last week I was contacted by one of my friends who is very interested in becoming an Enron employee. He has a PHD and several years research and lab experience.

Richard is afraid that being a PHD is a dying breed and may need to go back to school to obtain an MBA. I was wondering if you would mind looking at the attached resume to assess if you have any interest in Richard, or if you feel I should encourage him to go back to school. I am unclear as to the qualifications for your group so I apologize if this request is way off base.

Thank you for your help,

Mike,

I am sending you a message regarding a potential candidate.

Please, take a look at him and see if he fits better our group or Mark Tawney's group.

"Heather Thorne" <hethorne@wharton.upenn.edu> on 04/26/2001 08:55:56 PM To: "Christie Patrick" <christie.patrick@enron.com>, "Vince Kaminsky"=20 <vkamins@enron.com> cc: "Greg Hunt home" <gregoryhunt@home.com>=20 Subject: Recruiting for weather risk management group

Dear Vince and Christie,

?

I hope that you are both well, and are ready for the onset of summer in=20 Houston!? I was disappointed that I was not able to see you at the final=20 Tiger Team presentations last month due to a family emergency.? I hope that= =20 the teams=01, analyses will be helpful to your work, and echo their appreci= ation=20 of your involvement and support.

?

I am writing with a question regarding recruiting for Enron=01,s weather ri= sk=20 management group. ?My boyfriend, Greg Hunt, is currently seeking=20 opportunities to combine his background in meteorology (MS and 2 years of= =20 research at Lawrence Livermore Nat=01,l Lab) and an MBA in finance and=20 information technology.? I began thinking about Enron=01,s work in weather= =20 derivatives, and realized that there could possibly be a great fit there.

?

I have copied Greg on this message, and would appreciate any suggestions yo= u=20 can offer regarding opportunities in this group. ?Thank you very much!

?

Best regards,

?

Heather

Hi Vince,

Unfortunately, I have not heard from him. He also forwarded his resume to Mauricio Mora, who asked if we could interview him. When I asked Celeste about it back then she decided against it. If you need some help tracking him down, let me know.

Thanks, Althea

Subject: Stanford MBA- Interview

Althea,

I was trying to get in touch with this guy. Did he contact you by any chance? He missed the interviews on the campus.

Vince

Dear Vincent,

As I told you on the phone on Friday, I am very interested in a summer internship at Enron. I would like to point out that I want to pursue a career in trading, and I am especially interested in derivatives. Given that Enron is a pioneer in the market making of energy, broadband and weather derivatives, I find it a company I would be most interested in working for.

I believe that you will find my background of interest to your firm, and I hope to be interviewed by yourself and other colleagues of yours. I have final exams from March 19-22, but would be most willing to travel to Houston for interviews any time from Friday March 23rd onwards. I hope to hear from you soon.

Best regards,

Vince Kaminski

Natasha Marwaha <natasha\_marwaha@yahoo.com> on 02/29/2000 06:48:17 PM To: vkamins@enron.com cc: Subject: My resume per our discussion

Dear Mr. Kaminski:

Thank you for returning my call. As I mentioned I completed my MBA in December 1999 and will formally graduate in March 2000 from The University of Chicago Graduate School of Business. I am interested in applying for a position as an MBA recruit at Enron.

My interest in research has grown out of the 18 months of intense experience working with the Chief Financial Officer of INOVA Health System, my former employer. My experience in finance led me to apply for the MBA course at the University of Chicago, an internationally reputed institution in finance and economics.

I can contribute to this position previous finance experience and strong analytical and quantitative skills. I have used statistical and other quantitative analysis extensively in both my course work and my work at INOVA Health System, where I worked with a team of financial analysts to develop a corporate investment model.

I enjoyed speaking with you about an opportunity in your division. I believe if given the opportunity to interview with your firm, you will be pleased with our discussion on how I can be a productive member of the your team. I have attached my resume and will call you next week to follow up on this letter. Thank you for your consideration.

Sincerely,

Natasha Marwaha

Dear Mr. Kaminski:

I read with interest your company=01,s description on the Web page. I was highly impressed by the work that ENRON Corporation does and would like to inquire about employment opportunities with your company.

Enclosed is a copy of my resume that details my academic qualifications and practical experience. I am excited about stepping into a position, which will utilize my technical, analytical, and interpersonal skills in a fast paced environment, and look forward to expanding my horizons with new challenges and opportunities that ENRON Corporation will offer. I know from customer and supervisor feedback that I have the interpersonal skills imperative to building a successful career at the

ENRON Corporation and am motivated to do so. Your firm has an excellent reputation and I genuinely look forward to becoming a part of the ENRON Corporation community.

I know you must be busy during this time of the year, but I would sincerely appreciate a few minutes of your time. I plan to call you within the next seven days to discuss how my education, practical skills, and background would qualify me as a member of your company. In the meantime, if you need to contact me, my daytime and nighttime number is (512) 474-6683 and my e-mail address is knirel@mail.utexas.edu.

Thank you very much for your time and consideration. I look forward to talking to you.

Sincerely,

Nina Knirel

Todd,

Thanks for the invitation. I shall be very glad to speak at this conference.

Vince

-----Original Message-----

From: "Strauss, Todd" <Todd.Strauss@neg.pge.com>@ENRON Sent: Monday, January 14, 2002 10:23 AM To: Kaminski, Vince J Subject: invitation to Market Price Volatility conference

Vince --

I realize you may be busy with the news that UBS is the winning bidder for Enron's trading organization.

Looking ahead, I invite you to speak at the Market Price Volatility conference, to be held May 1-3, in Houston.

This follows on the Gas Volatility and Storage Valuation conference held last October. This spring's conference will focus on power volatility, and will include a number of applied econometric presentations.

The format of the preconference workshop, on Wednesday, May 1, will be much the same as in the past. Your speaking slot is for a one-hour presentation in the afternoon, followed by a roundtable.

I hope you will join in what promises to be a stimulating event.

Please confirm your participation by e-mailing or calling me by Thursday, Jan. 17.

Following your confirmation, Jim Naphas of INFOCAST will be in touch regarding the usual details.

Best regards.

Todd Strauss Director, Quantitative Analysis PG&E National Energy Group 7600 Wisconsin Avenue Bethesda, MD 20814 (301) 280-5523 todd.strauss@neg.pge.com

Dear Vincent,

I very much would like to ask you for a career advice. I am looking for new challenges and new professional opportunities. Possibly there would be such opportunity around yourself at Enron Corporation.

I trust that my strongest asset is my intellectual capital and ability to look from new angles into complex issues. Beside of the experience of working under Jacob Goldfield and Paul Jacobson at Goldman on the interest rate swaps and proprietary desks, I was a part of research effort of John Meriwether group at Salomon Brothers, I headed the European interest options desk at DKBI in London and I have managed a small hedge fund in partnership with Albert Friedberg.

I hold Ph.D. in mathematics from MIT and I have studied under Nobel Laureate in Economics, Bob Merton.

I very much would like to apply my knowledge of capital markets, trading and research in the field of energy markets.

With my very best regards and personal wishes,

Mark Kierlanczyk Godel Partners LLC 67 Wall Street, Suite 1901 New York, NY 10005 Tel 212 943 5300

Dear Mr. Kaminski:

I read with interest your company=01,s description on the Web page. I was highly impressed by the work that ENRON Corporation does and would like to inquire about employment opportunities with your company.

Enclosed is a copy of my resume that details my academic qualifications and practical experience. I am excited about stepping into a position, which will utilize my technical, analytical, and interpersonal skills in a fast paced environment, and look forward to expanding my horizons with new challenges and opportunities that ENRON Corporation will offer. I know from customer and supervisor feedback that I have the interpersonal skills imperative to building a successful career at the ENRON Corporation and am motivated to do so. Your firm has an excellent reputation and I genuinely look forward to becoming a part of the ENRON Corporation community.

I know you must be busy during this time of the year, but I would sincerely appreciate a few minutes of your time. I plan to call you within the next seven days to discuss how my education, practical skills, and background would qualify me as a member of your company. In the meantime, if you need to contact me, my daytime and nighttime number is (512) 474-6683 and my e-mail address is knirel@mail.utexas.edu.

Thank you very much for your time and consideration. I look forward to talking to you.

Sincerely,

Nina Knirel

Dear Colleague,

GasTrader would like to offer you a COMPLIMENTARY trial subscription to GasTrader Newsletter - the only natural gas industry publication that deals with today's critical issue of where natural gas prices are headed, and not where they have been.

GasTrader features weekly analysis and commentary from the industry's leading forecasters, observers, and traders.

GasTrader brings you short and long term weather predictions, useful for planning load and power requirements, as well as price trends, market outlook, and economic analysis.

In addition GasTrader in its' Market Outlook section brings you no-nonsense trading recommendations for the wild and volatile natural gas futures. A key feature for those doing deals tied to the Nymex futures contract.

Check out GasTrader's market recommendations from long time Commodity Trading Advisor and analyst Bill Burson. See if those recommendations help you do better deals and expand the razor thin margins so prevalent today in natural gas marketing.

If you would like to receive your FIVE WEEK COMPLIMENTARY SUBSCRIPTION to GasTrader, please reply to this e-mail and include your name, company, address and phone number. The publication will be delivered by e-mail usually late Friday afternoon giving you plenty of time to formulate your trading strategy for Monday.

We're currently offering a special discount, over 15% for an annual subscription to those who subscribe by June 1. After the end of five weeks, if you don't want to continue with the subscription, you owe nothing.

I hope to hear from you soon.

Sincerely,

Bill Burson, Editor

Nick,

The plan is OK, subject to unforeseen complications. My flight from London was delayed and I had to spend a night in Newark, NJ. My schedule for today was disrupted and I had to postpone my departure till Friday morning. I should be at San Francisco around 10:00 a.m. if there is no delay. I should be able to meet you at noon at your office.

Please, confirm the meeting both to my office E-mail address and my private address ([vkaminski@aol.com](mailto:vkaminski@aol.com)). Can you give me the phone number at which I can reach you on Friday if there is a delay?

Look forward to meeting you.

Vince

From: Jorge F Valenzuela [mailto:"jorgev+"@pitt.edu] Sent: Monday, January 31, 2000 9:46 PM To: stakrit@ei.enron.com; stakrit@ei.enron.com Subject: Resume

Dear Dr. Takriti,

My name is Jorge Valenzuela. We met last year in the workshop, "The new generation of unit commitment models". After your presentation, we had a brief conversation. I defended my Ph.D. dissertation in Industrial Engineering at the University of Pittsburgh last December. Currently, I am teaching at the Business School of the University of Pittsburgh, but my interest is to work for an electric power company such as Enron.

During the last three years, my work has revolved around modeling of electric power systems. My Ph.D. dissertation deals with the scheduling of generating units under the new operating environment. I have proposed a formulation that includes the option of trading at market-clearing prices with a power pool. I model the market-clearing price by a stochastic process based on the stochastic processes of the generating unit availabilities and the aggregate load. I use probabilistic dynamic programming to obtain the schedule that maximizes the expected profit.

In my resume, herewith attached, I have listed some other work that I have done in modeling electric power systems. I would like to add that I am a very versatile person with strong background in Operations Research, Statistics, and Information Technology.

Please call or e-mail me if you think that your company could make use of a person as me. Thank you very much for your kind consideration.

Best regards,

Jorge Valenzuela 215 Sandy Dr. Glenshaw, PA 15116 Telephone: (412) 492-9886 Email: jorgev@pitt.edu Enclosure

Enron Europe General Announcement 20/04/2000 15:41 Please respond to European IT Support/LON/ECT To: ECT London cc:

Subject: VERY IMPORTANT - "change of telephone numbers" THIS WEEKEND !!!

As you are no doubt aware, THIS WEEKEND (22nd April 2000) the 0171 and 0181 London dialling codes are being replaced by 0207 and 0208 respectively.

Since our move to Enron House all external customers should have been made aware of the new 020 7783 telephone numbers. We are however still receiving calls on the old 0171 numbers.

Please be aware that these 0171 numbers will be cease to operate on the 22 April 2000.

From this date, calls made to the old 0171 numbers will reach an announcement advising them to call Enron's new switchboard number: 020 7783 0000.

Please ensure that your external contacts are made aware of the correct number convention : 020 7783 xxxx

Details of new phone and fax numbers are as follows :

Click here --> <-- to access the Department Fax numbers details in the "Non-Commercial Bulletin Board" database on ECTLON-LN2/ECT.

Click here --> <-- to access the Personal Fax numbers (Surname A-H) details in the "Non-Commercial Bulletin Board" database on ECTLON-LN2/ECT.

Click here --> <-- to access the Personal Fax numbers (Surname K-Z) details in the "Non-Commercial Bulletin Board" database on ECTLON-LN2/ECT.

If you access the Enron network via 'RAS', you must ensure that the RAS number is updated in your laptop settings. The old RAS number was 0171 316 6666. This has changed to 020 7783 6666.

From the 22 April 00 Oftel's 'big number' day you will no longer be able to dial 0171 and 0181 numbers. The new 0207 and 0208 numbers must be used in their place. Current users of the new code will know that at present you must use the new area code as well as the new number.

From the 22 April 00 you will be able to dial either the local number on it's own i.e. 7783 0000 or the area code and local number i.e. 020 7783 0000.

If you have any questions please contact European IT Support on 36777

Stinson Gibner@ECT 03/02/00 10:03 AM

To: April Hodgson/Enron Communications@Enron Communications cc: Ravi Thuraisingham/Enron Communications@Enron Communications, Vince J Kaminski/HOU/ECT@ECT Subject: Project brainstorming for Paulo

April:

Paulo is the MIT Ph.D. student who talked with you by phone a couple of weeks ago. He is interested in trying to better define what type of project he might do over the summer with EBS. Recall that he is interested in the psychological/customer behavior issues related to web commerce as compared to traditional commerce. Perhaps the easiest way to proceed would be for you, me, Ravi, and Vince to get together to discuss possibilities. We could then include Paulo by phone to get his initial reactions/suggestions. After an initial assessment, we could then plan on another visit for Paulo.

Please let me know what your schedule would allow.

thanks, --Stinson

Stinson -

Thanks for your reply. I just got a call from someone at Enron today about Summer employment, so I think a meeting with April and your group would be very appropriate at this time.

I am available to meet with April any day this coming month, except March 9, March 10, and March 17-30.

Please let me know what works for you.

Thanks again,

Paulo

Dear Dr. Kaminski

here is an email invitation for teh SIAM event. A hard copy will follow

Dr. V. Kaminski Enron P.O. Box 1188 Houston, Texas 77251-1188

Dear Dr. Kaminski

March 12, 2001

I am writing to formalize your invitation to attend, participate, and speak in the SIAM Southwest Regional Mathematics in Industry Workshop. A time span of thirty minutes is being allotted to invited talks with an additional ten minutes or so for discussion. The workshop, funded under the auspices of a National Science Foundation grant to SIAM will not be a standard applied mathematics event with representatives from industry, academe, and governmental agencies presenting their latest research results. Instead the meeting will emphasize the mathematics and technology currently applied to the projects of industry and governmental laboratories. Additionally the event will focus upon the mechanisms facilitating interaction and collaboration between the academy, industry, and government laboratories.

The workshop will be held at the University of Houston Hilton Hotel, April 27-28. Funds will be available to support both travel expenses and the cost of food and lodging of invited speakers. We will be happy to make travel arrangements on this end if so desired.

We hope that you can accept our invitation. If this is the case please furnish us with a title, a short abstract, and a list of the necessary equipment for your presentation.

We look forward to seeing you at the University of Houston.

Sincerely

W. Fitzgibbon

Dear Vince, I am delighted to be working with you at last. I can confirm the lessons learned session, and I shall leave it up to you to consider the content. The session will last one hour, including Q&A. The VaR sessions I was hoping you would address are actually part of the post conference seminar and I realise that I did not send you the schedule for that. Please accept my apologies. I have attached the seminar outline for you information. Glenn Labhart of Dynegy will take the first and last sessions. Is there any chance you could do the others? I realise that this is a lot but it would be great if you could consider it. Please let me know when you can. Thanks again for agreeing to come all that way. I am sure it will be a worthwhile trip. Best regards, Joel.

Kevin

Don't worry I haven't forgotten about Stephen. He will be moved and sit next to Tony. Don't know what they are talking about loan computers but I am on the case.

Regards

Karin

Avistar has been all set up as far as I know but someone has to come in again on Monday to re-install it on Tonys new computer.

Kevin G Moore@ECT 20/04/2001 12:27 To: Karin Ahamer/EU/Enron@ENRON, Stephen Bennett/NA/Enron@ENRON, Mike A Roberts/HOU/ECT@ECT, Tony Hamilton/EU/Enron@Enron cc:

Subject: Re: Desk Move/Computer Stuff

Hello Karin , I noticed that Tony is taken care of , but what about Stephen. Tony and Stephen are a team , they work very closely together. Stephen also needs to be aware of what is taking place as well. If there is a problem with cost centers please contact me , but please try and have both guys set up for Monday morning.

Thanks so much . Kevin Moore

By the way have the Avistar set -up been completed..... Please inform...

Hi Karin,

I just wanted to check the status of our change in equipment for start of business Monday. I've been told that Tony and I will be using loaner PC's. The folks in IT are asking me where that loaner PC is so they can install all of the software that I need. Slava has told me that you are the point of contact. I just wanted to check with you to see if you need any additional information from me - or if I can be of help in any way. Thanks!!

The presentations have been scheduled for Thursday June 29, in room EB 30 C2. As indicated in my previous correspondence, we will hear presentations from Enron's two (2) primary insurance brokers. For your convenience, we've scheduled these to run concurrently with a 30 minute break in between.

8:30 - 10:00 am John L Wortham

10:00 -10:30 break

10:30 - 12:00 noon McGriff Seibels

The objective is:

i) An introduction of the risks associated with information technology activities and not adequately covered by traditional insurance products;

ii) The current state of the insurance marketplace and its efforts to develop products specifically addressing those risks;

iii) Steps required by insurers to assess and underwrite the risks.

iv) Question and Answer

The scope of these presentations is introductory in nature. If the consensus opinion is to move forward with a risk assessment and cost/benefit evaluation, we would envisage this requiring the formation of a working project team, and selection of one of the presenter firms with which to partner. In this context, your attendance for both presentations is requested. If you are unable to attend personally, please arrange for a member of your management team to attend. Please confirm your attendance to Danielle Dees at 713-853-3943 or via email. For those of you at remote sites who wish participate via video conference, please let Danielle know so that she can make the necessary arrangements.

12:51 PM -----

sevil yaman <syaman\_98@yahoo.com> on 02/10/2000 10:22:28 PM To: vkamins@enron.com cc: Subject: Summer Internship Position

Hi Dr. Kaminski,

As I told you last Monday in Dr. Kao's class I am looking for a summer internship position in your group in which I can use my economics background together with my quantitative skills and knowledge in electricity markets. Currently, I am a third year Ph.D. student at the Economics Department of the University of Houston. At the end of this semester I'll be completing my coursework and starting to write my dissertation which analyzes the access pricing issue in network industries, especially in electricity transmission. I would like to give you a few examples from my coursework. In addition to basic Statistics I-II and Econometrics I-II, I have taken "Macroeconomic Modeling and Forecasting" (Time Series) class in which I learned RATS. In "Applied Econometrics" class, it was given a great deal of attention to the case method learning approach that involved extensive computer analysis. We were taught SAS. As a term paper I worked on electricity demand forecasting. This semester I am taking "Special Topics in Applied Econometrics" course in which I am being taught Qualitative Dependent Models, MLE, Panel Data Techniques, and so on, and as software STATA. Moreover, this semester I am also taking "Options Theory and Its Applications" class and auditing Dr. Kao's class. I definitely agree with you in what you mentioned in your lecture last Monday about the understanding of the options theory as a necessity in the energy sector. Besides, I spent my last summer in the Oil and Gas unit of the World Bank as a research assistant. This work experience in which I had great exposure to the energy market issues and my own research area, which is regulation of transmission pricing (congestion pricing), made me believe that the ongoing restructuring of the electricity sector, especially the transmission network issue, could be well understood by working in the industry. Dr. Kaminski, attached you can find my resume. I would be glad if you could find a chance to review it and get back to me soon.

Many thanks,

---

Sevil Yaman Department of Economics University of Houston Houston, TX 77204-5882 (713) 743-3814 / 3817

Vince,

Thanks. Right now we will not do anything with him yet.

Zimin

-----Original Message-----

From: Kaminski, Vince J Sent: Thursday, September 20, 2001 10:57 AM To: Lu, Zimin Subject: RE: Bid-offer Algorithm

Zimin,

We can talk to him about the feasibility study. The main problem is managing too many partners and paying for what is a consulting service. A lot depends also on where the relationship with Prediction Co goes.

Vince

-----Original Message-----

From: Lu, Zimin Sent: Wednesday, September 19, 2001 11:08 AM To: Kaminski, Vince J Cc: Lee, Bob Subject: Bid-offer Algorithm

Vince,

Mary Nordstorm in RAC forwarded me this message from her friend who is a consultant.

I think it does not hurt us if we prob his algorithm without telling him anything.

Zimin

-----Original Message-----

From: Nordstrom, Mary Sent: Wednesday, September 19, 2001 10:52 AM To: Lu, Zimin; Lee, Bob Subject: FW: Izzy Nelken

Over the past year, I've been doing a lot of work to one of the largest Chicago market making firms in equity options. The project has to do with the "Market Microstructure".

With high degree of accuracy we can predict where the stock price is going to go in the next 15 seconds to 60 seconds. This technique can NOT be used to predict where the stock will be tomorrow or even in the next hour. As these are only short term predictions, the changes in the stock are usually small. Therefore, this technique is of no use to day traders. However, suppose you need to buy stocks anyway. For example, if you need to delta hedge an option position and buy some stock, the model might tell you to wait a few minutes and save a few pennies. Every time the stock moves and the trader has to modify the position, they consult our model and decide on their action: buy now or wait. Of course, this also works for "sell now or wait". Indeed, we found out that they save about 3-4 cents per stock trade. The market makers typically trade hundreds of millions of stocks a year so this is quite interesting to them.

We also have a project with one of the major US banks to apply this to foreign currency (forex) markets.

At this stage, it would be interesting to adapt this project to other markets. For example crude oil comes to mind. The project involves two stages: a) A feasibility study to check if this is possible to do. b) Building a real time system to give signals to the traders.

I think we can do step (a) independently without any commitment on your part. We would then apply our models and see if we can come up with anything interesting. We have access to "tick data" through a commercial service called "e-signal". I believe that it is reasonably good. If you have access to better tick data then it would be helpful for us to obtain several days (perhaps two weeks) of tick data (bids, asks and trades which are time stamped).

Joe,

He is a research assistant of Prof. Darrell Duffie from Stanford and I met him in this capacity. A very bright fellow.

I could not assess his commercial skills but he has enough common sense to identify the winner (as his interest in Enron demonstrates).

Vince

Vince Kaminski

hoshino@leland.Stanford.EDU on 10/19/99 09:14:05 AM Please respond to hoshino@leland.Stanford.EDU To: Vince J Kaminski/HOU/ECT@ECT, vkaminski@aol.com cc: Subject: Thank you for the e-mail.

Dear Vince Kaminski

Thank you so much for the kind invitation for the meeting.

I have been always inspired by and having respect for the recent revolutionary achievements of Enron in the energy markets My former employer McKinsey Tokyo in fact featured your company\*s success in the last Quarterly, and it clearly states (in Japanese though) that the quantitative research capability at Enron is now at the world\*s top level, which has been always behind the scene.

I am extremely honored to receive the email from you and in fact interested in knowing the opportunity of working in the energy field; However, very unfortunately I will have to come back to Japan, or at least to the East Asian region, upon graduation due to an inevitable family reason. My wife\*s father passed away recently and an old mother-in-law is now left alone without relatives. I understand that Enron has not yet embarked on the next big project of freeing the outdated Japanese energy market, (which by the way I strongly hope ) so I may not have a very good chance of making contribution at your company right now.

Lastly, if you need a staff in Tokyo in some future who understands both the risk management analytics at the F622 level and the local language and business custome better than average, please contact me any time. I will be happy to assist as much as possible.

Yours sincerely,

Vince: I don't think that you could have summarized the situation any better!!! I will be happy to respond to Neil as you suggested.

Thanks, Molly

Vince J Kaminski 01/24/2001 11:02 AM To: Molly Magee/HOU/ECT@ECT cc: Vince J Kaminski/HOU/ECT@ECT Subject: Re: L1 Visa - Anshuman Shrivastava

Molly,

Thanks for the update. Two points.

Please, let Neil McGregor know that many possible proposals were floated with regard to Anshuman and there was some noise in the system. We need L1 visa anyway and we decided to go ahead and arrange it. I shall also write to him and explain the confusion.

Also, if I have the choice between upsetting Neil or Jeffs (Shankman and Skilling), I shall choose Neil.

Vince

Enron North America Corp.

From: Molly Magee 01/24/2001 10:13 AM

To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: Re: L1 Visa - Anshuman Shrivastava

Vince: Apparently Neil McGregor became upset when he received Margaret Daffin's email. He is saying, however, that Anshuman will only be in Houston for one month, and you had mentioned six months when we spoke earlier. It really doesn't make any difference since he will need to get an L1 visa under either circumstance, but I thought you might want to see his email.

Molly ----- Forwarded by Molly Magee/HOU/ECT on 01/24/2001 10:09 AM -----

Margaret Daffin 01/24/2001 09:57 AM To: Molly Magee/HOU/ECT@ECT cc: Subject: Re: L1 Visa - Anshuman Shrivastava

Molly: per our conversation today. Please let me know the status so that I can proceed with the visa process. Thanks Margaret

----- Forwarded by Vince J Kaminski/HOU/ECT on 12/10/99

06:00 PM -----

Pinnamaneni Krishnarao 12/10/99 04:46 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: valuing caps on naptha (file included)

FYI. Indian papers and politicians are complaining about the high prices for power that the state govt. in Maharastra is paying to Enron. The reason: Naphtha prices more than doubled in 1999 and the fuel cost is a pass through (I can't believe they let it floating!). They requested our help in pricing caps on naphtha. Krishna. ----- Forwarded by Pinnamaneni Krishnarao/HOU/ECT on 12/10/99 04:41 PM -----

Pinnamaneni Krishnarao 12/09/99 01:33 PM To: Anshuman Srivastav/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT, Rajesh Sivaraman/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT, Sandeep Kohli/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT cc: Subject: valuing caps on naptha (file included)

Hi guys! I calculated the premiums for monthly caps for different cap (strike) levels using the 1999 prices as forward prices. The scenarios I included are: 1. At-the-money (ATM) caps: cap level = forward price (FP) 2. Out-of-the-money (OTM) caps: cap level =  $(1+x) * FP$  where  $x = 5\%, 10\%, 15\% \text{ \& } 20\%$  3. Constant cap level across months: \$168 (average of FPs), \$200, and \$250.

Brief results: Historical naptha volatility is 34% over last 2-years (which is higher than over the 10-year period - see the volatility chart). Premiums expressed as percent of the average naptha price for 2000:

ATM = 10.4% ATM\* = 13% (Assumiung FP = \$224/MT) 5% OTM = 8.4% 10% OTM = 6.8% 15% OTM = 5.5% 20% OTM = 4.4% \$168 Cap = 15% \$200 Cap = 9% \$225 Cap = 6%.

If you are looking to protect from any price move up from the current level, you will be looking at 10-15% range. Please keep in mind these are only indicative, since we are just guessing the forward prices. Given such drastic changes in prices during the last year, we really need to get an indication of the forward prices. I made some inquiries here and found the name of the person trading naptha. It is John L Chismar in Singapore ( Ph.011-65-838-9016; email: jchisma@ect.enron.com). Please contact him today and try to get an indication of the forward prices and volatilities for 2000.

It would be much easier if we can install our Exotic Options Library in your office. We need to place it in a common drive that all of you can access. If any of the common drives you use is G, J, M, O, or P, I can send you the files to be installed. If your common drive has another initial, we need to do some programming here before sending to you.

Call me to discuss/clarify further. You can call me at home if necessary (home ph. 281-240-5705; I am awake till 11PM usually). best wishes, Krishna.

Molly: for your information, I received this reply from Anshuman today.

As I mentioned in my voicemail to you today after seeing the note from Neil McGregor, there is no possible way that Anshuman could be in the US to work on February 5th. Until I receive all of his documents, and the necessary information from you regarding his position in the US, I do not have the information to send to the attorneys for the visa application.

Once they receive the paperwork, they will need to prepare the documents in triplicate, and send to me. At this stage, I will send the documents to Anshuman in India and he will need to make an appointment at the US Consulate in order to have the L1 visa stamped into his passport. He will not be able to come to the States to work without this visa in his passport! All of this could take approx. 3-4 weeks to accomplish. I think March would be a more realistic timeframe!

Please let me have your thoughts. Thanks

Margaret

03:51 PM -----

Li Xiao <lxiao@gsb.uchicago.edu> on 01/13/2001 01:41:29 PM To: vkamins@ect.enron.com cc: Subject: Fwd: Summer Internship--Ph.D. in Chicago

Hi, Vince,

This is Li, writing from U. of Chicago. I am in the second quarter here. The study and social life is extremely busy at the school. But I enjoy connecting the knowledge I learn everyday here with the experience I had with Enron.

A schoolmate of mine, a Chicago Ph.D. candidate in finance, is looking for an internship for the coming summer. I recommend him to write to you to see if you are interested in or if there is a need. If so, you can contact with him directly. He is a really bright guy. If not, hope you don't mind that I sell Enron at school so hard.

Again, thanks for all the help you gave me. Have a good new year.

Li

P.S.: Cover letter below and resume attached.

---

LI XIAO University of Chicago Graduate School of Business, Class of 2002 (773) 955-0710

---

Dear Dr. Vince Kaminski,

I am a Ph.D. student in Finance at the University of Chicago GSB who = hopes to find a summer internship at Enron of 2001 (between June and = September). I heard your group from my friend Li, who worked at Enron = for 3 year. She spoke highly of you. If it's okay, I am primarily = interested in Risk management. At the University of Chicago, I will have completed all the Ph.D. = courses in the area of finance by the end of the first year. As normally = it takes two years to finish the required finance courses, I decided to = take all the finance courses in the first year. In the fall quarter, I = already took Empirical Asset Pricing and Theoretical Asset Pricing and = did very well. In the winter quarter, I will be taking Corporate = Finance, Continuous Time Finance and Behavioral Finance. I am exposed to = all fields of finance. Prior to coming to Chicago, I received a Master's = degree in Economics at Washington University in Saint Louis where I = acquired skills in economic analysis. I also have a strong background in = statistics and mathematics. This makes me believe that I have acquired = the ability to do financial research.

Prior to coming to the United State, I was an outstanding graduate from = Beijing University, China. I was the founder and President of Beijing = Univeristy Society of Oceanology. I also organized a research jouney in = the round-the-Bo-Sea Economic Region. These experience helped to hone my = communication and interpersonal skills.

As illustrated above, my skills and expertise are ideally suited for = financial research. My resume is enclosed. In the event that you think = an interview is in need, my time is very flexible. Your assistance is = appreciated.

Sincerely yours,

Jason Chen (Huafeng)

6022 S. Drexel Ave, Apt 612 Chicago, IL 60637 (773)955-0348

Paul,

Thank you for the invitation to speak at the Eastern Conferences on Regulation and Competition on May the 25th. I shall be glad to attend and make an after dinner presentation. I hope to be able to attend the entire conference.

Sorry for a delay in responding to your message. I have been traveling extensively in the last few weeks.

"Kleindorfer, Paul" <kleindorfer@wharton.upenn.edu> on 03/08/2001 03:41:21 PM

To: "vkamins@enron.com" <vkamins@enron.com> cc: "mcrew@andromeda.rutgers.edu" <mcrew@andromeda.rutgers.edu> Subject: Invitation to the 20th Annual Rutgers Conference

Vince:

For two decades now, I have been a member of the faculty helping to organize the Eastern Conferences on Regulation and Competition that Michael Crew of Rutgers has chaired. This year will be, in fact, the 20th anniversary conference and a number of notable personages will be joining us to celebrate what we have learned and what we haven't about the economics of network industries. Fred Kahn, Al Philipps, Bill Hogan and a number of other distinguished academics will be reviewing our progress and the prospects for the future. The conference will take place at a beautiful site in the Poconos, about 90 minutes north of Philadelphia, from Wednesday afternoon May 24th to Friday afternoon May 26th. You can check for yourself the nature of the program and the conference site/hotel at the following website URL:

<http://www.rci.rutgers.edu/~crr/WS.htm>

Michael Crew and I would both be delighted if you would be willing to be an after dinner speaker on Thursday evening (May 25th), just before the key research reviews of Friday morning take place on the electricity, telephone and gas industries, and following a day of special topics on emerging power markets and other developments in network industries. Naturally we would be pleased if you would be able to stay for the entire conference, but knowing your schedule, you may only have time for a part of it. That would not be a problem. The usual after-dinner address is for 30 minutes, followed by a short Q&A period.

Your presentation would help to underline the tremendous importance of Enron in driving the development of new risk instruments to assist in price discovery and efficient risk management for market participants, in energy markets and more generally. Both Michael and I feel that your perspectives on the "new science of risk management" and what can be expected from it could be a very important addition to this special anniversary event.

Please let me know (and please do copy Michael on your response) whether your schedule will allow your participation in this very special event. Michael and I would, of course, be very happy to follow up with you in discussing the nature of the presentation, participants and so forth, if this is a go. I look forward to hearing from you.

Regards,

Paul Paul Kleindorfer 215 898-5830

Dear Sir / Madam,

RE: Join the World's Largest International Trade Bulletin Board for small and medium sized companies

Having seen your company listing in PMA Online Energy Yellow Pages, we would like to invite you to join (free of charge) the largest Business-to-Business "Trade Bulletin Board" on the Net, helping small and medium sized companies around the World to instantly locate new business partners and generate new business.

To post, search, view and/or respond to over 125,000 international trade opportunity notices (i.e. Offers to Buy; Offers to Sell & Business Opportunities) classified under 23 industry categories, please go to: <http://www.eceurope.com/>

In order to POST your Trade Opportunity Notice, you must complete a simple registration form (there is no cost), so please go to <http://www.eceurope.com/ectrade/member/Register.asp>

To learn why 100,000 small and medium sized companies from 185 countries now use ECEurope.com every month, take our Tour <http://www.eceurope.com/tour/>

Best regards,

Richard Lovewell Head of Marketing.

ECEurope.com (TM) Ltd 37 Pall Mall Deposit 124-128 Barby Road London W10 6BL United Kingdom Tel: +44-(0)20-8960 3366 Fax: +44-(0)20-8960 6205 URL: <http://www.eceurope.com/>

Please find a list detailing the number of trade opportunity notices (Offers to Buy; Offers to Sell & Business Opportunities) live on the site and the industry sections where they can be located. To view, simply click on any link below.

#### Contacts at UH for "Econo-physics"

|            |                                                            |
|------------|------------------------------------------------------------|
| Sender     | yannis.tzamouranis@enron.com                               |
| Recipients | ['shirley.crenshaw@enron.com', 'vince.kaminski@enron.com'] |
| File       | kaminski-v/all_documents/9356.                             |

Vince,

these are the contacts from UH. I would recommend that for a first contact the following people be involved: Larry Pinsky (PhysicsChair) Joe McCauley (professor) George Reiter (professor) Their coordinates and some schedules are below. If Larry is out of town, prof. Gunaratne would be a good alternative.

Please let me know how I can help further.

Yannis ----- Forwarded by Yannis Tzamouranis/HOU/ECT on 05/08/2000 03:11 PM -----

"Prof. Lawrence Pinsky" <pinsky@uh.edu> on 05/08/2000 09:10:54 AM To: Yannis.Tzamouranis@enron.com cc: jenni@mailman.enron.com, jmccauley@uh.edu, greiter@uh.edu, gemunu@uh.edu Subject: Contacts at UH for "Econo-physics"

Yannis: Let me give you the names and contact information regarding the appropriate personnel here to include in an initial discussion regarding the prospects for developing a program here in (we have to find a better name) "econo-physics." For an initial meeting it is reasonable to include Professores McCauley and Reiter as well as myself, if I am available. If I am not available you should consider including Professor Gemunu Gunaratne, our current Associate Chair and a theoretician with an interest in this area in his own right.

Professor Joseph McCauley

Phone: 713 743 3528 Fax: 713 743 5389 Email: jmccauley@uh.edu

Professor George Reiter

Phone: 713 743 3527 Fax: 713 743 3589 Email: greiter@uh.edu

Professor & Chair Lawrence Pinsky

Phone: 713 743 3552 Fax: 713 743 3589 Email: pinsky@uh.edu

OR an alternate for me:

Associate Professor and Associate Chair Gemunu Gunaratne

Phone: 713 743 3534 Fax: 713 743 3589 Email: gemunu@uh.edu

Also, FYI, one other new faculty member with a potential interest in this field is:

Assistant Professor (effective 6/1/2000) Kevin Bassler

Phone: 713 743 3568 Fax: 713 743 3589 Email: Bassler@uh.edu

General Administrative Contact:

Ms. Jennifer Chin-Davis, Department Business Administrator

Phone: 713 743 3524 Fax: 713 743 3589 Email: jenni@shasta.phys.uh.edu

FYI, I will be in Houston May 17-24, June 9, 19-23. If the meeting is held on another date, please include Prof. Gunaratne in my place...

Larry

From: Rakesh.Bharati@enron.com [mailto:Rakesh.Bharati@enron.com] Sent: Thursday, March 29, 2001 6:05 PM To: Mike Bothwell Subject: Re: Visual Numerics CNL Licensing Issues

Mike,

We have decided to go ahead with the purchase of a single license of IMSL libraries (C/C++) for PC. I believe that would be CNL 4.0 forPC. Let me check the cost for the license before we finalize it as I have mislaid your previous e-mail about the cost. It is my recollection that it is less than \$1500. Please e-mail to confirm with the precise number so we can proceed wih that.

Thanks,

Rakesh

Mike Bothwell <mbothwell@houston.vni.com> on 03/29/2001 12:56:03 PM

To: "'Rakesh.Bharati@enron.com'" <Rakesh.Bharati@enron.com> cc:

Subject: Visual Numerics CNL Licensing Issues

Rakesh, I'm just following up to see how things looked on this. Any change in status? Let me know I can furhter help you.

Best regards,

Mike Bothwell Account Manager Visual Numerics Inc. Phone: 713-954-6423 Fax: 713-781-9260 Cell: 713-417-9069  
mbothwell@houston.vni.com <mailto:mbothwell@houston.vni.com> <http://www.vni.com/>

Visual Numerics Celebrates 30 Years As an Independent Software Vendor

Rakesh,

As we discussed, the CNL 4.0 PC libraries are not license managed. Version 5 will be. The PC Version 4.0 can be installed on a network drive and called from networked PCs. As expected, we would ask that Enron honor the license agreement by allowing only the number of simultaneous uses permitted by the license. Version 5.0 will be license managed and can be licensed as node locked or floating.

With regard to Unix licensing, the current version of CNL for Unix is license managed. It can be licensed as node locked or floating. If you install the libraries on a Unix server as node locked, the number of simultaneous sessions on that server is not limited except by the capabilities of the machine. A floating Unix license would be checked out by the individual user to be executed on a local machine.

Also as mentioned, your investment is protected by allowing you to upgrade in the future by paying only the price difference between your current and desired platforms. This upgrade option only applies to licenses covered under support.

If you have any additional questions, please let me know. I look forward to providing you the best math and statistical libraries available today to help you solve your problems and understand your data.

Best regards,

Cal Berkeley General Presentation Monday, October 16th

This note is to confirm that you are scheduled to attend the Cal Berkeley General Presentation on Monday October 16th. This e-mail should contain any information that you need to know pertaining to your trip. Please print out a hard copy and bring with you in case of emergency. If you have any questions, there is a list of contacts listed below.

Once again, thank you for offering to help with technology recruiting at Cal Berkeley. See you on campus!

Lara

The General Presentation will be held:

Monday, October 16th The Faculty Club Seaborg Room - 2nd Floor 7:00 p.m. to 9:00 p.m. \*\*Please plan on arriving at the General Presentation by 6:00 p.m.

The General Presentation is designed to educate the students on Enron and the Global Technology Track. Following the presentation we will invite the students to ask questions about Enron and the Global Technology Track. Please plan to arrive at the General Presentation by 6:00 p.m. It is business casual attire.

#### FLIGHT ARRANGEMENTS:

You are responsible for scheduling your own flight arrangements with your preferred airline provider. Please schedule your flight to arrive to the San Francisco airport on Monday, October 16th. Please remember that there can be significant traffic over the Bay Bridge and to get into town at least an hour prior to the event. Please make all flight arrangements through the Travel Agency in the Park so that we are able to take advantage of discount fares. If you do not have a representative that you currently use at the Travel Agency in the Park - feel free to contact Liz Mendiola at 713-860-1140.

#### RENTAL CAR ARRANGEMENTS:

Once again, you are responsible for scheduling your own rental car arrangements with your preferred provider. Your Travel Agency in the Park representative should be able to assist you with rental car reservations.

#### HOTEL ARRANGEMENTS:

Hotel reservations are currently being made by our representative at the Travel Agency in the Park.

As soon as we have confirmation numbers, I will let you know.

San Francisco Airport to The Faculty Club

Take 101 Northbound Exit to San Francisco/Oakland Bay Bridge Exit to 1-80 East Exit on University Ave. East on University Avenue for 1.5 miles to Oxford St. Right on Oxford St., left on Durant Ave., left on Piedmont You will see parking on the right side

Once again, thank you so much for helping with the General Presentation. Below are some last minute tips to keep in mind:

Please remember to dress business casual. Please remember to bring some business cards for students. I have attached a pdf version of the Global Technology Track brochure. Please forward all expense receipts to Grace Garcia. She will handle any expenses incurred for this recruiting trip including: flight costs, hotel, car, food, valet, etc. However, you must turn in some sort of receipt - so be sure and save them!

Ashley Baxter work: 713-853-3589 cell: 281-793-0567

Lara Berry work: 713-345-8320 cell: 713-857-1034

Grace Garcia work: 713-853-7252

Simone Lewis work: 713-853-1645

Hi Vince,

Sorry that we couldn't meet in Houston. Hope your Philadelphia trip was fruitful and you didn't suffer from weather related flight delays on your way back to Houston. Your phone message stated that you may be coming to NY in Jan. 2001. That's great & we should definitely plan to see each other in NY, unless I come to Houston first. I'd, however, appreciate a brief chat today and pls call me if you schedule permits.

I'll be heading out to London tomorrow (mainly for the holidays) and won't be back to the office until Thurs. 1/4, however, I'll be checking my phone- and e-mail occasionally during the trip.

If today is not convenient, pls call me @ home tomorrow morning until 11:00am (NY time) and otherwise, pls offer another suitable time next week, your tel. # , and I can call you from London.

Have a great and a very happy holiday season.

Best regards,

Soussan, 914 253 4187 (work) 203 966 7123 (home)

To: "'Vince.J.Kaminski@enron.com'" <Vince.J.Kaminski@enron.com> cc: Subject: RE: Houston visit

Vince,

Your suggested arrangement is perfect with me and I love both Italian or Steak... the choice is yours. I really look forward to our meeting & I will be @ the hotel's reception area on time. It's great that I have your cell-phone...as a contingency, and just in case you needed to call me, it's best to leave me a message @ my phone # @ work.

Soussan 914 253 4187

Soussan,

Let's meet at Westin Oaks next to the reception around 6:30 p.m. Thursday. There are several nice restaurants within a walking distance to the Galleria. I shall make a reservation (is Italian or a steakhouse OK?).

You can reach me on Thursday at my cell phone 713 410 5396.

Look forward to meeting you.

Vince

"Faiz, Soussan" <faizs@texaco.com> on 11/27/2000 04:37:30 PM

To: "'Vince.J.Kaminski@enron.com'" <Vince.J.Kaminski@enron.com> cc: Subject: RE: Houston visit

Great! I look forward to our dinner on Thurs. 12/7 evening. Hopefully your flight will be on time... although having watched 60 minutes last night and suffered from a # of delays lately, let's hope that the "weather blame" doesn't get in the way. It's best to leave me a message @ my usual work # on Thurs., 914 253 4187, ... I can easily check it in Houston.

I'll be staying @ the Westin Oaks in The Galleria... any preferred place that I can book (& for what time)?? Coming over to down town won't be a problem for me either.

Will be great to see you again. Soussan 914 253 4187

Soussan,

Thanks for your message. It would be great to meet you when you come to Houston. I shall be in town on December 7, flying back from Philly in the morning. Assuming that the flight is on schedule, I shall be available for dinner. Please, let me know how I can contact you on Thursday, December the 7th, to confirm.

Look forward to meeting you.

Vince

Dear Vince,

Greetings from NY and hope that all is well and you had a great Thanksgiving. I'll be coming to Houston for 12/6-12/7 and hope you are available either evening for dinner. Would be great to see you again and catch up with the latest... I really enjoyed my visit last April, your insights, and the risk book you gave me.

I do hope you're available to meet and pls let me know which evening suits you better.

Best, Soussan Faiz Texaco Inc. 914 253 4187

Rakesh,

To confirm our conversation:

Please, go ahead and buy a copy.

Vince

Rakesh Bharati@ENRON 03/29/2001 02:06 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Tanya Tamarchenko/HOU/ECT@ECT, Vasant Shanbhogue/HOU/ECT@ECT Subject: Visual Numerics CNL Licensing Issues

Vince,

Tanya and I feel that there is a need for a constrained optimization routine for our VAR related research. Numerical recipes does not contain subroutines where equality and inequality constraints can be easily incorporated. Also, the number of arguments that can be handled is also limited.

IMSL provides a comprehensive library of more than 300 C/C++ statistical and mathematical analysis functions. We think that it would be of great value to our efforts and to the efforts of our research group. Presently the cost is approximately around \$1500 and Mike Bothwell (Visual Numerics Rep) assures us as the version is not license protected, we all can use it as long as simultaneous usage is within the license.

Please let me know if you should need further information.

Thanks,

Rakesh

Mike Bothwell <mbothwell@houston.vni.com> on 03/29/2001 12:56:03 PM To: "Rakesh.Bharati@enron.com" <Rakesh.Bharati@enron.com> cc:

Subject: Visual Numerics CNL Licensing Issues

Rakesh, I'm just following up to see how things looked on this. Any change in status? Let me know I can further help you.

Best regards,

Mike Bothwell Account Manager Visual Numerics Inc. Phone: 713-954-6423 Fax: 713-781-9260 Cell: 713-417-9069  
mbothwell@houston.vni.com <mailto:mbothwell@houston.vni.com> <http://www.vni.com/>

Visual Numerics Celebrates 30 Years As an Independent Software Vendor

Rakesh,

As we discussed, the CNL 4.0 PC libraries are not license managed. Version 5 will be. The PC Version 4.0 can be installed on a network drive and called from networked PCs. As expected, we would ask that Enron honor the license agreement by allowing only the number of simultaneous uses permitted by the license. Version 5.0 will be license managed and can be licensed as node locked or floating.

With regard to Unix licensing, the current version of CNL for Unix is license managed. It can be licensed as node locked or floating. If you install the libraries on a Unix server as node locked, the number of simultaneous sessions on that server is not limited except by the capabilities of the machine. A floating Unix license would be checked out by the individual user to be executed on a local machine.

Also as mentioned, your investment is protected by allowing you to upgrade in the future by paying only the price difference between your current and desired platforms. This upgrade option only applies to licenses covered under support.

If you have any additional questions, please let me know. I look forward to providing you the best math and statistical libraries available today to help you solve your problems and understand your data.

Best regards,

Mike Bothwell Account Manager Visual Numerics Inc. Phone: 713-954-6423 Fax: 713-781-9260 Cell: 713-417-9069

Why we're "IN THE NEWS" Every gambler knows that the house always wins in the long run. As Steve Wynn once famously said, "the only way to make money in a casino is to own one"

"I made \$73,589.00 in my first 6 months, and will double that this time around" J.Barnes, Norfolk, VA

"We believe our projections of Internet gambling revenues of \$100 to \$200 Billion domestically and \$200-\$400 Billion in the rest of the world is reasonable, even conservative." The Baker Report

"We didn't realize how many people in our area gambled on-line until we received our first check for \$39,789.54" Steve Rhodes, PA.

"As an entertainer, I look at the Internet as the future venue for many forms of entertainment. It is a powerful way to bring fun and safe entertainment to millions of people at the same time." Country Singer and online casino owner, Kenny Rogers

"I was amazed at the number of friends and family that are playing on my Casino, last month I earned over \$11,400" Dave P. IL

"There's no doubt you are dealing with hundreds of Billions of dollars... the amount of money we're talking is astronomical." -Wisconsin Attorney General James Doyle on Internet gambling

"I have over 500 players a month at my casino right now and I am already starting your 65% program" MD. WI.

"Net traffic is doubling every 100 days." U.S. Commerce Department

"On-line gambling turnovers have the potential to dwarf those of other interactive services, tapping into an existing traditional gambling market valued at over \$700 Billion in Europe alone." Data monitor, a market analyst corporation.

PC Computing Magazine has conservatively estimated that the US Internet gaming market could soon reach \$20 billion in annual revenue.

FYI. update on movie trading business. I change my mind. At first I thought that we should focus on customers who want to diversify their unique risks. But now I feel that, at this moment, the "make-sense" people are not easy to find in reality. (Even myself who own Enron stock, not Dynergy.) There are more risk takers than risk diversified people. So I think speculators might be our customers in this movie business. -chonawee

----- Forwarded by Chonawee Supatgiat/Corp/Enron on

Chonawee Supatgiat 05/02/2001 11:23 AM To: Russell Woody/Enron Communications@ENRON COMMUNICATIONS, Key Kasravi/Enron Communications@Enron Communications, Richard DiMichele/Enron Communications@Enron Communications, Martin Lin/Contractor/Enron Communications@Enron Communications, Greg Woulfe/Enron Communications@Enron Communications cc: Stinson Gibner/HOU/ECT@ECT

Subject: Re: HSX volume info

Thanks, Key, for the volume information. Because HSX is a fake market, I think this indicates that there are lots of speculators out there in the movie trading business. So I believe "speculators" might be one of our major customers. (Like stock markets, a (big?) part of brokers' profits are from speculators' commissions.)

I know the "diversification" is a good thing to do but may be hard to do in reality. Even for myself, who is working for Enron and owning Enron shares, I would not buy Dynergy stocks even if it makes sense to do that for reducing my unique risk... In stead, I buy Enron shares, so I am a speculator (risk taker) myself...

Regarding moral-hazzard/information-asymmetry issue in the movie business, the market price will reflect this risk. In addition, I think we can 1) try not taking any position or 2) have a diversified portfolio of movies.

If we operate as a broker and maintain balanced books, one question is how much we have to invest to create these markets... Thin margin can help generate volume.

-Chonawee

From: Russell Woody@ENRON COMMUNICATIONS on 05/01/2001 02:13 PM To: Key Kasravi/Enron Communications@Enron Communications cc: Chonawee Supatgiat/Corp/Enron@ENRON, Martin Lin/Contractor/Enron Communications@Enron Communications, Richard DiMichele/Enron Communications@Enron Communications

Subject: Re: HSX volume info

Key - Interesting information. Personally, I am blown away by the large membership HSX claims. Even if they have a decent percentage of these numbers, that would suggest that movies and the related industry is becoming sport as well as entertainment. I guess the fact that you can already find on the front page of your newspaper such information as weekend box office receipts suggests that a lot of people really are interested in movies beyond the content. Could bode well for us...

Rus Woody Enron Broadband Services Global Bandwidth Risk Management Phone (713) 853-4312 Cell (713) 410-2286 Fax (713) 646-8795

FYI,

Spoke VP sales from HSX: I posed as being interested in advertising on the site (keep in mind for perspective on info)

750k registered users 80k active users at any time 40k trades per day each user visit averages about 37 minutes with 41 page turns HSX.Com is primarily a B2C platform Primary visitors - young people interested in the entertainment aspect and virtual stock exchange competition aspects of the site

But -

HSXresearch.Com is a B2B site designated to provide information to industry players The concept behind the B2B site is provide industry players with insight into consumer perception: exert from press release:

HSX Research's primary application, HSX Trader Insight, consists of six dynamic reports that provide clients with long-lead estimates of audience awareness, intention and box office projecting for all film projects. Future applications, such as advertising effectiveness analysis, product placement analysis, entertainment product indexing and other value-added market research services will be available later this year.

It does make me think that if you visit the B2B site, you are likely to visit the trading site and be aware of it if nothing else. And the volume of trades is a lot higher than I had thought => although it's just for fun.

regards,

Key

In stead, I buy Enron shares, so I am a speculator (risk taker) myself...

Regarding moral-hazzard/information-asymmetry issue in the movie business, the market price will reflect this risk. In addition, I think we can 1) try not taking any position or 2) have a diversified portfolio of movies.

If we operate as a broker and maintain balanced books, one question is how much we have to invest to create these markets... Thin margin can help generate volume.

-Chonawee

From: Russell Woody@ENRON COMMUNICATIONS on 05/01/2001 02:13 PM To: Key Kasravi/Enron Communications@Enron Communications cc: Chonawee Supatgiat/Corp/Enron@ENRON, Martin Lin/Contractor/Enron Communications@Enron Communications, Richard DiMichele/Enron Communications@Enron Communications

Subject: Re: HSX volume info

Key - Interesting information. Personally, I am blown away by the large membership HSX claims. Even if they have a decent percentage of these numbers, that would suggest that movies and the related industry is becoming sport as well as entertainment. I guess the fact that you can already find on the front page of your newspaper such information as weekend box office receipts suggests that a lot of people really are interested in movies beyond the content. Could bode well for us...

Rus Woody Enron Broadband Services Global Bandwidth Risk Management Phone (713) 853-4312 Cell (713) 410-2286 Fax (713) 646-8795

Key Kasravi 05/01/01 01:22 PM To: Richard DiMichele/Enron Communications@Enron Communications, Chonawee Supatgiat/Corp/Enron@ENRON, Martin Lin/Contractor/Enron Communications@Enron Communications, Russell Woody/Enron Communications@Enron Communications cc: Subject: HSX volume info

FYI,

Spoke VP sales from HSX: I posed as being interested in advertising on the site (keep in mind for perspective on info)

750k registered users 80k active users at any time 40k trades per day each user visit averages about 37 minutes with 41 page turns HSX.Com is primarily a B2C platform Primary visitors - young people interested in the entertainment aspect and virtual stock exchange competition aspects of the site

But -

HSXresearch.Com is a B2B site designated to provide information to industry players The concept behind the B2B site is provide industry players with insight into consumer perception: exert from press release:

HSX Research's primary application, HSX Trader Insight, consists of six dynamic reports that provide clients with long-lead estimates of audience awareness, intention and box office projecting for all film projects. Future applications, such as advertising effectiveness analysis, product placement analysis, entertainment product indexing and other value-added market research services will be available later this year.

It does make me think that if you visit the B2B site, you are likely to visit the trading site and be aware of it if nothing else. And the volume of trades is a lot higher than I had thought => although it's just for fun.

regards,

Key

Dear Vince,

Thank you for taking the time to dine with Chris and me back on Monday 2 October.

Further to our dinner, I would like to forward you information on three topics:

The partners who lead Arthur Andersen's relationship with Enron are David Duncan, based in Houston, and Simon Prew, based in London;

Our country managing partner for Russia & the FSU is Hans Jochum Horn, based in Moscow; and

Details of our 21st Energy Symposium are attached below.

If you are interested in registering for our Symposium please contact David directly.

Should you require any further information on the topics we discussed over dinner (Strategy, Value and Risk) please do not hesitate to contact us in Houston or London.

Regards, ALLAN

(Embedded image moved to file: pic20284.pcx)

The Energy Symposium is one of the largest energy conferences in the world and we are successful in attracting senior energy executives as speakers to this 2-day event. This year's event will be November 28 & 29.

The Energy Symposium is much more than just an "accounting conference." Industry leaders discuss a range of topics and share their perspectives on strategic, economic, political, financial and operating issues.

Participants find the networking aspect of the Symposium to be especially valuable. There is ample time during the event for them to meet and talk with their counterparts and colleagues in the industry. And it is a premier marketing opportunity for Arthur Andersen, where more than 300 partners and managers get to spend two days with 700 executives from the energy and utilities industry in a forum.

The Symposium check-in begins Monday, November 27 at 6 p.m., with a cocktail reception in the Galleria Ballroom Foyer. Arthur Andersen personnel are encouraged to attend for an opportunity to network with colleagues, clients and prospective clients in an informal setting.

Thank you in advance and I look forward to seeing you and your clients in Houston.

Victor A. Burk

Soussan,

Let's meet at Westin Oaks next to the reception around 6:30 p.m. Thursday. There are several nice restaurants within a walking distance to the Galleria. I shall make a reservation (is Italian or a steakhouse OK?).

You can reach me on Thursday at my cell phone 713 410 5396.

Look forward to meeting you.

Vince

Great! I look forward to our dinner on Thurs. 12/7 evening. Hopefully your flight will be on time... although having watched 60 minutes last night and suffered from a # of delays lately, let's hope that the "weather blame" doesn't get in the way. It's best to leave me a message @ my usual work # on Thurs., 914 253 4187, ... I can easily check it in Houston.

I'll be staying @ the Westin Oaks in The Galleria... any preferred place that I can book (& for what time)?? Coming over to down town won't be a problem for me either.

Will be great to see you again. Soussan 914 253 4187

## Re: Henwood query

|            |                                                                                                                    |
|------------|--------------------------------------------------------------------------------------------------------------------|
| Sender     | michael.schilmoeller@enron.com                                                                                     |
| Recipients | ['grant.masson@enron.com', 'williams@enron.ene.matthew', 'steven.leppard@enron.com', 'karolina.potter@enron.co...] |
| File       | kaminski-v/discussion_threads/835.                                                                                 |

Good talking with you this morning. By all means, talk to Grant Masson about who else is using the Henwood model within Enron.

Attached are the workbooks I mentioned. The "Details of Jan and July.xls" workbook contains the resulting listing from the query I gave you yesterday and you can see how the supply curve was created from that. The supply curve becomes nonsense at points for reasons I believe are related to reliability commitment constraints, instead of pure economic dispatch, and to the aggregate reporting problem I described in my note yesterday.

The workbook "Supply Curve.xls" has the simplistic, average supply curve I mentioned, constructed from fuel and VOM costs. Depending on the question you are trying to answer, it may be an approach to consider.

The Henwood Contacts I had in mind are:

Tao Guo, PhD, Senior "Algorithmist" (916-569-0985) \* the one I was thinking of Wenxiong Huang, PhD Senior Project Consultant (916-569-0985) Ajit Kulkarni, PhD, Software Product Manager (916-569-0985) \* more a trainer, but sharp Cosimo Coscia, Senior Consultant (South Australia) 618-8357-1244 \* very resourceful Wade Schauer, Staff Consultant, (916-569-0985) \* best for questions about EMSS per se

all have emails, of course. Template: tguo@hesinet.com

Also, if you can not get satisfaction, contact Eric Toolson, VP (916-569-0985). He has a laconic style, but is very focused on customer satisfaction and retention. And he has the pull to make things happen.

Regards, Michael

*Karolina Potter/LON/ECT@ENRON 08/24/00 07:08AM >>>*

Michael,

I am an analyst in Paul Mead's Continental Power Trading group in London. I am currently working on the project, which requires the use of EMSS, and experience some difficulties interpreting the output results. Steven Leppard from our research group gave me your name as an expert in this system and consequently the person to contact in case of problems.

I have been running simulations for the Dutch market and was asked to provide the traders with some front-end screen graphs in order to interpret the numerical results. One of the graphs is to show an hourly generation stack and system's marginal cost, as we only run cost based scenarios. To sort each station's hourly generation I need its marginal cost. To my knowledge though, marginal cost is only generated for a systems marginal unit (TransArea Marginal Units query, Marg\_cost unit). Therefore I was sorting the stations according to the cost which I calculated based on the outputs from Station Detail by Hour query. The calculation was as follows:

For each hour, for each generating station:

"marginal cost" [o/MWh] = (Generation\_Cost [o000] \* 1000)/Generation [MWh] - VOM\_cost [o/MWh]

This I thought would include fuel cost and start up costs. However, a marginal station which I get on the stack as a result of the above calculation is not a station given in Marginal Station field in TransArea Marginal Units query. I have also looked into TransArea\_Data\_Hr table and TransArea\_Data table but non of the costs there match my results.

Do you happen to know what formula is used to determine Marg\_cost and which outputs I should be using to obtain the right results?

It might be easier if we could discuss this issue on the phone. In this case could you please send me your direct telephone number. I am struggling understanding what is going on and would appreciate your help very much.

Regards

Karolina

Shirley,

11:00am CA-time is fine (1:00pm TX-time). I'll be at 650 725-5525.

My cell phone number is 650 796-8163. Please call me there if plans change.

Thanks,

Nick

Shirley.Crenshaw@enron.com wrote:

Hello Nick: I agree e-mail is much easier. There is a two-hour time difference between Calif and Texas, i.e., 1:00 pm Texas Time - 11:00 am Calif time. Would tomorrow at 11:00 am Calif time be ok with you (1:00 pm Texas)? This time is fine for Vince, Tom Gros and Stinson Gibner. Can they call you and if so, what number? Please let me know. Thanks! Shirley 713-853-5290

Nick Bambos <bambos@stanford.edu> on 03/16/2000 12:28:58 PM To: Shirley.Crenshaw@enron.com cc: bambos@stanford.Stanford.EDU Subject: Re: Visit to Enron Shirley, It's easier to communicate by e-mail, since I am moving from meeting to meeting (but I have the laptop always with me). Please give me a phone number that I could call tomorrow. What is the time difference between California and your location? I think it's 2 hours (CA->TX) - is that right? I can do the conference call any time from 9-11 CA time. Would that be OK on your side? Thanks, Nick Vince.J.Kaminski@enron.com

FYI: Several errors like 'brokering' in the report but given the fact that the guy had no clue what Enron does or companies like it do, this came out okay. In all of the PR group's marketing effort, Enron as a Market-Maker is the message.

Ravi.

Enron seeks to broker storage deals between users, SSPs

By LUCAS MEARIAN

While technology service providers have long been talking about data storage as a utility that should be sold in the open marketplace like electricity or natural gas, little has been done to pool market resources in order to hawk surplus disk-array capacity. But that's exactly what a subsidiary of Houston-based energy and communications conglomerate Enron Corp. is doing by launching a business-to-business exchange that it said will seek to match spare capacity owned by storage service providers (SSP) with corporate users who want to be able to quickly scale up and down the amounts of storage they have available. Enron Broadband Services this week announced that it has already signed a deal with Waltham, Mass.-based StorageNetworks Inc. and is negotiating similar agreements with at least six other SSPs. If successful, analysts said, Enron's business proposition could go far toward generating a set of operating standards for the emerging SSP business. "It's a market with mix of small and large players and companies that define their roles differently," said Ken Weilerstein, an analyst at Gartner Group Inc. in Stamford, Conn. Enron's plan also could help enterprise-level users get additional benefits along with the storage capacity they're renting, such as security and disaster recovery support, he added. Ravi Thuraisingham, director of global bandwidth risk management at Enron Broadband Services, said the new offering won't include additional security features. But Enron does plan to standardize on a set of SSP services and bundle them with disaster recovery and communications bandwidth capabilities, he said. Initially, Enron -- which had total revenue of \$101 billion last year -- expects to charge users monthly fees of \$25 to \$55 per gigabyte of managed storage, depending on market conditions and the length of time a company expects to need the capacity. "We're there to try to discover a market clearing price," said Thuraisingham, adding that the service is tentatively due to go online in the third quarter. Enron said it has already signed Best Buy Co., one of the leading retailers of consumer electronics, computers and software in the U.S., to buy the storage capacity it needs to support a customer relationship management application through StorageNetworks. Connecting users such as Best Buy to available storage could take anywhere from three days to three months, according to Thuraisingham. Under Enron's plan, storage capacity owned by participating SSPs will be connected to an existing network of switching hubs through which the company currently trades telecommunications bandwidth. Enron said it has 18 switching centers, or "pooling points," in the U.S., and another seven overseas. At first, the company plans to focus its attention on SSPs in Boston and other metropolitan areas where the necessary networking plumbing can be easily installed. But even there, Thuraisingham said, Enron is "pretty much in the initial stages of getting SSPs up to speed on what the market is about." Enron has been managing online trades of telecommunications bandwidth since the spring of 1999. Later that year, it also launched a Web site called EnronOnline that oversees the trading of natural gas, electricity and other commodities. That quickly became the world's largest e-commerce site and is now said to be processing more than \$1 billion worth of transactions daily.

Astros Tickets Available

Please note that the tickets for the Astros games scheduled for Saturday, March 31st, through Sunday, April 8th, (no game on Monday, April 2nd) are still available. Please let me know this morning if you are interested in any of the tickets. Thank you.

- - - - -

As Mike mentioned at the staff meeting yesterday, Enron Global Markets has season tickets for the Houston Astros for the 2001 season which begins this Friday, March 30th, with an exhibition game against Boston. Exhibition games are also scheduled for Saturday, March 31st, and Sunday, April 1st. The regular season opening game will be on Tuesday, April 3rd.

We have four seats in section 116, row 33, seats 20 - 23. The seats are located in the dugout section between home plate and the visitor's dugout.

The tickets are available on a first come, first serve basis with preference given for customer entertainment if more than one request is received for the same game. Please contact me at X-36898 or via e-mail at cathy.phillips@enron.com to request tickets. In addition, copies of the Astros 2001 Season Schedule are available upon request.

Please let me know if you have any questions. Thank you.

Dale,

Thanks. My son will caall him.

Vince

-----Original Message-----

From: Furrow, Dale Sent: Friday, November 30, 2001 9:57 AM To: Kaminski, Vince J Subject: career opportunities for your son

Vince,

Pursuant to our conversation, I called Jim Kenney (281-297-3557), head of Entergy Management Operations (EMO), which is the entity responsible for ETR's 4-state regulated system. He indicated that they were looking for someone with IS skills to manage their EMS. The point of contact for this is Charles Sanders (281-297-3575). Jim indicated it would be a combination of Hardware/Software skills. Entergy has a very large and complex regulated system, and I would assume that the EMS (responsible for real-time decisionmaking for Generation response to load) would be quite complex and challenging. He indicated that he would write a note to Charles to expect your call. If I can be of further assistance, please let me know.

Best Regards, Dale

Dale Furrow Vice President, Enron Wholesale Services Phone: (713)-345-7555 Cell: (713)-898-4393

Vince,

I have received the full-time offer package from Associate & Analyst Program last week. Apparently they have pretty tight deadlines. Because of a certain clause in the contract, I may have to give them an answer by October 16th. Since we discussed this before I left Enron, I felt it would be a good idea to inform you of the recent developments.

I am looking forward to hearing from you soon regarding both part-time and full-time employment opportunities with the Research Group.

Best,

01:00 PM -----

"Cantekin Dincerler" <cantekin@mail.utexas.edu> on 10/17/2000 10:40:22 AM Please respond to <cantekin@mail.utexas.edu> To: <vince.j.kaminski@enron.com> cc: Subject: part-time work

Vince:

I enjoyed the lunch and part of your presentation last week (I had an other engagement to attend to, and hence could not make it to the rest of the presentation and reception following it).

I appreciate the part-time offer, however, I must admit that I did not find the terms very favorable. Unlike a person who is permanently located in Houston, I would have the inconvenience and cost of commuting between Austin and Houston, and of accomodation both in Austin and Houston.

I really would love to work in the Research Group and am sincere about this. I would just hope that you would consider compensating me at manager level so that I can cover transportation, accomodation expenses and more importantly, justify the decision to devote at least half of my time to Enron away from my thesis.

I will be looking forward to hearing from you soon.

Best, Cantekin Dincerler

#### REMINDER:Conference Call- Interconnection Issues Update- Mon.

Sender	alliance@eei.org
Recipients	[jonathan.w.gottlieb@bakernet.com', 'samir.s.desai@bakernet.com', 'alliance_info@listserver.eei.org']
File	kaminski-v/deleted_items/764.

Reminder for today's conference call...

The Alliance of Energy Suppliers will conduct a conference call to apprise the generator community of the recent progress of the Interconnection Agreement and Interconnection Procedures drafting groups and their work-product, solicit input on content of comments to the ANOPR, and begin discussion of Phase II- Cost Responsibility and Cost Allocation of Interconnection Upgrades.

The Alliance's outside counsel, Jonathan Gottlieb, will be the co-conductor of this call to provide first-hand knowledge of the drafting process, since he is actively participating on the drafting committee, and assist in identifying outstanding interconnection issues.

We encourage all to participate on the call and prepare to express any questions, comments or concerns.

Attached is the agenda for the conference call. Please reply back to this e-mail if you plan to participate on the call. If you have questions or need additional information, please do not hesitate to contact Chuck Linderman (x5652) or myself (x5098).

Call in number: (800) 860-2442. Call Name: Alliance Interconnection Call Date: Monday, Jan. 7 at 1PM (EST)

Thanks, Tonja Wicks Manager, Energy Supply Policy Alliance of Energy Suppliers Edison Electric Institute Phone: (202) 508-5098 Fax: (202) 508-5600 Fax: (202) 508-5445 - 02Jan 7 IC Conf Call Agenda.doc - Tonja Wicks.vcf

Carrie Miller <cmiller@rice.edu> on 11/10/2000 10:26:52 AM To: (Recipient list suppressed) cc: castro@rice.edu, spradlin@rice.edu Subject: Rice University ALP program -- December 1st deadline

On behalf of the Jones Graduate School at Rice University, we would like to thank all of the company representatives who have submitted Action Learning Project (ALP) proposals. Currently, the ALP faculty committee is reviewing all proposals received.

We also want to remind those who are planning to submit proposals of our December 1st deadline. Please keep us updated on the status of your project. We are happy to answer any questions or provide assistance.

Our goal is to have a good mix of projects from a variety of companies, and we are also pleased to accept multiple projects from one company. Thus far, many of our proposals are marketing and/or strategy related. To increase the diversity of projects, we are especially looking for ideas that give our students the opportunity to utilize finance skills. Of course, an ideal project is one that allows a student to use multiple skills.

Again, thank you for your continued interest in Rice University and the Jones School ALP program.

Anshuman Srivastav

03/28/2001 06:32:20 AM

To: Marc De La Roche@ECT cc: Tushar Dhruv@Enron, Doug Leach@ECT, Mohan Gurunath/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT, Rajesh Sivaraman/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT, Shubh Shrivastava/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT, Mukesh Tyagi/ENRON\_DEVELOPMENT@ENRON\_DEVELOPMENT (bcc: Sandeep Kohli/ENRON\_DEVELOPMENT)

Subject: Hedging LNG Volumes

Hi Marc,

DPC would like a swap to hedge its price exposure on LNG. We do understand that there exists a basis risk between JCC (the LNG SPA index) and Brent (the market index for the product) and will bear such risk. We also appreciate the fact that this is a financial product and irrespective of actual consumption, we will still have to bear the burden (if any) of the swap.

Fuel - LNG indexed to JCC (closely correlated to Brent Futures)

Period Volumes (Tbtu) Volumes(MT) Volumes(JCC Bbls) January 2002 to December 2002 33.61 650,000 9,127,049  
January 2003 to December 2003 48.63 940,000 13,207,496 January 2004 to December 2004 48.63 940,000 13,207,496

Crude Swap Price: Can we look at a 'dirty' hedge and get a crude(\$/Bbl) swap price. Like any other regular swap, this will be a monthly settle product.

The above conversions from MT to Bbls are based on LNG conversion factors. (14.04 Bbls/MT).

We also would like to understand the requirements of the Credit Group to put this hedge in place. Please indicate the process as well as the security mechanisms to provide adequate credit support for the swap.

Please call me(98210 38711) or Rajesh (98201 88310) for any additional info.

Regards, Anshuman

Dear Vince

I recently saw an announcement of Enron's risk management chair at Rice University. Do you know about it or the people at Rice? While I'm having a great time working with Swiss Re here, I am thinking about coming home for my wife's sake. Do you think that Rice would be open to a person in risk management with an insurance as well as a finance background? That was certainly not true at Texas and that's why I'm asking.

I hope all is well there with you. I did appreciate your presentation to my finance classes there at the University of Texas a couple of years ago. I also appreciated the assistance that you recently gave one of my Texas Ph. D. students. He was and I still am working on pricing weather derivatives.

Best regards Richard

From: Vince Kaminski <Vince.J.Kaminski@enron.com> Subject: Re: Valuation

Steve,

Please, let me know when you come back.

I have detected a tendency to implement different approaches to valuation in the past.

To some extent, it reflects the absence of formal rules for sign-off on the valuation techniques which, in turn, reflects, the turf wars and the desire by the originators to control the outcomes.

Vince

cc:

Subject: Valuation

Vince,

I'd like an opportunity to talk to you about valuation.

I'm hearing confusing messages about the way that the UK IT team and the UK traders get their Valuation code apparently signed off by Research, while here... You provide it for our guys to wrap up.

We have now a situation where the UK team are using a home grown Valuation

piece called DOVE, where results differ from those of the equivalent USA portcalc.

I need to break through the pride barriers and the "not built here" syndrome, and try to do the right thing, but I don't beleive I can do that without you guidance.

I'm scared that if we diverge too much we will never work globally on these systems.

Richard,

I have made discreet inquiries at Rice and it seems they are looking for somebody with a different profile than the one you represent. I think that the interest is more in a person with more financial institution risk management experience, with special applications to trading and energy trading in particular.

Vince

**RE: Summer Associate Position at Enron**

Sender	shirley.crenshaw@enron.com
Recipients	[dmitri.villevald@owen2002.vanderbilt.edu]
File	kaminski-v/resumes/247.

Hi Dmitri:

Thank you for responding so quickly.

I have scheduled the telephone interview for Wednesday, January 31st at 3:30 PM (Houston time). You may be ahead one hour? The interview will be for approximately 1 hour.

The Research group that will be interviewing you will be:

Vince Kaminski Managing Director Stinson Gibner Vice President Zimin Lu Director

We will call you at 615-496-1132. If anything changes, please let me know.

Thanks Dmitri.

Sincerely,

Shirley Crenshaw

Dmitri Villevald <Dmitri.Villevald@owen2002.vanderbilt.edu> on 01/16/2001 11:42:05 PM To: "Shirley.Crenshaw@enron.com" <Shirley.Crenshaw@enron.com> cc: Subject: RE: Summer Associate Position at Enron

Dear Ms. Crenshaw:

Thank you for choosing me for the telephone interview. It is a great honor for me to be interviewed by Enron Research Group professionals. I will be available for the interview on January 25th - 26th, January 29th - 31st anytime from 3:00pm to 6:00pm. Please let me know which time is the most convenient for you. You can reach me by telephone (home: 615-292-7122). Also, I am always available at my cell phone (615-496-1132).

To make sure that I will do my best during the interview, I will greatly appreciate if you provide me with some details on the interview structure and the type of questions I could expect.

Again, thank you very much for the great opportunity to demonstrate and prove my credentials, interest and desire to work for Enron during this summer. I am excited about the prospect of applying my skills at Enron Research Group as a Summer Associate. If I can provide more information or answer additional questions, please, contact me either by telephone (615-496-1132) or via e-mail (Dmitri.Villevald@owen2002.vanderbilt.edu).

Sincerely,

Dmitri Villevald

Good morning Dmitri:

Your resume was forwarded to the Research Group with Enron by Pavel Zadorozhny. They would like to conduct a telephone interview with you at your convenience sometime within the next two weeks. It will be a conference call and will include several of the Research group.

This will determine where you might fit for the summer program.

Please let me know some times that would be convenient for you and the telephone number that you can be reached at.

Sincerely,

Shirley Crenshaw Administrative Coordinator Enron Research Group 713/853-5290 email: Shirley.Crenshaw@enron.com

Damon Kovelsky <dkovelsky@meridien-research.com> on 03/20/2001 09:59:43 PM To: "'vkamins@enron.com'" <vkamins@enron.com> cc: Subject: FW: Follow-up

Mr. Kaminski;

I am a Research Associate at Meridien Research ([www.meridien-research.com](http://www.meridien-research.com)) in the greater Boston Area. We specialize in the reporting and analysis of technology in the financial service industry. I work in the Risk and Trading Group. Currently I am working on a report on Energy Risk Applications. I introduced myself to Mr. Scott Neal who informed me that I should contact you (see below). I would like to spend some time talking to you about Enron's risk management for energy trading. And if possible, I would like to be able to include Enron in my report since they are the global leader in Energy. If it is possible, I would like to talk this week. My calendar is pretty open so whenever you would like to talk. I think the conversation should take about 45 minutes to an hour. If you would like a list of questions, I would be more than happy to provide them. I can be reached at 617-796-2830 or [dkovelsky@meridien-research.com](mailto:dkovelsky@meridien-research.com). I look forward to talking to you,

Cheers,

Damon Kovelsky Research Associate Emerging Trading Technologies and Risk Management Meridien Research

I believe Vince Kaminski could possibly be of assistance in this matter.

Damon Kovelsky <dkovelsky@meridien-research.com> on 03/12/2001 02:05:06 PM

To: "'scott.neal@enron.com'" <[scott.neal@enron.com](mailto:scott.neal@enron.com)> cc: Subject: Follow-up

Mr. Neal,

I wrote you last week a request to spend some time talking to you about Enron's Energy Risk Management for a report I am writing on energy risk management applications. I understand that you are a busy man, but I would just like a half hour to talk. If you would like a list of questions, I would be happy to provide them. This conversation does not have to be on the record if you don't want it to. The main purpose for my enquiry is to understand how energy risk applications are being used "on the ground". I would like to be able to write about Enron, but it is not required. I look forward to hearing from you.

Cheers,

Damon Kovelsky Research Associate Emerging Trading Technologies and Risk Management Meridien Research

"The Power Marketing Association" <pma-marketplace@mgfairfax.rr.com> on 03/22/2001 09:41:10 AM To: cc: Subject: FREE TWO-WEEK TRIAL to Platts Energy Trader

Dear Energy Professional:

We are pleased to start you today on a FREE TWO-WEEK TRIAL to Platts Energy Trader, providing comprehensive daily market coverage of both natural gas and electricity in the converging North American energy market. Today's issue is attached below.

Platts Energy Trader is brought to you by the editors of Inside FERC's Gas Market Report and Power Markets Week, both published by Platts, the energy market information division of The McGraw-Hill Companies.

Platts Energy Trader will put on your desktop each morning the best market reporting available on North American electricity and gas, along with unique coverage such as forward assessments, regional spark spreads and integrated market commentary. It will give you critical context in today's rapidly converging energy marketplace.

Valuable and Unique Features Include:

\* Daily assessments of the forward electricity market at six key hubs extending out more than a year. \* Near-term forward power deals-the most data and products covered in the industry. \* First-of-a-kind spark spreads based on actual efficiency rates for power plants in specific regions, a unique hedging and analysis tool. \* Expanded daily natural gas spot prices at more than 60 locations, including 11 new market area points. \* 24 on-peak and 21 off-peak daily electricity indexes. \* The most frequent and comprehensive power outage tables found anywhere. \* Daily key indicators for national forward electric power prices and national supply area gas prices. \* Succinct national overview of gas and power markets, and how they're interacting. \* Three regional sections, providing focused coverage for traders, along with leading news. \* Cumulative averages of daily prices throughout the calendar month for all gas pricing and all on-peak daily electricity indexes.

For questions, call our sales department at 877-286-8897 or 212-904-2004; e-mail, [info@platts.com](mailto:info@platts.com).

Meanwhile, we hope you enjoy your free two-week trial to Platts Energy Trader.

Sincerely,

Richard Schwartz Platts Marketing Director

P.S.-Want to subscribe now? Call 877-286-8897 or 212-904-2004. The annual subscription price for this comprehensive daily package of both natural gas and electricity market intelligence is just \$1,495, a \$500 savings off the regular subscription rate of \$1,995 (plus applicable sales tax, Canadian GST or VAT).

If you need to download Acrobat Reader to read this file, go to [www.adobe.com](http://www.adobe.com). To decline free trial of Platts Energy Trader, hit reply and type "stop trial."

*Message 592 of 681***REMINDER: Jan 31 Industry Collaborative on Developing Energy**

Sender	alliance@eei.org
Recipients	[alliance_info@listserver.eei.org]
File	kaminski-v/deleted_items/4.

Attached are the registration form and agenda for Friday's January 31 industry meeting in New York City. This meeting is a continuation of Monday's Jan 28 industry collaborative at DOE to develop a "single" consensus standards setting organization by March 15, as directed by FERC. Provided below is the matrix developed by industry at Monday's meeting identifying the areas of similarities and differences between the various models and proposals. We look for you to review the matrix internally and be prepared to advance the discussion and start making the hard decisions in New York.

We strongly encourage all companies to participate in New York and the subsequent industry meetings. FERC staff will present in the morning and industry will begin discussions and negotiations thereafter. FERC is holding its Northeast Energy Infrastructure Adequacy Conference on Thursday at the same Helmsley Park Lane Hotel. It was a concerted decision to hold this meeting in New York City to allow for companies to maximize their trip North and participate in both meetings, if desired. Please fax or e-mail the registration forms to [jmastin@eei.org](mailto:jmastin@eei.org) or the fax number provided on the registration form. We have registered close to 75 persons for this meeting and need an approximate count of attendees to ensure adequate meeting space for all participants. If you do not forward the form by COB Thursday, please contact us by phone and bring a completed registration form to the meeting.

Also, for those companies that can not attend in person, we have established a conference call dial-in.

The number is 800-860-2442. Call Name: Wholesale Standards Call Date/Time: Friday, January 31 from 8 AM-4PM

Thank You, Tonja Wicks

Tonja Wicks Manager, Energy Supply Policy Alliance of Energy Suppliers Edison Electric Institute Phone: (202) 508-5098 Fax: (202) 508-5600 Fax: (202) 508-5445 Received: from imo-m10.mx.aol.com by mail.eei.org; Tue, 29 Jan 2002 11:22:27 -0500 Received: from Naesb1@aol.com by imo-m10.mx.aol.com (mail\_out\_v31\_r1.26.) id p.8b.12ea09ad (4543); Tue, 29 Jan 2002 11:20:57 -0500 (EST) From: Naesb1@aol.com Message-ID: <8b.12ea09ad.298825e9@aol.com> Date: Tue, 29 Jan 2002 11:20:57 EST Subject: DOE 1-28-02 Industry Meeting Resulting Matrix To: Naesb@aol.com, Naesb4@aol.com, Naesb1@aol.com, GISB1@aol.com MIME-Version: 1.0 Content-Type: multipart/mixed; boundary="part1\_8b.12ea09ad.298825e9\_boundary" X-Mailer: AOL 5.0 for Windows sub 138

Dear Industry Participants and Attendees,

Attached please find the draft matrix resulting from yesterday's meeting. Please return any edits to your comments by end of business Wednesday for posting and inclusion in the matrix. The matrix will be edited and made available on Thursday (emailed and posted) in time for the industry meeting in New York on Friday. Best Regards, NAESB Office

#### REMINDER: Jan. 15 Industry Workshop to Develop Commercial

Sender	<a href="mailto:alliance@eei.org">alliance@eei.org</a>
Recipients	[ <a href="mailto:alliance_info@listserver.eei.org">alliance_info@listserver.eei.org</a> ]
File	<a href="#">kaminski-v/deleted_items/684.</a>

In response to FERC's charge for industry to develop a standards-setting organization by March 15, 2002, the Alliance of Energy Suppliers and EEI, with participation by you, the industry, are conducting a series of industry-workshops to facilitate the development of this standard-setting organization. FERC made it very clear at its December 19 public meeting that if we [industry] do not develop this entity and its functions, FERC would do it for us. This is a very important issue to the generator and power marketing community. The Alliance recognizes that it is imperative that the generator and power marketing community be involved in this process from the very beginning, so we strongly encourage your participation in these workshops.

So to preempt a FERC-mandated process, we strongly encourage industry to participate in these workshops, so to provide valuable commercial input into the process that aims to achieve industry consensus around a work product that will be submitted to FERC on or by March 15. If not, we will experience another month-long series of FERC-directed daily meetings, similar to that of the Generator Interconnection process. And, if you did not have the pleasure of being apart of those proceedings, the overwhelming sentiment was that it was a strain for many companies to allocate personnel and financial resources to attend meetings for three to four days out of a week for a full month.

So to that end, Tuesday, January 15, 2002 in Phoenix, AZ will kick-off the first of a series of national meetings held in various regions of the country. Recognizing that market participants are located in various geographical locations, we tried to be sensitive to that and choose meeting locations accordingly. However, it is important to stress that these meetings are sequential, in that each meeting will yield a draft work product more refined than that of the last meeting. So we encourage you or a member of your company to attend all four regional meetings and the final local Washington meeting in February to provide input throughout the process.

Prior to each meeting, a draft agenda will be circulated to help you prepare for the meeting. We scheduled these meetings around the announced January 22-25 FERC Technical conference on Standard Market Design and the follow-up January 28 DOE meeting on Commercial Business Standards, so to allow maximum attendance at all of these very necessary and inter-related conferences and meetings.

Attached is the registration form and draft agenda for the Phoenix, AZ meeting. The meeting will be from 8AM-3PM. Hotel information is provided on the registration form as well. We are extending registration through January 14.

Upcoming Alliance/EEI Commercial Business Standards Workshops : Tuesday, January 29- Cincinnati, OH Friday, February 1- New York City Tuesday, February 12- Atlanta, GA Tuesday, February 26- Washington, D.C.

If you have any questions, please feel free to contact me at (202) 508-5098 or via e-mail.

Tonja Wicks Manager, Energy Supply Policy Alliance of Energy Suppliers Edison Electric Institute Phone: (202) 508-5098 Fax: (202) 508-5600 Fax: (202) 508-5445

Hello Vince, Nie bardzo wiem czy pisac po polsku czy po angielsku :) Co u Ciebie slychac ? U mnie troche zmian jak ze juz nie pracuje w SCEM , a przenioslem sie do MIECO ( a small Marubeni backed energy-america trading company ) . Bardzo rozne od SCEM. Najbardziej przypomina mi SCEM na poczatku z Joe, jak bylo 20-30 osob. Sa i minusy i plusy. Troche structure i research ale przede wszystkim weather. TRrovhe latam miedzy East i West bo sa officys w obydwu miejscach. California jest ok w zimie :). Na bardziej personalnym froncie; pamietasz dinner na ktory poszlismy kiedys na konferencji w NY z Catherine ( she used to work for Williams- works for Morgan Stanley now ) , we are dating ( for a while ) . It is a good story how we met. So we owe you dinner :) Jak bylem w Atlancie to pracowala dla mnie Christa Grey. Bedzie teraz konczyła grad school in international relations ( with Eastern European slant ), i zastanawia sie czy sa jakies mozliwosci polaczenia tego co robila ze "Wschodem". Co robila to bylo przede wszystkim VB implementations modeli , ( roznego rodzaju ) , Web based data collections, basic research , teraz jest w gas structuring etc. She speaks russian and was in Ukraine/Poland few times on Peace Corp assingments. She is very bright and dedicated. Myslam zeby ja zwabic do Californii ale ten Eastern European pociag jest u niej silniejszy niz u mnie :) . I have here resume, wiec jak bys myslal ze jest jakis fit I will foreward it to you. Troche tak mieszanica pisze, przepraszam Bede chyba w Houston w pazdzierniku to moze bysmy sie mogli spotkac. Latwiej pewnie by bylo w NY ( mieszkam po NJ stronie ( rent jest inny niz w Atlancie :) (201) 222-0435), wiec daj mi znac jakbys mial czas i ochote. Thanks Roman

Recipients	[j.kaminski@enron.com]
File	kaminski-v/deleted_items/588.

Learn about the day-to-day operational and risk management techniques to protect your electric assets.....  
Presented by:[IMAGE] CBI's Safety and Security in the Electric Power Industry March 25-26, 2002 \* Renaissance Houston Hotel \* Houston, TX

www.cbinet.com/events/PB231/index.html Request a Brochure Register Now Download PDF Register by January 25th and SAVE \$400! Please mention your priority code PB231EM. Electric infrastructure is vulnerable to disruption, however, until recently the idea of national infrastructure security was not meaningful to bottom-line focused executives in the power industry. The threat and scope of malicious and purposeful disruption today is much greater than that of natural disasters. Power companies will have to revise their day-to-day business procedures including risk management, operations, security and finance, as after all, there is no substitute for electricity. This conference will give senior executives throughout the electric power industry the chance to educate and inform themselves on these topics of national importance. A Faculty of international experts in the field of energy risk management and security will share their on-depth knowledge and experience with conference attendees. Attend CBI's Safety and Security in the Electric Power Industry conference on March 25-26, 2002 and arm yourself with the means to:

Create Intelligent, Self Healing Infrastructures- Minimize threats to the power systems Implement Response and Reconstitution Plans for Power Networks- Understand the importance of interdependencies between market participants Confront the Most Critical Risks- Develop technology and training to address acute risk-related vulnerabilities Increase Insurance Coverage Against Terrorism- Understand insurer's views on self-insurance, reinsurance and captives as well as the latest federal programs Assess Health and Safety Practices- Identify unique internal and external security risks at all facilities Protect Your Critical Data and Systems for Cyberterrorism- Ensure you are "Always-On"

Hear about the Security Measures that Industry Leaders are Adopting:

UtiliCorp United- Innovative corporate security risk management in a full-service energy company PEPCO- Latest developments in physical security practices at a major urban utility Rochester Gas & Electric- Changes in HR policy as a result of increased security \*\*\*\*\*Plus!\*\*\*\*\* The Federal Bureau of Investigation How Houston's National Infrastructure Protection Center Benefits the Local Energy Community

Also! Choose From 2 Pre-Conference Workshopson Monday, March 25, 2002: Workshop A- Electronic System and Data Protection Measures for Power Companies Workshop B- Anticipate The Worst Case Scenario- Prevent and Prepare for Potential Terrorist Attacks on Utilities If you are interested in sponsorship & exhibit opportunities, please contact Ron Moreau by phone 781-939-2419; by fax 781-939-2495; or E-mail [r.moreau@cbinet.com](mailto:r.moreau@cbinet.com) For more information or to register, please call 800-817-8601, by fax at 781-939-2495; visit us online , or email [cbireg@cbinet.com](mailto:cbireg@cbinet.com)

Steve,

Please, let me know when you come back.

I have detected a tendency to implement different approaches to valuation in the past.

To some extent, it reflects the absence of formal rules for sign-off on the valuation techniques which, in turn, reflects, the turf wars and the desire by the originators to control the outcomes.

Vince

cc:

Subject: Valuation

Vince,

I'd like an opportunity to talk to you about valuation.

I'm hearing confusing messages about the way that the UK IT team and the UK traders get their Valuation code apparently signed off by Research, while here... You provide it for our guys to wrap up.

We have now a situation where the UK team are using a home grown Valuation piece called DOVE, where results differ from those of the equivalent USA portcalc.

I need to break through the pride barriers and the "not built here" syndrome, and try to do the right thing, but I don't beleive I can do that without you guidance.

I'm scared that if we diverge too much we will never work globally on these systems.

Steve

### ALLIANCE FERC BEAT: Generators/ Power Marketers FERC Meeting Agenda

Sender	alliance@eei.org
Recipients	['carriere@uunet.uu.net', 'forbes@uunet.uu.net', 'alliance_info@listserver.eei.org', 'chrisfr@eei.org', 'jayc...
File	kaminski-v/deleted_items/666.

[IMAGE] Generators/ Power Marketers FERC Meeting Agenda Memo for January 16, 2002 Introduction The Commission has set a very light agenda for its first public meeting of 2002. At next week's meeting, the Commission will address only 20 electric items, in comparison to its last meeting in which it addressed over 70. Although a very short agenda, FERC has chosen to address some very long-standing contentious issues, e.g. FERC's jurisdictional authority to order public power and governmental entities to provide transmission service to FERC-jurisdictional entities, phantom congestion in California, remaining issues of contention over the ISO NE's installed capacity program, issues contributing to the inadequacy of generation and transmission infrastructure in the Northeast, and tets of FERC's authority to waive certain limitations of PURPA to re-certify a Qualifying Facility.

Commission Agenda: <http://www.ferc.gov/public/isd/sunshine.htm> Infrastructure Issues E-1 Infrastructure Discussion in the Northeast AD-02-6 - Commission discussion on topics to be addressed at FERC's upcoming January 31, 2002 conference in New York City on "Energy Infrastructure Adequacy in the Northeast".

OATT Disputes E-12 Souhwest Power Pool, Inc. ER99-4392-001 - Order on several requests for rehearing of the Commission's 12/17/99 order which directed SPP to make several modifications to its OATT. In addition, another set of filers seek guidance of how to recover costs for generator and transmission maintenance costs resulting from SPP rescheduling planned maintenance outages.

PURPA Challenges E-5 American Ref-Fuel Company of Delaware Valley, L.P. QF87-492-003 - Order on American Ref-Fuel's request for re-certification of its qualifying waste-fired power production facility . This proceeding has been protested by a group that calls itself, the PURPA Reform Group. It contends that FERC does not have the authority to change the Public Utility Regulatory Policy Act ( PURPA) policies on a case-by-case basis and, in this case, grant the petitioner waiver of PURPA 's 80 MW limitation. FERC and the applicant did, however, receive congressional and industry support for this petition.

Rehearing Requests E-20 Morgan Stanley Capital Group, Inc. v. California Independent System Operator EL01-89-001 - Order on CA ISO's request for rehearing of the Commission's Sept. 28, 2001 order, which established settlement procedures to resolve complaints of the CA ISO's continued problems with "phantom congestion." E-19 ISO New England, Inc. EL00-62-037 - Order on several requests for rehearing of FERC's September 28, 2001 order, which attempted to resolve outstanding issues with implementation of the ISO-NE's Installed Capacity program.

FERC Authority E-11 Public Service Co. of Colorado TX98-2-000 - Order on Public Service's dated request that FERC order Western Area Power Administration and several G&T cooperatives to provide it transmission service, pursuant to Section 211 of the Federal Power Act.

E-9 Pinnacle West Capital Corporation TX02-1-000 - Order on Pinnacle West's request that FERC order an Arizona Electrical District to provide it transmission service, pursuant to Section 211 of the Federal Power Act. If you would like copies of any orders, please do not hesitate to contact us. ### CBI's Safety and Security in the Electric Power Industry

Sender	<a href="mailto:cbi_mail@igate.cbinet.com">cbi_mail@igate.cbinet.com</a>
Recipients	[ <a href="mailto:j.kaminski@enron.com">j.kaminski@enron.com</a> ]
File	<a href="#">kaminski-v/deleted_items/246.</a>

The "Attack on America" on September 11th and subsequent developments have necessitated a quantum shift in Safety and Security in the Electric Power Industry. The treat and scope of malicious and purposeful sabotage today is much greater than that of natural disasters. The Center for Business Intelligence has developed the "Safety and Security in the Electric Power Industry" conference. Power industry executives will examine the impact of heightened security measures on their companies' day-to-day operations. Crucial factors that will be discussed include strengthening data security and protecting against cybercrime, planning and creating inherently resilient infrastructures and assisting policymakers in developing adequate legislation to safeguard the nation's energy supply and distribution. CBI's Safety and Security in the Electric Power Industry March 25-26, 2002 \* Renaissance Houston Hotel \* Houston, TX

[www.cbinet.com/events/PB231/index.html](http://www.cbinet.com/events/PB231/index.html) Request a Brochure Register Now Download PDF Register by February 1st and SAVE \$300! Please mention your priority code PB231EM. This conference will give senior executives throughout the electric power industry the chance to educate and inform themselves on these topics of national importance. A Faculty of international experts in the field of energy risk management and security will share their on-depth knowledge and experience with conference attendees. \*\*\*\*\*Special Keynote Address\*\*\*\*\* Ongoing Legislation to Protect the Electric Power Industry Representative Jeff Morris, Washington State Legislature and Chair of the House Telecommunications, Technology and Energy Committee

Benefit from the Experience of Top Security Experts: Associated Corporate Consultants, Inc. \* Blackburn Group \* Deloitte & Touche LLP \* Dynegy \* Electric Power Research Institute \* EnergyOnline \* FBI \* Goldberg, Kohn, Bell, Black, Rosenbloom & Moritz \* J.P. Morgan \* LCG Consulting \* National Association of Regulated Utility Commissioners \* National Regulatory Research Institute \* PEPCO \* Powerscourt Ltd. \* Rochester Gas & Electric Corporation \* Sanctum \* Scalingi Group \* Stone & Webster \* UtiliCorp United, Inc. \* San Diego Gas & Electric \* Exelon Nuclear

Attend CBI's Safety and Security in the Electric Power Industry conference on March 25-26, 2002 and arm yourself with the means to:

Confronting Financial Risks- Develop technology and training to address acute vulnerabilities Financial Investment in Security Policies- Its impact on different transmission business models Intelligent, Self-Healing Infrastructure- Minimize threats to the power system Plan for Worst Case Scenarios- Conduct network vulnerability analyses Protect Your Critical Data and Systems for Cyberterrorism- Ensure you are "Always-On" Reinsurance for Terrorism- Latest U.S. federal government programs and assistance Response and Reconstitution- Plans for Power Networks- Understand the importance of interdependencies between market participants

Hear about the Security Measures that Industry Leaders are Adopting:

UtiliCorp- Best practice in corporate security risk management in a full-service energy company PEPCO- Latest developments in physical security practices at a major urban utility Federal- Bureau of Investigation- energy industry impacts of Houston's National Infrastructure Protection Center

Also! Choose From 2 Pre-Conference Workshopson Monday, March 25, 2002: Workshop A- Electronic System and Data Protection Measures for Power Companies Workshop B- Anticipate The Worst Case Scenario- Prevent and Prepare for Potential Terrorist Attacks on Utilities If you are interested in sponsorship & exhibit opportunities, please contact Ron Moreau by phone 781-939-2419; by fax 781-939-2495; or E-mail r.moreau@cbinet.com For more information or to register, please call 800-817-8601, by fax at 781-939-2495; visit us online , or email cbireg@cbinet.com

Richard Causey@ENRON 08/09/2000 10:30 AM To: Amy Oberg/HOU/EES@EES cc: Subject: Re: Conversation w/ Andersen

I am in the process of setting up a conference call with my contact here as well as Victor Burke. Preliminary indications are they have not finalized their objectives yet but I will discuss that further with them. I would still strongly suggest rescheduling until everyone can attend and we can fully discuss our involvement.

To: Richard Causey/Corp/Enron@ENRON cc:

Subject: Conversation w/ Andersen

Rick: Quick follow up - any response yet from your contacts at Andersen? We are holding off cancelling the Thurs meeting w/ hope they will get back to you by EOB Wednesday. Pls let me know what the status is. Thanks and regards, Amy Oberg

Richard Causey@ENRON 08/07/2000 09:07 AM To: Amy Oberg/HOU/EES@EES cc: Subject: Re: MIT/AA New Value Research Lab

I have discussed with AA and they are following up. If I am the agenda, I would cancel the meeting and when I hear from AA, I will e mail everyone. I would suggest we not hold a meeting until Kean, Buy , Koenig and I can all come so that we can truly move forward (or decide not to). Let me know what you decide. Thanks. Rick

To: Richard Causey/Corp/Enron@ENRON cc:

Subject: MIT/AA New Value Research Lab

Rick: just wanted to highlight that you ARE the agenda for this meeting (see initial notice, agenda). Let me know if there's anything I can do for you. Amy

## Re: MIT/AA Lab- next meeting

Sender	vince.kaminski@enron.com
Recipients	['amy.oberg@enron.com', 'vince.kaminski@enron.com']
File	kaminski-v/sent/2240.

Amy,

I think that Rick Causey wants simply to obtain more information to make a reasonable decision.

We should cancel the meeting for the time being and let Rick obtain clarification of some issues from AA. I would agree that AA came up with a rather vague concept of what they want to accomplish.

Vince

To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: MIT/AA Lab- next meeting

Vince: Can you shed any light on this? I'm confused (really confused).... Do you think this means the decision to go ahead/not is going to be made only by Kean, Buy and Koenig? And Do you think this means that we shouldn't meet on Thurs? Personally, I think Enron really needs to meet on Thurs to buckle down and start developing some idea of needs/wants with regard to the outcomes of the Lab. From a practical perspective, if we can't get what we want from this

whole thing, Rick's issue of "where AA is going with this" is really a mute point, isn't it? So a working meeting might really be worth the effort. Would appreciate your insight and advice. Thanks. Amy

Subject: PLEASE READ!! What to do if your wallet is stolen

This has good information - note the phone nos. at the bottom.

> > > > > WHAT TO DO IF YOU LOSE YOUR PURSE OR WALLET: > > >

We've all heard horror stories about fraud that's committed using your name, address, SSN#, credit, etc. Unfortunately I (author of this piece) have firsthand knowledge, because my wallet was stolen last month and

within a week the thief(s) ordered an expensive monthly cell phone package,

applied for a VISA credit card, had a credit line approved to buy a Gateway computer, received a PIN number from DMV to change

my driving record information online, and more.

> > >

But here's some critical information to limit the damage in case this happens to you or someone you know. As everyone always advises, cancel your credit cards immediately, but the key is having the toll free numbers and your card numbers handy so you know who to call. Keep those where you can find them easily (having to hunt for them is additional stress you WON'T need at that point!).

> >

File a police report immediately in the jurisdiction where it was stolen, this proves to credit providers you were diligent, and is a first step toward an investigation (if there ever is one).

> > >

But here's what is perhaps most important: I never ever thought to do this. Call the three national credit reporting organizations immediately to place a fraud alert on your name and SSN#. I had never heard of doing that until advised by a bank that called to tell me an application for credit was made over the Internet in my name. The alert means any company that checks your credit knows your information was stolen and they have to contact you by phone to authorize new credit.

> > >

By the time I was advised to do this - almost 2 weeks after the theft all the damage had been done (there are records of all the credit checks initiated by the thieves' purchases, none of which I knew about before placing the alert). Since then, no additional damage has been done, and the thieves threw my wallet away this weekend (someone turned it in). It

seems to have stopped them in their tracks.

> > >

The numbers are: Equifax 1-800 525-6285 Experian (formerly TRW) 1-800-301-7195 Trans Union 1-800-680-7289 Social Security Administration also has a fraud line 1-800-269-0271

> > >

We pass along jokes, we pass along just about everything... do think about passing this information along... it could help someone else

#### FW: GARP NY - Minutes of the Credit Derivatives Meeting - December

Sender	garpony1@home.com
Recipients	['don@axiomsl.com', 'vkamins@enron.com']
File	kaminski-v/credit/59.

Vince

I will make sure you get on this distribution list.

Credit is going to be a big issue for energy companies and banks.

We may need to form additional discussion groups.

Volatility in energy prices and a general economic slowdown may cause an increase in defaults.

Banks are primarily interested in regulatory impact on loan portfolio and credit derivatives as a an alternative to raising capital or selling assets.

Energy companies could use credit derivatives to hedge or price credit exposure.

Don Mumma(ex CSFB, MD Axiom Software)is organizing a survey of energy credit practices. You can reach Don at 212-248-4188 ext 22.

Regards,

Philip Merrill GARP Regional Director for New York 973-258-1540

Dear members of the credit derivatives group.

You've probably been wondering if I would ever get the minutes of last weeks meeting out. Well, here they are and I sincerely apologize for the delay. I always thought this time of year is supposed to be slow, but unfortunately, the opposite has been the case.

Please pay particular attention to the action points. We can only handle these meetings successfully if each and everyone of you actively participates and plays a role! The next meeting can only be scheduled if there is enough feedback available.

Wishing you happy holidays,

Regards,

Jeannette

Fax: +1 (212) 743 2562

Minutes of the GARP NY Credit Derivatives Meeting - December 13,2000

The meeting was generously hosted by WestLB

Attendees: Matthew Bianco Claudia Cappelli Joe Carrozzo Jeannette Gerber Tom Mansley Philip Merrill Joe Pimbley Marian Trano-Lepisto

(due to some technical problems, not all attendees received the invitations on time.)

Summary The aim of this first meeting was to decide on topics, people involvement and the format of future meetings.

Topics The following topics were discussed for discussion in future meetings: \* New models and structures available \* practical work issues \* credit risk policy \* ISDA issues / documentation \* regulatory issues / BIS capital \* hedging issues (e.g. embedded options, rollover, funded vs unfunded, etc.) \* electronic trading issues \* general technology issues and information on new systems available \* pricing differentials \* pricing sources \* current models used for pricing, VaR \* credit event monitoring \* counterparty suitability

Action: all members to check with credit derivatives colleagues within their organization to go over the list and complete.

Action: all members to pick topics they could lead through (or they could organize someone to lead through).

People Involved The involvement will depend on the topic. A member of the group will lead through a meeting, or organize a credit derivative professional to lead through the meeting, depending on the topic.

Meeting Format We expect a series of evening workshops to take place about every 6 weeks. In order to get active discussions going, all participants are expected to inquire within their own institutions as to how the particular subject under discussion is being treated in-house. We feel that the meetings will only be successful if all participants are actively involved in the process.

We expect most members to be able to host the meeting once a year. Please let me know if and when you could host a meeting.

Action: all members to check if and when they can host a meeting.

The date and venue for the next meeting will be announced in early January, depending on your feedback on the topics.

#### GENERATOR/POWER MARKETING FERC Agenda Memo for October 24, 2001

Introduction RTO Week shedded a new light on the pace and direction that the Commission may go in with respect to RTO development. During discussions with the state commission representatives on Thursday, Chairman Wood said with regards to the hard and fast number of RTOs he desired, "the number 4 is officially gone.. if it ever was essentially here." Chairman Wood was very receptive to the recommendations and pleas of the state commissioners and declared that the FERC would take as much time as it needed and that it was "committed to getting the right outcome." With that being said, 5 of the RTO-related proceedings on the agenda for next week's FERC meeting will probably result in extensive discussions encapsulating this week's RTO Week developments and a retreat from a prescriptive order or rulemaking issuing at this time.

Commission Agenda: <http://www.ferc.fed.us/PUBLIC/ISD/Sunshine.htm>

If you would like copies of any orders, please do not hesitate to contact us. Below are individual case descriptions.

In addition, the Commission will discuss four new "Administrative" issues: A-4 AD02-4 Reliability, Security and Market Operations A-2 AD02-2 Legislative Matters A-3 AD02-3 Customer Matters A-1 AD02-1 Agency Administrative Matters

#### RTO Developments

E-1 Discussion of RTO Developments in the Northeast EX02-1-000; RT01-99 PJM; RT01-98 PJM-West; New York ISO RT01-95; Commission discussion on the FERC's ALJ Northeast RTO Mediation Report and comments filed by industry.

E-2 Discussion of RTO Developments in the Southeast EX02-2; RT01-100 Gridsouth; RT01-34 Southwest Power Pool; RT01-75 Entergy Services; RT01-77 Southern Company Services - Commission discussion on the FERC's ALJ Southeast

RTO Mediation Report and comments filed by industry.

E-3 Discussion of RTO Developments In the Midwest EX02-3; RT01-87 Midwest ISO/Alliance; EL01-80 National Grid USA - Commission discussion on RTO developments in the Midwest region. At the last Commission meeting, FERC gave the Midwest ISO a big boost toward the RTO finish line. The discussions with state commissions at this week's RTO week conference may slow down FERC's efforts in mandating RTO structure in the Midwest also.

E-4 Discussion of Western Infrastructure Adequacy Conference AD01-2 - Commission discussion on FERC's agenda and scope of the "Adequacy of Western Infrastructure" conference announced at the September 26 Commission meeting and to be held during the Western Governor's Association's meeting on November 2 in Seattle, WA.

E-5 Electricity Market Design and Structure RM01-12 - Commission action in response to RTO Week developments and comments filed in the "Electricity Market Design Structure" docket.

Market Complaints E-19 San Diego Gas & Electric Co. v. Sellers of Energy EL00-95-034; EL00-98-038 - Order on the CA ISO's compliance filing proposing a new generator outage and maintenance coordination plan. Dynegy and other protesters allege that the CA ISO is attempting to circumvent FERC and "seize control of the outage monitoring" function that is currently FERC's responsibility and role.

E-21 PacifiCorp Power Marketing ER01-2685-000 - Order on PacifiCorp Power Marketing's request to withdraw its filing of a 10-year power Purchasing Agreement contract with the California Department of Water Resources. Attempting to comply with a Commission order in the Southern Case rescinding waiver and requiring that all long-term power contracts be filed with the Commission in place of submitting quarterly power marketing reports, PacifiCorp filed its long-term contract and later realized that the waiver was still in effect at the time it made the power contract filing. As a result, PacifiCorp filed to withdraw its earlier contract filing. The California Public Utilities Commission filed protest to the withdrawal.

E-26 Mirant et al. v. ISO New England, Inc. EL01-93-001 - Order on NSTAR's request for rehearing of the Commission's 8/10/01 order upholding the ISO NE's market rules, which include Market Rule No. 17 affording the ISO NE discretion to negotiate mitigation agreements and enter into market power mitigation contracts with generators. In response to the rehearing request, the ISO NE filed for clarification of this exemption to file mitigation agreements with the FERC, under its discretion granted per the approved market rules.

E-30 Calpine Eastern Corp., Mirant et al. v. ISO New England EL01-124-000 - Order on Calpine's complaint against the ISO NE for excluding external energy contracts from its calculation of the energy clearing price for the ISO's market.

Dear Mr Kamins

I am delighted that you would like to speak at the forthcoming "Real Options" conference. Would your company be covering travel and hotel expenses? If not I would need to get internal sign off to cover any expenses you would have. Please can you tell me either way so that I can make the requisite inquiries if required.

The speakers at the conference have provided me with between 5-8 bullet points for their talks. Could you email me a few ideas with regard to the content of the talk and I will email back my ideas. I have attached one of the talks at the conference to give you an idea of the style of the talks which have already been included.

I look forward to speaking with you later this afternoon.

Kind regards

Julia Shaw Conference Producer Tel:44 171 915 5650 Fax:44 171 915 5001 Email:jshaw@iir-conferences.com

"Vince J Kaminski" <vkamins@ect.enron.com> 09/27/99 07:05pm >>>

Dear Ms. Shaw,

I have just returned from London. One of the points on my agenda was an internal seminar on the topic of real options my group offered to the Enron unit in London. Real options is a valuation technology I have been promoting internally for quite a long time.

I shall be glad to speak at your conference. Proposed topic: "Real Options and Valuation of Fixed Assets in the Energy Industry".

Please, let me know if this of interest to you.

Vince Kaminski

Julia Shaw <JSHAW@IIRLTD.CO.UK> on 09/24/99 06:13:07 AM

To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: Real Options Conference Monday 21st & Tuesday 22nd February 2000

Dear Mr Kaminski,

I was given your name by Ann Wagoner and I believe that you area speaking at her conference on Real Options. I work in the London office of IIR and am putting on a similar conference. Your company has been mentioned by a wide variety of people who I have spoken with about real options. A number of people have mentioned that your company is regarded very much as a market leader.

I would like to discover if a representative from ENRON might be interested in speaking at the conference. I have attached the draft programme with agreed speakers to date. The conference is by no means set in stone and if a speaker from ENRON decided to become involved I would ensure that you were given a good speaking slot in the conference and would have editorial control over the talk.

I very much hope that ENRON will become involved with the conference and I look forward to speaking with you today or next week about the prospect.

Kind regards

Julia Shaw Conference Producer Tel 44 171 915 5650 Fax 44 171 915 5001 Email:jshaw@iirltd.co.uk

#### ALLIANCE FERC ALERT: FERC Issues Letter to State Commissions on

Sender	alliance@eei.org
Recipients	['cforbes@eei.org', 'alliance_info@listserver.eei.org', 'ddworzak@eei.org', 'bnixon@eei.org', 'bhindin@eei.org...
File	kaminski-v/deleted_items/1089.

FERC issued a letter to the Northeast State Commissioners requesting their views on several questions before the Commission on RTO formation. FERC presented 11 questions for the Northeast states to address and respond back by January 18, 2002. FERC will also initiate in mid-January a conference call with the state commissions to discuss what will be in the written comments.

From the questions posed, it appears that FERC has not decided some very critical questions about RTOs in the Northeast, i.e. scope and configuration, market interface, role of reliability, and market monitoring. FERC is honoring the commitment it made in its November order vowing to work with the state commissions and incorporate their concerns and views.

Attached is the letter.

VInce:

Long time no talk. Things are going pretty well with the new business not so well with my marriage, but the kids are very good. Anyway, I was wondering if you being the consummate researcher that you are might be able to get hold of a copy

of the May, June, July (or around there) 1996 Power Risk magazine that had the article about me going to Southern. It will be useful for me in my litigation. Hope all is well with you and yours especially for Vincent now that he's left school. Do you ever get to Atlanta? I may be coming to Houston for a short assignment and will look you up if I do. Take care.

### Latest Draft of Pro Forma Interconnection Agreement for Conf.

Sender	alliance@eei.org
Recipients	['alliance_info@listserver.eei.org']
File	kaminski-v/inbox/79.

The attached is the latest draft of the pro forma interconnection agreement being prepared as part of the FERC ANOPR process. This draft has been prepared by the Alliance of Energy Suppliers (AES) as part of its continuing effort to take a leadership role in this process and ensure an outcome that will be beneficial for the interests of AES member companies and the generator community as a whole. It will be referenced on today's conference call.

This draft is the working draft the coalition is working from this week. A final "consensus" version will be circulated and filed at FERC on or by January 11, 2002.

If you need any additional information, please do not hesitate to contact us. Call in number: (800) 860-2442. Call Name: Alliance Interconnection Call Date: Monday, Jan. 7 at 1PM (EST)

#### ALLIANCE FERC ALERT: FERC Issues Notice Staying Effects of

Sender	<a href="mailto:alliance@eei.org">alliance@eei.org</a>
Recipients	[' <a href="mailto:alliance_info@listserver.eei.org">alliance_info@listserver.eei.org</a> ']
File	<a href="#">kaminski-v/deleted_items/930.</a>

Attached is the notice issued by FERC which acknowledges the Alliance of Energy Suppliers' filing requesting FERC to stay the effects of the Section 206 proceeding on market power and delay applying certain aspects of FERC's new Supply Margin Assessment (SMA) screen to test for market power. This is a major victory for the Generator and Power Marketing community...

In addition, FERC announces an upcoming technical conference to allow industry to weigh in on the discussion and provide FERC with an operation's perspective and illustrate possible ramifications of such extreme measures as the ones FERC proposed in its November 20 order.

Also of note, FERC directed transmission providers, who perform studies pursuant to a request for interconnection, to treat unaffiliated entities, at their request, as competing network resources in meeting load and load growth and to post optimum areas (from a transmission perspective) on their systems for locating prospective generation.

Notice attached

File	<a href="#">kaminski-v/deleted_items/23.</a>

Attached is a draft version of the Alliance of Energy Suppliers' comments on the Generator Interconnection ANOPR and industry collaborative process. Please provide comments, suggested edits or inclusions by COB Wednesday to both Jonathan Gottlieb at [jonathan.w.gottlieb@bakernet.com](mailto:jonathan.w.gottlieb@bakernet.com) and myself.

Again, we thank all that participated on the drafting conference call and provided valuable input. We have incorporated those issues and concerns in this draft. As you will notice in the draft, we applauded the Commission for its efforts in coordinating the industry collaborative and the positive results the process yielded. We then addressed several components of both the Interconnection Agreement and Procedures documents that generators are pleased with and those inclusions in the final collaborative documents that we believe do not go far enough. Finally, we stated that the support for these documents are contingent upon the continued use of the cost principles and pricing assumptions in Attachment B of the ANOPR, which the Commission directed industry to work from.

Thank you, Tonja Wicks

Hi Vince,

I am writing you at this time to inquire as to the potential of renewing my internship at Enron for the Summer of 2000.

While the date of my request is later than I would have wished, the reason is that I had originally planned to go back to Turkey this summer and get my mandatory military duty done. However, I now realize I can put it off to a further date. That left me wondering if you believe there is a project that I can get involved in this summer and be useful. If that were the case, I would be more than happy to postpone my military duty and spend the summer with the research group. I discussed this with Dr. Ronn, and he is very supportive of this idea.

I apologize again for bringing up this issue late, and look forward to hearing from you.

## Enterprise-wide Risk Management

**Sender** ravi.thuraisingham@enron.com**Recipients** ['j.kaminski@enron.com']**File** kaminski-v/inbox/410.

Vince, I was just thinking about the subject project that you were trying to get off the ground (even though no commercial support existed!) that I worked on initially. I know you were trying to get this done before I arrived and then followed my effort with at least one other person. I think the reason we could not complete a comprehensive project was we did not have the mandate from the CEO office to do it so that relevant commercial and functional entities can provide the required information.

Perhaps the reason there were no major thrust from the management was that most people knew the answer was going to be less than desirable. However, such information would have correctly priced the risk (to the shareholder not its agents--the management) so that we could have better managed the \$20 Billion or so company specific (taking systemic market down turn, including telecom exposure, out) market value that perished.

Great intuition on your part in trying to get such a risk measurement tool implemented. I wonder if you were able to advance that project and I now wonder if Greg Whaley would be interested sponsoring it from his office. I would love to be the 'commercial' lead interfacing with you to get such a project done now since it may help us with relevant (risk worthy) disclosure.

Regards,

Ravi Thuraisingham, CFA Director, Storage Trading Enron Broadband Services p 713.853.3057 c 713.516.5440 pg 877.680.4806 ravi.thuraisingham@enron.com

#### WNP-Crucial Testing & Implementation Issues seminar-June 25th, D.C.

Sender	news-from-iir@iirny.rs88.net
Recipients	['kamins@enron.com']
File	kaminski-v/deleted_items/1437.

Dear Colleague, In response to the astounding number of inquiries I have received in the past several weeks, I am pleased to confirm IIR's seminar on Monday, June 25th in Washington, D.C. WNP, Crucial Testing & Implementation Issues This one-day WNP seminar will begin with a brief breakfast overview of WNP for those who would like to be brought up to speed, followed by four in-depth interactive workshops presenting solutions to your specific NPAC testing, Inter-carrier testing and WNP implementation challenges. To wrap up the seminar, we have organized a special cocktail reception where you will be able to network with your colleagues and pursue issues tackled during the day in a more informal environment. IIR is aware that, while you have a pressing need for WNP information, you must also keep T&E expenditures at a minimum. To assist you in this regard, IIR is pleased to offer a special discounted rate of \$995 if your registration is received by June 08, 2001! Space has already begun to fill up for this seminar, so please book early to ensure that your place is reserved. Program agenda Register Phone 888-670-8200 or fax 941-365-2507 your registration

today! Discount Keycode: N0542XXEM1 I look forward to seeing you next month in D.C! Best regards,

Eva Bender Producer IIR Telecoms & Technology Phone: 212-661-3500 ext. 3089 Email: ebender@iirny.com

### Electricity price volatility

Sender	vince.kaminski@enron.com
Recipients	['shirley.crenshaw@enron.com', 'scarlson@compusmart.ab.ca', 'vince.kaminski@enron.com']
File	kaminski-v/all_documents/1654.

Shirley,

Please send Mr. Carlson a reprint of the paper on the power mkts.

Vince ----- Forwarded by Vince J Kaminski/HOU/ECT on 02/02/2001 01:59 PM -----

Sid Carlson <scarlson@compusmart.ab.ca> on 02/02/2001 12:10:47 PM To: vince.j.kaminski@enron.com cc: Subject: Electricity price volatility

Dear Dr. Kaminski, I'm an economist (M.Sc., Caltech, Ph.D., Iowa) who has been working for the Alberta government for the last seven years on electricity deregulation in Alberta, Canada. I have been looking for research papers on the measurement and causes of price volatility in electricity markets.

As a policy maker, I am interested in the implications of government policy decisions on price volatility. As an economist who has had a hand in designing the electricity markets here, I am also interested in how the design of electricity markets and the associated institutions affect price volatility.

I've found two references to a seminar talk you have given recently at Berkeley and Carnegie Mellon called "Volatility of Electricity Prices - Measurement and Analysis of Underlying Causes." (I've also found a multitude of references to other work that you've done, but this seemed closest to what I'm looking for.)

Was there a paper associated with your talk that I could get a copy of? Any help you can give me on finding information on this topic would be greatly appreciated.

Thank you for your time.

Sincerely,

Sid Carlson

Sid Carlson, M.Sc., Ph.D. Senior Economist, Electricity Branch Alberta Department of Resource Development

Cantekin,

The summer associate program has closed but I shall check to see if I can get one extra place.

Vince

"Cantekin Dincerler" <cantekin@mail.utexas.edu> on 03/28/2000 11:48:53 AM Please respond to cantekin@mail.utexas.edu To: vkamins@ect.enron.com cc: (bcc: Vince J Kaminski/HOU/ECT) Subject: summer internship

Hi Vince,

I am writing you at this time to inquire as to the potential of renewing my internship at Enron for the Summer of 2000.

While the date of my request is later than I would have wished, the reason is that I had originally planned to go back to Turkey this summer and get my mandatory military duty done. However, I now realize I can put it off to a further date. That left me wondering if you believe there is a project that I can get involved in this summer and be useful. If that were the case, I would be more than happy to postpone my military duty and spend the summer with the research group. I discussed this with Dr. Ronn, and he is very supportive of this idea.

I apologize again for bringing up this issue late, and look forward to hearing from you.

Best regards,

<b>File</b>	kaminski-v/all_documents/9900.

Dear All,

I would like to make myself available for some meetings at the Oslo office during my visit on Friday pm, Monday and Tuesday. I believe Bjarne will be available on Tuesday, if not Monday, and so would like to arrange the Trading and Origination meetings for Tuesday (so that he can attend) and maybe go through the EnergyDesk issues on Monday. I will also give a presentation, probably on Monday.

TRADING: OPTIONS & VOLATILITY CURVES It would be useful to meet with the traders along with Bjarne's team to help us improve our understanding of the valuation/hedging issues encountered in trading options (both European and Asian). I hope to discuss the vol curves and will bring the example of the recent work done for the UK electricity desk where a monthly volatility curve generator and initial half-hourly forward volatility curve have been developed.

ORIGINATION: Any issues arising in complex deals (e.g. dry reservoir, user-time contracts) etc. perhaps with Didrik.

ENERGYDESK.COM To support the on-going effort to ensure the accuracy of the EnergyDesk.com systems, I hope to help James Stephen nail-down the reasons for some of the discrepancies between the EnergyDesk.com valuation and the Oslo book (for this I hope to meet with Trond).

EXOTIC OPTIONS: If everything runs smoothly, I plan to roll-out the new Asian model which should also help us in improving our electricity volatility curve.

I will be in the Oslo office from Friday afternoon, and available all day Monday and Tuesday. I will be staying at the Grand Hotel and probably contactable on my mobile: 07747 86813.

Look forward to meeting you soon!

Regards,

Anjam x35383

P.S. I will be contactable on my mobile for any urgent queries from London customers: 07747 868131, or reachable through Catherine/Maret (x2570)

#### Re: Mid-Year 2000 Performance Evaluation Due

Sender	vince.kaminski@enron.com
Recipients	['perfmgmt@enron.com']
File	kaminski-v/sent/4813.

I haven't received yet the final Performance Evaluation Results. The usual practice is to defer the reviews till the final summary rankings are available.

Please, let me know when I can expect it form the HR.

Thanks.

Vince Kaminski

"perfmgmt@enron.com"<perfmgmt on 08/10/2000 05:16:14 PM To: vkamins@enron.com cc: Subject: Mid-Year 2000 Performance Evaluation Due

Sep 01, 2000

THE ABOVE DATE IS WHEN THE MID-YEAR 2000 PERFORMANCE EVALUATION FORMS FOR DIRECTORS AND BELOW ARE DUE IN HUMAN RESOURCES.

If you have not already done so, supervisors should begin the process of giving feedback to their employees. The evaluation forms used to provide feedback to the employee can be obtained via the Performance Management System (PEP).

To download the evaluation forms from PEP, please follow the steps below:

1. Log into PEP at <http://pep.enron.com> . 2. Under Supervisor Services, click Supervisor Evaluation Forms. 3. Right-click on each employee and choose 'Save Target As...' or 'Save Link As...' 4. Select your own personal directory, choose a file name to save to and click 'Save'. 5. Repeat for each employee. 6. Now you can complete your evaluation forms from your personal directory and will not have to access PEP to finalize the form.

Upon completion, please forward the signed evaluation forms to your HR Representative NO LATER THAN Friday, September 1st 2000.

If you have any questions, please contact the PEP Help Desk at the following numbers:

In the U.S.: 1-713-853-4777, Option 4 In Europe: 44-207-783-4040, Option 4 In Canada: 1-403-974-6724 (Canada employees only)

Or e-mail your questions to: [perfmgmt@enron.com](mailto:perfmgmt@enron.com)

Your employees that should receive mid-year evaluations are listed below:

CRENSHAW, SHIRLEY J GANJOO, SHALESH GIBNER, PEYTON S KOLLAROS, ALEXIOS KRISHNARAO, PINNAMANENI V MASSON, GRANT S RAYMOND, MAUREEN J ROBERTS, MICHAEL A SERGEEV, MIKHAIL SHANBHOGUE, VASANT VERNON, CLAYTON J

#### TIME SENSITIVE: Executive Impact & Influence Program Survey

Sender	enron-admin@fsddatasvc.com
Recipients	[vkamins@enron.com]
File	kaminski-v/all_documents/3704.

\*\*\*REMINDER\*\*\*

We have not yet received your feedback. Your input is very valuable and to be included in the participant's summary report, it must be received NO LATER THAN CLOSE OF BUSINESS on Wednesday, October 25. Without your feedback, the participant may not receive a summary report or be eligible to attend the program.

---

\* IMMEDIATE ACTION REQUIRED - Do Not Delete \* Executive Impact & Influence Program

Dear Vince Kaminski,

As part of the Executive Impact and Influence Program, each participant is asked to gather input on the participant's own management styles and practices as experienced by their immediate manager, each direct report, and up to eight colleagues/peers.

You have been requested to provide feedback for a participant attending the next program. Your input (i.e., a Self assessment, if you are a participant in this program, Manager assessment, Direct Report assessment, or Colleague/Peer assessment) will be combined with the input of others and used by the program participant to develop an action plan to improve his/her management styles and practices. If you are providing feedback as a Manager of the participant, please note that your feedback will be identified in the summary report.

It is important that you complete this assessment NO LATER THAN CLOSE OF BUSINESS on Wednesday, October 25.

To begin the online administration process, you will need the following Internet address and Password(s). NOTE: If you are providing feedback for more than one person, each password and participant name is individually listed below.

Open your Internet browser e.g., Internet Explorer or Netscape Navigator, and please type or copy the URL address below into your Internet browser (please DO NOT go through Lotus Notes):

www.fsddatasvc.com/enron

PH9JBM (Mike Roberts)

If you experience technical problems, please call Dennis Ward at FSD Data Services, 713-942-8436. If you have any questions about this process, you may contact Debbie Nowak at Enron, 713-853-3304, or Christi Smith at Keilty, Goldsmith & Company, 858-450-2554.

Thank you for your participation.

To: "vkamins@enron.com" <vkamins@enron.com> cc: Subject: Houston visit

Dear Vince,

Greetings from NY & hope all is well. As you may recall from the ROG real options conference in NY, I'd indicated the opportunity to visit with you next time I'm in Houston. I'll be there during 4/18-4/21 & wonder if we can pls meet on Wed. 4/19 in your offices. Would appreciate it if you can pls let me know whether you're available then (I'm flexible on the schedule particulars). If not, pls let me know whether 4/18 (afternoon), 4/20 (afternoon), or 4/21 (morning) will work for you.

I really look forward to the opportunity & would appreciate to learn more about how you've instigated the real options thinking in Enron and especially its integration within the organizational & incentive matters.

Many thanks, Soussan Faiz Mgr. of Global Valuation Services Texaco Inc. (914) 253-4187

### Mid-Year 2000 Performance Feedback

**Sender** perfmgmt@enron.com

**Recipients** [vkamins@enron.com]

**File** kaminski-v/discussion\_threads/8145.

NOTE: YOU WILL RECEIVE THIS MESSAGE EACH TIME YOU ARE SELECTED AS A REVIEWER.

You have been selected to participate in the Mid-Year 2000 Performance Management process by providing meaningful feedback on specific employee(s) that have been identified for you. Your feedback plays an important role in the performance management process, and your participation is very critical to the success of Enron's Performance Management goals.

Please provide feedback on the employee(s) listed below by accessing the Performance Management System (PEP) and completing an online feedback form as described in the "Performance Management Quick Reference Guide". You may begin your feedback input immediately. Please have all feedback forms completed by the date noted below.

If you have any questions regarding PEP or your responsibility in the process, please call the PEP Help Desk at the following numbers:

In the U.S.: 1-713-853-4777, Option 4 In Europe: 44-207-783-4040, Option 4 In Canada: 1-403-974-6724 (Canada employees only)

Or e-mail your questions to: perfmgmt@enron.com

Thank you for your participation in this important process.

The following list of employees is a CUMULATIVE list of all feedback requests, by operating company, that have an "OPEN" feedback status. An employee's name will no longer appear once you have completed the feedback form and select the "SUBMIT" button in PEP.

Review Group: ENRON Feedback Due Date: Jun 16, 2000

### EMF 20 First Working Group Meeting

Sender	eleni@stanford.edu
Recipients	['hill@stanford.edu.huntington', 's.sweeney@forsythe.stanford.edu']
File	kaminski-v/deleted_items/790.

December 18, 2001 Dear EMF 20 Working Group Invitee: I hope you will be able to join us for the initial meeting of the EMF 20 working group on "Fuel Diversity, Natural Gas and North American Energy Markets" which will be held jointly with the James A. Baker III Institute for Public Policy in the Dor? Commons of Baker Hall, Rice University, Houston. The meeting will begin on Tuesday morning, January 22, at 9:00 a.m. and will conclude by 3:00 p.m. on Wednesday, January 23. A continental breakfast will be held both mornings in the Dor? Commons. I have enclosed a tentative agenda which will be updated in the next few weeks. EMF is holding a block of one-bedroom suites at the Hilton Houston Plaza Hotel for the nights of January 21 through January 23 at a special rate of \$119 single/ double plus tax. To receive the special rate you must identify yourself as a participant of the Stanford Energy Modeling Forum and use the city/ group codes: HOUMC EMF. To reserve a room you can contact the Hilton general number 1-800-445-8667 or contact the hotel directly by telephone at 713-313-4606, by fax at 713-313-4460 or by e-mail at [jennifermikail@hilton.com](mailto:jennifermikail@hilton.com) The Hilton Houston Plaza Hotel is located 10 miles from the William P. Hobby International Airport and further information on directions and transportation to the hotel is available on line at [www.houstonplaza.hilton.com](http://www.houstonplaza.hilton.com) Reservations must be made before Monday, January 7; after this date, reservations will be put on a space available basis and may not be at this rate. On

Tuesday evening a special dinner is being planned for all EMF20 working group attendees. Please return the enclosed reservation form to assist us in our planning. An informal reception will also be held at the Hilton on Monday evening between 8:00 and 10:00 p.m. Details will be e-mailed. I look forward to seeing you in January. In the interim, please do not hesitate to call me if you have questions or suggestions regarding our upcoming meeting. Sincerely Hillard G. Huntington (hillh@stanford.edu) Executive Director Attachments: Agenda Rice University Campus & Area Map Response Form

## NEWS: AURORA 5.2 Update

Sender	todd@epis.com
Recipients	[willtg@hotmail.com]
File	kaminski-v/all_documents/2554.

AURORA Version 5.2 -The fastest model just got faster-

EPIS Announces the release of AURORA, version 5.2

AURORA the electric market price forecasting tool is already legendary for power and speed. We've combined a powerful chronological dispatch model with the capability to simulate the market from 1 day to 25+ years. Add to that a Risk Analysis section, powered by user selectable Monte Carlo &/or Latin Hypercube modeling, enough Portfolio Analysis power to please the toughest critic, & inputs and outputs from standard EXCEL & ACCESS tables and you've got one of most powerful tools in the market.

Just a few months ago we expanded our emissions modeling capabilities, added our quarterly database update, increased the speed of the entire model, and made

But that wasn't enough.

We've done it again. Some of the operations that we've included... Two new reporting enhancements. The first is marginal reporting for fuels, resources and groups of resources. The second is the ability to display resource stack information in graphical and dispatch order form.

Other enhancements include dual fuel modeling, improved transmission modeling, greater access to hourly results, and the ability to model monthly emission rates. Moreover, the databases for Central and Eastern, Texas, and Western markets have been updated to use the new modeling capabilities.

We continue to make AURORA easier to use. This version enhances user control over modeling, editing inputs, and viewing of AURORA output. Clients desiring to exploit the power of AURORA now have greater control over the inputs and outputs through VB Scripting in AURORA. The new "update data" capability provides a means to universally change any data element.

Attached is more information on the fastest and most flexible tool of its kind.

For additional information, please visit our website ([www.epis.com](http://www.epis.com)) or contact our Sales Department at (503) 722-2023. Ask about our special 7-day demo!

Infocast <mail@infocastinc.com> on 01/19/2001 03:58:13 PM To: Vasant.Shanbhogue@enron.com cc: Subject: Congestion Pricing & Forecasting program

As an Infocast Preferred Customer, we would like to invite you to attend our highly acclaimed program, Congestion Pricing & Forecasting, scheduled for February 21-23, 2001 in Washington DC at a very Special Discount! Attend this program for only \$895.00 and the pre-conference workshop, Congestion Pricing Tutorial: From LMP to Flow-Based for only \$520.00. This is a 25% savings off the standard tuition! However, this special offer is only good through Friday, January 26, 2001 and seats are rapidly filling! Attached you will find a copy of this timely and informative Infocast program, or you can visit our website at [www.infocastinc.com](http://www.infocastinc.com).

Congestion Pricing & Forecasting has been designed to provide you with a clear understanding of how to predict the impacts of congestion and what mechanisms can be used to control these impacts. Experts will discuss:

? The most advanced techniques for forecasting transmission congestion, locational prices and FTR prices ? The latest approaches to the "seams" issues ? The pros and cons of implementing a flow-based congestion management system

Don't miss this excellent opportunity. But remember, this offer is only good until January 26, 2001 so please phone me at (818) 888-4444 ext. 20 or email me at [mail@infocastinc.com](mailto:mail@infocastinc.com) and mention this letter to be registered at this exceptional price. You can also fax or mail me your completed registration form along with this letter.

Best regards, Hiedy Vitug Preferred Customer Representative Infocast (818) 888-4444 ext. 20 Fax (818) 888-4440 Email: [mail@infocastinc.com](mailto:mail@infocastinc.com)

## FW: HOW TO SURVIVE A HEART ATTACK WHEN ALONE

Sender	vince.kaminski@enron.com
Recipients	['ludkam@aol.com']
File	kaminski-v/discussion_threads/2463.

----- Forwarded by Vince J Kaminski/HOU/ECT on 01/04/2001

08:08 AM -----

Robert Brooks <rebooks@earthlink.net> on 01/03/2001 08:09:19 PM Please respond to "rebooks@rbac.com" <rebooks@rbac.com> To: ""rebooks@rbac.com"" <rebooks@rbac.com> cc: Subject: FW: HOW TO SURVIVE A HEART ATTACK WHEN ALONE

Hopefully, you will never need to USE this information, but it looks like something vital to KNOW. Bob Brooks

The following is forwarded for your information from: Phillip L. Stephenson Director of (Coast Guard Auxiliary) Eighth District Eastern Region Tel: 502-625-7543 / 1-800-217-4420 Fax: 502 625 7545 E-mail: PStephenson@diraulouisville.uscg.mil WebPages: www.uscg.mil/d8/diraux/8er/index.htm

This is excellent info considering that the average age of an Auxiliarist is 58.5 years.

ITS WORTH PASSING ON - PLEASE REMEMBER IT.

Let's say it's 6:15 p.m. and you're driving home (alone of course), after an unusually hard day on the job. You're really tired, upset and frustrated. Suddenly you start experiencing severe pain in your chest that starts to radiate out into your arm and up into your jaw. You are only about five miles from the hospital nearest your home, unfortunately you don't know if you'll be able to make it that far. What can you do? You've been trained in CPR but the guy that taught the course neglected to tell you how to perform it on yourself.

### HOW TO SURVIVE A HEART ATTACK WHEN ALONE

(Since many people are alone when they suffer a heart attack, this article seemed in order.) Without help, the person whose heart stops beating properly and who begins to feel faint, has only about 10 seconds left before losing consciousness. However, these victims can help themselves by coughing repeatedly and very vigorously. A deep breath should be taken before each cough, and the cough must be deep and prolonged, as when producing sputum from deep inside the chest. A breath and a cough must be repeated about every two seconds without let up until help arrives, or until the heart is to be beating normally again. Deep breaths get oxygen into the lungs and coughing movements squeeze the heart and keep the blood circulating. The squeezing pressure on the heart also helps it regain normal rhythm. In this way, heart attack victims can get to a hospital. Tell as many other people as possible about this, it could save their lives!

Hi Anita,

How are you? I arrived yesterday late morning from the London Gatwick airport. Due to rush hour traffic, etc. it took a while to get into the city to the hotel.

Also, due to May Day (May 1st) protests/riots, etc., the hotel management strongly recommended that we remain in the hotel.

However, I am in the office today. I can be reached via email or via telephone at 44 (0) 207 783 5647.

Take care, Iris

Bryan,

I am trying to set up a conference call 30 minutes with Andy Kalotay. I worked with Andy at Salomon; he is now running his consulting firm in NYC and would like to talk to us about marketing a credit product he helped to develop. The info is attached below.

Shirley will call you in the morning.

Vince

\*\*\*\*\* S&P Credit Indices

S&P Credit Indices reflect daily movements in credit spread levels within two sectors of the U.S. bond market. S&P Credit Indices are quoted in basis points over the U.S. Treasury yield curve once daily.

Credit spread movements within the investment grade spectrum are represented in the S&P U.S. Industrial Investment Grade Credit Index while movements within the speculative grade rating spectrum are captured in the S&P U.S. Industrial Speculative Grade Credit Index.

Each credit index represents the distribution of U.S. corporate issues across different rating categories and subsectors. Re-balancing occurs regularly to ensure that the indices are composed of relevant issues with sufficient liquidity. Pricing information for the S&P Credit Indices' underlying securities is derived from a number of sources.

Option adjusted spreads (OAS) are used as a proxy for nominal credit spreads in order to adjust for the presence of embedded options. Standard & Poor's utilizes the proprietary option adjusted spread model developed by Andrew Kalotay Associates, Inc.

For a copy of our methodology please send us an e-mail with your name and mailing address. To download index history, please click [here](#). For more information about S&P Credit Indices, including licensing opportunities, please call (877) 779-7724 or contact:

Dear Kevin:

Dr. Kaminski, Stinson Gibner and Zimin Lu will interview you at the same time in a group interview, which will last approximately 1 hour.

If it meets with your approval, I have scheduled the telephone interview for this Friday, August 4 at 1:00 PM. They will call you at 713-630-0768.

FYI. The Research Group is responsible for option modeling, building systems for risk quantification and management, development of optimization systems, assisting with statistical analysis and anything that requires advanced math, for all of Enron.

If you have any other questions, please let me know.

Regards,

Shirley Crenshaw Administrative Assistant Enron Corp. Research 713-853-5290 email: Shirley.Crenshaw@enron.com

Ningbo Xu <XUNI@olin.wustl.edu> on 08/01/2000 11:30:44 AM To: "Shirley Crenshaw "  
<Shirley.Crenshaw@enron.com> cc: "kevinxu98@yahoo.com" <kevinxu98@yahoo.com> Subject: RE: Telephone  
Interview with the Enron Corp. Research Group

Dear Shirley,

Sorry for getting back with you until today. I have been out of town since last Friday and didn't have access to emails.

I appreciate the opportunities to talk with Mr. Kaminski, Mr. Gibner, and Mr. Lu and look forward to their phone calls. As to the date and time, I will be available all day this Friday and any day next week. Please let me know when they will be available so that I can arrange schedule to accommodate. I can be reached at 713-630-0768.

Also, I have a couple of questions that I hope to get your help:

1. Will the interview be a group interview or each of them will talk with me individually?
2. What's the role of the Research Group at Enron?

Thank you very much and look forward to hearing from you.

Kevin Xu

Hello all:

FYI!

How is the headcount coming?

----- Forwarded by Shirley Crenshaw/HOU/ECT on 03/23/2000

09:40 AM -----

"Steve Collins" <scollins@vailresorts.com> on 03/23/2000 09:41:19 AM To: Shirley Crenshaw/HOU/ECT@ECT cc: Subject: Re: Enron Offsite - The Great Divide - April 27, 28, 29 and 30th

Hello!

The 29th will be fine--if we can definitely get everything in by then. I just worry a little when we start getting less than a month out. We need to make sure that our Conference Services office has enough time to detail all of your functions properly so that everything flows smoothly.

Also please know that the availability of those \$274 airfares is also not guaranteed until booked (you know how those airlines are about changing fares around). We need to be able to book a specific class of service to get that fare, so once those are gone the fare cannot be guaranteed. Do you want me to get started with the air contract?

Please keep me posted! Thanks!

Steve

Steve Collins National Sales Manager The Village at Breckenridge/Great Divide Lodge (800) 332-0424 or (970)453-3156 direct scollins@vailresorts.com

"Shirley Crenshaw" <Shirley.Crenshaw@ect.enron.com> 03/23/00 08:12AM >>>

Good morning Steve:

I received your voice mail and the flight information sounds great!

I need to update you as to the status of everything at present.

The contract is fine, however, I am not authorized to sign it, so if it is alright, we are putting "John Griebing's" name in my place. He will sign the contract and we will put the charges on his credit card.

However, John is out of town and will not be back in until tomorrow. This may cut it a little close as to getting everything back to you by Monday, the 27th. Is there a possibility of getting this deadline pushed back a couple of days? We are also having a problem getting a commitment from the top management people - they are all out of town at present. This does not involve very many - only 3 or 4 people, but we need to get a definite count so that we won't be short on rooms. If everyone can come, it looks like we might need at least 39 rooms.

We should be able to have everything to you by the 29th - is this a problem?

Please let me know as soon as possible.

Thanks and have a great day!

Shirley Crenshaw Telephone: 713-853-5290 Fax: 713-646-2503 E-Mail: Shirley.Crenshaw@enron.com

Hi again,

I am visiting several family members and friends over the next few days. Therefore it will be hard to contact me.

However, next week I will be easier to reach. My contact details in NYC are as follows. I will be staying at the following hotels:

Washington Square Hotel from November 28th for 3 nights (Tue, Wed and Thur) 212.777.9515

Marriott NYC Financial December 1st for 1 night (Fri) 212.385.4900

At any rate, I will still try to reach you on tomorrow morning. If all fails, we will try to reach each other next week.

Happy Thanksgiving, Iris

File	kaminski-v/resumes/775.

Mike,

There might be a place for Steve in our unit supporting EES. I shall forward the resume to my associates supporting the Facility Management effort.

Thanks for thinking about us.

Vince

P.S. Krishna, Osman,

Can you take a look at the attached resume? Steve has no finance background but his engineering background is very strong.

Vince

Michael L Miller@ENRON\_DEVELOPMENT 02/17/2000 07:52 AM Sent by: Michael Linn Miller@ENRON\_DEVELOPMENT To: Vince J Kaminski@ECT, Stinson Gibner@ECT cc: aspijk@texas.net Subject: our discussion

Vince & Stinson,

I was given your names by Lynn Dunphy in recruiting and am taking the liberty of forwarding you the attached CV. Steve Roeder is a former collegiate swimmer and currently coach of the master's swimming program in The Woodlands (my wife is president of the program). He is also currently employed at Air Liquide USA (or one of its subsidiaries) over in the Galleria area. As a consequence of Air Liquide's pending merger with BOC, Steve believes that there will be significant

personnel reductions sometime during 2000 and is taking action now to try to locate his next professional challenge.

Lynn suggested there might be a fit with your group and I would be grateful if you could have a look and let me know whether you might be interested. Alternatively, if you don't see a fit (or are adequately staffed at the moment), I would be grateful for any suggestions you might have as to whom I might contact internally on Steve's behalf.

Many thanks in advance.

M.L. Miller Vice President - Mergers & Acquisitions CALME Region (713) 345 5272 ----- Forwarded by Michael Linn Miller/ENRON\_DEVELOPMENT on 02/17/2000 07:49 AM -----

**Numbers for Sharad Agnihotri**

Sender	vince.kaminski@enron.com
Recipients	['dale.surbey@enron.com', 'vince.kaminski@enron.com']
File	kaminski-v/all_documents/5344.

Dale,

I was very impressed with Sharad and I think that we should consider paying offering him o50,000. I am not sure about guaranteed bonus. What do you think?

----- Forwarded by Vince J Kaminski/HOU/ECT on 07/06/2000

08:59 AM -----

Enron Capital & Trade Resources Corp. - Europe

From: Anjam Ahmad 07/05/2000 10:56 AM

To: Dale Surbey/LON/ECT@ECT, Vince J Kaminski/HOU/ECT@ECT cc: Kate Bruges/LON/ECT@ECT Subject: Numbers for Sharad Agnihotri

Hi Dale (& Vince),

I have now gathered everyone's views and the consensus is that we should hire Sharad to work with me on front-office pricing and so we should proceed to the offer stage. As you can see his salary is o43,500 currently and he appears to have a guaranteed bonus of o25,000 for next year. He would join for >o50,000 from my discussions with Alex Blair, the consultant. He is very interested in Enron, but is also talking to Morgan Stanley. I discussed with Vince, who recommended that Sharad should come in at the same level (rank) as Kirstee Hewitt; I would also like to arrange for a direct reporting line to me for Sharad.

Regards,

Anjam x35383

P.S. Kate: I have attached the agencies terms and conditions below:

----- Forwarded by Anjam Ahmad/LON/ECT on 05/07/2000 16:21

Enron Capital & Trade Resources Corp.

From: Alex Blair <Alex.Blair@alexmann.com> 05/07/2000 15:29

To: "Anjam Ahmad" <Anjam.Ahmad@enron.com> cc:

Subject: Numbers

Anjam, ??????? as requested please find enclosed details on Sharad's numbers: ??????? Basic Salary : o40,000  
???????? Car Allowance : o3,500 ??????? (paid in Cash) ??????? Annual Bonus : o13,000 (this bonus was paid for  
???????? 99-00?? ??????? ??????? ??????? 8 mths work April-Dec)

Total o56,500

Sharad has been informed that his bonus payments for year 00-01 will be floored at o25,000.? Sharad's expectations therefore are to receive a base salary of between o57.5-o60K plus bonus. I hope this is of use and ask that if you have any questions that you do not hesitate to call.

RE: Exotica's different versions	
Sender	lu@enron.com
Recipients	['bjorn.hagelmann@enron.com', 'j.kaminski@enron.com', 'ted.murphy@enron.com', 'viacheslav.danilov@enron.com', ...]
File	kaminski-v/deleted_items/1225.

Bjorn,

Vince forwarded your message to me.

I think it is a relatively easy task to achieve the synchronization with Houston's Exotica Options Library. Just install Houston's Exotica.xll in London office, which will not take more than one hour. We can routinely ship the excutable whenever we update the library for installation in London.

There are good reasons to do this:

- 1) We make changes to Exotica frequently. In this sense, it is very hard to keep ONE version across the company if offices outside Houston want to maintain their own version.
- 2) It is not necessary and cost effective to maintain different versions. As matter of fact, it is harmful to have different versions. At the end of the day, it is Enron's P/L, different versions of Exotica would produce a small difference in per unit basis, however, this difference could be amplified to a large discrepancy due to the large trade volumes.
- 3) The London research plans to rewrite Exotica in C++. In our view, Exotica's routine is small and self-contained, the objective programming will not add much value to it. While it is nice to have a C++ version, but we think it should be assigned a low priority. We are not moving to C++ any time soon in Houston.

Let me know if this answers your question. My phone number is 713-853-6388.

Zimin Lu

-----Original Message-----

From: Kaminski, Vince J Sent: Friday, May 25, 2001 1:00 PM To: Hagelmann, Bjorn Cc: Lu, Zimin; Kaminski, Vince J Subject: RE: Exotica's different versions

Bjorn,

I don't think the scope of the project is really that big. When we looked into it, it seemed like a relatively minor issue.

To me, it's really a matter of routine maintenance that should not be an equivalent of a Desert Storm operation.

Zimin and I will call Slava on Tuesday and determine what has to be done.

Vince

Subject: Exotica's different versions

Hi Bjorn,

some time ago we, you, Stinson and I, had a meeting in Houston regarding having the same versions for Houston and London.

We agreed that you would talk to Ted Murphy to get his support for this project. I know that Ted did not come to Houston at the time he planned and therefore you were not able to talk to him (you were on holidays when he came to Houston).

This project is really big (several man month work) and we cannot do this without Ted's support. You know that requests from RAC are always taken very seriously.

Please, could you talk to Ted to get his support.

many thanks,

Slava

Dear Colleague:

We are honored to have Chairman Pat Wood of the Public Utility Commission of Texas as the distinguish speaker for the meeting of the Central Texas Chapter of the United States Association for Energy Economics. Chairman Wood is the main architect of electric industry restructuring in Texas and this meeting offers a unique opportunity to hear his speech entitled:

"Texas' Future Competitive Electric Industry"

Please mark your calendars and join us on Wednesday, November 29 at 5:00 PM at the Lower Colorado River Authority's Board Room, Located at 3700 Lake Austin Blvd (Hancock Building), Austin, Texas. The meeting will open with refreshments and Chairman Wood's presentation will begin at 5:30 PM. The meeting is open to the public and is free. We extend a special invitation to all members of the USAEE that reside in the central Texas area. Please plan to meet David DeAngelo, President of USAEE, who we are fortunate to have as our special guest. David will be happy to answer any questions you have about the IAEE and USAEE.

About the CTAEE

The Central Texas Association for Energy Economics (CTAEE) focuses on current energy events and research at the state, national, and international level. It is an excellent forum to meet, network, and exchange ideas in the regional energy

community. Local programs will be held six to eight times a year.

The CTAAE is a local chapter of an international association known as the International Association for Energy Economics (IAEE). CTAAE is a non-profit organization and is a totally non-partisan forum for stimulating discussion and dialogue on major energy policy and analysis issues. To provide exceptional meeting topics and dialogue we need your local membership. Your participation in CTAAE can bring new ideas to help promote effective energy policy.

About the IAEE and USAEE

The International Association for Energy Economics (IAEE), founded in 1977, provides a forum for the exchange of ideas, experience and issues among professionals interested in energy economics. Its scope is worldwide, as are its members, who come from diverse backgrounds -- corporate, academic, scientific, and government. The United States Association for Energy Economics (USAEE) is an affiliate of the International Association for Energy Economics. As a member of IAEE you will gain a broader understanding of energy economics, policymaking and theory. Members are kept well informed by IAEE and USAEE publications and conferences on events within the energy industry and energy challenges that lie ahead. Furthermore, membership provides you with the opportunity to network within the largest association of energy professionals in the world.

File	kaminski-v/all_documents/2983.

As you may know, we are trying to schedule an interview for Alex Tartakovski in Houston this week. I am copying everyone involved because i wont be able to coordinate this tomorrow. we just brought our new daughter home today and my wife is yelling at me to get out of my office.

I just found out that Thursday & Friday are bad days for him, so Wednesday is the only day to do it this week. he would come down tuesday night and fly out wednesday evening. it's probably easiest for him to arrange his flight, but he will need a hotel and transportation from the airport. i gave him donna's phone number for help. i assume the hyatt would be best. his home number is 215-702-3705 and during the day his cellular is 267-981-5425.

by way of background, i plan to bring in 3 people from outside the company to fill in some of the "vacants" in my group's org chart. the 3 areas of specialization that are needed to execute the business plan are (1) coordination of origination, (2) deal pricing and underwriting, and (3) modeling and portfolio management. alex is the perfect person for #3. he has the deepest knowledge of probability of anyone i know and is efficient at building analysis models, which will be a big job in this business because portfolio management needs to be redefined in real time due to the lumpiness of insurance contracts and the lack of any historical methods for evaluating these risks. development of pricing models will be a joint effort between "my" group and the research dept because this will need to draw on the expertise in research as well as being a realtime activity as new deals are being structured. i want to encourage joint work between vasant / amitava and alex because his background and expertise is compatible with research. over the past 2 years, alex and i spent a lot of time developing new electricity spot pricing methodology and this is one area where he excels. i would expect that he would be a valuable resource in research as well, and so i would like for him to be able to meet with vince is possible. (this could possibly be done when vince is in philadelphia next week if there is time - (?) depending on what work needs to be done in the future, i could see him working both on pricing research and this specific business unit.

i have attached alex's resume. i assume he would be manager level, but i'm not sure of this. this doesnt necessarily come across in the resume, but the skills that are useful to us are: probability / statistical model development development of theoretical pricing methodology excellent computer programming skills database development and data analysis he has the best understanding of the NERC reliability data format outside of Mike Curley, the NERC data manager. designed and wrote the code for the pricing model used by Ace Power Products for deal pricing and portfolio mgmt. excellent understanding of options pricing methodology and its application to hedging insurance portfolios. if you want to get into superconductor trading, he can design the standards. can beat me at Atari Battlezone (as well as being able to navigate a real tank through a minefield).

one objective of this meeting in houston is to make him feel comfortable with the organization (with which you did such a good job for me) and to give him confidence that he will be able to do state-of-the-art pricing research in the most innovative company in the world. he is also interviewing for a job in morgan stanley's equity dept.

we will also arrange a meeting with Per in NY, but i would like to be in the office for that, so we can do that next week.

please call me @610-996-2522 if there are any questions. i may not pick up but i will reply to voicemail promptly. i'm up 24 hours this week anyway.

thanks,

-- Dave

Vasant, Tanya

Any interest?

Vince ----- Forwarded by Vince J Kaminski/HOU/ECT on 04/14/2000 03:56 PM -----

Melanie Doyle 03/10/2000 04:33 AM To: Vince J Kaminski/HOU/ECT@ECT cc: Brad McSherry/HOU/ECT@ECT Subject: Re: Enroncredit.com

Hi

This guy has applied to Credit.com in Houston, I spoke to him yesterday and then passed my comments to Bryan Seyfried. Bryan suggested he may be of interest to you. I let this this guy know that he would hear from us either way and if we want to pursue the application we would invite him for interviews in Houston.

Please give me a call if you need more information.

Melanie 00 44 171 783 7740.

alexander.c.davidson@us.arthurandersen.com on 03/03/2000 01:55:23 PM To: brad.mcsherry@enron.com cc: Subject: Enroncredit.com

Dear Mr. McSherry:

I am responding to your search for credit risk professionals on the enroncredit.com website. After working for seven years on credit risk management in a research and consulting capacity, I would like to transfer my experience in assessing credit risk modeling, information technology and methodology in complex top-tier institutions to an active credit trading managerial environment. I am excited about being involved in trading, origination, risk management and R&D of credit derivatives.

I have seven years of experience in credit risk measurement and management. I have helped design, test and implement credit value-at-risk systems with KMV Corp and with a major Japanese bank. I was a major contributor at KMV in designing the Expected Default Frequency model and I am thoroughly familiar with its assumptions, strengths, weaknesses and applications. I did the empirical research that lies behind the KMV default correlation model, the private firm EDF model and I interfaced with J.P. Morgan (now R.M.G.) personnel during the creation of the CreditMetrics documentation.

I have excellent analytical, quantitative, statistical and programming skills. I studied finance extensively when I was a graduate student and I studied credit risk theory while I worked with KMV and Arthur Andersen. I am eager to join the credit derivative team at Enroncredit.com where I am certain that my combination of quantitative research skills, credit risk consulting experience and technology expertise make me uniquely qualified to support the credit derivatives trading and risk management function.

I have included my resume with this e-mail. Please e-mail me or call me at 201-420-0191 (home) and 212-708-4027 (work) so that we can discuss this opportunity further.

-----Original Message----- From: FAP Sent: Thursday, June 28, 2001 4:40 PM To: 'Jeffrey.A.Shankman@enron.com'; 'vkamins@enron.com'; ' [Lebeau, Paul] Cc: FAP Subject: Wharton-Tiger Team-2002 Importance: High I am writing in anticipation of your participation in the Wharton School's "Tiger Team" Field Application Program (FAP) for the Academic Year 2001-2002. We are in the process of making preparations for the upcoming "Tiger Team" program. Last year we held focus groups to evaluate the quality of our program. One suggestion of these groups was better facilitation of the matching process between students and hosts. To achieve that end we request your assistance. We are asking for a verbal commitment to host a Tiger project no later than mid-July. No project scope needs be identified at that time, just a commitment to work with the program. We have experienced high sponsor demand and our resources are constrained. We don't want to reject projects because we lack the necessary resources. And, we want to identify our project hosts to students as early in the school year as possible. We feel this will allow students to better integrate the FAP experience into their recruiting efforts. It will also allow us to better match faculty expertise (especially institutional) with hosts. As an incentive to help us improve the FAP experience, we ask our returning hosts for the same contribution as last year - \$10,000. This amount does not cover our variable costs, though we believe we offer hosts great value in terms of product output and recruitment opportunities. However, after July we will need to increase our requests for contributions to help cover these costs. While we realize that it is often difficult to forecast changes to operational, organizational and budgetary requirements, we ask that you take this factor into consideration. Please notify us of your decision to participate by email at <mailto:fap@management.wharton.upenn.edu>. I will forward you more detailed information and a calendar for the academic year with critical dates and deadlines for hosts. As you will see, we have "moved-up" our deadlines relative to last year to help us better facilitate the host-student matching process. Our staff also asked for extra time to allow faculty to have more input into the project's scope earlier in the process. Our focus groups suggested both students and hosts would benefit from this. Should you have any questions or concerns before then, please feel free to contact me. Thank you for your interest in helping the Wharton School achieve its educational mission. I look forward to working with you in the future Sincerely, Donna Piazza Program Director Field Application Project The Wharton School Univ. of Pennsylvania 215.573.8394 fax 215.573.5727 fap@management.wharton.upenn.edu piazza@wharton.upenn.edu

Subject: ANNOUNCEMENT: Executive Program on Credit Risk Modeling

Credit Risk Modeling for Financial Institutions October 15 - 20, 2000 At Stanford University Business School

Risk management specialists, Stanford Business School professors of finance Darrell Duffie and Kenneth Singleton will be repeating their successful executive program on Credit Risk Pricing and Risk Management for Financial Institutions. The course is created for risk managers, research staff, and traders with responsibility for credit risk or credit-related products, including bond and loan portfolios, OTC derivative portfolios, and credit derivatives.

This program includes: \* valuation models for defaultable bonds, OTC derivatives, and credit derivatives, with empirical applications to corporate and sovereign markets \* empirical and theoretical assessments of models for measuring credit risk, with correlation, for portfolios \* the strengths and limitations of current practice in credit risk measurement \* practical issues in implementing credit modeling and risk systems \* estimation of default and transition probabilities, and the correlations among the default risks of publicly traded companies, from historical data

Many people spend years surfing the Internet without ever knowing the type of information that's really out there. The Internet is filled with secret and extremely interesting sites. Most of these sites are filled with information that search

engines can't or simply will not cover. We have compiled the information from these types of sites for the past few months and have put them together for your pleasure. Much of the information we provide is the same information that many people are selling online for more then \$20-\$50. Our reports are less then \$1.00, and instead of 1 report we give you over 650 reports covering a wide range of subjects you can't find any where else. Remember this is virtually the same information that others are asking 10 times our price for.
