File	lokey-t/inbox/263.

Bruce Tatro responded quickly and effectively to my needs during a year when we were living in his district. That says something about how great it would be if Neartown had its own council person and state representative, depending on us for votes. =20

It's funny how different people have different experiences. We have had numerous problems with the water lines in front of our home--the last resulted in a \$798 water bill and we were told to fix it ourselves (get a plumber, actually), even though the city broke and then repaired (?) the line a month earlier.=20

Anyway, to make a long story short, I used the e-mail list of city councilpersons that Annise supplied to send out an appeal for help. EVERY councilperson--EXCEPT BRUCE TATRO--responded immediately! (Annise's office was particularly caring--Thank you!) The city repaired the problem within one day and refunded \$762 to us.=20

Thanks to EMCA's newsgroup and Annise Parker's list, I guess it IS possible to fight city hall!=20

RE: Amending Red Rock Contracts

Sender teb.lokey@enron.com

Recipients ['steven.harris@enron.com', 'j..porter@enron.com']

File lokey-t/sent_items/21.

I have the same recollection as to the reason for the decision. It is my understanding that the only items being amended are receipt point entitlements and that the shippers knew these amendments would be required. Also, I don't know whether all of the Red Rock contracts require the receipt point amendments or only some of the agreements. My thoughts would be to amend as little as necessary. - Teb

-----Original Message-----

From: Porter, Gregory J. Sent: Friday, October 05, 2001 9:25 AM To: Lokey, Teb Subject: RE: Amending Red Rock Contracts

Tab,

I don't disagree with your comment however, my recollection is that one of the main reasons we made the decision we did was because the commercial folks didn't want to have to reopen the agreement with a rate amendment. The concern I though was that such an overture would possibly send the wrong message to the customer or possibly create a perception that the customer had some leverage. My question is, not that we need to amend the agreement for other reasons should we add the discounted rate... do it all at once? Please provide your thoughts. Thanks. Greg

At a meeting held 2-3 weeks ago, it was decided that the P&C Agreements modified the terms of the base contracts and that separate rate amendments were not required. I believe this was the consensus of the attendees in both Omaha and Houston. Steve, Greg and others attended via videoconference in Omaha.

EMCA Reliant- HL&P & other items	
Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/250.

Neartown neighbors,

1....The community e-mail response to Reliant- HL&P's (R-H) press release on the installation of the big poles has been significant. More so than anything else to date.

A busy afternoon and evening kept me from seeing Channel 11's Saturday afternoon news item filmed earlier that day on Peden. Did you see it? Did anybody? Was it even aired at all?

I will continue to follow-up w/ R-H on one aspect that C.11 found very nteresting. Described best by an excerpt from my written response to R-H's no-community-meeting decision...."Of the various items we discussed on the phone that could position R-H in a better light, two merit your consideration. To reduce or deflect the visual intrusion of the large metal battleship gray poles, I suggested that the civic associations involved be allowed to paint, decorate or disguise the poles.

The civic associations, working with guidelines established by your company, would determine through a publicized competition, which designs the community wants to see or live with on their streets.

The other idea is the installation of wood poles along the freeway side of the Dunlavy park baseball field. The Neartown Little League would then hang netting on the poles to prevent foul balls from falling into freeway traffic."

2....Last week I reported something that turns out to be an error. The metal poles and lines along Dunlavy as they cross the freeway bridge going south, do NOT go underground at North or South Blvds or under any street in that area. A few of you let me knows about that, and I finally went to see for myself. The power lines and poles turn west along the freeway after the bridge. Should have checked that sooner before beating the R-H guy silly with that "fact."

3...This is the week to submit Capital Improvement Plans (CIP) for District D at either a Tuesday or Thursday evening meeting.

Neartown-Montrose Super Neighborhood Councilwill submit five super neighborhood action plans that include the reconstruction of three major east-west traffic corridors and plans for two area parks.

Neartown Association will submit two requests...A. asking the mayor to declare all of Montrose a neighborhood to Standards area so that all streets can be placed in the Street Overlay Program and to address widespread storm drainage problems. B....Requesting that 4-way stop signs be placed around all parks and public, private and parochial schools. Not exactly a CIP item, but we are taking advantage of the moment to present this anyway.

Cherryhurst Park, North Cherryhurst, Vermont Commons, First Montrose Commons and East Montrose are submitting CIP proposals.It's not to late for you as an individual, block face, street, neighborhood or community association to participate in submitting a proposal for the COH to place on next year's budget to turn that proposal into a project. Call me and I'll fax you a CIP form and/or discuss what you have in mind.

4.....Neartown Little league's first game is in a few weeks and there's still time for your kids to participate. Call me or NLL president, Will Weber at 713-527-8685.

Thanks

Ed Gonzales Neartown Association, 2001-02 president Neartown-Super Neighborhood Council, president 713-526-2759 pg713-616-0800 fax713-529-4592 edgonzales@EV1.net 1518 Morse, Houston, TX 77019

***EMCA* NTA on Ch. 11 this afternoon about Reliant**

Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/252.

Nearatown neighbors,

Turn on Channel 11 news this Saturday afternoon and watch me blither about Reliant-HL&P's installation of the big utility poles.

Thanks to whomever sent the e-mails about the Reliant press release to Ch.11. This resulted in a walk along Peden looking at the poles in front of residences.

On this beautiful weekend nobody NOBODY is home. Knocked on doors along Peden, nobody answers. Called all around throughout leadership, nobody answers. It was short notice and I would have preferred someone else on camera.

So if you are at home to catch this e-mail in time, let's see how it plays this afternoon, if Ch.11 decides to run the story at all. Never know.

Thanks,

Ed Gonzales Nearatown Association, 2001-02 president 713-526-2759 pg713-616-0800 fax713-529-4592

***EMCA* Nearatown Little League this Sat morning**

Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/264.

Nearatown neighbors,

This Saturday morning, march 23rd, is Opening Game day for the Nearatown Little League at Dunlavy Park. (Dunlavy at the SW Freeway)

The morning begins with a parade on Firetrucks at 8:30am from Fiesta's parking lot (W. Alabama & Dunlavy) south on Dunlavy to the Park.

At the park the Opening game ceremony will include City Council members, national Little league officials and the news media.

The NLL continues to grow (now at 121 kids), with a new batting cage in a refurbished ball field as part of a long term program for community kids.

If you have kids and have been thinking about little league, its a good opportunity to see this program in action.

With or without kids, it's a fun way to spend an hour or so watching what your neighbors have worked hard to provide all kids in the neighborhoods of our communities.

For questions or information...(never too late to sign your kids up...), call me.

Thanks

Ed Gonzales Nearatown Association, 2001-02 president 713-526-2759 pg713-616-0800 fax713-529-4592

***EMCA* Reliant-HL&P, it ain't over**

Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/255.

Nearatown neighbors,

This thing w/ Reliant-HL&P (R-H) is not over. Right now I'm talking w/ various officeholders w/ this approach....if R-H has permits and plan approval from all levels of government, how come you didn't tell me/us about what they were going to do in Montrose?

What is this 10 year plan I keep hearing about? What do you know about the plan and how does that impact Montrose?

Expecing answers next week and a response to staging a meeting w/ all of us and R-H to respond to our direct questions.

Also asked DDanberg to do w/ R-H what she did w/ TX Dept of Transportation and the SW Freeway and the bridges. Bring us all together in one room. Not w/ p.r. people but w/ decision makers.

Need one, maybe two committed volunteers to comunicate w/ R-H and the politicians. Someone(s) I can appoint to a task force on this issue. Maybe a liitle face time, mostly lots of phone and fax work. Need well mannered persistence to contrast my crabby aggression. That's worked w/ other issues.

Call, e-mail to discuss if you would like to step up to this.

Thanks

***EMCA* Reliant-HL&P../those big ugly poles....need your input**

Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/211.

Neartown neighbors,

Now talking w/ Reliant-HL&P folks. Pushing for a community meeting w/ a presentation of their plans in Montrose. Will be this month, will know more this week.

Want to avoid pre-packaged p.r. put-offs, I prefer an open give & take session w/ them and the community in one room.

1.. What I need from you in anticipation of this event are questions. What information do we want? What do we need to know? What do we want them to do? 2.. Call, e-mail, fax or snail-mail me or your community leader now! With too many fish to fry on one burner, I cannot think of everything, and need your help in making the most of this opportunity.

What I've heard from other sources..... ..Reliant-HL&P is progressing through a 10 year plan that's in place now. My question...Where's the community input?

.....Haven't seen it yet, but this is from a highly credible & sober source....the big poles already in place along Dunlavy. Follow the lines & poles south of the SW Freeway, then the lines go underground at North & South Blvds, then come back up again. My question....How come there, and not Montrose?

Respond to the #1 and #2 now. Be nice.

Ed Gonzales Neartown Association, 2001-02 president 713-526-2759 pg713-616-0800 fax713-529-4592

***EMCA* Response from Reliant - HL&P**

Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/248.

Neartown neighbors,

The attachment is a response to my information request concerning Reliant - HL&P's installation of the big poles. Conversations after my letter's receipt moved in the direction of possible community meetings where R-H would explain what they were doing and answer our many questions.

Last Tuesday R-H informed me that since the installation project would be completed by the end of this month, that the attachment would be sufficient for their communication purposes. A meeting with us was not necessary.

The R-H spokesperson readily admitted that there had been no attempts to obtain community input/feedback prior the new pole installation.

I'm disappointed and frustrated. I need your thoughts on how to proceed.

Read the attachment and tell me what you think should happen next.

Thanks

***EMCA* Fw: Today's Public Hearing: what happened**

Sender	barnesfamilyus@prodigy.net
Recipients	['emca@yahoogroups.com']
File	lokey-t/deleted_items/31.

from Neartown President Ed Gonzales:

BTW, thanks to Carmen Druke for taking the time to go!

Amy Barnes

Community members,

Today (Thursday) the Planning Commission held a public hearing on the Prevailing Lot Size Amendment.

The meeting started at 2:30pm and many, many, many agenda items later, just after 6pm(!), it was our turn to step up & speak in favor of the amendment. Talk we did, and I believe we had a good impact.

Thanks to last year's NTA president & Chapter 42 expert, Jack Rose and past east Montrose president, Carmen Druke for being there for NTA.

Also there was Jane Cahill & Billie Mercer from Old Sixth Ward, Theo Fabio and Evalyn Krudy for University Place and BOCA and the president of Southampton CA (didn't get his name).

There were folks there, too, from the Heights, making an altogether well rounded representation of the vitality of the inner-loop.

There's no decision yet from the commission and we'll be watching for that. It was a long grim wait, but it what you have do to gain those little bits that add up to self determination for our neighborhoods and protection and preservation of our communities.

Thanks to everyone that make the effort today.

Ed Gonzales Neartown Association, 2001 president 713-526-2759 pg713-616-0800 fax713-529-4592

***EMCA* Fw: Danburg's new district**

Sender	barnesfamilyus@prodigy.net
Recipients	[emca@yahoogroups.com]
File	lokey-t/deleted_items/148.

FYI:

Neartown Neighbors,

Received today a nice color map of State Representative Debra Danburg's new district (#134) in response to my asking her office, what are the street boundaries.

Neartown is divided, north and south by Montrose Blvd.in the following manner: From Allen Parkway, south on Montrose Blvd to Sul Ross. At Sul Ross, the boundary is the west side of Precinct # 0123. A five x seven block dog-leg to the Southwest Fwy.

West of Montrose Blvd, you are in Danburg's new district #134. East of Montrose, you are in State Representative Garnet Coleman's district #147.

Danburg is definitely running for re-election, in a district that now includes all of River Oaks, Memorial Park, Bellaire, West U., and the medical center.

She's been in office for 20 years (number 10 in seniority!), and I'm told that this is her first time to face genuine opponents (there are at least four) since she first took the oath of office.

As it happens, as a member of the Houston Association of Realtor's Political Action Committee, I'm part of the screening committee interviewing state and congressional candidates all of this week in preparation for the March primaries.

You should know, too, that Neartown/Montrose resident, Realtor and past Cherryhurst CA president, Jeff Kuchar, is also a Realtor PAC member involved in the interviews.

To those folks that communicated to me a desire to sue, protest or to do something about the redistricting, about NTA being cut in half...it's over. The entire state is reacting to the federal court's decision by getting down to business. It's a new era for state legislative elections.

I'll let you know when I learn more.

Thanks,

Reliant also is going through other neighborhoods.

My mother lives right near Bellaire and Reliant came through and told her that they have 7' of space in the right-of-way. They cut down 3 of her 52 year old pine trees because they were too close to their freaking lines!!! Those tree had never harmed anything - even through Alicia (Hurricane). Bastards.

Neartown neighbors,

The attachment is a response to my information request concerning Reliant - HL&P's installation of the big poles. Conversations after my letter's receipt moved in the direction of possible community meetings where R-H would explain what they were doing and answer our many questions.

Last Tuesday R-H informed me that since the installation project would be completed by the end of this month, that the attachment would be sufficient for their communication purposes. A meeting with us was not necessary.

The R-H spokesperson readily admitted that there had been no attempts to obtain community input/feedback prior the new pole installation.

I'm disappointed and frustrated. I need your thoughts on how to proceed.

Read the attachment and tell me what you think should happen next.

Thanks

***EMCA* Fw: Neartown Meeting this Tuesday night**

Sender	barnesfamilyus@prodigy.net
Recipients	['emca@yahoogroups.com']
File	lokey-t/deleted_items/6.

Note to EMCA residents:

This "follow-up" on the HPD Sweep in our area should be VERY informative and relevant. Please make time to attend.

Amy Barnes

Community Leaders & Members,

Neartown's monthly meeting is next Tuesday night (10-23-01) at 7pm. Cherryhurst Park Community Center, 1700 Missouri.

1....This big agenda item is the return of HPD's command officers to give us an after-action report on the enhanced police presence & foot patrols of September. We'll hear about what citations were made, the number of arrests and HPD's impact on area crime.

We'll also learn what we can do to keep this momentum going.

This is also your opportunity to address HPD on any crime or safety issue in your neighborhood.

2....Neartown-Montrose Super Neighborhood Council. It's official since last week and the non-residential members will be introduced at the meeting. [Montrose Business Alliance, Neartown Little league, Pride Committee, Montrose Community Church, Neartown Community Partnership & Greater Hou. Gay-Lesbian Chamber of Commerce]

3...This is the last meeting before the November 6th election and I'm inviting all candidates for all offices to be there for an introduction. It's an open invitation to all 27 candidates, but with event scheduling getting tighter just before 11-6, I do not expect more than two or three to show up.

We'll also talk about the 11-27 Garage Sale and the Prevailing Lot Size Amendment. Please be there to represent your neighborhood, your community and take this opportunity to talk w/ HPD.

Thanks

Ed, Great job at actually getting something (almost) in writing from HL&P!

The big poles are just not suitable for neighborhood use, simply too big. I am, therefore, selfishly relieved that they are not continuing along my street. With all the townhome development, plus these mega-poles, what else can be done to destroy the traditional appearance of our area? Maybe they'll put an environmentally sensitive second deck 20' above Montrose to bypass the ailing downtown highways?

The attached explanation does however beg the question why there's one of the new pole holes been dug on the NE corner of Peden and Montrose, when the line runs down the west side of Montrose Blvd. and then west on Peden.

Mike Yates

-----Original Message-----

From: Lokey, Teb Sent: Monday, October 01, 2001 12:59 PM To: Cady, Rachel; Coon, Galen Subject: RE: Question

The imbalance becomes part of the cumulative imbalance subject to book-out/cash-out. The alert day imbalances are treated differently - the alert day imbalances are settled at 200% of the high (weekly) index for overburns on an overage alert day and 50% of the low (weekly) index for underburns on an underage alert day.

-----Original Message-----

From: Cady, Rachel Sent: Monday, October 01, 2001 12:48 PM To: Lokey, Teb; Coon, Galen Subject: FW: Question

I'm not sure how the mechanics work on OFOs. I know that there is an OFO penalty bucket. The customer is charged \$10/dth that he is over/under the scheduled quantity. Section 13A doesn't address how the imbalance on an OFO day is treated but 13.A.5 that states that after Pack/Draft, Alert Day, MSS... are calculated the rest of the imbalance is cumulated into the operator account for the monthly total(should I assume the OFO balance is included in the monthly total?).

In an underage or overage OFO the customer is charged the \$10 for the under or over burned amount. Assuming that the customer was in penalty he has to pay \$10/dth, but does the imbalance on the OFO day become part of the cumulative monthly balance that the customer can book/cashout?

Teb, is this correct?

Galen, can you have Larry Hill go behind the scene and to see how it was programmed (I know it's a busy day for invoicing but sometime this week?).

Thanks.

From: "Virgilio, David" <David.Virgilio@constellation.com>@ENRON [mailto:IMCEANOTES-+22Virgilio+2C+20David+22+20+3CDavid+2EVirgilio+40constellation+2Ecom+3E+40ENRON@ENRON.com] Sent: Monday, October 01, 2001 11:32 AM To: Cady, Rachel Subject: Question

Rachel,

To recap one question/answer:

In an OFO situation, the customer faces a \$10/Dth penalty. What happens to the volume imbalance? Is it immediately cashed-out as with the Overage Alert Day, or does it hit the monthly imbalance for cash-out/book-out?

Do I have it right by saying that in an Alert Day situation, the volume is immediately cashed-out daily?

When you get a minute, please advise. Thank you!

EMCA Fw: This Thursday at the Planning Commission

Sender barnesfamilyus@prodigy.net

Recipients [emca@yahoogroups.com]

File lokey-t/deleted_items/35.

Thought that this may be of interest to EMCA residents:

Community Leaders & Members,

This year's significant city action impacting our area is the Prevailing Lot Size Amendment.

A Planning Commission Public Hearing will be held this Thursday (tomorrow) at 2:30pm at the City Hall Annex Council Chambers, 900 Bagby. The building behind & west of City Hall. (City Hall is the building w/ the clock and the long pond/pool in front)

This is the City's response to our need for protection and preservation of neighborhood integrity and allow the option for self determination by areas within communities. It is important for all of the Neartown/Montrose area

What's this about? The long answer....Scroll down to the Proposed Prevailing Lot Size Amendment at www.ci.houston.tx.us/departme/planning/Devp_rel.htm <http://www.ci.houston.tx.us/departme/planning/Devp_rel.htm>.

The short answer....residents on both sides of a block can petition the City to establish a "prevailing lot size", thereby inhibiting, if not discouraging, new development from reducing or subdividing a single lot to less than the established lot size.

For instance, if the established lot size for a particular block is 50 ft x 100 ft, a townhouse builder could not buy a lot within that block to replat/subdivide the lot into two 25 ft x 100 ft lot for a townhouse on each lot.

Yes, there's lots of details, and like the existing protection on establishing front building setback lines, this prevailing Lot Size Amendment can help to maintain neighborhood integrity in areas without deed restrictions and in deed restricted areas that do not address established lot sizes.

I need your presence tomorrow to show the community support for this proposal. If this doesn't get out of the Planning Commission, it'll never get to City Council to become an ordinance amendment. This is that part of the process where we need to be there to fill the room.

Thanks

EMCA Tonight's NTA Leadership Meeting Agenda

Sender	edgonzales@ev1.net
Recipients	[]
File	lokey-t/deleted_items/265.

Neartown Leaders & Neighbors,

Today, Thursday, March 21st, is the NTA Leadership meeting at 7pm, Cherryhurst Park Community Center, 1700 Missouri.

An open meeting to anyone that wants to watch your community leaders come together to deal w/ neighborhood issues. Please be sure to have someone there from your neighborhood, community or association.

With the CIP early March meetings behind us, NTA turns its attention to your neighborhoods concerns and issues.

A... 1..February minutes. B....2.. Old Business...CIP, Quick Overview. March 29th is the CIP request deadline. Questions or concerns, call me at 7-616-0800 or Bridget in Council Member Ada's office, 7-247-2001. B...3..Keep Houston Beautiful presentation resulting in several groups, including Park Civic, that will pick up litter in their neighborhoods this Saturday as part of as city-wide event. B.. 4...CM Annise Parker needs 4 or 5 volunteers for this sat morning for Westheimer & montrose. Call Stephanie in her office at 7-247-2014, to tell her you want to participate. Free lunch & T-shirt, too!

C..1.Task Force Formation: Half-way houses in the neighborhoods. Lesson learned last year...must use the preceding year to a state legislative year to prepare documentation, background and language for any bills expected to be seriously considered in the legislative year. task force to do the above in reference to prohibiting, limiting and/or regulating the placement of all types of half-way houses, facilities for addiction and chemical dependency, and sites for treatment programs in Montrose. State senator Ellis, State representatives Danberg, Coleman and Farrar see the need and without our help, it will not happen.

C.. 2..Task Force Formation: Meet Your Elected Official Event 2003. To avoid last minute hassles, to maximize the potential of this important event and to add real depth and fun to it, a few volunteers are needed to make this happen next January. I'll continue to do what I do best, get the notables there and the restaurants to donate food.

D...Crime in the 'hood. What's it like in your area? Have heard really scary things from Park Civic and other areas. East Montrose is responding by organizing a Citizens on Patrol. Why the increase in crime? What can we do about this w/ HPD?

E...Neartown Little League Opening Game Day Parade & Ceremony this Saturday at Dunlavy Park

F..Civic club/association reports....(the most interesting part of the meeting, I think)

G...Reliant-HL&P update.

What else? Go home.

Thanks

Thank you for a very detailed, factual account of your dealings with the City of Houston. I had a similar experience with city certified contractors. The city required that we put in a new sewer line: a perfectly legitimate requirement since I knew the little line behind our house frequently backed up when I lived here in the 70's. But, of course, we had to use a city approved contractor and engineer. The engineer drew up plans for a line that was at least twice as long as it needed to be.

This means that, if I hadn't noticed it, the contractor would have dug up twice as much of Bomar as he did, or, more likely, he would have charged me for the extra work without doing it, probably splitting the excess charge with the engineer and maybe the city inspector. When I pointed it out by phone to the engineer (who almost never returned calls from me or our builder) he said not to worry, that he would be here when the city inspector came and would make everything all right. A friend put me in touch with an e-mail group or small web site maintained by people who had similar problems, and

emboldened by their experiences, I finally got him to make the changes by threatening to have his license and his green card revoked.

I attribute many of our problems with city contractors and employees with a contracting and hiring policy that is more concerned with correcting social evils than getting the work done by someone who can do the best job for the lowest cost.

EMCA The inner city grid

Sender	hsmith3@attglobal.net
Recipients	[emca@yahoogroups.com]
File	lokey-t/inbox/816.

<bigger>Amy,

Sorry I'm just now getting around responding to your comments of December 26:

Most Montrose neighborhoods have a very unfortunate layout (with respect to theft and >vandalism) - almost every street is a cross street, so that people can get in and out of the >neighborhood very easily.

<bigger>

</bigger>>This has been discussed with the Mayor's office in past years, but the "need for alternate >routes out of downtown" so far has overshadowed issues such as this.

</bigger>

I know that 1990's planners--like the people who designed the Woodlands--thought that old fashioned city grids were bad, but I think they're wonderful. Thieves and vandals are a minority. The majority of us should be grateful for the many options we have for getting from here to there. If we're rushing down Montrose to a concert at Rice and the Boulevard looks crowded, we can take almost any right turn to get to Mandell and a straight shot south. We can take Dunleavy to Krogers if we have to drop something off at the post office or Woodhead if we're just trying to avoid the corner of Montrose and West Gray.

We can get to Southland--Fairview to Morse--without ever getting on a major thoroughfare. Lyda's been attending a conference at the Marriot across from the Galleria and she takes Willard to Sage and then left directly to the hotel.

We take different routes just to see different sites. And we have friends we can visit without ever getting on a busy street. Compare that to living in the "planned" communities out FM1960 where there are often no connecting streets between neighborhoods and you have to get on FM1960 to get to the grocery store your the bank.

Now that you're in the big time, Super Neighborhood Scene, I hope you will point out to the experts that us inner city people don't want gated communities and circular streets that don't go anywhere.

A friend put me in touch with an e-mail group or small web site maintained by people who had similar problems, and emboldened by their experiences, I finally got him to make the changes by threatening to have his license and his green card revoked.

I attribute many of our problems with city contractors and employees with a contracting and hiring policy that is more concerned with correcting social evils than getting the work done by someone who can do the best job for the lowest cost.

Last month we were looking for a sword stand as Christmas gift for our Rice MBA stockbrokeress who is deeply into Japanese martial arts. We finally found an inexpensive one on the Internet.

We may be the only people in the 'hood who hadn't eaten at Texas Chic, one block west of Leather by the Boots, on the other side of the street at 712? Fairview. It's been owned and operated for decades by Teodoro Gonzalez who lives on Bomar, next to the new townhouses. He and his wife make great Puerto Rican food and watching him slice bananas while carrying on a conversation without taking his eyes off of you is unique experience.

Teeming East Montrose Orient-O-Philes,

</fontfamily></bold>

You may have noticed the newly opened asian antique shop at 807 Fairview, which used to be Leather By Boots. Nguyen Brothers, which also converts pots into lamps and frames pictures by the hour, is run by a hilarious young Vietnamese man named Theodore. He is an expert on old Asian things, especially art and china. Stop in and talk to him (no need to check with King beforehand...). You will be thoroughly entertained!

</fontfamily></bold>

In other news, the owner of that building is the same man who owns the Hollywood grocery, cigar shop, and fine reading store on Montrose. He is going to build a Hollywood Cafe and Bookstore on Hyde Park and may open a cozy lounge in the upstairs portion of 807 Fairview.

</fontfamily></bold>

GaramondCheers.

File	lokey-t/deleted_items/228.

Last night I attended the District D Capital Improvement Prep Session, Northwest Quadrant, which was also a Super Neighborhood meeting. I was wearing my two new hats as a representative of the East Montrose Civic Association and a member of Ada Edwards' District D Infrastructure Action Team. Mike Shannon from the city's finance and administration--the people we have to send our CIP requests to--and David Leal an engineer from the city's Public Works and Engineering departament were there.

The Bomar and Morgan high water problem was the only issue I addressed. I have some Citizen Request Forms. If someone from the Bomar-Morgan spot would like to fill one out or help me fill one out, I can hand deliver it to city hall. This isn't a bad idea, and it might, possibly result in something being done between 2003 and 2007.

But I think it's also urgent that we try to get something done now. Both Shannon and Leal agreed that it was a good idea to try to work through our council members at the same time to try to get something done. As I explained last night, we don't know what needs to be done: Is there a storm sewer under Bomar in that block and should there be a drain at that spot? (I personally believe in a flat place like Houston and with Houston's construction and maintenance crews what they are, the best way to get water away from your property is a ditch.)

If I can get a copy of the engineer's letter, I'd like to get it to Mr. Leal.

Re: *EMCA* Bomar/Morgan Drainage

Sender	hsmith3@attglobal.net
Recipients	[emca@yahoogroups.com]
File	lokey-t/deleted_items/231.

Scott, Nathalie, Gayle and everyone else involved:

This was a great contribution to the project. We need community memories: someone like you and Candalaria Moreno with good memories and someone with a big hard disk to archive our e-mails. I discovered a couple of other contributing factors: Mrs. Moreno or someone at 405 Bomar must have had a problem going from their driveway into a slightly elevated Bomar, so they pored a concrete ramp to connect their driveway and the street. It forms a dam so they put a four inch pipe in the cement. It's too small and is probably filled with debris. And the 1916 cover for the storm sewer drain at Willard and Morgan has caved in so it now blocks the drain instead of covering it.

I made a little map (based on the HCAD map) which I'm attaching, hoping that it doesn't take too long to download. Let me know if you see something that should be added or substracted before I take it to Ada Edwards' office.

At 09:27 PM 2/27/2002 -0000, you wrote:

EMCA Infrastructure Friends,

Here's what I learned in the last few years regarding the poor drainage at the corner of Bomar & Morgan.

- 1. Hillary is correct about the method for fixing the problem. Jew Don Boney (fmr. Dist. D Councilman) told us/me at several forums, that using official COH channels is the only way to get things done. Last year's "wish list" presented by Amy Barnes to Jew Don Boney likely resulted in some minor fixes to East Montrose. However, formal requests on COH paperwork is desireable, since the Dist. D councilperson can more easily track the progress through the City offices.*
- 2. I requested, by phone, that both sides of Morgan Street have their ditches dug out. Only the east side (309 Bomar and 308 Willard) was performed. The workers didn't realize they needed to do both sides and said they would return another day to work on the west side. Naturally, they never returned. A solution could be as easy as calling the "Storm Drain" office and requesting that the appropriate addresses (401 Bomar & 402 Willard) have their ditches redug along Morgan. By the way, it took about 5 months after my call for the workers to do half the job.*
- 3. Candelaria Moreno (405 Bomar) told me that there was once a ditch along Morgan Street, between Bomar & Willard. It was partially filled in during a prior Morgan Street resurfacing. The poor drainage was a direct result of this work. Since she has lived at this address for more than 30 years, I don't know when that event occurred.*
- 4. Unless the City decides to build a sports arena at 401 Bomar Street, they are unlikely to construct a proper storm drain. Therefore redigging the ditch seems the only short term solution.*

GOOD LUCK!!!

Your friend & ex-neighbor,

Scott Long

Membership for Michael Anthony Orona

Sender	teb.lokey@enron.com
Recipients	['keri.elliott@ourclub.com']
File	lokey-t/_sent_mail/14.

Keri - I would like to add my nephew, of whom I have legal custody, to my membership at the Met - or Downtown Club. His name is Michael Anthony Orona. He is 17 years old, and will turn 18 next Wednesday, January 31. (He was born 1/31/83.) As I stated, I have legal custody of Anthony, I am raising him as if he were my son, and he is included in all of my Enron benefits. I have papers from a court of law awarding me custody, with the full consent of both of his parents who are unable to care for him. His address is the same as mine - 507 Welch, Houston, TX 77006. He is a senior at Lamar High School and very active in school and extracurricular activities - including sports.

I hope the rules will permit Anthony's addition to my membership as I have been raising him as a son for several years. Please call me at 713-853-6868 if you have any questions or require additional information.

Thank you for your consideration.

File	lokey-t/inbox/171.

Be sure to read the "Neartown Notebook" article on page 10 of This Week section of today's Chronicle.

This is very important for all of us who would like to preserve both the value and the ambiance of our blocks. It tells about a proposal by Neartown to enable property owners on a block-by-block basis to apply for adherence to existing lot sizes (50 x 100 in most cases).

As it is, when a developer buys a lot in the middle of a block, he can cut up the lot into as many as three small lots (as many as four on corners) and build out to the property line in some cases. This, of course, makes it hard to sell the other houses on that block for anything but teardowns--very bad news if you plan to make improvements to your home or even keep it up.

There is a very important public hearing at 2:30 p.m. on October 18 at City Hall Annex (across the street west from City Hall). Call me if you want a ride to the meeting or if you will take other people; I plan to coordinate rides to the hearing.

Business plan outline and time table

Sender	john.keiser@enron.com
Recipients	['robert.kilmer@enron.com', 'robert.hayes@enron.com']
File	lokey-t/inbox/977.

There will be a meeting this Friday with Stan to review the financial forecasts. No time set. So we are hustling to get something done by end of today.

Hey guys, Rod is telling me we have to get the "Business Plan" done soon. Once we meet with Stan this Friday we will get more guidance on completing the "Business Plan" whose outline is below. Rod said the Business Plan will need to be completed in the next couple of weeks. We can review the Plan Outline and assign sections. Much is Marketing oriented. Please review the Outline below so it can be discussed on Friday with Stan.

-----Original Message-----

From: Hayslett, Rod Sent: Wednesday, February 06, 2002 1:58 PM To: Howard, Kevin A.; Keiser, John; Geaccone, Tracy; Peters, Jerry; Piro, Jim Cc: Horton, Stanley; Stark, Cindy Subject: Business plan outline and time table Importance: High

Please treat this as confidential. Each of you will be responsible for pulling together detailed plans for 2002 and a 5-10 year forecasting model to support a REORG case. We really need the basic information just mentioned above, yesterday.

Please let me know when I can get it, but I need it tomorrow. Stan would like to review everything by tuesday next week.

Assignments for Regulated North America: Kevin (for Stan): NNG and Coordination John(for Bob): Citrus/FGT Tracy(for Steve): Transwestern Jerry(for Bill): NB Entities Jim(for Peggy): Portland General

For each of you, you will need to pull together the basic information required in the "The Company" part of the Business plan outline for your entity. Note on the timeline the expectations of the Batchelder people. Very optimistic, but we probably can get there by early next week. I will keep you informed as things change.

EMAIL FROM Batchelder crew:

Attached are two documents: (1) a time table for the "ReOrg Co" detailed business plan and subsequent valuation calculations and (2) a draft outline for the business plan. If possible, we would like to meet with each of the business unit heads next week to make sure this time table is reasonable as well as ensure that the various pieces of the business plan are assigned to specific individuals within the business units. We would welcome any input you have on the business plan outline as well as the overall process.

I know this is a very large, time consuming project, and we greatly appreciate your continued efforts in this entire process.

Please let me know if you have any questions or concerns.

Kathy Scott Batchelder & Partners, Inc. x 67849 858-382-1720 (cell)

FW: texas gas tries one more time -- modified cash pool filing

Sender	shelley.corman@enron.com
Recipients	['teb.lokey@enron.com']
File	lokey-t/inbox/84.

Interesting -----Original Message----- From: Burum, Claire (GulfSouth) [mailto:claire.burum@gulfsouthpl.com] Sent: Tuesday, October 23, 2001 12:03 PM To: Corman, Shelley Subject: texas gas tries one more time -- modified cash pool filing

UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

Texas Gas Transmission Corporation Docket No. RP01-278-002

NOTICE OF COMPLIANCE FILING

(October 22, 2001)

Take notice that on October 17, 2001, Texas Gas Transmission Corporation (Texas Gas) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets to become effective October 1, 2001:

Primary Third Revised Sheet No. 181 Third Revised Sheet No. 182 Third Revised Sheet No. 183 Sheet No. 184 (reserved) Second Revised Sheet No. 185

Alternate Alternate Third Revised Sheet No. 181 Alternate Third Revised Sheet No. 182 Alternate Third Revised Sheet No. 183

Texas Gas states that this filing is being submitted in compliance with the Commission's Order issued on September 19, 2001 in the above-referenced docket. As directed, the tariff sheets removed the daily high/low index price for cash-out. In response, Texas Gas proposes to establish a cash-out price based on a weekly high/low index price determined from the weeks within the applicable month, plus the first week of the following month. The primary and alternate sheets require in-kind make-up of imbalances up to 2% and use the same index price for imbalances above 5%. However, the primary sheets also propose to eliminate cash-out for all imbalances up to 5% by also requiring a mandatory in-kind make-up level from 2% to 5% and by eliminating any use of the 100% price index for this tier of imbalance.

Texas Gas states that copies of the revised tariff sheets are being mailed to Texas Gas's jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at <http://www.ferc.gov> using the "RIMS" link, select "Docket#" and follow the instructions (call 202-208-2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

86157 - Mobile Bay to GS NEW NUMBER: 26157 [Brostad, Karen] - POI 78178 / DRN#302232

86158 - Exxon Mobile Bay to GS NEW NUMBER: 26158 [Brostad, Karen] POI 78179 - DRN#302233

86106 - Calpine Washing Parish Power NEW NUMBER: 96006 [Brostad, Karen] POI 78304 - DRN#314570

-----Original Message-----

[Phyllis Fuller] From: Brostad, Karen Sent: Monday, January 07, 2002 9:00 AM To: Fuller, Phyllis; Irchirl, Kimberly Subject: Duplicate numbers - update

Okay, ladies thanks for your phone messages. Here is where we are with duplicate meter numbers

The 84081 issue does not appear to be a problem for you. There is a meter number 84081 that exists in PLE, but the company identifier is Transwestern, so that should be okay.

the meter numbers that have been used already for Florida are as follows:

86157 - Assigned to "Aux Perry" in 7/1/98. Current status is Removed - but I cannot delete it from the history in PLE. POI 78178 (Mobile Bay to GS) will need another meter number assigned to it.

86158 - Assigned to "Cottage Perry" 7/1/98. Current status is Removed - same issue as above, cannot delete History, so POI 78179 - Exxon Mobile Bay to GS point needs a new meter number assigned.

86106 - Assigned to "Misc CS#10. Current status is removed. same issue as above, cannot delete History, so POI 78304 - Calpine Washing Parish Power plant needs a new meter number assigned.

Thanks for your help. Call me if you have questions.

Karen

From: Lindberg, Lorraine Sent: Wednesday, February 06, 2002 3:32 PM To: Robertson, Audrey Subject: Meeting

Audrey - Could you please help me schedule a meeting with the TW Commercial Team and Teb Lokey and Rob Kilmer? It will be to discuss the procedure to allow FT shippers to change primary points and will not last more than one hour. Teb and Rob are both necessary as well a majority of the Commercial group. I'm available anytime except 9:30 tomorrow and 3:00 - 3:30 Friday. Thanks.

Lorraine

**\*EMCA\* Contractors**

|            |                            |
|------------|----------------------------|
| Sender     | barnesfamilyus@prodigy.net |
| Recipients | ['emca@yahoogroups.com']   |
| File       | lokey-t/inbox/998.         |

Just wanted to pass along some names and numbers of contractors with which we have had recent success:

1) we recently had a small shed torn down at the back of our property (I am sure all of our neighbors cheered the removal of that eyesore!). It was a bit of a challenge to find a demolition company that could work in such a small area, but ultimately we found the man for the job. His name is Roger Robichau, and generally he does concrete removal, but will also do tear downs like ours (which consisted of removal of a tree and a fence as well). He was right out to give us a quote, which was very reasonable, and he did a good job. No complaints at all. His cell # is 713-823-0204, and his pager is 713-788-3784.

2) the fence that was torn down was replaced by a company called Decks for Less, owned by Jimmy Turner. They beat out the larger companies (likely because they could be more competitive on this small job - the big guys were hitting us with the "minimum charge"). He came out right away, and had the fence up (50') in a day. Again, very reasonable, and very tidy - I have hardly found any overlooked screws or nails, which is a big bonus with a little one running around the back yard. His number is 713-499-1560.

3) late this past fall, we had a wrought iron fence and driveway gate installed by AA Ornamental, owned by Calvin Raley. They did a good job, their price was very competitive, and a big plus - as the fence has shifted and settled, he has come back out to make adjustments. No problem at all getting him to follow up. He has also done the fence installation around the new townhomes at the corner of Welch and Morgan, if you want to see other examples of his work (that one is more elaborate than ours - take a look at the back of the property to see the "creative stuff". His numer is 281-354-2659.

Southern Trails letter of interest

| | |
|-------------------|---|
| Sender | mark.mcconnell@enron.com |
| Recipients | ['rod.hayslett@enron.com', 'tracy.geaccone@enron.com', 'steven.harris@enron.com', 'kimberly.watson@enron.com', ...] |
| File | lokey-t/deleted_items/54. |

Attached is a NON BINDING letter of interest to Questar for their Southern Trail Pipeline - west leg. This is their crude pipeline that was purchased with the intention of converting it to a natural gas line but apparently, their interests have changed. The west leg runs from near the California border to Long Beach.

The importance of this non binding bid is to get us into the data room so that we can really take a close look and gather information to see how interested we really are in this pipe.

Please let me know if you have any comments. This letter has gone through legal and will be faxed to Questar today.

Thanks,

Mark

IMPORTANT MESSAGE! PLEASE READ!

FILENET SYSTEM OUTAGE

JANUARY 31, 2002

The FileNet Envision System will be down Thursday, January 31st beginning at 5:00 p.m. It is necessary to take the system down for Hardware repair. The good news is that it will be back up on Friday, February 1st at 7:00 a.m.

On Saturday, February 2nd the FileNet Envision System will not be available for use until 9:00 a.m. On Saturday, we will update the database between 6 am and 9am. Users will not be able to access the Envision System during both these outages.

I would like to thank you for your patience as we work through these outage.

If you have any questions or concerns about this outage, please feel free to call the Help Desk @ 713-853-1555 Option #1

ETS and Corporate Change Control Items

| | |
|------------|---------------------------|
| Sender | center.ets@enron.com |
| Recipients | [] |
| File | lokey-t/deleted_items/71. |

The following items were discussed in this week's ETS and Corporate Change Control and will be implemented TODAY... Oct. 10 At 1:00 p.m., the Win2000 team migrated the reverse lookup zones from the OTS domain to Corp. This change included the gas control segment of 155.251.16.0. During this change the DNS name space for OTS was also migrated to the Corporate domain. No impact is expected. However, if you feel you are experiencing problems that may be related to DNS name resolution, please contact Mary Vollmer at 713-709-9414.

Oct. 10 From 7:00 - 9:00 p.m., the Telephony team will with test the UDP tables in the PBX. The only possible disruption could be an ECS user calling numbers in the Enron building that may roll directly to voicemail, rather than ring on the persons set. Minimal impact is expected.. Oct. 10 From 10:00 - 11:45 p.m., the Server team will Install windows scripting host and reboot the EES Notes servers. No impact to ETS users is expected. Oct. 10 From 11:00 p.m. through 10/11 at 3:00 a.m., Andersen will be perform the annual non-intrusive network scan of the DMZ segment 192.189.171.0. No impact is expected. ETS Intranet Consolidation Project Updates (www.ETS.enron.com)

| | |
|------------|---------------------------|
| Sender | center.ets@enron.com |
| Recipients | [] |
| File | lokey-t/deleted_items/63. |

What is the status of the consolidation?

Menu Changes: Due to the increasing number of web applications, the applications menu will be changed from a drop-down selection list to a web page listing the available applications. This change will be in effect after 5 pm 10/12/01.

Web Server Status: <http://home.ets.enron.com> will be shutdown after 5 pm on 11/2/01 <http://home.ops.ets.enron.com> will be shutdown after 5 pm on 11/2/01

Migrated Applications: Daily Market Summary <http://gthou-ww04p/dms/>

Sites in Progress: OCC <http://home.ops.ets.enron.com/occ/> System Optimization
<http://home.ops.ets.enron.com/optimization>

Applications in Progress - OCC Phonebook

How will this consolidation affect me as a user? As we roll out new sites, any bookmarks to the old sites will need to be modified. If you navigate to an old site, you will see a redirect message requesting that you update your bookmarks and a link to the new site.

What are the next steps? The Intranet team has contacted Webmasters with content or applications on the following ETS websites: <http://home.ets.enron.com> and <http://home.ops.ets.enron.com> to discuss the migration. If you have content or applications on this server and have not been contacted, please call LaDonna Dervin as soon as possible.

Questions LaDonna Dervin is the project manager for the project and can be reached at 713.853.7103 if you have any questions regarding the project.

ETS Solution Center - Houston, at 713-345-4745 ETS Solution Center - Omaha, at 402-398-7454

US Physical Gas Prices Lower For First-Of-Month Oct

09/28/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.) HOUSTON -(Dow Jones)- U.S. natural gas physical prices Friday fell considerably for the first day of October, as traders saw wide ranges and light demand. "Everything cratered," said a Texas trader. Anticipated first-of-month indexes for October are around 50 cents to 90 cents below September's indexes at the pipelines, depending on location, according to traders. Marketers Friday traded for the first day of October and saw spreads widen considerably between cash and futures bidding. Looking ahead, traders expect to see some incremental demand next month, as some utilities switch to natural gas from fuel oil and a number of nuclear energy sites go off-line for maintenance, one veteran trader said. October, a shoulder month, tends to be a major price discount month, a trader said. Presently on the Nymex, there is a 50-plus-cent difference between October cash and November futures. The 12-month strip widened to 86 cents. The Nymex November natural gas futures contract settled Friday at \$2.244 a million British thermal units, down 0.9 of a cent. October expired Wednesday at \$1.83/MMBtu, in the vicinity of 30-month lows. At the benchmark Henry Hub in south Louisiana, the delivery point for Nymex gas, prices fell 11 cents on the bid, but rose 1 cent on the offer to a \$1.72-\$1.92/MMBtu closing range. First-of-month October index prices for the Henry Hub are predicted to be around \$1.85-\$1.86/MMBtu, traders said. September index for the Henry Hub is around \$2.34/MMBtu. Deals at Transcontinental Gas Pipe Line Station No. 65 were done at \$1.80-\$1.92/MMBtu, down 24 cents. At the Arizona-California Border, where gas from El Paso's pipeline begins delivery to Southern California, buyers paid \$1.82-\$1.90/MMBtu, up 6 cents to 7 cents. Anticipated index for October is seen at \$1.78-\$1.80/MMBtu. Index for September is at \$2.66/MMBtu. At PG&E Citygate, traders paid \$1.83-\$1.95/MMBtu, up 10 cents to 12 cents. October index is expected around \$1.83/MMBtu. September first-of-month index is at \$2.71/MMBtu. At the Katy hub in East Texas, prices were in a \$1.73-\$1.83/MMBtu range, down 5 cents to 9 cents. Anticipated first-of-month October index is \$1.82-\$1.84/MMBtu, compared with September index of \$2.37/MMBtu. At Waha in West Texas, buyers paid \$1.60-\$1.68/MMBtu, down 5 cents. October first-of-month index is anticipated around \$1.71/MMBtu, compared with \$2.32/MMBtu for September, traders said. -By John Edmiston, Dow Jones Newswires; 713-547-9209; john.edmiston@dowjones.com

EOTT Energy Registers 2M Sub Units For Hldr Koch Pete

09/28/2001 Dow Jones Corporate Filings Alert (Copyright (c) 2001, Dow Jones & Company, Inc.)

WASHINGTON -(Dow Jones)- EOTT Energy Partners L.P. (EOT) registered 2 million of its subordinated units for its holder Koch Petroleum Group L.P. for conversion into 900,000 common units in the company and an option to buy another 1.1 million common units.

According to a filing Friday with the Securities and Exchange Commission, the registration is part of a recapitalization agreement that the company, Koch and Enron Corp. (ENE) signed Sept. 6, which still must be approved by the company's unitholders.

Under the registration, Koch may sell all 2 million subordinated units prior to approval of the proposed amendment to the company's partnership agreement or if the amendment isn't approved.

As reported, Enron and Koch Petroleum have agreed to convert all 9 million of their outstanding EOTT Energy subordinated units and \$9.2 million of additional partnership interests into about 4.3 million common units.

The company said the shift in capital structure will allow the company to increase cash distributions to \$1.95 a unit from \$1.90.

Houston-based EOTT Energy is an energy company that gathers and markets crude oil and refined products in North America.

Risk On Rival Pipeline May Help Canada Natural Gas Line By Dina O'Meara

09/28/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.) CALGARY -(Dow Jones)- Development of Canadian Arctic natural gas gained points this week after producers in Alaska announced their competing pipeline projects could be too risky to pursue. But analysts - and producers - caution that the temporary retreat by ExxonMobil Corp. (XOM), BP PLC (BP T.BP U.BP) and Phillips Petroleum (P T.PLP) from the "very high-risk" project doesn't change fundamental issues challenging the Canadian side of the Arctic fence. "If an Alaskan pipeline doesn't go,

there would be potential benefits for a Canadian line simply because huge volumes of Alaska gas - four billion cubic feet a day - won't hit the market," Calgary analyst Ed Small acknowledged Friday. But he added: "I just don't know if that's enough to make the Mackenzie Delta pipeline happen." Industry estimates natural gas has to sell for at least US\$3 a million British thermal units to make a northern pipeline economically feasible. And natural gas prices that tanked from US\$10/MMBtu in December to US\$2.24/MMBtu this week haven't given encouraging signals to an increasingly tentative market. However, the fact that a growing demand for natural gas isn't projected to abate and immense untapped resources await in the north serve as favorable factors. "The advantage the Mackenzie Delta pipeline has is it's smaller in incremental volumes (than Alaska) and in capital costs," said Paul Mortensen, from the Calgary-based Canadian Energy Research Institute. The overland route from the Delta, at the western tip of the Northwest Territories, through Alberta and into the U.S. is being considered by several producer groups, the largest one formed by Imperial Oil Ltd. (IMO T. IMO), Shell Canada Ltd. (T.HSC), ExxonMobil Canada (X.XOC) and Conoco Canada Resources Ltd. (COCA COCB), formerly Gulf Canada Resources Ltd. A Mackenzie Valley pipeline would ship between 700 million cubic feet of gas a day to 1.5 billion cubic feet of gas a day to the U.S. for several million dollars less than either proposed Alaska routes,
