Electronic Pay Stubs

Sender	enron.payroll@enron.com
Recipients	['brad.mckay@enron.com']
File	mckay-b/deleted_items/204.

Get ready. Beginning in November, electronic pay stubs will be available to all employees who have their paychecks direct deposited into their bank account. Electronic pay stubs are an easy, fast, and efficient way for you to get your payroll information. They will also help Enron to realize a considerable savings in time and dollars spent over traditional printed pay stubs.

If you prefer to receive a hardcopy of your pay stub, click on the link below to complete a request form. This form must be submitted to Payroll by October 15, 2001. Unless you submit a form your pay stub information will default to electronic viewing.

Please click on the link below.

Name: BRADLEY MCKAY Personnel number: P00502887 Phone: 7138537699

If you have questions about electronic pay stubs, please contact Janice Priddy (Payroll) 713-853-7839 or Marie Newhouse (ClickAtHome) at 713-345-4185 or send an email to Enron.Payroll@enron.com (Enron Payroll in Outlook).

Stay tuned for more details in the coming weeks.

Daily Market Commentary October 26, 2001

WEAK FINISH TO NOVEMBER SEEN . . .

Natural gas futures worked higher in active options related trading Friday on the New York Mercantile Exchange. Prices opened higher and marched higher in mostly uninterrupted fashion and managed to close at the high end of the day's trading. Short term traders see efforts to push the November contract lower on Monday's expiration. . .

At the close of trading, the November contract added \$.103 to \$3.041 per MMBtu. The December gained \$.080 to \$3.183 per MMBtu. . .

"I believe that traders are looking for a weak finish to the November contract on Monday. There are indications that they want to crush the November contract," said a New York floor trader. . .

"Many of the local traders are short and took short positions home with them over the weekend," he said.

Daily Market Commentary October 23, 2001

PRICES RETREAT . . .

Natural gas futures gave back some of the recent gains in busy trading today on the New York Mercantile Exchange. Traders were pleased by supportive technical factors and a healthy cash market, and when initial apprehension that yesterday's price advance would continue proved unfounded, traders sold contracts. . .

At settlement, the November futures slumped \$.126 to \$2.681 per MMBtu. The December contract outdid the November dropping \$.152 to \$2.935 per MMBtu . . .

"The futures have put up some great technical numbers recently, but this gave new life to the bears," said a New York floor trader. . .

"Right now the locals are willing to push prices higher and commercial traders are also bullish," he said. . .

"The producers aren't selling, they'll wait until the 3 day averaging period and either make delivery or trade out on an EFP," he suggested.

Daily Market Commentary October 17, 2001

PRICES SWAN DIVE ON AGA REPORT . . .

Natural gas futures plunged in busy inventory report driven trading Wednesday on the New York Mercantile Exchange. The AGA report showed an addition of 63 BCF to working gas inventories, moderately above trader expectations. Nonetheless traders unloaded contracts in unison, and the deeply oversold condition of the market prompted traders to expect a higher open tomorrow. . .

At the end of the day the November contract fell \$.174 to \$2.418 and the December tumbled \$.149 to \$2.703 . . .

"Traders were looking for a build of 45 to 50 BCF, and some traders had gotten long prior to the report so they liquidated quickly," said a New York floor trader. . .

"Both local and short term traders as well as trade and commercial accounts were selling. The floor is now modestly negative," he said. . .

"For tomorrow I think we'll have a slightly higher open, but close lower on the day," he said.

One Texas Soldier A large group of Taliban soldiers are moving down a road when they hear a voice call from behind a sand dune. "One Texas soldier is better than ten Taliban". The Taliban commander quickly orders 10 of his best men over the dune whereupon a gun-battle breaks out and continues for a few minutes, then silence. The voice once again calls out "One Texan is better than one hundred Taliban". Furious, the Taliban commander sends his next best 100 troops over the dune and instantly a huge gun fight commences. After 10 minutes of battle, again silence. The Texan voice calls out again "One Texan is better than one thousand Taliban". The enraged Taliban commander musters 1000 fighters and sends them to the other side of the dune. Rifle fire, machine guns, grenades, rockets and cannon fire ring out as a terrible battle is fought.... Then silence. Eventually one badly wounded Taliban fighter crawls back over the dune and with his dying words tells his commander, "Don't send any more men..... its a trap. There's two of them". Don't Mess With Texas

Daily Market Commentary October 18, 2001

PRICES ADVANCE ON LOCAL BUYING . . .

Natural gas futures advanced in active trading Thursday on the New York Mercantile Exchange. Much of the initial advance resulted from concerted buying by local and short term traders, but trade and commercial as well as fund and managed account buying surfaced later in the day. Short term traders are expecting higher prices tomorrow. . .

At the end of the day the November contract rose \$.068 to \$2.486 and the December gained \$.097 to \$2.800 . . .

"There was good buying late in the session from SCS (Commodities), but most of today's upmove was from local and short term trader buying," said a New York floor trader. . .

"Enron was also buying later in the day. It was something of a reversal, for the trade and commercial accounts bought in front of the local traders." . .

"It's starting to look that the trade and commercial buyers are favoring the upside, but it's a difficult call. Local and short term traders took long positions home with them today," he noted. . .

"They are looking for the trade and commercial buying to continue tomorrow."

Daily Market Commentary October 22, 2001

TRADE BUYING SETS OFF STOPS . . .

Natural gas futures scored triple digit gains in active trading Monday on the New York Mercantile Exchange. The last three sessions have left many traders unable to reconcile the huge price advance with the poor underlying fundamentals. After early selling interest subsided, concerted buys by major trade and commercial houses triggered stop loss buying and prices surged to finish the day at session highs. Short term traders see a conditional price advance tomorrow. . .

At the end of the day the November contract roared ahead \$.126 to \$2.807 and the December tacked on \$.097 to \$3.087 . .

"Trade and commercials were early sellers between \$2.75 and \$2.68, but Salomon Smith Barney, Paribas, and (E.D.&F.) Man all bought at \$2.65, and when prices broke above \$2.75 there was aggressive short covering and that took prices to \$2.80 almost right away," said a New York floor trader. . .

"A lot of traders are saying they can't believe the market (given the fundamentals)," he said. . .

"If the market opens tomorrow at or above \$2.75, it will probably gap higher," he predicted. . .

Daily Market Commentary October 24, 2001

AGA REPORT IGNITES PRICES. . .

Natural gas futures pogo stucked higher in active inventory report driven trading Wednesday on the New York Mercantile Exchange. The weekly inventory report released by the AGA showed a build of only 25 BCF, well short of industry expectations of 40 to 50 BCF and traders bid prices up. Significant producer selling was noted and traders expect a higher open tomorrow. . .

At the close, the November futures soared \$.300 to \$2.981 per MMBtu. The December contract jumped \$.236 to \$3.171 per MMBtu. . .

"Expectations were for a 50 build on the AGA's, and that generated a short covering rally," said a New York floor trader. . .

"Locals were putting on long positions throughout the day and that brought prices up to \$2.70, and once the report came out prices surged higher." . .

"There was also a lot of producer selling December and January contracts. Technically the market looks great, and funds and managed accounts who follow strictly technicals are long," he said. . .

"On the post close prices were still strong. November was 8 bid at 9, and I look for a strong open tomorrow," he said.

Daily Market Commentary October 19, 2001

FUTURES STAGE TECHNICAL RALLY . . .

Natural gas futures vaulted higher in busy trading Friday on the New York Mercantile Exchange. Traders noted that the gains were based on buying of a technical nature and not the result of any fundamental change in the supply demand fundamentals. Traders expect concerted scale in selling should November prices move towards \$2.80. . .

At the close of trading the November contract jumped \$.195 to \$2.681 and the December surged \$.190 to \$2.990 . . .

"Locals got on the right side of the market and they were in the driver's seat. Trade and commercials saw their books out of balance and had to cover short positions," noted a New York floor trader. . .

"Lots of stop loss (buy) orders went off, and traders were able to push the market to technical levels seen earlier. I don't think the market should be this high, but you can't fight the tape," he said. . .

"It's a technical rally, not based on fundamentals. From a fundamental standpoint the government would have to start shutting down nuclear plants (to guard against terrorists), but there is no indication that will happen," he said. . .

"Long term resistance is at \$2.80 to \$2.82, and there should be some selling if prices reach that high," he said.

Daily Market Commentary October 25, 2001

TRADERS SKEWER ENRON . . .

Natural gas futures retreated in busy trading Thursday on the New York Mercantile Exchange. Much of the volatility was the result of trade and commercial accounts seeking to profit from a perception of market weakness by a prominent trade and commercial account. Other trade and commercial players bid the cash market higher with the intent of forcing liquidation of underwater short positions. Today's activity is not seen as significant in the determination of longer term price trends, and short term traders see the market working higher. . .

At the end of the day, the November futures fell \$.043 to \$2.938 per MMBtu. The December contract eased \$.068 to \$3.103 per MMBtu. . .

"This was called the 'get Enron day'. Many customers said that Enron was short the market and at first traders ran the cash market higher. For a while the cash market was ahead of the futures by as much as 10 cents, and as soon as the gap was (partially) filled on the December charts at \$3.25 to \$3.30 (August 24), the bottom dropped out and when prices fell below unchanged, it got ugly," said a New York floor trader. . .

"Basically Enron was taken to the cleaners. Traders knew that Enron had to get out of positions. There was talk of funds needed to pay an SEC fine, and traders took advantage of that." . .

"There was no sympathy for Enron anywhere. Traders knew they had them on the run." . .

"I believe if prices can hold the \$2.80 to \$2.82 in the November, the best plan is to come back and buy again," he said. . .

"The activity today was just a 'get Enron' tactic. Other traders were hearing the same thing from their customers."

October 29, 2001

FUTURES SURGE HIGHER . . .

Natural gas futures scored triple digit gains in typically active expiration day trading Monday on the New York Mercantile Exchange. Prices opened higher and continued to advance closing near the highs of the session. Longer term traders see prices reaching a threshold of resistance approximately 16 cents higher. . .

At the end of the day, the November contract rose \$.161 to \$3.202 per MMBtu, and the December tacked on \$.156 to \$3.339 per MMBtu. . .

"The marginal cost for natural gas currently in storage for this season is about \$3.50 per MMBtu," says Tom Saal, Vice President Pioneer Futures, Miami. . . "That should act as a ceiling for any further advances in natural gas prices," he said. . . In the short term prices are rising to marginal cost because the threat of increasing demand in part due to winter weather

forecasts is rising daily. . . As prices approach that level, \$3.50 should act as resistance, for should prices rise above marginal cost, buyers would have an incentive to utilize the lower priced gas at the expense of higher priced market gas.

November 19, 2001

STRONG CASH, LACK OF OFFERS BUOY FUTURES . . .

Natural gas futures surged higher in busy trading Monday on the New York Mercantile Exchange. Prices opened lower but staged a stunning 27 cent rally from their lows to score triple digit gains. Strength in the Midwest cash market, and trader apprehension of selling against impending cold weather kept the bulls in control. Short term traders see a broad trading range with prices currently near the top of that range. . .

At the close of trading the December futures jumped \$.154 to \$2.791 per MMBtu, and the January added \$.146 to \$2.996 per MMBtu. . .

In the cash market buying by Midwest utilities kept Chicago city-gate prices surging. Prices finished in the \$2.50 range up from Friday's close in the \$1.90's. . .

"There were very few offers and prices just kept moving on up. There were stops above the market, and the cash market took off and that kept the futures moving higher," said Bill Highland, trader with E.D.&F. Man, New York. . .

"There is cold weather expected in the upper half of the United States; that was part of today's rally, but I don't know how long it's going to last." . .

"We're still hearing a build for this week on the AGA's, and that's got some traders spooked. I'm expecting a range of \$2.90 to \$2.60 for the rest of the year," he said. . .

"I read the floor traders as being short. Even though we had this move higher today I think some traders actually went home short. I'm looking for a slightly higher open tomorrow (depending on Access), but December would be a sale anywhere from \$2.83 to \$2.87," he said.

November 21, 2001

NEED FOR COLD WEATHER CITED . . .

Natural gas futures retreated in typically busy inventory report driven trading Wednesday on the New York Mercantile Exchange. Attention was focused on the release of the weekly AGA inventory figure which showed a moderately bearish 15 BCF build. Earlier expectations were for a draw of 10 BCF to a build of 10 BCF, and with working gas inventories brimming, traders thought the price decline should have been greater. Short term traders hypothesize a Monday collapse predicted on revised weather. . .

At the closing bell the December futures slipped \$.039 to \$2.813 per MMBtu, and the January eased \$.050 to \$2.991 per MMBtu. . .

"I think that we come in on Monday with a revised 15 day forecast, and this market goes 30 cents south. At that point the market would be primed for a rally," said a New York floor trader. . .

"2.97 is a big (technical resistance) number, and traders find it hard to believe that the market will rally any more without an improvement in the fundamentals." . .

"I think what happens is that the market gets too short, it panics out and you have these rallies. (E.D.&F.) Man has done their best to goose the market higher. It's hard to figure out who is long at this point. . .

The Man/Enron traders are still in the ring and they are executing orders for Enron, but their clearing relationship is over," he noted. . .

Other traders see a need for some quick cold weather. . .

"I'm surprised the market didn't react more negatively to the AGA number," said Phil Flynn, broker analyst with Alaron, Chicago. . .

"There is speculation that some of the support to the market is Enron related because they are dumping positions, and many traders are saying that the market could get hit hard on Monday. . .

To move this market higher it would have to get real cold, real quick and last real long," he said.

November 20, 2001

SHORT COVERING CONTINUES AS TRADE SELLS . . .

Natural gas futures worked higher in active trading Tuesday on the New York Mercantile Exchange. An overly optimistic opening call prompted early buying by local and short term traders, but trade and commercial accounts used the occasion to sell. Traders are anxiously awaiting the release of tomorrow's inventory report, and longer term traders see a potential market free fall. . . At the end of the day the December futures added \$.061 to \$2.852 per MMBtu, and the January rose \$.045 to \$3.041 per MMBtu. . . "It was a wild night on Access last night and prices were called 10 cents to 11 cents higher so a number of local traders were long right at the open," said a New York floor trader. . . "There was a print of \$2.91 in early trading, so that encouraged more traders to buy, but that turned out to be an error and \$2.81 was the correct print." . . "Trade and commercial accounts were active sellers in early trading and that pushed prices down in early trading, but they were also sellers as prices rose back to \$2.75 to \$2.77 at midsession." . . "I believe that the floor traders are holding a nominal long position. We're hearing estimates of a 10 BCF draw to a 10 BCF build on the AGA report tomorrow," he said. . . Other traders are assessing the economy for signs of greater demand for natural gas, and aren't terribly encouraged. "My indicators show that the worst of the economy is not behind us," says Greg Parks, broker analyst with Refco, Chicago. "One of my clients says that if the AGA report tomorrow shows a build, that the December natural gas contract will trade below \$2.00 by expiration (next Wednesday). In the absence of very cold weather, natural gas has at least 30 to 40 cents more to the downside. Demand is all heating related this time of year," he said. . . "I'm looking for a small build in the AGA's to crack the market pretty hard," he said.

November 26, 2001

STILL LOWER . . .

Natural gas futures ground lower in uninspired trading Monday on the New York Mercantile Exchange. Prices opened sharply lower as traders digested the latest NWS weather report showing moderate temperatures over most of the US. A lack of trade participation gave locals and short term traders some flexibility to push prices off session lows. A lower open is expected tomorrow. . .

At the end of the day the December futures dropped \$.117 to \$2.696 per MMBtu, and the January lost \$.056 to \$2.935 per MMBtu. . .

"We came in lower on the weak NWS 6 to 10 day forecast which shows everywhere but the Great Plains above normal," noted Jim Duffy, trader with GasLink, New York. . . .

"The locals realized that volume was thin so they pushed prices higher and managed to trigger a small number of stop loss orders. They weren't fund stops or anything like that." . .

"What was surprising was that there were not trade and commercial offers up top willing to offer the market lower," he said. . .

"It's my read that the funds and managed accounts are still short as well as the trade. It's hard to figure out who is long this market." . .

"We got more phone calls today asking who was buying than anything else," he said. . .

Other traders see prices working lower as well. . .

"I don't believe we've seen the bottom to this market," says Harvey Budkofsky, broker analyst with Salomon Smith Barney. . .

"There may be some more short covering, for marketers are trying to hold the market up the best they can. Technical resistance is the \$2.87 area for the December and \$3.02 to \$3.03 for the January," he said. . .

"I believe for a physical market long who hasn't hedged that those would be good levels to sell up against," he suggested.

November 16, 2001 . .

PLAY THE LONG SIDE, TRADER SAYS . . .

Natural gas futures scooted higher in active trading Friday on the New York Mercantile Exchange. Prices opened lower but modest buying by fund and managed accounts was more than enough to whet the appetite of local and short term traders anxious to ferret out buy stops above the market. Cold weather is expected next week, and traders are tempted to push prices still higher. . .

At the end of the day the December futures recovered some of Thursday's losses and added \$.086 to \$2.637 per MMBtu, and the January rose \$.083 to \$2.850 per MMBtu. . .

"Early on there was good fund buying in the \$2.52 to \$2.53 area. I think they are getting a little long. There was not a great deal of fund buying but some," said a New York floor trader. . .

"The locals were actively bidding prices higher in an attempt to trigger some buy stops. Once prices rose above yesterday's high of \$2.59, it was clear sailing for higher prices and the locals could buy dips and play it from the long side," he said. . .

"We had a warm snap in the East and now it's supposed to get cold, so I think they (locals) are preparing themselves to push prices higher," he said. . .

"\$2.70 is their target." . .

Longer term traders are positive. . .

"I'm bullish," says John Beaver, President Private Futures Group, Oklahoma City. . .

"I believe that \$2.40 to \$2.50 is as low as prices will go on the December contract. January or February are the most attractive months to be long. It looks to me that we're in the beginnings of an uptrend. The news to support it hasn't gotten here yet, but it will," he suggested. . .

"Lower rig counts, higher industrial demand will push prices higher. I would buy the futures and set a stop (loss order) at whatever threshold of pain you can stand. I recommend \$2.25 on the December contract," he said. . .

"On the weekly chart the low of the week of September 28 (\$1.76) is the low price of this cycle. The out month bull spreads, December June, January July, didn't fall that much during this last price decline so that's a sign to me of commercial buying."

November 27, 2001

JANUARY SEEN AT \$2.25 . . .

Natural gas futures posted a mixed close in active pre expiration trading Tuesday on the New York Mercantile Exchange. A lower opened prevailed for most of the session with the soon-to-expire December showing as much as a 16 cent loss for most of the day. A number of TAS (Trade At Settlement) orders were taken to the market at the close and sparked a seven cent improvement in December in the closing minutes. Traders are expecting neither a build or a draw for tomorrow's AGA report which coincides with the expiration of the December futures. . . . At the close of trading the December futures fell \$.090 to \$2.606 per MMBtu, and the January rose \$.016 to \$2.951 per MMBtu. . . "I expect prices to trade in the range \$2.50 to \$2.70, and it looks to be an exciting close. No one wants to sell January contracts just yet," said Bill Highland, trader with E.D.&F. Man, New York. . . "Everyone is apprehensive about what kind of number we'll get on the AGA's. Traders seem to think it will come in right around unchanged. It's strange for there has never been a year when the month of November has registered a build in inventories," he said. . . "It's been so mild here in New York, I'm looking forward to playing golf next week." . . "The month of December looks like it will be pretty slow. The last couple of years it's been our slowest month with the 3 and 4 day weeks and early closures." . . "All the traders I've talked to are looking for this market to crash. They are saying January will trade down to \$2.25. . . Other traders have a more positive focus. . . "I would like to see prices consolidate more before taking a long position," said a broker analyst with a prominent Oklahoma City futures and options firm. . . "There hasn't been enough of a (technical) base built just yet. There is a lot of storage and demand has been slow. Until there are actual draws on inventories, I can't see prices moving higher." . . "I think at least another week or so is necessary where prices don't make new lows and move sideways. I expect a narrow trading range for the next week or so. If we haven't made new lows a week from now I would feel pretty good about buying natural gas," he said.

Sender	ecenter@williams.com
Recipients	[enl-members-html@estutenws11.energy.williams.com]
File	mckay-b/deleted_items/298.

=09 =09 Dear brad, Members of Congress return from their Thanksgiving = break on Tuesday as debate resumes in Washington. A bill that would renew = the Price Anderson Act is being brought to the floor of the House of Repres= entatives. The bill limits the liability for the nuclear industry in the e= vent of a major accident. Significant revisions were made to the legislati= on in the wake of the September 11 attacks, with the addition of amendmen= s that would strengthen the security of America's nuclear power plants. = The Washington bureau will also have more reaction to the FERC's new policy= for determining whether a company has market power in the electricity indu= stry. Join us for these reports from the Washington bureau on Tuesday. F= rom Houston on Tuesday, we'll bring you an update on Enron's continuing fin= ancial situation. UBS PaineWebber's Robert Young is stopping by the Housto= n bureau to discuss his perspective on the negotiations between Enron and D= ynegy. He'll join us during the 10:00 a.m. ET newscast tomorrow. The For= mer Energy Advisor to the Prime Minister of Iran is speaking in Houston on = Tuesday. Dr. Fereidun Fesharaki will be talking to the Asia Society about = the Middle East, oil and economics. The Houston bureau will bring us a prev= iew. Climate Solutions Co-Director Rhys Roth will be live from Olympia, W= ashington during the 3:00 p.m. ET newscast on Tuesday. West Coast Bureau C= orrespondent Kym McNicholas talks with Roth about the future of clean energ= y in the Northwest and how renewables will play a major role as a future en= ergy source in the region. We'll also have an update on the California De= partment of Water Resources' efforts to pay generators for market transacti= ons between January and July of this year. Join us for reports from the We= st Coast bureau. ENL is hitting the road later this week. Houston Corr= espondent Kim Benestante will report live from Anchorage, Alaska. Kim is a= ttending a conference titled: Alaska Resources 2002: Can Alaska Compete? W= e'll have live coverage from the conference starting on Thursday.

ENL's G= ale Smith will attend the Arctic Gas Symposium in Houston on Thursday. The= symposium will address supplying the North American market and the latest = pipeline route update, among other topics. We'll have coverage of the symp= osium on Thursday. Closing Prices for Monday, Nov. 26, 2001 Crude: \$1= 8.69 -\$0.27 Unleaded: \$0.5217 -\$0.0056 Heating Oil: \$0.05217 -\$0.0125 = Natural Gas: \$2.696 -\$0.117 Keep in mind things are subject to change at= a moment's notice. Occasionally guests have to cancel or change time slots= . We'll continue to do our best to keep you updated on future interviews a= nd events. Be sure to watch our newscasts every business day - 9 a.m. t= o 5 p.m. ET, at the top of each hour. =09 =09=09=09=09 =09=09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap Vi= deo Windows Media Player: 56K | 100K | 300K Real Player: 56K | 100K = | 300K (Requires Windows Media Player or Real Player) Experience all = that Williams Energy News Live has to offer! POCCC - FINAL CASH CALL

Sender	johnwal@swbell.net
Recipients	["aplin'.arch@enron.com", "james'.w.@enron.com", "e-mail <'.andy@enron.com"]
File	mckay-b/deleted_items/24.

After talking with Marc Deer today, it is apparent that a large number of owners have not paid their final cash call to Port O'Connor Country Club, L.P. THIS AMOUNT IS DUE IN FULL IMMEDIATELY! If you have received any separate invoices from M.L. Deer, these also need to be paid immediately. Checks need to be sent to Becky at Tri-C, 909 Wirt Rd, 77024. Marc is holding checks to subcontractors who are screaming to be paid and those of you who have not yet paid (for whatever reason) are clogging up the works. Please focus on this issue ASAP before this becomes a bigger problem than it already is.

If you have any outstanding issues with M.L. Deer Construction, such as punchlist items, your separate flooring invoices, etc. call Marc or Andrew Pena today and get it resolved. They are waiting to hear from you. Deer's office number is 713-681-1100.

Do not call or e-mail me with any complaints on this. I have sunk way too many hours into this today. I am ready to close anyone's unit who has (a) paid the final cash call and (b) paid their Condo assessment. So far I have only heard from two people who are ready to close. Also, two of you have not paid their Condo assessment.. Please do me the favor of handling this in a professional, responsive manner.

Also, please do not plan to air your complaints at next Tuesday's board meeting. You should address all your issues with M.L. Deer Construction prior to the meeting. We will have a full agenda and many other important things to discuss.

Thanks in advance for your earliest attention to this matter.

John Wallace

From: Ann Greene <aggreene@ruf.rice.edu>@ENRON Sent: Friday, November 30, 2001 2:05 PM To: undisclosed-recipients:;@ENRON Subject: Enron Owls

Rice University realizes that these are difficult times for those alumni who are employed at Enron. We therefore invite you to attend a meeting on Friday, December 7th at 3:00 p.m. in the Grand Hall of the Rice Memorial Center to discuss how we might be of assistance. We have email addresses for many but not all of you, so please pass the word to your fellow Owls. We have also created a website on which we will post information about available services - <http://www.ruf.rice.edu/~opa/enronowls>. Take care.

Ann Patton Greene, Director of Alumni Affairs aggreene@rice.edu/713-348-4674 Cheryl Matherly, Assistant Dean of Students for Career Services, Scholarships and Fellowships cheryl@rice.edu/713-348-4055 Peter Veruki, Executive Director, Career Planning and Admissions, Jones Graduate School of Management veruki@rice.edu/713-348-5375

-----Original Message-----

From: craigjefferies@ckbenergy.com [mailto:craigjefferies@ckbenergy.com] Sent: Tuesday, December 11, 2001 3:31 PM To: bmckay@houston.rr.com Subject: SG - Interview Confirmation

Brad:

You are scheduled to interview tomorrow with Societe Generale at 4:00 PM.

You will be interviewing with Francois Thierry and Pascal Guillot. Pascal is the head of trading for the Americas and Francous is his head of trading.

The video-conference will be held at the following address:

1000 Southloop West Suite 100 Houston (713) 747 7000

If it goes well, they will fly you up for a formal interview.

Regards,

Craig Jefferies President CKB Energy, Inc. (917) 445 1189

FREE Ducks Unlimited Camouflage Hat

Sender	service@dunns.com
Recipients	['service@dunns.com']
File	mckay-b/deleted_items/50.

We at Dunn's have been proud to support the conservation efforts of Ducks Unlimited. We thought that you would be interested in this opportunity to help support Ducks Unlimited.

Dear Valued Customer,

We would like to send you a complimentary Advantage(R) Wetlands camouflage hat upon approval of your request for a Ducks Unlimited MasterCard(R) credit card. There is no annual fee and the card comes with a low 0.0% introductory Annual Percentage Rate (APR) on cash advances, including balance transfers. To request yours, go to:

<http://www.webapply.com/ducks-wkp9>

The Ducks Unlimited card is the only card that generates vital funding in support of Ducks Unlimited. Each time you make a purchase, MBNA America Bank will make a contribution to help conserve our nation's wetlands. To date, Ducks Unlimited has earned more than \$32 million dollars as a result of this important program. You will also appreciate all these exclusive card features:

- A complimentary Ducks Unlimited camouflage hat!
- A colorful, inspiring duck scene on your card that will show your pride every time you use it
- Acceptance at millions of locations worldwide
- Emergency cash access up to your available credit line
- Complete Internet account access including "real time" transaction viewing and total fraud protection
- Supplemental lost checked luggage insurance including checked and registered firearms

Apply for your Ducks Unlimited MasterCard credit card today. It's easy and secure - just visit:

<http://www.webapply.com/ducks-wkp9>

 AOL users simply click here!

Sincerely,

Dr. L. J. Mayeux President, Ducks Unlimited Inc.

Jake Frego EVP, MBNA America

File	mckay-b/deleted_items/48.

=09 =09 Dear brad, Senate Energy Committee Chairman Jeff Bingaman (D-N= M) says he is unsure whether an energy bill will reach the Senate floor thi= s year. Washington Bureau Chief Peter Cook says Senator Bingaman is also d= ownplaying the chances that a new Republican energy proposal will alter the= debate significantly. The bureau will have the latest from the Hill on Fr= iday. Also from Washington on Friday, Executive Director of the Internati= onal Energy Agency Robert Priddle will discuss the world's energy supply wi= thin the context of the campaign against terrorism. Priddle is speaking at= the Center for Strategic and International Studies tomorrow, and the Washi= ngton bureau will bring us all the details. Energy Markets Washington E= ditor Jack Belcher will join us from the Washington bureau on Friday. Belc= her is stopping by during the 9:00 a.m. ET newscast to discuss the EPA's n= ew boutique fuels proposal. The Independent Petroleum Association of Amer= ica will continue a three-day meeting in Houston on Friday. Interior Secre= tary Gale Norton and Energy Secretary Spencer Abraham are among those atte= nding the meeting. Houston Correspondent Kim Benestante will have details = on the meeting from the Houston bureau on Friday. Also from Houston, Spin= naker Exploration CEO and Founder Roger Jarvis will discuss his company's = third-quarter earnings results. Join us during the 1:00 p.m. ET newscast f= or the Jarvis interview. And catch Simmons & Company International Vice Pr= esident of Research Mark Meyer as he talks about how oil stocks are doing = this quarter. We'll bring you these interviews from Houston on Friday. = From the West Coast bureau on Friday, ENL's Kym McNicholas will bring us= a report on the extra security measures being taken to protect the Hoover = Dam. The dam has 17 generators, each capable of supplying electricity to 1= 00,000 households. Catch the Hoover Dam report from the West Coast bureau = tomorrow. =09 =09 Dear brad, The Washington bureau will have the latest on the a= nthrax scare on Capitol Hill on Thursday. Washington Bureau Chief Peter Co= ok says the decision to shut down the House of Representatives until Tuesda= y means at least one energy hearing on MTBE will be delayed. The Senate re= mains in session and we hope to hear from Senators on Thursday about the si= tuation. Peter also says the bureau will have more reaction to the news t= hat Department of Energy official Joe Kelliher has been picked by Presiden= t Bush to fill the vacant seat at the Federal Energy Regulatory Commission.= Kelliher's name has been on the top of the list for some time, and now th= e decision is official. PSE?Director of Interregional Transmission Laura = Manz will also join us from the Washington bureau on Thursday. Manz has be= en participating in the FERC RTO workshop, and she'll give us her take on w= hat might come out of the weeklong meetings. Join us during the 10:00 a.m.= . ET newscast for the Manz interview. IBM Chemical and Petroleum Industry= Vice President of Marketing Craig Hodges is penciled in from the Houston b= ureau on Thursday. IBM has been selected by Shell Oil to create the prototy= pe for a wireless gas station named the e-Station. Catch Hodges during the= noon ET newscast. West Coast Bureau Correspondent Kym McNicholas report= s, Energy Secretary Spencer Abraham will be in California to announce a new= public-private partnership regarding "Path 15," a transmission bottleneck = in California. Abraham will also give a keynote address at Hoover Institut= ion's Conference on California's Electricity. Also from the West Coast = bureau on Thursday, Kym talks with a Spokesperson about the Valero refinery= 's plan to build one power plant to operate the refinery and one to sell en= ergy to off-site customers. The California Energy Commission is expected t= o decide Wednesday night whether to grant the Valero refinery, located in B= enicia, a permit to build. From the NASDAQ in New York, NYMEX President R= obert Collins will join us. He'll discuss the status of NYMEX operations a= nd trading following the September 11th attacks during the 9:00 a.m. ET new= scast. Keep in mind things are subject to change at a moment's notice. O= ccasionally guests cancel or change time slots. We'll continue to do our b= est to keep you updated on future interviews and events. Be sure to wat= ch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of ea= ch hour. =09 =09=09=09=09 =09=09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap vi= deo (Requires Windows Media Player or Real Player)

=09 =09 Dear brad, On Wednesday, we'll continue our live coverage of t= he 18th World Energy Congress in Buenos Aires, Argentina. International Co= rrespondent Wolfgang Vale will bring us reports and interviews throughout t= he day. Washington Bureau Chief Peter Cook says they'll continue to bring= us the very latest on energy legislation and how it's progressing. The bur= eau will also have updates on the anthrax scare in Washington. Congression= al office buildings were closed on Tuesday, but there's a possibility some = could reopen as soon as Wednesday. The Washington bureau will also cover = Wednesday's FERC meeting as commissioners meet for the first time since the= end of the weeklong workshop on Regional Transmission Organizations. Pete= r says new proposals for developing RTOs in the Northeast and Southeast are= among the issues on the FERC's agenda. Dyonyx CEO Fred Pratt will talk w= ith the Houston bureau about how companies can make current technologies wo= rk better for them. Dyonyx is a privately held information technology and m= anagement-consulting firm. Join us for the Pratt interview from the Housto= n bureau on Wednesday. We'll also get a Texas PUC update on Wednesday. E= NL's Gale Smith says we'll find out what electric providers are doing to in= crease security and what the Texas PUC is doing to monitor emergency prepar= edness in Texas. Be sure to catch all this from the Houston bureau tomorro= w. California Power Authority Chairman S. David Freeman gives a reflectiv= e look back at the state's energy crunch from the West Coast bureau Wednesd= ay. Freeman also talks about how the state plans to stay out of the headli= nes in the future. West Coast Correspondent Kym McNicholas says the San O= nfre Nuclear Generating Station will go ahead with plans to set off its 49= sirens on Wednesday to make sure warning systems are operational. Kym say= s they will continue the test despite their concerns of a jittery public in= light of recent terrorist attacks. Video Library Update: If you happened= to miss it, check out ENL's interview with Senate Energy Committee Chairma= n Jeff Bingaman (D-NM). Sen. Bingaman discussed the status of energy legis= lation in the Senate and the anthrax threat in Washington. Keep in mind t= hings are subject to change at a moment's notice. Occasionally guests cance= l or change time slots. We'll continue to do our best to keep you updated = on future interviews and events. Be sure to watch our newscasts every b= usiness day - 9 a.m. to 5 p.m. ET, at the top of each hour. =09 =09=09=09= =09=09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap vi= deo (Requires Windows Media Player or Real Player) Experience all that= Williams Energy News Live has to offer! =09 =09 Dear brad, The Washington bureau will have a full plate when w= e return from Thanksgiving break. Congress returns with many lawmakers urg= ing action on energy legislation before the end of the year. Washington Bu= reau Chief Peter Cook says there's a long list of legislation ahead of ener= gy in the Democrat-controlled Senate, but Republicans are threatening to fo= rce a vote through a filibuster. In turn, Democrats are saying they'll fil= ibuster any energy bill containing a provision to open Alaska's Arctic Nati= onal Wildlife Refuge to drilling. The legislation battle continues next we= ek. Peter also says the Washington bureau will continue to follow the FER= C's major decisions regarding how it assesses market power. The Commission= announced a major change this week that will impact many of the large and = small utilities across the country. Also next week, we'll see what Energy= Daily Publisher Llewellyn King has to say about Pat Wood's performance as = Chairman of the FERC. And rumors are flying about DOE Secretary Spencer Ab= raham - on Monday, King talks about the whispers he's hearing in Washington= . ENL's Gale Smith will have a report from the Houston bureau next week o= n a Louisiana company that uses rice hulls to create power. Agrilectric In= corporated consumes some of this power, but most of the electricity is sold= to an area utility company. We'll have details next week. Also, Houston= Correspondent Kim Benestante will bring us coverage from the Alaska Resour= ces Conference taking place next Thursday and Friday. We'll also bring you= details on the final report regarding the chosen route of the Arctic natur= al gas pipeline. The report is due to Alaska's Governor on November 30. = We'll hear from Center for Energy Efficiency and Renewable Technologies Exe= cutive Director John White next week. ENL's Kym McNicholas will speak with= White about his organization's opposition to the state's long-term power c= ontracts. Catch White from the West Coast bureau next week. Closing Pric= es for Nov. 21, 2001: Crude: \$18.96 Unleaded: \$0.5273 Heating Oil= : \$0.5342 Natural Gas: \$2.813 Keep in mind things are subject to chang= e at a moment's notice. Occasionally guests have to cancel or change time s= lots. We'll continue to do our best to keep you updated on future intervie= ws and events. Have a great Thanksgiving break! We'll see you on Monday. = Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, a= t the top of each hour. =09 =09=09=09=09 =09=09=09=09=09=09 =09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap Vi= deo Windows Media Player: 56K | 100K | 300K Real Player: 56K | 100K = | 300K (Requires Windows Media Player or Real Player) Experience all = that Williams Energy News Live has to offer! =09 =09 Dear brad, We're going to make it through the winter - the Nor= th American Electric Reliability Council released its Winter Assessment on = Tuesday, reporting that generating supply should meet or exceed estimated e= nergy consumption. The Washington bureau will take a closer look at the as= sessment on Wednesday. On Wednesday, Interior Secretary Gale Norton talks= about the upcoming Lease Area 181 sale. Secretary Norton believes there's= still great interest in the sale despite the reduction in size of the leas= e area. The sale is scheduled to take place in New Orleans on December 5. = The FERC announced sweeping changes on Tuesday in how it looks at the iss= ue of market power. The changes could have a big impact on major power gen= erators. We'll have reaction from the Washington bureau on Wednesday from = Megawatt Daily Editor Michael Lustig and Electric Power Supply Association = President Lynne Church. Lustig joins us during the 9:00 a.m. ET newscast a= nd Church is stopping by at 10:00 a.m. ET. ENL's Kym McNicholas will als= o have reaction to Tuesday's FERC ruling. On Wednesday, she'll bring us co= mments from Mirant, the California Department of Water Resources and the Ca= lifornia ISO. And during the 1:00 p.m. ET newscast, Independent Energy Pro= ducers Association State Policy Manager Katie Kaplan will join us from the = West Coast bureau to give us her take on the FERC's actions. Texas Natura= l Resource Conservation Commission Regional Manager Leonard Spearman is sto= pping by the Houston bureau on Wednesday. He'll talk about the TNRCC's role= in

strengthening homeland security at Texas petrochemical plants and refineries. Catch the Spearman interview during the 3:00 p.m. ET newscast tomorrow. The Houston bureau will also bring us a new twist in the search for alternatives to MTBE. Chris Paschall of Industry Information Resources will talk about the possibility of making ethanol out of wine vines - potential good news for California. Join us from Houston on Wednesday. Broadcasting Note: Reminder - since the markets are closed, we'll be dark on Thursday and Friday. Wrap Note: We're adding some of the day's commodity settles to the Wrap. Here you go! Closing Prices for Nov. 20, 2001: Crude: \$19.15 Unleaded: \$5.281 Heating Oil: \$5.376 Natural Gas: \$2.852 Keep in mind things are subject to change at a moment's notice. Occasionally guests have to cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour. =09 =09 =09 =09 =09 =09 =09 =09 =09 Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap Video Windows Media Player: 56K | 100K | 300K Real Player: 56K | 100K | 300K (Requires Windows Media Player or Real Player) Experience all that Williams Energy News Live has to offer! Dear brad, It's been one year since ENL began broadcasting - I'm on Tuesday and join the Energy News Live celebration. We've scheduled a full day of coverage and special guests to commemorate our anniversary. At the top of the list is our continuing live coverage of the 18th World Energy Congress in Buenos Aires, Argentina. International Correspondent Wolfgang Vale will bring us an interview with European Union Energy Commissioner Loyola De Palacio. Join us on Tuesday as De Palacio discusses the reliability of energy supplies for Europe. The Washington bureau will have the latest on the anthrax situation and how it's impacting Congress. At noon ET Tuesday, the bureau is expected to talk with Senate Energy Chairman Jeff Bingaman about the chance the Senate will consider energy legislation before Congress adjourns for the year. Also from the Washington bureau on Tuesday, Energy Daily Publisher Llewellyn King will give us his thoughts on where energy legislation stands in Congress. King will drop by during the 4:00 p.m. ET newscast. Former FERC Chairman James Hoecker will also speak with us from Washington on Tuesday. Hoecker will discuss the newest FERC nominee, Joe Kelliher, and what the Commission accomplished with its recently concluded RTO week during the 10:00 a.m. ET newscast. The Houston bureau also has some great guests scheduled on Tuesday. Petroleum Argus, Inc. President Dan Massey will join us during the 1:00 p.m. ET newscast. He'll discuss the crisis in risk management over the last year. We'll also hear from Merrill Lynch Lead Energy Analyst Donato Eassey. He'll drop by the Houston bureau to discuss the difficulties of this year, and where the energy industry goes from here. Eassey is penciled in during the 2:00 p.m. ET newscast tomorrow. ENL's Kym McNicholas will have more on the California Department of Water Resources from the West Coast bureau on Tuesday. The CDWR is holding a workshop in Sacramento to explain new revenue requirements and how the factors involved will bring down costs. Kym says we'll also have more from former U.S. Secretary of State George Shultz and his thoughts on deregulation. We'll have details from these stories and more on Tuesday from the West Coast bureau. From Columbus, Ohio, AEP Spokesperson Pat Hemlepp will discuss AEP's earnings report due out Tuesday. Hemlepp will also bring us an update on changes at AEP's payment processing center in the wake of the anthrax scares, and the importance of electronic payments, during the 11:00 a.m. ET newscast. Keep in mind things are subject to change at a moment's notice. Occasionally guests cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour. =09 =09 =09 =09 =09 =09 =09 =09 =09 Jay Rickerts, EnergyNewsLive.com Anchor View today's
