Dell Order Confirmation

Sender	lb_electronic_orders@dell.com
Recipients	['steven.merris@enron.com']
File	merriss-s/discussion_threads/522.

Dear STEVEN J MERRISS,

Thank you for your order. We are currently reviewing for completeness and accuracy. A separate email with your Dell Order number(s) will be sent to you after the order is processed.

A recap of your order is provided at the end of this message for your reference. We encourage you to verify, print, and retain the information on this page for your records.

Date Submitted: 5/1/01 7:34:51 AM

If at any time you have questions regarding your order please contact your Dell Sales Representative:

Name: Employee Purchase Program Email: enterprise_online@dell.com Phone: (800) 695-8133 ext 66402

Again, thank you for your order. We appreciate you buying from Dell and using Premier Dell.com.

Sincerely, Premier Dell.com

Shopping cart includes 1 unique item(s) Total Price: \$0.00

Grays Harbor RT Duties

Group,

This morning we had a meeting with BPA regarding Grays Harbor Paper in an attempt to clarify exactly what we need to do in order to make the deal run smoothly. BPA informed us that a phone call is REQUIRED at the end of each hour to inform their numbers desk (306-418-2277 and reference account # 16211) of the actual generation output of the unit. BPA has the expected output in their system based on preschedules or RT sales and then enters the actual output in order to determine if BPA has met their reserve requirements by comparing the two (for the entire control area). If we do not call the actuals in, they assume that the unit's output is zero and we get billed for being short those MWh's.

When you call the BPA Number's Desk, you need to give them the total output of the plant. They are required to give the first MW to load and the next four to us for marketing. However, BPA wants to know the TOTAL OUTPUT of the unit, which would be 5. They would like the numbers within the first 5 to 10 minutes of every hour.

This is very important and cannot be overlooked. Let me know if you have any ideas about how to remind everyone to make the call. Do we need an alarm at 5 minutes after every hour?

We also discussed procedure when the unit trips. We have to call the BPA Generation Desk within 5 minutes of the unit tripping. We are going to emphasise the importance of Grays Harbor calling us immediately so that we may notify BPA within the required 5 minutes. Once again, if we fail to do this we will be fined according to their tariff.

DO NOT FORGET TO MAKE THESE CALLS!!!!!!

If you have any questions, don't hesitate to ask. Les can also be a helpful resource on this.

Cheers, Jesse

NCPA BR IS BACK

Hey Guys.

I had a long talk with NCPA today and set up so that we again can do the ZP26/NP15 Buy-Resale on a Realtime basis. We are not doing a profit split this time, we are paying them \$25/MW instead. This basically enables us to shift 21MW across PATH15 and not be subject to Congestion as NCPA has Grandfather Rights across the path. This is a sweet strategy when the SP15/NP15 spread is there and PATH15 is congested. NCPA's capacity is 21MW, but I would not recommend doing more than 20MW. There are others who know about this opportunity but are not currently using it (WESCO especially). So by doing only 20MW we do not remind them of NCPA.

The way this works is that we call NCPA and ask their capacity across PATH15. And tell them you want to schedule the BR through whatever hour.

IN CAPS: We sell to NCPA in ZP26. We buy from NCPA in NP15.

We can buy SP15 to fill our ZP26 sale (we just shift the load from SP15 to ZP26, so enter a EPMI CALPOOL). PG&E is NCPA's SC, so if you are not passing Phase two give them a call.

NCPA's tel#: (916) 786-3520 PG&E tel# : (415) 973-1969

If you guys have any questions just ask me.

Geir
