RJ EnergyGroup <RJEnergygroup@ec To: "RJ Customer" <rj@rjf.com> m.rjf.com> cc: Subject: We Don't Buy the Falling Natural Gas Demand Story 05/28/02 10:20 AM

<<iEne052802b_16201.pdf>>

Raymond James Energy Stat of the Week, published 5/28/2002.

Over the past several weeks, numerous analysts' reports have suggested there has been a massive destruction of gas demand, as gas prices have recently moved above \$3.50/mcf. We believe the foundation for many of these reports is both poor analytical methodology and bad data. To conclude that weather-adjusted natural gas demand has fallen by 5 to 10 bcf per day implies a demand deterioration level similar to what we saw in early 2001, when prices soared to near \$10 per mcf. Unlike then, today's fuel-switching incentives still favor natural gas. Secondly, there is little economic incentive for today's industrial consumers of natural gas to shut down plants in an improving economic environment. The current economy is very different than the deteriorating economic environment in early 2001.

U.S. Natural Gas Supply is Falling Faster Than Even We Thought

Sender	stanley.k.horton@dynegy.com
Recipients	['joe.parks@enron.com']
File	parks-j/inbox/157.

----- Forwarded by Stanley K Horton/HOU/Dynegy on 04/29/02 04:09 PM -----

RJ EnergyGroup <RJEnergygroup@ec To: "'RJ Customer'" <RJ@rjf.com> m.rjf.com> cc: Subject: U.S. Natural Gas Supply is Falling Faster Than Even We Thought 04/29/02 09:08 AM

<<iEne042902b_0713.pdf>>

Raymond James Energy Stat of the Week, published 4/29/2002.

Over the past six months we have been very bullish on U.S. energy stocks based upon our conviction that U.S.

natural gas supply would deteriorate sharply with the reduced drilling activity. As publicly-traded U.S. E&P

companies have begun to announce their first quarter production results, the supply deterioration has been shocking even to us. Specifically, with about one-third of total U.S. gas production represented, it appears that first quarter 2002 U.S. gas production is trending down about 3% sequentially and more than 6% on a year-over-year basis. As we move into the second quarter, we think we will continue to see sequential declines in U.S. gas production and a growing year-over-year gap in U.S. gas production. Since a supply problem is much harder to correct than a demand problem, it appears that our

optimism on U.S. gas prices has not only been well founded, but may even prove to be too conservative. In other words, this falling U.S. natural gas supply is an extremely bullish data point for U.S. gas prices as we move into the summer and especially going into next winter.

RJ EnergyGroup <RJEnergygroup@ec To: "RJ Customer" <rj@rjf.com> m.rjf.com> cc: Subject: Energy Stocks are at the Bottom of a Cyclical Downturn with a Secular Upswing: Buy Now! 01/07/02 08:02 AM

<<IENER010702BSOW.PDF>>

Raymond James Energy Stat of the Week, published 01/07/02.

Recent energy investment sentiment could be characterized as a fear-driven, cautious psychology that has led to a generally under-owned condition for most energy stocks. A major contributor to this negative psychology has been the underlying belief of investors that "energy stocks always bottom several times before a sustained upward move." While that was true in the 1998/1999 downturn, we are convinced that today's energy fundamentals are far different than those experienced in the downturn several years ago. In fact, we believe today's environment is much more similar to that experienced in the 1972/1974 timeframe, when energy stocks experienced a two-year run-up followed by a recession and subsequent nine month sell off. In the 1974 downturn, however, the stocks experienced one bottom in the late fall and never looked back. Likewise, we are convinced that energy stocks have already seen their lowest levels and as strong commodity fundamentals become visible later in the first quarter, the stocks will begin to run. In other words, we believe the energy stocks are near the bottom of a cyclical downturn within what we believe is going to be a longer-term secular upswing. That means that now is the time to be buying energy stocks!

RJ EnergyGroup <RJEnergygroup@ec To: "RJ Customer" < <rj@rjf.com> m.rjf.com> cc: Subject: Why Are Gas Prices So High? 03/25/02 07:57 AM

<<iEne032502b_1631.pdf>>

Raymond James Energy Stat of the Week, published 3/25/2002.

With the recent surge in U.S. natural gas prices many analysts are scratching their heads in disbelief. Of course there will continue to be volatility, but we believe these higher gas prices are not only sustainable, but will likely move up through the summer (similar to what happened in 2000). For the past two months it has become very evident that U.S. natural gas supply/demand on a weather-adjusted basis is much tighter than the same time last year. The market has finally begun to realize the extent of this tightness, as more "normal" weather over the past several weeks has removed a substantial amount of the natural gas storage overhang. This shift in supply/demand should become even more evident as we move into the early part of the injection season in April/May. Look for summer gas injections to be down 30% to 50% from last year's numbers. This should be the bullish driver of summer natural gas prices.

Next week, we should have even more bullish gas news, as the preliminary numbers from our first quarter U.S. E&P production survey are likely to surprise many on the Street. Stay tuned....

File	parks-j/deleted_items/10.

Dear Dynegydirect customer:

Due to market developments and the poor credit environment in the energy industry, Dynegy has discontinued electronic trading activities through Dynegydirect. We encourage you to contact your Dynegy representative and execute your trades by phone. If you don't have a designated representative please call Cheryl Gillentine at 713-767-6277 or Clare Champion (UK) 0208-403-1312.

Any and all trades that you executed on Dynegydirect through June 19, 2002, will be honored and completed. Dynegydirect will continue to be a valuable resource providing historical trading information, transaction data and report printouts. Simply log in and click on "Reports" to review your account.

If you have any questions, you can email our e-Care Center at e-care@dynegydirect.com or call us at 877-396-3493. We want to thank you for trading on Dynegydirect and for choosing to do business with Dynegy.

Dynegydirect e-Care Dynegy Inc. 1000 Louisiana, Suite 5800 Houston, Texas 77002

Mr. Joe Parks,

This email is being sent to you as a reminder that we will have to have something in writing from someone in your company (simply a reply to this email would suffice) in order to inactivate the Master Users as you requested a while back. Simply a reply to this email with a list of Master Users to be inactivated would suffice.

If you have any questions, please contact eCare at the number listed below.

FW: Sempra Energy Trading GISB

Sender	chris.germany@enron.com
Recipients	['david.draper@enron.com', 'mmccall@sempratrading.com']
File	parks-j/deleted_items/463.

These days, its easier for our legal department to draft or approve a new GISB than to find any of the existing documents. The attached document is for Enron North America Corp. David is going to see if they can use it.

If your legal department approves, please print 2 originals, fill in the Sempra information, sign it, and send it to me.

Thanks

Chris L. Germany Manager, Gas Trading Phone 713-853-4743 Fax 713-646-3059

File	parks-j/sent_items/487.

-----Original Message-----

From: "Jack Belcher - Exchange" <jbelcher@chemweek.com>@ENRON [mailto:IMCEANOTES-+22Jack+20Belcher+20-+20Exchange+22+20+3Cjbelcher+40chemweek+2Ecom+3E+40ENRON@ENRON.com] Sent: Thursday, May 17, 2001 3:23 PM To: steve blalock; Spencer Kelly; Nick Snow; Mary Aucoin; Karl Lang; Doug Gill; David Sweet; Parks, Joe Subject: Fw: Email from Adam Sieminski -- US Natural Gas Inventories Rise Relentlessly

----- Original Message -----

From: <jay.saunders@db.com> Sent: Thursday, May 17, 2001 4:06 PM Subject: Email from Adam Sieminski -- US Natural Gas Inventories Rise Relentlessly

Last week's 119 bcf injection into U.S. natural gas storage - the largest weekly injection since mid-June 1994 - leaves current storage of 1.077 tcf only 86 bcf below last year and 40 bcf from the middle of the 1994-1999 range. Based on seasonal patterns, large injections should continue over

the

next nine weeks, when storage increases are typically the largest of the year. So far this injection season, inventories have risen 450 bcf, or

100%

faster than the typical rate of 220 over the first six weeks of the refill season. If inventories rise only half that rate, at 50% faster than the norm, storage would pass the middle of the typical range next week and end October at nearly 3 tcf, or 120 bcf from the top of the range. While our projected inventory injections seem bearish, we still look for relatively strong price support above \$4/mmBtu through the year. Even with inventories rising quickly, there seems to be genuine concern for the need to satisfy summer demand for electricity (air conditioning), especially in the Southwest U.S. By the end of the year, however, we expect inventory coverage of forward demand to be on par with normal levels. While we continue to feel that demand has been a major contributor to the large storage injections, supply also seems to be playing a stronger role. Reported DOE growth of 3% in 2000, which comes with a one percentage point room for error due to data imperfections, comes mostly from Texas and Wyoming. From Canada, higher than expected production from Alberta, in addition to the eastern offshore, seems to have influenced the large shipments to the U.S. Contrary to expectation, the Alliance pipeline has been running at 1.5 bcf/d capacity - and often beyond - since its commencement last November. <<gas inventory 0517.pdf>> ADDITIONAL INFORMATION AVAILABLE UPON REQUEST Jay Saunders Deutsche Banc Alex. Electronic Pay Stubs

Sender	payroll.enron@enron.com
Recipients	['joe.parks@enron.com']
File	parks-j/inbox/576.

Get ready. Beginning in November, electronic pay stubs will be available to all employees who have their paychecks direct deposited into their bank account. Electronic pay stubs are an easy, fast, and efficient way for you to get your payroll information. They will also help Enron to realize a considerable savings in time and dollars spent over traditional printed pay stubs.

If you prefer to receive a hardcopy of your pay stub, click on the link below to complete a request form. This form must be submitted to Payroll by October 15, 2001. Unless you submit a form your pay stub information will default to electronic viewing.

Please click on the link below.

Name: JOSEPH PARKS, JR. Personnel number: P00503932 Phone: 7138539636

If you have questions about electronic pay stubs, please contact Janice Priddy (Payroll) 713-853-7839 or Marie Newhouse (ClickAtHome) at 713-345-4185 or send an email to Enron.Payroll@enron.com (Enron Payroll in Outlook).

Stay tuned for more details in the coming weeks.

File	parks-j/inbox/447.

-----Original Message-----

From: burson@GasTrader.net@ENRON [mailto:IMCEANOTES-burson+40GasTrader+2Enet+40ENRON@ENRON.com]
Sent: Thursday, May 10, 2001 4:06 PM To: gregory.schockling@bhlp.com Subject: GasTrader Energy Briefs

Daily Market Commentary May 10, 2001 . .

FUNDS, MANAGED ACCOUNTS BUY . . .

Natural gas futures rallied in busy trading Thursday on the New York Mercantile Exchange. Funds anticipating that a market bottom had been reached bought aggressively to cover earlier profitable sales. Trade and commercial accounts continue to remain on the sell side of the ledger. Tomorrow's trading is expected to be heavily dependent on technical parameters. . .

At the end of the day the June contract jumped \$.146 to \$4.348 and July added \$.141 to \$4.414 per MMBtu. . .

"Today was almost exclusively fund and managed account short covering. Trade and commercial accounts made some adjustments, but they are net short and were willing to let prices rise to \$4.41," said Jim Duffy, trader with GasLink, New York. . .

"Traders are looking at filling the gap at \$4.425, and if that happens it's a sale," he said. . .

"Locals were trying to pick tops in this upmove and got killed. When prices rose to \$4.28 to \$4.30, they all got short. Buy orders came in for 500 lots and you could feel their pain. They had to sell at \$4.32." . .

"Below \$4.30 I think the trade will try to keep prices low, but if it comes in tomorrow at \$4.35 to \$4.36, look for an attempt to fill the gap at \$4.425," he said.

From: burson@GasTrader.net [mailto:burson@GasTrader.net] Sent: Thursday, October 25, 2001 6:39 PM To: gregory.schockling@bhlp.com Subject: GasTrader Energy Briefs

Daily Market Commentary October 25, 2001

TRADERS SKEWER ENRON . . .

Natural gas futures retreated in busy trading Thursday on the New York Mercantile Exchange. Much of the volatility was the result of trade and commercial accounts seeking to profit from a perception of market weakness by a prominent trade and commercial account. Other trade and commercial players bid the cash market higher with the intent of forcing liquidation of underwater short positions. Today's activity is not seen as significant in the determination of longer term price trends, and short term traders see the market working higher. . .

At the end of the day, the November futures fell \$.043 to \$2.938 per MMBtu. The December contract eased \$.068 to \$3.103 per MMBtu. . .

"This was called the 'get Enron day'. Many customers said that Enron was short the market and at first traders ran the cash market higher. For a while the cash market was ahead of the futures by as much as 10 cents, and as soon as the

gap was (partially) filled on the December charts at \$3.25 to \$3.30 (August 24), the bottom dropped out and when prices fell below unchanged, it got ugly," said a New York floor trader. . .

"Basically Enron was taken to the cleaners. Traders knew that Enron had to get out of positions. There was talk of funds needed to pay an SEC fine, and traders took advantage of that." . .

"There was no sympathy for Enron anywhere. Traders knew they had them on the run." . .

"I believe if prices can hold the \$2.80 to \$2.82 in the November, the best plan is to come back and buy again," he said. . .

"The activity today was just a 'get Enron' tactic. Other traders were hearing the same thing from their customers."

Welcome to PIRA Online

Sender	jross@pira.com
Recipients	[' joe.parks@enron.com ']
File	parks-j/deleted_items/65.

Dear PIRA Client:

You have been provided with access to PIRA Online, PIRA's comprehensive Internet-based energy library, as part of the Retainer Service that your company has with PIRA Energy Group. PIRA Online provides you with access to our latest reports as well as a searchable archive of past reports and additional data tables and charts.

Please note that your account may take up to 30 minutes to be activated.

To access the online service, please go to our website at www.pira.com <<http://www.pira.com/>>. Once you enter the site, go to the top right corner of the home page and click on "Retainer Client Login" to enter the Client section. You will be prompted for your User Name and Password, which are listed below.

User Name: [jparks](#) Password: [jp11280](#)

NOTE: These letters are case-sensitive.

Once you have entered the Client section, you have three choices for accessing your information. In the center of the page we list PIRA's latest 10 reports for those fuels sectors to which you have access (e.g. Global Oil, North American Gas, Electricity, and European Natural Gas); on the left is an option to go directly to the most recent issue of the main reports for any of these fuel markets; and at the top of the page you may select "Latest" to retrieve PIRA reports issued over the last 30 days by fuel, or "All Reports" to retrieve all PIRA reports (archived and recent) by fuel.

If you have any questions about your retainer, or if you are having a problem logging on to PIRA Online, please contact:

Client Services PIRA Energy Group 3 Park Avenue, 26th Floor New York, NY 10016 (212) 686-6808 support@pira.com <<mailto:support@pira.com>>

From: Connett, Hugh Sent: Wednesday, January 16, 2002 12:10 PM To: Zisman, Stuart Subject: Napoleonville Storage - Pad Gas Purchase and related transactions

Stuart: The letter below sets out Bridgeline's understanding of the basic terms we have discussed relating to the pad gas purchase and other related transactions. Please acknowledge your concurrence with these terms via an e-mail response at your earliest convenience. If you have any questions, please call me at (713) 345-5803.

Regards,

Hugh H. Connett Vice President

January 16, 2002

LRCI, Inc. 1400 Smith Street Houston, TX 77002

Attn: Mr. Stuart Zisman

Subject: Napoleonville Pad Gas purchase and related transactions summary

Pursuant to our recent conversations, the following outlines the basic terms of a definitive agreement to be entered into by Bridgeline Holdings, L.P. ("BHLP"), Bridgeline Storage Company LLC ("BSC"), LRCI, Inc. ("LRCI") and such affiliates of LRCI as are necessary to effectively consummate the following transactions related to the Napoleonville storage caverns and the current Natural Gas Storage and Brine Service Agreement, as amended ("Brine Agreement"), between LRCI and Dow Hydrocarbons and Resources Inc ("DHRI"):

1) LRCI owns and agrees to sell to BSC the full volume of pad gas, which is agreed to be 4,075,500 Dth, in place in DRHI Caverns #13 and #14 in the Napoleonville area at a per unit price equal to the April 2002 NYMEX Close price as of February 26, 2002 (February 2002 contract settlement date) less \$0.03/Dth to be effective March 1, 2002 ("Effective Date"). 2) LRCI shall assign the Brine Agreement to BSC by assignment effective March 1, 2002. LRCI shall be responsible for satisfying any outstanding obligations under the Brine Agreement, except that BSC shall make the fourth quarter 2001 and prorated first quarter 2002 (January and February) lease payments as determined in the Brine Agreement directly to DHRI. BSC shall remit to LRCI any amounts for the power and land credits which may be due LRCI under the Brine Service Agreement in respect of time periods prior to March 1, 2002, which as of the date hereof total \$11,401.35. 3) LRCI shall pay, or cause its appropriate affiliates to pay, the following: (i) \$223,000 to BSC to reimburse BSC for construction cost of the NS#1 dewatering line; (ii) \$328,000 to BSC to reimburse BSC for construction cost of the NS#1 24" gas flow line; and (iii) \$2,080,386 to BSC for the final Pad Gas Payment; all such amounts being due in connection with the capital contributions obligations of LRCI and certain of its affiliates under the Amended and Restated Limited Partnership Agreement for Bridgeline Holdings, L.P. ("LP Agreement"). 4) The definitive agreement will be entered into on or before February 15, 2002 and will contain representations and warranties from LRCI that (i) LRCI and the affiliates of LRCI joining in the execution of the closing documents under such definitive agreement are all of the parties that are required to join in such documents in order to effectively consummate the transactions as contemplated, (ii) LRCI and all such affiliates have all requisite authority to enter into such transactions; and (iii) neither LRCI nor any of its affiliates joining in the transactions is, or will be at such closing, a debtor in a bankruptcy proceeding.

The obligations of the parties to consummate the transactions described above are conditioned upon: (i) the simultaneous closing of all transactions described herein, (ii) LRCI's having completed and delivered to BSC, prior to such closing, all

documentation necessary to evidence of record LRCI's earlier contribution under the LP Agreement of the Napoleonville Storage Well #1 tracts and the related rights of way for the 24" gas flow line and the power easement to BSC's compression facility, and (iii) BSC's successful negotiation and contemporaneous execution of all agreements with third parties necessary to complete the transactions as contemplated, including without limitation agreements with DRHI to satisfactorily amend the Brine Agreement.

The parties agree that all payments due to LRCI at closing may be netted against the amounts that BSC will pay LRCI at closing and that BSC shall remit the balance to LRCI in full by wire transfer at such closing.

From: Meyer, Chris Sent: Tuesday, January 22, 2002 10:33 AM To: Parks, Joe Cc: Knippa, Mark; Zisman, Stuart Subject: FW: TWPL Contacts

Joe - per our discussion on Friday, any assistance you can give Mark and I in selling February TW (West Tx Pool) gas would be appreciated. We can sell more term if need be. I will forward you, under separate email, the details. Mark will provide the exact volume prior to the end of day. I've already talked to Allegany Supply Development and Cook Inlet. Neither has shown much interest. Mark sold January's balance to Sid Richardson. Below is a list of other potential parties that may have interest in the gas (including the contact for Sid Richardson).

Thanks

New Bridgeline menu options for CPR and TAGG

Sender	terry.sanvido@enron.com
Recipients	['bjorn.hagelmann@enron.com', 'georgia.blanchard@enron.com', 'ragan.bond@enron.com', 'j..yanowski@enron.com', ...]
File	parks-j/inbox/91.

Over the weekend CPR and TAGG were moved to a different set of databases. Because of this move, you will now have different menu options. There are two ways to access these new menu options:

1) Log off and log back in 2) You can go to Start|Programs|System Utility Applications|Update Start Menu

The new menu options contain 'BL'. (i.e. CPR BL Apps and TAGG - BL)

If you experience any problems, please call the appropriate pager number and we will try to resolve the issue as soon as possible.

Contact Information:

Deal Clearing on-call pager: 713-285-8715 TAGG/ERMS on-call pager: 713-318-5679 Sitara on-call pager: 713-284-2824
CPR on-call pager: 713-288-3368 TDS on-call pager: 713-284-0538

Or you can contact me at (W) 713-853-4754 or (C) 713-907-5217.

Thank You,

Terry

Sender	keith.considine@enron.com
Recipients	['joe.parks@enron.com', 'ed.mcmichael@enron.com', 'tim.bowler@enron.com', 'l..kelly@enron.com']
File	parks-j/deleted_items/668.

Thanks for the contacts.

Just to let you know we're already working with Greg Kaufman from Fame (a collaboration of Amerex and Prebon). They're pulling together sample data for us to preview.

Amerex - the day end quotes are limited in tenor (usually only out to Oct. 2002) & Joe Parks already has copies of most of these reports. Prebon - same tenor problem as Amerex. Don't know the status of the copies in-house. APB - Truequote - I'm already working with Trevor Atkins - We should get their data for free in the next couple of days

Supposedly the Fame, transactional data is better than the Amerex and Prebon end of day quotes. The issue here will likely be data format more than content. I'll let you know once we hear back.

Keith

Entex Non-payment

Sender	louis.dicarlo@enron.com
Recipients	['ed.mcmichael@enron.com', 'gerald.nemec@enron.com', 'joe.parks@enron.com', 'victoria.versen@enron.com']
File	parks-j/deleted_items/866.

Entex is several days overdue on their Nov01 invoice payment to Enron. I confirmed that the payment has not been received as of COB yesterday (1/23/02).

I spoke with the commercial contact, Royal Edmondson (713-207-3384) this morning. He was aware that they have not paid and eluded to the fact that Enron has not paid Tennessee's Nov01 transportation and storage invoice, which we are agent for Entex.

I also spoke with Ken Armstrong (713-207-3365) who proposed that Entex would pay Enron the commodity portion of the invoice and pay the transportation charges directly to Tennessee. I asked him to let me clear that with our attorney so that we didn't do anything to void the agency status. Ken also said he would consider paying us our full invoice amount if he was convinced that their transportation invoice was paid.

Gerald, please call me ASAP so we can resolve this and receive payment.

My New Position

Sender	jbelcher@chemweek.com
Recipients	[]
File	parks-j/inbox/159.

Dear friends and colleagues,

I wanted to inform you that I am leaving Hart Publications shortly to take a position as the Majority Staff Director of the House Subcommittee on Energy and Mineral Resources. The Subcommittee is part of the House Committee on Resources and has jurisdiction over oil and gas development, coal and hard rock mining and geothermal energy development on federal lands including the offshore Gulf of Mexico, Rocky Mountains and Alaska. My last day at Hart is May 10 and I start at the Subcommittee on May 13.

I am looking forward to this new opportunity though I have had a great experience at Hart Publications and Hart Downstream Energy Services and I am really going to miss the people I work with here. Hart is really like a family - in the Washington office and in Houston. I can't speak highly enough about the organization and the professional people I have worked with for over eight years.

If you want to reach me at the Subcommittee, the number is (202) 225-9297. I believe that my email will be jack.belcher@mail.house.gov <mailto:jack.belcher@mail.house.gov>

I look foward to staying in touch.

Sincerely,

Jack

Jack Belcher Deputy Director, Governmental Affairs Energy & Refining Policy Hart Downstream Energy Services p) 301.354.2036 f) 301.424-7260 c) 703.863-4309 jbelcher@chemweek.com <mailto:jbelcher@chemweek.com>

Congrates Jack!

-----Original Message-----

From: Jack Belcher [mailto:jbelcher@chemweek.com] Sent: Monday, April 29, 2002 1:31 PM To: Undisclosed-Recipient: @mailman.enron.com; Subject: My New Position

Dear friends and colleagues,

I wanted to inform you that I am leaving Hart Publications shortly to take a position as the Majority Staff Director of the House Subcommittee on Energy and Mineral Resources. The Subcommittee is part of the House Committee on Resources and has jurisdiction over oil and gas development, coal and hard rock mining and geothermal energy development on federal lands including the offshore Gulf of Mexico, Rocky Mountains and Alaska. My last day at Hart is May 10 and I start at the Subcommittee on May 13.

I am looking forward to this new opportunity though I have had a great experience at Hart Publications and Hart Downstream Energy Services and I am really going to miss the people I work with here. Hart is really like a family - in the Washington office and in Houston. I can't speak highly enough about the organization and the professional people I have worked with for over eight years. <?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

If you want to reach me at the Subcommittee, the number is (202) 225-9297. I believe that my email will be jack.belcher@mail.house.gov <mailto:jack.belcher@mail.house.gov>

I look foward to staying in touch.

Sincerely,

Jack

Cell Phones, Pagers & Telephony Services

Sender	announcements.enron@enron.com
Recipients	['dl-ga-all_enron_houston@enron.com']
File	parks-j/inbox/183.

Effective immediately Enron will begin moving all wireless devise accounts to individual employees for payment. With all the changes currently taking place within Enron, this change will allow each user to experience uninterrupted service and keep communication flowing while at the same time allow the individual user greater accountability for these controllable expenses.

Cell Phones and Pagers Over the next few weeks Enron will be changing the employee payment method of cell phones and pagers, regardless of the vendor. Optimum base rates and terms of service will be negotiated with pager and cell phone providers for the Houston area.

All Cingular and non-Cingular accounts will be rolled under one agreement (see below for Nextel users). (Field locations are excluded from this change and will be evaluated on a case-by-case basis as appropriate.) For billing purposes, this

action will require all cell phone users to have the device and service put in their name. While the phone will be in the employee's name it will be backed by Enron, therefore a personal credit check will not be required and you will not be required to sign a contract. This change will allow each user to verify their bill for accuracy and to ensure that the bill is paid on time.

All monthly charges for cell phone and/or pagers are to be submitted for reimbursement via XMS. Direct billing and/or group billings will be phased out over the next few weeks. XMS training and class schedules will be forthcoming.

Please follow the steps below to make the necessary changes to your account: ? Contact your service provider and make arrangements to have your bill paid monthly either by credit card or personal check. The Cingular contact is Charlotte McGowan, (972) 706-1968. If you need information regarding contacts for other providers, please contact Darin Lee Carlisle @ Global Strategic Sourcing ext - 5-3808. ? Submit the expense item to your supervisor for reimbursement through XMS. ? Do not sign a contract, as you will become personally liable for the account for the life of the contract. ? Change the address on your bill to either your home address or your current office address to ensure timely receipt of the invoice in the future.

Nextel Phone/Two-Way Radios We are currently working with Nextel to restructure billing to individual employees. All monthly charges for Nextel services will be submitted for reimbursement via XMS. Pre-approval by Business Unit CAO will be required for all Nextel phone/two-way radios.

Long Distance An individual code will be assigned to each Houston based employee for use when dialing long distance calls. These codes will create individual accounts for each employee so that they can identify their long distance usage and reimburse the company for personal calls they may make. (Field locations are excluded at this time.)

Conferencing WorldCom will provide all audio conferencing services. Monthly conferencing charges will be reviewed and approved by Department heads. Training will follow under separate cover.

Training / Questions Training sessions and additional communications regarding these changes will follow in the next few days. Please contact Darin Carlisle at (713) 345-3808 or Peter Goebel at (713) 345-3325 with any questions regarding the above changes. Questions regarding XMS training should be directed to Tammy Hopkins at (713) 345-3631.

Derryl Cleaveland, Vice President Global Strategic Sourcing

Here are the files containing in-the-money live position data. There are 4 files : 2002 monthly, 2003 monthly, 2004 monthly and 2005 out yearly. The summary information is on the "Financial Book Positions" tab.

I did not consolidate them into one report just in case you needed to look at the supporting information.

The physical files should be ready within the next few minutes.

Let me know if you have questions.

Greg

WorldCom Conferencing Training Announcement

Sender	announcements.enron@enron.com
Recipients	['dl-ga-all_enron_houston@enron.com']
File	parks-j/inbox/114.

As previously announced, Enron has chosen WorldCom Conferencing as its preferred conferencing service provider. WorldCom can help us achieve our cost-saving objectives in conferencing, but your involvement is required. To Make a Reservation for Your Next Conference: Call 800-475-5000 Provide your authorization code: 6160358 Reserve on-line by using the Online Reservation System at <<<http://e-meetings.wcom.com/>>>. You can also modify, change, or cancel your conference by using this convenient tool. Audio Conferencing - Whether you need to collaborate, exchange information or give a presentation, WorldCom's multi-featured audio conferencing service can help ensure that you meet and exceed your daily business goals. One of the quickest and most cost-effective ways to place a conference call is through a product called Instant Meeting. Instant Meeting is designed for small staff meetings, spontaneous events such as crisis management or to pull teams together for rapid decision-making. Many people use Instant Meeting for regularly recurring business meetings that don't require the intervention of a conference coordinator. Why use Instant Meeting? It's available 24 hours a day, 7 days a week, 365 days a year. You will save the administrative time spent setting up a reservation and distributing call information. WorldCom provides the same dial-in number (toll or toll-free) and pass codes for all meetings. There is secure password access and added security of separate leader and participant pass codes. You pay only for usage on Instant Meeting accounts of fewer than 20 ports. Larger port subscriptions carry a monthly fee in addition to usage (up to 100 ports available). For more sophisticated reservations, you can also use these other service levels: 1) Premier Service - Designed for high-visibility meetings, focus groups, press conferences, investor relations calls, presentations to large groups, or other events that require a dedicated meeting manager to handle your call from start to finish. 2) Standard Service - Designed for meetings with medium-sized groups, such as trainings or project management meetings. 3) Unattended Service - Designed for small internal meetings, such as staff or team meetings. Other services available from WorldCom Conferencing: 1) Video Conferencing - Video Conferencing provides businesses with all the advantages of face-to-face interaction and saves money on travel expenses. 2) Net Conferencing - Net Conferencing takes your meetings to the Internet and enhances your audio-only calls by adding a visual element to your meetings. With

this Internet-based service, you can bring people to an environment that allows them to share and review information. To help you learn more about WorldCom's services, a WorldCom Conferencing Field Specialist, Torri Rhodes, has arranged a training seminar. Please RSVP for this seminar by replying to torri.rhodes@wcom.com <<mailto:torri.rhodes@wcom.com>>.

ON-SITE TRAINING DATE: Tuesday, May 14, 2002 TIME: 10:00 - 11:00 LOCATION: ECN5C2

Please remember to RSVP by replying to torri.rhodes@wcom.com <<mailto:torri.rhodes@wcom.com>> . If you have any questions regarding conferencing, please contact our Account Representative, Darin Carlisle or Torri Rhodes:
