Recipients	['doug.gilbert-smith@enron.com', 'dana.davis@enron.com', 'j..sturm@enron.com']
File	presto-k/sent_items/97.

Below are contacts if you need help over the weekend with new docs, employee questions, etc. Amy Fitzpatrick Cell: 713-859-6266 Jeanie Sloan Cell: 713-553-7049

I need to know by noon on Sunday who is in and who is not. For people not committing, try to get there contracts back so we can re-allocate \$'s as necessary. All contracts signed by Sunday at noon will get a \$2500 check from me personally. I encourage all of you to contribute to the fund to entice early signing. If you need new docs printed, please contact Amy or Jeanie at above #'s or call me.

Harry - You and your guys situation is different, therefore, ignore the Sunday issue. However, please contact Amy and/or Jeanie to generate contracts for Steve and Rob (use the \$'s we talked about).

List of key employees who have not signed:

Gupta Suarez Carson Broderick Misra Wang Stalford Ballato Imai

The ERCOT desk is almost done (1 more to go) - kudos to Doug

From: Jon Cartwright [mailto:JCartwright@FI.RJF.com] Sent: Monday, August 06, 2001 9:52 AM To: RJF Energy-Gram (E-mail) Subject: ENERGY: Nuclear Mystery Close To Being Solved

<<IENER080601BSOW.PDF>> Raymond James Energy Stat of the Week, published 08/06/01. Nuclear power production is about to reach a peak and then drop off dramatically through the course of 2002. Record levels of nuclear power production have offset the need for gas-fired electric production to the tune of an estimated 1.5 to 2.5 bcf/d over the past six months and should peak at about 3.5 bcf/d late this fall. However, nuclear power fleet utilization is expected to drop to under 91% heading into summer 2002, down from a historic high of nearly 97% this past summer. What does this mean to gas demand for the balance of 2002? Based on our work, we see the Y-O-Y return of between 1.0 to 1.5 bcf/day of natural gas demand when nuclear production hits the production cliff next spring. While we have generally been cautious short term on gas prices the past few months, we have begun to identify or fill in some portion of the gas demand quotient for next summer. Unlike this summer, next year is shaping up to be a far more bullish year for gas, based on the need for gas-fired electric production to pick up the slack. The attached file is in the Adobe Acrobat *.PDF format. If you do not have the latest version of the Adobe Acrobat Reader, you can download it free from <http://www.adobe.com/prodindex/acrobat/readstep.html#reader>. If you should experience problems with this email, please contact Datra Roter, droter@ecm.rjf.com. File	presto-k/sent_items/643.

Only if nuclear fuel storage problems persist. The nuclear fleet, if unencumbered by NRC or spent fuel storage problems, will operate at 90-95% (95% during non-refueling years and 90% during re-fueling years).

Remember re-fuelings are now on a 24 month cycle and the next big cycle is spring and fall of 2003. The 2002 re-fueling outages are actually less than normal.

Recipients	['angela.davis@enron.com', 'lloyd.will@enron.com']
File	presto-k/sent_items/137.

I want to make sure we get the hardware and software (I agree that this is = already the property of ENA) into Netco like we have the rest of the softwa= re/hardware critical to the trading organization. The payable is sunk and= should be left with the estate.

-----Original Message-----

From: =09Davis, Angela =20 Sent:=09Monday, January 07, 2002 8:14 AM To:=09Presto, Kevin M. Cc:=09Schuler, Lance (Legal) Subject:=09FW: Enron-SE Corp.

See the below. Do you still want to transfer the hardware and software? A= Iso, I would assume that Netco would assume the \$1.5 million payable. Shou= Id the memberships be assigned, if assignable?

Angela D. Davis Enron North America Corp. 1400 Smith Street, EB3817 Houston, Texas 77019 Tel: (713) 345-8347 Fax: (713) 646-3393 e-mail: angela.davis@enron.com

-----Original Message-----

From: =09Davis, Angela =20 Sent:=09Monday, January 07, 2002 7:53 AM To:=09Schuler, Lance (Legal); Muller, Mark S.; 'mitch.taylor@weil.com'; 'st= uart.ogg@weil.com'; 'mary.korby@weil.com' Subject:=09Enron-SE Corp.

I have been told that all control area agreements have lapsed and are no longer in effect. Per David Portz, there are still in existence memberships = with regional authorities (you pay dues and you get to vote) which he says = will lapse when the regional authorities determine that Enron no longer controls any load. Also, there are items of software and hardware used by Enron-SE Corp., which would be transferred to Netco. I do not think that the = hardware and software is owned by Enron-SE, since purportedly the only asset showing on the books of Enron-SE is a receivable of \$1,218 from ENA. The = software and hardware was purchased from ESCA and \$1.5 million is still owed. David Portz thought that EPMI or ENA actually purchased the hardware and software (and I think probably still owns it). I am attempting to ascertain ownership from accounting. Based on these facts, it does not appear that there is any great benefit to the estate in keeping the hardware and software. Further, the outstanding payable of \$1.5 could be transferred to Netco.

Angela D. Davis Enron North America Corp. 1400 Smith Street, EB3817 Houston, Texas 77019 Tel: (713) 345-8347 Fax: (713) 646-3393 e-mail: angela.davis@enron.com

Transmission Expansion and Systems in Transition Conference

Feb. 5-8, 2002, Miami, Florida

OVERVIEW

This conference will examine the business and regulatory challenges to U.S. electric systems in transition in effectively expanding transmission capacity to meet new demands in the larger and more competitive regional markets emerging under FERC's RTO initiatives. The conference will review the parameters of these challenges and possible solutions to them. It will examine technology options and new business models for transmission expansion. It will analyze emerging proposals for effective transmission planning and pricing, including market-based pricing alternatives to FERC's traditional pricing methods. The conference will also discuss what it will take in legislative action and regulatory initiative to achieve an efficient regime for ensuring that the nation has a reliable grid and regional trading system.

The brochure for the Conference and associated Workshops can be obtained by clicking on the link below:<http://www.euci.com/pdf/trans_expn.pdf> << http://www.euci.com/pdf/trans_expn.pdf>>

Electricity Market Design Conference

March 25-26, 2002, Atlanta, Georgia

OVERVIEW

This Conference will focus on how to design competitive electricity markets that maximize the benefits to consumers while at the same time maintaining the financial viability of companies participating in these markets.

The brochure for the Electricity Market Design Conference, March 25-26, 2002, Wyndham Hotel Downtown, Atlanta, GA can be obtained by clicking on the link below:<<http://www.euci.com/pdf/MrktDesgn.pdf>> <<

Power Generation Asset and Portfolio Management Conference

March 26-28 2002, Atlanta, Georgia

OVERVIEW

This conference will highlight the commonalties and common applications between the asset management processes used throughout the enterprise. The conference will emphasize the need to link the physical power generation asset management processes to the activities and processes of the trading and marketing process. The processes of Asset management will be addressed from three distinct perspectives, first, the long-term perspective of portfolio developers, second the more medium term perspective of maintenance/system planners and third the conference will link short term issues of the trading & marketing departments. The purpose is to show how these processes can be integrated to the individual assets (plants) in order to provide consistent and profitable strategies for the generation asset owner.

The brochure for the Power Generation Asset and Portfolio Management Conference, March 26-28, 2002, Wyndham Hotel Downtown, Atlanta, GA can be obtained by clicking on the link below:

<<http://www.euci.com/pdf/powergeneration.pdf>> << <http://www.euci.com/pdf/powergeneration.pdf> >>

Ancillary Services Conference

April 10-12, 2002, Denver, Colorado

OVERVIEW

As more and more regions in North America open wholesale markets to competition, the importance of ancillary services is increasingly recognized. These services, generally provided by the same generators that produce the competitive energy product, are vital for both commerce and reliability.

This conference will cover the key engineering, economic, market, and policy issues associated with these functions. The conference will also present updates on the status of the various markets (including market design and operation problems and their solutions, successes, prices and costs) in North America. These markets include New England, New York, PJM, ERCOT, and Alberta. Developing markets, such as Ontario, will also be covered. The market designs encompass issues such as day-ahead scheduling, real-time operation, integration with the markets for energy and congestion, measuring the real-time delivery of these services, the operating costs to produce these services, and the potential for customer loads to supply these services.

The brochure for the Ancillary Services Conference, April 10-12, 2002, Wyndham Hotel - Tech Center, Denver, CO can be obtained by clicking on the link below:<http://www.euci.com/pdf/anc_svcs.pdf> << http://www.euci.com/pdf/anc_svcs.pdf >>

Please print the brochure and fax the registration form back to us at 303-741-0849 if you would like to attend any of these events. You can also register by calling us at 303-770-8800 or online.

We have updated our website to include new conference proceedings on recently-held "Electric Power Market Performance", "Performance-Based Ratemaking", "Ancillary Services", "Performance Management for Electric Distribution Companies", "Power Generation Asset Management", and "Power T&D Asset Management" conferences. Please visit www.euci.com << <http://www.euci.com/> >> and review the conference proceedings section for these and other proceedings.

Kindly forward this announcement to your colleagues who might benefit from attending these events.

Best Regards,

L. Mrig

Kevin,

Thanks for the return call today. Jess Hewitt returned a call I put into him this morning telling me that you would be the person I should talk to. I am the VP of Sales for Genscape, www.genscape.com, and we have developed a product which collects real time plant output data and sends that information real time to traders primarily in the short term power markets. Our product is currently being used and/or tested at over a dozen top power trading firms in the US, and the response has been fantastic.

There are other methods of receiving this information currently, but none of them are as fast and as accurate as the Genscape data, as we have set up proprietary monitors outside of the right of way on over 130 coal and nuke plants (primarily) nationwide and involuntarily capture their output data every minute or so, thus we can alert traders to plant outages or plants coming on or off line in real time.

I would like to discuss Genscape with you at your convenience, or if there is someone else inside UBS Enron to talk to please let me know who that person is. I can be reached at 502 583 4315. Thank you and I look forward to speaking with you.

Regards,

Mike McAuliffe VP Sales and Marketing Genscape, Inc

and Electric Power Market Performance Conference

Distributed Generation Conference August 7-10, 2001 Denver, Colorado Overview

The distributed generation (DG) market is growing rapidly, estimated to reach 25-30 gigawatts by 2010. Join us at the Distributed Generation Conference and hear the latest information and overview of the business and technical prospects for distributed generation. Our panel of expert speakers will address the economics of distributed generation, evolving regulatory policies, market projections, interconnection challenges, pricing issues and much more. The Conference will also debate the role of distributed generation (where and how), and identify the strengths and weaknesses of the different generation technologies. The brochure for the Conference and associated Workshops is attached in pdf format. Please print the brochure and fax the registration form back to us at 303-741-0849 if you would like to attend. Or you may register online.

Electric Power Market Performance Conference September 20-21, 2001, Denver, Colorado Overview

Each year there is additional opportunity to draw lessons regarding electricity market structure and design from actual market performance. These lessons are leading to a convergence in market design, at least in the Eastern Interconnection and Ercot. One focus of this conference will be on the lessons to be drawn from the experience of the new Ercot markets, the continuing market design problems in California, and the difficulties in developing and implementing a market based congestion management system in the Midwest. A second focus of this conference will be on the existing markets in PJM and New York, which have now moved beyond managing their internal markets and are being pushed by market participants and regulatory agencies to better address inter-RTO coordination and develop market based incentive systems for transmission expansion. Finally, the conference will highlight one of the important, but little noticed successes of the Eastern ISOs, which is the explosive growth in the PJM and New York financial rights auctions. The brochure for the Conference and associated Workshop is attached in pdf format. Please print the brochure and fax the registration form back to us at 303-741-0849 if you would like to attend. Or you may register online. Kindly forward this announcement to your colleagues who might benefit from attending these conferences/workshops/courses. Best Regards, L. File	presto-k/deleted_items/703.

Performance Management for Electric Distribution Companies An Executive Forum October 25-26, 2001, Atlanta, GA

OVERVIEW

Deregulation is introducing competition into the electric utility industry in an ever-increasing rate, and it is requiring companies to consider dramatic changes in their business processes, in the operation of their businesses, and in managing their assets. Issues such as customer satisfaction, performance based rates, operational reliability targets,

operational efficiencies, risk management, and rate reductions are among the new business drivers.

With the advent of new choices open to the smallest retail customers as well as the largest industrials, distribution companies are re-engineering their businesses and re-establishing their corporate priorities in response to these new challenges. This new business environment has brought performance management to the forefront for the electric distribution companies, and they are being driven by regulators, customers, and financial rating agencies to improve all aspects of their performance.

Through this conference, we have gathered leading executives from distribution companies, wires companies, generation companies, energy marketers, regulators, and market participants to openly discuss the issues, their experiences, and their corporate strategies. Our objective for this executive forum is to provide you with new insights into how electric distribution companies are addressing these issues and concerns, and to help you formulate your own corporate approach to this challenging and complex new world.

The website link for the conference is provided below. Please click the link to see the program agenda, general information including location and hotel, and online registration. You can also register by calling us at 303-770-8800. Performance Management for Electric Distribution Companies, October 25-26, 2001, Atlanta, GA <http://www.euci.com/confoverview.asp?ConfID=11>

Ancillary Services Conference October 31-November 2, 2001, Denver, CO

OVERVIEW

The Ancillary Services conference will explore the rapidly changing and fascinating engineering, economic, market, and policy issues related to bulk-power ancillary services. These issues are difficult to resolve because these services are essential for both reliability and commerce, and it is often difficult to disentangle the two.

Topics to be covered at this event include centralized vs. supplier unit commitment, integration of ancillary-service markets with energy and congestion markets, relationships among forward and real-time markets, measuring the performance of ancillary-service delivery, operating costs to provide these services, retail-load provision of some ancillary services, comparisons among the existing ISOs and future RTOs in their treatment of ancillary services, and the feasibility of letting price influence the amount of reserves acquired.

Electric Utility Consultants, Inc., a long-time provider of timely conferences and workshops for the electric industry, has assembled a covey of top experts to explore all aspects of the emerging field in a conference devoted exclusively to Ancillary Services.

The website link for this conference is provided below: Ancillary Services Conference. October 31-November 2, 2001, Denver, CO <http://www.euci.com/confoverview.asp?ConfID=10>

Performance-Based Ratemaking Conference December 5-7, 2001, Denver, CO

OVERVIEW

Performance Based Ratemaking (PBR) is emerging as a key element of the restructuring of the electric utility industry. For PBR to be effective it must be designed carefully and uniquely for each utility so as to align the interests of the utility, the shareholders and the customers and also to make sure that PBR is successful in achieving efficiency and service quality.

EUCI has put together a covey of expert speakers to review and address the latest PBR developments and applications. Join us in Denver and get the latest state-of-the-art information and insights you will need to develop an effective PBR strategy for your company.

The website link for this conference is provided below: Performance-Based Ratemaking Conference, Dec. 6-7, 2001, Denver, CO <http://www.euci.com/confoverview.asp?ConfID=9>

Electric Power Market Performance Conference December 12-14, 2001, Denver, CO

OVERVIEW

Each year there is additional opportunity to draw lessons regarding electricity market structure and design from actual market performance. These lessons are leading to a convergence in market design, at least in the Eastern Interconnection

and ERCOT. One focus of this conference will be on the lessons to be drawn from the experience of the new ERCOT markets, the continuing market design problems in California, and the difficulties in developing and implementing a market based congestion management system in the midwest.

A second focus of this conference will be on the existing markets in PJM and New York, which have now moved beyond managing their internal markets and are being pushed by market participants and regulatory agencies to better address inter-RTO coordination and develop market based incentive systems for transmission expansion.

Finally, the conference will highlight one of the important, but little noticed successes of the Eastern ISOs, which is the explosive growth in the PJM and New York financial rights auctions.

The website link for this conference and associated workshop is provided below: Electric Power Market Performance Conference, Dec. 13-14, 2001, Denver, CO <http://www.euci.com/confoverview.asp?ConfID=12>

We have recently updated our website to include new conference proceedings on recently-held "Power Generation Asset Management" and "Power T&D Asset Management" conferences. Please visit www.euci.com and review the conference proceedings section.

Kindly forward this announcement to your colleagues who might benefit from attending these events.

Kevin,

I have spoken with Elizabeth and Bill and they both said that they will be at your meeting. I was unable to reach Christi Nicolay however I have left her a voicemail on her cell phone and told her that she was necessary for this meeting.

T Jae,

I will not be here Wednesday morning and did not set up a conference bridge because it is just with Portland. You might want to arrange something different or contact them yourself. This conference room (06716) is the one next to John and Louise and it is reserved for you.

Have a Happy New Year!!!

Kim -----Original Message----- From: Hillis, Kimberly Sent: Monday, December 31, 2001 3:05 PM To: Sturm, Fletcher J.; Gilbert-smith, Doug; Davis, Mark Dana; Arora, Harry; Nicolay, Christi L.; Sager, Elizabeth; Belden, Tim; Calger, Christopher F.; Bradford, William S.; Duran, W. David; Robinson, Mitch; Curry, Mike Cc: Presto, Kevin M.; Black, Tamara Jae Subject: Meeting on Wednesday, January 2 - 9:30 am

Kevin Presto is requesting that you attend a meeting regarding Organizing an Action Plan for the Start-up of Netco.

The meeting will be held in ECS 06716 at 9:30 am, Wednesday, January 2, 2002.

For Tim and Chris, could you please call 713-584-2067. This is the telephone number in the conference room.

If you should have any questions, please call T Jae Black at 3-5800.

Thanks

Kim

Could you meet with the son of a client on the captioned item? He'll be here the week of Feb 11th; I'm out of town. I don't yet know the dates. He is Eric Fabrikant, son of Charles, Chrm & CEO of Seacor Smit (NYSE: CKH).

Eric wants to be in the Energy business and is meeting several exec's that week. Yes, you could be one. I would appreciate your help.

Best regards,

Gas or Power? Gas is Scott Neal and Power is Doug Gilbert-Smith for ERCOT (TX) and Fletch Sturm for LA/AL (Gulf Coast).

The Williams energy traders know these folks so these questions must be coming from non-commodity people at Williams.

As most of you already know I am leaving Enron after five years to go to Harvard MBA School. My times at Enron have been beyond the expectations that I had when I stepped into trading hourly power at odd hours of the night when I first became an Enron analyst. Since the very beginning, Enron has given me the chance to demonstrate my talents and the chance to prove myself. No other company would have given those chances at such a young age. I like to think that I repaid the favor to at least some degree and am leaving Enron a little stronger than it would have otherwise been.

Even though I contemplated several other opportunities to leave over the last five years, I never left for another company. I came to realize that the people that work here are the best, and I have always strived to be among the best. Aside from the professional skills and energy, the people here have become good friends of mine. Enron is among the best corporations in the world because of the high quality of people that we have attracted over the years.

Special thanks to Jim Fallon, Jeff Golden, Mark Muller, Dave Delainey, Kevin Presto, and Rogers Herndon, all of whom have provided me direction and excellent leadership during my time here.

Please find my forwarding email address, phone numbers, and address. If any of you need anything or come to Boston please look me up, I will always buy the first beer! Good luck to you all.

Your friend,

John

File	presto-k/sent_items/484.

Let's bring him in for an interview.

-----Original Message-----

From: Will, Lloyd Sent: Saturday, June 23, 2001 8:21 AM To: Presto, Kevin M. Subject: FW: Craig Carmichael

Kevin this is the forecaster with an attitude.

Sounds like he has a fair amount of drive and would fit in well at Enron.

I have been emailing Craig once a week until I heard from Gerald who I have a lot of faith in as far as reference as I did not want to inherit a problem PHD. I have asked research (Vasant) to check him out as well.

I believe that this cat might be what I need to get the forecast Rogers and Services need for our wholesale to retail delivery amounts with limited or no metering. I would have him work on a project that uses the metering we receive to forecast Rogers wholesale delivery requirements hourly.

I will proceed to bring him in unless I hear otherwise from you.

Lloyd

I am on Craig's committee and worked with him for two years (1999-2000) through his major professor, Eric Bartlett. I think that Craig is a self-starting person, familiar with neural networks and statistics. He has done a good job with programming on the internet and is very interested in forecasting.

I think that with the right opportunities, he will do very well.

Gerry

Make sure Rogers is at this meeting.

-----Original Message-----

From: Gilbert-smith, Doug Sent: Friday, September 28, 2001 12:57 PM To: Presto, Kevin M. Subject: RE: Cities Aggregation Power Project Visit - Monday, October 1

this goes back to my question on the portfolio. We cannot serve these customers from the get go as effectively as the incumbent portfolios so we are going to have to make the decision somewhere that we want the load and that we will need some 'loss-leaders'. I am working on this for our own deals and this will be reflected in our curves.

I have not heard anything more on the deals lost since the last report showing we were pretty competitive. If they have a problem with the curves I would like to hear it directly. I have a meeting with Janet next week and I will go over this issue and the Ader issue then.

-----Original Message-----

From: Presto, Kevin M. Sent: Friday, September 28, 2001 12:51 PM To: Gilbert-smith, Doug Cc: Curry, Mike Subject: RE: Cities Aggregation Power Project Visit - Monday, October 1

We are losing lots of deals in ERCOT on price. This is part of the reason they are being so aggressive with customers and alternative suppliers. I have received this feedback directly from Rogers and Janet.

-----Original Message-----

From: Gilbert-smith, Doug Sent: Friday, September 28, 2001 12:40 PM To: Presto, Kevin M. Cc: Curry, Mike Subject: RE: Cities Aggregation Power Project Visit - Monday, October 1

thanks for the info.

Until we straighten this out internally we will just look ridiculous in front of the customer. Once again, this is an obvious wholesale product. I am happy to compete on price, the question is how much damage does this do externally.

Doug

-----Original Message-----

From: Presto, Kevin M. Sent: Friday, September 28, 2001 11:50 AM To: Curry, Mike; Gilbert-smith, Doug Subject: FW: Cities Aggregation Power Project Visit - Monday, October 1

Looks like Ader & Co. at work in ERCOT. I view this as a big problem. These customers need to be covered by wholesale. Both of you should take this as a slap in the face.

-----Original Message-----

From: Brockwell, Jennifer Sent: Friday, September 28, 2001 10:31 AM To: May, Tom Cc: Presto, Kevin M.; Black, Tamara Jae Subject: Cities Aggregation Power Project Visit - Monday, October 1

Tom, Will you be available for the following visit? This is another large group... In order to keep this from being disruptive, we were thinking of dividing the group into two for two separate overviews. These overviews should only be 10 minutes in length. One would be at 11:00 am and the other at 11:15 am.

Let me know if this is a possibility.

Thanks. Jennifer

Date: Monday, October 1 Time: 11:00 am Visitor: Cities Aggregation Power Project (17 of them) Enron Host: Michelle Robichaux, Representative National Energy Sales

Value Prop: EES is looking to provide electric commodity savings off the PTB for an aggregated load of 70 Texas municipals.

Objectives: I would like CAPP to leave knowing just how different Enron is from its competitors. This would include Enron's risk management expertise and size and scope of marketing of gas power and other commodities.

File	presto-k/sent_items/73.

Fletch Sturm (works for me and runs the MW power group) will be following up with you or Allen. We need to make sure we coordinate with gas and west power so no duplication is occurring. We need to also make sure that UBS is not already a client who receives PIRA materials.

-----Original Message-----

From: "Victoria Watkins" <vwatkins@pira.com>@ENRON Sent: Thursday, January 24, 2002 8:58 AM To: Tim Belden Cc: Allan Stewart 1; kpresto@enron.com; Black, Tamara Jae Subject: PIRA's Services - Description & Fees

Hi Tim,

Thank you the phone message about your continued interest in PIRA Energy Group. I look forward to hearing from you or Kevin Presto about the PIRA analytical services you want to purchase for your new business. (Kevin, I work for Allan Stewart in PIRA's electricity group and also handle sales/marketing of PIRA's services.)

Attached is a description of PIRA's service offerings and an Excel file showing a price matrix with annual fees. Our base retainer service is for up to 10 users at one site (office location) under a site license agreement. One retainer is \$25,000 (e.g., natural gas), two retainers are \$35,000 (e.g., electricity and natural gas) and three retainers are \$40,000 (add oil). Fees for additional services such as emissions market intelligence and the daily electricity demand forecast are shown to the right of the main table. Clients with users of PIRA's services in multiple offices can arrange a site license for higher usage.

Best regards, Victoria Victoria Watkins PIRA Energy Group 3 Park Ave., 26th Floor New York, NY 10016 (212) 686-6808, ext. 315

Distributed Generation Conferenceand Workshops August 7-10, 2001 Denver, Colorado Overview

The distributed generation (DG) market is growing rapidly, estimated to reach 25-30 gigawatts by 2010. Join us at the Distributed Generation Conference and hear the latest information and overview of the business and technical prospects for distributed generation. Our panel of expert speakers will address the economics of distributed generation, evolving regulatory policies, market projections, interconnection challenges, pricing issues and much more. The Conference will also debate the role of distributed generation (where and how), and identify the strengths and weaknesses of the different generation technologies. RE: US Energy Secretary Conference Call

Sender	lloyd.will@enron.com
Recipients	['m..presto@enron.com', 'john.suarez@enron.com', 'rika.imai@enron.com']
File	presto-k/deleted_items/747.

Attached is the real audio files from the above CERA conference for your review. All indications are that government and industry will be working closer with possible real time reporting requirements to manage any impact to the flow of oil in America much like what was setup during world war II.

CERA Chairman Daniel Yergin hosted a presentation by US Energy Secretary Spencer Abraham, at which the Secretary spoke on US energy policy and the legislative implications of the war on terrorism.

The importance of energy security strategy has certainly been raised, and Secretary Abraham spoke about actions by both industry and government to adapt to this new environment. He also noted requests from President Bush and Senate Majority Leader Daschle to the US Senate to enact a new US energy strategy. Finally, Secretary Abraham described his agency's efforts to improve communication between government and industry decision makers in this period of bipartisanship and heightened focus on energy security.

CERA Chairman Daniel Yergin introduces U.S. Secretary of Energy Spencer Abraham. [duration: 2:23]

U.S. Secretary of Energy Spencer Abraham touches on recent key issues facing the U.S. energy policy following the events of September 11. [duration: 20:50]

CERA Chairman Daniel Yergin briefly summarizes some of the key points discussed by Secretary of Energy Abraham. [duration: 4:51]

From: Daniel Yergin, Chairman, Cambridge Energy Research Associates

Re: US Energy Secretary -- CERA Client Briefing

I wanted to be sure you were aware that U.S. Energy Secretary Spencer Abraham is delivering an exclusive telephone briefing to CERA's Global Energy clients on Friday, October 12 at 11:00am eastern time on "US Energy Policy: What's Ahead." I will be chairing this call.

This is a unique opportunity for you to hear directly the Secretary's views on U.S. energy policy post the September 11 crisis.

I hope you will be able to join us.

Sincerely,

Daniel Yergin

To enroll, please contact Kathleen Doherty via e-mail at +617 498 9194 before 10am eastern time Friday, October 12.

To participate in the call, please call in on one of the following numbers approximately 10-15 minutes before the call:

Within the United States: 1-888-695-0612 Outside the United States: (719) 457-2663 Confirmation code: 506303 Title of the call: CERA Call

Playback Via CERA.com A recording of this call will be posted in the Global Energy section on CERA.com. Details will be made available following the call on Monday, October 15.

Via Telephone In addition, you will be able to access the replay via telephone by calling 1-888-203-1112 (within the U.S.) or (719) 457-0820 outside the U.S.). Please use confirmation number 506303 to access the playback. This version of the call will be available until November 12, 2001.

Kevin I had the Capacity forecast column units mislabeled Here is the revised one. If you want, just have your NEEPOOL lead type over our forecast and re-send to us. We will not let this get out of our shop, and we will get you in on a block to buy.

Thanks again Fred

Confidential Kevin I know you would not bid the entire 1000Mwe, we are trying to come up with a proxy to assist in the bid, I am also trying to get you in with Mr.Green and the 150-200Mwe indicative would be great. I need it by Wednesday

(2/13/02). Thanks for the return e-mail.

Did you see the alert from the FBI yesterday and today ?

Fred

I'll get back with you on this within a couple of days. Do you want an indicative bid for 7x24 bus-bar energy (2, 5 and 10 years). We would not bid on the entire 1000 MW - maybe 150-200 MW.

thanks for the info.

Kevin I just got the attached e-mail returned with your new address. Let me know if this one makes it thru Fred

Confidential Kevin I know you are quite busy but I wonder if you could get your lead trader to look the following forecast for NEEPOOL. This may result in you getting the lead for a large block of the power so be conservative but have enough in there so it is a win win if you know what I mean.

Have him fill in what he can. The client will be looking long 10 year, with maybe a series of 2 and 5 year deals. Should be putting out around 500 to 700 Mwe.

Do not disclose the plant eh ? Call me at 864-370-0217 or 864-235-5607 or mobile 864-275-3193 Thanks Fred

Subject: Power Documents (Final)

Attached are final forms of certain Power Trading documents:

1. Master Agreement EEI (full blown), with all credit terms left blank, for negotiation with counterparties (CP);
2. EEI Collateral Annex, including paragraph 10, for use with the Master Agreement EEI;
3. GTC EEI, Online with credit terms (unilateral right to call for collateral at any time for any reason), for use as the default GTCs Online when dealing with CPs with whom there will be a credit requirement (but could also be used for trades entered into orally assuming we secure the CP consent to the form of agreement, including cover page, prior to entering into trade);
4. GTC EEI, Online without credit terms, for use as the default GTCs Online when dealing with CPs with whom there will not be a credit requirement (but could also be used for trades entered into orally assuming we secure the CP consent to the form of agreement, including cover page, prior to entering into trade).

While these documents have been discussed generally with UBS, UBS has not yet had an opportunity to review the actual final version.

100 copies of the first two documents (which will be combined as one for distribution) will be delivered by Genia to Dave shortly.

Please call with any questions/comments.

REPORT - THE POWER INDUSTRY: LESSONS FROM OTHER CYCLICAL INDUSTRIES

* We recommend reading our attached report. * We interviewed six analysts who cover cyclical commodity industries. These include: airlines, chemicals, oil/refining, paper and forest products, semiconductors, and semiconductor equipment. * What are the lessons for the Power industry?...Where are we on the cycle? * The answer lies in the relationship between capacity and pricing. * Although we do not draw a conclusion here, we will be analyzing the factors which answer these questions. * We think you will find the framework we've established useful in thinking about these issues.

NETCO Implementation Template

Sender	m..presto@enron.com
Recipients	['kimberly.hillis@enron.com']
File	presto-k/sent_items/149.

Attached is the spreadsheet version of the template we discussed this morning. I have added the additional columns everyone requested. I would now like the business unit leads to fill in the blanks such that we have an initial Power Implementation Plan that can be delivered to Louise on Friday.

With respect to East Power (I am out Thursday and Friday), I am delegating to all of my desk heads the responsibility the following: 1) Have all of the forms attached spreadsheet forms complete 2) A product offering sheet is added to the template.

Fletch & Dana - Please take the lead on creating the product offering list (physical and financial). My recommendation is we put products out through 03 for all regions (financial and physical). Obviously, the physical products will be contingent on receiving a power marketing license.

Cory and Don Baughman - Please take a crack at identifying all of the transmission service agreements we need for the East (Christi has started a list already).

Please call me on my cell (713-856-3923) with any questions.

Kevin Presto Vice President, East Power Trading Phone: 713-853-5035 Cell: 713-854-3923 Fax: 713-646-8272

RE: East Power - 3Q Analyst Conference Presentation Slide

Sender	m..presto@enron.com
Recipients	['david.leboe@enron.com']
File	presto-k/sent_items/248.

I don't like the 2nd bullet - not positive enough. We are the dominant player in the power market. With respect to volumes for term trades, the risk group will have to provide that to you. I can tell you that the volumes have increased in the term market by a significant factor (at least 10 times relative to last year).

-----Original Message-----

From: Leboe, David Sent: Wednesday, October 03, 2001 2:52 PM To: Presto, Kevin M. Subject: East Power - 3Q Analyst Conference Presentation Slide

Kevin -

Thanks again for taking the time to visit with us a few weeks back regarding your business. Based upon our discussions, I have included a draft of an East Power Slide. We are still waiting on final volumes for 3Q01; however, I was curious if you could take a minute to review the conceptual content and let me know if you have any other ideas/comments. In the last bullet, we would like to articulate the fact that you are creating liquidity in longer term markets. If I recall correctly, you mentioned your term volumes had increased exponentially compared to the prior year. Can we get more specific and talk about # MW's transacted and the length of such contracts? (ie, my last bullet is a placeholder).

We are going to meet with Greg on Friday and discuss a draft of the entire presentation.

When you have a minute, please give me a call at X34785.

Kind Regards.

-----Original Message-----

From: Kitchen, Louise Sent: Monday, September 17, 2001 10:29 AM To: Suarez, John; Presto, Kevin M. Subject: RE: FW: Enrico Bauli

So the scoop is He is Average.

He recently moved out of Bandwidth 6 weeks ago and back into Continental Power trading - why he is moving again after 6 weeks. Is it a problem with the business or him?

He worked for Marcello Romano (Head of Bandwidth Trading in Europe) as John knows. Marcello says he is a solid hard worker who has no edge. If Marcello were to run UK Gas again he wouldn't take him - as he is not sharp. So he wouldn't bother to move him across the Atlantic if it costs a lot.

Your call. Ring Marcello for more information.

Louise

This is not a joke...

Sender	save@eastwayfordsales.com
Recipients	['kpresto@enron.com']
File	presto-k/deleted_items/1324.

Let me share something with you. I have included a link of the manufacturer's pricing to the Dealer-by Kelley Blue Book.(New or Pre-Owned) There's no need to run all over town shopping for a vehicle. You just drive to the person who shows you the real numbers.(Me) By attaching the link for dealer cost, it will be obvious that you are getting a GREAT DEAL!(Wholesale Price) I'll try to make this as easy as possible folks. If you are not ready at this time, that's okay! This is not a high pressure car buying program. What I do ask of you is that you WRITE DOWN & REMEMBER who got you all of the pertinent information to make your car buying decision.(Ken Finney) See below..

Some of you don't know it yet, but your company may be a partner with Ford. If this is the case, you may be eligible for additional incentives. This is applicable to New Vehicles only! I just need to know who you work for...

Trade-in Vehicles: Here's the area where everyone is quite skeptical. I will give you what I call an Actual Cash Value!(yes, a real #) I find it much easier to deal with real numbers. We can talk more about this arena later if you wish.

I will not lose your business over price with anyone! Bring me a deal from another Ford Dealer and I'll beat it! If I don't have it in-stock, I'll find it and get here!(New or Pre-Owned) I HAVE ACCESS TO FORD/LINCOLN/MERCURY PRODUCTS!

Call or email me with a valid phone number if you're interested in discussing more of the details. I'm available at all times at one of the numbers below. If for some reason I am not able to get to the phone, just leave me a message and I will return the call shortly.

I'd like to share something with you. I have included a link of the manufacturer's pricing to the Dealer-by Kelley Blue Book.(New or Pre-Owned) This will show you that my integrity is sincere.(click below) There's no need to run all over town shopping for a vehicle. You just drive to the person who shows you the real numbers.(Me) By attaching the dealer cost values for you, it is obvious that you are getting a fair deal.(Wholesale Price) At the same time, you are saving time and money. I'll try to make this as easy as possible folks. If you are not ready at this time, that's okay! This is not a high

pressure car buying program. What I do ask of you is that you WRITE DOWN & REMEMBER who got you all of the pertinent information to make your car buying decision.(Ken Finney) See below..

Some of you don't know it yet, but your company may be a partner with Ford. If this is the case, you may be eligible for additional incentives. This is applicable to New Vehicles only! I just need to know who you work for...

File	presto-k/sent_items/651.

We still need something in writing from Janet.

-----Original Message-----

From: Herndon, Rogers Sent: Wednesday, August 08, 2001 2:43 PM To: Presto, Kevin M. Subject: FW: Columbus Schools - Appropriations Risk

The CYA begins.

RH -----Original Message----- From: Stubblefield, Wade Sent: Wednesday, August 08, 2001 2:41 PM To: Sharp, Greg Cc: Dietrich, Janet; Chapman, Kay; Gahn, Scott; Herndon, Rogers; Holmes, Sean; Brown, Jim Subject: Re: Columbus Schools - Appropriations Risk

To be clear, we agreed that if the contract language was modified, it would be loose enough to support a mark this time but should not be used as the model. We did not agree, though, that this in any way limited our risk from a business perspective. I'm no trader, but my understanding is we have effectively sold the customer a call that we have to somehow hedge against? Again, we can mark and support what business decision is made, I just did not want there to be any impression that accounting had opined on the business valuation post year 1.

Wade

To: Janet R Dietrich/HOU/EES@EES, Kay Chapman/HOU/EES@EES cc: Scott Gahn/HOU/EES@EES, Rogers Herndon/Enron@EnronXGate, Sean A Holmes/HOU/EES@EES, Wade Stubblefield/HOU/EES@EES Subject: Columbus Schools - Appropriations Risk

Janet We are proceeding with the contract changes that were discussed with Jim Brown and we have told the customers that the document should be ready for their review early next week. Are you still okay with us proceeding as we had

discussed at the offsite? ----- Forwarded by Greg Sharp/HOU/EES on 08/08/2001 01:54 PM
 ----- From: Rogers Herndon/ENRON@enronXgate on 08/08/2001 09:24 AM To: Greg Sharp/HOU/EES@EES, Wade Stubblefield/HOU/EES@EES cc: Sean A Holmes/HOU/EES@EES Subject: Columbus Schools - Appropriations Risk

Guys -

I am not comfortable leaving the appropriations risk "grey", as it has been referred to. The risk is there and it is real. If the EES Executive Committee is comfortable with this strategy/approach then I would expect to have something in writing between EES and EWS releasing EWS of any and all \$\$ responsibility associated with this potential, yet unmentioned, risk.

FYI, last time we priced this risk we came up with a notional value of \$5MM.

I am on board with providing aggressive pricing and trying to enter new markets. However, we need to recognize all the risks.

Rogers

QSEs that are owed monies from ERCOT on invoices that are due today, October 15, 2001, will notice that the amount of funds transferred is short of the balance due on the invoice. This is a notification that ERCOT will follow the "short payment" procedure stated in the ERCOT protocols for payments being made to QSEs today. Due to short payments by one or more QSEs, ERCOT is insufficient of funds to pay all amounts in full. As described in the ERCOT protocols, section 9.4.4, ERCOT will deduct ERCOT administrative fees and reduce payments to all invoice recipients that are owed monies. The reductions will be based on a pro rata basis of monies owed to each ERCOT creditor for this invoice to the extent necessary to clear ERCOT's accounts on the payment date to insure revenue neutrality for ERCOT. ERCOT will distribute past due funds on a pro rata basis of monies owed on the next business day after receipt of the monies. If you have any questions, please call your ERCOT client service representative. Please begin scrubbing the 02 and 03 new gen book again given the current situation in the energy market. I would like a new forecast in 30 days if possible.

In addition, I would like begin running the unit commitment model (dispatch) and "knock" the cob webs off everyone. Let's plan on having a meeting to go over what the new daily reports were going to look like - wasn't Gus working on this?

What is the status of the transmission modeling?

Can we integrate the system dispatch and LMP simulation models?

Another Ga-ITS Prospect	
Sender	billy.braddock@enron.com
Recipients	['m..presto@enron.com']
File	presto-k/deleted_items/785.

Kevin,

A consultant (Energy Consulting Group) in Ga. representing an "A-rated EMC" is looking for 75MW, 7x24, Jan-Feb'02, firm LD energy, "on" (not "into") the Ga-ITS (that is from any generation source on the ITS, or thru the interface and on the ITS).

From what I know about the Energy Consulting Group, they represent 8 of the larger EMC's in Ga. We are going to meet with these guys in 2 weeks to see what deals they have available. It looks like it may be a good opportunity for more short positions on the Ga-ITS.

RE: CP&L

Sender	m..presto@enron.com
Recipients	['billy.braddock@enron.com']
File	presto-k/sent_items/265.

You are right. They are on crack. This would be at least \$3.50/Mwh over Cin. They have gas deliverability issues in the winter and there alternative fuel is No. 2 oil. Therefore, CPL East is a big premium Nov-Mar. The bid/offer for this location is large due to transmission risk.

-----Original Message-----

From: Braddock, Billy Sent: Monday, October 01, 2001 11:11 AM To: Presto, Kevin M. Subject: CP&L Importance: High
FYI. CP&L is bidding for Nov-Dec'01, 5x16, into CPL-East, 100MW. Bid \$22 for Nov., and \$23 for Dec. I've seen trades in this area go for premiums to Cinergy and PJM, so I think they're on crack for showing this. They have no offer.

Georgia Customers

Sender	billy.braddock@enron.com
Recipients	[m..presto@enron.com]
File	presto-k/deleted_items/361.

Kevin,

Tomorrow I am meeting with 2 separate consulting groups that represent collectively 15 EMCs in Georgia. As a result of our calling efforts, it appears as if these 15 are some of the larger EMCs under Oglethorpe. I think these 2 groups are planning to break apart from OPC and form 2 new agencies (7 in one, 8 in the other). I plan to get as many details on this as possible during the meetings.

There are 2 opportunities at this point with specific EMCs in each of these groups. Both are to buy energy on the Georgia ITS. 1) 75MW, 7x24, Jan-Feb'02, and 2) 20MW, 7x24, 3-5 yrs., beginning 1/1/03, prefer load following at a 73% load factor, but will consider a block purchase.

I'm going to get more details on these separate requests, but wanted your initial interest level.

Thanks,

Billy Braddock Manager - Enron Power Marketing Inc. 713-345-7877 (work) 713-646-4940 (fax) 713-503-2166 (cell)

RE: SOCO/Ga-ITS Spread

Sender	m..presto@enron.com
Recipients	['billy.braddock@enron.com']
File	presto-k/sent_items/217.

I'm \$2 bid for this spread in Cal 02.

-----Original Message-----

From: Braddock, Billy Sent: Friday, October 12, 2001 8:43 AM To: Presto, Kevin M. Subject: SOCO/Ga-ITS Spread

Spoke to Lew at Morgan. In summary, he's \$1@\$4 for this spread.

He spent some time to explain why his market is not tighter. Basically, the underlying philosophy of their shop is to NOT jump into the new, less liquid markets until they develop further. They would almost rather see a few markets develop within the region, with high liquidity in each market (as opposed to many markets in the region, with low liquidity in each market). My response was to be part of developing many market in the region, all with high liquidity. But, in order to do so and help all the players in the market, we need other participants.

All that being said, his offer is \$4 for the Cal'02, into SOCO/on Ga-ITS spread, 5x16. I'm going to try some of the others (Williams, Dyn, Mirant may be players).

I will buy 5x16 unit contingent power \$3.50/Mwh below my curve for 02 only for into JEA delivery. I will buy firm LD at my mid for into JEA delivery

-----Original Message-----

From: Braddock, Billy Sent: Tuesday, November 06, 2001 2:05 PM To: Presto, Kevin M. Subject: FW: Key West - 13MW

Managed to piece together a 25MW block on FPC system. This is off of 3 separate steam units. Not able to piece together more at this point. They are offering 7x24 energy, 3 yrs. beginning 4/1/02. They currently have a \$29.50 bid on the table. Any interest in this size block?

BB

-----Original Message-----

From: Braddock, Billy Sent: Friday, October 26, 2001 8:50 AM To: Presto, Kevin M. Subject: Key West - 13MW

A few more details on this. This is a 15MW QF on the FPC system. They are offering 7x24 energy, 3 yrs. beginning 4/1/02. The facility is near Tallahassee, but on the FPC system. He said he would guaranty 80% availability off the unit. The best bid he has on the table currently is \$29. When I run 80% availability on the model, your MID is \$29.18 (\$31.98 MID for Firm LD--for comparison).

Any interest in this product?

RE: TECO RFP

Sender	m..presto@enron.com
Recipients	['billy.braddock@enron.com']
File	presto-k/sent_items/194.

I am interested in firm LD fixed price energy delivered at the Gannon bus-bar. I have no appetite for unit contingent in the current market. TECO has an entire system they can lean on.

I would consider bringing the gas, but you would have to involve Scott Neal's desk for transport and valuation becomes complicated. With respect to volume, I would not want any more than 100 MW.

My strong preference is fixed price energy - no toll. Volatility is getting smashed and it doesn't make sense to pay for vol in a spread option. We are a much better bid for 5x16 or 7x24 energy.

-----Original Message-----

From: Braddock, Billy Sent: Wednesday, October 17, 2001 9:53 AM To: Presto, Kevin M. Subject: TECO RFP

Kevin,

As we discussed, TECO is offering up to 500MW (of a total 960MW) beginning 5/1/04 off the Gannon facility (which is being converted from coal to a gas-fired CC plant, called Bayside). The plant is in Tampa, FL and the offering is unit-contingent.

TECO prefers to sell a toll where we bring the gas, but is open to other proposals. I figure we can bid for any of a few structures: 1) toll where we bring the gas, 2) toll indexed to a gas hub, where TECO is respons. for gas supply, 3) fixed price call.

I think an at the money call would be the cleanest solution (avoid inefficiency's associated with the heat rate curve which varies by MW amount utilized, gas supply risk, etc.).

What is your preferred structure? How many MW would you like to show a bid for? Structuring ran an initial valuation for a 3-year, \$35 daily call, 100MW. Results are below.

TECO RFP

Curve Into FRCC Strike \$35 Size 100 MW Availability 95% Term 5/1/04-4/30/07

\$/kW-mo \$/MWh PV'd \$ Premium Bid 2.66 3.84 8,033,628 Mid 5.09 7.33 15,337,981

File	presto-k/sent_items/596.

Thanks for the update. You are doing a great job and I appreciate you all your hard work. I don't have to worry about any of the administrative issues, and that makes my job much easier.

Have fun on the trips and make sure you and Amy get well.

Thanks again.

-----Original Message-----

From: Black, Tamara Jae Sent: Tuesday, July 17, 2001 1:25 PM To: Presto, Kevin M. Subject: Out of the office

Kevin,

I just wanted to give you an update with Therapy....after this Wednesday, we will go one time a week for the next four weeks and that should be it. We have come a long way but I think we will be able to once again be healthy. Thanks again for being understanding and supportive of us getting well.

I also wanted to make sure you knew when I will be out of the office with these trips and some vacation time:

Friday, July 20th - July 22nd...leave at 1:30pm to head to Barton Creek for Dana's Group

Monday, July 30th - Aug 2nd...leave at 9:30am with Ed Baughman's group to Cabo

Friday, Aug. 3rd - Aug 7th...taking Vacation Time to get Shelby ready for school and spend quality time with her after being gone the month of July.

Friday, Sept. 14th - 16th...leave 8am w/Corry Bentley group to Cancun

Thurs., Oct. 4th - 7th...leave 8am w/Don Baughman & Lloyd Will group to Las Vegas

Since Ed is taking two separate groups to Cabo, Lisa will go up with the first group for Oscar & Larry...they are leaving next Thurs, July 26th - 29th. On the remaining trips I will be ahead of the Cancun & Vegas group so Claudia will bring the Cancun people up and Lisa will bring the Vegas people up. I am somewhat close to finalizing all the trips and hope they turn out flawless.

Thanks again Kevin for all your support with my decisions for the group. I know this is a lot for the future so I will just note it on your calendar.

File	presto-k/sent_items/163.

Wisconsin's offer is a joke.

Carl - This is clearly a two-way termination or they would have no offer at all (I'm assuming you understand the difference). We can buy Cal-02 Com-Ed under \$30/Mwh all day long. This is a position we will deliver on to preserve the in-the money value. I would make it clear to Wisconsin that we intend on delivering in January and every single month thereafter because it creates positive cash flow for the estate. We also have broker quotes that show the market is 28 at 29 for Cal 02. I would accept nothing less than \$1.2 million.

Thanks.

-----Original Message-----

From: Tricoli, Carl Sent: Fri 12/21/2001 2:42 PM To: Portz, David; Presto, Kevin M.; Miller, Don (Asset Mktg) Cc: Subject: FW: Proposal for 2002 Purchase

This contract is for 50Mw peak into COMED, Seller's Daily Choice, Cal '02 @ \$34.75/MWh. Our MTM is \$1,244,412; their offer is \$663,000. It appears to be a one-way contract, but it's hard to tell given the brevity of the contract. David - what happens if we don't serve the load - do we get nothing? We need to decide if we want to begin serving the load and negotiate a better price - they want to have done by 12/28.

Carl Tricoli Cell: 713 826-1439 -----Original Message----- From: Klarer.Jeff [mailto:Jeff.Klarer@wepco.com] Sent: Friday, December 21, 2001 1:32 PM To: Tricoli, Carl Cc: Splinter.Donald; Abood.Gerald; Kiesling.Don; Cummings.Chuck Subject:

Let's sit down and talk. I think we should fill from within our current desk. I have some ideas.

-----Original Message-----

From: Suarez, John Sent: Monday, October 08, 2001 7:11 AM To: Presto, Kevin M. Subject: FW: Ravi Thuraisingham

I need to move on hiring a trader for the group sometime within the next (2) weeks. Do you have a list of potential candidates or should I go to HR for resumes. As far as EBS goes, I am a bit weary of hiring anyone from the desk at this moment due to the attrition we are experiencing.

Let me know.

Thanks.

-----Original Message-----

From: Suarez, John Sent: Monday, October 08, 2001 7:08 AM To: Presto, Kevin M. Subject: RE: Ravi Thuraisingham

I will talk to him today to gauge his interest.

-----Original Message-----

From: Presto, Kevin M. Sent: Friday, October 05, 2001 8:30 AM To: Suarez, John Subject: RE: Ravi Thuraisingham

Sounds like he might fit in the LMP/transmission/congestion management group. As I mentioned, we are attempting to create an Eastern Interconnect LMP model to model congestion in every region. This will lead to the creation of hubs and basis markets.

Ravi might be a good fit for this group.

-----Original Message-----

From: Suarez, John Sent: Thursday, October 04, 2001 11:20 AM To: Presto, Kevin M. Subject: Ravi Thuraisingham

Kevin,

Here is the scoop on Ravi:

- He has extensive technical and financial modeling experience that would be an asset to the group. - He would like the opportunity to using modeling (artificial intelligence, etc.) to realize arbitrage opportunities. He has spoken to John Arnold

and the crude desk about doing some variation of the above. - He is not ready to sit down in a trading seat day 1, however he is interested in getting to learn the commodity via research and modeling with the opportunity to move into trading.

What are your thoughts?

John D. Suarez Enron Broadband Services (713) 853-5267 work (713) 443-5267 mobile (877) 597-0646 pager email: john.suarez@enron.com

Request for Information for Energy RFPs i n the MD/PA Region

Enron Capital & Trade Resources Ms. Jennifer F. Fraser Associate Houston, TX

Dear Ms. Fraser:

Downes Associates, Inc. is working with several wholesale and retail electric customers in Pennsylvania and Maryland. We are developing contact lists to use for RFP distribution in the near future. We also have a need to create a similar list for natural gas suppliers.

Please provide the following information via return e-mail or forward this e-mail to the most appropriate representative in the Enron organization.

1. Contact information for your representative who should receive an RFP for wholesale electric power supply in the Pennsylvania/Maryland area.
2. Contact information for your representative who should receive an RFP for aggregated retail electric power supply in the Pennsylvania/Maryland area.
3. Contact information for your representative who should receive an RFP for aggregated retail gas supply in the Pennsylvania/Maryland area.

Information should include:

Name Title Company/Division Mailing Address Phone Fax E-mail

Also, please answer the following question.

4. Do you use any electronic platform to receive load data for pricing and bid such as the UniGrid for electricity or Aquila/RFP:YourEnergySource for gas? If so, please specify which platform you use.

Thank you for your consideration in this matter.

John H. Sharpe Downes Associates, Inc.

Late afternoon. Have Fletch and myself interview. He has already been in here for one interview.

-----Original Message-----

From: Suarez, John Sent: Tuesday, October 02, 2001 12:51 PM To: Presto, Kevin M. Subject: RE: Ravi Thuraisingham

Yes,

Placed a call to him today to setup an interview. Any times work better for you and the rest of the crew (late afternoon or early morning 5:30am)?

-----Original Message-----

From: Presto, Kevin M. Sent: Tuesday, October 02, 2001 12:36 PM To: Suarez, John Subject: RE: Ravi Thuraisingham
John,

What about Eric Benke? Did you review his resume?

-----Original Message-----

From: Suarez, John Sent: Tuesday, October 02, 2001 12:33 PM To: Presto, Kevin M. Subject: RE: Ravi Thuraisingham
Kevin,

I didn't work with Ravi directly, however I believe he is extremely well qualified based on his experience. He would likely be a good asset for the group however I do not know exactly in what role (perhaps mid marketing or orig. or as a quant/trader). What I am not sure of is if he wants to trade. I will talk to him today and will get back to you.

-----Original Message-----

Folks Ravi looks like a real strong candidate that we should consider.

He could be helpful in the Ontario market as well.

Thanks.

RE: TEA - into MEAG

Sender	m..presto@enron.com
Recipients	['billy.braddock@enron.com']
File	presto-k/sent_items/228.

Notice on the tags when we go hourly could be 30 minutes or less. Additionally, if we use them as sink when we go hourly, they will have to be part of the day-ahead tag. If these issues are not crystal clear with them, I have no interest in even showing an offer.

-----Original Message-----

From: Braddock, Billy Sent: Wednesday, October 10, 2001 11:21 AM To: Presto, Kevin M. Subject: RE: TEA - into MEAG

TEA is ok with allowing hourly scheduling from either internal units or to the border, as long as Enron is handling all scheduling and tags and gives sufficient notice for schedule changes. I assured him that we would handle those functions. So, we need to offer for: 1) June-Sep'02, 20MW, 5x16 2) Cal'02, 20MW, 5x16

Billy -----Original Message----- From: Presto, Kevin M. Sent: Tuesday, October 09, 2001 5:40 PM To: Braddock, Billy Subject: RE: TEA - into MEAG

We need the hourly option to allow for non-GTC sources, but we will deliver into-GTC border hourly.

-----Original Message-----

From: Braddock, Billy Sent: Tuesday, October 09, 2001 12:55 PM To: Presto, Kevin M. Subject: RE: TEA - into MEAG

TEA will let us go hourly 5 times per month and change the source if we go hourly, as long as the source remains a unit on the Ga-ITS. However, he doesn't want a full 50MW block in the June-Sept period, just 40MW. The 40MW is actually already at the high end of his range (needs 30-40MW for June-Sept).

-----Original Message-----

From: Presto, Kevin M. Sent: Monday, October 08, 2001 3:04 PM To: Braddock, Billy Subject: RE: TEA - into MEAG

Will he let us go hourly at least 5 times per month and change the source if we go hourly. This essentially would require they provide parking and lending for up 20 MW in the Cal and 40 MW in the June-Sept. Can we at least get a 50 MW block in the June-Sept period?

-----Original Message-----

From: Braddock, Billy Sent: Monday, October 08, 2001 2:44 PM To: Presto, Kevin M. Subject: RE: TEA - into MEAG

An offer from any Scherer unit(s) would work. He understands the odd lot will demand a premium, but I can't talk him into a round 50MW. So, 2 pieces of energy: 1) June-Sep'02, 20MW, 5x16 2) Cal'02, 20MW, 5x16

-----Original Message-----

From: Presto, Kevin M. Sent: Monday, October 08, 2001 11:33 AM To: Braddock, Billy Subject: RE: TEA - into MEAG

Ask him if Scherer 1,2,3 and/or 4 would work? Let him know that an odd lot would command a \$2.50-3.00/Mwh premium on top In addition, even if we used Scherer, it would be from any one of the facilities therefore the transmission would need to be able to use any of the Scherer units as a source.

-----Original Message-----

From: Braddock, Billy Sent: Monday, October 08, 2001 10:21 AM To: Presto, Kevin M. Subject: TEA - into MEAG

TEA is looking to buy 20MW, 5x16, June-Sep'02, into MEAG. Also looking to buy 20MW, 5x16, Cal'02, into MEAG. I told them we may be more willing to offer into GTC. His response was he would need to know which facility or interface would be the source (I suspect this is so he can reserve ahead to use his network transmission).

Any interest?

Billy Braddock Manager - Enron Power Marketing Inc. 713-345-7877 (work) 713-646-4940 (fax) 713-503-2166 (cell)

Thanks - that's what I needed to know. I'm still not sure if it is a two-way termination (yes I know the difference) because there's no language that indicates we'd be paid if we're in the money in a termination. There is a provision that allows us to cease delivery "by reason of ... significant change in operating condition"; if we don't deliver, there's an LD calculation, which if positive, we have to pay. There doesn't appear to be any language that causes WEPCo to pay us if we don't deliver and we're in the money. (Hence my question to David) Otherwise, the only way to terminate is with one year's advance written notice - there are no Event of Default provisions and remedies, such as for bankruptcy. (Which I'm assuming you know since you're familiar with the contract). What I didn't know was your longer term view of the market - this obviously matters in evaluating their offer if the contract is one way and we are unhedged. In any event, for now they can either pay us the \$1.2 million or we'll plan on delivering in January. I'll call them on Wed and let you know so we can schedule delivery if necessary.

 Subject: RE: Proposal for 2002 Purchase

Wisconsin's offer is a joke. Carl - This is clearly a two-way termination or they would have no offer at all (I'm assuming you understand the difference). We can buy Cal-02 ComEd under \$30/Mwh all day long. This is a position we will deliver on to preserve the in-the money value. I would make it clear to Wisconsin that we intend on delivering in January and every single month thereafter because it creates positive cash flow for the estate. We also have broker quotes that show the market is 28 at 29 for Cal 02. I would accept nothing less than \$1.2 million. Thanks.

 Subject: FW: Proposal for 2002 Purchase

This contract is for 50Mw peak into COMED, Seller's Daily Choice, Cal '02 @ = \$34.75/MWh. Our MTM is \$1,244,412; their offer is \$663,000. It appears to be a one-way contract, but it's hard to tell given the brevity of the contract. David - what happens if we don't serve the load - do we get nothing? We need to decide if we want to begin serving the load and negotiate a better price - they want to have done by 12/28.

Carl,

Attached is Wisconsin Electric's proposal for closing out the purchase Wisconsin Electric made from Enron for 2002. As I mentioned to you earlier, Wisconsin Electric is looking to finalize any agreement by December 28th.

If you have any questions, you can contact me at (414) 221-4350 through the close of business today (December 21st).

The appropriate person to contact the week of December 23rd is Mr. Don Splinter at (414) 221-4650.

Sincerely,=20

RE: EPSA Draft Paper on Assuring Adequate Capacity in a Competitive

Sender	m..presto@enron.com
Recipients	['tom.hoatson@enron.com']
File	presto-k/sent_items/879.

I don't agree with either 7 or 8. The 0.1 LOLP generally results in 20-25% reserve margins which are excessive. Reserve margin is a meaningless measure in an efficient commodity market because supply and demand adjust to price signals to keep the market in balance.

My view is that ICAP should be eliminated completely and, if utilized, transitional only for a 1-2 year period. The other alternative is the ISO to have a reliability auction whereby quick-start units contract directly with an ISO for meeting reliability reserve reqs.

-----Original Message-----

From: Hoatson, Tom Sent: Wednesday, May 30, 2001 9:48 AM To: Aucoin, Berney C.; Decker, Charles; Nicolay, Christi; Baughman, Edward D.; Steffes, James; Scheuer, Janelle; Thompkins, Jason; Ader, Jeff; Meyn, Jim; Quenet, Joe; Presto, Kevin M.; Bernstein, Mark; Davis, Mark Dana; Hamlin, Mason; Politis, Nick; Broderick, Paul J.; Hammond, Pearce; Martinez, Posey; Wheeler, Rob; sscott3@enron.com; Novosel, Sarah; Montovano, Steve Cc: Allegretti, Daniel; Fromer, Howard Subject: EPSA Draft Paper on Assuring Adequate Capacity in a Competitive Market

Below is the draft white paper prepared by EPSA as a result of the workshop held on May 15 on assuring adequate capacity (discussed in a previous email from me). The purpose of the paper is to outline possible EPSA positions on the issues. EPSA would like comments on the paper by Monday, June 4 (you could forward them to me and I will pass them on to EPSA). In summary the paper presents 14 principals for assuring adequate capacity that I believe Enron could support. Most of the principals discuss a liquid, efficient energy market and robust forward markets are capable of assuring adequate capacity; load needs to see prices and demand needs to respond; barriers to construction of new generation and entry for LSE's need to be eliminated; and any capacity market must be designed to create a level playing field between old and new market entrants. The most controversial are #7 and #8.

Number 7 states:

"During a limited transition to fully competitive markets, an administratively-determined mandatory reserve requirement can serve to ensure that adequate capacity is available to meet reliability needs within politically acceptable limits of price volatility. A mandated reserve requirement should be tied to specific reliability criteria for that system, such as the one day in ten years loss of load probability."

Number 8 states:

"Suppliers must be fully compensated for supplying needed reserves. This can be accomplished through a well-designed Installed Capacity (ICAP) market, a separate capacity market, imbalance trading or call options."

Assuring Adequate Capacity in a Competitive Market

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketers Working Group

FROM: Jim Steffes, Regulatory Affairs Committee Chair Bob Reilley, Power Marketing Working Group Chair Julie Simon, Vice President of Policy

DATE: May 29, 2001

RE: EPSA Draft Paper on Assuring Adequate Capacity in a Competitive Market ? Initial Comments Due on Monday, June 4th ? Conference Call on Friday, June 8th at 11:00 a.m. (EDT)

On May 15th EPSA held a workshop on assuring adequate capacity in a restructured market. Following the discussion, EPSA staff offered to draft a short White Paper outlining a possible EPSA position on the issues raised during the discussion. Attached is the first draft of that paper.

To use our time as efficiently as possible, please forward any written comments on the attached draft to Julie Simon at EPSA (by fax at 202-628-8260 or e-mail to jsimon@epsa.org) by Monday, June 4th. We will then circulate a revised draft before a conference call on Friday, June 8th at 11:00 a.m. (EDT). To access the conference call, dial 1-800-937-6563 and ask for the EPSA/Julie Simon call. If you have any questions or concerns, please contact Julie at 202-628-8200.
