George/Russ: Please bounce the servers and notify Frank so he can have the deal attached.

Carole: Risk needs to set-up this curve in ERMS. Please send Cecilia/Margie and me the name of the new pub_code (i.e GDP-PSCO/CITIGAT). After George/Russ contacts you regarding bouncing servers, the rate handle will need to be attached to the deal no. in Sitara.

Cecilia/Margie: Please map the pubcode in ERMS after it is sent to you by Carole. PSCO is found under Citygates.

Phil/Don: Please be sure this rate handle is included on the validation report.

Dear Kelly,

My name is Carole Frank and I am in West Risk Management for natural gas.

I spoke with Russ about a request I had and he referred me to you. My trader needs a rate server handle set up for the Gas Daily Published point "PSCO citygate". My trader entered a deal with this point and someone in confirmations informed me that SITARA said it was an invalid index. Please help!

Subject: Hello and an Update

Hey Everyone, I wanted to take this opportunity to check in and say 'hello'. I apologize for the mass email but in my overall business and general flakedome I have been totally out of touch with just about everyone I know. Steve and I have had a lot of changes in the past months and I'll briefly fill you in on the highlights.

Foremost, in spite of our good intentions and efforts, Steve and I did not relocate to the San Diego area. Instead, I have taken a job at Stanford University. On September 10, I took on the position of Manager of Stanford Visitor Information Services. In this job I manage about 70 students and a full time assistant manager. We conduct campus tours for prospective students, the public, and paying private groups. I work extensively with the office of Admissions and the President's Office as we try to put 'the best face' on the University. It's been interesting and slightly complicated. On my second day of work we had a major bomb threat at Hoover Tower and I've already filed one police report of suspected terrorist activity. On the whole, while it's been extremely busy as I've hired and trained new staff, I am loving my work. It's kind of like I never left, and I now know more about Stanford history and interworkings than I ever thought possible.

Steve and I rented a house in Mountain View, about 20 miles south of where we used to live. We have neighbors, and Napoleon and Halle are enjoying having twice as much square footage to occupy. Napoleon is doing well. He's 7 and 1/2 months old and has a really gentle and fun personality. His best party trick is that he howls along with us when we sing. Halle is also doing well - though she sometimes tires of being chased by Napoleon.

The house has a back yard, an office and a guest room. We moved in the weekend before I started my new job so it took a while to get settled and a couple of boxes remain unpacked. However, we are ready to entertain and welcome any visitors.

The little free time we have is still spent exercising and relaxing. I'm running a lot and playing volleyball and Steve is fighting a heel spur and bad calf. We are both enjoying Stanford football season and the general excitement of college football on the weekends. That coupled with our new NFL game ticket makes for football-intensive weekends.

Our families are doing well. Steve's brother was waived by the Jets at the end of August and now plays for the Cleveland Browns. Steve's parents are teaching at a Native American reservation in central Nebraska. Andrea's sister and niece are still in Austin and the rest of the immediate family still reside in San Diego.

Not much else to report. I am including all of our new address information for your records. Again, I apologize for not contacting each of you personally. As we get into a regular routine I expect to do a better job with correspondence and general balance.

Love, Andrea

Hello Torrey, I examined past CIG deals and made code changes to allow default meter 991764500 when Enron sells physical gas. Assuming deals continue to be sent as before, I have results of sample deals production which I tested with; see below. Please test the changes at your earliest convenient. Thanks.

Hi Dat,

As per Jay's request, is it possible to set the SITARA bridge to attach the following two default meter numbers to CIG Mainline deals, depending on whether they are buys or sales (from Enron's perspective)?

Essentially, any deal in which Enron is the seller and the location is at Pipe "CIG" and trade zone "CENTRAL" should have a default meter number of 991764500, while any deal in which Enron is the buyer at the same location should go to meter number UNA-516938.

Since the EOL mapping tables can only support one meter number per location, it would be necessary to set this logic up in the SITARA bridge itself. Is this doable from your end?

Torrey

I would like to have all sales of CIG Mainline next day physical gas to bridge over to Sitara under the following meter location:

CIG/Mainline/991764500

and all buys to

CIG/Mainline/UNA-516938

Please let me know what effects (if any) this will have on the bridging process, Sitara, and confirmations.

Thank you,
