FW: Case No. U-12487 Comments on Calculating Regionals

Sender	stacey.bolton@enron.com
Recipients	['elliott.mainzer@enron.com', 'richard.ring@enron.com', 'jesse.bryson@enron.com']
File	ring-r/eesirenewableenergy/129.

Comments I submitted to include recognition of tags in calculating fuel label for MI disclosure. I didn't want the same thing to happen in MI as it has in NJ.

Super Bowl Party!

When: Feb 3rd at 3pm, the game starts at 5pm Where: 16319 Hickory Point Rd

What: Bring something to drink and optionally your favorite dip

Fish, Potato Salad and Fun in abundance.

The perfect combination will take place on Feb 3rd at the Bledsoe residence. We are combining a Fish Fry with the big game. Due to the fantastic fishing the past few months the freezer is full of Trout and Redfish and it's time to make some room for the excellent fishing coming up in the next few months. Please RSVP via email or call 281-855-4252 so we have an idea of how much fish to cook.

Looking forward to seeing everyone and having fun with the football and commercials!

Dear Green-e Power Marketers,

This is a reminder that we have a conference call scheduled for tomorrow, Thursday 8/30 at 10:00 am pacific/1:00 pm eastern. The call-in number is 888-900-1820 pin number 711164.

We will be discussing three items: (1) Green-e certification of utility green pricing programs (2) increasing the new renewable standard to 15% in NJ, CT, ME, MA, RI in 2003 (3) date for our next meeting, Oct. 8 or 9

I've attached 2 guidance docs for your to read before the meeting. These were circulated previously, but for those who forgot to read them.... :)

Talk to you tomorrow,

Meredith Wingate Green-e Program Manager Center for Resource Solutions Presidio Building 49 PO Box 29512 San Francisco, CA 94129 415-561-2100

Kenron's business is to create value and opportunity for its senior management. We do this by combining our employees' personal financial resources and restricting the flow of information to the market to create innovative accountancy solutions to challenge the US financial regulations. We are best known for our lack of respect and truthfulness and single minded ambition to stray from our core competencies of natural gas and electricity products into all kinds of unprofitable markets and hair brained ventures.

Today we offer vast diversified product range, including office space in many major US and European cities, second hand computer equipment, and useless IT Helpdesk promotional gimmickry. In fact we have the largest stock of nearly new Compaq and Sun computers in the world. These products give customers the flexibility they need to lose all their money and achieve into the highly sought after status of suing our ass in a class action.

It's difficult to define Kenron in a sentence, but our senior executives have been described as "incompetent", "arrogant" and "a bunch of thieving bastards" by many top tier financial institutions. We falsify commodity markets so that we can deliver physical commodities to our customers at a ridiculously unsustainable price. It's difficult, too, to talk about Kenron without using the word "screwed." Most of the things we do have never been done before, like going from a market capitalisation of nearly \$90 billion to \$199 in the space of a year!!!! We believe in the economic benefits of secret, underhanded insider trading, and we play a leading role in ripping off our investors. We initiated the wholesale bandwidth markets in the United States, and we are helping to build similar markets in Europe and elsewhere. Shame we lost billions in doing so :-(

Every day we strive to hype up our share price to unrealistic highs, with the sole purpose of suckering the investor community and lining our own pockets. Our passion has enabled us to completely mismanage risk. No wonder Misfortune Magazine surveys have named Kenron the most innovative company in America for six years in a row. Our employees think Kenron is such a wonderful place to work, thousands are leaving every day to spread the word around the world.

Knron's four business units -- Wholesale Services, Energy Services, Broadband Services and Transportation Services -- ARE NOW CLOSED.

FYI ----- Forwarded by Richard Ring/HOU/EES on 07/20/2001 03:26 PM -----

Heather Mathis 07/20/2001 11:15 AM To: Richard Ring/HOU/EES@EES cc: Subject: REVISED MA Disclosure Label and Terms of Service Summary

Here is info on the Mass environmental disclosure stuff - the Mass PUC has provided it.

Heather ----- Forwarded by Heather Mathis/HOU/EES on 07/20/2001 11:14 AM -----

"SANDY COFER" <SCOFER@LLGM.COM> on 07/20/2001 11:12:35 AM To: SARah.dietrich@enron.com cc: hmathis@enron.com, mcastano@enron.com, "JOHN MAAS" <JMAAS@LLGM.COM> Subject: REVISED MA Disclosure Label and Terms of Service Summary

Sarah,

As discussed, I've revised the Terms of Service summary to incorporate the new contract lengths offered and the disclosure label to reflect the emissions data provided by Barry Perlmutter of the MDTE. Mr. Perlmutter confirmed, by trying to walk me through the ISO website (after first telling me that he was certain the data was on the website), that the data is, in fact, not available. He wanted the label to have the emissions information available, however, and gave me the information over the phone. I have transferred the data into the label. Mr. Perlmutter promised that he would personally update the MDTE website with the emissions information soon (as well as the other missing information that I have been bugging him about for a few months).

Heather -- you may want to pass this information along to Richard Ring, if that's helpful:

New Units Regional Average CO2 760 780 NOX 0.1 1.5 SO2 0.01 3.9

The data is in pounds per MWh.

Let me know if you have any questions about the edits.

Sandy

Subject: Report on today's ERCOT Wind Meeting

Coalition Members & Turbine Manufacturers:

ERCOT is spearheading an effort to develop a Wind Generation Model to be used in the PTI transmission software package that is used in many parts of the world.

ERCOT wants all wind turbine manufacturers & wind developers to get very involved in this effort.

Wind Pays for Model Development *****

ERCOT's willingness to pay the \$200,000 software development cost is scant.... this burden is going to be imposed upon the wind companies. ERCOT might be willing to serve as a banker to spread charges among the wind people.

If we delay doing this, there's a possibility that NERC could fine ERCOT who would in turn pass fines on to Wind Companies. More importantly though, without the model, there will be more wind curtailments in Texas than otherwise necessary.

It will probably take at least a year from now before this model is available for use.

The need for a good wind turbine generator model is a National/International issue. As such, perhaps DOE/NREL will help pay.

This issue will start cropping up everywhere... ERCOT wants to be a technical leader and just get it done now.

Wind Turbine Manufacturers *****

Hello Vestas, Bonus, Micon, Enron, etc.... ERCOT expects your active involvement in this Wind Generation Model development effort.

They have a big hammer to use, too.... if your category of wind machine is not "model-able" in the PTI package, it's possible your turbines will not be allowed to interconnect in Texas.

What ERCOT wants is:

- (1) control block diagram modeling your machines
- (2) possibility of adapting your existing models (if you have one) for use in the PTI package
- (3) possibly \$\$\$ contribution for model development

Please make an effort to participate in next Tuesday's Coalition Meeting (9/25) from 3:00 - 5:00 pm CST. Call in # is 916-442-0272.

Sneak-Peak on Transmission Plans *****

ERCOT's annual transmission report will be filed w/ PUC by Oct.1. Ken Donohoo will distribute extracts to us via email over the next week or 2 that are expected to contain the following:

updated AEP plan

TXU plan

New Line recommendation from San Angelo to Rio Pecos

Expect TXU's schedule to also be slower than we originally expected.

Beth inquired about how TSP plans become public & Ken reported that those standards are still being worked out.

Mike

All -

Those of you who are attending the 6th annual green power marketing conference in Portland are invited to a German Feast on Tuesday, July 31st at 7:00 p.m. We are hosting this dinner for the coalition and other stakeholders interested in promoting certificate based systems. Below is information on the restaurant, the location, and the menu. Please let me know if you would like a vegetarian entree.

I need to get a final count of who's attending to the restaurant by Monday, so please either e-mail me, call or catch up w/ me in Portland.

Regards,

Stacey Bolton Environmental Strategies Enron Corp 713-853-9916 direct 713-303-2632 cell sbolton@enron.com

Widmer Brothers Brewing Company and Gasthaus

955 N. Russell

Portland, OR 97227

Phone: (503)281-3333

Appetizers:

Fresh Fruit and Cheese Platter

Stuffed Mushrooms

German Sausage Medley

Entrees:

Chicken Schnitzel

Porkloin Chop

Baked Salmon

* "All dinner entrees are served with a freshly tossed Caesar salad, garlic mashed potatoes, vegetable and choice of coffee or iced tea. A varying vegetarian pasta is available upon request for our vegetarian guests."

The restaurant is only 1.6 miles from the Doubletree Lloyd Center.

File	ring-r/eesirenewableenergy/201.

fyi.. Talked to Trish about Green offerings/Environmental Products. They= might be looking in to this in January. Keep this in the hopper. It's fo= r smaller customers. =20 Stacey Bolton Environmental Strategies Enron Corp 713-853-9916 direct=20 713-303-2632 cell=20 sbolton@enron.com =20 -----Original Message----- From: Bolton, Stacey=20 Sent: Monday, August 13, 2001 5:42 PM To: Collins, Patricia Cc: Ogenyi, Gloria; Ring, Richard; Mathis, Heather; Castano, Marianne Subject: TX Disclosure

Trish: =20 Yikes....hope you are surviving! You'll need coffee after this product lau= nch. Here's the lowdown w/ labels in TX. Your 1st label will be a project= ion or guesstimation of what you anticipate delivering to customers. I'd ge= t w/ Richard Ring on the desk (under Rogers Herndon) to verify that you guy= s will only be purchasing system mix. You might already have done so. On = the fuel mix label (do you have a copy?....I'm attaching if you do not), re= place the heading "Sources of power generation" with "Projected sources of = power generation". Same w/ emissions....replace "emissions and waste per k= Wh generated" with "projected emissions and waste per kWh generated". EES = must then practice "due diligence" in its acquisition of power to ensure yo= ur projection is as close as possible to your actual. You will change to h= istorical data on the label after one year (12/31/02). You have some leewa= y during the pilot as the final label calculation rule has not been adopted= yet -- though it is unlikely that these requirements will change. =20 I must get in one other plug. You might seriously want to consider a green= product option. In Texas, we have a system by which it is more cost-effec= tive to purchase renewable power. That is how entities such as Green Mount= ain (label attached below) have been able to launch a 100% wind product. R= eliant (label attached below) is offering a 100% green product in TXU's ter= ritory for only 1 cent more per kWh. Reliant's offering is for residential= only. EPMI and Enron Wind have 135 MW wind facility and you might want to= price a premium option for the smaller commodity customers from this facil= ity or from the market in general. I am GLAD to hook you up with the intern= al folks that can help you w/ purchases for renewable energy. We're having= a meeting on Thursday from 12-3 to discuss renewable origination and tradi= ng opportunities in EB 8c1 if you can tear away. Lunch will be served. Le= t me know. =20 Regards, Stacey Bolton Environmental Strategies Enron Corp 713-853-9916 direct=20 713-303-2632 cell=20 sbolton@enron.com https://www.greenmountain.com/gmec/tx/tx_efl.jsp Green Mountain's Electric= ity Facts Label for TX https://www.reliant.com/Residential_Secure/1,1667,OUTF-productList,00.html?personId=3D&provider=3D44372&submit2=3DContinue&promoCode=3D Reliant's res= idential label in TXU's territory <http://www.puc.state.tx.us/rules/rulemake/22816/22816arc/110100%20stra.rtf> = Proposed Rule

Elliot:

Below is the general description that I use.

Power has two components: the electrons and the attributes associated with generating these electrons (e.g. fuel type and emissions). A REC represents all of the attributes associated with generating renewable power. RECs can either be bundled with the actual electrons or sold separately.

-----Original Message-----

Hey Richard -- Are you available for a call at 11:00 my time? I'd like to go over some tag pricing/availability issues with you. -- Elliot

-----Original Message-----

From: Ring, Richard Sent: Friday, August 31, 2001 9:54 AM To: Mainzer, Elliot Subject: RE:

Elliot,

Sorry that it has taken me so long to respond but we just migrated to "Outlook", which should be named "Outhouse" but nevertheless the states where EESI currently delivers physical power are:

Pennsylvania Ohio Maine Massachusetts Rhode Island California Texas New York New Hampshire

We are also looking at delivery capability in the near future within the following states:

Illinois New Jersey Maryland

Important to keep in mind that the physical delivery of electricity in all of the above cases may be limited to certain products and certain utility territories.

Regards,

Richard

Hey Folks, Hope you all had a good weekend. We have a busy week coming up, and as I am headed to the East Coast on Thursday, I thought I'd throw out an overview of the week's activities. Some of the things we're moving on this week:

Elliot: Finalize Product Description for RECs, Continue negotiating LOI with enXco on Mid-C wind project, Send out Renewable Power Desk Marketing Document, finalize REC pricing with LADWP Jesse: Work with LADWP on services

contract, continue to manage Edwards, work with Stacey and Jenny on Fundamentals Stacey: Meeting with Elliot and Kelly Kimberly on press release, Enron building latest, TX transmission update Richard: Patagonia, Fetzer, Tag inventory for Green Power Partners Project, work with Elliot on Product Description Jenny: Attend RTO meeting, continue to refine organizational details for Fundies site, line up meeting on external relations with Juli Jeff: Work with Elliot on enXco LOI. Begin crafting strategy for working with NGOs, Bonneville to line up transmission for Mid-C Project. Contact Snohomish for slice of Mid-C Project.

Anybody up for an offsite meeting in Colorado in early November?

EM

Elliot Mainzer Renewable Power Desk Enron North America 121 SW Salmon St. 3WTC-0306 Portland, OR 97201 (503) 464-3706 (503) 464-3740 (FX) (503) 709-6959 (CL)

Hi Richard,

I wanted to touch base with you about the latest on the Green Power Market = Development Group. I've attached the memo I sent them a couple of weeks ago= . Last Friday, Mark Crowdis, who is coordinating on behalf of the group cal= led me back and said that they want to see a formal proposal with notional = pricing. Their members have operations across the country, and there may be= one or two of them who will want to enter into a Kinkoesque arrangement wi= th physical deliver plus green tags, but I imagine that there will also be = a significant contingent who will only want tags, or tags with embedded cal= l options as outlined in the memo. We are also looking into developing a gr= een tag product that looks like a swap against an index, as opposed to a fi= xed price green tag with an out-of-the-money call. I think I have a pretty = good handle on tag pricing here in the Pac Northwest and Texas. PacifiCorp = power Marketing will probably sell me new wind tags in the \$7-8 range, and = we have a decent line on existing and new biomass in California. Looks like= Texas RECs will be clearing in the \$6-7 range. How about the East? Does Co= mmunity Energy sell their tags outside of their local region? How about the= biomass market in the East? As I mentioned this morning, I'm looking forwa= rd to working on this issue in depth with you when I am in Houston in Septe= mber, but I thought you might have a couple of pricing points for me at thi= s point. Another angle I am going to mention is the Canadian angle, as many= of these companies probably have operations up there also. Have you ever h= eard a thing about resources up there in the Tundra?=20

Although I imagine that we're going to be looking at pretty tight spreads o= n these deals, they will hopefully create some liquidity as we move forward= . One other thing -- perhaps you can think of the names of a few key people a= t EES that we should plan to meet with when I'm in H-town.

Thx, EM

=20

Progress Report

Sender	elliott.mainzer@enron.com
Recipients	['james.bruce@enron.com', 'stacey.bolton@enron.com', 'jesse.bryson@enron.com']
File	ring-r/eesirenewableenergy/15.

Hey gang,

We are making solid progress on a number of fronts. From a 10,000 foot perspective, our main goal is to pull together all of the systems, curves, product descriptions/offerings, internal communications, and external communications of a fully functional business unit for presentation to Belden, Richter, Herndon and Presto by November 15. This morning, I spoke with Juli Salvaggio who manages marketing for Enron Wholesale about getting the Renewable = Power Desk space on the enron.com website. Take a look at the products and = services offerings section of enron.com, and check out emissions trading or= weather derivatives. The goal is to draft language (with photos -- ideas??=) for an RPD site along those same lines. I will take an initial shot at the language (with a fundamental breakdown between wholesale and retail services) and then send around drafts for your comment the week of October 24. = I think we will be listed under the heading "Renewable Power Marketing" or = "Green Power Marketing" (Which do you think is better?)=20

On other fronts:

Team Fundies is cranking along well. Richard and I are working to clean up all of our existing positions (scrubbing old EES contracts, managing inter-book issues so that any existing green tag positions fall out to the Green Desk). Our Product Description has been professionalized by Enron Counsel (Richard= Ring) and we are talking to wind, biomass, landfill and geothermal developers with good offers on tags. We are working with EWS counsel and EES counsel to prepare a formal green tag contract that can be attached to either a standard EWC commodity contract or an EES commodity contract. Stacey is roaming the country making the world safe for Green Tag trading -- she is preparing a regional summary of green tag/Green issues/protocols. We continue to negotiate with LADWP for a services contract for their new renewable resources. I haven't heard back from all of you on the proposed offsite location/dates= .

EM

Dear Colleague:

Energy Argus is offering you a FREE trial to AIR Daily and Clean Air Compliance Review newsletters!

Why AIR Daily?

The new energy policy and the EPA's NSR review mean new opportunities for you - as environmental restrictions loosen - doors open to less expensive growth and compliance planning - and AIR Daily focuses on these opportunities every day, covering issues like:

* New clean air technologies;

- * Insider information on the latest federal, state and local clean air regulations;
- * The inside information on where new coal-fired plants will be built;
- * Our exclusive NOx and SO2 allowance indices;
- * Mobile sources issues - from clean fuels to low-emission vehicles;
- * The latest on EPA cases involving Clean Air Act violations;
- * And much, much more! Why Clean Air Compliance Review?

Clean Air Compliance Reviewz gives you bi-weekly analysis of clean air issues - with special focuses on the manufacturing industries and environmental justice. New challenges await manufacturers as new regulations and technologies - combined with more aggressive enforcement - force manufacturers to adopt new strategies for clean air compliance.

Clean Air Compliance Review? gives you thorough analysis so that you can get not only get a complete understanding of the issues - it also shows you why the issues are important to you and your industry and how to stay ahead of new clean air policies and potential problems.

Sign up for both today! Just email <mailto:rlippock@energyargus.com> and we'll start your trial subscriptions today!

FREE TRIALS TO OUR OTHER PRODUCTS!

For more information and FREE trials to Energy Argus' line of other publications, visit our website at <http://www.energyargus.com/service.html>

If you would rather not receive Argus promotions please read instructions below:

File	ring-r/eesirenewableenergy/241.

My only concern with tailoring these is is anyone keeping track of which customers are getting which labels? When we send out quarterly labels we would need to have some way to indicate to CSC which is which - and I presume their databases could handle this, but who knows how long it would take them to tweak it.

Heather

"SANDY COFER" <SCOFER@LLGM.COM> on 07/23/2001 11:05:38 AM To: jhillego@enron.com cc: hmathis@enron.com, MARIANNE.castano@enron.com, richard.ring@enron.com, SARah.dietrich@enron.com Subject: MA disclosure label for mid-market physical product (with price variability)

Jennifer --

Attached is a MA disclosure label tailored for the mid-market physical product with price variability (excess and deficiency usage bands). The only difference between this label and the label distributed for the direct mini product is language in the "Generation Price" section. If average prices vary by volume of sales (as I understand the mid-market product does), the

MA rules require a verbatim statement on the label as follows:

"Your average generation charge is based on the terms of the Agreement. As the Rules require, the information provided above is the average price per kWh for EESI customers for the last month of the prior quarter."

The direct mini form, in contrast, did not require this language as it was a fixed price product with no price variability. The attached incorporates the updates to system resource mix that I just received from Richard Ring this morning and the updated emissions chart (formatting only).

Let me know if you have any questions. Sandy

MI language

Sender	stacey.bolton@enron.com
Recipients	[richard.ring@enron.com]
File	ring-r/eesirenewableenergy/136.

Let me know what you think: =20 Enron would like to compliment staff on their recommendations for the disclosure label calculations and offer one suggestion that would accommodate the purchase of clean, renewable resources. As noted in our prior comment, we would like to reiterate the need for a methodology that recognized attribute contracts. It is a growing practice to contract for the renewable or clean attributes of energy that have been generated onto the grid without purchasing the actual commodity power. These attributes are typically referred to as certificates, "green tags" or "renewable energy credits". All of these terms refer to the environmental benefits of clean power that have been generated onto the grid and may be traded, bought and sold separately from the underlying power commodity. The ability to separate the attributes from the underlying power facilitates the ability for suppliers to offer clean renewable power in regions where it might not be conducive to site these resources. The supplier can then pair the attributes with system power at the point of sale to Michigan customers. =20 This methodology greatly decreases the administrative reporting burden for suppliers and also provides a cost-effective form of verification for Commission staff. Our specific recommendations for accounting for certificates are as follows.=20 1. Allow suppliers to account for attribute purchases on their fuel labels by providing proper substantiation that the supplier owns the attributes. Substantiation can be in the form of verification from an independent system operator of an attribute registry (e.g. Automated Power Exchange operating in California and the Midwest and recently awarded the contract for NePool to build their certificate based system; ERCOT) that the supplier has purchased the certificate and retired it on the behalf of the customer; a bilateral contract showing that the attributes are owned by the supplier, or any other method deemed appropriate by the Commission. 2. Suppliers can use the generation data from certificates that have been generated by independent certificate system administrators or generators to calculate the fuel type and emissions. The certificate purchases would be weighed with other bilateral contracts and spot market purchases for purposes of calculating the label. 3. In the event that the emissions data are not provided by the generator, suppliers will be able to use the most recent E-grid data to calculate the emissions. =20 There are several examples from other State Commissions for accounting for certificates purchases. The following link shows the methodology that the Texas Public Utility Staff wrote for calculating labels with certificate purchases. <<http://www.puc.state.tx.us/rules/rulemake/22816/22816.cfm>> =20 This modification to the label calculation will allow suppliers who are purchasing affordable clean to be delivered to the grid on behalf of their customers through certificate contracts to depict this on their fuel content label. We appreciate your review of our comments. =20 Stacey Bolton Environmental Strategies Enron Corp 713-853-9916 direct=20 713-303-2632 cell=20 sbolton@enron.com <<mailto:sbolton@enron.com>> =20

FYI

***NEW and IMPROVED SITE - National Database of State Incentives for Renewable Energy (DSIRE)

The National Database of State Incentives for Renewable Energy (DSIRE), has updated and moved its Web site to www.dsireusa.org. The database, funded by the U.S. Department of Energy's Interstate Renewable Energy Council (IREC) and managed by North Carolina Solar Center, is a clearinghouse of all existing programs to help encourage private efforts to convert to renewable energy sources (solar, water, and wind power). This new, user-friendly database is a must-see for anyone interested in tracking state and local renewable energy initiatives. The chart-driven site provides a variety of useful tools, including current and accurate information on incentives, programs, and policies, as well as access to documentation and legislation of state and local governments.

DSIRE's new Web site has been redesigned to include full text searching, incentive summary maps, new/updated incentives links, incentive descriptions, state-by-state reports, and related links. Various incentives include grants, rebates, loans, personal tax incentives, corporate tax incentives, sales tax incentives, property tax incentives, industry recruitment, and leasing and sales programs for utilities companies. Recently, schools have been utilizing solar power through these programs, with Texas hosting a number of projects. This new, user-friendly database is a must-see for anyone interested in tracking state and local renewable energy initiatives.

For more information about what DSIRE has to offer, see its Web site at: www.dsireusa.org

TX disclosure

Sender	stacey.bolton@enron.com
Recipients	['walton.agnew@enron.com', 'elliott.mainzer@enron.com', 'd..steffes@enron.com', 'richard.ring@enron.com']
File	ring-r/eesirenewableenergy/158.

Walt:

Attached is a copy of the TX label that has been prepared for small customers. For suppliers purchasing off of spot, the actual numbers to calculate the label and emissions will not be out until January. However if a company is making an "environmental claim" (I'll deliver you 100% wind), the company projects the fuel/emission mix they will deliver to the customer over a year period. See attached Green Mountain label as an example.
<https://www.greenmountain.com/gmec/tx/tx_efl.jsp>

As we discussed if TI is looking to differentiate their fuel mix, I know that Elliot and Richard will be able to help you from the REC commodity end. They will not be able to offset their NOx limits under the SIP by purchasing renewables. They will have to purchase ERCs or allowances from other companies that have overcontrolled or install control technology. I took a look at their Environmental statement, and they have an internal pledge to reduce energy consumption by 15% for their facilities. They highlight the emissions reductions from the conservation and detail their fuel mix (page 15).
<<http://www.ti.com/corp/docs/company/citizen/esh/english.pdf>> I'd let TI know that we can provide their fuel mix and emissions as well as offsetting their system purchase with RECs.

The TX labeling rules are as follows:

1. Disclosure labels with fuel mix, emissions data and average price are required to be submitted to residential and small commercial customers. Labels are submitted to customers 2 times per year and an annual report substantiating the purchases and sales is required to be submitted to the PUC. 2. To calculate the label or label(s), the supplier weights the percentage of power coming from system contracts/bilaterals/spot and renewable energy credits. The PUC has provided the fuel and emissions data from each generating company in TX along with the emissions on their website.
<<http://www.puc.state.tx.us/rules/rulemake/22816/050301lableworkbook.xls>> They will provide the default system mix for spot purchases by year's end. 3. Each supplier will have a percentage obligation to purchase renewable energy credits (representing the "attributes" of 1 MWh of renewable energy dispatched onto the grid) and will note this on the label. EES cannot "market" their obligation as a renewable product so you can't sell a product for a premium representing your entire renewable mandate to customers.

I'm glad to answer any further questions.

As you all know, I participated in the advisory committee that helped draft the "draft" MA RPS regs. Our group finished the process about a year ago. Since that time, the DOER has been working with the Gov's office on the language. National Grid has caused some "stink" over the last month regarding their obligation to comply. I've not yet had a chance to review the attached draft, but hopefully it did not stray too far from the original draft. I'll give you comments and impact by the end of the week. The MA RPS will go into effect in 2003. -----Original Message----- From: "OConnor, David (ENE)"

Dear RPS Stakeholder

I am very pleased to announce the public comment period for the Renewable Energy Portfolio Standard regulation. I would also like to take this opportunity to thank you, both for your past participation in our stakeholder process and for your future participation in the public comment period.

Public Hearings Schedule

? In Springfield, Massachusetts - October 25, 2001, 10:00 a.m. - 1:00 p.m. Court Room 305, rd Floor, Office of the Governor, 436 Dwight Street

? In Boston, Massachusetts - October 26, 2001, from 10:00 a.m. - 1:00 p.m. Minihan Hall, 6th Floor, Hurley Building, 19 Staniford Street

Written comments should be submitted to Robert Sydney, General Counsel, Division of Energy Resources, 70 Franklin Street, Seventh Floor, Boston, Massachusetts 02110. The deadline for the submission of written comments is 5 p.m., Friday, November 2, 2001. Parties wishing to speak at the public hearing may also provide a written copy or summary of their statement at the hearing.

The draft regulations and a background document can be downloaded from the DOER web site, www.state.ma.us/doer/rps. Anyone with questions about the hearing should contact Andrea Hattan at 617-727-4732, extension 123, or Matt Morais at 617-727-4732, extension 132.

Patricia:

My name is Heather Mathis and I work in the Legal Department on Disclosure = Label issues. Please let me know and I will coordinate preparing your Disc= losure Label for you when you decide what type of product to sell, per Stac= ey's e-mail below.

Thanks. ----- Forwarded by Heather Mathis/HOU/EES on 08/14/2001 02= :09 PM -----

From:=09Stacey Bolton/ENRON@enronXgate on 08/13/2001 05:41 PM To:=09Patricia Collins/HOU/EES@EES cc:=09Gloria Ogenyi/ENRON@enronXgate, Richard Ring/HOU/EES@EES, Heather Mat= his/HOU/EES@EES, Marianne

Castano/HOU/EES@EES=20 Subject:=09TX Disclosure

Trish: =20 Yikes....hope you are surviving! You'll need coffee after this product launch. Here's the lowdown w/ labels in TX. Your 1st label will be a projection or guesstimation of what you anticipate delivering to customers. I'd get it w/ Richard Ring on the desk (under Rogers Herndon) to verify that you guys will only be purchasing system mix. You might already have done so. On the fuel mix label (do you have a copy?....I'm attaching if you do not), replace the heading "Sources of power generation" with "Projected sources of power generation". Same w/ emissions....replace "emissions and waste per kWh generated" with "projected emissions and waste per kWh generated". EES = must then practice "due diligence" in its acquisition of power to ensure your projection is as close as possible to your actual. You will change to historical data on the label after one year (12/31/02). You have some leeway during the pilot as the final label calculation rule has not been adopted yet -- though it is unlikely that these requirements will change. =20 I must get in one other plug. You might seriously want to consider a green product option. In Texas, we have a system by which it is more cost-effective to purchase renewable power. That is how entities such as Green Mountain (label attached below) have been able to launch a 100% wind product. Reliant (label attached below) is offering a 100% green product in TXU's territory for only 1 cent more per kWh. Reliant's offering is for residential only. EPRI and Enron Wind have 135 MW wind facility and you might want to price a premium option for the smaller commodity customers from this facility or from the market in general. I am GLAD to hook you up with the internal folks that can help you w/ purchases for renewable energy. We're having a meeting on Thursday from 12-3 to discuss renewable origination and trading opportunities in EB 8c1 if you can tear away. Lunch will be served. Let me know. =20 Regards, Stacey Bolton Environmental Strategies Enron Corp 713-853-9916 direct=20 713-303-2632 cell=20 sbolton@enron.com https://www.greenmountain.com/gmec/tx/tx_efl.jsp Green Mountain's Electricity Facts Label for TX https://www.reliant.com/Residential_Secure/1,1667,OUTF-productList,00.html?personId=3D&provider=3D44372&submit2=3DContinue&promoCode=3D Reliant's residential label in TXU's territory <http://www.puc.state.tx.us/rules/rulemake/22816/22816arc/110100%20stra.rtf> = Proposed Rule

RE: Conf Call re: Invoicing for GSA Renewable Power

Sender	bill.hatch@enron.com
Recipients	[richard.ring@enron.com]
File	ring-r/eesidealsgsaregion1/26.

Of course....here it is.

Bill

From: Richard Ring/ENRON@enronXgate on 09/13/2001 10:32 AM CDT To: Bill Hatch/HOU/EES@EES cc: Subject: RE: Conf Call re: Invoicing for GSA Renewable Power

Bill,

If you have the Excel Spreadsheet can you forward to me prior to the meeting?

Thanks,

Richard

-----Original Message-----

From: Hatch, Bill Sent: Thursday, September 13, 2001 10:10 AM To: dbrown66@csc.com Cc: Nanof, John; Ring, Richard Subject: Conf Call re: Invoicing for GSA Renewable Power

Dyaniese,

Per my voice mail, I suggest we have a conf call with Richard this afternoon to discuss the GSA renewable billing. It is incorrect to charge three GSA accounts for the renewable power.

The proper GSA Renewable invoicing is as follows:

Charge JFK Building (57-1695-094001) 175,000 kwh/month at 5.5 cents and 225,000 kwh/month at 5.25 cents. This equals 400,000 kwh/month and 4.8mm kwh per year which is the minimum amount they contracted for.

The proper Hanscom Air Force Renewable invoicing is as follows:

Charge only HAFB Acc't # 516488321650, 200,000 kwh/month at 5.5 cents.

The problems I see ahead are the adjustments CSC needs to make to past invoices in order to properly re-calculate the monthly total consumption price. I'd like for Richard and me to review with you what CSC now needs to do.

Will 2:00 Eastern be ok with you? The dial in number is 800-711-8000; the passcode is 26060#.

Please let me know.

Thanks,

Bill

NEED PASSCODES? Email request to pubs@eenews.net or call 202-628-6500.

LEADING TODAY'S ISSUE: DOE REQUEST PUMPS UP NNSA, TRIMS CLEANUP, FOSSIL FUEL ACCOUNTS The Energy Department's \$21.9 billion FY '03 budget request sticks closely to the homeland security theme espoused by President Bush during his State of the Union. Cuts were reserved for non-defense environmental cleanup and fossil fuel energy research and development, with a targeted 6 percent increase set aside for the National Nuclear Security Administration.

Get all the details in today's full edition online at: <http://www.eedaily.com>

TOP HEADLINES IN TODAY'S EDITION INCLUDE: * APPROPRIATIONS/ENERGY AND WATER: DOE request pumps up NNSA, trims cleanup, fossil fuel accounts * APPROPRIATIONS/EPA: Bush proposes \$300 million in EPA cuts * APPROPRIATIONS/ARMY CORPS: For second year, Bush slices corps spending * APPROPRIATIONS/INTERIOR: Interior budget drops slightly; USGS, Forest Service take hits * APPROPRIATIONS/TRANSPORTATION: DOT budget sets up clash over highway spending * APPROPRIATIONS/ NOAA: Cuts proposed in NMFS, NOS, some Pacific salmon funds * APPROPRIATIONS/AGRICULTURE: Agriculture budget assumes \$73.5 billion Farm Bill * ENERGY POLICY: Hollings to hold subpoena vote to force former Enron CEO's testimony * ... AND MUCH MORE!

BREAKING NEWS: LAY CANCELS TESTIMONY Ex-Enron Corp. CEO Kenneth Lay last night abruptly canceled his scheduled appearance before a Senate panel. Details to follow in this afternoon's Greenwire and the next E&E Daily.

LEADING TODAY'S ISSUE:

ABRAHAM LEAKS A GLIMPSE OF BUDGET; FULL PICTURE DUE MONDAY Energy Secretary Spencer Abraham offered a limited taste of the FY '03 Energy Department budget last week when he announced a new \$800 million program to expedite environmental cleanup at the department's nuclear facilities. On Monday, the White House will propose the new program as part of its \$6.7 billion environmental management (EM) budget, a marked increase from last year's \$5.9 billion budget request for EM programs.

Get all the details in today's full edition online at: <http://www.eedaily.com>

TOP HEADLINES IN TODAY'S EDITION INCLUDE:

* APPROPRIATIONS/ENERGY AND WATER: Abraham leaks a glimpse of budget; full picture due Monday * BUDGET: White House to unveil budget heavy on defense, security * AGRICULTURE: Senators greasing up for more Farm Bill debate * TRADE: Zoellick makes Capitol Hill rounds this week * APPROPRIATIONS/ AGRICULTURE/ FOREIGN OPERATIONS/ INTERIOR/NOAA: USGS could face cuts; other agencies may flatline * PARKS: Muscle Shoals heritage bill, two others before parks panel * APPROPRIATIONS/ TRANSPORTATION: New security agency scoped as part of DOT funding review * ENERGY POLICY: Enron fallout shakes up PUHCA repeal picture * TRANSPORTATION: Freedom Car initiative analyzed at House hearing

* ... AND MUCH MORE!

For immediate release: October 3, 2001 Media Contact: Percy Della - 916-654-4989

Energy Commission Auction Increases California's Yield of Green Power

Sacramento - Nine more new renewable power plants -- with a combined production capacity of 300 megawatts for California's electricity market -- emerged as the successful bidders in a financial incentives auction conducted recently by the California Energy Commission.

The projects include a 30-megawatt facility powered by used tires in Imperial County, a 21-megawatt small hydroelectric plant in El Dorado County and seven wind projects with a total generation of 249 megawatts. The wind projects are located in four sites in Kern county and one each in Alameda, Palm Springs and Solano Counties.

Target on-line dates for the new plants range from February to December of next year.

"These new projects represent an important step towards Governor Davis' goal to increase California's yield of electricity from renewables from 12 percent today to 17 percent by 2006," said Commissioner Michal (spelling correct) Moore.

"We're very pleased that this auction was a success," said Moore, the chair of the Commission's Electricity and Natural Gas Committee.

The auction was the third of its kind conducted by the Commission's Renewable Energy Program. Successful bidders will receive incentive payments of up to 1.5 cents for every kilowatt-hour of renewable electricity they generate, and incentives are paid for the first five years of project operation.

As in the two previous actions, bidders submitted the cents per kilowatt-hour incentive they wished to receive, along with an estimate of their first five years of generation. To qualify for funding, projects had to be located in California and produce renewable electricity for sale, not just for on-site use. Bids were accepted from the lowest incentive to the highest, until the available funds were exhausted.

Previous auctions held in June 1998 and November 2000 resulted in awards of more than \$200 million for 1000 megawatts of new renewable generating capacity. Successful projects receive production incentives for five years once they are on-line and producing electricity.

Eligible "green" technologies are biomass, digester gas, geothermal, landfill gas, photovoltaics, small hydroelectric (30 megawatts or less), solar thermal electric, waste tire, and wind. Of the 72 successful projects from the first two auctions, 35 projects totaling more than 200 megawatts have been completed and are delivering electricity to the grid.

Results of the third auction can be found on the Commission's Web site at: www.energy.ca.gov/contracts <<http://www.energy.ca.gov/contracts>>. Information regarding the Commission's Renewable Energy Program is available at: www.energy.ca.gov/renewables <<http://www.energy.ca.gov/renewables>>.

All - I got a couple of call making sure that the meeting is scheduled for tomorrow (Wednesday) the 29th. That is correct. In my prior message I had said Wednesday the 28th which was incorrect. There's an omen following me around today. Hopefully tomorrow will be better. See you all tomorrow. Elliot, we will call you.

Thanks Mary Jo. Just wanted to send out a reminder to all that we are on for 3:00 p.m. tomorrow in EB 4795. Mary Jo and I discussed briefly the goals for the meeting, which I'll briefly recap:

1. Have notional prices for commodity and RECs
2. Have contract language, including REC language that Richard provided
3. Give Steve a firm "offer" to take to his boss, Bill Donovan
4. Have some feedback from accounting on the accrual aspect
5. Determine final steps for contract terms and execution

Look forward to hopefully getting close to wrapping this up for everyone. Thanks again Mary Jo for your leg work on this deal.

All - Wanted to make you aware of a couple of bills before the CA legislature that would place a renewable purchase obligation on all retail sellers in California if enacted. The attached document provides a comparative analysis of both bills (which are quite similar in language) and the resulting commercial implications. One bill in particular has momentum in that it is attached to the SCE bailout. Jeff Dasovich and Sue Mara have their finger on the "pulse" on the movement of these bills, so as far as status please contact them.

From: Ring, Richard Sent: Thursday, July 26, 2001 10:04 AM To: Bolton, Stacey Subject: Re: EES env product strategy mtg

Stacey,

I think that Elliot will be out of the office all week this week. As you know I will be out of the office all next week. Not sure what would be the best time for the proposed meeting.

Richard

.
From: Stacey Bolton/ENRON@enronXgate on 07/25/2001 06:17 PM To: Richard Ring/HOU/EES@EES, Heather Mitchell/HOU/EES@EES, Jeff A. Brown/HOU/EES@EES, Elliot Mainzer/ENRON@enronXgate cc: Lianne Lami/HOU/EES@EES Subject: EES env product strategy mtg

All - Lianne Lami and I would like to see if you all are available on Friday at 2:00 CDT to discuss potential EES environmental product offerings. I believe that either Lianne or I (or both) have talked to you individually about the effort to roll out environmental products -- except for perhaps Jeff. We'd like to have your participation, Jeff, in regards to the load curtailment product offerings you are working on, and how this might fit with other offerings such as renewable energy certificates and tradable efficiency certificates (negawatts).

The strategy meeting should last about an 1 and 1/2 to 2 hours, and will be a chance to pool our respective resources to see what type of environmental product offerings we can create. I'll gladly get us a team room on 47. Please let me know if you're available. Heather, I was planning to call you and hook you in.

RE: REC fees/TX transmission

Sender	stacey.bolton@enron.com
Recipients	['mike.curry@enron.com', 'doug.gilbert-smith@enron.com', 'jean.ryall@enron.com', 'elliott.mainzer@enron.com', '...]
File	ring-r/eesirenewableenergy/97.

Actually Thane you are hitting on exactly what I was referring too. While this impacts the REC program, it's really a transmission issue. Given our forward sale of RECs from the Pecos facility, I want to make sure that we don't get hit w/

unexpected costs associated with transmission. The Renewable Coalition is preparing for meeting with the Commissioners to propose solutions and try to mitigate any unforeseen fees associated with transmission (i.e. if lines are overloaded and trip/congestion etc.). Depending upon how Doug and Mike determine this would affect us, I wanted to make sure we have a strategy/plan to respond if necessary. Transmission is not my issue, but I'm certainly glad to facilitate us working through the renewable coalition to ensure our issues are being represented. Thoughts?

From: Twiggs, Thane Sent: Wednesday, September 19, 2001 8:58 AM To: Bolton, Stacey; Curry, Mike; Gilbert-smith, Doug Cc: Ryall, Jean; Ring, Richard; Mainzer, Elliot Subject: RE: REC fees/TX transmission

I have not followed the REC program, but I have heard in the ERCOT CSC determination meeting that they (ERCOT) have concerns in west Texas due to the large amount of wind generation. It is my understanding that last Friday a line tripped, due to the wind generation according to John Adams at ERCOT.

When you say keep an eye on transmission, what do you mean?

-----Original Message-----

From: Bolton, Stacey Sent: Tuesday, September 18, 2001 3:41 PM To: Curry, Mike; Gilbert-smith, Doug Cc: Twiggs, Thane; Ryall, Jean; Ring, Richard; Mainzer, Elliot Subject: REC fees/TX transmission

I'm hearing that ERCOT is backing off from ever invoking a fee for the REC program. If you recall, ERCOT was going to take up this issue again at the end of year -- after initially suspending invoking any fees. With the REC program up and going, ERCOT has determined that the fees to operate the program are not as high as initially projected. We're hearing that in January they will likely permanently roll all the fees associated with running the REC program in with the overall market administration fees. This is good news.

We need to keep a close eye on the transmission, though. If there are transmission constraints and congestion getting the wind power from West Texas, this will likely bump up the cost. Business; Financial Desk Enron's Wind Unit Reported in Talks Energy: Turbine division may fetch \$723 million. More bidders could come forward.

08/20/2001 Los Angeles Times Home Edition Page C-2 Copyright 2001 / The Times Mirror Company HOUSTON -- Enron Corp., the world's biggest energy trader, is in talks to sell its wind turbine unit for more than \$723 million, the Sunday Business newspaper in London reported, without citing sources. The negotiations may falter, inviting other bids, the newspaper said. Enron spokesman Mark Palmer wouldn't comment on the report. Enron has said manufacturing might not be part of its future strategy, Palmer said. Enron Wind makes and operates wind-power turbines. Houston-based Enron bought the business, based in Tehachapi, Calif., in January 1997. "There is a tremendous potential for a wind or renewable energy market to develop," Palmer said. "We don't know that we need to be in the manufacturing business to participate in that." Credit Suisse First Boston is handling the sale, Sunday Business said. Private equity firms that may bid include Doughty Hanson & Co. and Candover Investments, both of Britain; Westdeutsche Landesbank Girozentrale of Germany; and Nomura Securities Co. of Japan, the paper said. Possible industry buyers include Vestas Wind Systems

and NEG Micon, both of Denmark; Gamesa of Spain; and Nordex and Enercon, both of Germany, the paper said. Last week, Enron Chief Executive and President Jeffrey K. Skilling abruptly resigned. Chairman Kenneth L. Lay has taken over his duties.

fyi MIRANT TO FUND AT LEAST \$50 MILLION IN CLIMATE CHANGE INITIATIVES

09/24/2001 Oxy-Fuel News (c) 2001 Phillips Business Information, Inc. Atlanta-based energy provider Mirant will fund at least \$50 million in initiatives to help find solutions to global climate change, it announced recently. The investment, which will be made over 10 years, is one of several projects outlined in the company's first annual environmental report. "This funding is a further investment in the development of a progressive environmental program that can benefit the global community in which we operate," said Mirant President and CEO Marce Fuller. Mirant's environmental report outlines the company's commitment to fund climate change initiatives, including greenhouse gas (GHG) mitigation projects to help offset its CO2 emissions, such as carbon sequestration projects. The company will also fund research develop less carbon- intensive generation technologies. Additionally, renewable energy will play an important role in meeting global energy the company will pursue opportunities to develop and invest in renewable generation projects. "Mirant expects that Europe offers many of the best opportunities for investment in renewable energy given the targets set by several European Union countries to increase their share of renewables," said Barney Rush, CEO of Mirant's European business group. Mirant's environmental report also features several environmental initiatives the company has developed, including

establishment of environmental performance indicators to set improvement targets and measure performance and a commitment to develop air emissions reduction goals.

-----Original Message-----

From: "Yetman, Kathleen" <KATHLEEN.YETMAN@us.ngrid.com>@ENRON Sent: Friday, October 12, 2001 1:05 PM To: 'frishe@enron.com' Subject: FW: Massachusetts Electric Default Customer List - FTP Site Instr utions

The Default Customer List has been updated. To obtain the new password, please call Supplier Services at 508-357-4700.

*An Internet FTP site has been set up for access to the Massachusetts Electric Default Customer lists. See the information below on the FTP site details and for setting up your FTP software for file download. If you would prefer to receive the list on a Zip Disk, please let me know. The package WS_FTP Pro is suggested for downloading the files. It is available for purchase and download from <http://wsftp.com> for about \$40. Once WS_FTP is obtained and loaded, you will need to set up an entry representing the Masselectric FTP server. FTP site name: ftp.us.ngrid.com FTP site IP address: 204.164.80.201 User ID: Obtain from Masselectric Supplier Services Call (508) 357-4700 Password: Obtain from Masselectric Supplier Services * Open WS_FTP Pro - you will see a screen with two windows side by side, with a 'WS_FTP Sites' dialog box on top. * In the WS_FTP sites dialog box: * click 'New' - another dialog box will open * select 'Create a FTP site', and type 'ftp.us.ngrid.com' on the "With Name" line - click 'Next' * in the next dialog box, fill in Host Name or IP Address: '204.164.80.201' -- click 'Next' * in the next (and last) last dialog box, fill in User ID (do not click 'Anonymous'), fill in the Password, and click 'Finish' * Toggle the tab within WS_FTP Pro for this entry to default to "nonpassive mode" ftp. * Record the user ID and password for future access - you will be prompted for it whenever you attempt to use the 'ftp.us.ngrid.com' site. * Now you will see the WS_FTP two-window screen with a new directory entry in the right screen under 'MySites' named 'ftp.us.ngrid.com'. The left screen is the directory of your PC and network. * You may obtain the User ID and Password from Mass Electric Supplier Services. The Password will be changed periodically to control access to the customer lists. If you already have FTP software other than WS_FTP Pro, it may be used for the downloads. You will need to set up the software using the site and access information above. To transfer files from the FTP site, start Ws_FTP, and select the "destination" directory for the download in the left (local) window. Open the 'ftp.us.ngrid.com' site in the right window (password required). In the right screen, select the file(s) to be transferred, and either drag-and-drop or use the "arrow" controls to transfer it to the destination directory. The file will be transferred into the selected directory in the left window. It can now be unzipped on the local machine. If you have any questions, please let me know.*

Thanks Kathy (508) 421-7209

File	ring-r/inbox/30.

All, In the future, please refrain from parking in the area on the west side of the building when working at or visiting the Austin Facility. This area is reserved for General Motors. It is easily identified. The lot has blue striping and is marked "GM Parking Only". In most cases, there is ample parking in the front, rear and on the east side of the building. In the rare instance that parking is unavailable, please check in at the security desk and you will be directed to an overflow parking area.

Thank you for your cooperation.

As you are likely already aware, the Ohio environmental disclosure rules require that the disclosure forms contain certain regional environmental information (in addition to the supplier-specific information).

Attached is a Word document that conveys the regional environmental information which is to be included in the environmental disclosure forms focusing on activities during the year 2002.

Please feel free to contact me if you have any questions concerning this data or how it is to be utilized.

Thank you.

Stacey,

What, if anything do you know about Enron's investment in twelve (12) different alternative energy companies?

Richard

----- Forwarded by Richard Ring/HOU/EES on 08/22/2001 09:00 AM -----

Krista Kisch 07/30/2001 12:12 PM To: Richard Ring/HOU/EES@EES cc: Subject: Greetings

Hello, Richard:

We met a couple of months ago. I was working with Bill Hatch in Boston, MA; I am now with the Product Management group in Houston. I was wondering if there are any new developments regarding Enron-Renewable Energy ventures. I read that Enron has invested in 12 different alternative energy companies (which was news to me).

Hope that you are well.

Kind regards / Krista Kisch Tel: (713) 345-8640

Retail Energy Foresight -- FREE Trial Issue

Sender	foresight@xenergy.com
Recipients	['foresight@xenergy.com']
File	ring-r/personalfolder/53.

Dear Colleague:

Need information on retail energy markets?

Retail Energy Foresight, a bimonthly publication with switch rate predictions and thoughtful analysis, is what you need to understand today's volatile retail energy markets.

Download FREE trial issues from XENERGY's web site at
http://www.xenergy.com/XENHOME.nsf/HTMLDocs/3B_Foresight

Every issue of Retail Energy Foresight presents:

- > Switch rates by utility service territory and customer class from around the nation;
- > Predictions of switch rates for Pennsylvania, Illinois, and other markets;
- > An intimate look at markets and related topics; this month read about Market Backwaters and potential for revival;
- > All of the above served up with our own brand of humor to make retail energy markets actually fun to read about.

Take a look at what Retail Energy Foresight has to offer. We think you'll agree it's a valuable and unique analysis publication, and hope that you're tempted to subscribe. To do so, print out and fax back the order form on the last page of any issue (from our Web site) or call me at 781.273.5700 x387.

Regards,

Susan Weber Editor - Retail Energy Foresight sweber@xenergy.com Tel. 781.273.5700 x387 Fax 781.273.9368

About Us: Retail Energy Foresight is published by XENERGY, an energy consulting firm with 25 years experience, specializes in understanding the retail energy markets. With the help of our clients, we have invested over \$8 million studying retail energy markets, making us uniquely qualified to provide the analysis and predictions you need to thrive in this new arena.

If you would like to have your e-mail address removed from this mailing list, please reply with "remove name" in the subject field.

Glad you got that stuff off to Elliot. There's another huge reorg happenin= g in EES that will affect Ozzy's group (reorg in EES...no). Might want to = feel out Dave for info if you haven't already. Lianne is moving to structu= ring under Sean Holmes, so the env. product offering is likely being taken = up under Blackman's group (will work closely with origination). The strate= gy is changing to have product offerings that can be presented to customers= during the deal process (hum....sounds like this should have been in play = all along). Thus having a premium clean product line will be ideal to get = before the product development folks. Jay Lewis will be over commodity pro= duct offerings most likely, and Ken Gufsaston will be over integrated commo= dity offerings (not sure what that means). Lianne said that Constantine ("=

Dino") Damaskus, chris Wismann and Tom Adams will be good folks for us to follow up with on the environmental product end to include EECs. It will also be good for Elliot to make sure these folks know of the Green Power Alliance and Green offerings. She recommended waiting until mid-August until some of the reorg shakes out.

Richard, have you gathered any further intelligence?

Hey Aaron -- Still with us in Costa Mesa? what's the latest? Any thoughts on Patagonia?

Thx,

Elliot

-----Original Message-----

From: "Klemm, Aaron" <Aaron.Klemm@enron.com>@ENRON [mailto:IMCEANOTES-+22Klemm+2C+20Aaron+22+20+3CAaron+2EKlemm+40enron+2Ecom+3E+40ENRON@ENRON.com] Sent: Tuesday, June 12, 2001 11:08 AM To: Mainzer, Elliot Cc: Ring,Richard Subject: Renewables customer for upsell on a green ticket swap

Elliot:

I spoke with Patagonia this morning. They are interested in rolling the renewable purchases out to all US stores (12 new facilities) and possibly blending and extending the commodity portion of their purchases in California across as many stores as possible.

Here are my notes on what we talked about on the latest telephone call.

There was no definitive talk about deal structures but that will be coming up shortly. Patagonia is looking for savings and renewable energy. I introduced risk management instead of savings and it was well received but will require more clarification as we move forward.

<<Green Ticket swap pitch.doc>>

I spoke with the Director of Retail and will be speaking with the VP of environmental programs to gather more information on the structures that they would like to see.

I spoke with the Account Manager/Service Manager for Fetzer Vineyards and she said that they are interested in new renewable products as well. She asked to listen in on our call on 6/18/01. She is in San Ramon and her name is Renee Fernandez. I have met the customer and would like to move ahead with a meeting to get this customer on board as well.

Contact me if you have any questions.
