Carter,

Can you help me find out what the ERMS code is for the attached indexes? Let me know if you are not the correct person to go to.

Thank you,

Melba

Thomson Financial Client Services Returns to 195 Broadway Office

Sender	thomsonfinancial_news.um.a.2533.304@thomsonfinancial.unitymail.net
Recipients	['brogers2@ect.enron.com']
File	rogers-b/inbox/274.

To our valued Thomson Financial clients:

We are pleased to announce that as of Monday, October 29, 2001 Thomson Financial's Client Services Team has returned to our downtown New York City office located at 195 Broadway.

For Client Services help with any of our products, please call:

1-888-989-8373 (toll-free in the U.S./Canada) or 1-646-822-3600 for help with SDC Platinum, Research Bank Web, ShareWorld, Prism, and VentureXpert

1-800-843-7747 (toll-free in the U.S./Canada) or 1-646-822-3500 for help with Global Access, Edgar Direct, PiranhaWeb, Global Access Pro, and CD Products such as Compact D.

Please note that, although our toll-free numbers have NOT changed, clients calling from countries outside North America should now dial 1-646-822-3500 or 1-646-822-3600 to reach the U.S. Client Services team directly.

We look forward to working with you to ensure continued growth for the global financial community.

Thank you.

You are receiving this message because you have asked that we notify you of any news about Thomson Financial (TF) and its products and services. If you do not want to receive future messages from Thomson Financial, please follow the directions below.

Ben:

It was a pleasure speaking with you. As requested, here is the information on our site team to the best of my knowledge.

Team Lead:

Joseph P. Synnott Director, A&D DENA

Phone: 713-627-6579 Fax 713-627-6544 Cell: 713-818-6193

5400 Westhiemer Ct. Houston Tx 77056

(As mentioned, I have a family situation that could take me out of pocket. In which case Mark Peters would fill in.)

Mark D. Peters Director A&D DENA

Phone: 713-657-6578 Cell: 713-882-6871

Fax and address are the same.

Others:

From DENA (Switchboard: 713-627-6500, Address as above)

Charles Holland Managing Director, Asset Management

Jon Pritchett Manger, Asset Management

John Hawkins Director, Construction Management

Kevin Grant Director, Environmental Health & Safety

Daniel Barpal Director, Technical Services

(In addition, at this moment I would like to reserve two other slots as follow:)

Terrence Jackson Commercial Associate, A&D DENA

TBD (If participates, we will follow protocol with regard to confidentiality agreement.) Manger, Operations Duke/Fluor
Daniel

Dates:

As agreed to yesterday, our expected schedule is:

10/13/2000 9 am Wheatland, IN (Attendees: Synnott, Holland, Pritchett, Hawkins, Grant, Barpal)

10/17/2000 9 am Gleason, TN (Attendees: 9 am Holland, Pritchett, Hawkins, Grant -- Noon: Synnott, Barpal)

10/18/2000 9 am Lincoln, IL (Attendees: 9 am Synnott, Holland, Pritchett, Hawkins, Grant)

The list for 10/13/2000 is pretty much finalized. The others should be final within a day or so.

If you need any additional information or have any questions, please don't hesitate to contact me.

Regards,

Joe Synnott

Dominic Gioffre 4603 Weldin Road Wilmington DE 19803 302-764-8259 302-764-6961

Thanks Again,

I will make it up to you. Do you have any cavities??

Mike

From: Benjamin.Rogers@enron.com To: dgioffre@hotmail.com Subject: Re: Date: Thu, 23 Mar 2000 10:47:04 -0600

Mike: My Dad has the tickets and is going to keep them with him. He doesn't want them to get lost in the mail. We are staying in Cincinatti and are driving over Sat and Monday for the games. The best thing to do is meet at a certain gate # or the "will call window". I will call your Dad next week and set things up on a meeting place before the game. Leave me your Dad's home number so I can call him next week. These guys are going to have a great time that weekend. Talk to you soon. Ben Home #: 713-355-8738 Work #: 713-853-7998

GMAT Preparation class to be presented by The Princeton Review	
Sender	enron.announcements@enron.com
Recipients	['all.houston@enron.com']
File	rogers-b/discussion_threads/505.

Enron and The Princeton Review have teamed to offer a review course at the Enron Bldg. for the Graduate Management Admission Test (GMAT). The GMAT figures prominently in applicatons to business school. While work experience, GPA, essays, and interviews are important components of the application, only the GMAT score can be changed substantially in a short period of time.

The Princeton Review invests over three million dollars per year in research and development. They routinely send their GMAT teachers to take the actual test to ensure that students who take the review course are fully prepared.

The first in a series of GMAT classes will begin at 6:00 p.m., Thursday, April 13, 2000, in EB 560.

8 weekly meetings held at Enron, Room EB 560. 6-9 PM for 3 hours (1st meeting will be 4 hours to include initial exam - 6-10 PM) Classes begin Thursday, April 13 through Thursday, June 1 Class size limited to 8 students 25 hours of class time Associates and Analysts in the Program need to call Celeste Roberts, x 30555, for procedures All others must get prior approval from their Supervisor Enron will pay for one GMAT study program

Register directly with the Princeton Review

Call 713-688-5500 Pay tuition (\$700) with your own credit card Receive a complete set of Princeton Review course materials Practice with 4 diagnostic exams during the 8 week class

Reimbursements

Obtain a certificate and receipt from The Princeton Review Complete the Educational Assistance form (see attached) Associates and Analysts should take their forms to Celeste Roberts, x 30555, EB 3633 for approval and processing All others should take their forms to their supervisor for approval and then to the HR Service Center for processing (Veronica Parra, EB 3661, x 34777)

Please refer to Enron Policies and Procedures at ----- <http://hrweb.enron.com/>

Ben:

Thanks for the e-mail message. I'm sorry for the delayed response, but I've been out of the country for over a week.

I will be in the office on Friday morning at about 9:00 am. Unfortunately, I have a seminar to attend later in the morning and then I have to teach all afternoon so my time is a little tight. If that is convenient for your schedule, however, please stop by my office.

Regards,

Keith

At 03:53 PM 2/8/2000 -0600, you wrote:

Mr. Brown: My name is Ben Rogers and I am currently applying to The Texas Business School for enrollment in the Fall of 2000. I was referred to you by David Martin, graduate of the Business School and the son of John Martin, former Finance Professor. I have worked with David at Enron for a couple of years and have learned a lot about the School. I also was referred to you by Kyle Kettler, who graduated from the Business School in 1998 and who worked in the investment fund. I have been working in several different finance positions within Enron for the last two and a half years. Before coming to Enron I worked for three years in a portfolio management group with State Street Bank in Boston. I am very interested in the combination of energy and corporate finance and have the desire to continue working in these industries after business school. I am also very interested in the investment fund. I feel that with my prior experience with State Street Bank, I could contribute a great deal to the fund. I am coming to visit the school on Friday, Feb. 18th and was wondering if you had time to talk to me about the Investment Fund. If you could please let me know if your available, I would greatly appreciate it. If your not available that day, I would still like to talk with you about the program. You can either e-mail me back or you can reach me at Enron in Houston at (713) 853-7998. Please let me know if you want me to send you my resume, so that you have a better understanding of my background. The admissions office has my complete application with my resume. Thanks in advance for taking the time to talk with me. Hope to hear from you soon.

LAST CALL - TEAM MEETING

Sender	amelia.alder@enron.com
Recipients	['amelia.alder@enron.com', 'bykegods@cs.com']
File	rogers-b/enron_bike_club/6.

MS150 Team Enron 2000 Meeting Wednesday, April 5 5:00 - 7:00 PM Enron Building Conf Room 5C2

Park in the Allen Center garage, and proceed on the third floor walkway from the garage to the Enron Building, 1400 Smith. Check in with security and they will have all your names listed. 5C2 is just off the elevator on the 5th floor.

At this meeting you'll be able to pick up your newly designed 2000 Enron jersey. Becky Pham and Stephanie Strong are in charge of the jerseys. If you can't be there, please contact either of them by email: sstrong@enron.com or bpham@enron.com or call them 713-853-1653 or 713-345-7094 to reserve your size and make arrangements for pickup.

Our guests are Jeff Nielsen and Trey Richardson, West U. Schwinn. They will conduct a stretching/fitness clinic as well as a bike repair clinic. Great time to ask anything you want to know about your bike from the experts. This is a totally informal meeting - come and meet us and ask your questions, and get your jersey!

In case you're wondering about picking up your rider packet at this meeting, we do not have those available - we only had one opportunity for our team pickup from MS and that was last Friday. If you showed up that day and turned in your pledge sheet but were told that your packet was not here, it will be provided to us and we will get it to you. If you are not in that category, please plan to pick up your packet at one of the designated packet pickup points in your rider manual which I've listed below for your convenience. (We are going to try and work out our own registration process for next year to cut out this confusion - we apologize for any inconvenience this has caused, and let me know if you feel that your rider packet is dangling. Most of them that were left out have been delivered to you. My phone number is 713-646-6569.)

Here's the remaining packet pickup locations:

KINGWOOD Wednesday - April 5 5:00 to 8:00 pm AJ Foyt Isuzu 22575 Highway 59 North

INNER LOOP HOUSTON Saturday - April 8 10:00 am to 4:00 pm The Home Depot #566 West Loop South @ Southwest Freeway

Monday - April 3 4:00 to 8:00 pm Hooters Kirby @ Southwest Freeway

SOUTHWEST HOUSTON Wednesday - April 12 5:00 to 8:00 pm McKinzey Bond Isuzu 8201 South Gessner

If you miss all of these, you can still pick up at the Westside Marriott (MS150 headquarters hotel) at I-10 & Eldridge, on April 14 from 3:00 to 10:00 pm, and while you're there, you can carbo-load on the pasta buffet and visit the Bike Expo - a good way to get "pumped" for the ride, pick up some good buys - be sure to visit Jeff Nielsen at the West U. Schwinn booth to thank him for all his support for the Enron team this year!

Is the major maintenance reserve estimate based on a negotiated Long Term Services Agreement (LTSA)? If so, will it be in place and transfer with PEF?

Are spare parts for the first major overhaul included anywhere in the capital cost estimate or are they assumed to be purchased through the maintenance reserve estimate (i.e. the LTSA) charge?

"Rippy, Roger" <rogerrippy@akllp.com> on 12/07/2000 09:29:26 PM To: <Mitch.Robinson@enron.com> cc: <stuart.zisman@enron.com>

Subject: Schedule Updates

Mitch,

There are a few items on which I need your input in order to update the schedules for Brownsville and Caledonia. Stuart has asked me to follow up with you.

In re: Brownsville

I am still waiting on certain purchase orders from KVB Intertech and Seimens (for telephone support), as well as any others that may be out there.

"Mitchell/Ross, please have them faxed to my office number at 713-345-7384. Time has become more critical. In order to save time, please also fax copies directly to Roger's office - - the fax number is below"

In re: Caledonia

I am also waiting on a purchase order from KVB Intertech, as well as any others that may be out there.

"Pat/Ross, please fax to my office and directly to Roger"

Further, I am waiting on some spill info for Schedule 4.1(n), Environmental Matters, of Caledonia. Specifically, I need a blurb to insert into the schedule.

"Already sent by Gus. Let me know if you need anything else."

Also, on Schedule 7.12, Stuart stated that you are preparing some updated to Excluded Assets for Caledonia.

"Pat, you stated in our conference call that there were some items that might have been at the plant that were of a personal nature and therefore would not be included in the asset sale. In general, if they are low dollar (e.g. \$500), then I don't believe you need to specifically exclude them. This isn't meant to be a big deal; what I don't want to have happen is the buyer gets the plant and remembers a large drill press was at the plant and isn't anymore because it was your personal press. Make sense??"

Finally, I am not clear on what to do on Schedule 4.1(v) on Caledonia in regard to the defective blades as well as to some problem with the (Westinghouse) bearings. I need blurbs to insert into the Schedules. I have seen some documentation via e-mail, but do not know how these items should be described in the Schedules.

"Had a discussion with a bidder this morning. I recommend the following blurb. Please review from a legal stand point and advise. - - - Though the generator bearings are operating correctly, the Brownsville turbine vendor has implemented an upgrade to these bearings at other plants. Enron will make commercially reasonable efforts to get the vendor to conduct this upgrade as a warranty item. - - - The Caledonia turbine vendor has recently issued a Technical Information Letter (TIL) that could limit turbine operations during low ambient conditions. Enron will make commercially reasonable efforts prior to deal closing to implement the control curve changes recommended in the TIL - - - Enron will continue to make commercially reasonable efforts to install new silencers on the exhaust of units 1 and 2 at Brownsville in an attempt to mitigate possible start-up noise. Enron will provide XXXXXXXX copies of technical descriptions of the silencer

improvements once received from the vendor. If vendors provide possible solutions that substantially deviate from a silencer upgrade, Enron will get xxxxxx's concurrence prior to proceeding. Enron will cover the cost of the silencer upgrade up to \$500,000, and Enron will make commercially reasonable efforts to complete the upgrade prior to June 1, 2000. If the upgrade completion is not likely to occur prior to June 1, 2000, Enron will get xxxxxx's concurrence prior to proceeding."

Please update me at your earliest possible convenience as we are still in negotiations with the counterparty and may be executing this agreement this weekend.

Please call me with any questions.

Thanks.

As I read it, the only potential action item that involves me directly has to do with a KVB Enertec purchase order. I am not sure which one you are addressing. I also could direct you to Jim Meyer on this.

We do receive from time to time copies of POs but typically we submit Purchase Requests and Jim issues the POs. Depending on the service or item we may need to have a copy of the PO on site. But typically we ask Jim for it when applicable. He has copies of all POs and would just need to know which one you want.

Thanks, -Pat

Dear Ben:

I enjoyed meeting with you. I sent a letter recommending you to our Dean in charge of the MBA program. Let me know if you hear anything from the people in the admissions office.

I hope things work out and I have the opportunity to have you participate in our energy finance program.

By the way, I like the idea of bringing in various industry leaders. I currently do this in my class, but it might make sense to consider ways to get first year students involved in this activity.

regards,

Sheridan Sheridan Titman Department of Finance College of Business Administration University of Texas Austin, Texas

Ben:

I talked to the admissions people last week. They had not made a decision but said that your GMAT score is a potential problem. You may need to either retake the exam or somehow document any disability that would bias the score.

I hope that this works out -- I know that you will be a great addition to our Energy Finance Program.

Sheridan

Goodbye BankU, Hello Unemployment

Sender	cmcwhert@bankunited.com
Recipients	['amy_koy@aimfunds.com', 'courtney_black@aimfunds.com', 'jsd1@airmail.net']
File	rogers-b/personal/199.

The time has finally arrived for me to leave the working world - tomorrow (7/28) is my last day at Bank United - and I will soon be leaving for Evanston, so I thought I'd pass along some info if you need to reach me.

I'll be in Houston until around August 23rd or so. My home # is (713) 665-5792. I can also be reached at the parents' house at (281) 920-3113. No more cell phone for now - drat! My email address (until I get up to school) is: cbmcwherter@yahoo.com .

My contact info in Evanston is:

1600 Hinman, Apt. 1M Evanston, Illinois 60201

(847) 869-7988

I'll forward my Kellogg e-mail address when I get it in September. If you ever want to come up and check out Chicago, catch a game at Wrigley, or donate money to the McWherter Scholarship Fund, please let me know. I'll be more than happy to take a break from the world of academia and do whatever.

I'm sure I'll see most of you before I leave, but if not, take care and I wish you the best.

Blake

FW: Urban Business Initiative Volunteer Kickoff (flier attached)

Sender	c..bland@enron.com
Recipients	['billy.lemmons@enron.com', 'traci.warner@enron.com']
File	rogers-b/inbox/41.

Please see below and respond accordingly. Thanks. Ted

You are invited to attend the 3rd Annual Urban Business Initiative Volunteer Kickoff on Wednesday, September 26, 2001 at Slainte Irish Pub (509 Main Street) at 6:00 p.m.

The Urban Business Initiative is a group of young professional volunteers who are committed to the economic revitalization of Houston's inner city. UBI was founded by a group of Enron analysts in 1996, and has since grown to include volunteers from more than 15 corporations in Houston.

UBI volunteers work on consulting teams with small business owners and entrepreneurs in Houston's inner city on projects such as developing business and marketing plans, conducting financial analyses, and providing technology assessments. They also develop and conduct business education seminars to promote business literacy in Houston.

Please join us if you would like to learn more about the Urban Business Initiative and the impact we are having on Houston's inner-city businesses.

Sincerely, Mary Messick

Ben:

I don't know exactly what to recommend because I am not involved in the admissions process. I think that you may need to give them some sort of documentation about the nature of your disability and demonstrate that this will not carry over to your class performance.

I think the question is the following: Can you explain why you cannot perform on a GMAT test but will be able to successfully perform on the tests in your MBA classes?

I hope this is helpful and apologize for the stress we put our applicants through.

regards,

Sheridan

At 06:15 PM 3/7/00 -0600, you wrote:

Professor Titman: Thank you for talking with the people in the admissions office. I wanted to ask you what you think I could do at this point to help the admission's people understand the reason for my GMAT score. I know that this is a poor reflection of

what I can actually achieve and I know that I will do well and be successful in the learning environment at UT. If I need to, I can provide the admissions office the documents stating the disability. If you can let me know what you think I can do, I would appreciate it. Thanks agin! Ben

Tax Abatement

Sender	stuart.zisman@enron.com
Recipients	['don.miller@enron.com', 'benjamin.rogers@enron.com']
File	rogers-b/all_documents/328.

Here's our local counsel's response on the Duke question relating any contractual obligations (in Indiana) to retain a certain minimum number of employees. His answer relates specifically to the tax abatement that we received. In his memo, he suggests that we speak with John Gregg (which as you both know I have already done). He mentioned that going below nine employees would likely ruffle some political feathers. If I am not mistaken, however, I believe that we have more than nine people and therefore there might be some economies that are achievable by a potential buyer.

Stuart

FALL ECONOMIC OUTLOOK MEETING - Update on time

Sender	wchiume@nyiso.com
Recipients	['mfazio@keyspanenergy.com', 'market_relations@nyiso.com', 'gbfreeland@nyseg.com']
File	rogers-b/trading_info/47.

WChiume@nyiso.com writes to the NYISO_TECH_EXCHANGE Discussion List:

THE ECONOMIC OUTLOOK MEETING Presentation by Economy.com

The NYISO Analysis & Planning Department is pleased to announce the next Economic Outlook Meeting scheduled for October 18, 2001. The meeting will be at the NYISO facilities:

290 Washington Avenue Extension Albany, NY 12203

There will be lunch at NOON. The meeting starts at 12.45 to 4.30 PM.

Dr. Celia Chen and Dr. Steve Cochran from Economy.com will present the outlook for New York, Northeast and U.S. economies. The meeting is open to any market participant interested in attending.

I encourage market participants to attend this meeting particularly given the current 'uncertainty' on where the economy is heading. The presentations will cover a broad range of issues, including:

? will the interest rate cuts help? ? was the tax cut sufficient, or 'timely'? ? how are the New York metro economies doing?
? the impact of the stock market on New York, and ? what are the implications of the global economic slowdown to the U.S. economy?

The last meeting in March was vibrant and insightful. I anticipate the same for the next one, so mark your calendars. Also, send me any questions that you would like to see addressed by Economy.com. Preferably by September 28.

Please call me or send email to confirm your attendance.

Regards,

Will.

File	rogers-b/all_documents/756.

Dear Ben:

Its nice hearing that you are doing well and that you are taking MBA finance classes --- are these at U. of Houston?

The admissions people mentioned that your GMAT score was too low when you applied last year. They said that if you had a higher GMAT score we could consider you as a special case because of your background in energy finance. Basically, my impression was that you didn't need to have a score close to the 660 median, but you need to improve a lot. I would also recommend that you work more on the quantitative sections, since it is clear to me that your verbal skills are quite good.

Keep in touch.

regards,

Sheridan

Professor Titman: I hope you had an enjoyable summer and it didn't go too quickly. I hope you remember who I am from last years application process. I enjoyed meeting you last year and talking with you regarding the curriculum and admissions process. I wanted to let you know that I am still very much interested in attending the Business School. I took your advice this summer and took a graduate level finance class (Financial Management), which I received an A. I was very pleased with myself, because I had not taken this type of class in quite some time. I have decided to take another graduate level finance class (Macroeconomics), which I am currently taking and runs through December. I also sent my information regarding my learning disability into GMAC to try and receive a "special testing status" for the GMAT. I am currently waiting to hear back from them with their decision. As you can see, I am still very much interested in attending the Business School for next year and I'm in the process of doing whatever I can to increase my application profile. I am also sending an e-mail to Carl Harris, who heads up the admissions process to inform him of these recent developments. Please let me know if there is anything else you think I need to do to enhance my application profile. Again, I hope all is going well and I look forward to hearing from you soon

Stuart,

Attached are a clean and a blackline version of each of the due diligence indices for the six plants. As you know, I have recently made several additions to each of these indices based upon my time in the data room this past week. This includes recent documents for the 2000 peakers as well as other previously unseen documents that came from the boxes that were given to me by Don Miller.

I understand that Jinsung and Ben Rogers had previously given the prior drafts to Ben Jacoby and others to review for redacting purposes. It will be necessary and useful to give these blacklines to those persons doing that review to note the recent additions and review these as well.

I also understand from Carolyn Gilley that she will coordinate with Lorie Leigh regarding the creation of the due diligence files on Live Link. It seems relevant that Jinsung and Ben Rogers are also aware of how this process would work.

My understanding, and I will confirm that this is done, is that Carolyn's scanning personnel are to be scanning in the additions into Live Link today per my request. There is also some filing and re-filing that will need to be done in the data room and I have alerted Lorie Leigh to this fact via voice mail on Friday.

I seem to have left Don Miller's, as well as Ben Rogers' and Jinsung's, e-mail addresses at my home over the weekend. By copy of this e-mail, I am asking Lorie to please forward it to Don, Ben, and Jinsung. She has confirmed to me via telephone that she will do so.

If you or any of the others involved in this project have any further question, please do not hesitate to call me. Thank you.

File	rogers-b/texas_b_school/6.

Dear Ben:

I am very disappointed to learn that you will be unable to join our energy finance program next fall. However, I'm pleased that you are willing to keep trying.

I suggest that if possible, you take an MBA level finance class at U of Houston this summer. If you can get an A in the class, I will personally argue your case to the admissions Dean. I was also told that your chances of getting in would improve considerably if you raise your GMAT over 500.

Its clearly a long shot, but we should still try to get you into the program next fall.

Let me know how things are going.

regards,

Sheridan

At 06:04 PM 3/21/00 -0600, you wrote:

Professor Titman: I would like to thank you for taking the time to recommend me to the MBA Program. In the end, the results were not favorable. I understand that it is a competitive process, but I felt that with my work experiences, recommendations, extracurricular activities, etc., that this would help my chances and possibly compensate my disability. After talking with you and Professors Ronn, Brown and Jemison, I was sure that UT was the right place to continue learning about energy-finance. I am still sure that UT is the place for getting an excellent graduate-level education, so I want you to know that I am going to do what ever it takes to get in next year. I plan on taking a couple of graduate level finance courses at the University of Houston this Summer and Fall to demonstrate to the Admissions office that I can compete at this level. I also plan on trying to retake the GMAT test. Due to my disability, this will be a monumental task, but I am determined to prove to the Admissions committment that I can do the work at The Texas University Graduate School of Business. Also, I would like to continue our dialogue regarding creating an Energy-Finance Private Equity Fund at UT. I know that with my industry-wide and investment banking contacts that I can help raise capital for the fund. I am very interested in energy-finance and think that your idea is a very good. Thanks again for taking the time to listen and talk with me. It has been a pleasure to meet with you and I hope we can continue to talk about energy and finance in the future. Also, if you think of anything else I can do to strengthen my overall application file for next year, please let me know. Take care and hope to hear from you soon. Sincerely, Ben Rogers

NYC Marathon Update

Sender	mailer@list.nyrrc.org
Recipients	['benjamin.rogers@enron.com']
File	rogers-b/inbox/71.

The New York City Marathon will take place as scheduled on Sunday, November 4, 2001. The following are items of special interest:

HOTELS Prices have been reduced at selected New York City Hotels. Please check www.nycmarathon.org for complete hotel and airline information.

FINISH LINE BANQUET The 2001 New York City Marathon Finish Line Banquet will be held at Tavern on the Green, West 67th Street and Central Park West, from 10:15 a.m. to 3:00 p.m. on Marathon Sunday, November 4. It includes champagne brunch, gourmet cuisine, open bar, VIP seats at the Finish Line, and large-screen broadcast of the entire race live on WNBC. RSVP by October 19 to Amanda Landers at 212-423-2284 or amandal@nyrrc.org. Click here [www.nyrrc.org/nyrrc/mar01/info/flbanquet.html] for the Internet registration, download our printable form, or call 212-423-2284.

EXPO The New York City Marathon Expo is moving from its previously announced location at Pier 94 because the City of New York is using this space in connection with the World Trade Center disaster recovery effort. The new Expo location has yet to be determined. Please stay tuned to www.nycmarathon.org for an announcement of the new location.

PONTIAC COMEBACK RUNNER OF THE YEAR This year Pontiac and New York Road Runners present the Comeback Runner of the Year Award. This annual award honors two runners, one elite and one recreational, who have come back from adversity to compete in the 2001 New York City Marathon.

In addition to presenting the winner a beautiful trophy produced by Tiffany & Co., Pontiac will donate \$1,000 in the winners' names to the Twin Towers Fund.

Your entry should explain, in 100 words or less, the challenge you overcame. Please include your daytime phone number with your entry.

All entries must be received by October 9, 2001.

Entries can be submitted via the New York City Marathon web site at www.nycmarathon.org, or via mail to Comeback Runner of the Year, c/o NYRR - Michelle Doti, 9 East 89th Street, New York, NY 10128.

AND ONE FINAL MESSAGE As always, the safety of the participants, spectators, staff, and volunteers in the New York City Marathon is of paramount concern to both the City of New York and New York Road Runners. We cannot publicize the details of the security effort, which is provided by local, state, and federal agencies. In light of the recent terrorist attacks, it will be even more encompassing than usual.

If you would like to be removed from this mailing list, please reply to unsubscribe@nyrrc.org with the following subject line:

Don:

I looked into the EPCRA reporting requirements for Sulfuric acid and lead in batteries. This is a one time report to the State's emergency planning committee, the local emergency response department, and the local fire department declaring the presence of sulfuric acid and lead in quantities greater than 500 lb and 10,000 lb, respectively. These notifications are being mailed out today. I have not had a chance to do a detailed calculation of the amounts. I will do an analysis over the next few months to determine if we are required to also annually report by March 1st every year.

Dave will answer the first two issues below.

Thanks.

Gus

FW: Partial Fix to Inconsistency Between BME and SCD

Sender	willis.philip@enron.com
Recipients	['benjamin.rogers@enron.com']
File	rogers-b/trading_info/5.

-----Original Message-----

From: owner-nyiso_tech_exchange@lists.thebiz.net@ENRON
[mailto:IMCEANOTES-owner-nyiso+5Ftech+5Fexchange+40lists+2Ethebiz+2Enet+40ENRON@ENRON.com] On Behalf Of "Mark Younger" <mdy@slater-consulting.com> Sent: Saturday, August 25, 2001 8:02 AM To: Tech Team EMail List, Subject: Partial Fix to Inconsistency Between BME and SCD

"Mark Younger" <mdy@slater-consulting.com> writes to the NYISO_TECH_EXCHANGE Discussion List:

During discussions with the NYISO and other market participants in recent weeks it has become clear that one of the causes of the BME/SCD price differences is the way the two programs treat 30 minute reserves.

BME will only get 30 minute reserves (and 10 minute reserves) from market participants that have specifically bid to provide the reserves.

SCD does not specifically secure 30 minute reserves, it dispatches all on dispatch units to their economic loading point while assuring that the units that have bid 10 minute spinning reserve are held back from their economic operating point, if necessary, to assure the 10 minute spinning reserves. To track the 30 minute reserves the Operators use another program that identifies how much 30 minute reserves are available from all on dispatch units on the system plus the 30 minute GTs that provide 30 minute reserves. The result of the SCD non-treatment of 30 minute reserves and the treatment in the other program is that the NYISO real-time operation does not necessarily carry reserves on the units it purchased them from and instead may get the 30 minute reserves in real-time from units that did not offer them.

The different treatment of 30 minute reserves from spinning units by BME and SCD can become a problem and lead to divergence of BME/SCD prices when loads are relatively high. In those cases, if only a small amount of on dispatch units have offered 30 minute reserves, BME will take the reserves from those units and meet its energy requirements from more

expensive options. When it gets to the real-time operation, SCD will get the energy from the less expensive units that were tagged as 30 minute reserve providers and carry its reserves on more expensive units on dispatch. To make matters even worse, BME may have taken one or more marginal purchases in an effort to procure the 30 minute reserves rather than, erroneously, rely upon more expensive internal generation. This will further depress real time prices.

Fortunately, there is an easy fix for this problem that does not require anything other than a change in generator's bidder behavior. The problem stems from there being more on dispatch units considered for reserve by SCD than were considered for reserve by BME. This is easily solved if all operating on dispatch units offer 30 minute reserves into the BME. Offering 30 minute reserves is most important for on dispatch units with expensive incremental energy bid costs. This will enable BME to consider all the units as providers of reserves that SCD will ultimately consider as providers of reserves. This will let BME take its energy from the units with cheaper marginal energy costs and its reserves from the units with more expensive marginal energy costs just like SCD. This will also keep BME from making uneconomic external purchases because it thinks its only options are taking energy from expensive internal units (such as units running above their UOL levels) or purchasing a slightly less expensive import.

Reed

First of our stuff coming to you.

Following attachment is chilling calc for Ft Devens - which was the nearest site we thought might be representative of Lowell. I will confirm the 1% occurrence basis we used (80F DB, 63.5F WB and 40% RH). I calc 790 tons/unit hour, we used 812 tons/per in our performance run. Design basis of chilling plant in our conceptual EPC would be maybe 3600 total tons (at the 80F/40% point) so there would be some margin to meet 50F inlet air at slightly higher ambients.

Obviously if you have different design point due to your own plant data or your own criteria, we would be glad to rerun/size based on your suggestion. Balls in your court on this. Ft devens data coming to you by epressmail - we can also fax (fax number ???)- just 6 sheets - I need to find the procedure and/or worksheet on how we got the 1% point - I can't see it in this package.

Water data sheet is attached - obviously list is exhaustive but my water doctor asks if your team could fill out as much as possible so we can give you our best shot a suggesting a treatment system - might be helpful to have my water guy talk with your water guy so they conceptualize the new to fit well with the existing

I did get the voicemail, but managed to scribble unintelligibly (can't spell either) early this AM - I have Paul B.???? at 978-454-6166 (also hit the earse on my mail in my automatic mode this AM. Likely Ron Smith 713-345-5768 will call.

The following is the data we developed and provided to a possible Austin, Texas job. Obviously water is different so unit cost may change but probably will keep same pecking order.

Water options as follows

1) Rental mobile demineralizer \$10.57/1000 gal based on 1500 hrs/yr 2) Rental mobile demin with lease degasifier \$9.75/1000 gas for 5 yr then \$7.85 on 3) Rental mobile RO with exchange tank mixed beds \$7.22/1000 gal 4) Purchase RO with exchange tank mixed beds \$4.75/1000 gal 5) Purchase demineralizer \$5.77/1000 gal

Options 3, 4 and 5 require wastewater discharge. All systems assume on-site water storage. design is that system would run 22-24 hrs per day to make enough water for 10 hr daily run. Can run 24 hr+ with tank dropping. Generally these should

be considered as 1 X 100% unit (capable of supporting 10 hr day) - if run more, truck water from Decker, call for emergency trailer demin, can operate units on limited water but would see NOx increase

I need to run performance by our management and then get Tom's blessing before I send.

Best data I have on water consumption is that with 50F CTG inlet air at sealevel, nozzle water flow will be 22379 lb/hr and Sprint flow will be 2,206 lb/hr. Our S&S guarantee says +/- 20% on nozzle flow, no info on possible +/--% on Sprint - I will ask S&S for clarification ASAP. Cooling tower water consumption obviously follows chilling load and cycles of concentration/blowdown program - water dependent!! we are conceptually using about 60 gpm/unit for demin.

Bruce

Reed.Wills@UAECorp.COM (Reed Wills) on 02/29/2000 11:07:31 AM To: Bruce.Golden@enron.com cc: tswank@ect.enron.com, Tim.Fagan@UAECorp.COM (Tim Fagan), Kevin.Foley@UAECorp.COM (Kevin Foley)

Subject: LM6000 - Summary of 2/28/00 Discussion with Enron

Attached are our notes from the discussion we had yesterday on your LM6000 units:

COSTS Each unit contains the following cost breakdown (\$13.5m base unit, \$0.45m bank fee, \$0.31m carrying charge, \$0.45m Enhanced Sprint upgrade, and \$62,000 cooler)

Other Options that are not applicable to UAE: Dual Fuel \$280k ea., chiller system ~\$1.12M ea. @ 2200 tons with two cell tower

DELIVERABLES UAE needs to send water quality data to Enron.

Enron to provide heat balance and water balance information for the units. Information to include guaranteed performance values adjusted for site elevation and various ambient conditions, water consumption and discharge data, and cooling tower requirements. Water consumption to include water injection for NOx control, Sprint water requirements, and cooling tower makeup water.

ADDITIONAL POINTS

- **WATER QUALITY FOR INJECTION:** if operating greater than 1000 hrs., short payback on permanent RO/mixed bed system - **CHILLING:** with Enhanced Sprint, chilling reduced from ~2000 tons to ~800 tons - **WATER BALANCE:** water demand assumed to be 60 gallons/min per machine for E. Sprint and NOX control - **DESIGN:** UAE center line of 58' exceeds Enron minimum of 52'

Let us know if we overlooked something or if you have any changes

Hey friends:

As most of you already know, I had left Enron recently to embark on my MBA program this coming fall. Sorry I don't have the time to visit with all of you individually to bid farewell, and I would like to take this opportunity to thank each and everyone of you for all your help and support over the past 3 years I had been at Enron.

I am currently visiting my family and friends in Singapore, before heading back to Houston to drive up to Boston. You can reach me at this permanent email address, or alternatively, the following after 8/23/00:

636 HBS Student Mail Center Boston, MA 02163-7807 (617) 493-1816 klau@mba.hbs2002.edu

Hope everything is well with all of you. Please keep in touch and take great care of yourselves!

Best regards.

-Clement

p.s. Look for me if you are going to be in Boston area!

Ben, Are you looking more for focused refresher work? I can certainly try and get something set up. The main problem I may have is staffing. I will send out an email to my GMAT instructors and find out if my really good teachers have any time outside of their jobs and teaching. Evenings are best? How about your weekends? When are you planning on re-testing? I will return your call as soon as I can. We are a little short staffed so I am on the phone a bit more than normal. Thanks!
Amy

Save 20% on NYRR and NYC Marathon Merchandise

Sender	mailer@list.nyrrc.org
Recipients	['benjamin.rogers@enron.com']
File	rogers-b/deleted_items/137.

We want YOU to join New York Road Runners! And if you join or renew your membership this week, you'll receive 20% off all merchandise, double the usual 10% member discount! Remember, if you're a member for the full year (starting by January 31, 2002) and complete nine qualifying races, you'll be guaranteed entry to the 2003 New York City Marathon.

To join or renew your membership, please visit <http://www.nyrrc.org/membership>. Then, go to our online store (<http://www.nyrrc.org/merchandise>) and take advantage of a 20% discount off everything from technical gear to books and gifts to Official New York City Marathon merchandise. Enter code #386 under "special instructions" with your shipping info to receive the 20% discount.

(Since it will take us a few days to process your membership application, you might not yet have a membership number when you shop online. That's OK; simply enter code #386 under "special instructions" with your shipping info. We will then apply the 20% discount at fulfillment and deduct that amount from your final bill.)

This merchandise discount is also available for phone orders. Just be sure to mention code #386 to our phone operators at 800.405.2288 after you join or renew your membership at <http://www.nyrrc.org/membership>.

Offer valid only until January 31, 2002; no other discounts apply.

If you would like to be removed from this mailing list, please reply to unsubscribe@nyrrc.org with the following subject line:

We deliver! Here's your choices for the weekend.

This weeks training ride will leave from Royal Middle School at 8:30 on Saturday. We will try for about 30 - 35 miles. Thanks to Charla Reese for writing up the Feb. 19th ride summary. Kelly

OFFICIAL MS150 TRAINING RIDES: Look for the Official ISUZU MS 150 VehiCROSS at both training rides this weekend where you can find out more info about the ISUZU MS 150. You can't miss the vehicle so come by and say hello!

Saturday - February 26 - 8:00 AM - Katy Mills Mall - 30 & 50 miles Sponsored by Sun & Ski Sports - 281-644-6040

Sunday - February 27 - 8:00 am - Chappell Hill Ride - 25 & 44 miles Sponsored by Planetary Cycles 713-668-2300 and Shirar's Bicycles 713-659-3490

NORTHWEST CYCLERY The groups split by speed and distance. Many groups ride about 50 miles at average speeds of: 22+, 20-22, 18-20, 16-18. These groups number no more than 15 riders. There are also rides of 30 miles as well as the 15 miles at a slower pace for new riders. There are refreshments at the start/finish at Tulley (290 & Telge Rd.) More Information: 713-466-1240. Access to the parking lot is off Telge Rd., second school entrance after 290 service road. Be there by 7:45 for the 8:00 start. This start time drops to 7:00 when daylight savings time begins. WEST U. SCHWINN Jeff Nielsen and the gang invite you to train with them on Saturdays, departing West U. Schwinn at 2519 Rice Blvd. at 8:00 AM for a 25-mile tour of the city. 713-529-0140 Mountain Bikes: West U. Schwinn also has a Thursday evening ride that is for mountain bikes only, 20-25 miles, leaves from the store at 7:30 PM, and ends up at a great restaurant. Check out these

rides at 713-529-0140. HOUSTON BICYCLE CLUB Saturday - February 26 - 9:00 AM - New Ulm # 3 - 55 or 80 miles. Many of your favorite back roads of Austin, Fayette and Washington Counties. MEET: 75 miles NW on I-10, Sealy, N on TX36, Left on FM1094 to New Ulm. Turn left 1 block east of FM 109. DO NOT PARK AT THE TAVERN. Sunday - February 27 - 9:00 AM - Northwest Passage - mileages to be determined (easy ride) Explore the scenic areas just north of the Katy Freeway. Weave in and out of Timbergrove Manor, Sherwood Forest, and Brookhollow. River Oaks and Memorial for good measure. STARTER: Bob Howe 713-777-1194. MEET: Hermann Park Rose Garden parking lot. Park nearest Museum of Natural Science. Sunday - February 27 - 8:00 AM - 100 miles; 9:00 AM 41, 59 or 66 miles - Katy South Flatlands Route A revised rerun of the Katy Flatland Century. Some of our best West Oaks roads and some new ones. The maps are marked well. Go ahead and try a century. Maps will be in Tom's car for the 9:00 ride. STARTER: Tom Young MEET: Katy High School parking lot, 30 miles west on I-10 to Katy. North on FM-1463, 6/10 mile to Katy High School parking lot. Sunday - February 27 - 10:00 AM - Mountain Biking Cypress Creek Singletrack through pine & twisting hardwood forest near Cypress Creek. Sandy soil, some ditches & hills. Lots of twisting, curvy trails. About 5 miles of trails. Why? Bicycling fun in the dirt with hotdogs & cold drinks afterward. Hot chocolate if the weather warrants. MEET: 3500 Cypresswood (Key map page Kuyendahl and Steubner Airline) DON'T FORGET TO REGISTER FOR THE BLUEBONNET. IF YOU NEED ANY HELP, LET US KNOW. ALSO, REMEMBER THE DEADLINE FOR MS150 EARLY IS MAR 15 - AFTER THAT IT GOES TO \$35.

Re: Request for 7FA estimate

Sender	bruce.golden@enron.com
Recipients	['tracee.bersani@enron.com', 'Mike', 'Greg Blair/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT']
File	rogers-b/ctg_deals/179.

Tracee

Best data we have for a 7FA simple cycle is the East Coast Power Linden #7 that NEPCO did.

EPC cost for single unit was \$63,000,000 based on a \$34,000,000 7FA cost. Scope was for 7FA with CO catalyst and stack, generator breaker, main power transformer, 4160 V switchgear, 480 switchgear, small control room, light oil tank and pumps for backup fuel, natural gas heater.

Best data we have for 7FA combined cycle is Pittsburg.

Simple cycle matrix

unit config net capacity long term net heat rate long term estimated total project EPC cost kW Btu/kWhr HHV \$total (not including IDC, escalation, Owners costs, development costs) dry operation 1 GE 7FA 146118 11238 \$65,750,000

\$450/kWnet 2 GE 7FA 292235 11238 \$123,075,000 \$421/kWnet 3 GE 7FA 438353 11238 \$177,250,000 \$404/kWnet

water injection for summer power 1 GE 7FA 163792 11250 \$68,750,000 \$420/kWnet 2 GE 7FA 327585 11250

\$128,775,000 \$393/kWnet 3 GE 7FA 491377 11250 \$185,500,000 \$378/kWnet

Combined cycle matrix

dry operation 1 X 1 CCGT 221255 7417 \$140,280,000 \$634/kWnet 2 X 1 CCGT 448295 7321 \$255,220,000 \$569/kWnet
3 X 1 CCGT 676780 7274 \$369,040,000 \$545/kWnet

water injection for summer power 1 X 1 CCGT 244777 7523 \$143,640,000 \$587/kWnet 2 X 1 CCGT 496037 7424

\$258,580,000 \$521/kWnet 3 X 1 CCGT 748919 7376 \$372,400,000 \$497/kWnet

This is better data than what Ben Rogers got on Paducah. I was able to get a better CCTG model run so performance is better than my wild guess Monday. EPC cost is roughly same basis, did do some adds and subtracts based on your memo. May not have captured everything but should be in the ballpark. Numbers should be useful for conceptual screening proformas to see if we are in ballpark, we should do a tasking letter and a complete conceptual scope/performance/estimate if you need any numbers that we might base something we put on an offer table. Obviously not reviewed or approved by anybody.

Ben

I will rerun your data in same form for Paducah - should look better

Thanx Bruce

Tracee Bersani@ECT 02/08/2000 02:13 PM To: Bruce Golden/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT cc: Greg Blair/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT, Mike Coleman/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT

Subject: Request for 7FA estimate

Bruce,

Per my voicemail, I am requesting an estimate for 7FA capital costs and heat rate for a proposed expansion of an IPP acquisition. We will be putting together a model to come up with an all-in capital cost (\$/kw) for a single cycle, and possibly combined cycle facility with 1-3 7FAs and 0-1 steam turbines. The maximum MW of the site would be approximately 500 MW, so we would like to consider the following configurations:

1, 2, or 3 gas turbines single cycle, for a total of 170, 340, or 510 MW. 2 gas turbines plus one steam turbine in combined cycle, for a total of 510 MW.

Here are some specifics about the facility: located in Lakewood NJ (east PJM) primary fuel is natural gas, with a back up fuel of heavy fuel oil expansion on site of current 238 MW combined cycle facility (2 ABB GT 11N1, w/ ABB KT Steam turbine) for option 1: peaking facility, 25% dispatch for option 2: baseload facility, 90% dispatch total capacity of pipe is 150 MMcf, and current project uses only 30 MMcf (e.g. sufficient gas pipeline)

From my discussions with Ben Rogers, I understand that the numbers were approximately \$34-36 MM/turbine and installed capital cost was \$571/kwh for 27FAs in combined cycle, at a heat rate of 7300.

Please let me know if this information is enough to get an estimate of the turbine costs, heat rate, VO&M, start-up costs, and fuel requirements. Please give me a call when you get this so we can pick a time to discuss the project further.

Regards, Tracee

More Sector Thoughts After the WTC/Pentagon Disasters

* Defensive posture means stocks should outperform With European markets sinking and political talk turning towards a protracted military response we expect electric stocks in general to see sector inflows. * Precedence The sector has outperformed in the wake of other crises and industry wide fundamentals appear stable. * Large-cap integrateds may be the best place Regulated utilities more well known as a defensive sector while volatility benefits merchants - big integrateds with merchant exposure like DUK, AEP, and D offer both. * Direct impacts limited Little capital invested in a potentially volatile Middle East; industry is primarily domestic; lower NYC demand transitory and likely immaterial, in our view. - 111037.pdf - Courtney.Cleman.vcf

Confidentiality Agreement

Sender	kkennedy@cinergy.com
Recipients	['benjamin.rogers@enron.com']
File	rogers-b/all_documents/1270.

Ben, Attached is a revised Confidentiality Agreement which incorporates many of your suggested changes. Several additional changes are being made to address issues associated with the inadvertent erosion of key provisions benefiting both Enron and Cinergy that resulted from other changes in your latest drafts. I assure you that this document with your changes incorporated is less than what Cinergy has been willing to agree to in the past. I look forward to a favorable response so the pressing need for exchange of documents and further business discussions can proceed expeditiously.

Enron & FERC - Market Impact Overdone

* Enron credit position not a concern, in our view Other energy merchants have credit mitigation & master netting agreements. In any event, there is no evidence that ENE's credit position is in serious jeopardy. * Is Enron the market proxy? We don't think so. ENE uses exotic off-balance sheet financial engineering that we do not believe is prevalent in the group. * FERC kicks out Pacificorp contract - denying CPUC complaint for now We don't think this should have been at FERC to begin with. Any further review would come under CA refund proceedings. * Implicit conclusion is that FERC does not want to review bilateral deals FERC's long-running stance is that bilateral contracts are not up for review or refunds. Recent Pacific Northwest ALJ ruling supports view that bilateral deals are off-limits. - 115885.pdf - Courtney.Cleman.vcf

Recession Fear Shouldn't Hurt, But It Does

* Market orphans energy merchants in search for defensive profile Stocks are rolling over with the energy sector as investors see unregulated power as economically and/or cyclical like E&P and Oil Services * But unregulated power IS defensive End demand for power is stable, non-cyclical, and not subject to much consumer discretion. Unlike oil, market is regional with pricing unlikely to be affected by current events. * Big cap utilities outperforming - don't fight the tape Big, liquid names like DUK, D, AEP, SO and TXU are leading the way. Valuation differences between the likes of DUK and MIR or DYN are reaching unrealistic levels. * Other yield plays Smaller cap names that have participated and could further in a drive for yield - PGN, XEL, and PEG. - 111236.pdf - Courtney.Cleman.vcf

EPS Visibility Has Blurred, but Not Much has Changed

* 3 negative pre-announcements in 2 days blurs EPS visibility We are examining where the weakness has stemmed from - (1) smaller, regionally-focused businesses (EXC) and (2) aggressive power price forecasts (AES & RRI). * Some companies have reaffirmed '01 and even '02 EPS guidance DUK, ETR, ILA, MIR, NRG, PPL & SRE have reaffirmed 2001 EPS guidance. ETR and MIR have also reaffirmed 2002 EPS guidance. Informally reaffirmed - CPN, D, MIR, PEG & TXU. * Trading, CA generation and peaking plant income appear most volatile Inside we try to identify stocks with exposure to these businesses and quantify what percentage of our estimates they represent. * Believe EPS downside risk should be limited to 15% Both CEG and RRI missed estimates by roughly this amount. RRI also reduced its growth rate to 15% - we have always assumed long-term growth rates would come down to 15-20%. * Reduced EPS expectations are already priced into stocks Group multiple is roughly 9X, with some stocks at 7X P/E multiples - implying 0.4-0.6X PEG ratios. This valuation appears too heavily discounted for 15% EPS downside risk. - 112414.pdf - Courtney.Cleman.vcf

File	rogers-b/personal/173.

Ben,

DC is still treating me well. 10 years here and still going. My wife and I moved into our new home in June. So I've been getting settled in the new place all summer, real busy but it's been fun. Just had the 1 year anniversary, can't believe it's been that long. Flather Hall, Kitty's, and 'box' seem like yesterday...

Marlon's wedding sounds like fun, too bad it's Homecoming weekend. Would be nice to see everybody. We need to make some plans and all get together soon. The marathon sounds great, good luck, the only running I have time for these days is from Home Depot and back to the house. But I manage to go to the gym a few days a week to maintain my 250 lbs slim figure.

I still hang out with Penney and his new little girl, never thought he would be the first to have a baby. Saw Ken and Theo a few weeks ago in DC. Dolan and Sofie are now in San Fran and I talk to him from time to time.

Hard to make plans with a big bunch of people. Sometimes you just gotta make the plans with a few and throw it out there for the rest of the group. Let me know if you have any ideas or possible locations. Maybe just plan a weekend somewhere, DC or otherwise and try to get as many people together. Maybe a big party or something like that. We'll hire Vince O'Neill to organize it. An un-official homecoming party.

See ya

Luke: How are ya? How is the DC area these days? Houston is still fucking hot and Enron is still doing well and the price is still screaming so things are good. In response to your inquiry regarding Homecoming. Megan and I are actually, if you can believe it, going to Marlon and Marissa's wedding the first weekend in October in NJ. Also, OB, Chobu, Mike, Corpina and Danny, Patty D, Sammy, Amy, etc. are going as well - should be interesting. I haven't seen some of those people for quite awhile. I was trying to set something up, but that came up as well as I'm running in this year's NYC Marathon, which is the first Sunday in Novemebr, so trying to arrange something became even harder. I still want to get together with you guys, but trying to figure out when and where. Suggestions are welcomed. Hope all is going well and talk to you soon. Ben

Jack: I hope that you remember me. We played golf together at The Breakers course about three weeks ago. I am currently working in Enron's power trading group, but prior to this I was in Enron's corporate development group. I mentioned to you that my Dad is Jim Rogers, Chairman and CEO of Cinergy Corp., which is a mid size (\$5.4 Bil.) utility located in Cincinnati. He has been CEO of this company for over 13 years and is always looking for ways to grow his company through strategic acquisitions. In the past he has talked to some of your bankers, but I would like to try and get you two together, to see if there is something your companies can work on together. I really think the two of you could have a successful meeting. He is very forward thinking and is quite open to new ideas and creative structures. His contact information is listed below. I hope all is going well and again, it was a pleasure to have met you and play golf with you at your club. Please let me know if you need any additional information.

Regards,

Ben Rogers Enron Corp. (713) 853-7998

Subject: ISO NY Real time financial index

Leslie,

Please review the index language below that Ben Rogers would like to offer on EOL.

Thanks,

Chris 3-7533

ISO NY Z-A RT

The Floating Price during a Determination Period shall be the average of the real-time prices listed in the Index for electricity delivered during the applicable hours on each Delivery Day during the applicable Determination Period. The Floating Price for each Determination Period shall be calculated utilizing the hourly clearing prices published by the New York Independent System Operator on its official web site currently located at <http://www.nyiso.com/oasis/index.html>, or any successor thereto, under the headings "Real Time Market LBMP - Zonal; Zonal Prices; WEST (61752)" (the "Index").

ISO NY Z-G RT

The Floating Price during a Determination Period shall be the average of the real-time prices listed in the Index for electricity delivered during the applicable hours on each Delivery Day during the applicable Determination Period. The Floating Price for each Determination Period shall be calculated utilizing the hourly clearing prices published by the New York Independent System Operator on its official web site currently located at <http://www.nyiso.com/oasis/index.html>, or any successor thereto, under the headings "Real Time Market LBMP - Zonal; Zonal Prices; HUD VL (61758)" (the "Index").

The ENRON 400.... (Ride Start Instructions - Please Read)

Sender	amelia.alder@enron.com
Recipients	['amelia.alder@enron.com']
File	rogers-b/enron_bike_club/3.

We are now the "ENRON 400" and have been officially notified that we have earned first position in the Super Team Start. That means we are the very first out the gate again this year! AWESOME ! Thanks to all of you for your recruiting efforts.

We've gained 125 riders from last year. MEET YOUR TEAM IN THE NORTHWEST CORNER OF TULLY STADIUM.

To start this adventure, just show up with your bike and all your gear at Tully Stadium, I-10 & Dairy Ashford no later than 6:00 AM on Saturday, the 15th. The feeder road going east on I-10 from Dairy Ashford leads you to Tully Toad, dedicated as a one-way street that morning. Turn right onto Tully and enter Tully Stadium grounds in the first 3 gates. No vehicles of any kind will be allowed into the parking lot from Dairy Ashford, so save yourself some time and just follow the crowd in from the feeder road. Please park your vehicle and then go ask questions if needed so that you don't jam up the entrance. There are 3 drop-off points for your luggage. Each rider should have 2 luggage tags which are the same numbers as your helmet and bike numbers.

6:15 AM Team Picture (Southeast Corner of Parking Lot - in the Stadium) 6:30 AM Stage for Exit (Northwest Corner of Parking Lot) 7:00 AM The "Enron 400" out the gate!

(You have a Tully Stadium map in your rider manual)

The Top Team Start will be at 7:00 AM, staging at 6:30 AM, and it's very important to be there on time. If you're not in the staging area in time for our start, you'll be stuck back with the crowd and it could take you as long as two hours to get out the gate. Allow enough time to park, unload luggage, and get geared up, remembering that the freeway will be jammed up even that early. We want you there for the team picture, and we don't want to leave without you, so please be there plenty early (I recommend arriving at 5:30 AM). Please wear your Enron jersey the first day. This helps us to quickly identify who should be starting with us. I did consent to let five IZUZU riders start with us. Since they're sponsoring the whole event, I figured you guys wouldn't mind. So just be nice!

If you have any questions about any of this, please email me or call me at 713-646-6569. I'll be out of the office the rest of this week in attending a conference, but will be checking messages and email when possible. My home number is 713-977-1527 and cell phone is 713-503-6313. On Friday I'm picking up my kids who are flying in and getting their bikes ready, etc., but call if you need anything.

Training - March 25

Sender	amelia.alder@enron.com

File	rogers-b/discussion_threads/427.

We have 3 rides this weekend, all on Saturday - two of which you've already received, and one official MS150 training ride.

Saturday - March 25 (Ride Coordinator - Stephanie Strong - 713-853-1653)

Come one, come all to conquer the treacherous hills at Bastrop State Park on Saturday, March 25. Bastrop IS the toughest part of the MS150. We will be meeting at the large parking area which is located at the entrance of the park where you pay \$3 entry fee. Look for my green Toyota pickup truck with the camper top. Meeting time is 10:00 a.m. It takes approximately 2 1/2 hours to drive to Bastrop from Houston. I will bring water and gatorade. You're on your own for food. The route is about 12 miles through the park, but it's a very important 12 miles because the hills are such a challenge.

Please RSVP to me so I'll have enough water and gatorade for everyone.

Things to bring: Stuff to change a flat tire Water bottle (filled with your favorite beverage) Food (fruit, power bars, whatever else) Helmet Bike Yourself

Here's a map of the park. Let me know if you have any questions.

Directions: Take I-10 West to 71 West towards Lagrange/Austin Travel down 71W about 50 miles. Turn right onto Loop 150 Travel .7 miles Turn right onto TXP1 (Park Road 1A) You'll be at the entrance to the park.

Saturday - March 25

Dan Lyons' training ride series leading up to the MS150 continues this Saturday, March 25, as described below. The terrain will range from what Dan considers to be light hills, through moderately hilly to hilly, and the traffic on each ride will be light to moderate. The rides will not be sagged (although each of the rides will have stores at various distances) and riders should come prepared with water, food and the equipment necessary to repair flat tires. The goal will be to ride these rides at a pace between 14-16MPH and to get in a little hill work before the MS150. Although prior commitment is not a requirement, Dan would appreciate some kind of a head count, so if you plan on doing one or more of these rides, please email him at dan.lyons@enron.com or leave him a voice mail at (713) 853-1648. All rides will leave promptly at 8:00 a.m. so be sure to arrive in time to be ready for a wheels up departure at 8:00 a.m.. Look for Dan in his electric blue Explorer of ancient vintage.

This ride will start from Royal Jr. High School in Pattison about three miles north of Brookshire off of either FM 359 or FM 362. This is a moderately hilly ride that goes up through Burleigh and Racoon Bend to Belville and back by way of FM 529 and FM 359. Mileage; low 60's.

Saturday- March 25 MS150 Official Training Ride sponsored by Bay Area Schwinn Clear Lake - 50 miles Call 281-332-6433 for information.
