BPA Confirmations

Sender	kimberly.indelicato@enron.com
Recipients	['holli.krebs@enron.com', 'diana.scholtes@enron.com']
File	scholtes-d/credit/15.

Holli & Diana,

BPA is including Excess Federal Power and or Surplus Firm Power on their confirmations when BPA sells, however BPA is not including the special language that was faxed to us by Holli. Here are the following deal numbers:

EPMI BPA Excess Federal Power/Surplus Firm Power 648603 24291 Excess Federal 648423 24297 Excess Federal 654209 24302 Excess Federal 646739 31402 Surplus Firm Power 631718 24247 Excess Federal 644252 24266 Surplus Firm Power 637686 24258 Excess Federal

I have not sent these confirms signed back to BPA yet. Are these confirms o.k. for signature without the language, or do you want me to hold off until the issue is worked out with BPA?

Regards,

Kimberly 713-853-3031

File	scholtes-d/stf/current_issues/11.

Mirant would like to see PPT as the permanent scheduling time for the same reasons stated by WMIC. The two hours a year impacted by the time change are more than outweighed by the other 8,758 hours in the year.

ISAS Meeting Agenda 2/14&15/2002

Sender	sccobb@srpnet.com
Recipients	[isas@wscc.com]
File	scholtes-d/inbox/13.

ISAS Members and Guests,

Attached is the agenda package for the February meeting. The hotel has extended the room availability through 2/1/02.

Thanks.

<<WSCC Meeting 2-14-02.pdf>> <<ISAS February 2002 Meeting >>

----- Inline attachment follows -----

From: SCCOBB@srpexc00.srp.gov To: ISASCOR@wscc.com Date: Tuesday, January 8, 2002 12:22:05 AM Subject: ISAS February 2002 Meeting

ISAS Members,

Here are the details for the next ISAS meeting:

February 14th 0800-1700 February 15th 0800-1200

Old Towne Hotel 7353 E Indian School Rd Scottsdale, AZ 85251-3942 Phone: (480) 994-9203

The hotel does not have a shuttle. It's located approximately 8 miles from Sky Harbor Airport.

Rooms are \$109 per night. (Please mention SRP when making reservations to receive this rate) Continental Breakfasts on the mornings of the 14th and 15th are complimentary. The breakfast is available from 0600-0800 in the hotel restaurant. Lunch and an afternoon snack on the 14th will be provided by SRP at the hotel. Restaurants and shopping are within walking distance of the hotel. There is a complimentary trolley that will take guests to Fashion Square Mall which is only a mile away.

If you have any problems making your reservations, please contact Karin Masengarb at 602-236-0920.

We're still interested in any agenda items that you'd like to provide. My contact information is:

E-mail: sccobb@SRPnet.com Phone: 602-236-3965 Fax: 602-236-3808

Thanks.

Pacific NW Lawmakers Gear Up To Oppose FERC RTO Mandate

Just in case you didn't see this, Pacific NW Lawmakers Gear Up To Oppose FERC RTO Mandate By Bryan Lee

10/04/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

OF DOW JONES NEWSWIRES

WASHINGTON -(Dow Jones)- Members of the Pacific Northwest congressional delegation are gearing up in opposition to the U.S. Federal Energy Regulatory Commission's mandate for consolidation of power-grid assets in the region. The House Northwest Energy Caucus held an informal hearing late Wednesday to air concerns of utilities and industrial consumers in the region about FERC's effort to establish a regional transmission organization, or RTO. The lawmakers plan to follow up the hearing with a letter to FERC voicing the concerns, which largely revolve around skepticism that the RTO will result in cost savings for the region's consumers. FERC shouldn't force an RTO on the region without first conducting a cost-benefit analysis, said Rep. Peter DeFazio, D-Ore., who is spearheading the effort. Speaking with reporters prior to Wednesday's hearing, DeFazio complained that "a bunch of bureaucrats" at FERC are embracing the national power-grid agenda of Enron Corp. (ENE) without assessing the costs and regardless of "what it does for local reliability." DeFazio's complaints were echoed in the testimony presented at Wednesday's hearing. The region already enjoys an open and competitive transmission network, thanks to the federally owned Bonneville Power Administration, according to hearing testimony expressing concern that RTO West, as the RTO proposed for the region is called, will cost more to implement than it will provide in benefits. "We are troubled that RTO West will not achieve any net benefit for end-use consumers in the Northwest," the Public Power Council testified. "Although work is beginning on a cost-benefit study, we are troubled that a transmission system that has served us all well for so long will be disassembled because FERC has announced that RTOs, by definition, are good." "Regional transmission organizations may be necessary to remedy the transmission ills in other regions of the country, but not in the Northwest," declared a group of transmission-dependent utilities. "The 'balkanization' and isolation of transmission systems that characterize most other regions is simply not present in the Northwest. For this reason, the economic power-side benefits of an RTO will be relatively small," said a group of aluminum producers. Similar cost-benefit concerns have been voiced by state utility regulators in the Eastern U.S. who oppose FERC's effort to consolidate grid assets under large RTOs in the Southeast and Northeast. 'RTO Week'

FERC Chairman Pat Wood III acknowledged the complaints Thursday, adding that he expected to address the concerns of regulators and industry during "RTO Week" Oct. 15, when the commission will hold five days of hearings on the commission's RTO mandate. "I think I need the decisionmakers at the table. We've had the lawyers in the suits arguing about it for eight years now," Wood said at an "energy community" forum sponsored by Enron in Arlington, Va. Wood told Dow Jones Newswires following his remarks at the Enron forum that FERC answered the complaints about the lack of a cost-benefit analysis at its Sept. 26 meeting. The commission agreed to undertake a comprehensive analysis in support of its claim that RTOs will bring about operational efficiencies that will translate into consumer savings. Wood also noted a

study by Mirant Corp. (MIR), which concluded that combining the three independent system operators in the Northeast into a single RTO would produce \$440 million in annual consumer benefits. During the Enron forum, Edward Meyers, a regulator with the District of Columbia Public Service Commission, urged Wood to seek out the input of affected state regulators. Meyers noted that he is in the minority among regulators in the region in supporting the Northeast RTO grid-consolidation, while most others oppose the effort as "economically dangerous." Arnetta McRae, chairman of the Delaware Public Service Commission, told Wood that her fellow state regulators aren't so much opposed to grid regionalization but the lack of consultation by FERC. The state regulators want "an opportunity to be at the table," McRae said. If such a process were offered, there would be a lot less opposition, she predicted. FERC is reaching out to address the concerns of state regulators, Wood said, adding that he was "blindsided" by the opposition among state regulators to FERC's grid-consolidation mandate. Later in the day, Wood told reporters that "RTO Week" will feature an entire hearing devoted to the concerns of state regulators. At the Enron forum, Wood defended the commission's RTO policy, which calls for carving up the nation's interconnected electricity system under the control of four or five large RTOs, as necessary to jump-start the overly long transition from regulation to competition. "This process needs to be goosed," said Wood, calling FERC's RTO orders "an external catalyst" to get the process moving. "If I'm wrong, I'd love to find a better way around that," he said. -By Bryan Lee, Dow Jones Newswires; 202-862-6647; Bryan.Lee@dowjones.com

Hi Guys,

Before it all goes in the tubes and people start to bail, I wanted to get your addresses, if you don't mind to send you the wedding invites. I can just pass on the info as well, just let me know.

Thanks Tons! Diane

Opportunities at Duke LSC

Sender	alan.comnes@enron.com
Recipients	['e-mail <.kit@enron.com>', 'sean.crandall@enron.com', 'diana.scholtes@enron.com']
File	scholtes-d/outbox/personal/12.

From a friend of a friend of a friend ... Please forward as appropriate.

DETM is on the hunt to add more staff here in SLC! If you know of any good Enron talent, who would be willing to relocate here, please pass along my name to them. We are looking for (1) senior-level traders (physical, forward financial and options), with 3-7 years of experience, and (2) middle office risk management talent (modeling, forecasting, hedging, portfolio analysis). I may also have a few upper level positions to be posted in the next few months, as well. Bottom line is, we are looking to grow our business in the West and I'd love to network for some talent! Folks can contact me by:

Email: cmatsumori@duke-energy.com

Fax: 801-531-5139

Phone: 801-531-4402

Address: Duke Energy Trading and Marketing, LLC 4 Triad Center, Tenth Floor SLC, UT 84180

Stacking Tags issue

Sender	stacy.runswick@enron.com
Recipients	['diana.scholtes@enron.com', 'cara.semperger@enron.com']
File	scholtes-d/stf/current_issues/36.

Please refer to EPMI tag # 27722. On this tag I stacked transmission with different transmission providers. The tag was implemented by each (CA) and (TP). I received a call from PNM's marketing group requesting that I cancel this implemented tag and re-submit it as 2 tags. 1 for each (TP). It was actually PNM's CA area and Trani group that had a problem with the tag. PNM the marketer agreed that it would be o.k. to leave the tag since it had already been implemented and they would look into the issue further. After speaking with Don Lacen who I believe represents PNM on the ISAS committee I was told that stacking tags with different trani providers was not industry standard and that they would prefer that I tag them separately in the future. Until, an agreement is reached on this tagging process I agreed to tag separately for each TP. Please let me know if you know otherwise.

Thanks, Stacy Runswick Enron North America (877) 464-7779 ph (503) 464-3740 fx stacy.runswick@enron.com

Recipients	[chris.mumm@enron.com]
File	scholtes-d/diana_scholtes/saved_sent/68.

Sorry for such a delay in my response. I've been out of the office on a customer tour. The wheeling rate I'm quoting is under BPA new 2002 Tariff beginning in October 2001. The wheel would get you from the Mid-Columbia to Garrison, which is BPA's integration with MPC System = 1.013 \$/kW-mo plus 1.9 % losses. Losses are real and need to be returned 168 hours there after. Hope this helps! I'm not sure how Mike S. has set the basis of Mid-C to MPC in the curves, but I assume you have access to those anyway!

Diana Scholtes

-----Original Message-----

From: Mumm, Chris Sent: Wednesday, September 05, 2001 12:29 PM To: Scholtes, Diana Subject: Mid C to Montana

Hi Diana, I was hoping that you had some information regarding the Mid-C to Montana basis, as well as the wheeling cost associated w/ Mid-C to Montana (Jeffrey Oh told me you'd be the person to go to). I need these numbers thru 2024 (I understand the back years will be an estimate). I'd be greatly appreciative if you could give me these numbers. Thanks so much,

Chris Mumm

Western Systems Power Pool Spring 2002 Operating Committee

Sender	janet.rollins@xemkt.com
Recipients	[angelina.chong@enron.com]
File	scholtes-d/outbox/personal/19.

Re-sending this message due to several communication failures of first two sends. My apology for the redundancy if you have previously received the following.

Xcel Energy is proud to host the WSPP Spring 2002 Conference. We would like to take this opportunity to thank the Calpine Corporation, and especially Jodi Lietz, for hosting the WSPP 2001 Fall Conference at Coeur d'Alene, Idaho. The conference was well attended, well managed, the events were fun, and the setting was beautiful. Good work Calpine! Please mark your calendars now for the WSPP Spring 2002 Operating Committee Conference at fabulous Vail, Colorado. Preliminary details and registration are in the attachment. Please note that the Spring Conference has a different date format than in the past. The Reception will be held on Monday, April 1, 2002. A variety of events are planned on Tuesday, April 2, 2002, including skiing and snowmobiling. The meeting will be on Wednesday, April 3, 2002. If your company is interested in sponsoring one of the events during the conference, there are still some sponsorship opportunities available. <<Web Site Announcement.doc>>

Dear Portland Friends,

I am sorry I did not have to opportunity to say good-bye in person, so I am sending this message instead. I am hoping that this message reaches all of you.

It has been my privilege to have been able to work with and represent you in the various western region forums that were of interest to Enron. I want to wish all of you the best for the future and if any group of individuals can make a new Enron work again it would be you. I have learned a lot in my brief tenure at Enron and it has been especially satisfying working with professionals like each of you. Hopefully sometime in the future our paths will cross again.

Happy Holidays to you and your families. Also, if someone could also pass along this message to Cara S. in scheduling it would be much appreciated. (I cannot remember how to spell her last name...sorry Cara!)

Kindest Regards,

Dave

NERC IS 08/22/01-08/24/01 Meeting Report

Sender	dlacen@pnm.com
Recipients	['isas@wscc.com']
File	scholtes-d/stf/5.

Here is my NERC IS 08/22/01-08/24/01 Meeting Report. <<NERC IS 08-01 meeting report-LACEN.doc>>

Major Highlights: NERC IS voted against the WSCC's tagging changes to Version 5 of Policy 3:

? Add the following to third bullet under Section A2.1 - (Deference to the WSCC where Dynamic Interchange Schedules are of known amounts by the sending and receiving control areas, have existing transmission, and the TP's are aware of the amounts are exempt from being tagged.)

? Add the following to the fourth bullet under Section A2.1 - (Deference to the WSCC where existing procedure require notification of bilateral payback to be made via the WSCC Messaging network, amounts are limited to 25 megawatts per hour unless all parties are notified are exempt from being tagged. Amount in excess of 25 megawatts per hour will be tagged.) The NERC IS's general consensus is that all schedules should be tagged.

NERC IS accepted the WSCC's Timetable to be included in V5 of policy 3 for 1.7 E-tagging with the TISWG/OSC changes.

E-Tag Implementation delay to November 13, 2001:

The primary reason for delaying the implementation of E-Tag 1.7 is the lack of a complete Registry. This issue has now been raised to the most significant item that must be addressed for the NEW - November 13, 2001 implementation date.

If you have any questions please contact me. Thanks Don Lacen Public Service Company of New Mexico Transmission Services Coordinator Alvarado Square, MS EP11 Albuquerque, NM, 87158 505-241-2032 dlacen@pnm.com

Alan,

The forwarded message below contains an issue cited by Dick Ingersoll back in June of 1997 in which Control Areas were changing the properties of our submitted schedules/transactions (tags?) and not informing us. In a subsequent letter in September 2000 Dick had noted an improvement but with Enron still experiencing some minor problems.

My question(s) to you and the traders/schedulers are, are the problems noted above still occurring, is this still causing us problems and if so are there specific incidents that you can provide to me so I can pass them on to the WSCC?

Please accpet my wishes for a Happy Thanksgiving!

Kind Regards,

Dave

FW: Western Wholesale Power Trades Fri Above FERC Price Limit

Sender	alan.comnes@enron.com
Recipients	['robert.badeer@enron.com', 'ray.alvarez@enron.com', 'tom.alonso@enron.com']
File	scholtes-d/ferc/26.

FYI,

My understanding is we adjusted our prices down to the cap today in an abundance of caution.

FYI

Western Wholesale Power Trades Fri Above FERC Price Limit Updated: Friday, June 29, 2001 05:42 PM ET

NEW YORK (Dow Jones)--The price of power in the western wholesale market on Friday topped the limits set by federally ordered price controls, traders said.

Bulk electricity trades as high as \$107 a megawatt-hour in the western spot market were confirmed by one of the buyers. Also, Enron Corp.'s (ENE, news, msgs) Internet-based trading system publicly offered to sell power in Nevada at \$105/MWh.

Stock Insight

Symbol Last Change

Dow Jones 10502.40 -63.81

NASDAQ 2159.34 +33.88

More Analysis * See Analyst Ratings * Compare Growth Trends * Get One-Click Scorecard

The maximum price allowed under a formula set June 18 by the Federal Energy Regulatory Commission is \$91.87/MWh.

Asked about the overshoot, FERC said sellers would have to justify prices above the benchmark.

"We constantly monitor the markets out there," a FERC spokeswoman said. "If there is anything above the proxy price, they would have to come in and justify it."

Enron spokeswoman Karen Denne said the company posted the \$105/MWh offer on its EnronOnline system, but didn't sell any power above the FERC limit.

FERC's complicated price limits for the West set a maximum price based on the operating cost of the most expensive generator used to meet demand for electricity during power alerts in California.

Suppliers who claim prices above the limits must explain why to FERC, which can order refunds if it isn't convinced.

Some market participants point to a loophole. The FERC order only applies to "spot" market transactions, which the commission defines as deals done within 24 hours of the commencement of deliveries. But power traded Friday is for delivery Monday, so some market participants have said that the controls don't apply to Friday deals.

"It does appear to be a loophole," Denne said.

Gary Ackerman, executive director of the Western Power Trading Forum, an industry association, said that traders could start doing more transactions two days in advance to circumvent the FERC rules if market prices rise above the cap, which can change based on prices for natural gas. Or deals could be done at the cap with the seller adding non-monetary payments such as natural gas or free electricity delivered later in the year.

Other market participants said they simply will buy needed power supplies at the market price, regardless of the FERC rules.

On June 19, the first day the new rules took effect, hour-ahead deals were done at \$300/MWh. So long as two companies agree to a price and the buyer doesn't later complain to the FERC, it seems that FERC would be hard-pressed to enforce its rules.

If a buyer were to file a complaint after such a deal, it would quickly find itself locked out of the market when supplies become tight, traders said.

The FERC spokeswoman said the above-limit prices would have to be justified even without a complaint.

The price cap will be recalculated whenever the California Independent System Operator enters its next Stage 1 supply emergency. At that time the cap will likely be much lower, because gas prices have fallen significantly since the current cap was set.

Hi Marilyn -

Thanks for the Vancouver notes. Regarding the item on POR/PODs - since the meeting, Mark sent out the Clarification letter of September 24 (attached) stating we use the WSCC POR/POD acronyms until 1.7 hits the streets. E-Tag 1.7 will use the POR/PODs that TPs have attempted to register <http://reg.tsin.com/> . Although not part of the actual meeting, it might be good to add a reference to the clarification letter so readers can get the latest and greatest direction concerning POR/PODs usage.

Jamie; I wanted to exchange crucial phone numbers and contacts with you. If you'll reciprocate with key contacts for Express Pipeline I would appreciate it.

If for some reason I am unavailable and you wish to either purchase or sell MW volumes, please feel free to contact Diana Scholtes on (503) 464-3807.

Our Pre-Schedule (one day or longer scheduling requirements) phone number is 1-877-464-7779. The two ladies most involved with scheduling loads in the Montana region are Stacy Runswick (503) 464-3747 and Cara Semperger (503) 464-3814.

Our 24-Hour Real-Time (less than one day up to the next hour) phone number is 1-800-684-1336

You have my office phone number (503) 464-2270 and my cellular phone number is (503) 701-0295.

I do not anticipate you needing anyone's number but my own, nor do I anticipate having to contact anyone but you, but I did want to exchange this information just in case.

Once again we appreciate the opportunity to serve your Montana loads, and look forward to working together in the future.

John

Folks,

Although standard scheduling in Mountain Prevailing Time makes the most sense for Montana Power Company, majority will prevail. Therefore, since MPC has the ability to convert our schedules to alternate time zones for check out (pre schedule and real time), we will attempt to accommodate the will of the masses. I guess I'm not real clear on the desired result here. If we are only talking about the need to check day ahead and hour ahead schedules with adjacent CA's in a time zone other than Mountain, we do that already. If I'm missing the bigger picture, what's new.

Rich Brugger MPC

Christian and team-

Debbie Hart of Morgan Stanley left a message regarding the recent new CAISO addition we are placing on our confirmations. Morgan's traders are in disagreement and they would like to talk our Enron Traders to clarify the reason behind this. Debbie has been in the process reviewing language with her traders, but has had no response thus far. In the meantime, Morgan is not returning/executing our CAISO confirmation letters. Debbie encourages our traders to speak with Morgans' traders to expedite the process. If you have any questions, please call.

Diana/Cara,

Attached is a letter from Mark Hackey, which I assume you have already read. Do you have any issues related to this document that I need to address with anyone on the WSCC OC or WMIC?

Generally the letter seems pretty straight forward, it seems too bad that they hedge, even the Dec 11 implementation date. Please let me know if there is anything we need to address in this letter,

Thanks,

Dave

Well- Lisa and I finally finish the incorporation of the comments into the BP document. That document is the entitled "Majority Accepted BP for WSCC_with_Comments.doc". The document with no comments but the comments incorporated is entitled "Majority Accepted BP for WSCC_Final.doc" and will be the one submitted for the 30 day posting prior to my request for an OC vote. The last document is the "Final" one with the BP # 10 change, and is to be submitted for 60 day due process. That will be posted if OC approves the "Final" documents.

With this all in mind, I am requesting by this email that the voting member (and that who this email is going to) approve all three document for disposition as I've described above. The deadline for vote return will be by opening of business on July 16, so that I may have a count to report at the 17th meeting and to get closure.

Thanks in advance for you patience and help in getting this completed.

Todd,

Thank you for your e-mail. I would be interested in speaking to you regarding your opportunities. To give you a little bit of my background, I have been in the energy business since 1991. My current position with Enron consists of Management of and Trading in the short term markets, specializing specifically in the Northwest market. My prior experience includes Trading the short term markets for Portland General and NW Operation/Reliability functions within BPA. You may reach me by either e-mail or my cell phone (503) 701-5759.

Sincerely,

Diana Scholtes Director Enron American- West Trading (503) 464-3807

Subject: Energy Opportunities

Diana,

I represent a firm which has specialized in energy and power market placement for over ten years. I'm currently working with several organizations across the country looking for energy traders, coordinators, analysts and schedulers. These are great opportunities to change location or better ones position quickly. I'd like to schedule a ten minute telephone conversation to discuss these positions and determine whether or not you may have interest or may be able to assist with these openings.

Please reply or call me at 630-990-7510 at your earliest convenience. I look forward to speaking with you soon.

Best Regards, Todd Kubicki Kappa Search, Inc. tkubicki@kappasearch.com

Here is some information: One of the spreadsheets below has a list of counterparties that have not terminated their contracts with us.

-----Original Message-----

From: Calger, Christopher F. Sent: Monday, December 10, 2001 10:43 AM To: Yoder, Christian; Hall, Steve C. (Legal)
Subject: FW: Non-terminated Power Transactions

Guys,

Thinking of preserving value for the estate, I believe we need to focus on any in-the-money positions that have not been terminated. Specifically, do any of them have collection risk due to contractual issues (one way termination upon bankruptcy or delivery default). I am aware of the WAPA deal - are there others that should be a priority?

Chris

RE: Scheduling Time constant

Sender	paul.rice@pacificorp.com
Recipients	['isas@wscc.com']
File	scholtes-d/stf/2.

Sorry for the late response, I just got it today. PacifiCorp would be in favor of any move that lessened the amount of time changes that occur each year whether that be to PST or PPT. The preferential order would be PST for no changes, PPT for one change each year and then dropping it altogether as the last alternative.

-----Original Message-----

From: Hackney, Mark W(Z39911) [<mailto:Mark.Hackney@aps.com>] Sent: Wednesday, October 10, 2001 11:01 AM To: Interchange Scheduling & Accounting Subcommittee (ISAS) Subject: Scheduling Time constant

It's been brought to my attention that we never resolved the issue of the common scheduling time (no Freudian slip on the acronym). The group agreed to a PST value in July, but we wanted to survey the OC and WMIC first before going further. That was to be one of our topic in Vancouver. Well....

So, I'd like to get a feel from the group: the survey leaned toward Pacific Prevailing Time as that match up with energy products, so.. continue to go forward with PST as in July, modify our suggestion to PPT or drop all together and wait to see if NERC is going to come up with something. If we decide to go with either PST or PPT, I will get the OC Steering to help with clarification on this as a due process item or an item that can be brought to the OC for vote in 2002. In addition, I would think that most would agree that implementation if it takes affect would be favorable at the April 2002 time change, so that is my suggestion that we use, if ISAS goes forward with the request to the OC.

Please get back with your thought by next Wednesday so I can put together something for the upcoming OC meetings.

Your last paragraph is right on man. It just the commie business practice that bites.

Again, my view of the world is that the transmission should be associated with the sink control area - they are the one who takes it home. The source control area shouldn't have the fake transmission.

Guess part of the problem is due to CAs not registering as TPs which would make things much more consistent.

PSEI will take NOR, SINGLEBUS, GF (if we're not looking), MIDC-MIDC, and other creative entries for the OASIS number for MIDC-MIDC transactions.

Bob

----- From: Hackney, Mark W(Z39911)[SMTP:Mark.Hackney@aps.com] Sent: Wednesday, October 03, 2001 3:04 PM To: Interchange Scheduling & Accounting Subcommittee (ISAS) Subject: Business Practice #11 "For transactions that occur at only one bus (i.e. no OASIS/GF transmission involved) use a willing TP on the second line with the same PSE as on the first line and the words "Single Bus" in the OASIS reservation field and "7-F" as the Product." Is this practice not being practiced? I've seen/heard that at the MID Columbia folks selling energy to those who have take away rights at MID C are have their tags denied because the tag creators are not using a "TP specific transmission path or designation". It was agreed to use "Single Bus" in these situations to avoid the implications of transmission service where no transmission service was necessary from the MID C. If the sink control area is bringing the energy back to their system at that point then the sink should have it indicated that it's not a single bus for their transmission portion, but may be "GF" or "No reservation required" from the bus to the system. But in this circumstance then the path is not MIDC-MIDC but MIDC-SYS. That's my take. Others wish to pipe in? Mark W. FYI..... -----Original Message----- From: Frazier, Doug [mailto:Douglas@chelanpud.org] Sent: Thursday, October 04, 2001 12:54 PM To: Interchange Scheduling & Accounting Subcommittee (ISAS) Subject: RE: Business Practice #11

I have to tell you more than you want to know to preface this response. There are 5 hydro projects in the Mid-Columbia region. These 5 projects are owned and controlled by 3 control areas - Douglas County PUD, Chelan County PUD and Grant County PUD. Some of the generation from these 5 projects has been sold on a long-term basis to several participants. I'm not familiar with the term "take away rights", but every mwh generated at these 5 projects is either used for load in the 3 control areas or it is moved away to participant's control areas. The fact that some want to represent their share of generation as being part of a "single bus" and claiming it can be moved away without naming a transmission provider does not accurately represent the transfer of energy from one control area to another. Douglas, Chelan and Grant are the only control areas at the Mid-Columbia with other adjacent control areas.

Each participant has transmission capability (either their own or purchased) to transfer their share of generation from one of our control areas to their own. These transmission paths serve one of two purposes. 1) dynamic schedules or fixed schedules to serve load or 2) transfers for sale or resale.

The "single bus" idea at the Mid-C will soon be correctly represented for 4 of the 5 projects. Chelan and Grant plan to combine their control area boundaries (for scheduling and tagging purposes only) and call it the Mid-C HUB. This HUB is registered as a TP with NERC as MHUB and will accomodate transfers of energy BETWEEN participants. All other transactions will require other transmission to move energy OUT OF the Mid-C HUB. Douglas County PUD is not part of the Mid-C HUB or MHUB.

FERC Orders Westwide price controls -- first news out

Sender	susan.mara@enron.com
Recipients	['neil.bresnan@enron.com', 'dennis.benevides@enron.com', 'alan.comnes@enron.com']
File	scholtes-d/ferc/37.

URGENT

WASHINGTON (AP) Federal regulators voted Monday to order price restraints on electricity sales across the West but not the stringent cost-based controls sought by California. The 5-0 vote by the Federal Energy Regulatory Commission followed intense pressure not only from California Gov. Gray Davis and Democrats newly in charge of the Senate but also from House Republicans worried that spiraling power prices in the West could affect the 2002 election. FERC Chairman Curtis Hebert said the order, effective through September 2002, will benefit consumers but also will "provide every incentive for suppliers to reduce costs." The order expands price restrictions the agency imposed in April on wholesale electricity sales in California during peak demand periods when blackouts were threatened.

CA RTO News --Prediction--CA ISO will file and meet the FERC test

Sender	susan.mara@enron.com
Recipients	['neil.bresnan@enron.com', 'dennis.benevides@enron.com', 'alan.comnes@enron.com']
File	scholtes-d/ferc/52.

From my sources:

CA ISO is filing jointly with SCE and SDG&E. The comments begin with a tirade that FERC has no right to condition price caps on joining an RTO. Apparently, they weakly support regional organizations and note agreement to work with the other RTOs that are now forming.

PG&E is filing separate comments "because of its bankruptcy." PG&E will note concern about the CA ISO "independence" and talks about other RTOs as potentially good options.

The CPUC ordered and berated PG&E to file its comments with the CPUC BEFORE submitting them to FERC. PG&E initially protested, but was threatened with fines. It finally filed yesterday under seal.

Bottomline:

I believe that the joint ISO/IOU filing is structured to provide the minimal needed to meet the FERC test. Therefore, FERC's price caps will remain in effect.

What does NERC Policy Say?

Sender	bharsh@puget.com
Recipients	[isas@wscc.com]
File	scholtes-d/to_do/4.

Looking at Policy 3, version 5, draft 1, it reads:

1.2. Tagging. The PURCHASING-SELLING ENTITY serving the load shall be responsible for providing the INTERCHANGE TRANSACTION tag. (NOTE): 1) Any PSE may provide the tag; however, the load-serving PSE is responsible for ensuring that a single tag is provided. 2) If a PSE is not involved in the TRANSACTION, such as delivery from a jointly owned generator, then the SINK CONTROL AREA is responsible for providing the tag. PSEs must provide tags for all Interchange Transactions in accordance with Requirement 2.

NOTE 1) is the basis for the proposed change in WSCC Business Practice #10.

To the point, I seem to have missed past discussions regarding NOTE 2). Please could someone provide some background on NOTE 2? When does it apply - under what scenarios, etc.?
