From: Security Console, Sent: Thursday, June 14, 2001 4:36 PM To: Hill, Jo Ann Subject: RE: Termination of Access

Sorry, I did not find one in the system by SS# either.

Thank you, Rebecca Wackenhut Security -- Enron ph#: 713-853-5361 or 713-853-5360 fax#: 713-646-2407

Jo Ann Hill/ENRON@enronXgate 06/14/2001 04:31 PM To: Security Console/EPSC/HOU/ECT@ECT cc: Subject: RE: Termination of Access

Her SS# is 390-42-0019. She works in the San Francisco office, but I believe she has an Enron badge for access to the Enron Buildings while in Houston. Thanks. Jo Ann

Dear Friends:

Friday was my last official day at Wyatt, Tarrant & Combs. You will find my new temporary contact information at the conclusion of this e-mail. I look forward to hearing from you.

While no longer at Wyatt, I will be working closely with the Wyatt lawyers on client matters while I consider several options which are available to me as I plan for the future. I look forward to an exciting 2002. Please note that Vicki Scruggs continues at Wyatt. You will also note that we are all here in the same building and working to make this transition as efficient as possible. Most importantly, we are committed to the seamless delivery of legal services to our wonderful clients and we appreciate their patience during the transition.

Best wishes for a great Thanksgiving.

THAILAND COMMITTEE MEETING TO PLAN FOR PM THAKSIN NOV. 30 VISIT:

Sender	fzwenig@usasean.org
Recipients	[undisclosed-recipients@enron.com]
File	shapiro-r/deleted_items/317.

TO: MEMBERS, US-ASEAN BUSINESS COUNCIL FROM: FRANCES A. ZWENIG, SENIOR COUNTRY DIRECTOR US-ASEAN BUSINESS COUNCIL, 1101 17TH ST, NW, SUITE 411 WASHINGTON, DC 20007 (202) 416-6721 (DIRECT); (202) 289-0519 (FAX); fzwenig@usasean.org (e-mail) DATE: 19 OCTOBER 2001 SUBJECT: THAILAND COMMITTEE TO MEET ON THURSDAY, OCTOBER 25 AT 3:00 pm TO DISCUSS THE UPCOMING NOV. 30 TRIP TO WASHINGTON, DC BY THAI PRIME MINISTER THAKSIN AND THE OPPORTUNITIES FOR COUNCIL MEMBERS' INVOLVEMENT -- NOV. 30 COUNCIL DINNER AND US-THAILAND ECONOMIC FRAMEWORK AGREEMENT TO BE SIGNED PLEASE RSVP YOUR ATTENDANCE ON FORM BELOW.

SUMMARY. Thailand Committee will meet at 3:00 p.m. on Thursday, October 25, in the Council's Conference Room, 1101 17th St., NW, Suite 411, Washington, DC to begin the planning for the November 30 visit of Prime Minister Thaksin Shinawatra to Washington. PM Thaksin will be in Washington for official visits, including one with President Bush, on November 30, and Washington will be his only US stop.

The Council will be the lead on hosting the dinner for the Prime Minister the evening of November 30 and we will submit suggestions for the private sector section of the US Thailand Economic Framework which should be signed during the visit.

I. Agenda for Thursday, October 25 meeting at 3:00 PM in Council's Washington conference room

A. Bill Ichord and Ernie Bower debrief on their Friday, October 19 meeting with Thai Foreign Minister Surakiart in Shanghai during which they discussed the PM's trip at length B. Discussion of PM Thaksin schedule in Washington on Nov. 30 and the US and Thai objectives for the visit C. Discussion of the Council dinner and opportunities for interaction with the Thai delegation and sponsorship (see #2 below) D. Development of Private Sector input for the US Thailand Economic Framework which should be signed as part of the visit (see # 3 below)

2. We are planning a major dinner for PM Thaksin and his delegation to be proceeded by a pre-dinner CEO meeting on Friday evening, November 30, 2001. Please let me know if you are interested in a host sponsorship for the dinner at \$10,000.

3. We will be asked to develop the Private Sector element of the US Thailand Economic Framework which will definitely follow the lines of much of what we pursued during our just-completed Mission to Thailand, October 9-10. In addition, we will be gathering information on any deals and/or training/community support programs that could be signed or announced during the visit. We hope to develop a better snapshot of current US investment in Thailand, investment \$'s, number of employees, education/training/human resource development, etc. We found during our recent visit that no one, the US Embassy, AmCham, seems to have this information. Thoughts about how best to do this will be appreciated.

Please let me know if you have any questions and please respond on the form below if you would like to attend the 10/25 meeting. Thank you.

____ YES, I WILL ATTEND THE 10/25 MEETING AT THE COUNCIL AT 3:00 PM. (1101 17TH ST., NW, SUITE 411, DC).

Capacity Auction Agreement Working Group for ERCOT (CAAWG - ERCOT)

Sender	thane.twiggs@enron.com
Recipients	['bruce.sukaly@enron.com', 'jducote@enron.com', 'mike.curry@enron.com', 'richard.shapiro@enron.com', 'james.st...]
File	shapiro-r/discussion_threads/262.

The Capacity Auction Agreement Working Group for ERCOT (CAAWG - ERCOT) will be the forum to work on the implementation of the standard form agreement and resolution of issues related to using capacity auction products in the ancillary services markets of ERCOT. The CAAWG - ERCOT will hold its meetings at the Commission where a member of the Commission's Market Oversight Division will be present. This group will be filing its final work product in Central Records at 3 pm on Friday, May 4, 2001, for public comment prior to consideration at the Commission's June 14, 2001 Open Meeting.

The SPP Stakeholders will be filing a standard form agreement and resolution of issues related to the use of capacity auction products in the SPP ancillary services markets at the Commission at 3 pm on Friday, May 4, 2001 for public comment prior to consideration at the Commission's June 14, 2001 Open Meeting. Because the structure of the SPP ancillary services market is still under development, the focus will be on ERCOT and input and assistance from SPP staff will be sought in the coming weeks.

The Working Groups are a direct result of the PUCT Capacity Auction Order. The current time line proposes meeting weekly as Stakeholders to work to resolve the issues, schedules and final products to be included in the auction this fall. Under the current proposal the Capacity Auction Product will be Baseline, Gas Intermediate, Gas Cyclic and Gas Peaking. Each of the PGCs must auction 15% of the Texas Jurisdictional Installed Generation Capacity. The capacity will be sold as a "slice of the system" of each of the divesting PGCs and will not be for any specific unit. During the month of March, April May, October, and November of each year the available entitlements may be reduced proportionately to the average planned plant outage. With respect to the firmness of the products, the PUCT found that the products should be 100% financially firm to provide potential buyers of the entitlements certainty in the products that they are buying. Forced outages are limited to 2.0% of the hours of the entitlement.

The Power Generation Companies (PGCs) have recommended using the EEI Master Power Purchase and Sale Agreement and Schedule CA will describe the product available for auction. A copy of Schedule CA will be attached below for your review and comment. Please note that the Schedule CA is not a final document and is an initial proposal from the PGCs. Your review and comments will be essential. Also, if you have any questions or comments as to the process of the CAAWG or the auction process in general please feel free to call me. The working group will meet each Wednesday for the balance of April after which the working group will meet May 1st and May 2nd in anticipation of the proposed May 4th filing date. After the filing, Enron will have the opportunity to file written comments with the PUCT. The Auction process under the rule must be completed prior to September 1, 2001 for the initial auction period.

The following is an initial list of issues.

1. What is the timing of schedules for each of the products from the buyer of the entitlement to the seller of the entitlement.
2. Are ancillary services available from the Baseload product? TXU has stated that they cannot provide A/S from their Baseload units. As such, should A/S be removed from all Baseload product offerings from all PGCs so that there is a standard product or should the Baseload offerings include ancillary services when and where available. The argument distills to if the entitlement is more valuable in the market as a standardized product or a differentiated product that may or may not include A/S.
3. What is the delivery point for the entitlement and other operational issues? Should it be a single bus, multiple busses or congestion zones. Congestion zones may change each year, under the current auction schedule, you would bid for the product before you know the final congestion zone.
4. How (or if possible) can responsibility transfers be used for balancing energy?
5. Who will receive OOM payments?
6. What about compensation for other A/S payments?
7. Does released capacity exist, should it exist at all? If so, what happens when the capacity is released. The PGC would like the offering to look like a call option. If the option is not exercised by scheduling, then the capacity is deemed released. This is the interpretation of the PGC, and not necessarily that of the PUCT or other Stakeholders.
8. How much of a product or entitlement is available in A/S?

The order adopting the final rule can be found at <http://www.puc.state.tx.us/rules/rulemake/21405/121900adt.pdf> the actual rule starts at page 41 of 65.

Please review and comment.

Gas in Cal

Sender	sabine.schnittger@frontier-economics.com
Recipients	['richard.shapiro@enron.com']
File	shapiro-r/all_documents/452.

You were quite right on the topic of gas prices in California. I looked through some articles I have been collecting that make reference to an investigation by the FERC into alleged market manipulation by El Paso Corp in the context of the price basis between San Juan and Topock. You probably know all this already, but I attach an article that was in the FT yesterday.

Sabine.

Please find attached the Letter to the Commission and assorted documents regarding the capacity auction implementation for ERCOT. The PUCT approved this as a docketed case and as such we will need to file a Motion to intervene on or before May 21, 2001. I am preparing to file the motion on behalf of EPMI. There will be a pre-hearing conference on May 22, 2001 that will set the testimony and hearing schedule. The auction must be completed by September 1, 2001.

This will be the last opportunity to comment before the PUCT prior to the first capacity auction. As you review Schedule CA, please be aware that some of the provisions have two different proposals. We may provide comments on the merits of one alternative or another or provide an alternative position that may not be included in the document. The capacity auction rule itself will not be subject to comments at this time. I will prepare an issues list and circulate it after the Pre-hearing conference (May 23, 2001).

After the first auction (September 1, 2001), staff will propose changes to the Capacity Auction Rule and/or the Capacity Auction process as needed.

Subject: Talking Points to Chairman Pat Wood

Please find attached talking points to PUCT Chairman Pat Wood regarding the starting date of the Texas Choice Pilot Program and the implementation of the ERCOT ISO Protocols. We have been advised that the talking points would not violate an existing ex parte prohibition. As you may know there was a motion for reconsideration on the Docket to approve the Protocols by the PUCT. The talking points do not discuss the protocols or their merits, but only deal with the systems to implement the protocols and the Texas Choice Pilot Program. Marianne Carroll will convert the talking points to Carroll and Gross letterhead and have them delivered to Chairman Wood tomorrow in Washington D.C.

I will be traveling to Austin tomorrow in the a.m. for the ERCOT Board Meeting, however, please free to contact me if you have any questions or concerns.

From: Steve Currall <scc@rice.edu>@ENRON Sent: Thursday, December 20, 2001 2:01 PM To: Lay, Kenneth Subject: Rice University - Markets in Transition Symposium: January 10, 2002

Dear Dr. Lay,

We are looking forward to your participation at the upcoming "Markets in Transition" symposium at Rice University on January 10, 2002.

Invitations to the event were sent approximately two weeks ago. The invitations listed the agenda and speakers. We have completed incorporating the biography and photograph that you provided into the program brochure.

During the event, we have allocated 20 minutes, beginning at 1:40PM, for your remarks on Markets in Transition. We expect your remarks to be broad in scope and to provide your views on how the economic and market factors of recession, technology evolution, and heightened security are impacting the business landscape. Our hope is that your remarks will be generic in nature -- Markets in Transition is a concept that applies to virtually all industries.

We understand that you will make no reference to Enron. Furthermore, there will be no question and answer session after your presentation. We will take measures to ensure that the press has no access to you before or after your remarks.

Please return the speaker logistics form (requested separately) at your earliest convenience.

We look forward to your participation. Please contact me or Brad Burke, Associate Director of the Rice Alliance (713-348-6136), if you wish additional information. Thank you.

Sincerely,

Steve Currall

Hello Everyone:

Next week is around the corner and I want to inform each of you of some details.

Location: Omni Interlocken 500 Interlocken Boulevard Broomfield, CO 80021 Phone#:303-438-6600 Fax#:303-438-7224
Check-in time 3:00 p.m. Check-out time 12:00 p.m. (Noon)

Shuttle Service & Driving Directions: Each person is responsible for their own transportation to/from the airport. Please see the attached airport shuttle schedule.

- SuperShuttle.doc - Directions from DIA with map.doc

Meeting Place on morning of June 14: The meeting will take place in "Interlocken A" conference room. The meeting will begin @ 8:15 AM and will conclude by 11:30 am. A continental breakfast will be served beginning at 7:00 am.

Agenda:

Lunch: I have made arrangements for Box Lunches to be available for everyone directly after the meeting. They will be served outside of the meeting room at 11:30 AM.

Attire: I'm all for CASUAL

Golf: Tee times are set as follows: 12:39, 12:48, 12:57, 1:06, 1:15, & 1:24pm. The Eldorado is the course you will be playing on. A shuttle has been scheduled to pick up everyone beginning at 11:45 am. All golfers are to check in at the golf shop; from there your clubs and carts will be assigned. I will e:mail the teams list next week, along with your tee time. Golf attire: Proper golf attire includes golf slacks, golf shorts, and spikeless golf shoes. Men must wear collared shirts, and women must wear "golf appropriate" shirts. Player's not conforming to this policy will not be given access to the golf course.

Whitewater Rafting: A deluxe motorcoach is scheduled to pick-up the rafters at 12:30 pm at the East Entrance/Garden level of the resort. Folks, the water will be cold; it might be a good idea to take a towel or jacket for the ride back to the resort. Also, rivershoes are recommended for this activity, as well as, sunscreen and hats. No cotton or flip-flop sandals. Have Fun!!!!

Hiking: A deluxe motorcoach is scheduled to pick-up the hikers at 12:30 pm at the East Entrance/Garden Level of the resort. Please check the attached link for a weather update below. Recommended attire: Shorts or hiking attire, appropriate footwear, sunglasses, sunscreen and hats.

Spa Services: If you have not made your spa arrangements, please do so soon. The number to call for spa services is 303-438-6600

Dinner: A buffet dinner will be served at the fairways tent (at the golf course). You can't miss it!!!! Your choice of transportation to the golf course is up to you. You can either walk (about 1 mile on sidewalk) or take the shuttle. It is best to request the service 15-20 minutes prior to dinner time or drinks time. Dinner will begin at 7:00pm and wine & beer will be served 30 minutes prior.

Weather: Please click on the attached link for a Colorado weather update.

<http://www.weather.com/weather/local/USCO0105>

Final Reservation/Activity List: Attached is the final list of arrivals/departures, as well as, activities everyone is participating in.

Thanks and please don't hesitate to call if you have any questions.

We have never met, but I currently head up Government Affairs on a global basis for Enron, whose news I'm sure each of you have heard about in recent days. Naturally, I am reassessing the future and believe my deep understanding of the energy industry and the governmental/regulatory landscape that surrounds that industry could be quite helpful to UBS Warburg in being better able to serve your clients by better understanding the energy equities. I know this is a stretch, but talk to me, meet me...I know I can convince you of my value. I can be reached at 713-853-3407 in addition to e-mail. Thanks for your time and consideration.

ERCOT Board Meeting

Sender	thane.twiggs@enron.com
Recipients	['ron.mcnamara@enron.com', 'stacey.bolton@enron.com', 'leslie.lawner@enron.com', 'dietrich.janet@enron.com', '...]
File	shapiro-r/all_documents/613.

The ERCOT Board met yesterday in Austin to discuss among other things the implementation of the Texas Choice Pilot and the single control area under the control of the ERCOT ISO. Below are the primary items of interest.

1. ERCOT proposed the following plan to implement the Pilot program and the wholesale:

May 25, 2001

ERCOT begins to transfer security analysis to the ESCA system Participants able to start viewing network conditions, preliminary load forecasts, preliminary A/S market requirement analysis, and retail load profiles ERCOT begins to manage and publish participant information and process customer service requests

June 1, 2001

ERCOT initiates switch processing from competitive retailers starting with small volumes and to be completed by July 1, 2001 (this is only the switch request, power does not "flow" from the REP until the billing cycle after July 6, 2001). ERCOT

begins to process retail meter read information. Participants begin to enter outages in ERCOT systems (this will be parallel to current outage system entry). ERCOT will begin to publish distribution and transmission loss factors to the market.

June 8, 2001

ERCOT Begins to complete data aggregation functions and initiates UFE calculations/analysis. ERCOT's A/S market requirements and QSE obligation Calculations are ready for sing control area operations ERCOT begins to execute the production settlement algorithms. The settlement results are not binding. ERCOT begins to transfer grid security decisions to the new systems Data aggregation allows initial calculations of UFE to be made visible to the market providing energy accounting information

July 6, 2001

Frequency Control. ERCOT begins single control area operation and controlling frequency. The existing control area replaced with the single control area run by ERCOT. Wholesale Markets. ERCOT administers the regulation, balancing energy, and reserve markets. ERCOT starts clearing prices as part of single control area operations. The wholesale competitive market, as defined by the protocols is initiated with ERCOT settling A/S markets centrally. ERCOT begins to execute financial transfer processes as a result of binding settlement with participants QSEs must have completed qualification activities

While the proposal satisfies many of the competing concerns of the Stakeholders and the PUCT, there are a few outstanding issues that remain.

ERCOT will begin switching load transfer requests on June 1 2001, but actual settlement and energy flow will not occur until after the wholesale market opens on July 6, 2001. Enron has submitted a proposal that would allow the retail market to decouple from the wholesale market which would allow the wholesale market time to remedy the system limitations and the retail market could begin June 1, 2001. Under the ERCOT timeline if the wholesale market is not ready by July 6, 2001 and the switch requests have already begun, then there is no method to serve a customer full requirements without the ability of the REP to purchase balancing energy and other A/S other than purchasing under current tariff. I can provide a copy of the Enron proposal to those who are interested.

Another concern is for reliability of the system. Some parties question the wisdom of opening the wholesale market in the middle of the summer peak, rather than waiting until the summer peak has passed.

2. Credit Standards. The Board also voted on language for the surety bonds. There has been a debate as to whether ERCOT should allow security bonds in light of what has happened in California and the surety bond that was underwritten by AIG. At this point, the PUCT order requires ERCOT to accept a surety bond, however, ERCOT is trying to tighten the payment language. The language that the board approved will be forwarded when I get the correct language. The board approved the addition of BBB- credit to the credit limit matrix.

3. New Power Company made an unsuccessful appeal for corporate membership. New Power argued that they were technically not an affiliate of EPMI who holds the Corporate Membership. EES for example has associate member status. It was pointed out by ERCOT that EPMI listed New Power as a corporate affiliate on their application for corporate membership. Marianne Carroll, represented New Power in the appeal, and stated that EPMI did not ask her advice prior to listing New Power as affiliate. An additional rationale cited by New Power was that in the future Reliant Energy wants to "spin off" their generation company and that when they do, they should be allowed a Corporate membership as well. I am concerned about the appearance of the appeal by New Power, it looked like an attempt by Enron to sway the process in "their" favor by getting additional votes on ERCOT issues.

Jim, Rick and Steve:

This is for tomorrow morning's meeting. To give us a focus for the discussions I thought it would be best if we went through this fairly quickly (maybe 45-50 minutes) as a presentation first.

Given the complexity of a full market design, this is obviously only an overview. But our first priority is to present the ideas and develop the logic behind the proposals.

See you tomorrow.

July 12th Orders at FERC

Sender	seabron.adamson@frontiereconomics.com
Recipients	['richard.shapiro@enron.com']
File	shapiro-r/all_documents/1827.

Rick:

I guess you will have been reasonably pleased with the Commissions July 12th Orders on the RTOs. It seems to be going down the same basic road we have been discussing.

I guess there will now be a relatively short process to outline each of the proposed mega-RTOs. While the Northeast RTO is most pinned down, the others seem well up in the air. The Southeast RTO in particular seems to be flailing a bit.

If you or any of your folks were keen I am very interested in the SE RTO and Western RTO in particular. As they move beyond the usual groups of utility guys sitting around a table it might be a good time to throw some economic reality into the picture. Could be method for presenting some of the thinking of the policy paper to the world?

Hope you had a good trip to London. Heard it has been very warm over there (although not of course by Houston standards...)

Jim, I spoke with Seab briefly on the current budget. As you are aware, the initial budget scope for the CA proceeding was rather limited, and a significant portion of that budget was a "catch all"- actually relating to the PAC NW proceeding and various trips to Houston and DC. Watkiss sees a more expanded role developing for Seab in the CA proceeding, given the issues and options that are arising. I have asked Seab to give us a breakdown of where we are right now on the current

budget. I plan to meet with Seab and Watkiss next Wednesday to discuss scope of services further, and will get back to you. Ray

FW: Hearing Materials

Sender	john.shelk@enron.com
Recipients	['linda.robertson@enron.com', 'd..steffes@enron.com', 'richard.shapiro@enron.com', 'sarah.novosel@enron.com']
File	shapiro-r/federal_legis_/62.

Below are copies of the prepared statements of commissioners Wood, Massey and Breathitt for this afternoon's House hearing on electricity issues. The witnesses are the four FERC commissioners on one panel and the Deputy Sec. of Energy on a second panel. Chairman Wood's statement is very strong on RTOs and why a few, larger ones are needed for economic and security reasons. The only troublesome note is he describes the recent mediation proceedings as "encouraging." However, elsewhere he refers to voluntary RTO formation in the past tense, saying "the Commission can go further and require them" (although he raises the likelihood of litigation unless Congress clarifies the Commission's authority in this area. I will provide a more detailed report after the hearing.

P.S. Since the commissioner's statements are in word perfect, you will need the right computer software or know how to reformat them. If you have any trouble, please advise. This is the format in which we received them. Thanks.

John

Jim/Rick:

We have revised the draft paper on market objectives and attributes in response to Jim's comments. This is attached. Much of the material is the same but there were a few key items that needed clearing up.

The question of how short-term balancing and spot markets should be organized is so critical (and potentially requiring a significant policy shift) that we are writing a (much shorter) separate piece on this subject. Should be ready late this afternoon for discussion on tomorrow's call.

RE: NERC question

Sender	charles.yeung@enron.com
Recipients	['dave.perrino@enron.com', 'l.'nicolay@enron.com', 'richard.shapiro@enron.com', 'james.steffes@enron.com']
File	shapiro-r/nerc/23.

This may be what we need to push the industry over the edge to EISB. NERC is basically going into a "ignore the market mode" leveraging the threat issue to its fullest. The fact is, NERC's ability to impact the infrastructure protection is relatively minor. They mostly deal with communications and data sharing. The real protection to threats lies in physical security. We must make clear to the policymakers that NERC and RTOs have little rules and capability to govern physical protection of assets. These are left in individual asset owners' authority. Although there is data that can be used negatively, using this data to systematically bring down the grid is not a big bag for the buck that policymakers are concerned about. Policymakers must not lose perspective that NERC does NOT operate the grid nor is in a position to

impose requirements that can protect the infrastructure from physical attack. (impose a standard to post armed guards at substations?)

-----Original Message-----

From: Nicolay, Christi L. Sent: Wednesday, September 26, 2001 11:57 AM To: Yeung, Charles Cc: Perrino, Dave Subject: FW: NERC question

I agree Dave. Charles, ideas?

-----Original Message-----

From: Perrino, Dave Sent: Wednesday, September 26, 2001 1:51 PM To: Nicolay, Christi L. Subject: NERC question
Christi,

Is it too obvious that I have little use for NERC?

NERC's most recent statements really get me upset, if we don't directly confront them about this, should we work through EPSA? NERC's position is counter to everything we have been working so hard to move forward...CA and the rest of the western PTOs are bad enough slowing down development efforts without groups like NERC pontificating publically that FERC should slow things down....

Dave

File	shapiro-r/discussion_threads/763.

I have been called by Simon Rosenberg at the NDN. He said that things are deteriorating for many of his members who want to take a balanced approach on the crisis. He said their internal polling have energy issues and their impact on the environment on the top of the priority list in the New Dem districts. Simon reported the surge in interest in energy is shocking. He said Lieberman may have come out early in support of price caps and investigations...but others may follow.

Chuck Alston with the DLC called the same day to tell me that they are hearing similar concerns from several New Democrats and Chuck said they may be pushed into supporting cost-of-service-based rate making. He and Will Marshall REALLY do not want to do this. I told him that we would oppose this and that we wanted to work with them to find other solutions.

Note that the NDN is hosting an energy event in late June where we will be listed as co-host as an executive committee member. I told Megan that making it a fundraiser was not a good idea, instead make it a membership recruitment event.

Megan Hess <mhess@newdem.org> 06/01/2001 09:23 AM

To: cc: Subject: NDN Energy industry event

NDN is planning an energy industry breakfast for June 21st at the AGA. We have several Members of Congress on board and are pushing to get at least one Senator. There has been some debate on how to do this event. We're wavering between couching it as a NDN members only event (hence making it a fundraiser) or we can open it to all energy companies (hence making it a prospecting event.) I thought I would run this by you and get your thoughts on it. Any feedback you can give would be greatly appreciated. Thanks!

File	shapiro-r/discussion_threads/579.

Steve and Rick - In response to your question regarding the European allocation, here are responses on the Keeler and Worthen allocations. These were the only two that Europe had required backup on when receiving the allocation. Mike - By copy of this note, can you provide backup on the Europe allocation for your cost center, Henry's, and Marc's? Thanks!

Susan Worthen@ENRON_DEVELOPMENT 10/27/2000 10:11 AM

To: Elizabeth Linnell/NA/Enron@Enron cc: Michael Terraso@ENRON Subject: Re: Allocations to Enron Europe

Elizabeth, My group's support services are more global in nature, rather than providing services to any one unit. Services include the administration of the corporate EHS web site and regulatory subscriptions, risk assessment of acquisitions, divestitures & major capital projects, corporate responsibility initiatives, & performance reporting. I divided the business unit allocations based on 2001 business growth, maturity of their EHS management systems, and historical use.

Please let me know if any additional questions arise.

Thanks, SW Elizabeth Linnell/NA/Enron wrote on 10/20/00 8:43 am:

Enron Europe is asking for backup for their allocations from your cost center. Can you send me a brief description of the anticipated support for that business unit for 2001?

Thanks! ----- Forwarded by Elizabeth Linnell/NA/Enron on 10/30/2000 05:50 PM -----

Jeffrey Keeler 10/30/2000 04:38 PM

To: Elizabeth Linnell/NA/Enron@Enron cc: Michael Terraso/OTS/Enron@ENRON Subject: Re: Allocations to Enron Europe

Allocation to Enron Europe reflects an estimated 7.5% use of our group's time for FY2001 (revised dollar amount of \$75,965). As directed by Mike Terraso and Steve Kean, we expect to increase our commercial support focus in 2001 towards European and other international wholesale and retail markets, and will be hiring additional staff to focus in this area. We expect our current North American activities to expand to Europe and other global markets, including:

Providing competitive intelligence (timely information and analysis) to commercial units based on environmental policy/regulation in Europe and worldwide. Assist commercial groups with analysis of impacts on business and identify business opportunities related to environmental policies. Subjects include: Global Climate Change -- carbon dioxide/greenhouse gas emission regulation Air quality regulation -- SO₂/Acid Rain, NO_x, mercury, particulate matter Renewable Energy & Energy Efficiency - renewable mandates, credit/offset trading, environmental disclosure/labeling Industrial/Global Markets - environmental issues facing new Enron markets, i.e. pulp & paper, steel, or existing markets, i.e. emissions, coal, weather.

Coordinate advocacy on environmental policy issues worldwide, working closely with government affairs & public affairs units. Maintain ongoing relationships with key environmental policy makers and build effective coalitions with industry organizations, NGOs, and other stakeholders on behalf of Enron businesses.

If you have any questions or require additional information, please let me know.

FW: New E-Tag Feature: Potential Adjust List

Sender	andy.rodriquez@enron.com
Recipients	['don.baughman@enron.com', 'juan.padron@enron.com', 'richard.shapiro@enron.com', 'john.kinser@enron.com', 'sus...']
File	shapiro-r/all_documents/851.

I am pleased to announce that a new feature is being added to the E-Tag system: the Potential Adjust List (PAL).

As you may or may not know, there is currently an "Adjust List" that is issued when TLRs are called. An "Adjust List" is a recommendation from the IDC that describes what transactions should be cut and by how much to achieve needed relief to eliminate a constraint. This Adjust List sent out to Generation and Load Control Areas and Tag Authors for all transactions that are being recommended for curtailment. It is intended to aid in coordination Control Area schedules during curtailment, as well as alert the marketplace of recommendations for their transactions to be curtailed. Under the current process, the Adjust List notice is sent out when the initiating Security Coordinator and all impacted Security Coordinators have agreed to recommend specific curtailments. As such, this recommendation can occur very late, leaving very little time for the market to react (i.e., resource and/or resink their power).

The Potential Adjust List feature adds a second, earlier Adjust List that is sent out when the initiating SC requests relief, but prior to the confirmation of all the impacting SCs. This should allow this recommendation to be delivered several minutes sooner than it is today, giving more time for the market to begin searching for alternate economic sources and sinks. When all impacted SCs confirm, the standard Adjust List recommendation is sent out as it is today.

It should be recognized that both the Potential Adjust List and the standard Adjust List do not represent actual curtailments - in both cases, they are only recommendations for curtailment. Control Areas may elect to curtail different transactions or amounts than reflected in either Adjust List due to local relief procedures or other business practices. However, both lists should aid in mitigating risk associated with physical transactions and curtailments. Further, empirical evidence seems to indicate that in the majority of cases, the Potential Adjust List, standard Adjust List, and final curtailments will be very close.

This change is based a proposal I wrote with the help and support of Jim Eckelkamp (Carolina Power and Light), Mark Scheel (Dynegy), and Patt Terris (Exelon Power Team). If you talk to any of them during the course of daily business, please thank them for their support of this effort. With their assistance in developing the concept, ironing out the technical details, and cultivating NERC support in the various forums, we were able to implement this change very quickly.

I expect this change to take place sometime between June 15 and June 28. Attached, please find a message from NERC that describes the feature and how it works. If you would like more detail, please let me know. I currently Chair the group that is responsible for improving E-Tag, and as such, am intimately familiar with tagging and its functions.

In the next few weeks, I will be working with Don Baughman and Juan Hernandez to ensure we utilize this feature (and others) to maximize the value of our E-Tagging tools. As indicated above, please feel free to contact me with any questions.

Recipients	['steve.montovano@enron.com', 'richard.shapiro@enron.com']
File	shapiro-r/florida/5.

Enron gets a win in Florida. Let me know if you want a copy of the revised opinion.

Marchris

----- Forwarded by Marchris Robinson/NA/Enron on 09/29/2000 02:53 PM -----

"Bill L. Bryant" <bill@katzlaw.com> 09/29/2000 09:51 AM

To: <mrobinso@enron.com> cc: <Barton.Clark@enron.com> Subject: Duke Decision

MR,

Yesterday, the Florida Supreme Court granted our Motion for Leave to Appear as Amicus Curiae on Rehearing that we
filed on Enron's behalf in the Tampa Electric Co. v. Garcia case. It also granted the relief we requested in that Motion. The
Court granted this relief despite the vehement protests by Florida Power and Light and Florida Power Corporation that (1)
Enron had no standing or right to appear as an amicus curiae and (2) that the relief we requested was unwarranted.

Technically, the Court characterized its order granting relief to Enron as "granting the Motion for Leave to Appear as
Amicus Curiae on Rehearing, and denying the Incorporated Motion for Rehearing in light of the revised opinion.." In short,
there was no need to grant rehearing because, in its revised opinion, the Court granted our relief. This was exactly what
Katherine Giddings (one of our appellate experts and co-counsel for Enron in this matter) had predicted the Court would
do if it granted our requested relief.

A comparison of our requested language and the language included by the Court in its opinion are identical. In its previous
opinion, the Court made the following statement: "The construction of any new electrical power generating plant with a
capacity greater than seventy-five megawatts is required to be certified in accord with the various requirements of the
Siting Act in chapter 403, Florida Statutes." The Court's definition appeared to broaden the class of electrical power
generating facilities that must be certified under the Siting Act because it failed to recognize statutorily exempt utilities, i.e.,
under the statutes, only certain steam and solar electrical generating facilities are subject to the Act - but the Court's
definition included "any" electrical power generating facility.

In our motion, we pointed out the Court's error and asked the Court to clarify its definition by changing its statement to read: "The construction of any new electrical power generating plant as defined by Section 403.503(12) that is not otherwise exempted by Florida law is required to be certified in accord with the various requirements of the Siting Act in chapter 403, Florida Statutes." The Court adopted this language verbatim, adding only the words "Florida Statutes" after the reference to Section 403.503(12). In doing so, the Court recognized the merit of our argument. In summary, the Court granted all relief we requested on Enron's behalf. The relief requested by other parties in all other motions for rehearing, including the PSC's, was denied in total.

Bill

Laitner.Skip@epamail.epa.gov on 05/15/2001 10:45:15 AM To: Laitner.Skip@epamail.epa.gov cc:

Subject: FACT SHEET: 21ST CENTURY CONSERVATION

21st Century Energy Conservation: "Pushing conservation forward will require investment in new energy technology. And that will be a part of my Administration's energy plan." President George W. Bush, May 12, 2001

Next week the National Energy Policy Development Group (NEPD), chaired by Vice-President Cheney, will make its policy recommendations to the President. Provided below are a few of the NEPD's recommendations to promote 21st Century energy conservation.

Expand Combined Heat and Power Projects: Because of their large needs for both heat and electricity, businesses find Combined Heat and Power (CHP) systems particularly attractive. However, replacing old, inefficient boilers with highly efficient CHP systems can add a number of new regulatory requirements (such as air permits), without offering the same depreciation incentives the tax code grants to power plants.

Recommendations: 1. Direct the Secretary of Treasury to work with the Secretary of Energy and Congress to encourage increased energy efficiency through combined heat and power projects by shortening the tax depreciation life for CHP projects to 7 years.

2. Direct the Administrator of the Environmental Protection Agency to work with local and state governments to encourage the use of well-designed CHP and other clean power generation at brownfields sites, consistent with the local communities' interests. EPA will also work to clarify liability issues if they are raised at a particular site.

3. Direct the Administrator of the Environmental Protection Agency to promote combined heat and power through flexibility in environmental permitting to the extent permitted by law.

Provide Incentives for Hybrid / Fuel Cell Vehicles Hybrid vehicles use power electronics and battery storage to get more out of every gallon of gasoline consumed, and provide the ability to double vehicle mileage.

A recent National Energy Laboratory Report indicates that the fuel economy of a typical automobile could be enhanced by 60 percent by increasing engine and transmission efficiency and reducing vehicle mass by about 15 percent. Several promising efficiency technologies are being presented to the U.S. market. Automobile manufacturers are developing and have already introduced hybrid vehicles. Advanced lightweight materials offer up to 6 percent improvement in mileage for each 10 percent reduction in body weight.

Recommendation: Direct the Secretary of the Treasury to work with Congress to provide an individual, temporary, efficiency-based income tax credit be available for purchase of new hybrid (gasoline/electric) or fuel cell vehicles between 2002 and 2007.

Expand the Consumer Energy Efficiency Programs: The Federal government not only ensures consumers have information on the energy efficiency of major home appliances, it also promotes the most energy efficient products in office buildings through the Energy Star program, a joint program run by the Department of Energy (DOE) and the EPA. Energy Star is awarded only to appliances that significantly exceed minimum energy efficiency standards. The Energy Star program does not extend to all products. Energy efficiency would be further promoted if the Energy Star program were expanded to a broader range of products.

Recommendations:

1. Direct the Secretary of Energy to promote greater energy efficiency of appliances and buildings. Specifically,
 - a. Expand the Energy Star program beyond office buildings to include schools, retail buildings, health care facilities, and homes;
 - b. Extend the Energy Star labeling program to additional products, appliances and services; and
 - c. Strengthen DOE public education programs relating to energy efficiency.
2. Direct the Administrator of the EPA to develop and implement a strategy to increase public awareness of the sizeable savings that energy efficiency offers to homeowners. The typical homeowner can save about 30 percent (about \$400) a year on their home energy bill by using Energy Star labeled products such as computers, air conditioners and other products.

FYI. The Harvard Electricity Policy Group maintains a web page with recent papers on "Standard Market Design" for restructured electricity markets. You can reach this page at:

http://ksgwww.harvard.edu/hepg/standard_mkt_dsgn.htm

The Federal Energy Regulatory Commission has announced plans for a rulemaking proceeding on a standard market design. You may find these papers of use.

If you have or know of other papers or links that might be included, please let us know.

Sorry about not having the attachment.

-----Original Message-----

From: Cunningham, Lance Sent: Thursday, July 26, 2001 11:03 AM To: Shapiro, Richard Cc: Steffes, James D.; Roan, Michael Subject: Presentation of Oligopoly markets (non-collusive strategic market behavior)

Mr. Shapiro,

I ran across Harry Singh (PG&E) and he mentioned meeting you because of on-going litigation in the California market. I thought that you might find this presentation interesting.

Attached is an IEEE presentation that I made this past week at an IEEE conference. Last Friday I also gave the presentation to the University of California Energy Institute.

I am Scheduled to give it to the Texas PUC, market monitoring staff, next month on August 22.

Slide 28 begins the ERCOT case study. You might find slide 41 interesting which shows ERCOT prices as a function of competitive and strategic (non-competitive) behavior with and without new market entrants. Potential profits as a function of market prices for TXU, Reliant/CPSB, and AEP is also computed.

Let me know if I can be of any assistance to you, Lance B. Cunningham, P.E. Enron Wholesale Services, Research 1400 Smith Street Houston, TX 77002-7361 (713) 345-4186 FAX (713) 646-2503

"Daniel Clearfield" <dclearfield@wolfblock.com> on 06/04/2001 12:44:40 PM To: <jsteffe@enron.com> cc:

Subject: FERC Work

Jim, Steve Huntoon indicated that you are now in charge of federal lobbying (lucky you!) I wanted to touch base and see if you thought that I might be of some service in light of Nora ascension. One idea I had is some task force or other group (funded primarily by Enron) in support of state market opening steps. The purpose of the task force is to push the FERC to take actions that help the states to continue to move to open markets and/or to oppose steps that aren't pro-competition. I don't know whether this idea has any legs or not. Or, perhaps we could participate on behalf of Enron at FERC on specific issues that fall into this category. Just a thought. Hope all is well with you and your family.

Options for Bush's Domestic Climate Plan...

Sender	lisa.jacobson@enron.com
Recipients	['steven.kean@enron.com', 'jeffrey.keeler@enron.com', 'michael.terraso@enron.com', 'richard.shapiro@enron.com']...
File	shapiro-r/discussion_threads/402.

FYI - Yesterday, I attended a Senate Commerce Committee hearing on climate change and climate science. It gave some indications on what might be included in Bush's domestic plan to address climate change.

While little new ground was covered, consensus was evident on the following actions:

? focus on no-regrets and inexpensive reduction opportunities (energy efficiency, "low-hanging fruit") ? take steps to reduce emissions that have co-benefits (air quality - SOx, NOx emissions reductions) ? improve scientific modeling ? long-term research/development and deployment of new technologies, including renewables ? think about adaptation strategies

This was a conservative response, but a sound foundation. This is likely the message being relayed to the White House climate change task force and reflects the minimum options under consideration for Bush's domestic approach.

These recommendations are consistent with Enron's positions and ideas we have already been feeding the Administration such as our multipollutant proposal -- which is market-based, encourages new generation, and has a circuit breaker to keep costs down. We can also help the White House craft meaningful proposals on energy efficiency and incentives for new technologies.

I will keep you posted on new developments. Please let me know if you have any questions.

Participants in Fuel Cell Advocates Group

Sender	chris.long@enron.com
Recipients	['daniel.allegretti@enron.com', 'linda.robertson@enron.com', 'jeff.ader@enron.com', 'richard.shapiro@enron.com...]
File	shapiro-r/discussion_threads/410.

Below is a list of companies that compose the Fuel Cells Advocate group. It is an ad hoc group that meets on a bi-monthly basis to pursue legislative proposals that will further the commercialization of the technology. The \$1000 per kilowatt tax credit is only one avenue they are pursuing. Membership in the group allows you to participate in the formulating of policy and policy papers. There is NO cost to join, but they occasionally ask for contributions for printing materials. The y are very interested in having Enron lend its name and active participation.

Do you want Enron to participate?

Severance

Sender	sjmara@earthlink.net
Recipients	['richard.shapiro@enron.com']
File	shapiro-r/deleted_items/67.

Rick, How are you doing?

Where is Steve off too? Did he even say goodbye?

I'm still perseverating over Enron. I can't help myself. Horrible time to be laid off -- can't talk to be people to find work because everyone is on vacation.

I've heard lots of rumors about severance. Has Enron asked or is it planning to ask the BK court for real severance for employees already dumped or is its plan only to seek real severance for those who were kept on after Dec 3? I finally got my expense check deposited. That was welcome. What about all our vendors? Did they get screwed too? All - or some -- do we pay our utility bill but not our \$500 bill to the AReM lobbyist? Do we pay Safeway for drinks for the fridge, but not our \$3000 retainer to Dan Douglass? This all seems arbitrary, crass and unfair. How can Ken Lay look at himself in the mirror every day knowing how many employees he has harmed? I can understand how the Company cannot control the stock market and the effects of that implosion, but I cannot understand how can the Company can brazenly cut so many people with only a \$4500, less taxes, etc., check as so-called severance -- not even paying accrued vacation . I and many others would feel a lot better about the Company if our rights and good will hadn't been trampled on.

I haven't been able to look for work much -- no one is around. So, I guess I'm spending too much time thinking about this stuff.

Here comes 2002, Thank God!

FW: where does our energy come from?

Sender	gfoster@antigenics.com
Recipients	['mark.palmer@enron.com', 'rshapiro@enron.com']
File	shapiro-r/california/149.

-----Original Message-----

From: Curt Pringle [mailto:Curt@curtpringle.com] Sent: Monday, July 09, 2001 6:23 PM Subject: where does our energy come from?

Assemblyman Bill Leonard's most recent e-newsletter contained the following information. I think it is very interesting to consider in light of the present energy situation in California and the comments of our present Governor.

Regards, Curt

Who Really Powers California? Governor Davis has made no secret that he believes that swashbuckling, cattle rustling, energy barons from Texas are to blame for our energy crisis. While Texas power companies make for good bad guys in the Governor's transparent Kabuki theater of blame, Leonard Letter readers may be interested to see who really provides power to Californians. The following list illustrates what percentage of our power supply each group of generators provides. (Editor's note: these percentages have been rounded up resulting in slightly more than 100%)

18%- Pacific Gas and Electric (California) 15%- Southern California Edison (California) 11%- Imported power from the Northwest (including Canada) 10%- Los Angeles Department of Water and Power (California) 10%- Imported power from the Southwest 7%- State and Federal Agencies 6%- AES power company 5%- Municipal Utilities and Irrigation Districts 5%- Reliant power company 4%- Duke power company 4%- Southern power company 4%- Dynegy power company 1%- Sacramento Municipal Utility District (California) 1%- Calpine power company 1%- San Diego Gas and Electric (California)

It should be noted that of this list, only Dynegy and Reliant are from Texas. These two companies represent a total of 9% of California's energy portfolio. By comparison, Georgia-based Southern (Mirant), Virginia's AES, and North Carolina's Duke Energy, have a 14% share of our energy portfolio.

This list does not focus on who is gaming the market. However, every provider listed benefited from skyrocketing energy prices. In trying to identify those power producers who used market power to ring up high profits on Californians, we should include ALL power producers in our investigations. State and federal agencies, independent power companies, utilities, municipal utilities, and even local irrigation districts could all be guilty of gouging consumers. Davis's focusing on only those companies from Texas does everyone in this state a disservice and is a misrepresentation of fact.

Important Project Announcements from the Center for the Advancement

Sender	ljackson@caem.org
Recipients	['ljackson@caem.org']
File	shapiro-r/discussion_threads/715.

[IMAGE]

The California Electricity Crisis has resulted in an avalanche of opportunity for the Center for the Advancement of Energy Markets (CAEM) to provide its views on energy restructuring. Below you will find links to some of our recent documents.

In May, CAEM issued an update to the RED Index 2001 that now includes the 13 provinces and territories of Canada. The RED Index is a scorecard on the progress states are making in electricity restructuring. RED Index Update for Canada. USA Today did a full page spread using CAEM's RED Index to give a summary of activity in the top 25 states. USA Today Article. The Governor of Pennsylvania included the RED Index Rank of Pennsylvania in his State-of-the-State Address. Pennsylvania Governor The NY PSC issued a Press Release on the RED Index. NY Commission

CAEM is pleased to announce the formation of a public-private sector project called the Distributed Energy Task Force. At the request of important members of Congress, CAEM will be assessing opportunities for promotion of distributed energy technologies and matching those opportunities with policy instruments, i.e., tax incentives, funds for R&D etc. For a copy of the project description and participation information, email a request to jwimberly@caem.org.

In February, CAEM sponsored a meeting of the newly formed Leadership Council on Energy Restructuring, an umbrella group of industry executives and public sector officials who support the development of a coherent strategy on energy restructuring. Leadership Council Document

In April, CAEM filed comments with the FTC on the proceeding that was initiated at the request of House Energy and Commerce Committee Chairman Billy Tauzin on the impact of States restructuring. CAEM FTC Comments

In March, CAEM held its first meeting of the DISCO of the Future Forum. We have posted several documents from that Forum. DISCO Forum Documents

Last Sunday, the Philadelphia Inquirer published the views of CAEM on President Bush's Energy Plan. Philadelphia Inquirer Article

In January, CAEM appeared on CNN to discuss the California Crisis. CNN Link

Feel free to forward this email to colleagues who may be interested in the Center's activities. For other information and documents, please visit our website at <http://www.caem.org>

Please let us know if we can be of assistance to you in your efforts on energy restructuring.

If you do not wish to receive updates on CAEM's Activity, please reply with the word "remove" in the subject line. Thank you. ?

Jennifer

I will be more than willing to help.

I will prepare a draft presentation for the 11:15- 12:15 slot. What I need = from you is the following:

a) List of journalists to attend (names and organizations) b) The complete schedule for the day. Who will be presenting what, in which= sequence. This will help me fine tune the presentation c) Two or three key messages you would like me to convey.=20 d) Languages (e.g. presentation in Portuguese, slides in English, or both i= n English, etc.)

Regarding item "c" , one of my favorite messages, on a high road approach, = is what I call the " virtuous circle of contracting". In very simple words,= I try to convey the message that regulatory reform has several elements, i= nvolving legal, technical, commercial and regulatory per se. Some of them m= ore visible than others. In the reform of the energy sector in Brazil some = of them have been taking care while others need further elaboration. Howeve= r, there is an important, oftentimes neglected cornerstone, which is contra= ct sanctity. In the Anglo-Saxon culture, this sounds very obvious. However, = it is not so obvious when we start developing businesses overseas. Just to = illustrate this point, I am attaching a presentation recently delivered in = Brazil, which was very well received by Minister Parente, the energy czar. = It basically states that if Brazil wants to be serious about privatization,= electric reform and sector expansion, we have to respect contracts. The go= vernment should walk this talk. Most of the issues we are currently facing = in Brazil right now (Annex V, Wholesale Agreement, MAE price, Itaipu Excess= Energy, Spot price calculation, " Parcela A" pass-through, and many others=) fit perfectly within this overall umbrella message.=20

A subsequent presentation, more focused on Brazil versus California Crisis = is also attached. Several Journalists in Brazil tend to jum to conclusions = by saying that because of the failure of the California experiment, we shou= ld stop ongoing reforms.=20

We may prepare a completely different one, but I think it is worth emphazin= g the concept of contract sanctity and how it has been systematically viola= ted.

=20 Please let me know what the next steps should be

LM

Subject:=09Brazilian Journalists

Luiz, International Public Relations is sponsoring a visit from a group of Brazil= ian Journalists from leading Brazilian Business Journals on Friday, October= 4. We would like someone from Government Affairs to speak to them concern= ing regulatory reform. Keith Miceli suggested we contact you.

Enron Brazil is working hard to bring about regulatory reform in Brazil so = its trading and origination businesses can profitably operate. The Brazil= ian media is an important opinion maker in the public policy debates on issu= es of interest to Enron. The purpose of sponsoring the visit of these Braz= ilian journalists is to increase rapport with key media representatives, bu= ild greater their understanding of the energy sector and foster news storie= s that are supportive and objective.

We have a time slot available from 11:15 am until 12:15 am. This time slot= is flexible. Please let me know if you or someone from your group will be= available for this.

Thank you. Jennifer

Julia - I think this is a huge issue, and I've been trying to get to the bottom of whether or not Enron is importer of record on its trades into the US. Let's discuss when you have a minute. Thanks, Lisa ----- Forwarded by Lisa Yoho/NA/Enron on 05/08/2001 10:44 AM -----

BHafner@PGFM.com 05/07/2001 03:32 PM

To: Lisa.Yoho@enron.com, dan.lyons@enron.com cc: rbelanger@pgfm.com, lyang@PGFM.com Subject: Importer of Record

Lisa and Dan (and Tim):

Dick Belanger and I talked about the importer of record question we discussed in this morning's telephone call. For a trading company such as Enron, that is importing products made by other companies, there is not much advantage to being importer of record. The one legal advantage is that the importer of record can challenge actions taken by the US Customs Service, such as misclassification or valuation issues. There do not appear to be other legal rights that Enron would sacrifice by not being importer of record.

However, the issue may not be whether Enron should be the importer of record, but whether it can avoid being importer of record. Particularly in today's steel market, other parties may not be willing to be importer of record for exactly the reason Stelco indicated -- no one wants to expose themselves to the possibility of antidumping duties. Thus, although Enron could structure a deal in which, for example, Stelco sold to Enron Canada, and Enron sold the steel to a US customer, with that customer acting as importer of record, with the possibility of a o201 investigation and/or AD/CVD cases lurking on the horizon, the customer may not be willing to expose itself to the possibility of future AD/CVD duties, and hence would be unwilling to act as importer of record.

If Enron can find someone else who is willing to act as importer of record, you would protect yourself better by structuring the deal that way. The question is whether you can find someone to be importer of record.

Feel free to call if you have any questions.

Regards,

Betsy

NEW RELEASE COMMONWEALTH OF PENNSYLVANIA OFFICE OF THE GOVERNOR Commonwealth News Bureau Room 308, Main Capitol Harrisburg, PA 17120

FOR IMMEDIATE RELEASE CONTACT: Tom Charles, Editor Commonwealth News Bureau (717) 783-1116

Deb Snyder, Revenue Press Secretary (717) 787-6960

GOV. RIDGE RECEIVES ANNUAL REPORT ON ELECTRIC COMPETITION THAT SHOWS CONTINUED JOB GROWTH, SAVINGS FOR PA Electric choice will help create 40,000-plus jobs by 2005

HARRISBURG (Aug. 6) -- Secretary of Revenue Larry P. Williams today announced that the second annual report to Gov. Tom Ridge and the General Assembly, "Electricity Generation Customer Choice and Competition," shows electric choice will help create more than 40,000 jobs by 2005.

"Our latest report shows electric competition continues to have a positive impact on Pennsylvania," Secretary Williams said. "Last year's report projected electric competition will create more than 36,000 new jobs by 2004. This year's projections continue to show the economic benefits of the No. 1-in-the-nation electric-deregulation plan proposed and signed into law by Gov. Ridge.

"Savings from electric competition give consumers and employers more money to spend, creating multiplier effects on the state economy and reducing business costs, giving employers more money to invest."

The new report studies the impact of Act 138 of 1996 during the period 1997-2005. Models used for the report show that the forecast reductions in retail electricity prices lead to the following economic impacts in Pennsylvania by 2005: ? The real gross state product will be \$2.3 billion higher; ? Overall employment will increase by 40,700 full-time and part-time jobs; ? Nominal personal income will increase by \$1.8 billion; ? The price index will decrease by 0.5 percent; and ? The population will increase by 56,000 people, as workers are attracted to job opportunities in Pennsylvania.

The report also notes larger Sales Tax and Personal Income Tax collections.

On July 16, Gov. Ridge joined Vice President Dick Cheney in Allegheny County for a national town meeting on President Bush's National Energy Policy. "It's no surprise why the President chose Pennsylvania to conclude the rollout of his National Energy Policy in May," Gov. Ridge said at the national town meeting. "And it's no surprise why Vice President Cheney is in Pennsylvania today for this important town meeting with our entire nation.

"Pennsylvania is a national leader in both energy and the environment. We are the No. 1 state in the nation for electric competition. Our electric- competition plan has saved employers and families \$3.8 billion, while ensuring a strong supply.

And, at the same time, we are forging a new environmental partnership, with forward-thinking initiatives like Land Recycling and 'Growing Greener.'"

More than 130,000 Pennsylvanians now use cleaner and greener forms of power, more than any other state. Pennsylvania also is the first state to deregulate both electricity and natural gas.

Gov. Ridge led the push for electric competition and, in December 1996, signed the Electricity Generation Customer Choice and Competition Act. The Electric Choice Program went into effect in 1998. Prior to the enactment of Act 138 in 1996, Pennsylvania's retail price of electricity exceeded the national average.

Under the Ridge Administration, Pennsylvania families and employers have saved \$17 billion through tax cuts, workers' compensation reform, reduced red tape and electric deregulation. These savings have helped to create nearly 500,000 new jobs.

Re: EESI - City of Chicago Agreement

Sender	roy.boston@enron.com
Recipients	['christopher.townsend@piperrudnick.com', 'jsteffe@enron.com', 'janine.migden@enron.com', 'susan.landwehr@enro...]
File	shapiro-r/notes_inbox/30.

Hello All -- Just an update on the Chicago Deal. The ordinance which would permit the City to enter into a multi-year agreement was introduced in the City Council yesterday and the Mayor held a post-Council press conference with our deal being the first issue addressed (and the only one to have a nice graphic showing its benefits). Several high-profile issues were also on the agenda (racial profiling, redistricting, legal representations for aldermen re: school locations, school board CEO Paul Vallas' future, Gery Chico's replacement, etc.) so the press spent several minutes questioning both the Mayor and City Commissioner Bill Abolt on our issue. Abolt did a masterful job of handling the issue with his point being that the City has lived up to its commitment to 1) develop a competitive market, 2) reduce costs while, 3) promoting green power (renewables). The press focused on whether ComEd was resentful that 60% of the City's requirements will be covered by this agreement to which Mr. Dwyer, of ComEd, after the press conference stated that they viewed the deal as a win because ComEd got the green component of the City's business. Peggy Mahoney also made a post conference statement and was welcomed by the press and was given a favorable treatment by the press (Dick Kay, Andy Shaw and Mike Flannery). On balance, I think that the press did not know what to make of this deal but knew that this is an appropriate response to the drubbing the Mayor has received in the past for putting all of the City's energy needs in one basket laid at the feet of ComEd. As you know, this is only the introduction of our deal to the City Council and it has not been approved yet. We expect that that will occur either later in June or certainly by the end of July. The actual contract will be finalized and signed at that time. In the mean time, I expect that the press will have more questions as this matter moves forward and it goes to the Council's Energy Committee. The City is doing the heavy lifting and it is best that Enron not take an over large profile -- but we also cannot become invisible either. Julie Starsiak of Ronan & Potts and Peggy Mahoney are very much involved.

"Townsend, Christopher J. - CHI" <christopher.townsend@piperrudnick.com> 06/05/2001 11:14 PM

Denmark Approves Ratification of the Kyoto Protocol....

Sender	lisa.jacobson@enron.com
Recipients	['catherine.mckalip-thompson@enron.com', 'stacey.bolton@enron.com', 'jeffrey.keeler@enron.com', 'michael.terra...]
File	shapiro-r/all_documents/819.

TO: Jeff Keeler Mike Terraso RE: Denmark Approves Ratification of the Kyoto Protocol DATE: May 30, 2001

Yesterday, the Danish Parliament passed a resolution approving the Kyoto Protocol, allowing Denmark to ratify the treaty jointly with other EU member states. Denmark is the first EU member to take such strong government action related to ratification of the Kyoto Protocol. Currently, Romania is the only industrialized nation to have ratified the treaty. While Denmark's action is largely symbolic, it puts pressure on the U.S. and other EU members to keep the international negotiations on track and puts mild pressure on other EU members to approve the treaty in preparation for joint ratification. Please see Dow Jones article below. Background The Bush Administration is currently reviewing U.S. climate change policy with the aim of releasing an alternative approach to the Kyoto Protocol in late June. The international climate change negotiations are scheduled to resume in mid-July in Bonn, Germany, but could be postponed based on the substance of the U.S. plan or a lack of progress during informal Ministerial meetings in late June. EU Ministers have publicly endorsed a EU ratification strategy by 2002; however, U.S. opposition to the treaty could delay or shift this approach. Environmental Strategies is providing input to the Bush Administration and Congress on cost-effective, market-based approaches to address climate change. Remarks by Danish Energy Minister Danish Energy Minister Svend Auken made these remarks about ratification: "Denmark is sending a strong signal that we still support the Kyoto Protocol, affirming our active contribution to protecting the environment we live in." "It is even more important in light of the American rejection," he continued, "for countries that support the Kyoto Protocol to show clearly that the Kyoto process is continuing." I will keep you posted on new developments. Please let me know if you have any questions. Please see the Dow Jones article and link to the Agence France-Presse story below (in French). (Agence France-Presse <http://www.lapresse.com/groups/public/documents/convertis/mon_p1059443.hcsp

Denmark Approves Ratification Of Kyoto Climate Treaty

05/30/2001 Dow Jones International News (Copyright (c) 2001, Dow Jones & Company, Inc.)

COPENHAGEN (AP)--The Danish parliament has approved the 1997 Kyoto global warming treaty in a move the environment minister called a strong signal to the U.S. administration that the ratification process will continue despite rejection by President George W. Bush.

In an 88-9 vote late Tuesday, the parliament in Copenhagen gave its go-ahead for European Union member Denmark to ratify the protocol when all 15 E.U. members jointly will sign the document. No date for the common ratification has been

set.

"In light of the American government's rejection of the Kyoto agreement, it's even more important that the countries that support it clearly demonstrate that the Kyoto process continues," Environment Minister Svend Auken said Wednesday by telephone.

The U.S. has been heavily criticized for its environmental policies after Bush rejected the Kyoto treaty in March, saying the mandatory pollution reductions would harm American economic interests and promising to offer alternative measures.

In Kyoto, Japan, the industrialized countries agreed to reduce greenhouse gas emissions by an average 5.2% by 2012 from 1990 levels.

Auken stressed the importance of maintaining a dialogue with the U.S. - the world's biggest polluter - on environmental matters.

"The way forward is not to take a defensive position but to show leadership," he said. "Without the E.U. it is difficult to imagine a successful global climate policy that will really make a real difference to the environment."

E.U. leaders have pledged to go forward with the ratification process despite the U.S. rejection and say it's possible to get the necessary approval from 55 countries.

World delegations will reconvene in Bonn, Germany, in July for another attempt to draft details of the treaty.

From: Thome, Jennifer Sent: Friday, September 14, 2001 9:23 AM To: Nord, Sue Cc: Guerrero, Janel Subject: National Transmission Grid Workshops Planned

Sue:

Not sure who would be interested in these workshops from the RTO group (if they are not already aware of these). Note that these workshops will include discussion on RTOs and are taking place at the end of this month in three cities. More info. is at <<http://tis.eh.doe.gov/ntgs/workshops.html>>

NGI's Power Market Today published : September 14, 2001

National Transmission Grid Workshops Planned

When President Bush unveiled his National Energy Policy (NEP) in May, the plethora of recommendations included a proposal to establish a national electricity grid. Now, as the plan moves forward, three workshops are scheduled this month to give all stakeholders a chance to participate in the National Transmission Grid Study 2001 (NTGS). The workshops, set for Detroit on Sept. 24, Atlanta on Sept. 26 and Phoenix on Sept. 28, are expected to lay the foundation for a proposed transmission super highway.

As the NTGS sees it, wholesale electricity market competition has changed the way the U.S. electric grids are used. Transmission systems that historically were used to move power within small utility service territories are now frequently "stressed to their limits" as large blocks of power are moved on a regional basis. The new patterns of power flow, higher

electricity demand and a lack of investment has led to major transmission congestion across the country.

"Transmission investments go far beyond acquiring rights-of-way and building new power lines," according to the NTGS. "State-of-the-art metering and telemetry, upgrading the control centers computing capabilities and installing new technology will also be necessary if consumers are to fully realize the efficiency gains from competitive wholesale electric markets."

Could the entire U.S. electricity grid be operated as one integrated whole or a few large integrated markets? If it was an integrated whole or a few large markets, how could officials assure the reliability of a national grid? Those are just a couple of the questions participants will attempt to answer during the workshop sessions.

"Removing major transmission bottlenecks will help unleash the economic benefits that are achieved through efficient and competitive electricity markets," according to the NTGS. But how to remove the bottlenecks still remains the biggest dilemma of all. Investment barriers, seen as keys to the puzzle, include a lack of regional integrated planning, difficulty in siting, and uncertainty regarding investment risks and returns.

Basically, the NTGS has identified several issues that will be covered in the all-day workshops including: transmission planning and new capacity needs; transmission siting and permitting; business models for transmission investment and operation; operation of interconnected transmission systems; reliability management and oversight; and new transmission technologies.

Within the transmission planning issue, participants will discuss appropriate measures and consideration of reliability and commerce along with siting and environmental effects. Other planning issues include integration of planning for transmission, generation and demand-side management programs and the role of new technologies to reduce the need for large facilities. Planning how new transmission facilities affect the ability of some generators to artificially raise market prices for energy also will be discussed.

Siting and permitting issues will include input on options to establish regional or federal siting institutions with the authority to obtain rights-of-way for new projects as well as the options to improve existing state-based regimes. Business model issues will include the political feasibility of choices for Regional Transmission Organizations as well as their effects on market efficiency, system reliability, operational efficiency, transmission access and interconnection policies, investment and innovation and regulatory oversight.

Workshop participants also will discuss who should make the decisions about reliability and the technical and economic bases for making decisions, along with who should take the risks. "The restructured industry will require a more open and inclusive process for establishing mandatory standards and monitoring and enforcing compliance," according to the NTGS.

One way to solve many of the problems will be through new transmission technologies. A major part of the workshops will be to learn the capability and cost of new technologies that could improve the operation of the transmission system, along with options available to support the development and deployment of new technologies in the current restructuring period.

The Detroit workshop, set for Sept. 24, will be held at the Detroit Marriott Romulus at Metro Airport, 30559 Flynn Dr., Romulus. The Atlanta workshop, set for Sept. 26, will be held at the Hyatt Regency, 265 Peachtree St. NE. The Phoenix workshop will be Sept. 28 at the Phoenix Airport Marriott. All three workshops will begin at 9 a.m. and adjourn by 4 p.m.

For those unable to participate in a workshop session, the NTGS also will offer an opportunity for non-registrants to make recommendations, with a transcript of the proceedings for each workshop available. Recommendations and comments also will be accepted through Oct. 10 by the NTGS.

To learn more about the workshops or to register, contact NTGS's Zead Haddad at (202) 586-2577 or by e-mail at zead.haddad@hd.doe.gov. For technical questions about the study, contact Paul Carrier at (202) 586-5659 or send an e-mail to paul.carrier@hq.doe.gov. The registration form is available online at <http://tis.eh.doe.gov/ntgs/workshops.html>.

File	shapiro-r/refund_cases/3.

We fared well in the prehearing yesterday. At issue was whether the California refund claims would be decoupled from the supplier/creditor claims of Enron and other sellers to whom California owes money. For both strategic and tactical reasons, it is critical that these claims be resolved in the same adjudications and ultimate judgments. In yesterday's prehearing, Enron and other suppliers defeated (at least for now) a very real threat of decoupling. In addition, Gary Fergus did a very able job at educating the judge on (a) the inadequacies of California's data supporting its refund claims, and (b) the likelihood that California is cooking that data.

File	shapiro-r/refund_cases/16.

Today we filed with FERC 5 paper direct testimonies and numerous exhibits that constitute Enron's affirmative case against the Pacific Northwest refund claims. The filing, in Gary's and my view, is quite strong and is part of and supported by the larger sellers' group - the Transaction Finality Group. In addition, we filed under seal Enron's ripple case offer of proof. This was made possible by a motion that we won this morning that allowed us to proceed with aggregate claims in a quasi-public forum, but, at the same time, file our individual ripple claims only with the judge, protected from all public disclosure. Please call me if you have any questions.

I have Moved South

Sender	kitchens@jwemc.org
Recipients	[rshapiro@enron.com]
File	shapiro-r/personal/108.

Dear Rick,

In September, I started a new job with another electric cooperative in North Alabama near Decatur and Huntsville. It is Joe Wheeler EMC, a TVA distributor. We have about 39,000 customers in 2 counties south of Huntsville. This had been a troubled cooperative and had seen a huge management and board shake-up. I hope that between my efforts and having a few new board members that things will smooth out here.

I am sure saddened to see all of the stuff hit the fan at Enron. I had actually bought more stock several weeks ago in the belief that this whole thing was a fluke. I like many others are reminded that the market is a very fickle animal indeed. I hope that you and the old group are being seen as part of the core business. I don't think that anyone would say that ENE did not have an effective government relations group.

Best Wishes, George Kitchens General Manager & CEO Joe Wheeler EMC P.O. Box 460 Trinity, AL 35673 Phone: 256-552-2314

Locke Letter

Sender	paul.kaufman@enron.com
Recipients	[richard.shapiro@enron.com', 'james.steffes@enron.com']
File	shapiro-r/discussion_threads/357.

Here's the draft letter for Locke and a summary of the bill (FYI). The pertinent section of the bill is section 3--although other sections of the bill may provide opportunities for:

EES: state agencies and school districts are required to complete energy audits and implement cost-effective conservation, with performance contracts being the preferred method; and ENA: utilities (both COUs and IOUs) must offer renewable energy products to customers.

We need to get our letter in the hopper ASAP. Please ask Ginger to fed ex the signed letter to our lobbyist Mark Greenberg so Mark can deliver it to the Governor's office. Mark's address is

2205 East Bay Drive Olympia, Washington 98506 360.786.9600

(Have fed ex leave it at Mark's door if he isn't there.)

There is some concern that Locke will line item veto portions of the bill as it was a last-minute compromise. However, his support appears to be holding for the entire package.

I'm in the office tomorrow (Weds) and in Sacto on Thursday. Give me a call if you have any questions.

Broadway Across America - Ticket Request Processed

Sender	houstonbroadwayseries@clearchannel.com
Recipients	['rshapiro@enron.com']
File	shapiro-r/personal/34.

Your order has been processed by our staff. \$245.58 has been charged to your credit card. Your account number is 27-29727. Seat and Rows Information: Cats Sunday December 30,2001 @2:00pm Orchestra row H, seats 15-20

Please review the following information regarding your tickets for the 2001-2002 Houston Broadway Series.

Season ticket packets, which include all of your tickets and other helpful information, will be sent to you, by mail, approximately one month prior to your first performance.

If you wish to purchase tickets to season specials later, select the "Buy Season Tickets" button from within your city at BroadwaySeries.com. You will be asked for your account number and zip code during the process, so that we may add your new selections to your order.

If you have any questions or need more information, visit the Houston page on Broadwayseries.com or simply call our Season Ticket Hotline at 713-622-7469.

Once again THANK YOU for being a part of the Houston Broadway Series. We value your support and look forward to helping you enjoy the season.

Sincerely, The Houston Broadway Series

So long...

Sender	scott.bolton@enron.com
Recipients	['richard.shapiro@enron.com']
File	shapiro-r/personal/109.

Rick - I know I don't leave until the end of the week, but I'm feeling content and wanted to take a moment and thank you for all the opportunity and support you have given me over the years. Although I wish I was leaving the company better than when I found it, I can't help but feel grateful - all the same for the experiences and friendships I have made here. I look over the past 3 1/2 years with amazement over the things and people I was exposed to - the political conventions, the group off-sites, the trip to India, the Inauguration (okay, I could have lived without the Inauguration). But all of these things I would never have had a chance to experience without Enron and the encouragement of you. I learned so much here that I will have to draw upon for the rest of my life. And the friends I have made and colleagues I have known have all had a tremendous impact on me. I have never worked in an environment that had such high-quality people. I owe you a lot, and I hope you know that no matter how hard things may have gotten, or how difficult some decisions may have been for you, you have never let me down and I have always held you in the highest regard.

I have wrapped up about all that I can here and had my exit interview today= . I will be taking finals next week and then spend some much needed time w= ith my family. But I'm definitely here for you if you need anything, and I= am hoping for the best for Enron and its people.

Best Regards, Scott

Revised Trial Schedule in the CA Proceeding

Sender	ray.alvarez@enron.com
Recipients	['robert.frank@enron.com', 'linda.robertson@enron.com', 'd..steffes@enron.com', 'richard.shapiro@enron.com']
File	shapiro-r/refund_cases/6.

This is a follow up to my September 19 e-mail. The attached revised trial schedule was issued after the hearing held on Tuesday. It reflects a recognition by the ISO of errors or omissions in its data relating to neutrality adjustments, resolved settlement disputes, penalties and OOM purchases. It postpones the end of the proceeding until March 8, to provide time for correction of these deficiencies prior to undertaking the rest of the schedule. Hearings on the various issues will be bifurcated- the hearing on Issue 1 (mitigated market clearing price) will be held 12/17-21, while the hearing on Issues 2 and 3 (amounts of refunds and offsets thereto) will be held on 2/11-15. This outcome is good because Issues 2 and 3 were not split up, and additional hearing days were incorporated into the schedule. The immediately upcoming events include an ISO sworn statement on Issue 1, due 10/9, and participants' simultaneous responsive testimony on Issue 1, due 11/6.

I would expect that the ISO will take approximately 3 weeks to re-run its numbers to correct their neutrality adjustment errors, and this will result in a new (and likely increased) claim against us. Initially, ISO had claimed approximately \$38MM from us, and their last erroneous iteration indicated that they owed us \$1MM.

Ray

Tabors' Cost Benefit Studies

Sender	sarah.novosel@enron.com
Recipients	[' richard.shapiro@enron.com ', ' linda.robertson@enron.com ']
File	shapiro-r/rto_campaign/44.

Rick:

Here are a proposal from Richard to analyze the benefits through a detailed modeling approach. He assumes the Mirant study can be used in the Northeast and the Midwest (provided they do one), but he does not include in the proposal pulling all of this data together to come up with an analysis nationally of the benefits of RTOs. Presumably that would not be the bulk of the cost of the project. I am sending next the Seabron proposal which is different from Tabors, so it's good to see different approaches.

Larry Ruff has not returned by calls. I know he was busy with the ICAP affidavit, but he should have called me by now. I'll try again. I'm also going to see what kind of ideas the Brattle group (Peter Fox-Penner) has.

There was a lot of discussion about the need for a cost benefit analysis during the Thursday morning RTO conference with the State Commissioners, so this remains an important project. We need to discuss timing. Neither Tabors nor Seabron can work on this immediately due to the California refund proceeding, but they could do the work if we were to submit a study along with comments in the NOPR proceeding (which would likely be due mid-December).

Let me know what you think.

Sarah

-----Original Message-----

From: Tabors, Richard [<mailto:rtabors@tca-us.com>] Sent: Wednesday, October 17, 2001 9:11 AM To: 'snovose@enron.com' Subject: RCRs for Cost Benefit Studies

Sarah

Attached are three RCR requests for doing the C/B studies for the Southeast and the West

Several assumptions are built in.

1. The desire is to have an analysis that is pretty air tight, i.e. not assertions but analyses 2. Mirant has done the NE (we have the evidence of that) and it is also pretty air tight. I can't prove this from the PUF article but the numbers look pretty good and we know EEA and they do good work 3. Mirant is going to do / is currently doing the Midwest. This bye the bye is as big a headache as the West so hopefully they are focusing on the challenges there - like is it possible to have it be a single RTO? 4. To do the west we need to do two things. A.) coordinate with what we are doing for the people in RTO/W. Ellen will need to do some talking with them as we go on this. B.) do a market description analysis as we did for the SE, NE, etc. It MIGHT be possible to skip this but it would be dangerous. Our take is that there are really two (possibly 3) "natural" market areas in the west and that a single RTO would not make a lot of sense. This is empirical at this point so

figuring it out would be good.

The obvious point is that for us to do this will require serious resources (you are used to that). It is a tiny bit worse making it fit in 8 weeks max but that looks OK given current staffing and other things that are underway.

Let me know where you are on this when you can.

Many thanks

Richard

From: The RMR INSIDER [mailto:rmrinsider@rmrwest.com] Sent: Tuesday, July 10, 2001 2:11 PM To: rmrinsider@rmrwest.com Subject: Gray Davis' New Radio Ads Continue Campaign of Lies and Half-Truths

THE INSIDER: Political Information Network THE AUTHORITATIVE GUIDE FOR SACRAMENTO INSIDERS AND POLITICAL LEADERS

M E M O R A N D U M

TO: Sacramento Political Insiders & Interested Parties FROM: Russo Marsh + Rogers, Inc. RE: Gray Davis Radio Ads & The Whole Truth about New Power Plants DATE: July 9, 2001

GRAY DAVIS' NEW RADIO ADS CONTINUE CAMPAIGN OF LIES AND HALF-TRUTHS DAVIS CLAIMS CREDIT FOR POWER PLANTS LAUNCHED BEFORE HE EVEN TOOK OFFICE

The launching of statewide radio ads by the Gray Davis campaign, a full 16 months ahead of Election Day, should not come to anyone's surprise. Nor should anyone be surprised that the new radio ads are full of the typical Davis lies and half-truths.

Davis has made raising money for his re-election campaign the #1 goal of his administration, and obviously that money will be spent to twist Davis' failed record for those who don't know better. The real news in these ads is the brazen half-truths that permeate these so-called "energy updates."

The ads are billed as almost public service announcements, but in a real public service, we here at Russo Marsh + Rogers have to set the record straight with the entire story:

"Of the 16 new power plants Gray Davis seems to be claiming credit for almost personally developing and constructing, he actually deserves credit for none!"

Here are the facts: Of the 16 plants Davis takes credit for, every single one was first planned for construction and siting before Davis even became governor.

Ten actually began the licensing process or applied for state certification before Davis' term in office began.

And the final 6 plants? Building a power plant is a major undertaking. Feasibility studies by the plant builder begin months before the first piece of paper arrives at the Energy Commission. If you assume that the builder of a plant first started internal studies only twelve months before their first license application, then guess what? They were started under the previous administration too!

Furthermore, Gray Davis did not appoint his third member of the 5-member California Energy Commission until February 2001! And even that third appointee was a reappointment of Bill Keese, who was originally appointed by you guessed it, Pete Wilson, "father of deregulation and all things evil in California."

The truth is that while Gray Davis is boasting of personally licensing these 16 new plants - the heavy load was carried by the previous administration. Davis is desperately trying to spin his way out of an energy disaster created when he fiddled away precious time last year, denied utilities the right to long-term contracting and falsely insisted he was on top of the energy "challenge."

The Gray Davis spin machine now takes on a new phase with his \$30 million campaign war chest to rewrite history. It's no news at all that his desperate first campaign ads are filled with the same half-truths he's been repeating since day one.

Fortunately, the RM+R Insider will be here for you, every time, to serve as the "Truth Squad" against Gray's distortions.

Scouting Report Special Edition---Where technology hits home.

Tuesday, September 18, a worm named Nimda, which targeted Windows-based servers and computers struck domestically, shutting down sites everywhere. Companies, businesses and PC owners were suddenly finding themselves scrambling to get their computers cleaned out and back up and running. The truth is, most people do not back up their computer files. It may cross their minds once in awhile, but few actually act on it. Is it because backing up files is such an all-consuming task, or is it because we really are just that lazy? Here at TechnoScout, we are giving you yet another reason to save your files, or risk losing important documentation. Find out how easy it can be:

Because we live in a world of viruses, back up your hard drive RIGHT NOW!

With the Pockey Portable Drive, up to 20 GB of files are easy to store and carry - and even easier to afford.

The Pockey Portable Drive is small enough to fit in your shirt pocket, plugs into (and is powered by) your computers USB port, and delivers more capacity for the money than any other similar device. Up to 20 GB of storage, at a cost that is far less than other devices! Save files from your desktop computer in your Pockey drive and take them to business meetings along with your laptop. Even data-rich files like sales presentations, engineering drawings, spreadsheets, and customer databases are no problem. And by accessing files from your Pockey drive, you keep your notebook free of data you do not need to store. Maybe you do not have the problems of a road warrior, but you want an external drive to store and carry digital photos, mp3 files, or even games and movies. Again, Pockey is the answer.

Save your files with Pockey Portable Hard Drive

Report on real-time markets and operations

Sender	eric@ehirst.com
Recipients	[eric@ehirst.com]
File	shapiro-r/discussion_threads/513.

Dear Colleague:

The Edison Electric Institute just published a report I wrote on Real-Time Balancing Operations and Markets: Key to Competitive Wholesale Electricity Markets. The report is available from the Publications page of my website, www.EHirst.com. Here is a summary of the report:

Electricity production and consumption must occur at essentially the same time. Therefore, real-time (minute-to-minute) operations and the associated markets and prices are essential ingredients of a competitive wholesale electricity industry. In addition, these intrahour markets are the foundation of all forward markets and contracts, including hour- and day-ahead markets, monthly futures, and bilateral contracts. Finally, these intrahour operations maintain system reliability by ensuring that enough and the right kinds of supply and demand resources are available when needed.

Because of various load, generation, and transmission factors, balancing generation to load on a minute-to-minute basis is complicated. Loads are volatile, both from hour to hour and from minute to minute during the morning rampup and evening dropoff. Generators differ substantially in their costs of electricity production. In addition, generators have various idiosyncratic characteristics, such as maximum and minimum output levels and maximum ramp rates, that limit their ability to respond rapidly to changes in system load or generation. Finally, transmission characteristics affect the real-time balancing function because of congestion and sudden transmission outages. These factors can lead to dramatic and rapid changes in electricity prices, including occasional negative prices when generators pay someone to take their output.

The early years of operations by independent system operators (ISOs), based on the experiences in New England, New York, and California, show how difficult it is to translate the theory and initial design of competitive markets into ones that work efficiently. These ISOs have been plagued with various startup problems that artificially raise electricity costs to consumers, implicitly encourage strategic bidding by some generators, do not sufficiently discipline generator market power, sometimes yield insufficient resources, and impair reliability. Fortunately, the ISOs have been quick to identify and remedy flaws in their initial market designs. On the other hand, the ISOs have done a poor job of documenting these problems and their resolutions.

This report is primarily a primer on how such intrahour operations and markets should work. It demonstrates these principles through several examples. These examples deal with generator ramp rate limits, low-operating limits, startup costs, and other generator characteristics. Other examples show how energy-limited (e.g., hydro) units differ in their bidding and operations from capacity-constrained (e.g., thermal) units, how the consideration of multiple time intervals affects operations and pricing, how generators located outside the control area are treated differently from those within the control-area boundary, how interval pricing combined with hourly settlements can encourage generators to ignore dispatch signals, and how intermittent resources (such as wind) affect control-area operations.

Although U.S. wholesale competitive markets today suffer from a variety of problems, there is reason to be optimistic. Ultimately, the ISOs (and, later on, RTOs) will identify and fix the problems within their market structures, and they will adequately document their problems and the associated resolutions so that their market participants and the designers of other systems can learn from past mistakes. Ultimately, efficient real-time markets should allow reliability councils and system operators to largely replace command-and-control rules with market signals (i.e., prices that vary rapidly in response to changes in system security). These changes should lower the costs of maintaining reliability; deploy supply and demand resources more efficiently; and guide investments in new generation, transmission, and demand-side resources.

<http://a904.g.akamai.net/7/904/506/v0003/www.autobytel.com/images/autominute/envoy_scraper3.jpg> Envoy: GMC's Bold New SUV The GMC Envoy is one of the nicest surprises of the 2002 model year. It represents a comprehensive improvement over its Jimmy predecessor, making it one of the most competitive mid-sized SUVs on the market.

The fact that it is still "truck-based" - which essentially refers to the full-frame construction that makes its Yukon big brother such a beefy workhorse - does not mean that this SUV rides like a truck. Quite the contrary, the Envoy is smooth and refined in a way that would have been unthinkable just a few years ago. Of course, the market in which the Envoy competes has become packed with excellent choices, with everyone from Acura to Mercury entering the fray. We drove an Envoy SLE 4WD to find out how it stacks up. Full Review <<http://www.autoweb.com/autoprofiles/envoy.htm?uo=32469>> >

Partial Draft of Paper for Friday's Conference Call

Sender	charles.yeung@enron.com
Recipients	['sscott3@enron.com', 'jhughes@elcon.org', 'janderson@elcon.org', 'mbennett@epsa.org', 'andy.rodriquez@enron.c...]
File	shapiro-r/all_documents/1677.

This document, although lengthy, contains insight to what NERC's BOT may be asked to endorse as far as establishment of a NERC position on reliability standards and market practices. It also has implications on how to split the baby between NERC and GISB.

I suggest all to review this draft and be ready to provide the MIC feedback when it appears on their agenda. I am unsure if it will show up in the July meeting, perhaps Terry Lane of Dynegy, who is on the subcommittee that put this together can provide us with more info.

Mark, please forward this to the EPSA-NAERO group list.

Thank You Charles Yeung 713-853-0348

Subject: Partial Draft of Paper for Friday's Conference Call

Attached is a partial draft of a MIPS paper addressing the process for MI and Commercial practices.? It got a little more complicated than I anticipated so it is not finished.? However, I did outline the unfinished sections so you can get an idea of how it is supposed to finish.? I will try to get it completed before the call so you can see the whole paper.? I would appreciate your comments on the call.

For the additional items that the MIPS is presenting to the MIC, please refer to Agenda Item 7 in the MIC package.? The MIC package is at following URL: http://www.nerc.com/~filez/micmin.html

FW: Regulatory Overview

Sender	l.petrochko@enron.com
Recipients	['richard.shapiro@enron.com']
File	shapiro-r/broadband_services/38.

Rick,

FYI. I was asked to put this together for Jim Fallon by Scott Manuel, Frank McGuiness and Rus Woody. I am providing the same analysis to Kay Mann, et. al., for purposes of PROJECT THUNDERDOME. This is a strategic reassessment of where new EBS businesses should reside relative to existing (i.e. content and network). I am happy to give you a briefing on this if you desire. I have schedule time to discuss with you next week. Thanks.

Mona

File	shapiro-r/discussion_threads/717.

MEMORANDUM

TO: Regulatory Affairs Committee Power Marketers Working Group

FROM: Jim Steffes, Regulatory Affairs Committee Chair Bob Reilley, Power Marketing Working Group Chair Julie Simon, Vice President of Policy

DATE: May 29, 2001

RE: EPSA Draft Paper on Assuring Adequate Capacity in a Competitive Market ? Initial Comments Due on Monday, June 4th ? Conference Call on Friday, June 8th at 11:00 a.m. (EDT)

On May 15th EPSA held a workshop on assuring adequate capacity in a restructured market. Following the discussion, EPSA staff offered to draft a short White Paper outlining a possible EPSA position on the issues raised during the discussion. Attached is the first draft of that paper.

To use our time as efficiently as possible, please forward any written comments on the attached draft to Julie Simon at EPSA (by fax at 202-628-8260 or e-mail to jsimon@epsa.org) by Monday, June 4th. We will then circulate a revised draft before a conference call on Friday, June 8th at 11:00 a.m. (EDT). To access the conference call, dial 1-800-937-6563 and ask for the EPSA/Julie Simon call. If you have any questions or concerns, please contact Julie at 202-628-8200.

Proposal

Sender	steve.montovano@enron.com
Recipients	['richard.shapiro@enron.com', 'Steve Montovano (E-mail)' <smontova@enron.com>]
File	shapiro-r/value/18.

Rick - FYI - I was responsible for bring this company to David Cox and setting up the meeting referenced in the proposal attached. At that meeting Cox basically offered UT&S a 10% commission if they could bring a customer to EBS. Based on conversations that I have had with John DiDario, he has several customers to bring. Revenues on 1 customer, on a 5 year deal exceeds \$150 million. I am concerned about feedback that I am getting about our "network". I will discuss with you when I get back from vacation. On a related note, I am in the process of setting up a meeting between EBS and Global One (France Telecom). GLocal One has indicated that they are interested in "all the bandwidth capacity" that we have to offer. I hope one or both of these close! Steve ----- Forwarded by Steve Montovano/NA/Enron on 04/02/2001

RE: Crude Oil Inventory

Sender	richard.shapiro@enron.com
Recipients	[rita.hartfield@enron.com]
File	shapiro-r/deleted_items/339.

Thanks!

-----Original Message-----

From: Hartfield, Rita Sent: Friday, October 19, 2001 3:26 PM To: Shapiro, Richard Subject: RE: Crude Oil Inventory

They are separate reports that cover the same time period. API is put out by the American Petroleum Institute and is issued on Tuesday afternoon. EIA puts out their numbers on Wednesday. The weekly numbers reported in the two reports often vary and sometimes this variance is significant but over time the numbers in the two reports fall back in-line with one another.

-----Original Message-----

From: Shapiro, Richard Sent: Friday, October 19, 2001 3:12 PM To: Hartfield, Rita; Linnell, Elizabeth Subject: RE: Crude Oil Inventory

Are the API and EIA reports separate? cover same timeframes?

-----Original Message-----

From: Hartfield, Rita Sent: Friday, October 19, 2001 2:57 PM To: Shapiro, Richard; Linnell, Elizabeth Subject: Crude Oil Inventory

US crude oil inventory information is compiled by API and by the US EIA DOE. Both utilize information collected from company surveys along with their own estimation methodologies. A recent EIA DOE report (attached) lists the information forms from which the EIA DOE collects data. A summary of API sources of data, collecting and auditing procedures, and estimation methodology utilized in publishing the API Weekly Statistical Bulletin can be obtained from API for \$52. Please advise if you wish to obtain this API report.

Gentlemen: . While I'm still at Enron(one of the few), I am diligently developing future opportunities for myself in the wake of the unfortunate events at Enron. Since I can't help but read great things about your company, I thought I would send you a short note to determine if Anadarko might have any interest in someone with a strong government/regulatory affairs background. While I'm assessing a few offers at the moment, they are out of Texas and would require relocation. My desire is to stay here. I'm good at what I do; my style at Enron was very different from the reputation of the company(low key, but effective); and the idea of applying my skills in a new setting is quite appealing. I know Anadarko has constant interaction with varrious facets of government, but I don't fully know how you currently staff those needs and whether someone with my background could be of use...Thus my note. Below are various ways to contact me if there is any interest. Thanks for taking the time to consider this note and Happy Holidays...Rick Shapiro

Gentlemen: . While I'm still at Enron(one of the few), I am diligently developing future opportunities for myself in the wake of the unfortunate events at Enron. Since I can't help but read great things about your company, I thought I would send you a short note to determine if Anadarko might have any interest in someone with a strong government/regulatory affairs background. While I'm assessing a few offers at the moment, they are out of Texas and would require relocation. My desire is to stay here. I'm good at what I do; my style at Enron was very different from the reputation of the company(low key, but effective); and the idea of applying my skills in a new setting is quite appealing. I know Anadarko has constant interaction with varrious facets of government, but I don't fully know how you currently staff those needs and whether someone with my background could be of use...Thus my note. Below are various ways to contact me if there is any interest. Thanks for taking the time to consider this note and Happy Holidays...Rick Shapiro

The comment about loose lips was a general comment, I felt the undertone, in general, was to leave marketers out of the process.

Doug Sewell Enron Midwest Origination Work: 713-853-6337 Fax: 713-646-8272

-----Original Message-----

Andy. Can you put a letter with the facts. As a starter I want to send a letter directly to NERC raising our concerns. There should be no limitations that hinders the marketers ability to engage in commerce.

Jose

From: Andy Rodriquez/ENRON@enronXgate on 10/23/2001 12:29 PM To: Charles Yeung/ENRON@enronXgate, James D Steffes/ENRON@enronXgate, Richard Shapiro/ENRON@enronXgate, Jose Bestard/ENRON_DEVELOPMENT@ENRON_DEVELOPMENT cc: Doug Sewell/ENRON@enronXgate, Christi L Nicolay/ENRON@enronXgate

Subject: NERC and Security

NERC is apparently moving forward aggressively on their initiative to restrict access to market information. Doug Sewell, who participates on the MAIN Planning Committee, was on a call this morning in which members of MAIN and NERC's Virginia Sulzberger discussed ways to limit access to information. A new disturbing angle was that apparently, some members indirectly alleged that marketers have "higher turnover" and "loose lips," and were using this as a scare tactic to indicate why the information should be restricted (potentially even from legitimate consumers like us).

If I remember correctly, we were going to contact NERC to let them know our opinions on this issue. It sounds like perhaps they are not being addressed sufficiently. Doug has suggested we should bring it up at the MAIN MIC meeting; do we want to begin a campaign to protect our access to this data? I think that without getting more involved, this will be yet another industry "de facto" standard that is created under the assumption that silence is consent (even if we're not told about the changes). We should probably talk about this all today on our conference call.

File	shapiro-r/all_documents/325.

Attached is a description of the action plan for the Load Curtailment efforts in CA, ME, and NY this Summer. If someone from the deal team has not yet contacted you, they will be very soon. If not, let me know.

The general idea is that we will play against the ISO Load programs with our new technology (Sue I know about Cal ISO credit risk). EES believes that with the tremendous amount of volatility this may be a great product.

Fred - I'll leave it to you to set up either one big call or some other process to contact appropriate Govt Affairs people.

Jim

To: Linda Robertson/NA/Enron@ENRON cc: Richard Shapiro/NA/Enron@ENRON Subject: Introductions

Dear Linda,

I haven't been formally introduced to you, although I have seen you several times in the Houston offsites. In the past 16 months, I have been working in Government and Regulatory Affairs group covering EBS global telecommunication issues. Currently, I am on secondment in London to help Jan Haizmann with European and Asian telecommunication licensing procedures. This September, I will be starting the Johns Hopkins School of Advanced International Studies (SAIS) master program in Washington DC. I have a strong interest in staying with the government affairs group and believe that a part time position in the Enron DC office will be complementary to my studies at SAIS. Rick Shapiro encouraged me to contact you directly, suggesting that you might be willing to meet with me and to help me identify the employment opportunities in the DC office.

It may be helpful for you to know that I have been working for the past two year for Enron. While in Houston, I had the chance to work on number of interesting projects, including providing financial modeling support for the former Enron International group. I am familiar with deregulation process, especially with the recent developments in the telecommunication field. In addition, working in the London office have provided me with the opportunity to working with the EU Commission, the UK Parliament and other lobbying groups. I believe that my experience in Enron will enable me to play a proactive role in the DC office.

I will be in touch with you by phone in a week. Next month, I will be passing through DC & would like to set up a short 20-30 minute meeting with you at a mutually convenient time.

I understand you are busy and appreciate your time. I look forward to talking with you soon.

Sincerely,

Xi Xi Enron Regulatory & Government Affairs 40 Grosvenor Place London SW1X 7EN +44 (0)207 783 2514 office +44 (0)207 783 1640 fax +44 (0)777 092 5042 cellular

EBS Office of the Chairman Sent by: EBS Announcements 07/12/01 11:10 AM To: EBS Worldwide cc: Subject: Changes at EBS

To: All EBS Employees Worldwide

From: EBS Office of the Chairman

Subject: Changes at EBS

Date: July 12, 2001

Since its inception, EBS has seen dramatic changes in the communications industry. The growth and opportunity anticipated in this industry two years ago has significantly changed in the past nine months. While Enron remains committed to extending our business model into telecom, we need to quickly respond to these changes in the market to achieve our objectives.

The Enron Corp. earnings release issued today states that we will be adjusting the EBS business to better match the revenue opportunities. This means that we must reduce our overall cost structure and better focus our commercial efforts.

To achieve this, we will take the following steps:

EBS will become a business unit within Enron Wholesale Services. This will involve the integration of all EBS commercial support functions into those units within EWS, and will enable us to better manage the resources and costs of the support functions.

All EBS commercial functions will be consolidated into the following units:

Europe - headed by Matthew Scrimshaw Asia - headed by Anthony Duenner Americas - headed by Rich DiMichele We will consolidate the North American EBS origination teams into one group, led by Stewart Seeligson. North American trading and risk management will continue to report to Paul Racicot. Paul will also oversee the global portfolio from a risk management perspective.

Global Network Operations will continue to report to the EBS Office of the Chairman.

All EBS asset positions will continue to be reviewed and repositioned to most effectively meet the future needs of EBS.

The Portland office will be closed by October 1. Portland employees will be advised by their supervisors of their relocation or redeployment status by July 27.

These changes will affect many EBS employees through relocation, redeployment, severance or movement to another part of Enron. We have not yet worked out all of the details of these changes, but your supervisor will apprise you of how this affects you as soon as possible, and no later than July 27.

File	shapiro-r/all_documents/492.

Mark/Kelly:

Attached is an article on Enron and our "Clean Power Group" coalition on multipollutant Clean Air Act legislation. This is much more accurate than the WSJ article that ran last Friday, particularly on the point of CO2 caps. If you receive further follow-up calls or inquiries from reporters, please feel free to refer them to me. If they really want a "coalition" source, you can give them Joel Bluestein's number at Energy & Environmental Analysis -- 703-528-1900.

Jeff

Electric Power Daily - May 8, 2001

Companies work to design plan for regulating air pollutants

A coalition of energy companies is devising a framework for regulating air pollutants in a way that encourages new technologies and protects the environment without requiring exorbitant investments, but whether there is momentum for a regulatory overhaul remains to be seen, according to one consultant to the group.

Enron, El Paso Corp., Trigen, Calpine and NiSource are working on a multipollutant strategy to replace the "piecemeal" regulatory scheme at the Environmental Protection Agency to reduce sulfur dioxide, nitrogen oxide and mercury emissions from power plants, said Joel Bluestein, president of Energy and Environmental Analysis in Arlington, Va. The coalition's approach could include carbon dioxide emissions if EPA moves to regulate that pollutant, he said.

The coalition is meeting with lawmakers, the administration and industry leaders in effort to garner support, said Bluestein.

"We can have secure diverse energy supply and a strong economy if we structure the regulatory system properly," said Bluestein. "What we are trying to do is present a framework to ensure a clean environment with less regulation, to promote new technologies and all fuels-including conservation and renewables, gas and coal-[and] to provide the energy we need at reasonable prices."

The industry hoped to capitalize on momentum last year to move the federal government toward a comprehensive yet flexible emissions reduction program, but when President Bush reversed his campaign position supporting restrictions on CO2 in a multipollutant approach, that "changed the landscape a little bit," said Bluestein. Still, he said, the "same drivers are still there."

EPA has an acid rain program to address SO2 and a state implementation plan program to curb NOx and in December it announced plans to develop mercury emission restrictions for power plants. The agency does not regulate CO2.

Thanks for asking about the ongoing CA ISO saga. To be perfectly blunt, ISO is breaching many provisions of its tariff and FERC just stands by and watches. Here are the top 5.

1. governance -- has NEVER complied with the FERC rulings going back to the beginning in 1998 to be independent of state influence -- as of Jan 2002, the CA ISO has been under the complete control of the Governor
2. creditworthiness -- has been under FERC orders to have a creditworthy counterparty for EVERY transaction in its markets. The CA Dept of Water resources said it would be that counterparty. DWR is also getting wads of money from the retail customers (via daily wire transfers by the utilities). Yet the ISO has only paid about 8% of the money it owes suppliers -- where's the money?
3. illegal dispatching -- story by Jason Leopold a few days ago said that the ISO had ordered Southern CA Edison to reduce its baseload Mohave coal plant so it could buy expensive power from DWR -- this is something we've suspected but have had difficulty getting data on.
4. out-of-market calls (OOM) -- ISO is obligated to use the least expensive power from its market to meet load. If not enough power is available and reliability is threatened, then the ISO can go out-of-market" and pay whatever it takes -- i.e. is not limited by the price cap -- to keep the lights on. We believe that the ISO is doing this even when loads of cheap power is available in the market. The ISO is going out and buying very expensive power from DWR -- this covers up DWR's bad contracts AND spreads the costs to all parties (not just DWR and the investor-owned utilities). Further, DWR can create the ISO emergency and the need to make OOM calls in the first place simply by failing to schedule sufficient power to meet its load (even though it is swimming in excess power). How sick is that?
5. secrecy and lack of information -- this has always been an issue but since the takeover by the Governor it is even more difficult to get information and less data are appearing on the ISO's web site for public review. I predict this will continue to head downhill.

Feel free to call with questions. I can go on for hours like this.

Regards, Sue Mara (415) 782-7802

US Transmission Industry Report

Sender	eismail@energyinfosource.com
Recipients	[]
File	shapiro-r/deleted_items/1216.

Energy Info Source is privileged to offer its best-selling US Transmission Industry Report.

http://www.energyinfosource.com/products/product.cfm?report_ID=6

The report is a comprehensive 550-page, four-part study of the U.S. Transmission industry. The report takes a wide-ranging look at changes in the industry with a heavy emphasis on FERC's drive for RTOs. A major component of the report is detailed analyses of the FERC-mandated RTO filings.

Topics covered in Volume One (published November 2000) include: - The History of Transmission - Impact of FERC Orders 888/889 on Transmission - FERC's Push Toward ISOs and RTOs through the Merger Approval Process - Creation and Development of TransCos and GridCos - Analysis of FERC Final Rule: RTO 2000 - Detailed Discussion, Analysis and Comparison of October 15, 2000 RTO Filings - including Innovative Rate Treatments - Listing of All FERC Dockets and Policy Statements Regarding RTO Participation - Easy Access Side-by-Side Comparison of RTO Filings - Maps of Territories

Topics covered in Volume Two (published January 2001) include: - Detailed Discussion, Analysis and Comparison of January 15, 2001 RTO Filings - including Innovative Rate Treatments - Discussion of FERC Action on October 15, 2000 RTO Filings - Analysis of Supplemental RTO Filings by Major TransCos - Summary of the FERC Investigation into the Bulk Power Markets - Tracking of California's Wholesale Market Problems - Summary of NERC Reliability Assessment 2000 - Easy Access Side-by-Side Comparison of RTO Filings

Topics covered in Addendum One (published April 2001) include: - Analysis of FERC Conditional Approval of GridSouth TransCo - GridSouth's Request for Clarification on FERC Order - Analysis of FERC Conditional Approval of GridFlorida TransCo - Analysis of FERC Conditional Approval of RTO West - Analysis of FERC Rejection of Southern Company's SeTrans GridCo - Analysis of FERC Directed Changes to Southwestern Power Pool/Entergy Hybrid RTO Proposal - Analysis of FERC Approval of Alliance Compliance Filing - Update on Alliance and Midwest ISO Settlement

Topics covered in Addendum Two (published October 2001) include: - The History of FERC RTO Activities - Analysis of Southeastern RTO Mediation Report - Analysis of Northeastern RTO Mediation Report - Update on RTOs - Alliance and Midwest - Update on TransCos - ITC, TransLink, and WestConnect - Easy Access Side-by-Side Comparison of Southeastern RTO Alternatives

The report comes in Hardcopy printed form or as an Adobe Acrobat PDF file sent via E-mail or on CD ROM. The entire four part set is only \$999.

For more information about the report or to order, click on the following link or call us at 888-986-2250 (303-986-7449 in Canada or overseas). We accept Visa/Mastercard/American Express.

Re: Angelides Investor Memo - Timetable Update -- says CPUC vote

Sender	jeff.dasovich@enron.com
Recipients	[' susan.mara@enron.com ', ' karen.denne@enron.com ', ' harry.kingerski@enron.com ', ' james.steffes@enron.com ']
File	shapiro-r/all_documents/1700.

Thanks, Sue. FYI--this new schedule was discussed a lot last week, and apparently was a big part of the meeting that occurred with Davis' people and Angelides last Thursday nite. It was a move to buy time to try and get a comprehensive settlement in place in the legislature (i.e., core/noncore).

In addition to buying time to save Direct Access, it also gives Angelides more time to get the bonds lined up, which seems to be an increasingly challenging task---there's growing speculation that the issuance will be much more difficult than Angelides has thus far let on.

That said, I need to check around, but there is some chance that the plan/agreement is that the PUC decisions would go out well in advance of August (with effective date being August), which would then provide enough time to let the expedited "appeals process" under (SB37?) run its course in time for the issuance in Sept/Oct. In short, we'll need to remain vigilant energized because there's a chance that the decisions to which Angelides refers in the memo could be up at the Commission sooner rather than later. This is what I was hearing last Friday, but perhaps things have changed and now there's more time. I'll check and report back.

Finally, simultaneous with those actions, folks are supposed to be putting the core/noncore agreement into legislative language. I'll report back as soon as I have more information on that.

Best, Jeff

Susan J Mara 07/03/2001 11:27 AM

To: Michael Tribolet/ENRON@enronXgate, James D Steffes/NA/Enron@Enron, Richard Shapiro/NA/Enron@Enron, Harry Kingerski/NA/Enron@Enron, Jeff Dasovich/NA/Enron@Enron, Paul Kaufman/Enron@EnronXGate, Karen Denne/Corp/Enron@ENRON cc: Subject: Angelides Investor Memo - Timetable Update -- says CPUC vote not needed until mid August

The memo to investors says that a new law will take effect on Aug 13 that puts in place shortened appeal times at the CPUC. The memo says that the CPUC does not need to act on the key issues, including suspension of DA, until Aug 13 or later. It also says the bonds are now to be sold in Sept-Oct. The memo states that the CPUC, Governor, Treasurer, etc. have agreed with the new timetable.

Great. I'll look forward to visiting with you as soon as Notre Dame is signed. The organizations should be a great fit as it relates to regulatory and legislative affairs. Best regards. Ken

"Shapiro, Richard" To: <ken.randolph@dynegy.com> <Richard.Shapiro@ cc: enron.com> Subject: Notre Dame

11/06/01 07:42 AM

If Notre Dame is brought to closure(my hope is that it will), once that occurs, I'd like to figure out with you, or whomever you deem appropriate from Dynegy a couple of things: 1) We currently have 65 government affairs professionals at Enron around the globe(55 in North America, including the Washington office)..I anticipate making significant job cuts early in the transition and would like to make sure that the cuts are being done with the merged company fully in mind; 2) As you have seen from our disclosures, we have many more regulatory approvals associated with the Enron Assets as compared to Dynegy's- I'd like to work with you or whomever you designate to determine the most efficient way to process these filings through to approval. My intent with this e-mail is not to further burden the next couple of critical days, but merely to raise the issues so we're in a position to talk and meet soon thereafter. I think you will find in the government affairs professionals here the same commitment to excellence and integrity which characterizes the folks I've come into contact with at Dynegy. I'll wait to hear from you. Good luck in the next few days.

Rick,

I have spoken with Jeff's office and he will be in Houston on May 30th. At the moment he has an 8:30-9:30, 9:45 "E-Speak" appointment and a 3:00-4:00pm floor meeting. Joannie also mentioned that PR is trying to schedule some interviews and May 30th is one of several days they are looking at. Joannie will check with PR and get back with me later today as to a possible meeting time.

I will ask my assistant to check on Jeff's schedule and try to be there myself that day. (If not Jeff, I'll aim for Greg Whalley).
Thanks.

Subject: Visit of Lord Mayor Sir David Howard, Request to visit Enron Tra ding Floor at 3 PM Wed 30 May

Dear all -- Please accept my apologies, but I have clearly caused some confusion regarding the venue for the Mayor's visit to Enron. The Mayor and his entourage will be visiting the US in May and therefore they are seeking to take a tour of our trading floor in the Houston office, not London.

In terms of who the Mayor should meet with while he is in Houston, I feel we should ask a senior representative of the company to host him on a tour of the trading floor. Also, if he is available and willing, perhaps we should see if Jeff Skilling could meet with the group for a few minutes? FG

FYI -- Please see the request below regarding a proposed visit to Enron's trading floor at the end of May by the Lord Mayor of the City of London, which has come in to Carrie Robert from the British Consulate in Houston. I would see this particular request as warranting a high level of attention and would welcome your views on who would be the best host for the meeting/tour, before I respond to Carrie.

Many thanks, Fiona ----- Forwarded by Fiona Grant/LON/ECT on 10/05/2001 07:29

Hi Fiona - Below is information on another request to visit Enron. Please let me know if this is high level enough and the benefit for Enron if we accomodate their request.

Thank so much for your assistance. Carrie

Carrie Roberts, Manager of Visits Enron Trading Floor

Dear Carrie

Further to our telephone conversation today, the visitors from London are:

Lord Mayor, Sir David Howard Sheriff Nigel Branson Neill O'Connor - Private Secretary Peter Lisley - Press Officer They will be accompanied by our Consul General, Iain Murray.

The purpose of the visit by the Lord Mayor is to promote the City of London as the world's leading international financial centre.

We are hoping that a visit to Enron Trading Floor at 3 PM on Wednesday, 30 May will be possible and I look forward to hearing from you. Please let me know if you require any further information.

Congratulations to you also -- its going to be a great combination!!! I would suggest getting together Tuesday morning at 8:30 am over here if that works for you. If you have org charts, comp information and budget info that would facilitate the discussion. We can get with Peter Esposito after you and I meet. I also need to review the Legislative shop (we are very thin there) - if that function does not report to you I can get with Steve Kean on that. Have a great weekend! Ken .

Congrats! You all minded the store..we didn't. My sincere hope is that as many people as possible in each company benefit from this acquisition. Please let me know when you and/or Peter want to sit down or if you'd like me to contact Peter directly. Thanks and congrats again.(I can be reached at 713-853-3407(w), 936-321-7153(h),281-831-3749(c)).
