FW: CAISO Notice - PwC Operational Audit 2001

I wish I had more time to review this. Of 62 different elements of the audit, PwC found the CAISO to be "non-compliant" with 31 elements, e.g., no operating procedure, or, more often, in direct violation of the tariff. Lots of problems were found with the CAISO actual operation in dispatching real time energy, dealing with CERS, and setting the ex post price.---sch

Hello Ryan,

My name is Garrett Stephenson and I am a executive recruiter in the Houston area. I currently have a few opportunities available in ERCOT and WSCC trading and was wondering if you would be interested in looking at these opportunities or if you knew someone that would. Please let me know a good phone number and time to contact you. I am representing a great company who is offering great benefits, base, and 17% of the book back to the traders.

Thanks.
