Investor Relations To: Everyone_EOGR, Everyone OES Houston cc: 04/23/2001 Subject: EOG RESOURCES REPORTS
OVER SEVEN PERCENT INCREASE 06:02 AM IN U.S. NATURAL GAS PRODUCTION AND RECORD FIRST
QUARTER NET INCOME AVAILABLE TO COMMON OF \$212.5 MILLION OR \$1.79 PER SHARE

FOR IMMEDIATE RELEASE: Monday, April 23, 2001

HOUSTON - EOG Resources, Inc. (EOG), an S&P 500 Index company, today reported record first quarter net income
available to common of \$212.5 million, or \$1.79 per share compared to net income available to common of \$38.8 million,
or \$.33 per share in the first quarter a year ago.

"At a time when the industry as a whole is struggling to maintain flat gas production, EOG increased U.S. natural gas
production by over seven percent. This demonstrates our ability to continue to grow our production organically," said Mark
G. Papa, chairman and chief executive officer. "Our operations and drilling inventory are in the best shape ever; we are off
to a great start in 2001."

Versus the same quarter a year ago, EOG's North American daily natural gas production increased 4.2 percent, crude and
condensate production increased 7.4 percent and natural gas liquids production decreased 31.4 percent. This resulted in
overall EOG North American production growth of approximately four percent, consistent with the 2001 full year target.
Based on shares outstanding, production per share increased approximately five percent in North America.

"EOG has significantly ramped up its North American activity," Papa noted. "Over the last year, our acreage position
(including trades) has increased over 50 percent, our geological and geophysical headcount has grown by over 20 percent
and EOG currently has 50 percent more rigs drilling than this time last year. To position EOG for the future, North
American capital expenditures increased during the first quarter to \$185.0 million, compared to \$85.3 million in the first
quarter 2000."

Results from the quarter further solidify EOG's focus on organic growth and its long-term financial strategy. EOG
continued to strengthen its financial structure with the following:

Reduced the number of common shares outstanding by approximately 700,000 to 116.2 million,

Paid down \$214.1 million of debt, reducing the debt to total capitalization ratio from 38.3 percent at year end 2000 to 29.6
percent at the end of the first quarter 2001 and

Increased the annual common dividend by 14 percent from \$.14 to \$.16 per share.

EOG's first quarter conference call will be available via live audio webcast at 9:30 a.m. Central Time (10:30 a.m. Eastern
Time) on Monday, April 23, 2001. To listen to this webcast, log on to www.eogresources.com. The webcast will be
archived on EOG's website for 14 days.

EOG Resources, Inc. is one of the largest independent (non-integrated) oil and gas companies in the United States and is
the operator of substantial proved reserves in the U.S., Canada and offshore Trinidad. EOG Resources, Inc. is listed on
the New York Stock Exchange and is traded under the ticker symbol "EOG."

This press release includes forward looking statements within the meaning of Section 27A of the Securities Act of 1933
and Section 21E of the Securities Exchange Act of 1934. Although EOG believes that its expectations are based on

reasonable assumptions, it can give no assurance that such expectations will be achieved. Important factors that could cause actual results to differ materially from those in the forward looking statements herein include, but are not limited to, the timing and extent of changes in reserve quantities and commodity prices for crude oil, natural gas and related products and interest rates, the extent of EOG's success in discovering, developing, producing and marketing reserves and in acquiring oil and gas properties, uncertainties and changes associated with international projects and operations including reserve estimates, markets, contract terms, construction, financing availability, operating costs, and political developments around the world, and conditions of the capital and equity markets during the periods covered by the forward looking statements.

Wild Goose Storage and the Ruby Pipeline

Sender	benledene@aec.ca
Recipients	['bbrunel@smud.org', 'avallow@lodielectric.com', 'angela@cook-inlet.com']
File	south-s/discussion_threads/57.

The following news release comes from today's Gas Daily. Feel free to call us at Wild Goose Storage Inc. to discuss what opportunities are available to align your storage needs with this new pipeline capacity. Keep in mind that our open season for new storage capacity at Wild Goose closes on May 22. For information contact either Ben Ledene with Wild Goose in Calgary at (403) 266-8192 or Chris Price and Mark Baldwin with Interstate Gas Services in California at (925) 243-0350.

From today's Gas Daily: Copyright , Financial Times Energy, 2001

Colorado Interstate Gas is holding an open season through May 31 to evaluate whether it should add capacity from the Rockies to Nevada and northern California markets.

The project, called the Ruby Pipeline, would total up to 750 million cfd of incremental capacity and would begin service in late 2003. Bid sheets can be obtained from CIG's Web site at www.cigco.com/business/colorado/index.html.

CIG said gas production from the Rocky Mountain supply basins "is projected to increase dramatically over the next few years and the Ruby Pipeline Project will provide access to these supplies." The Ruby project will consist of approximately 850 miles of 30- inch and 36-inch pipeline running from western Wyoming through Utah to Elko, Nev., to points of delivery near Reno, Nev., Yuba City, Calif., and Sacramento, Calif.

CIG said it anticipates interconnecting with the northern California gas storage facility of Wild Goose Storage, which is currently holding its own open season to evaluate expanding its facility.

Ruby is considered the second phase of a project involving CIG and Questar. The first phase, which entails an agreement between Questar and CIG, involves Questar developing a 74-mile looping project in Utah. Questar plans to sell 50% of the ownership interest in the phase I project to a CIG affiliate, CIG Gas Supply, on the day the phase I facilities go online. CIG Supply will then lease its 50% interest in the project back to Questar under a 33-year lease, which would give Questar full operational rights.

For more information about the Ruby project, contact Craig Coombs at 719-520-4387, Ed Miller at 719-520-4305, or Tom Dobson at 719-520-3792. RW
