CAISO Notice: PG&E Expansion Plan Stakeholders Meeting #5

Sender	crcommunications@caiso.com
Recipients	['20participants@caiso.com']
File	stokley-c/chris_stokley/iso/mrkt_info/5.

PG&E is hosting its fifth stakeholders meeting for the 2001 PG&E Transmission Expansion Plan on September 17 and 18, 2001 in San Francisco, CA. The purpose of this meeting is to present the study group with the draft 2001 expansion plan. The fifth stakeholder meeting has been divided into two days: Sept. 17 to present Bay Area Plans and Sept 18 to present non-Bay Area Plans.

Date: Monday , Sept 17, 2001 Subject: Stakeholders Meeting #5 - "PG&E 2001 Electric Grid Expansion Plan - Bay Area Plans" Time: 10:00 a.m. to 4:00 p.m. Location: 77 Beale Street, Conference Room 308 San Francisco, CA 94177

Date: Monday , Sept 18, 2001 Subject: Stakeholders Meeting #5 - "PG&E 2001 Electric Grid Expansion Plan - Non-Bay Area Plans" Time: 10:00 a.m. to 4:00 p.m. Location: 77 Beale Street, Conference Room 308 San Francisco, CA 94177

In order to ensure enough handouts please email or call your RSVP to Ledy Torres (dst2@pge.com <mailto:dst2@pge.com> or 415-973-1392) by Monday, September 10, 2001. If you have any additional questions about this meeting, please contact Mark Esguerra (pme8@pge.com <mailto:pme8@pge.com> or 415-973-4380). An agenda and handouts will be sent out soon.

Regards, Mark Esguerra PG&E-Electric Transmission Planning Mail Code N3B P.O. Box 770000 San Francisco, CA 94177

CSC / Contract / RPS Matrix

Sender	bamiller@kpmg.com
Recipients	['galvan@enron.com', 'rdwilson@kpmg.com', 'wilson@enron.com', 'steven.fisher@enron.com', 'chris.stokley@enron....']
File	stokley-c/chris_stokley/projects/ees_/banding/kpmg/33.

Attached is a matrix of our discussion from Tuesday where we described the result of finding contracts in each of the different areas (ie. CSC / Avista, RPS or the paper contract).

In the original version of this table CSC and Avista were separated based on an assumption that there should be feeds between the two systems. After the meeting at 11:00 on 10/4 this assumption was changed, such that CSC and Avista are both sources of billing / usage data.

Please call me at 832 465 5443 if you have any questions.

Brett Miller KPMG LLP Information Risk Management

Baseline / Bandwidth	
Sender	bamiller@kpmg.com
Recipients	['galvan@enron.com', 'chris.stokley@enron.com', 'annieleung@kpmg.com', 'leung@enron.com', 'jgalvan@kpmg.com']
File	stokley-c/chris_stokley/projects/ees_/banding/kpmg/34.

Chris as discussed this morning attached is the scope document.

This morning's meeting has helped in defining the types of calculations / reports that will be needed in the database.

Outcomes from the meeting are: Verify transaction economics for newer contracts Power Baseline team to compile data so that you can get an indication on the number of contracts that have baseline information for California. Data relating to material change will be captured and we will attempt to identify trends in the data captured. Process flow to be prepared for baseline / bandwidth capture

Items that we are waiting on from you are: Confirmation that we will be basing calculations for bandwidth on Project Ranger data Copy of some sample MDMA data for use in constructing the database. Confirmation of the scope described in the attached document.

Call me if you have any questions at 832 465 5443.

Regards

Brett Miller KPMG LLP Information Risk Management

RE: Pricing

Sender	chris.stokley@enron.com
Recipients	['jeff.richter@enron.com']
File	stokley-c/chris_stokley/sent/367.

Jeff, Thanks for the e-mail. One question, why is the PG&E curve lower in price going forward than the wholesale curve price.

-----Original Message-----

From: Richter, Jeff Sent: Thursday, September 06, 2001 9:33 AM To: Stokley, Chris; O'Neil, Murray P. Subject: Pricing

Chris and Murray,

Here is the embedded generation curve vs current day wholesale prices through March - 02. We cannot break down what the generation cost is by primary, secondary, and transmission. Hope this is helpful.

Jeff

From: Richter, Jeff Sent: Tuesday, August 28, 2001 8:50 AM To: Chen, Andy; Perry, Todd; Swain, Steve; Savage, Gordon; Bresnan, Neil; Leonard, Chris; Dubash, Geiv; Datta, Samir; Donovan, Terry W.; Stokley, Chris; O'Neil, Murray P.; Coffing, Timothy; Frost, David; Oh, John; Oh, Jeffrey; Ahn, Chris; Watts, Christopher; John, Saji; Segura, Stephanie Cc: Chatterton, Jill; Filer, Beverly Subject: Administrative Assistants for EWS

Hello Everyone,

Over the past week Debra Davidson and I have been discussing how to operate EWS from the administrative aspect since we have individuals from multiple groups within ENA. As of today, I would like everyone's travel, expense reports, cell phones, and/or any other administrative needs to go through the following people.

Beverly Filer is your Houston Administrative Assistant. She is dedicated to providing EWS excellent administrative support while you are in Houston. This includes preparing your expense reports, arranging meetings, powerpoint presentations, etc. Beverly's phone number in Houston is 713/345-3134.

Jill Chatterton is your Portland Administrative Assistant . She is dedicated to providing our EWS group excellent administrative support, whether you are in Portland or Houston. This includes preparing your expense reports, providing support with cell phones, arranging meetings, making travel arrangements, etc. Jill's phone number in Portland is 503/464-8216.

Please contact Jill and/or Beverly for ALL of your administrative assistant needs and refrain from asking your previous assistant for support. Using Jill and Beverly as our assistants will mean they will have more information about our organization which will make them more effective for all of us. If you have any questions, please contact me.

File	stokley-c/chris_stokley/murray/12.

Jeff,

Based on what I have seen in the detail to this point. The primary reason for the big hits have been due to what appears to be penalty charges associated to under scheduling. When Enron De-DASR'ed all of the customers back to the utility in Jan. EES was not including them in their schedule. However, the customers were not yet physically moved back over to the utility until a later date.

The title on this \$40MM has been Ancillary Services. This is not a true representation of what is being discussed. We are actually talking about all Market Transmission charges which have been allocated to EES based on their physical load.

The big hits in the months in question are more related to Neutrality/Penalty charges related to A/S.

At this point I have only spend about 1hr looking at the detail. Chris Stokley will be working with the EES Retail Volume Management group and EPMI Volume Management group today to have them look into a couple of questions regarding detail.

We should have an update for everyone by Friday to let you know the primary reasons flash to actual variance and lateness of reporting.

As for when and what should be reported as a DPR adjustment. When: Jeff and Tim need to talk about when they want to see this hit. What: We have already disputed these periods with the ISO. There will be no additional disputes on these settlements. The only thing which may change to impact these \$'s is the fact that the ISO is in the process of recalculating 10/00 - 6/01 and the Market rate will be less most likely when EES was short. This should have a positive impact on what would be booked today.

If you have any questions please let me know.

Hope to have more to update you on by Friday. - MO

Everyone,

I apologize for missing the meeting this afternoon, we had a few fire drills on the desk this afternoon. Maybe I could get a overview from the meeting tomorrow morning.

A few of my questions are:

Are we going to show this hit in Q3? How do we drill down on each bucket? Do we have the actual meter data for each customer and their site? How do we prevent such variances occurring in the future?

Have a great night, Jeff Richter

Sender	chris.stokley@enron.com
Recipients	[kate.symes@enron.com]
File	stokley-c/chris_stokley/sent/504.

Kate, Returned your call, but your phone would not put me through to voice mail. Any help you can give Pam would be quite beneficial and appreciated by both her and I. She is getting zero help down here and that is why I pointed her your direction. I have not dug down in the process, but it seems to be way to manual for all parties involved. I just want the process improved so that it takes some of the manual error work out the flow. Give me a call at 713-345-6120 if you need anything.

Thanks Chris

Gang, I want to make it very clear that the questions I am having Pam ask are not meant to put anyone one on the defensive. From what I can tell so far, we have a process that is at best inefficient and at worst broken. Pam will be asking a lot of questions going forward because she does not know your process and she is on task to learn it. Please have patience and offer guidance on how we can get these issues resolved so we can better put to use everyone's time. We are all paid to fix problems, not point fingers. I have a lot of faith in the people in the Portland office, that is why I am asking Pam to go to you guys for guidance. If anyone has any issues going forward please feel free to contact me at 503-807-8959 or e-mail me.

Thanks Chris

If you can tell me more specifically a) what kind of problems you're running into with the CARP report and our sheets, and b) whether the problems are related to the EES Daily sheet (which outlines day-ahead deals) or the EES Hourly sheet (which outlines real time deals), then I can be of more assistance. As I said in my last e-mail, I've gone over all the variances you've sent, and none appear to be related to hourly deals. I've also attached the reconciliation model I maintain each day so you can see how I've tied out Enpower to the hourly model for every day in September.

Please let me know if I can do anything else to help.

Thanks, Kate Symes Real Time Trading Support Office/503-464-7744 Cell/503-819-2181 Fax/503-464-7996

Kysa/Kate, we are still having problems with the real time sheets and the CARP/Enpower report not tying. Given this, Chris would like to know what group in your office is preparing your Reat-time/Daily excel spreadsheets and is there a contact person for this group?

Thanks,

Pam

CAISO Notification-OASIS Market Simulation

Sender	crcommunications@caiso.com
Recipients	['20participants@caiso.com']
File	stokley-c/chris_stokley/iso/mrkt_info/101.

Market Participants:

The OASIS Market Simulation is unique in the fact that it does not have to be an interactive simulation as other simulations have been. Test Scripts will NOT be required. To offer the OASIS users the maximum assistance during the simulation the following details are outlined:

1. Site Url:

<http://oasisp.caiso.com>

2. Conference Call Number:

Phone # 1-877-670-4111 Passcode 246870 "Open Bridge" Everyday 9-10.

3. Contacts:

Karen Webber - Project Lead - 916-351-2223 Darren Lamb - Project Technical Lead - 916-608-5867 Jim Blatchford-Client Relations - 916-608-7051

4. Data validation dates.

5 day delay. For example, data requested for April 28, 2001 on the new OASIS site will be actually production data from April 23, 2001 of current OASIS site.

Historical date range of reports on the site will be Jan 1,2001 to Mar. 31, 2001. This is valid historical data and will reconcile with production data.

5. Problem resolution process.

Whom to contact ? -- Darren Lamb -916-608-5867

How to contact - First preference is E-mail with specific questions dlamb@caiso.com.

How will response be communicated? Via e-mail and posted to the FAQ.

6. Use of FAQ on the Oasis Prototype will be the primary communication tool. Daily conference calls will address new FAQ's.

CAISO Notice - Outage Coordination Stakeholder Meeting - May 10,

Sender	bwoertz@caiso.com
Recipients	['20participants@caiso.com']
File	stokley-c/chris_stokley/iso/mrkt_info/121.

ISO Market Participants: Attached is an announcement for the May 10, 2001 EOB/CAISO Generator Outage Coordination Stakeholder Meeting to be held from 9:00 to 3:00 p.m. at the Sacramento Marriott - Rancho Cordova. We realize that this meeting is the same day as Market Issues Forum (MIF) and some of you may be interested in attending both meetings. However, the tariff filing deadlines associated with FERC's recent order and other previously-scheduled meetings prevented us from avoiding the conflict. We apologize for any inconvenience this may cause you. If you plan to attend the Outage Coordination meeting, please send your RSVP to Myrna Neeley at mneeley@caiso.com

<mailto:mneeley@caiso.com> before Monday, May 7, 2001. A conference call-in line will also be available as follows: Call In Number: (888) 261-7938 Passcode: 9163512190 Should you have any questions regarding the meeting please contact Myrna at 916-351-2171.

CAISO Notice: SF Study Group Meeting, Oct. 9, 2001

Sender	crcommunications@caiso.com
Recipients	['20participants@caiso.com']
File	stokley-c/chris_stokley/iso/info/23.

San Francisco Study Group Members and Cal-ISO Market Participants, October 9th Meeting - Security Information A meeting of the San Francisco Study Group has been scheduled for Tuesday October 9, 2001. This meeting is being held to discuss both the status of various transmission and generation projects in the San Francisco Area, as well as the initiation of new transmission system studies related to the San Francisco Area. The meeting will be held in Conference room 300 on the third floor of PG&E's 77 Beale Street building in San Francisco. The meeting is scheduled from 10 AM to 3 PM. As a prudent response to the tragic events of Sept 11th, PG&E has increased security measures at its 77 Beale/245 Market complex. These measures necessitate the following for attendance to the Oct 9th, San Francisco Planning Group meeting: Please RSVP by no later than close of business, Wednesday, Oct 3rd to Dalisay (Ledy) Torres at email (preferred) address DST2@pge.com or (415) 973-1392. In your email response, please state you will be attending the Oct 9th San Francisco Planning Group meeting and who you will be representing. On the day of meeting, please have a photo I.D. to show the guard. These names will be given to the guards at the 77 Beale entrance near the waterfall before the meeting. Please use this entrance. When you arrive for the meeting, a PG&E employee will confirm your attendance from the list of names at the guard station and escort you to the meeting room. To help with this process, please plan to arrive at 77 Beale before 10 am. If you arrive before 10 am, PG&E employees will be available at the guard station to promptly escort groups of people to the meeting location. If you arrive after 10 am, please call at the guard station to Dalisay (Ledy) Torres at PG&E extension 3-1392 (or outside line 415-973-1392). A light lunch will be provided so that you should not have to leave the building for lunch. These increased security measures will cause some inconveniences, however, please know they are being taken for our own safety. FW: EPMI -PX Account Summary as of August 10 2001 & EPMI total of

Sender	chris.stokley@enron.com
Recipients	['kit.blair@enron.com']
File	stokley-c/chris_stokley/sent/401.

Kit, Sorry about not being able to get back with you on the PX issue yesterday. I will be wrapped up today until this afternoon. Give the Dan or Clark a call and have them walk you through this invoice, the number are listed at the bottom of the second e-mail. Find out where the PX short pay is encompassed in the account summary (about 9 million dollars). Once you walk through this with them, give me a call on my cell and let's discuss before we comment back to the lawyers. Sorry about having to pass the buck, but they have Murray and I scrambling. Call me on my cell if you need any further guidance.

Chris

To: EPMI cc: Subject: EPMI - Account Summary as of August 10, 2001

PARTICIPANTS: Enclosed is your updated Account Activity Statement summarizing all accounts receivable/payables activities with CalPX occurring during 2001 starting with the issuance of the December Day-Ahead/Day-Of Market invoice back in January through the April Real Time invoices in August. The April billing cycles are adjustments being made by CAISO that go back as far as Spring 2000. CAISO is continuing to make these adjustments, which are basically meter corrections and approved scheduling coordinator disputes, for prior periods. These will probably continue for a few more months because of the recent FERC ruling regarding refunds. Please feel free to call Don Deach (626-685-9876), Rachel Axelrad (626-685-9843) or Clark Cheng (626-685-9846) with any questions. Thank You. (See attached file: EPMI 081001.xls)

Follow-up Discussion on Calgary Retail Market System Solutions

Sender	p..o'neil@enron.com
Recipients	['chris.stokley@enron.com', 'richard.mckeel@enron.com', 'scotty.gilbert@enron.com']
File	stokley-c/chris_stokley/murray/70.

All,

I have included Steve Nat on this email so he too can be up to pace with our discussions.

I have almost completed reviewing everything I have received from you. I would like to schedule a meeting to talk again tomorrow.

I am having an AT&T Conf. Call scheduled for 1pm Pacific Time tomorrow. If I recall correctly, we agreed on our last call that we would attempt to have follow-up on Friday about the same time as our call on Wednesday. (I will forward the call information as soon as our admin has it set up)

Up to this point I have not seen anything which concerns me regarding functionality of VMS, and Power Meter Data DB. I do however have some questions and concerns regarding some of the fundamentals of how Enron will / is participating in the market and from a P&L perspective how will things be reported?

Q1 - What is the upside to being in the Alberta Retail Market and how will this be valued and where will it be actualized?

Q2 - Who will be supporting the standard business functions in the Calgary office for the Retail Market activity?

(Forecasting, Trade Capture, Volume Management, Settlements, Customer Service and Financial Reporting) Q3 - Is there a standard FTP established for all of the electronic files being distributed through out the participants? Q4 - What is driving the September 1 implementation date? Q5 - Is the Calgary office going to attempt to perform services for any of the other components of the WSP's (MSM's, LSA's, MDM's or Tariff Calculation)? Q6 - Has anyone looked at the Retail billing system which is currently in the EES shop? Q7 - Is anyone in the Application development / Support Group in Houston (Beth Perlman's World) involved in assisting Calgary with identifying solutions for the Retail Market? Q8 - How many different billing cycles will Enron Canada have with their Retail customers (Will you maintain the billing cycle which each customer is already on?) Q9 - Is there a scheduling requirement with this Retail Market? (I would think that you are going to need to provide a link between Wholesale Purchases and Retail Usage / billing) Q10 - Is there additional information regarding Customer Information System (CIS) Requirements. I see where you need to be able to store Site information, Enrolling information, Energizing & De-Energizing. What about billing cycles, Equal pay plans, Contact information?

My observations based on documentation and the Wednesday phone conversation:

Pros Cons VMS Can support all of the tariff calculations documented. We are also in the process of implementing the dispute management function of VMS. VMS manages transactions by exception. We estimate what the charge should come out to then validate that against statements from WSP then dispute the exceptions) Resources Available to assist with Implementation Power Meter Data DB Should be able to hold all meter data activity Resources Available to assist with Implementation PMI (Public Market Information) Appears to fit into current structures Resources Available to assist with Implementation CIS / Site profile EES Peace Software tool has functionality built in I don't currently know that status of this tool and what it would take to set up for your market Load Profiling / Scheduling Required? ? Deal / Trade Capture Required? ? Billing EES Peace Software tool has functionality built in I don't currently know that status of this tool and what it would take to set up for your market Unify would require Integration with EnPower and all global tables. Resources may be an issue. Delivery Point Management Global Facility already has the base functionality needed Implementation may require some software / DB changes. Resources may be an issue Contract Management Global Contracts already has the base functionality needed Implementation will require addition DB & software changes. Resources may be an issue

I hope that we can answer a number of the questions and validate your approach to participating in the Alberta Retail market tomorrow on your call.

Here are the teleconference details.

Time: 1 PM - 3 PM (Pacific Daylight Time)

Participant Dial-In: 877.233.7845 (Dial 505.766.5458, if toll-free is not available from outside the US) Participant Code: 287753

For Murray O'Neil Host Dial-In: 877.233.7845 Host Code: 788462

If you have any question for me prior to the call please let give me a call @ 503-702-9846.

Thanks - MO

CAISO Communication: Third Notice - FERC Fee implementation - C

Sender	crcommunications@caiso.com
Recipients	['bouillon@enron.com', 'scsettlecontacts@caiso.com', '20participants@caiso.com', 'isoclientrelations@caiso.com...]
File	stokley-c/chris_stokley/iso/mrkt_info/62.

IMPORTANT NOTICE

Attention: Scheduling Coordinator (SC) Settlements Contacts and/or Accounts Payable;

CORRECTED ISO ABA NUMBER: 121000358

ISO Account # 14897-03272

Third Notice - The ISO faxed the initial monthly FERC Fee invoices to Market Participants yesterday afternoon.

However, the invoices did not contain the ABA number associated with wire transfers to the ISO FERC Fee bank account.

Therefore, please use the following Bank Account information, if paying the invoiced FERC Fee on a monthly basis.

ISO FERC FEE Account Information:

ABA # - 121000358 ISO Account # 14897-03272

ISO Settlements & Finance

XX

The following notice outlines the FERC Fee description, process and payment options for ISO Market Participants.

FERC Fee - Market Notice

Introduction

FERC has authorized the ISO to collect FERC's annual charges from the Scheduling Coordinators (SCs) that use the ISO grid starting January 1, 2001. The annual fee is based on the product of the FERC fee and SCs' metered demand (load and export MWhs). The fee is currently estimated at \$0.021/MWh and is subject to change. Load associated with transactions that do not use the ISO Controlled Grid will not be assessed the FERC fee.

In accordance with FERC's March 14, 2001 Order on Amendment No. 35 to the ISO Tariff, 94 FERC ¶ 61,266, the California ISO has developed a procedure for invoicing and collecting the FERC Fee from Market Participants. The California ISO has also developed a way in which entities that wish to claim exemptions from this fee can provide the ISO with the appropriate data and request that they be exempted from charges.

Process

One business day before the Preliminary Invoice for a trade month is issued, the California ISO will issue a monthly invoice and data sheet to each market participant for FERC Fees. Contained within the Invoice and data sheet will be the SCs load and export data for the month, total exemptions for load and export, FERC Fee rate, total FERC fee charges, and total balance outstanding. A daily GMC Details file is already issued to SCs and can be used to verify metered load and export quantities.

Payment of the FERC Fee is not required on a monthly basis if an Approved Credit rating is maintained, or financial security at a level sufficient to cover the outstanding obligation is maintained as stated in Section 7.5.1.2 of the Tariff. For those entities that elect to pay the FERC Fee on an annual basis and meet the requirements to make annual payments, those payments will be due 5 business days after the final invoice is issued after FERC has issued the applicable FERC Fee rate in the following year.

Market participants that qualify to make annual payments must notify the ISO Client Relations department if they will be paying on a monthly or annual basis. Please inform the Client Relations department of your decision within one month of receiving your first invoice. Any SC payments received by the ISO will be held in an interest bearing account. Interest earnings will not be separately identified to the benefit of individual Scheduling Coordinators.

A final invoice will be issued annually, by fax, after the FERC announces the final rate after April 30 of the following year. This invoice will contain the actual charge to the SC based on the FERC rate, finalized load and export data, and will take into account any payments made during the year.

To claim an exemption from the FERC Fee, an entity must provide data showing that applicable load and export data was not associated with transmission transactions over ISO controlled grid. SCs requesting exemption from the FERC Fee need to provide their ISO Client Representative with the BAID, location, interchange ID, and quantities of load and export that are to be exempted. The ISO will assess the request for exemptions and will reflect any approved exemptions in the subsequent month's FERC Fee invoice. Any disputes concerning requested exemptions should be raised in the ISO's settlement dispute process. The ISO will annually inform the FERC of the total quantity of transmission transactions over the ISO Controlled Grid

Due to the fact that the FERC Fee invoices will be generated using preliminary settlement's data, the load and export quantities may change once the settlement's data is finalized. Market Participants will see the revised data for the prior month on the subsequent month's invoice and data sheet.

Timeline

The ISO will issue invoices for FERC Fees to Market Participants commencing this afternoon. The process and timeline described above will begin with the April Preliminary Invoice. The FERC Fee invoice for April 2001 will contain invoices for January through April.

If you have any comments please contact your Client Representative.

CAISO Notice - Cash Allocation Policies

Sender	bwoertz@caiso.com
Recipients	['20participants@caiso.com']
File	stokley-c/chris_stokley/iso/info/5.

ISO Market Participants: Since Trade Month November 2000 (which settled beginning in January 2001), payment defaults in the ISO markets have caused the ISO to pay less than the full amount due Scheduling Coordinators (SCs) in the monthly cash clearing process. The purpose of this message is to describe the ISO's policies and procedures in settling the market when defaults occur. As set forth in Section SABP 6.7.4 of the ISO Tariff, when payment defaults occur from SCs that have obligations to the ISO's markets (Debtor SCs), the shortfall is to be prorated to SCs with net amounts due them (Creditor SCs) based on their outstanding balances. The principles that drive how amounts are settled and defaults are allocated to Creditor SCs are summarized below: Proportionate allocation of defaults - The total amount of market defaults is allocated to the Creditor SCs on a proportionate basis such that each Creditor SC receives the same percentage of their total net amount receivable for the month. SCs are allowed to net the credits and debits on a monthly basis as described below. The intent of the Tariff is to equitably distribute market shortfalls only to those SCs that have net market receivables for the period. Each month is treated as a whole period - Final and preliminary invoices are combined when possible (see exception conditions below) in allocating market defaults. Cash payments from the market are received in two stages (preliminary and final). At preliminary, market payments are distributed based on the preliminary amounts due to the Creditor SCs as set forth in the preliminary invoices. Final invoices serve essentially as true-ups to the preliminary invoices, and accordingly, payments received at final are redistributed to the extent possible to achieve true-up allocations for the whole month considering the combined amounts due the Creditor SCs from both the preliminary and final invoices. Each month is treated as a discrete period - Market defaults are generally allocated to the Creditor SCs that have amounts due for the month being settled. The exceptions to this rule involve (1) SCs that are Creditor SCs in the current month but have default obligations relating to prior periods or (2) Debtor SCs that pay in the current month but have unpaid balances for prior months. In the first instance, the Creditor SC would not be paid to the extent of default obligations from prior months. Amounts due to the Creditor SC would be allocated back to the default period and such proceeds would be allocated based on remaining amounts still owed for that period. In the second instance the current month's payment is carried back and applied first to the oldest outstanding balance. The proceeds would be distributed to the Creditor SCs for that earlier period based on the Creditor SCs unpaid balances in that month. With respect to the carry back of payments to the earliest period, Pre and Post bankruptcy debts are deemed to be from different SCs. GMC defaults are remedied as a first priority on market payments - GMC is billed separately from market billings on both preliminary and final invoices each month. In the event of payment default on any GMC invoices (at either preliminary or final), market funds are transferred to satisfy GMC obligations before any market distributions are made. This first priority position for GMC revenues is set forth in Section SABP 6.3.1.3 of the ISO Tariff. Therefore, when both GMC and market defaults occur (as has occurred in each of the past few months), the Creditor SCs have two reductions to the market clearing amounts ultimately paid - an allocated portion of the GMC default, and an allocated portion of the market default. RMR invoices and payments are not affected by market or GMC defaults - The RMR invoicing process involves amounts due from the PTO's to the RMR Owners as set forth in monthly invoices processed through the ISO's systems. However, such amounts are invoiced independent of the ISO's market and GMC billing processes, and accordingly, market and/or GMC defaults do not impact RMR related payments. There are a number of factors that complicate the monthly process of allocating cash to Creditor SCs when defaults occur. Some of these factors include: * amounts received after payment date deadlines - such amounts are typically included in the next distribution * market payments due to Creditor SCs that default on GMC in the current month - such market allocations are reduced by the specific amount of the GMC default by the Creditor SC * allocations to prior months - not made unless the amount exceeds 0.5% of that months billed amounts * small invoices under \$5,000 are paid in full rather than the allocated percentage. For more information about these allocation issues or any other related matters, please contact Melodie Iverson (916) 351-2174 (e-mail mkiverson@caiso.com <mailto:miverson@caiso.com>) or Mike Epstein (916) 351-2314 (e-mail mepstein@caiso.com

Ariel, Donna's notes proxy address in AD had a 1 at the end of her last name. That would prevent her from receiving Notes mail as well as Internet mail. I fixed the proxy address. She should be fine as soon as the changes replicate. Thanks, E.

Hi Emmanuel,

Donna Johnson is having problems receiving internet mail. It looks fine in Notes but I can't check mailman. Can you please assist her. Donna's number is 503 464 7733.

Thanks,

Ariel

File	stokley-c/chris_stokley/projects/ees_/metering_and_forecasting/15.

Here is the data model and data flow diagram for MDMA.

I am trying to find out if the data from MV90 get interfaced into MDMA on a daily basis or not. If it is done on a daily basis, then I don't think there is a need to go into MV90. MV90 will have raw data and will not have gone through validations which are performed in MDMA.

From: Chris Stokley/ENRON@enronXgate on 06/28/2001 07:00 PM To: Vivian Hart/HOU/EES@EES cc: Subject: MV90

Vivian,

I just wanted to leave you my contact numbers:

Cell: 503-807-8959 Work: 503-464-8219 Home: 503-625-3541

I will be flying out tomorrow, but I should be in around 1:00 Pacific Time. Please send me an e-mail on where we stand with being able to get into the MV90 tables. I have Jeff Richter chomping at the bit on this one so it would be a nice if we can get our hands on that data. Thank you very much for your help on this topic.

Hey bud, I am now officially out of VM and working on the EES mess. I will give you details later, but in a nut shell I will be spending a lot of time in Houston over the next 6-mths. Looks like I will be working with Richter on try to sort out the issues that we currently are having w/ EES. Did you get a house yet? Also, set up the MSN IM so we can talk.

Chris

Deborah, 9:00 works for me

-----Original Message-----

From: O'Jones, Deborah Sent: Tuesday, October 09, 2001 5:01 PM To: Barnhart, Kimberly; McMullan, John; Stokley, Chris Cc: Riley, Tom; Curtis, Michele Subject: RE: UCSF Cogen and Business Invoice Update

I'd like to set up a conference call Wed. morning. Both Tom Riley and I are available.

Please let me know if 9:00 PST will work for you. If not, please let me know what other time will work in the a.m.

We will set up a call in number.

Thank you,

Debbie Debbie O'Jones Enron Energy Services

From: Barnhart,Kimberly Sent: Tuesday, October 09, 2001 6:07 AM To: O'Jones, Deborah; McMullan,John; Chris Stokley/ENRON@enronXgate Cc: Riley, Tom; Curtis, Michele Subject: Re: UCSF Cogen and Business Invoice Update

There seems to have been some confusion on pricing. I believe that Chris was going to provide the pricing to John, and we have not seen that yet this week.

Do we need to set up another conference call since Chris could not attend the last one? Please advise.

From: Deborah O'Jones/Western Region/The Bentley Company@Exchange on 10/08/2001 07:36 PM To: Tom Riley/Western Region/The Bentley Company@Exchange, Kimberly Barnhart/HOU/EES@EES cc: Michele Curtis/Western Region/The Bentley Company@Exchange Subject: UCSF Cogen and Business Invoice Update

Tom:

I talked to Dave Bohler at UCSF Friday regarding the cogen calculation and completion of his business invoices.

I told him to expect it to take at least a week for us to complete our cogen calculations after we received the files from PG&E. His expectations are that we should have calculations completed by Friday, Oct. 12.

Several weeks ago Dave requested the BI's to be complete by Friday, Oct. 5. I explained that I talked with our billing group (Kimberly), and it would take until Oct. 12 to get the BI's complete.

He is fine with both items. Dave said he appreciated the update, and that his main concern is that he is notified in advance if we can't meet a date we have committed to.

Kimberly:

? Does the group in Houston have all the information from the PG&E files they received to complete the cogen calculation? ? Please let me know ASAP if there is anything that will delay us from completing both items by Friday, Oct. 12.

Thanks,

Debbie
