File	swerzbin-m/sent_items/19.

-----Original Message-----

From: Khanna, Sanjeev Sent: Monday, October 01, 2001 11:40 AM To: Driscoll, Michael M.; Swerzbin, Mike Cc: Belden, Tim Subject: Daily Power Call

Mike:

This structure is from Caslebridge, who are independent consultants and work with various clients to hedge their exposure. They have not told me who the client is (it is not PacifiCorp)..I think we can make a good guess.

At this time, all we would like to know is that we would consider and price such a structure. If yes, then we would like to give them an indicative no. by Wed morning.

At this time the factors 1,000 and 10 are arbitrary.

Please let me know.

Thanks,

Sanjeev

Hydro Contingent Power Call Option: example

Term: 2 years

Notional Per day (MWH) = [MIN (850MW * 16 hrs, MAX (1000 - 10 * Daily Flow (KCFS),0)

The Notional per day payoff may have time varying (monthly) strike and multiplier (here 1000 and 10)

Financial Power Option per day : Notional per day (MWH) * MAX (MIDC Power Price - Call strike, 0) Call strike will be out of the money varying by month. They are also interested in zero strike products if available.

Quarterly Payoffs: Sum of the daily payoffs over the quarterly period.

Flow Index: Reported KCFS flow from Grand Coolee Power Price Index: standard published day ahead prices for MIDC.

Mike,

Here's the URL to the driver. I sent it via instant message but that probably won't help since you need to get the url to your house. So I figure you could forward this email to your email account that you can access from home like yahoo or hotmail or whatever you use at home.

Hope this helps.

ENE Stock Price Game

Sender	todd.perry@enron.com
Recipients	['steve.swain@enron.com', 'julie.sarnowski@enron.com', 'tim.heizenrader@enron.com']
File	swerzbin-m/inbox/219.

All,

The rules of the game:

1) Object = Come closest to guessing ENE's closing stock price on 12/31/01. 2) In the event of a tie, tying players must guess the closing price for the next trading day. 3) No two (or more) players may select the same closing price. 4) Guesses should be submitted to me by email no later than 12:00 noon this Friday (10/26/01). 5) Late entries will not be accepted. 6) Players may only submit one price. 7) Cost = \$5.00. 8) The closest guess (above or below) to the actual closing price wins.

Feel free to forward this email to anyone I have not included on this distribution

Todd A. Perry Enron North America 503.464.3729 (work) 121 SW Salmon Street 503.807.6106 (cell) 3WTC, 0306 503.464.3740 (fax) Portland, OR 97204 todd.perry@enron.com

From: Hitchcock, Dorie Sent: Wednesday, August 01, 2001 8:05 AM To: Belden, Tim; Calger, Christopher F.; Collonges, Remi; Davies, Derek; Devries, Paul; Foster, Chris H.; Gonzalez, Orlando; Kishkill, Joe; Kitagawa, Kyle; McDonald,

Michael; Milnthorp, Rob; Parquet, David; Swerzbin, Mike; Thomas, Jake; Whitt, Mark; Wiggs, Brett; Wolfe, Greg; Zufferli, John; Forster, David Subject: BEAVER CREEK TRAVEL

The Enron Americas Management Offsite has been scheduled for August 16-19, 2001 in Beaver Creek, Colorado. Charter aircraft will be available between Houston and Eagle/Vail Airport - flight itinerary is listed below: Thursday, August 16 - 5:00pm departure from Enron Aviation at George Bush Intercontinental Airport (arriving in Eagle/Vail at approximately 6:00pm) Sunday, August 19 - 9:00am departure from Eagle/Vail Airport (arriving at Enron Aviation at approximately 12:00pm)

You have the option of flying into Houston and taking this charter flight or you can work with your local travel agent to obtain personal travel into either Denver International or Eagle/Vail. Enron will provide ground transportation from both airports. Flights into Eagle/Vail are very limited during the summer months. Driving time from Denver to Beaver Creek is approximately 2 1/2 hours and approximately 35 minutes from Eagle/Vail to Beaver Creek.

Once travel has been confirmed, please provide me with a copy of your itinerary so I can secure the proper ground transportation.

Please let me know if I can be of assistance or if you have any questions. Thanks.

Rob Noonan fund

Sender	kurt_w_miller@pgn.com
Recipients	[jkemiller@msn.com]
File	swerzbin-m/inbox/232.

Hello all.

I just spoke with Dan Wayland at TFS. He said that a college education fund has been established in Robby's son's name.

I am sending this message out to all of those people who knew Rob or who have mentioned wanting to contribute to such a fund if it should come about. I recognize that all of you may not have known Rob as well as I did. Also, some of you have been impacted by the loss of many friends in this tragedy and may not be able to contribute to every fund. Still, I wanted you to be aware of this one.

Checks should be made payable to:

The Charles A. Noonan Educational Foundation

...and be sent to:

The Charles A. Noonan Educational Foundation c/o Craig Polar 89 Lower Cross Road Greenwich, CT 06830

If you have questions, please call Craig Polar at 917-691-5153.

Thank you,

Kurt

I would like to introduce Intercontinental Staffing Group. Our Houston office is primarily focused on serving the energy trading industry, bringing together top energy trading talent with the worlds leading energy trading companies. Our search consultants have past experience in either trading or brokering energy commodities. This gives us a distinct advantage with respect to our knowledge of and exposure to the energy trading industry.

We are currently working on filling several trading and marketing/origination positions throughout the US. If you know of someone who is looking for a new career opportunity, please contact me at the phone number listed below or feel free to email me at possibilities@istaffinggroup.com <<mailto:possibilities@istaffinggroup.com>>. We do offer a referral fee if we are successful in placing one of your recommendations.

Any information provided will be completely confidential. Thank you for your time. I look forward to speaking with you.

Sincerely,

Gary Pitt Director Intercontinental Staffing Group Inc. Phone: (713) 850-8399 Fax: (713) 850-7746 Cell Phone: (281) 467-0022 email: possibilities@istaffinggroup.com <mailto:possibilities@istaffinggroup.com>

Industry notes on curtailments and closures

RandomLengths 09/27/2001

Plywood/OSB

Advanced Wood Resources, Brownsville, Ore., will cease all operations as of November 20. "Severe competition from the lower-priced OSB, combined with challenging economic conditions and rising costs associated with increased environmental standards," were cited as reasons for the closure.

Georgia-Pacific has announced plans to shut down nine plywood mills in the South for one week starting October 1 to replenish log supplies.

Hunt Forest Products will shut down its plywood mill in Natalbany, La., for one week starting October 1 due to tight log supplies.

LP has announced market-related downtime at most of its U.S. and Canadian OSB mills. Most of the mills will be down a minimum of one week, starting October 8. Plants in Sagola, Mich., and Jasper, Texas, will be down the week of October 1. Hayward, Wis., will be down the week of October 15. Carthage, Texas, will be down the week of September 24. And Silsbee, Texas, will be down the week of October 8 and for four to six weeks thereafter for a press rebuild.

Willamette Industries' plywood mill in Dodson, La., will shut down the week of September 24 for scheduled maintenance.

LUMBER

Harwood Products, Branscomb, Calif., has cut production by 20% due to market conditions

Weyerhaeuser will close its three Cedar sawmills in British Columbia for an indefinite duration beginning next week. Market conditions were cited.

Canadian Forest Products will reduce output at its sawmills in British Columbia and Alberta by an estimated 70 million board feet during October.

Abitibi Consolidated plans to cut production by about 25% at all of its sawmills over the next four weeks. "Market conditions and supplemental export costs" were cited as reasons for the curtailments.

Slocan Forest Products will reduce production by 30 million board feet by curtailing production the first week of October

For more information, visit RandomLengths <<http://www.randomlengths.com/>>

AURORA Version 6.0

Sender	joseph@epis.com
Recipients	['undisclosed-recipients@enron.com']
File	swerzbin-m/inbox/124.

AURORA has recently released Version 6.0. I have attached a PDF that explains AURORA's new feature. I have also included below a copy of our latest press release. For any additional questions that you may have please contact me.

Regards,

Joseph A. Smith EPIS Inc. Phone: 503-722-2023 Ext. 211 Fax: 503-722-7130 www.epis.com

<<What's new - Version 6 Information.pdf>> EPIS Announces North American Electricity Market Software and Database for Forecasting Wholesale Electricity Prices

AURORATM V6 Electric Market Model, proven leading-edge software package, released with ready-to-use data for all the reliability regions in North America to forecast wholesale electricity market prices. AURORA delivers the speed for forecasting market prices and modeling uncertainty using multi-driver Monte Carlo simulations including random resource outages with random frequency and duration.

PORTLAND, Oregon-December 4, 2001-EPIS, Inc., developer of pace-setting software for the electric-power industry, today announced the release of the North American Electricity Market Database and Version 6 of its market modeling software, AURORA*. Already the fastest tool of its kind, AURORA delivers the critical dispatch speed for risk analysis--modeling uncertainty using multi-driver Monte Carlo simulations. This swiftness, coupled with market-simulated capacity-expansion logic, frees up time for the model to consider more resource options in producing revenue forecasts for asset valuations. AURORA and its North American electric market database simulate electricity imports and exports to produce price forecasts for market areas and trading hubs. New Version 6 features include simulating random resource outages and expressing inputs and outputs in international units of choice. AURORA models random forced outages for resources and the random frequency and duration of resource outages. This new outage approach allows units to fail or return to service at any time during the simulation. AURORA input and output may be in any currency, or any unit for expression of fuel heat content, heat rate heat content and emission quantity. The newly released database greatly reduces the research and data collection time to produce accurate electric market price forecasts for all the reliability regions in the United States and Canada. "Delivery of ready-to-use energy data for all the markets in North America is unique to the AURORA electric market model. We are putting powerful forecasting capability into the hands of energy professionals, dramatically increasing their understanding of forces behind electricity prices," said Warren H. Winter, EPIS President. Resource developers use AURORA to determine the value of existing- and future-generation units. They also use AURORA to understand the underlying drivers of the forecasts--invaluable information for power marketers and resource developers and planners. Energy traders use AURORA to forecast hourly, on-peak and off-peak electric prices for trading hubs. AURORA gives them immediate access to the resource dispatch stacks and electricity price forecasts of day and forward trading. Also, gas traders use AURORA to forecast gas demand from electric generation for gas trading. A Windows-based model, AURORA runs on Pentium class computers under Windows XP/2000/NT 4.0/ME/and /98/. Complete electricity pricing results are available in a matter of seconds or minutes, rather than hours or days, and do not require lengthy set-up or run times. AURORA V6 is being delivered to current customers of EPIS, including major North American electric-energy providers, utilities, consultants, and agency and planning groups. For more information about AURORA contact EPIS at (503) 722-2023 or visit www.epis.com. EPIS, Inc., based in Portland, Oregon, provides information on electric-energy prices and market value by applying fundamental economic principles to the emerging competitive energy market. The company is the developer of the AURORA electric market model, uses AURORA to produce market forecasts, and supports clients who use AURORA to forecast and analyze the energy marketplace.

Team 4 Congratulatory Lunch at Rock Bottom

Sender	dale.rasmussen@enron.com
Recipients	['fredrik.eriksson@enron.com', 'robert.badeer@enron.com', 'chip.cox@enron.com']
File	swerzbin-m/inbox/227.

The stars have aligned to designate Wednesday, October 24, as the day to have our lunch.

Let's meet at Rock Bottom at 11:45 (or we could get all radical and actually leave together from the floor at 11:40) for the celebration.

We could probably figure out how many Kcalories we all burned by riding during September and dedicate ourselves to replacing them at a single sitting!

See you there.

Great work, team--we took the "total number of trips" category for the Bike Commute Challenge.

As a reward, we will be treated to lunch at Rock Bottom, courtesy of Enron, sometime during the month of October.

We need to pick a day when we can all get together for that lunch.

I propose one of the following dates, beginning at 11:45 a.m.:

T W Th F

16 17 18 24 25 26

Please let me know which of these dates you CANNOT make. If you have a strong preference about another date, let me know that, too. The date(s) with the the highest possible attendance wins.

Let me know what your preference is.

Dale Rasmussen Tel: (503) 464-8863 Fax: (503) 464-8058

File	swerzbin-m/inbox/248.

Hi Mike,

How is everything?

I know That you tried getting back to me a couple of weeks ago after I sent you the earlier email, and we just keep missing each other!

Things move fast over here, the race season is going OK and I've managed not to kill myself yet! We have had an offer of some sponsorship in the states to race in the Speedvision Touring Car championship, so far we've got about 30% of the \$600,000 that we need. I am trying to get hold of the names of some companies in th US who sell to end users (Joe

Public) and perhaps are not normally associated with racing, big retailers, that sort of thing. I was wondering if you had any idea's, all I need is about six or seven company names, I can research the rest over the internet and send them some proposals via email. If you have two minutes to email them to me that would be great.

Cheers

John ----- Original Message ----- From: John Batchelor <mailto:john.topgear@ukgateway.net> To: mike.swerzbin@enron.com <mailto:mike.swerzbin@enron.com> Sent: Thursday, August 09, 2001 4:15 PM Subject: I'm a real racing driver now Mike!

Hi Mike,

Well, I did it, got the deal to do BTCC Touring Cars, it has a similar profile here in the UK to Nascar, but is actually very closely related to The Speedvision Touring Car Championship in the US.

Here's me and my team-mate racing;

We are having a very good year, but would like to do it in the US in 2002, can you give me a call on either 01625 520997 or my cell phone which is 07710 769289, I'd like to pick your brains on a couple of things. Can you believe people actually line up to get my autograph!!!! how weird is that?! Hope the family are well and look forward to talking to you soon.

John B&Q (it's a long story...but I changed my name AGAIN to match the sponsors name, so that when the commentary team on the TV talk about me....they advertise the sponsors brand!)

Hi John!!

Nice car photos. Hey I have been thinking about some sponsors here are some ideas: Krispy Kreme Donuts (national growing donut chain--everybody loves them), Calpine Energy, Duke Energy, New York Times (they deliver locally through-out the US), Starbucks Coffee (out of Seattle), Southwest Airlines, Champion Sportswear, Columbia Sportswear, America OnLine, Home Depot, and I could come up with some more. Do you like any of these for a last name?? John Krispy Kreme???

Sounds like things are going well for you -- give me a call sometime. Take Care, Your good friend, Mike.

Peter Swartz Joins EPIS

Sender	christy@epis.com
Recipients	[undisclosed-recipients@enron.com]
File	swerzbin-m/deleted_items/7.

For Immediate Release January 16, 2002

Contact: Lee A. Barney, Vice President EPIS, Inc. (503) 722-2023 x203 lee@epis.com

Peter Swartz Joins EPIS as Vice President of Development

West Linn, Oregon, January 16, 2002 - EPIS, Inc., developer of the AURORA? Electric Market Model, announced that Peter J. Swartz has joined EPIS as Vice President of Development, with responsibility for the development of market modeling software as well as forecasting products and services.

Mr. Swartz, 51, previously was the senior model developer for Northwest Power Planning Council. The Power Planning Council is a four-state planning agency that oversees the regional energy and fish and wildlife interests in coordination with the Bonneville Power Administration (BPA). As the principal author of the Council's power system planning and decision analysis models, he spearheaded the application of these tools to issues concerning resource economics and reliability in the Northwest power system, including the treatment of planning under uncertainty. Mr. Swartz has pioneered analytical models to examine the tradeoffs between system operation policy and effects on fish and wildlife constraints.

"EPIS has grown significantly over the last three years. Our success in large measure is to due to timely development of modeling capabilities, and we are committed to continuing to meet our clients' energy forecasting needs for 2002 and beyond," said Warren Winter, EPIS President. "We are pleased that an individual with Peter Swartz's experience is joining our management team. Mr. Swartz has more than 20 years of experience in power system modeling and analysis and will be a great asset to our continued growth and success."

"Not only does he bring strong model development capabilities, he also brings a wealth of background in energy policy and extensive analysis on energy issues, including the bulk power markets," Winter said.

Mr. Swartz also has provided consulting services to the water industry, developing water supply planning models for use in the analysis of supply, transmission, and conservation alternatives. Prior to 1982, he spent three years at Portland General Electric (PGE) in financial and resource planning. Also, has taught management science and statistics at the School of Business Oregon State University.

Swartz earned a Bachelor of Science degree in mechanical engineering from Oregon State University in 1976, and he earned an MBA with high honors in 1977 with emphasis in management science and operations research.

EPIS, Inc., based in West Linn, Oregon (near Portland), provides information on electric-energy prices and market value by applying fundamental economic principles to the emerging competitive energy market. The company is the developer of the AURORA electric market model, uses AURORA to produce market forecasts, and supports clients who use the model to forecast and analyze the energy marketplace. AURORA is used by major North American electric-energy providers, utilities, consultants, and agency and planning groups.

For more information, please contact us at (503) 722-2023 or visit our website at: www.epis.com <<http://www.epis.com/>>.
