Subject: CLUBS

Hey Janie, I mailed the clubs today through the post office. The delivery confirmation number is 0300 1290 0007 1615 9547 and the web site to track it on is www.usps.com or call 1-800-222-1811. I took all the stickers off the clubs so all you have to do is take the stickers off the box then wrap it. Cost breakdown: Austad's Golf 681.56 Post Office 16.75 Total 698.31 P.S. I'll send the receipts via mail

From: Turner, Nancy Sent: Friday, August 24, 2001 10:15 AM To: Allen, Phillip K.; Grigsby, Mike; Gaskill, Chris; Presto, Kevin M. Cc: Walsh, Kristin; Tholan, Scott; Whitman, Britt; Holman, Kelly Subject: El Paso 1110

Good morning. My name is Nancy Turner, and I have recently joined Kristin Walsh's competitive analysis group where I follow gas industry issues.

As you may recall, earlier this summer we informed you that El Paso's line 1110 had been brought down for repair, pigging and OPS review. Our sources at El Paso and OPS have indicated to us this week that line 1110 is expected to come back online on September 1st. We understand that the throughput on the entire system at that time should be at least 920 Mmcfd (same as before it went offline). However, there is a strong possibility that OPS may grant the system permission to return to it's full capacity at 1.1 Bcf/d on September 1st.

We are trying to obtain more information on the capacity issue and hope to have this confirmed early next week. We will keep you posted, but if you have any questions, please feel free to contact me at X 51623 or Kristin at X 39510.

Tuesday, July 17, 2001 11:09 AM To: Tholt, Jane M. Subject: FW: 2001-2002 Winter Bid Solicitations

Re: PNMGS Gas Services Winter Gas Purchase Program 2001/2002 Ladies and Gentlemen: PNM Gas Services (PNMGS) is soliciting competitive offers (Offers), irrevocable until August 9, 2001 for dependable supplies of natural gas to meet our winter system supply demand. We are seeking gas supplies under GISB Exhibit A "Transaction Confirmations" for Firm Baseload, Firm Flex, and Firm Peaking. Due to PNMGS' portfolio requirements, PNMGS requests the Offers be made on a monthly basis. PNMGS MAY ACCEPT ANY OR ALL MONTHS CONTAINED IN YOUR OFFER(S). This year our bid solicitation is being conducted by e-mail. For security purposes, we need all executed documents to be returned by telefacsimile at (505) 241-2383 or by mail, 414 Silver Avenue SE, Albuquerque, NM 87102-2610. You may submit an Offer(s) of any type and as many variations of Offer(s) for each contract type. Multiple Offers may be submitted on photocopy of the GISB Exhibit 'A' "Transaction Confirmation" Offer form. PNMGS desires contractual flexibility in greater supply quantities, delivery points, basins and pipelines, therefore, the greater assortment of options submitted, the better opportunity of acceptance. PNMGS MUST RECEIVE YOUR WRITTEN GISB EXHIBIT 'A' "TRANSACTION CONFIRMATION", BY TELEFACSIMILE OR MAIL, ON OR BEFORE AUGUST 1, 2001. ONCE AN OFFER(S) IS MADE IT CANNOT BE WITHDRAWN AFTER SUBMITTAL. PNMGS WILL ADVISE YOU BY WRITTEN NOTICE (TELEFACSIMILE OR MAIL) OF YOUR "OFFERS" ACCEPTANCE OR REJECTION ON OR BEFORE AUGUST 9, 2001. ALL OFFER(S) ARE IRREVOCABLE AND INCORPORATE BY REFERENCE THE STANDARD TERMS AND CONDITIONS FOR THE APPLICABLE TYPE OF CONTRACT. THE GISB EXHIBIT 'A' "TRANSACTION CONFIRMATION" SHALL BECOME THE GAS PURCHASE AGREEMENT, IF ACCEPTED BY PNMGS. THE PARTY EXECUTING EXHIBIT 'A' MUST BE AUTHORIZED TO BIND THE COMPANY. FAXES WILL BE ACCEPTED AS THE OFFICIAL EXECUTED DOCUMENT, IF NOT MODIFIED. ORIGINATOR MUST INITIAL ALL MODIFICATIONS. PNMGS REQUIRES THE SUBMITTING COMPANY TO BE ABLE TO PERFORM UNDER THE TERMS AND CONDITIONS OF THE OFFER(S) ACCEPTED. If you have any questions, please contact our Representatives Linda Miller (505) 241-4771 or Loretta Day (505) 241-2494 prior to submittal of the GISB Exhibit 'A' "Transaction Confirmation" Form. PNMGS and our customers appreciate your participation and looks forward to the opportunity to do business with you. We hope our winter purchase program will be mutually beneficial to both our companies. If you experience difficulty in opening the attachments, please feel free to call Andrea Garcia at (505) 241-4769 for assistance. Sincerely, Ernie Crawford Ernie Crawford Manager, Gas Acquisitions

Attachments **NOTE: Please remember to sign your proposal before faxing it back to PNM Gas Services.

We have a deal with Gwwon this month-November. Baseload sale at Needles for 10000/d. Deal No. 1135697.

-----Original Message-----

From: Ellis, Laurie Sent: Thursday, November 08, 2001 12:17 PM To: Tholt, Jane M. Subject: Trades with So Cal Gas Co's Storage Group

Janie,

Can you send me an email (just something short) with the deal numbers of any future trades you make with Gwoon Tom? Unfortunately, when you put a note in Sitara's special handling instructions, I don't get any kind of notification. As long as I know the deals ahead of time, I can make sure they appear on separate invoices. They also go to different internal mail locations and contacts so I have to correct that as well.

Thanks Laurie Ellis Specialist - Gas Settlements Enron Net Works LLC Phone: (713) 345-9945 Fax: (713) 646-8420 email: laurie.ellis@enron.com

[NEWSRELEASES-LIST] Energy Commission Begins Review Process for

Sender	dtran@energy.state.ca.us
Recipients	['newsreleases@energy.ca.gov']
File	tholt-j/deleted_items/27.

For immediate release: October 18, 2001 Media Contact: MaryAnn Costamagna - 916-654-4989

Energy Commission Begins Review Process for Three Proposed Power Plants

Sacramento - At a business meeting last night, the California Energy Commission accepted into the licensing process applications for three new power plants. These projects will now begin a comprehensive staff review.

Roseville Energy Facility A 900-megawatt power plant in the Sacramento area is being proposed by Roseville Energy Facility, LLC, a wholly owned subsidiary of Enron North America Corporation. The combined cycle, natural gas-fired facility is planned for a site five miles north of downtown Roseville and one-tenth of a mile north of the Pleasant Grove Wastewater Treatment Plant.

The Roseville Energy Facility will be considered under the Energy Commission's 12-month review process following last night's 4 to 0 vote by Energy Commissioners. The Committee that will oversee that review is comprised of Energy Commissioner Robert Laurie as Presiding Member, and Commission Chairman William Keese as Associate Member.

More information on the Roseville Energy Facility is available on the Energy Commission web site at:

www.energy.ca.gov/sitingcases/roseville

RE: Data Request to El Paso

Sender	m..tholt@enron.com
Recipients	[w..cantrell@enron.com]
File	tholt-j/sent_items/111.

looks good-thank you. Feel free to add any others you think might be helpful. Should we ask , absent periods of maintenance,how many times constraints exsited within these pools upstream of Cornudas and Window Rocks.

-----Original Message-----

From: Cantrell, Rebecca W. Sent: Thursday, August 30, 2001 1:43 PM To: Lawner, Leslie; Tholt, Jane M. Subject: Data Request to El Paso Importance: High

Leslie: Is this in good enough legal form, since it is an informal request?

Janie: I tried to make the questions very specific. Does this still say what you want to know?

August 31, 2001

Via FAX to 202-637-3509

Daniel F. Collins, Esq. El Paso Natural Gas Company 555 11th Street, N.W. Washington, D.C. 20004

Dear Mr. Collins:

RE: Docket No. RP00-336-000

Pursuant to the procedures agreed to at the August 28 technical conference in the referenced proceeding, Enron North America Corp. submits the following informal data requests:

1. Please specify the receipt points that are associated with each of the twenty pools that El Paso proposes to use for allocation of receipt point rights in this proceeding. 2. For each of the specified receipt points, please provide on a monthly basis the average daily volume of gas that was scheduled for receipt into El Paso's system for each month from January 1, 2001 through August 31, 2001. 3. For each of the specified receipt points that is not an interstate pipeline interconnection, please indicate whether, to the best of El Paso's knowledge, gas from supply sources upstream of the receipt point can be transported on any other pipeline, i.e., whether or not they are split-connected.

Please provide the requested information electronically in Excel spreadsheet format to the undersigned, with a copy to Jane Tholt (jane.m.tholt@enron.com <mailto:jane.m.tholt@enron.com>).

Sincerely,

Rebecca W. Cantrell Sr. Director, Government Affairs (rebecca.w.cantrell@enron.com)

New EnronOnline Functionality

Sender	david.forster@enron.com
Recipients	['linda.andersson@enron.com', 'product.london@enron.com', 'eol.traders@enron.com', 'product.houston@enron.com']...
File	tholt-j/discussion_threads/49.

We will be releasing new EnronOnline functionality tonight which will be available for use on Monday morning.

Two information sessions will be held in Houston to further explain the new functionality. It is very important to attend these sessions to fully understand the new features. For sessions in Calgary or Portland, please contact Savita Puthigai at 713 853 1787. For sessions in London, Oslo, Singapore, Australia or Tokyo, please contact PCG London on +44 20 7783 7783.

Date Time Location Tuesday, 27th February 3.30 to 4.00 EB 27C2 Wednesday, 28th February 3.30 to 4.00 EB 27C2

There are two areas of new functionality: Spreads and Stack Manager.

Spreads

From Monday, Enron traders will be able to define a Spread product on EnronOnline in which the customer can trade on a single spread product and receive a transaction for each leg of the underlying products.

For example, a customer could select to buy the April vs May Spread Product. A successful transaction would result in a Sell for the April Product and a Purchase for the May Product. Both of these underlying transactions will show up in the customer's transaction list (the spread itself will not show up - only the two legs). The price for Leg 1 will be equal to the average of the bid and offer, or the bid or offer alone if the average cannot be computed because either side is missing, for the Leg 1 Product. The price for Leg 2 will be equal to the price for Leg1, plus the spread price.

To ensure accuracy and consistency, EnronOnline Product Control will set up these new Products initially.

Stack Manager

There are a few changes to Stack Manager which may or may not be directly associated with Spreads:

New Stack Link Type

On the Link Dropdown box on the Product Properties page, there is a new Stack Link Type called "Stack Basis Link". If you select this link, then the price you enter into the stack depth window will be added to the price in the stack depth window from the parent (it will not be added to the calculated price of the parent which appears on the website). For example: Product 1 is a Stand Alone Product, with Bid at \$5.00 Product 2 is a Basis Link Child, with Stack Depth Price at \$0.25, so the calculated total price which appears on the website is \$5.25 Product 3 is a Stack Basis Link, with Stack Depth Price at \$0.05, so the calculated total price which appears on the website is \$0.30

Autohedge Changes

If an Enron trader has an autohedge set up between two products which they are managing under the same book, then the Parent product will respond as though an autohedge transaction has occurred, but no transaction will actually be entered into the system. This is intended to simplify position management where you want the parent price to respond to a transaction on the child, but do not want to manually remove transactions within the same book.

Note that autohedge functionality remains the same as it was before this update for autohedge transactions between products which are not in the same book.

Trade Linked View

You can now view linked transactions together on the transaction display section in the stack manager. To do so, right click in the transaction display section and select linked view. You will see a single transaction with a plus sign for any linked deals (e.g. spreads and autohedged deals). To see the individual transactions that make up the linked transaction

click on the plus sign.

You can display the linked transactions in a expanded or collapsed view. To do so right click in the transaction display area and select Full Expand or Full Collapse.

To return to the default transaction display, right click in the transaction display area and select Transaction view.

New EnronOnline Contact

As part of a restructuring within EnronOnline, Savita Puthigai will be your primary contact within EnronOnline for Trading and System Design issues. Future emails such as this one will be sent from her address. She can be contacted in Houston on 31787.

Dave

File	tholt-j/janie/56.

Enron North America is interested in purchasing natural gas from Phillips Petroleum Company under the following terms and conditions:

Service Level: All volumes will be firm. Buyer must flow 100% of purchased volumes. If Phillips is not satisfied with Buyer's flow performance, Phillips may cut any or all gas during the month of flow, and may terminate all remaining months of contracted volume upon 15 days written notice to Buyer.

Tier 1 WFS Milagro Plant: (WFS Agreement-Agreement Transfer): 10000 mmbtu/day Price: Inside FERC El Paso San Juan Index minus \$.09.

Tier 2 WFS Milagro Plant (WFS Agreement-Agreement Transfer): 25000 mmbtu/day Price: Inside FERC Northwest Rockies Index plus \$.09

El Paso Natural Gas Company San Juan Blanco Pool: 40000 mmbtu/day Price: Inside FERC Northwest Rockies Index plus \$.09

WFS Ignacio Plant (WFS Agreement-Agreement Transfer): 30000 mmtu/day Price: Inside FERC Northwest Rockies Index minus \$.04.

Special Terms and Conditions: Buyer and Seller may mutually agree to convert any portion of the contracted volume to a fixed price or to a Gas Daily. Conversion to Gas Daily can occur no later than NX3. If no price conversion takes place, the gas will be sold at the agreed upon index price or default price.

ENA is not interested in trigger deals based upon partial flows.

Please call if you have any questions regarding this matter.

Subject: [NEWSRELEASES-LIST] Los Esteros and Magnolia Power Projects

For immediate release: September 25, 2001 Contact: Mary Ann Costamagna: (916) 654-4989

Energy Commission Clock Starts On Two New Power Plant Proposals

Sacramento - Two new power plant applications started the California Energy Commission approval process with unanimous votes today. Commissioners deemed the applications data adequate for the Magnolia Power Project in Burbank and the Los Esteros Critical Energy Facility in North San Jose. The 4-to-0 Commission vote finding the Magnolia Power Project data adequate means that the staff has enough information to begin the six-month licensing review. A unanimous vote also began the four-month licensing process for the Los Esteros Critical Energy Facility. Simple-cycle power plants that can be on-line by December 31, 2002 can be licensed under the four-month - fast track - process. The six-month process is for thermal power plants that will not cause significant adverse impacts to public health, the environment or transmission system. In both cases, projects must comply with local, state and federal laws, ordinances, regulations and standards, including the California Environmental Quality Act. The Magnolia Power Project is a proposal from the Southern California Public Power Authority. The 250-megawatt, natural gas, combined-cycle electrical generating facility would be located at the site of the existing City of Burbank power plant. The city would operate the new plant that is intended to supply power as well to Anaheim, Colton, Glendale and Pasadena.

Magnolia is expected to cost \$200 to \$250 million. A workforce of approximately 320 craft and professional personnel is planned to build the facility. The proposed construction schedule would take 23 months, putting the plant on-line by the summer of 2004. The Committee that will oversee the Magnolia Power Project review is comprised of Energy

Commissioner Robert A. Laurie as Presiding Member and Commissioner Arthur H. Rosenfeld, Ph.D., Associate Member. For more information on the project, check the California Energy Commission web site at:

www.energy.ca.gov/sitingcases/magnolia

The Los Esteros Critical Energy Facility is proposed by Calpine c* Power. The plant, planned for 15 acres in North San Jose at Highway 237 and Zanker Road, would produce 180 megawatts using four gas-fired, simple-cycle turbines. The project's key goals are providing a reliable source of electricity to the proposed U.S. Dataport facility scheduled for construction on an adjacent site and putting power on the grid to support South Bay energy needs. Los Esteros is expected to cost \$250 million. A crew of 287 will build the plant if licensed. Construction and testing are projected to be complete by summer 2002. The Committee named this morning to oversee the review process for the Los Esteros Critical Energy Facility consists of Energy Commission Chair William J. Keese as Presiding Member and Commissioner Michal (spelled correctly) C. Moore, Ph.D., Associate Member. More information on Los Esteros is located on the Energy Commission web site at: www.energy.ca.gov/sitingcases/losesteros

Public participation is a very important part of the Energy Commission approval process. To find out how you can get involved, call Roberta Mendonca, the Commission's Public Adviser, at (916) 654-4489, toll free at (800) 822-6228, or by e-mail at: pao@energy.state.ca.us

Sent: Wednesday, September 05, 2001 11:21 AM To: Tholt, Jane M. Subject: Janie,

Janie,

I regret that when you called yesterday you didn't feel that anyone outside of me knew what was going with your portfolio. Let me reassure you that there are several that are part of the team that immerse themselves in the accounts that we manage. Unfortunately, insurance products are held at the insurance company. We have submitted the proper paperwork to change the broker dealer. That has been done. Now we're waiting for First Union to network the annuities into your account so we can see them daily. We at anytime can call Venture and get values and allocations. We also have your profile on a spreadsheet where we track your Venture piece, 401k, Accounts with us etc... Let me give you the result of the Annuities;

2106218 Current market -\$6,718.00 Grip value 12,617. Currently in Cash

2016219 Current market - 52,187.00 Grip value 100,880.85. Currently in Cash.

2235338 Current market- 204,005 Grip value 222,923. Currently in cash.

2235337 Current market- 137,391 Grip value 160,636. Currently in cash.

2235339 Current Market- 40,101 Grip value 44,584. Currently in cash.

2235336 Current Market- 15,586. Grip value 17,700. Currently in Aim All CAP.

The grip value is the guaranteed value through annuitization. You have a guaranteed growth rate of 6% on an annual basis, with a step up election if the market value has performed greater than 6%. The markets were great in 98 and 99 with the first annuities that we made an invest in. We stepped up the market performance and that is why the grip value is at the levels listed. We are in the final stages of the annuities being networked into your accounts. One has already shown up on the account. The other 5 should follow through shortly. I'll track it daily and keep you posted. The important thing for you to know is the the positions are in cash, except Josephs (I spoke to him last night, he sure sounds like a fun guy) annuity. Hope that this helps.

Pat

Attached is a draft of our rehearing request on the order FERC issued in RM01-9 requiring sellers of gas into California to file information on their sales, transport, and purchases. The rehearing request restates our arguments in response to the NOPR that (1) permanent, formal reporting requirements are not appropriate to address a temporary problem and are beyond the scope of the Commission's powers under the Natural Gas Act and (2) the commission significantly underestimated the burden of the reporting requirements as well as the responding parties' ability to comply. We also request that the reports, if they must be submitted, be due 45 days after the end of the month instead of the required 30 days. Please provide any comments or suggestions you may have on this draft to either myself (713-853-5840) or Leslie (505-623-6778) by COB Wednesday (8/22). << File: RM01-9 Rehearing Drft1.doc >>

Thanks.

PROS Energy Profit Optimization Workshop Boasts Top Speakers

October 16, 2001-Houston- PROS Revenue Management, the world's leader in pricing and revenue optimization science and software, and the pioneer and dominant provider of revenue management to the airline and energy industries, today announced that several industry-leading speakers have been slated to appear at its Energy Profit Optimization Workshop, being held November 5 at PROS' offices in Houston, TX.

"PROS has selected some of the top leaders in the energy industry," says Matt Johnson, senior vice president of PROS' energy group. "The use of pricing optimization and revenue management solutions is essential for the forward-thinking energy industry companies to survive and prosper, and our workshop will show this to our interested participants."

The scheduled speakers for the PROS-hosted workshop include:

? Rob Bond - Vice President Commercial Optimization, CMS Energy Panhandle Eastern Pipe Line ? Soli Forouzan - Former Vice President Risk and Director of Storage Trading at PG&E, Mr. Forouzan now provides executive consulting on storage optimization best practices ? Glen Shrank, @TheMoment - Industry leader of Optimized Dynamic Commerce Tools that are at the heart of ERCOT auction pricing engines for both Reliant Energy and TXU ? Matt Johnson - Senior Vice President, Energy group at PROS Revenue Management ? Kurt King - Managing Director, Commercial Technology at Duke Energy ? Ted Valkov - PROS Revenue Management's Senior Research Scientist ? Albert Viscio - Senior Accenture partner focusing on pricing and revenue optimization strategy and best practices in energy, utilities, and chemical industries

This workshop is free of charge. For more information, please check PROS' Web site at <<http://www.prosr.com/energy/workshop.htm>>.

PROS Revenue Management is the world's leader in pricing and revenue optimization solutions and the pioneer and dominant provider of revenue management to the airline and energy industry. PROS provides system solutions to the airline, energy, cargo, rail, healthcare, and broadcast industries, and has licensed over 235 systems to more than 95 clients in 39 countries. PROS' clients include 15 of the top 25 carriers in the airline industry.

The PROS mission is to maximize the revenue of each client using PROS' world-leading revenue management science, systems solutions, and best practices business consulting. PROS' clients report annual incremental revenue increases of 6-8% as a result of revenue management. PROS' solutions forecast demand, optimize inventory, and provide dynamic pricing to maximize revenue.

Founded in 1985 in Houston, PROS Revenue Management has a six-year compounded revenue growth of 40%, in large part due to the intellectual capital of its staff. Nearly half of PROS' professional staff has advanced degrees and the staff speaks a cumulative total of 26 languages. The company is profitable with Year 2000 revenue of \$29 million. For more information on PROS Revenue Management, please visit www.prosRM.com or call 713-335-5151.

Contact: Candy Haase - VP Marketing 713-335-5151 / 713-335-8144 - fax

If you no longer wish to receive updates from PROS, please click "Reply" and type "Unsubscribe." Please be sure to include your email address.

El Paso Complaint

Sender	jane.tholt@enron.com
Recipients	['tori.kuykendall@enron.com', 'randall.gay@enron.com', 'phillip.allen@enron.com', 'jane.tholt@enron.com']
File	tholt-j/discussion_threads/94.

Below is a summary of the discussions last week regarding the complaint against El Paso for oversubscribing the Socal Topock Point.

The meeting started out by summarizing the dollar impact of the Border cuts to Amoco and Burlington of \$3 million dollars and the additional fuel costs of \$15 million that they have incurred when the mainline fuel was reduced and the gathering fuel was increased. Accordingly, producers are seeking a minimum of \$17 million in compensation in some form or another.

The biggest concern is that a total of 1.2 bcf/day is being nominated at the Socal Topock which can only deliver 540000 mmbtu/day. Socal Gas stated that this problem should go away when there system becomes unbundled (referred to as Gatekeeper).. The proceeding is currently pending CPUC approval and could be implemented as early as October 1, 2001. When the Gatekeeper is implemented , only 540000 mmbtu/day will be accepted at the Socal Topock border and must match up with the intra-state transport.

SoCal Gas suggested taking the 1.2 bcf/day of nominations at the Topock delivery point and divide it up based on the original intent of the capacity- 400 to Mohave; 540 to Socal Topock; and 180 to PGE Topock. They also stated they would accept less than 540 at Topock but needed a minimum of 300 to meet core needs. However, they wanted some type of compensation if their volume was reduced. They also agreed to live with the status quo until the Gatekeeper was implemented. This would result in firm rights being established at Socal Topock based on downstream rights.

Williams owns Block 3 capacity and is willing to look at a CD reduction or a reduced take requirement or use of alternate points with a rate adjustment.

After much discussion, El Paso came back with the following counter proposal:

Recommended interim solution until Socal Gatekeeper implemented. Does not relate to receipt point rights.

- 1) Block 1 Capacity will always be alternate to Socal Topock (198000);
- 2)Block II Capacity can not be sold at PGE Topock (614000)
- 3) Amoco and OneOk each have a contract 45000/d which can go to Topock or Ehrenberg. It is recommended that they give up their Ehrenberg right and keep Topock right and Socal will give up like amount at Topock as well as shift an additional 70000 mmbtu/day from Topock to Ehrenberg resulting in approx. 115000 being shifted to Ehrenberg.
- 4) Rights fro expansion shippers would be carved up as follows:

Socal Topock PGE/Mohave Topock Texaco 40 135 Burlington 26 74 Aero 5 15 Borax 7 12 LADWP 0 36 SWGas 0 20

- 5) Socal Topock would now be divided as follows:

Expansion Shippers 78000 Socal Gas 425000 BLK 3 348000 (25-Amoco;20-Oneok;99-Williams;189 El Paso Merchant;15-Williams) Total 851000 540 divided by 841 would result in 37 percent cuts or 63 percent thruput.

The producers were not happy with having to live with 37 percent cuts and felt that any transport sold after their Sept 28 complaint should be cut off the top which would be El Paso merchant services Blk 3.

Separate meetings were then held amongst the Topock shippers to discuss El Paso's counter -proposal.

Producer group came back and told El Paso that they want the 63 percent thruput increased. Will accept CD reduction, rate design change or other forms of compensation. For the recommended volumes moved to Mohave/Pge Topock, they

would consider a 30 percent reduction in CD demand as well as converting that path to a 100 volumetric rate. In other words, if the producers used the delivery point, they would pay max rate. If they did not, they would not pay anything.

Block 3 shippers would agree to reduce deliveries to Socal Topock if their deals were converted to an agreed upon load factor-maybe 70 percent. For volumes shifted to non-Socal Points , they also want a 100 percent volumetric rate.

Bottom-line is how much dollars is El Paso willing to pay to resolve this case. Each party is requested to submit a proposal to El Paso and they will study its entirety. No follow-up meeting was scheduled.

Another topic that was also being discussed at the meeting was the perceived gaming on the system by the full-requirements customers-ie nominating more gas than they need in anticipation of cuts. It is thought that if this could be controlled there may be more certainty in the san juan regarding flows. El Paso recommended the following : Limit noms on Cycle 1 from San Juan based on previous day's total nom from all basins. No limits on Cycle 2-4. This caused some concerns because of week-end load swings andfluctuatingpower-plant loads. However, eoc's were willing to establish a technical committee to work on a formula if theSocal Topock point gets resolved.

Regarding pooling, El Paso is proposing to add 8 additional pools in the keystone and 3 additonal pools in the san juan and 1 additional pool in the bondad. This process is in its early stages of conflict. Most people (Duke, Southern, Williams, Coral) are not on board with this. I will keep you advised of development. Please advise if you have any questions.
