HoustonStreet Demonstration

Sender	bob.shults@enron.com
Recipients	['travis.mccullough@enron.com', 'andy.zipper@enron.com', 'andrew.edison@enron.com']
File	zipper-a/hs/3.

On May 22, 2001 HoustonStreet representatives (Frank Getman, John Wyman and David Cuadros) came to Enron to give us a demonstration of the gas interfaces. HoustonStreet was allowed to load the required .cab files on the demonstration computers prior to the demonstration. HoustonStreet provided us with a script to follow relative to the demonstration as well as a list of test and production mappings. During the demonstration we experienced the following:

1 - 8 second delays between a price update on EnronOnline and a price update on HoustonStreet. With just five products active we experienced a delay of up to 5 seconds. Due to the delay in price updates, transaction attempts on the HoustonStreet platform resulted in a high percentage of failed transactions with Enron. When we activated Product ID 16612 (US Gas Basis PEPL Jun-Oct01) the product showed up on EnronOnline but did not show up on HoustonStreet. HoustonStreet provided us with a list of products which had been mapped in the test environment and this product was included on the list. HoustonStreet indicated that they had verified the mapping of all the products on this list. We reviewed the mapping of this product by Enron and confirmed that it was active and mapped. Incorrect mapping of products has the potential of allowing transactions to occur with mismatched product types. When we attempted to transact on Product ID 16600 (US Gas Basis NGI Chicago Jun-Oct01) we were unable to complete a transaction even when the bid and offer prices were not changing. These transaction attempts should have resulted in successful transactions. We also experience instances where the bid and/or offer price would disappear after a failed transaction attempt and not reappear even though the price was still present on EnronOnline. In many cases the price would disappear for up to 30 seconds or more. Although we did not witness any incorrect transactions, general functionality failure may or may not result in incorrect transactions. At a minimum this type of behavior would result in frustration on the part of the counterparty when a transaction attempt results in a failure with no subsequent price move or a disappearing price. A review of the transactions we recorded versus the transactions indicated by HoustonStreet reveals some discrepancies. In an email from John Wyman dated 5/23 (forwarded separately), John Wyman indicated that they had cleaned their database just prior to 3:00 PM and gave us just the trade count beginning at 14:58 on 5/22. Although there has not been a deal by deal reconciliation of the trades, we compared our total trade count beginning at 14:58. If the deal counts do not match this would result in substantial financial exposure. Below I have highlighted the HoustonStreet transactions by counterparty versus the EnronOnline transaction count:

HSE EOL

Arizona 12 14 Avista 03 03 Adams 17 19 BP 57 58

Total 89 94

Based upon my review of the demonstration, I continue to believe there significant potential exposure associated with the HoustonStreet interfaces.

Kiodex documents

Sender	travis.mccullough@enron.com
Recipients	[andy.zipper@enron.com', 'drew.ries@enron.com']
File	zipper-a/kiodex/19.

Andy -

We wanted to keep you in the loop on all of the Kiodex documents -- attached are copies of the Stockholders' Agreement, the Stock Purchase Agreement, and the Warrant Agreement that we are preparing to send out to Kiodex for their review (these incorporate our comments to Kiodex' drafts). Our comments to these documents were consistent with the approach that we took in the HoustonStreet and TrueQuote deals.

This is actually the second round of comments that we are sending in -- this round of comments is to reflect the new structure that we needed to implement to get the desired accounting treatment, which we have already discussed with Kiodex. Since it is just a follow up to comments we have already sent, we will probably go ahead and send them out to Kiodex, but there will be more than enough time to get any comments you may have in front of Kiodex as well.

Travis McCullough Enron North America Corp. 1400 Smith Street EB 3817 Houston Texas 77002 Phone: (713) 853-1575 Fax: (713) 646-3490 ----- Forwarded by Travis McCullough/HOU/ECT on 02/20/2001 05:22 PM -----

Travis McCullough 02/20/2001 09:39 AM To: Michael K Patrick/NA/Enron@Enron cc: Drew Ries/Enron@EnronXGate bcc: Subject: Kiodex documents

Mike --

Per Drew's request, attached are the Stock Purchase Agreement, Warrant and Stockholder's Agreement for your review. The final agreement, the Co-Marketing Agreement, will follow shortly. As Drew may have mentioned, we would like to circulate these documents to Kiodex tonight, so it would be helpful to get your comments as soon as possible today.

FW: Broker Client for UK and European Gas and Power

Sender	bob.shults@enron.com
Recipients	[andy.zipper@enron.com', 'lara.mckinney@enron.com']
File	zipper-a/broker_client/6.

Richard left me a message today and indicated he was comfortable with out Broker Client methodology. I will touch base with him tomorrow to give him an update on all the deals.

-----Original Message-----

From: Shults, Bob Sent: Friday, May 25, 2001 11:53 AM To: Lewis, Richard Subject: FW: Broker Client for UK and European Gas and Power

I know that you are aware of this effort. I wanted to make sure everyone was comfortable with the fact that we are dealing with brokers that do not have the collateral with us to cover a broken trade. This is no different than the way you deal with

brokers on the phone. Ok with you.

-----Original Message-----

From: Sherriff, John Sent: Thursday, May 24, 2001 8:14 PM To: Shults, Bob Cc: Lara McKinney/ENRON@EUEnronXGate@ENRON; Lewis, Richard Subject: Re: Broker Client for UK and European Gas and Power

Bob

I am fine with this as long as Richard Lewis is aware of this effort and supports it.

John

From: Bob Shults/ENRON@enronXgate on 24/05/2001 10:16 CDT To: John Sherriff/LON/ECT@ECT cc: Lara McKinney/ENRON@EUEnronXGate

Subject: Broker Client for UK and European Gas and Power

John,

We are in final negotiations with APB and Prebon brokers for a one year Broker Client license for UK and European Gas and Power. Broker Client allows the broker to execute for their customer on prices posted on EnronOnline. The brokers pay an annual license fee and gets no broker fee if they execute on EnronOnline. The trading organizations in the North American markets have been willing to take the risk associated with a broker "breaking" a trade. This has been a long standing practice on phone brokered deals. Prior to signing these deals Andy Zipper wanted me to clear it with and make sure that you were comfortable with brokers executing online without collateral to cover deal breakage risk. We do put the credit risk against the counterparty that the broker is executing for and we do have liquidated damages language in the broker agreement.

Please call me on 713 853-0397 if you have any questions. Thanks.

From: Shults, Bob Sent: Monday, May 21, 2001 4:07 PM To: Puthigai, Savita; Engel, Thomas; Oberai, Ricky; Denny, Jennifer; Motsinger, Matt; Meredith, Kevin; Hillier, Bob; Lim, Kenneth; Bowling, Chris Cc: Zipper, Andy; McCullough, Travis

Subject: FW: Schedule for Tuesday PM.

Attached is a proposed test plan from HoustonStreet for tomorrow. I have reserved conference room 2712 beginning at 2:30 tomorrow and will escort HoustonStreet onto our floor at 2:30 tomorrow. They will be allowed to set up machines from 2:30 to 3:00. At 3:00 we will allow HoustonStreet to discuss their plan prior to our review.

Enron has terminated the price posting agreement and has no obligation to do testing. We have simply agreed to review their system.

During the review anyone working with HoustonStreet should refrain from making any comments (positive or negative) concerning the performance of the system. We will simply take the review under advisement.

All discussions with HoustonStreet should be handled by myself or Savita.

If you have any questions call me on 30397.

Monday, May 21, 2001 3:36 PM To: 'Bob.Shults@ENRON.com' Subject: Schedule for Tuesday PM.

Bob, I'll give you a call in the AM to see about lunch.

We would like to get started between 2-2:30 setting up the machines that we will be using during the demonstration. This should take approximately 1/2 hour to download the correct .CAB files and ensure that the application installs correctly. We will need to have administrative rights on these machines in order to facilitate the installation.

At 3:00 if we could start in a conference room for approximately 15 minutes we can review the demonstration scenarios and our objectives. From 3:20 - 3:40 we will run through the demo scenario 1. From 3:40 - 4:00 we will run through the demo scenario 2. From 4:00 - 4:45 will be a free form testing time. From 4:45 - 5:00 wrap-up, review, Q&A.

I'm getting ready to head to the airport - If you have any questions etc, don't hesitate to give me a call on my cell phone - 603-591-9004. Thanks,

John Wyman HoustonStreet Exchange (603) 766-8730 (603) 591-9004 (cell) (603) 433-6875 (fax)

Don,

Concerning your request for a discounted rate on Broker Client I offer up the following:

\$200 K if signed by COB 6/8 \$225 K if signed by COB 6/15 \$250 K if signed after 6/15

Just to let you know we have seen significant activity on the Broker Client since its implementation. In addition we have experienced a steep growth curve on the number of transactions. I believe that many of the concerns by your customers are going away as this tool has become a common practice in the industry.

You can find Mark Greenbergs email address above. Please have your attorney deal directly with mark on the Agreement. Thanks

From: Shults, Bob Sent: Wednesday, May 30, 2001 6:14 PM To: Zipper, Andy Cc: Diamond, Daniel; Carter, Carl; Forster, David; Bridges, Michael; Cummings, John Subject: Origination Priorities

Per your request we have outlined our priority origination companies:

Pipelines: We have compiled a comprehensive list of pipelines and begun to develop a prioritization strategy. Our original focus will be targeted at the most active capacity release and parking & loaning pipelines. In addition we are targeting certain regional pipelines and low liquidity pipes looking for a boost to their transportation volumes. (We have included some pipelines in the list that have already been approached by D. Forster that we still consider good prospects; Dave will continue to work on these pipelines)

ANR (Forster talked to parent El Paso but not ANR directly) CGT (Forster) Columbia Gas Transmission Dominion Transmission Gulf South Pipeline (needs liquidity) HPL (regional) - medium Iroquois (regional) - medium Kern River (Forster talked to Transco/Williams) Lone Star (regional) National Fuel (regional) Northwest PL (Forster talked to Transco/Williams) Oasis Oneok Transmission and Storage Panhandle Easter (Forster) Questar Reliant - Arkla (needs liquidity) Sabine Pipeline SONAT (Forster talked to parent El Paso but ANR directly) Trunkline (Forster) Tennessee (Forster talked to parent El Paso but ANR directly) Transco (Forster) Vector (regional) Valero Viking (regional)

Gas Storage: We have obtained a database of North American storage fields and are continuing define our priorities in the storage sector. We should have this list in a couple of days.

Coal: A cursory review of the coal space and have identified a few opportunities. We have listed below a few targets for the coal sector. We will continue to look for additional opportunities in coal. We have met with the coal group and they are open to allowing competing prices on EnronOnline.

Rail Cars: Burlington Northern, CSX, Union Pacific, Canadian National, Norfolk Southern Pittsburgh Seam coal product - Allegany Energy Global Markets International Coal - Billiton Marketing Ag - equity owner of Global Coal Petcoke product

Gas and Power: Under review.

Bob,

As a first cut at the Storage facilities, you might want to list the companies which Paul recommended, adding according to size of facility as necessary to round out the list. You can always re-prioritize the list as you make calls and/or get more information.

I note the pipelines list is in alphabetical order. What does the order look like if you prioritize using the strategy you identified?

Will you guys be maintaining some kind of spreadsheet or other to track progress with each company?

How soon do you anticipate contacting the top 5 on each list?

Dave

As many of you are aware, over the last few weeks the KiodeX transaction has changed such that it no longer includes the sale of EnergyDesk. The new transaction structure is limited to the KiodeX/EOL Strategic Relationship and performance warrants. Attached is the final version of the non-binding KiodeX LOI which was signed November 21, 2000. Our goal is to finalize the documents and close by year end. If anyone has any questions or comments please feel free to give me a call at the numbers listed below. Thank you.

Andy,

Attached is the contract draft for NGPL, which I have forwarded to Dave Devine.

The contract was originally drafted by Mark Taylor and has been revised by Travis.

I have also reviewed it.

Please let me know if you wish to make any comments on it. I informed Dave that the draft I sent him was still subject to internal "departmental approval" - so we can still make changes, if any are necessary (and I can't imagine they will not have any comments!)

Dave

Hi Andy,

Thank you for briefly meeting with me on November 15th to discuss the questions we were looking for on the Swaps topic for Crack Spread, BTU and Spark Spread.

Per our conversation, you stated that you wanted to go away to work on these practice questions for Crack Spread, BTU and Spark Spread. As you know, we were hoping to receive some of your questions this week. Do you have any idea when you will be able to send them to us or meet with us to help drive these questions out.

Let me know if you have any questions!

Thanks, Monica L. Brown Accenture Houston - 2929 Allen Parkway Direct Dial: +1 713 837 1749 VPN & Octel: 83 / 71749 Fax: +1 713 257 7211 email: monica.l.brown@accenture.com

Hi Andy,

I'm not sure if Andy Lewis explained to you what we were working on with Enron. Basically, our team is responsible for creating a performance simulation to replace Enron's Basic Risk Management course. Along with the simulation, a Knowledge System (series of html pages) will be delivered to each learner. This Knowledge System is a series of topics or

"chapters" each consisting of content that will help the learner perform throughout the simulation. Think of this as a encyclopedia, where the learner can go to as a source of reference. Topics include, but are not limited to: Hedging Basics, Risk Identification, Swaps, Options, Commodity Fundamentals, and Accounting & Reporting.

I've attached the topic outline for Swaps and the practice exercises and graphics section of the Knowledge System for you to review. (See attached file: Framework Swaps_Final.doc)(See attached file: Swaps Graphic ideas and practices_5.doc)

Sheri and I are responsible for this Knowledge System and would like your help in the Swaps topic. Specifically, we would like you to help us with practice exercises the learner will complete within the Swaps topic and graphic ideas that will also support the content in this topic. In addition, we are hoping you can provide us with some of the questions that is outlined in the topic outline.(see above)

I will still like to meet with you this afternoon at 3:00pm, so let me know what your schedule looks like.

Let me know if you have any questions, I can be reached at X5-6687.

Thanks, Monica L. Brown Accenture Houston - 2929 Allen Parkway Direct Dial: +1 713 837 1749 VPN & Octel: 83 / 71749 Fax: +1 713 257 7211 email: monica.l.brown@accenture.com

File zipper-a/kiodex/7.

Travis McCullough Enron North America Corp. 1400 Smith Street EB 3893 Houston Texas 77002 Phone: (713) 853-1575 Fax: (713) 646-3490 ----- Forwarded by Travis McCullough/HOU/ECT on 03/12/2001 10:22 AM -----

"Stockbridge, Edward T" <tstockbridge@velaw.com> 03/11/2001 07:02 PM To: "McCullough, Travis (Enron)" <travis.mccullough@enron.com> cc: "Telle, Michael S." <mtelle@velaw.com>, "Breeland, Pat" <pbreeland@velaw.com> Subject: Revised Co-Marketing Agreement

Travis:

Attached please find the revised Co-Marketing Agreement. This incorporates the changes that we discussed on Friday. It does not, however, include a provision whereby Enron could terminate the agreement if the Warburg financing is not completed by April 30th. You said that you wanted to leave that out of this draft, but to reserve the issue in the transmittal email.

The redline shows changes from my last draft (not the Kiodex redraft). I will try to prepare a redline showing changes from the Kiodex draft of March 6th, but I don't know if that will be possible given the state of Kiodex's document.

If you have any questions regarding the revised draft, please do not hesitate to contact me.

Ted

Revised language for co-marketing agreement

Sender	travis.mccullough@enron.com
Recipients	['andy.zipper@enron.com', 'k..patrick@enron.com', 'tstockbridge@enron.com', 'drew.kanellopoulos@enron.com']
File	zipper-a/kiodex/2.

Drew and I have spoken about his suggested changes to the co-marketing agreement regarding the annual mail-out. I understand the issue to be that annual mailout to the EnronOnline customer list that we are giving under the stock purchase agreement needs to stand on its own as very valuable consideration (and it is). The annual mail-out previously referenced in the co-marketing agreement is so similar to the initial mail-out in the stock purchase agreement, that a conclusion could be reached that the annual PR campaign is the real consideration for the 12.5% stock (i.e., that it really takes annual mailings by Enron before Kiodex gets any value out of Enron having done the mailout to its customer list). Drew indicated that other co-marketing efforts would probably be OK, just not the same ones that we used to get the 12.5%. Based on this, I have prepared the following revision of Drew's suggestion (since we don't know what that distribution will look like today, I believe we need the items in (i), (ii) and (iii) to limit our exposure on this obligation. =20

At least once during each twelve-month period during the term of this Agreement, Enron and Kiodex will cooperate in an annual distribution of marketing and promotional materials with respect to the Kiodex Application, provided that (i) any such materials to be distributed shall be in form and substance mutually acceptable to Enron and Kiodex; (ii) the timing, manner, and targeted audience of such distribution shall be mutually agreeable to Kiodex and Enron; (ii) any materials distributed to Enron Customers that are not also Kiodex Customers may only be distributed by Enron and must market or promote the Kiodex Application as an additional functionality of the Enron Web Site available through the Kiodex Lite Tool; and (iii) no such distribution shall result in any expense (including labor and materials) in excess of \$_____. =20

To: "McCullough, Travis (Enron)" <travis.mccullough@enron.com> cc: "Collins, Christopher" <chriscollins@velaw.com>, "Wills, Anthony" <awills@velaw.com> Subject: Redraft of the Exclusivity Agreement

Travis:

Please find attached a clean and redline version of the revised Exclusivity Agreement, with the changes that we discussed. The redline shows changes from the draft submitted to us by eSpeed.

Per our earlier conversation, you said that Andy was still thinking about one open point, namely: Whether the definition of the Enron Platform should be modified to anticipate some changes that may occur. Specifically I suggested that the requirement that the Enron Platform be "operated" by an Enron Party be deleted, and leaving only the limitation of ownership.

I have given Anthony comments on the series designation. He will be making other changes to the designation and will forward it to you directly.

Please let me know if you have any questions or comments, or if I can be of any further assistance.

Kiodex stock purchase agreement

Sender	travis.mccullough@enron.com
Recipients	['andy.zipper@enron.com', 'mtelle@velaw.com', 'jay.fitzgerald@enron.com', 'tstockbridge@velaw.com', 'drew.ries...]
File	zipper-a/kiodex/17.

To summarize where we are on the accounting issues related to booking all of the income related to our 12.5% equity investment in Kiodex in Q1:

The 12.5% equity investment has to be a completely separate transaction from the co-marketing arrangement for which we are paid in warrants.

Kiodex cannot clawback or redeem any portion of the 12.5% if Enron walks the co-marketing agreement at any point in the five-year term. It is ours to keep.

The 12.5% equity investment will be collapsed with the co-marketing deal (and therefore income can only be realized over the five-year term) if there isn't enough consideration for the 12.5% to make it look like a real deal. Mike Patrick believes that we can get the desired accounting treatment for the 12.5% if we deliver promotional materials to our customers and EnronOnline "statistics" as consideration for the 12.5%. We have not really spelled out exactly what this consideration is, but I have attached a draft stock purchase agreement in which we have attempted to do so in Section 5.11.

Kiodex wants to close this deal by March 7; we probably can't get the consideration in line by then, but we probably could by the end of the quarter. Kiodex wasn't crazy about giving us the 12.5% for anything less than the 5-year marketing agreement, and wanted a clawback on the shares even then; they sure won't give us 12.5% for a promise to deliver the

consideration by the end of March. This means we will have to close the deal into escrow, and can get the shares when we deliver the consideration.

Here are the questions for the deal team:

1. What can we give to Kiorex before the end of Q1 that supports our 12.5% equity investment. I can describe the promotional materials, but what "statistics" can we provide that will be valuable to Kiorex? (Remember that Kiorex will have to feel like they are getting SOMETHING for the 12.5% equity they are giving us, because again, it will be ours to keep regardless of what happens to the co-marketing agreement).
2. Whatever we decide to give to Kiorex for the 12.5%, we will have to be able to deliver it IN FULL by the end of Q1; otherwise, we can't get our shares, and we can't book the income.

Here is the stock purchase agreement; I wam working on the language in Section 5.11, but it gives you an idea of what we think we might be able to do.

Cargill NDA status

Sender	mike.haney@enron.com
Recipients	['andy.zipper@enron.com', 'jake.staffel@enron.com', 'michael.bridges@enron.com']
File	zipper-a/deleted_items/168.

Mike:

As we discussed a few minutes ago, here is the latest and greatest NDA between us and Cargill. As I mentioned, Greg has been extremely focused on getting NDA's in place before substantive discussions occur, so we'll need to get this in place before our next significant interaction with Cargill.

Note Greenberg's comments. Given the events of the last few days, I haven't followed up with our Cargill contacts yet, but we promised them we'd get back to them by yesterday. I would like to hear from Andy on the non-solicitation issue, but in my mind it should not be a problem to concede this point to Cargill. It looks like our lawyers would pop a blood vessel if we conceded on the Minnesota/New York law issue; maybe we concede on the first and they concede on the second.

I will also forward you (via separate e-mail) the other key communications we have had with Cargill.

Jake and I are looking forward to transitioning this and our other agricultural contacts over to you as soon as possible. Please let me know when we can discuss this, and we can call Cargill this afternoon.

Best regards,

Mike

-----Original Message-----

From: Greenberg, Mark Sent: Thursday, May 17, 2001 11:31 PM To: Staffel, Jake Cc: Jones, Tana Subject: Re: FW: NDA

Jake -

The Cargill changes are acceptable except for (1) the deletion of the non-solicitation provisions and (2) the change back to Minnesota law. The non-solicitation provision is a business call and relates to the disclosures being made and individuals involved in the project. If Cargill will have contact with key EOL IT personnel, the non-solicitation should be part of the agreement. As to the change of law, we cannot accept Minnesota and must have New York as this is a neutral forum.

Subject: Kiodex

Gentlemen:

Here is a revised draft of the Co-Marketing Agreement. This is not final and should not be released to Kiodex. This is an internal draft for our review. We can send it along tomorrow, after Travis and I finish addressing the open issues, which are:

1. How should we describe the Change of Control exception for Warburg, in light of the term sheet that gives Warburg rights to future financing. Should we stick with the single transaction?
2. We need to confirm the response time in Section 6.6(d). Kiodex wants to change 0.25 sec to 2 or 3 sec.
3. We need to confirm what information will be included in the Enron Transaction Data, and which data Kiodex will have to extract or add.
4. I deleted the termination right in Section 8.3(k) on the assumption that we are going to a concurrent closing.
5. I would like to confirm that the definition of the Kiodex Application is okay. I made that up, and no one has ever commented on it.

There may be some other minor points, but I think that this is most of it.

Travis, I will call you tomorrow afternoon.

Best regards,

Ted

File	zipper-a/kiodex/20.

Attached is a draft Co-Marketing Agreement for the Kiodex transaction for your review. As the deal has changed a lot since Kiodex' first draft, the attached is a substantial rewrite prepared in a short amount of time. We may not have caught everything, but we feel that this is a solid first draft that we are ready to send to Kiodex, subject to your review.

We would like to send this to Kiodex by the end of the day on Friday. I know this is short notice, so I have prepared the following list of key issues that may speed your review of the draft. Of course, we will advise Kiodex that any draft we send them remains subject to any additional comments that we may have. Please contact me if you have any comments or questions regarding the attached.

- 1). Resources. To what extent will EnronOnline be willing to commit personnel/time/resources to Kiodex to make this work? Kiodex will probably ask for some commitment by Enron to assist it in addressing operational problems, etc. Is our only obligation to build the data feed, or are we obligated to modify it/repair it/revise it for changes in the Kiodex or Enron websites? See, for instance, Section 2.3 and Exhibit C that discuss our "co-marketing" obligations, and Section 3.2(a) is another provision under which Enron will be expected to devote some time and effort to the relationship.
- 2). Noncompete/Maintaining EnronOnline Flexibility. We assume that EnronOnline will want to maintain as much control over the EnronOnline website as possible and be subject to as few limitations as possible. We assume that Kiodex will have virtually no say in what the Enron site looks like or contains as long as we continue to give the link to the Kiodex site the same level of "prominence" on the site. See Section 2.4 (the "non-compete"), 2.5, and 4.3, and Exhibit C.
- 3). Control/influence over Kiodex site and Kiodex operations. What degree of control does EnronOnline wish to have over the Kiodex website and the manner in which Kiodex operates? For instance, do we want to ensure that Kiodex gives EnronOnline a comparable level of visibility on their site compared to that given to EnronOnline competitors? Do we want to establish specified performance criteria or standards for the Kiodex website? See Article 6 and Exhibit E.
- 4.) Suspension/termination rights. Under what circumstances should EnronOnline be permitted to suspend performance of or terminate the Marketing Agreement? Andy, we have incorporated a few provisions from the Posting Agreement that we thought had some application to this relationship, but there may be more. See Article 8.
- 5). Limitation of Liability/Indemnities. We will have to be comfortable with the scope and extent of Enron's liability to Kiodex and to third parties (Enron customers); we are taking the position that Enron will have virtually no liability to its customers or Kiodex for mistakes in the Kiodex reports, etc., but this will also have to be covered in more detail in the agreements that we enter into with our customers that choose to use the Kiodex service. See Section 11.

You will note that Ted Stockbridge has also inserted notes and questions throughout the text of the document related to certain issues. Please feel free to comment on any of these items as well.

File	zipper-a/tq/8.

Chris:

As I explained in our phone conversation today, we will not go live on Monday as the performance on True Quote to date is not satisfactory. In a joint meeting with True Quote on February 20, 2001 we discussed a testing plan that would target a go live date of March 12, 2001. Due to consistent delays in delivery of the True Quote test sight and GUI, we have not been able to complete many aspects of the plan. The limited testing we have done since getting a functional GUI on Wednesday has identified the following issues:

1. Unable to view and verify the test products for EnronOnline Power. 2. Unable to verify failed transaction errors on the TrueQuote test site. No error messages are being sent when transactions fail. (only able to verify failures reasons that

reach EOL). 3. Unable to stress test the system. 4. Prices and volume updates are being processed serially and are updating EXTREMELY slow. 5. Order History link on TQ test site does not appear to be functioning.

In order to move this process along we would like to see significant progress by Monday March 12th. In particular we would like to see the following:

1. At least 80% of the continuous price update standard of 20 - 25 updates per second 2. At least 80% of the peak price update standard of 100 - 200 updates per second 3. Ability to view and verify EnronOnline Power products 4. Ability to verify failed transactions on the True Quote

If we are able to see the progress on Monday we will need to begin stress testing immediately. Throughout next week we will monitor progress on the stress testing and determine the next course of action. The delays thus far have caused us to reschedule our testing teams calendar impacting other EnronOnline testing and roll-out. Further delays will continue to impact our development and testing schedule.

As I mentioned I think it would be beneficial to have one of our testers working at your sight to make sure that we all are seeing the same issues and progress as True Quote. We are agreeable to have one of our employees to your location to accomplish this.

I would also like to finalize discussions around the Access Agreement. I will have Mark Greenberg send our comments. Lets plan on talking on Monday to discuss the next step on this.

Thanks

"Chris Edmonds" <chris.edmonds@truequote.com> on 03/08/2001 09:36:00 PM To: <bob.shults@enron.com> cc: <dennis.crum@truequote.com> Subject: Current Status

Bob:

Per our conversation this evening, I have requested an earlier update from the team. While it may be cutting it close, we are still confident the system will be ready by Monday. Stew is extremely confident the performance issue will improve by fine tuning the stored procedures in the database. We are migrating the system tomorrow to our production environment. This will allow us the opportunity to flip the "live" switch the moment you and your team gives the green light. It will also allow us the flexibility of working with the environment via a "back door" in our production facility. This will actually expedite the process. I suggest we chat in the morning at your earliest convenience or 9AM CST, whichever comes first. One issue I need you to check on is your teams ability to quickly research the current status of specific DEAL IDs. I have heard from our team an issue during today's testing whereby a DEAL ID was missing, and could not be readily located by the EOL team. I need to know from your side what was improper about our request. I am sure there is a simple explanation.

We are close to making this a reality. I look forward to speaking with you in the morning regarding the appropriate next steps.

Best regards, Chris

Attached is a draft memo to Accenture walking through the big issues. As it turns out, there were way too many changes in our draft to go through many of them in any detail, and the memo basically says "We think this is a better approach and please don't blow up and go crazy until you have read the whole thing and thought about it" -- but I still think it's useful to send it out. Also attached is a suggested definition for "Enron Platform" --

Rosh, I'm sending over some hand-marked comments for your review -- one significant point is that I think we need a definition of "Data Services" that defines exactly what Accenture will do (reformatting Customer-Specific Transaction Data and providing it to Qualified Customers in an electronic format, but not including mid-or back-office services (which we may also want to define) -- some of the provisions (like the exclusivity) will be easier to grasp if we have a term describing what Accenture will provide.

I will be out starting at 11:00 for the Legal Department PRC (maybe out for the rest of the day), so if we can talk before then to get this wrapped up, that would be great

Travis McCullough Enron North America Corp. 1400 Smith Street EB 3882A Houston Texas 77002 Phone: (713) 853-1575 Fax: (713) 646-3393/3490

"Bhattacharya, Rasmani" <rbhattacharya@velaw.com> 06/03/2001 10:12 AM To: "Andy Zipper (E-mail)" <andy.zipper@enron.com>, "Mike Bridges (E-mail)" <michael.bridges@enron.com>, "McCullough, Travis (Enron)" <travis.mccullough@enron.com> cc: "Stockbridge, Edward T" <tstockbridge@velaw.com> Subject:

Attached for your review is a revised draft of the Licensing Agreement with Accenture. Ted has reviewed the draft and his comments are reflected. We look forward to finalizing and making the distribution to Accenture on Monday.

Following are some thoughts for your consideration:

1. Definition of Enron Platform. Andy's definition of "Enron Platform" excluded products substantially dissimilar to those listed on the platform, to which we added the qualification of listed on the platform as of the Effective Date. Is this correct? In addition, is there a possibility that Enron might split up the platform (i.e., by product type), and then sell off certain segments? If so, we may need to further modify the definition.
2. License Grants. Though the license grant with respect to Customer-Specific Transaction Data in Section 3.1 is limited to Accenture's right to re-format the data, we advise adding some restrictions to specifically negate their right to manipulate the data in certain ways, as per your previous business discussions. In addition, with respect to the SmartClient Software license in Section 3.3, Accenture will be permitted to freely modify the software for their own purposes, except to the extent the software is being used for receiving data through the Enron Data Feed. We need to confirm that the appropriate restrictions have been imposed.
3. Minimum Annual Payments. Section 5.1(b) provides that the Minimum Annual Payment is due at the end of each Contract Year. Is this satisfactory from the accounting perspective, or do we want more flexibility for purposes of booking these payments?
4. Audit Rights. In Section 5.4(b), we have added a limited right to do an operational audit, i.e., the audit can be initiated only on claim of breach, and can be performed only by a third party. We would like to discuss expanding this right.
5. Acceleration Rights on Termination. Section 7.6(b) permits us to accelerate the Minimum Annual Payments on Accenture's default for breach of contract. Is this the appropriate trigger?
6. Accenture Warranties. Should we add any warranties to Section 8.2?

7. Accenture Indemnity. We have expanded Accenture's indemnity obligation in Section 9.2(a), to cover any claims arising out the TSH Services or their modifications to the SmartClient Software. The only exception we have permitted is for data errors verified as Enron errors.

8. "Readable" Data. We have used the term "readable" in referring to the data in various places in the Agreement, including Section 4.1(a)(ii). In using this term, we intend to differentiate between the static data received by an Enron Customer, and the data to be received, "read" and then re-formatted by Accenture. We may need to select a more precise term with Jay's assistance.

Andy,

This technically possible if we model this as a standard product. To make it look like a realtime auction is also possible but will require some work. It's something that would be interesting to have.

Regards, Michael

-----Original Message-----

From: Johnson, Shelley Sent: Tuesday, June 05, 2001 2:20 PM To: Alatorre, Carlos Cc: Webb, Jay; Guadarrama, Michael; Perlman, Beth Subject:

All,

Dale Neuner and Ross Mesquita referred me to you all. I work with Global Strategic Sourcing and am looking to implement an "online marketplace" idea into Enron Online. This would involve vendors and suppliers providing bids in a structured format - kind of like a reverse auction E-Bay. Vendors would be able to see their competitors bids online, but not their names. Any registered vendor would be able to update their numbers online, "real time".

First, we would like to know if anything like this is being done at Enron. Next, is it technologically possible to bring this concept into Enron Online?

Please advise. We would like to do a test pilot as soon as possible with Crane Rentals. Please give me a call so we can discuss this possibility, 5-6528.

Thanks, Shelley

Dear Lydia,

It was great speaking with you. I was advised by Ms. Kitchen's office to touch base with Mr. Zipper for a presentation. As we discussed, I am enclosing a brief profile of Daksh for your review. (PDF file attached)

We provide online contact management services (such as e-mail, chat etc.) for both eBusiness and traditional-economy players embracing the web. Our clients include Amazon.com, Intuit Inc. and PayPal Inc. (the largest Internet payment service with over 6 million customers). We are currently operating at an annualized volume of about 3 million e-interactions and transact with over 30 million customers in the US on behalf of our clients. We have now close to 650 people and have extensive experience on multiple contact management platforms including Kana, eShare, Mombassa, Siebel, Talisma, Amazon.com proprietary platform etc.

You could also visit our website www.daksh.com <<http://www.daksh.com>>, to learn more about our company, the team and services we offer.

Key benefits we offer include:

* Unique co-sourcing model (operating through dedicated teams, customized processes and close-knit relationships) * High performance metrics - we will at least match your metrics * Significant reduction in time to market - typical 50-100 man projects go live in 6-8 weeks from sanction * Large cost savings - at least 50% of your current cost base

I would really appreciate an opportunity to set up a longer conversation on this opportunity with our Head of Business Development, Arijit who is based in New Jersey.

Please do not hesitate to contact us for any questions. Looking forward to hearing from you.

Thanks and Best Regards,

Vanderbilt Team - We had a very successful and fun Fantastic Friday this weekend with our Vanderbilt candidates. We invited 10 of them here for final round interviews. All of them accepted the invitation and came this weekend. Out of 10, 6 will receive offers and 4 will receive declines. The offer letters will go out today for overnight delivery. Candidates have until 1-14-02 to reply to the offer.

Recruiting is not over yet! Now its cultivation time!! I am going to assign cultivation teams consisting of one senior person and two analysts to be in contact with candidates weekly. The analysts on the team are responsible for sending me a weekly email updating me on the candidate's status, including any issues that may have come up. If you do not have an assignment but want to help with this effort, please go ahead. The more contact these candidates have with us the better! Of course, if you have any questions that you cannot answer, please contact me.

Thank you all for your help to this point, now its time to close the deal!! Beth

File	zipper-a/inbox/57.

Richard, Derrick and Alan:

I think we can all agree that Thursday's conference call was very constructive and promising. In order to ensure that we work together in the most efficient and effective manner, let us make sure that our communication channels among the four groups (Enron Net Works, Enron Global Markets, GM IS&S and GM Worldwide Purchasing) is always inclusive. I suggest the following contacts on all correspondence:

ENW - John Allario (713-853-4587) EGM - Alan Engberg (713-853-5279) IS&S - Mike Darrow (313-665-5206) WWP- Derrick Starosa (810-575-2221)

EGM and ENW have begun putting together the product and market description for each of the products specified at today's conference call. John and Alan are coordinating that effort along with Enron's Fundamentals Group. My understanding is WWP will likewise be ready to discuss its operational and product issues during the upcoming meeting in Detroit, tentatively scheduled for the week of June 11th.

The EGM/ ENW teams will provide a well researched product and market opinion of those petrochemicals initially deemed lacking sufficient market traction as well as those petrochemicals specified by WWP as potential Pilot Program participants. Those potential Pilot Petchems were identified as: (1) Benzene, (2) Butadiene, (3) Cumene, (4) Ethylene, (5) Methanol, (6) PG Propylene, (7) Styrene, (8)Toluene. Let's plan to determine the best day(s) to meet in Detroit by next Wednesday, June 6th.

Please advise me of any questions you may have or of any errors or omissions, which this email may contain. I look forward to working together will all of you on this effort over the next two weeks.

Best regards,

-John

Bob, I just wanted to follow-up on mapping from yesterday.

Test ID mapping - Sevita was highlighting the products that potentially were not mapping correctly. Could you fax this sheet with the highlighting so we can investigate further. Also, we have gotten several updates on the Production ID's for mapping purposes, but have not had any updates for the Test ID since Jan/Feb timeframe. We noticed that some of the products get new id's each month and this may be a contributing factor to the mapping since we don't have a recent update for test id's.

I am hopeful in that we may be able to move forward and again appreciate you and your team taking the time to work with us yesterday during the demonstration.

Please give me a call when you get a chance either at 603-766-8730 or on my cell 603-591-9004.

Thanks again,

John Wyman HoustonStreet Exchange (603) 766-8730 (603) 591-9004 (cell) (603) 433-6875 (fax)

Andy,

Back on December 15, 2000 you received a letter from True Quote confirming the redemption and forfeiture of 7,731,942 Common Units of Participation owned by Enron Net Works LLC in True Quote LLC. Part of that letter contained the updated capital structure of True Quote LLC subsequent to the redemption. However, the equity owned by APB Energy, Inc. was inadvertently left off that summary. The current capital structure is, and should have been described in that letter, as follows

B2B Internet Capital Corp. 7,440,000 Series A Preferred Units EnFORM Technology LLC 560,000 Series A Preferred Units APB Energy, Inc. 1,172,838 Common Units PG&E Energy Trading - Gas Corporation 15,000,000 Common Units Enron Net Works LLC 7,268,058 Common Units Employee Stock Option Plan 1,000,000 Common Units

If you have any questions about this, or any other matter, please don't hesitate to contact me.

Joe F. Wright General Counsel truequote.com 502-212-4909 502-212-4907 fax

From: John Wyman <jwyman@houstonstreet.com>@ENRON
[mailto:IMCEANOTES-John+20Wyman+20+3Cjwyman+40houstonstreet+2Ecom+3E+40ENRON@ENRON.com] Sent:
Thursday, May 10, 2001 4:31 AM To: Shults, Bob Subject: Client Defects and Resolutions...

Bob, We have some good news regarding our client and testing that we uncovered yesterday.

On Tuesday , during our testing with Enron we were unable to duplicate or see some of the issues that John Applegate et al were describing and seeing which concerned me. We have been working very hard to try to see why this was happening.

We uncovered 2 things: 1) When a client application leaves the blue window open that indicates that the bid or offer is not available, the client stops processing messages which will cause the client to fall behind. If this window is left open for 10 seconds, goes away for 2 seconds and is displayed again for 10 seconds, the client will have fallen behind 18 seconds and took 25 seconds to catch up. This is a cumulative issue in that the more times this window is displayed, the client is consistently falling farther and farther behind which would explain why after 45 minutes of testing it took 5 minutes to catch up and display all of the bid or offer not available warning and confirmations. We have addressed this problem and are currently testing it into the evening to ensure that when this window is presented to the user, the client continues to process updates without causing any backlog. Included with this correction the label has been changed from ERROR to WARNING, since this really isn't an error condition.

2) The second item is related to inconsistent performance and numbers not updating on the screen, but when the number is selected it updated to the correct number. After trying to recreate this problem on numerous machines, we finally saw the scenario. It is the result of an older version of the software running on that machine. This was verified by running the older version of the software on multiple machines which resulted in inconsistent performance and behavior from the client application. To resolve this issue, we are in the process of building a new release of the client application that updates all of the version numbers on the software so that a new cab download will be triggered which will automatically update all of the required files on the Client. This process will ensure that all of the clients that we are using for testing have the latest version of the software. In order for the client to download and install the latest .cab file, the user will require Administrative Privileges on the computer installing the new software.

In Summary : A) It appears that we were testing with different versions of the client software. B) We found a problem that resulted in the client falling behind. C) We have corrected this problem and have been testing for the last several hours. D) We changed the wording of the Error Window to indicate a Warning.

Given this information we would like to schedule another test with you later today, ensuring that we all have the latest software, so that we can all feel confident that we have evaluated the correct version.

In our testing we have been hitting the software simulating enron updates and continuous transaction attempts for 45 minutes to and hour with 8 clients. The performance times between the transaction request and the fill or fail message remained consistent across all of the clients at 3-5 seconds.

Please feel free to call me @ 603-766-8730 or John Applegate 713-590-5123..

Thanks,

John Wyman HoustonStreet Exchange (603) 766-8730 (603) 591-9004 (cell) (603) 433-6875 (fax)

Project Status

Sender	fgetman@houstonstreet.com
Recipients	['andy.zipper@enron.com']
File	zipper-a/hs/9.

Andy,

Below is an email with the current status of our project. As I mentioned in my voicemail, we were surprised by the performance of the system on Tuesday. When we tried to replicate Tuesday's test results, we realized that Enron's test environment had been using an older version of the software. As you will also note below, we have used this time to make performance improvements and change the "Error" message per your suggestion. If you have a chance, please take a look at the current version. I think it addresses the concerns your team had on Tuesday.

Please give me a call when you have a chance.

Best regards, Frank

Hi Lydia,

Just to keep you in the loop, apparently Andy will not be in London for this meeting we spoke about yesterday. We will however, be including him via video conference. Due to the time difference we have moved the meeting till 5pm (London time) on the 8th June to accommodate Andy's participation. Would you be able to book a VC room for him please, and advise which room he will be situated in. The meeting will be 2 hours maximum in duration.

Many thanks Suzanne

ENRON CORPORATION Dear Hasan Imam

This is a reminder that AT&T has reserved the July 15, 2001 maintenance window for a Frame Relay upgrade as stated at the beginning of the year. A final notification will be sent next month to confirm and provide details on the type of upgrade and the expected impact.

AT&T would like to thank you for your patience and support with these periodic improvement activities. If you have any questions concerning the upgrade, please contact your account team. You may also contact one of the AT&T Frame Relay Product Management representatives, Patti Law on 908-234-4803 or Nancy Auerbacher on 908-234-6245.

If you need to make changes to your contact information for these notifications, please contact Helen Fastow on 908-234-4922.

Sincerely,

Nancy Auerbacher AT&T High Speed Packet Services

E-Trading 'Veteran' EnronOnline Calmly Faces NewcomersEntering Market and United ICE-IPE.

06/07/2001 The Oil Daily (c) 2001 Energy Intelligence Group. All rights reserved.

In the world of energy e-trade, Enron is one of the veteran players, having launched its EnronOnline commodity trading platform in November 1999 - and having completed its one-millionth transaction on the trading system late last month.

Trading activity on EnronOnline is driven in large part by the Houston-based company's strength in the North American natural gas and power markets. But Enron wants the market to know the company is much more than a gas, power, and now bandwidth trader. Last week, Enron added crude oil and refined product options to EnronOnline, to go alongside the existing 52 products the company currently lists in the US oil market. Larry Gagliardi, director of US crude and products trading for Enron, says that new contracts are constantly being considered, based mostly on recommendations from users of its trading platform.

In the US, Enron lists several types of primarily financial crude contracts on EnronOnline. These include swaps that replicate New York Mercantile Exchange futures contracts, jet differential swaps, and gasoline crack spreads. Enron also has a physical West Texas Intermediate contract that is traded around-the-clock.

The company posts a bid price and offer price for all of those contracts, which means 104 US crude and product contracts are available on EnronOnline. In US markets, about 5 million-6 million barrels of firm oil quotes are posted daily on EnronOnline. The company electronically lists oil contracts through 2002, but the system can accommodate longer-term deals.

Outside the US, Gagliardi says that EnronOnline has been most successful in European crude markets. "Asia has been a little harder, technologically," he says, noting that computer technology and internet connections are less reliable there.

Enron's offerings in Europe include a swap for the differential between dated Brent quotes and the front-month Brent futures contract on London's International Petroleum Exchange (IPE), and swaps that mimic the IPE's Brent and gas oil futures contracts. A range of contracts are offered in Asia, including straightforward swaps for the Dubai and Tapis crude benchmarks, as well as for regional gas oil, high-sulfur fuel oil, and kerosene.

When EnronOnline first launched, Gagliardi says, many brokers thought Enron was committing suicide by posting hundreds of commodity prices online. But the gamble has paid off. Enron's North American gas and power trading volumes, for example, have exploded to nearly twice the size of volumes handled by its nearest competitor, thanks to EnronOnline. Last year, Enron traders used the trading platform to complete more than 3,000 trades per person, up from 672 per trader in 1999.

In recent months, Enron's trading activities have been overshadowed by other developments - most notably the oil company-backed IntercontinentalExchange's planned acquisition of the IPE.

Intercontinental, or ICE, is also making a push in Asian oil markets, having just opened an office in Singapore. Far East derivatives offered on ICE include Singapore gas oil, fuel oil, kerosene, and naphtha oil product swaps. ICE also offers Dubai and Tapis crude oil swaps.

Despite being faced with new competition, Enron's Gagliardi says the company's strategy hasn't changed. He bets that the liquidity and prices on EnronOnline will go unmatched by others.

Enron's online trading system is different from most of its rivals. ICE, gas and power exchange TradeSpark, and others bring together buyers and sellers to trade anonymously online. On EnronOnline, Enron is a counterparty to every deal done on its site.

Some traders have criticized Enron's trading platform, saying they prefer doing deals on exchanges with hundreds of participants - not on an online platform that they say is a sales channel for Enron.

Gagliardi admits that the exchange model sounds appealing, but says that, so far, those exchanges have been unable to offer the same trading opportunities available on EnronOnline.

"The reality of the situation is that no one wants to put out a number and leave it firm," he says of other online commodity exchanges.

Jeff Gosmano.

Today, after an extended effort to resolve certain professional differences, Bruce Gilardi decided to offer his resignation. I determined that it was in the company's best interest for me immediately to accept it.

I'd like to acknowledge Bruce for the important contributions he made, and the standard he set for Kiodex to offer world-class client services. We all wish him the very best in whatever professional endeavors he chooses to pursue.

Kiodex is stronger than it's ever been, thanks to all of you. Our differences with Bruce relate to his role in the Company's management. Raj M and I are available to speak with anyone at Kiodex who would like to talk about Bruce's departure. Please send either one of us a meeting request.

Raj M and I will be sharing with you our plans for Client Services in the very near future.

All the best, Marty

Call for Participation: 4th Annual Interactive Energy 2001

Sender	wcasso@zeusdevelopment.com
Recipients	[andy.zipper@enron.com]
File	zipper-a/deleted_items/39.

4th Annual Interactive Energy 2001 - CALL FOR PARTICIPATION Why You Should Participate: Timing - Utility deregulation in Texas will take place January 1, 2002. Interactive Energy 2001 will provide the core issues for discussion that will shape the year 2002 and beyond in respect to the challenges and solutions affecting energy companies striving to compete in the newly deregulated utility industry. Location - Nestled in downtown Houston, the George R. Brown Convention Center is the ideal gathering spot for energy IT executives. Enron, Reliant Energy, ExxonMobil, Shell, Chevron, Texaco and Dynegy, among other global energy companies, set their roots within a five-mile radius of this facility. Schedule - The Interactive Energy conference management team has devised the agenda for delegates, who are currently re-thinking their e-business strategies and B2B exchanges, to explore the technologies that will continue to add value for the industry. The exhibit floor hours are power-packed with technology demonstrations, luncheons and receptions offering multiple networking opportunities. To submit an abstract or for exhibit and sponsorship opportunities, please visit our newly designed website at www.InteractiveEnergy.com or call me directly at 832-200-3718. Sincerely, Whitney Casso Director of Marketing Zeus Development Corporation 832-200-3718 Fax: 713-952-9526

Two new additions to the periodic table of elements

Sender	millertr@bp.com
Recipients	[e-mail <.miller@enron.com']
File	zipper-a/deleted_items/43.

Element Name: WOMANIUM Symbol: WO Atomic Weight: (don't even go there) Physical properties: Generally soft and round in form. Boils at nothing and may freeze any time. Melts when treated properly. Very bitter if not used well. Chemical properties: Very active. Highly unstable. Possesses Strong affinity with gold, silver, platinum, and precious stones. Violent when left alone. Able to absorb great amounts of exotic food. Turns slightly green when placed next to a better specimen. Usage: Highly ornamental. An extremely good catalyst for dispersion of wealth. Probably the most powerful income reducing agent known. CAUTION: Highly explosive in inexperienced hands!

Element Name: MANIUM Symbol: XY Atomic Weight: (180 +/- 50) Physical properties: Solid at room temperature, but gets bent out of shape easily. Fairly dense and sometimes flaky. Difficult to find a pure sample. Due to rust, aging samples are unable to create electricity as easily as younger samples. Chemical properties: Attempts to bond with WO any chance it can get. Also tends to form strong bonds with itself. Becomes explosive when mixed with KD (Element: CHILDIUM) for prolonged periods of time. Neutralize by saturating with alcohol. Usage: None known. Possibly good methane source. Good samples are able to produce large quantities on command. CAUTION: In the absence of WO, this element rapidly decomposes and begins to smell.

introduction

Lydia - would you please pass this on to Andy Zipper.

Andy, my name is Kevin Morrissey. I work on special projects for a couple of our executives, and have been designated point person for Enron opportunities. First Data Corp is a processing company and money movement company. We own Western Union, which passes billions of dollars, and do the processing and settlement for credit cards-doing over half of all Visa and Master Card. We pass and settle trillions of dollars a year. We have a very large network with banks and financial institutions. We started doing some processing for Enron Energy Services a year ago, and think there are other opportunities for both our companies. I would like to spend some time with you understanding Enron On Line to see what we might do for each other.(Lou Casari gave me your name - he said you were the best person to explain EOL). I will be in Houston next week and wonder if you have some time to meet with me on Tuesday May 29 or Wednesday May 30. I have some open time 3-5 PM on both days. If you could leave me a message, or have Lydia leave me a call at 303-488-8226, I'd appreciate it. Thanks. Looking forward to meeting you.

FW: NEW WEATHER SWAPS ON THE INTERCONTINENTAL EXCHANGE

Sender	andy.zipper@enron.com
Recipients	['john.griffith@enron.com']
File	zipper-a/sent_items/371.

We should be watching this... -----Original Message----- From: IntercontinentalExchange [mailto:nyadmin@intcx.com]
Sent: Thursday, November 15, 2001 11:14 AM To: Zipper, Andy Subject: NEW WEATHER SWAPS ON THE INTERCONTINENTAL EXCHANGE

<<http://www.intcx.com/weather/images/header7.gif>> IntercontinentalExchange is pleased to announce that weather swaps trading will be included in its new version 8 release. These fixed-for-floating financial products will be cash settled on a five-day average temperature, Monday - Friday, for the current week and for the forward week. Temperatures used for the settlement of these products will be those reported by EarthSat, a widely recognized and independent source of weather data. Settlement temperatures provided by EarthSat will be available via the IntercontinentalExchange website. The hub locations for weather trades will be the primary airport weather stations at Chicago-O'Hare, Dallas-Fort Worth, New York-La Guardia, Philadelphia-International and Sacramento-Executive. The standard contract size for all locations will be \$10,000 per degree Fahrenheit, with a tic increment of 0.1 degree Fahrenheit or \$1,000. There are no payout limits on the contracts. The design and development of these new weather products was done under the guidance of Aquila Energy Marketing Corp., a recognized leader in weather product concepts. In addition, IntercontinentalExchange has worked with Aquila and other major weather market participants, including Reliant Energy, Mirant Americas, and El Paso Merchant Energy, to build consensus and support for these new products. To trade weather swaps you must have our new version 8 release installed on your system. An advisory with details about this new release is being sent to you by separate email. We encourage all of our users to take a serious look at the new weather products being offered by the IntercontinentalExchange. Please contact one of our following representatives to find out about the new weather products, or check back on our website product guide: Patricia Ricci : (646) 792-2624 : Patricia.Ricci@intcx.com <<mailto:patricia.ricci@intcx.com>> Mike O'Neill : (646) 792-2626 : Michael.Oneill@intcx.com <<mailto:michael.oneill@intcx.com>> Chris D'Ambrosio : (646) 792-2625 : chris.dambrosio@intcx.com <<mailto:chris.dambrosio@intcx.com>>

John,

As per our discussion of this afternoon, I am noting below the points that we have discussed and agreed with respect to IP transport products, which were originally set-up for video taping purpose for the analyst meeting on 24 January 2001.

As per your request, we will set-up the IP transport products in the product manager in such a manner so that they can be traded in the future, which will be some time next week, contingent upon 3 conditions to which you have already agreed.

1. The new GTCs and the product descriptions have to conform with each other (we are in the process of checking this).
2. For the foreseeable future, the products have to be displayed on EnronOnline on daily basis (with the exception of holidays) with relevant prices and must be made available for trading with approved counter-parties .
3. As I mentioned to you over the phone, in essence this is a full scale launch. Therefore, the cost associated with the launch of IP transports products will be similar to that for any other standard launch (about US\$ 250,000). Further details on this will be provided to you shortly. Obviously any cost that your group has already incurred for the analyst demo will be netted off against the total cost of launch.

As I also explained to you that the normal operational procedure for EnronOnline mandates that any changes with respect to system/database take place over the weekend. However, as you have indicated the necessity and the urgency of giving the reading rights to your counter-parties by Friday, we will endeavour to do so. However, this will require substantial deployment of additional resources to ensure that we do not compromise the integrity of EnronOnline system while fulfilling your request.

If you have any questions, please let know.

Naveed
