From: Khanna, Sanjeev Sent: Monday, August 20, 2001 2:06 PM To: Zufferli, John; Richey, Cooper Subject: AIS Demand Swap

John/Cooper:

Just to keep you informed, we are progressing towards launching the AIS Demad Swap. As discussed I have a target date of Sep 30, 01 to launch this product.

Per your suggestions, we have changed the product from a peak to flat (7x24).

John, we are planning to meet and educate counterparties in Alberta to market this product. Do you think brokers are going to play a role in this? Please let me know. If yes then we will educate them on this product as well.

If you think of some thing that we need to take care of at this time, please let me know.

Thanks,

Sanjeev

Sanjeev K Khanna Email: Sanjeev.Khanna@enron.com Director Tel: (713) 853-3849 Enron Global Markets Cell: (713) 594-1832 1400 Smith Street, Suite 3004F Pager: (877) 497-1217 Houston TX 77002 Fax: (713) 646-3220

File	zufferli-j/sent_items/303.

This is not just a July 6 issue. Before June 29, my 2nd order effects have been less than 15000 CDN\$.

For the following days, my 2nd order effects have been:

June 29 C\$ (216,729) July 2 C\$ (140,533) July 3 C\$ (212,285) July 5 C\$ (117,156) July 6 C\$ (385,535) July 9 C\$ (264,504)

What is going on? Can you explain ?

-----Original Message-----

From: Meira, Marcelo Sent: Tuesday, July 10, 2001 3:09 PM To: Zufferli, John Cc: Postlethwaite, John; Reeves, Kathy; Gupta, Sanjay; Lee, Norman; Yang, Zhiyun; Chen, Hai Subject: High 2nd order for deal 638008 - July 6 X July 5

The following is a summary of our findings regarding the high 2nd order for option deal 638008 , effective date July 6, previous date July 5:

The total deal daily change: -172899 is correct. The historical greeks and curve shift are correct. They add up to -62084. The daily liquidation value [196872] is not correct, and is pushing the 2nd order to a very high (highly negative) amount. Upon examining the option liquidation report, we find that there is \$43680 in liquidation and \$153192 in expiring options. This totals to \$196872. The issue is, the expiring options are no longer part of the option's effective date value, and they were part of the previous date's value (since they hadn't expired yet). Therefore, the liquidation values should be: Liq: \$43680 Expired: -\$153198

which totals to a negative value of -109512. If we use this value (-109512) in the daily liquidation column (which arguably could be split between liquidation and expiry) instead of the current value (196872), which results in a second order value of -1297.

We are still discussing the causes and implications of this issue. Please let us know if you have any further questions or if you have any issues with this explanation.

Subject: PIRA and Enron

Danielle,

PIRA had two agreements in place with Enron. The first was with Enron Global Markets, which received the following PIRA Services:

- North American Natural Gas Retainer Service - North American Electricity Retainer Service - Global Oil Retainer Service
- European Natural Gas Retainer Service - Emissions Market Intelligence Services (EMIS) - NOX /SO2/CO2 coverage - Natural Gas Liquids (NGL) Forecast - covering U.S./Europe - Daily Electricity Demand Forecast - Western Canada Crude Price Forecast and PADD II Balances report

PIRA served the following four offices:

1400 Smith Street Houston, TX 77251

121 SW Salmon Street Portland, OR 97214

3500-400 3rd Ave SW Calgary, Alberta T2P 4H2 Canada

44 Grosvenor Place London United Kingdom

The Users at Enron Global Markets were divided up as follows:

100 Users - Oil, Natural Gas, and Electricity Retainers (Houston, London, Calgary, Portland) 10 - European Natural Gas Service (London only) 10 - Natural Gas Liquids Market Forecast (Houston only) 10 - Emissions Market Intelligence Services (Houston only) 25 - Daily Electricity Demand Forecast (Houston and Portland only) 10 - W. Canadian Crude Price Forecast and PADD II Balances Report (London and Houston only)

The second account we had with Enron was with Enron Energy Services. Under this contract, we provided the Oil, Natural Gas, and Electricity Retainer Services to 10 Users located at

1400 Smith Street Houston, TX 77002-7361

I hope this helps. Please contact me if you have any questions.

Regards,

Jeff Steele Manager, Business Development PIRA Energy Group (212) 686-6808, ext. 331 jsteele@pira.com

Upcoming Conferences	
Sender	lmrig@qwest.net
Recipients	['undisclosed-recipient'.'.@enron@enron.com']
File	zufferli-j/deleted_items/93.

Transmission Expansion and Systems in Transition Conference Feb. 5-8, 2002, Miami, Florida

OVERVIEW

This conference will examine the business and regulatory challenges to U.S. electric systems in transition in effectively expanding transmission capacity to meet new demands in the larger and more competitive regional markets emerging under FERC's RTO initiatives. The conference will review the parameters of these challenges and possible solutions to them. It will examine technology options and new business models for transmission expansion. It will analyze emerging proposals for effective transmission planning and pricing, including market-based pricing alternatives to FERC's traditional pricing methods. The conference will also discuss what it will take in legislative action and regulatory initiative to achieve an efficient regime for ensuring that the nation has a reliable grid and regional trading system.

The brochure for the Conference and associated Workshops can be obtained by clicking on the link below:http://www.euci.com/pdf/trans_expn.pdf

Electricity Market Design Conference

March 25-26, 2002, Atlanta, Georgia

OVERVIEW

This Conference will focus on how to design competitive electricity markets that maximize the benefits to consumers while at the same time maintaining the financial viability of companies participating in these markets.

The brochure for the Electricity Market Design Conference, March 25-26, 2002, Wyndham Hotel Downtown, Atlanta, GA can be obtained by clicking on the link below:<http://www.euci.com/pdf/MrktDesgn.pdf>

Power Generation Asset and Portfolio Management Conference

March 26-28 2002, Atlanta, Georgia

OVERVIEW

This conference will highlight the commonalties and common applications between the asset management processes used throughout the enterprise. The conference will emphasize the need to link the physical power generation asset

management processes to the activities and processes of the trading and marketing process. The processes of Asset management will be addressed from three distinct perspectives, first, the long-term perspective of portfolio developers, second the more medium term perspective of maintenance/system planners and third the conference will link short term issues of the trading & marketing departments. The purpose is to show how these processes can be integrated to the individual assets (plants) in order to provide consistent and profitable strategies for the generation asset owner.

The brochure for the Power Generation Asset and Portfolio Management Conference, March 26-28, 2002, Wyndham Hotel Downtown, Atlanta, GA can be obtained by clicking on the link below: <http://www.euci.com/pdf/powergeneration.pdf>

Ancillary Services Conference

April 10-12, 2002, Denver, Colorado

OVERVIEW

As more and more regions in North America open wholesale markets to competition, the importance of ancillary services is increasingly recognized. These services, generally provided by the same generators that produce the competitive energy product, are vital for both commerce and reliability.

This conference will cover the key engineering, economic, market, and policy issues associated with these functions. The conference will also present updates on the status of the various markets (including market design and operation problems and their solutions, successes, prices and costs) in North America. These markets include New England, New York, PJM, ERCOT, and Alberta. Developing markets, such as Ontario, will also be covered. The market designs encompass issues such as day-ahead scheduling, real-time operation, integration with the markets for energy and congestion, measuring the real-time delivery of these services, the operating costs to produce these services, and the potential for customer loads to supply these services.

The brochure for the Ancillary Services Conference, April 10-12, 2002, Wyndham Hotel - Tech Center, Denver, CO can be obtained by clicking on the link below:http://www.euci.com/pdf/anc_svcs.pdf

Please print the brochure and fax the registration form back to us at 303-741-0849 if you would like to attend any of these events. You can also register by calling us at 303-770-8800 or online.

We have updated our website to include new conference proceedings on recently-held "Electric Power Market Performance", "Performance-Based Ratemaking", "Ancillary Services", "Performance Management for Electric Distribution Companies", "Power Generation Asset Management", and "Power T&D Asset Management" conferences. Please visit www.euci.com and review the conference proceedings section for these and other proceedings.

Kindly forward this announcement to your colleagues who might benefit from attending these events.

As most of you already know I am leaving Enron after five years to go to Harvard MBA School. My times at Enron have been beyond the expectations that I had when I stepped into trading hourly power at odd hours of the night when I first became an Enron analyst. Since the very beginning, Enron has given me the chance to demonstrate my talents and the chance to prove myself. No other company would have given those chances at such a young age. I like to think that I repaid the favor to at least some degree and am leaving Enron a little stronger than it would have otherwise been.

Even though I contemplated several other opportunities to leave over the last five years, I never left for another company. I came to realize that the people that work here are the best, and I have always strived to be among the best. Aside from the professional skills and energy, the people here have become good friends of mine. Enron is among the best corporations in the world because of the high quality of people that we have attracted over the years.

Special thanks to Jim Fallon, Jeff Golden, Mark Muller, Dave Delainey, Kevin Presto, and Rogers Herndon, all of whom have provided me direction and excellent leadership during my time here.

Please find my forwarding email address, phone numbers, and address. If any of you need anything or come to Boston please look me up, I will always buy the first beer! Good luck to you all.

Your friend,

John

Recipients	['karim.punja@enron.com']
File	zufferli-j/sent_items/294.

The total 2nd order up to and including July 16 is (1,891,851)

-----Original Message-----

From: Punja, Karim Sent: Tuesday, July 17, 2001 4:35 PM To: Zufferli, John Subject: RE: Option liq

John,

I just got of the phone with Postlethwaite and he said we will make the adjustment tommorow morning before the final dpr #'s, the correction should add approx. \$1.5 million in P&L. Sorry for the delay in resolving the issue.

I also found out that you had no liquidations in June and had \$22,000 in liquidations in May in your options book (these amounts do not take into consideration any premiums)

Do these #'s seem right to you??? (I am going off what Postlethwaite has told me).

-----Original Message-----

From: Zufferli, John Sent: Tuesday, July 17, 2001 3:34 PM To: Punja, Karim Subject: RE: Option liq

Karim, I don't want to wait till month end, let's adjust the numbers now and for the June 29 2nd order, lets take that value into June since it relates to July puts.

-----Original Message-----

From: Punja, Karim Sent: Tuesday, July 17, 2001 2:23 PM To: Postlethwaite, John; Meira, Marcelo Cc: Gupta, Sanjay; Chen, Hai; Zufferli, John Subject: RE: Option liq

Hi everyone,

I just got of the phone with Hai and he told me how to make an adjustment on a day to day basis in regards to incorrect liquidations but he also explained this is just to make the daily P&L #'s right, if nothing were done the month end P&L would still somehow work out because adjustments would be made. Does this mean that for June and for a certain portion of July we should not do anything and just make adjustments on a going forward basis (and assume everything will work out at month end)? If this is the case I would like someone to walk me through June to see if the numbers did really work themselves out as there was a large swing in second order on June 29 that was not adjusted for.

Let me know if one of you could help me do this. Karim.

-----Original Message-----

From: Postlethwaite, John Sent: Tuesday, July 17, 2001 2:09 PM To: Meira, Marcelo Cc: Gupta, Sanjay; Punja, Karim; Chen, Hai Subject: RE: Option liq

Evidently, this a problem that Stacey White has been aware of for a couple of months now. There was a change made in the coding for the delta position and this has somehow messed up the liq value.

John

-----Original Message-----

From: Meira, Marcelo Sent: Tuesday, July 17, 2001 1:07 PM To: Postlethwaite, John Cc: Gupta, Sanjay; Punja, Karim; Chen, Hai Subject: RE: Option liq

John, Karim,

I'm now looking closely at the option liquidation problems. I believe that there might be a sign-flipping problem for PUTS that 's causing this whole issue. I'll keep you posted. Karim - this's likely the explanation to your other question... I'll get back to you as soon as I have more info (hopefully later today)

From: Postlethwaite, John Sent: Tuesday, July 17, 2001 1:28 PM To: Meira, Marcelo Cc: Gupta, Sanjay; Punja, Karim Subject: Option liq

The post id I am looking at for Calgary is 11608. I am looking at the option liquidation report and all of the \$65 puts are in the money and the \$75 call is also in the money. Shouldn't all the liquidation values from the beginning of the month be a negative (representing positive liquidation) for the puts? The liq value for the call is CORRECT.

I had taken an "old" boyfriend backpacking; he brought a= long a fly rod. I think he had just started fly fishing. I tried it out af= ter watching him for a while and I liked it. It reminded me of Tai Chi and= meditation - flowing water, fresh air - it felt so natural. So when we= returned from our trip I told my boyfriend that I wanted to fly fish. He = replied, "You don't know how." Instantly the tomboy in me rose to the cha= llenge. Growing up with three brothers, it was a conditioned response. I h= ad to prove to this boy that I could indeed fly fish if I wanted to. So I= said, "I'll learn." And a few weeks later an old timer in Arizona gave me= an old rod, a Reel O'Matic and my first casting lesson. I was hooked and= ready to prove myself to the guys. With a good year of fishing under my = belt, I found myself at the Santa Ynez River early one morning; no one aro= und yet, big pools, bubbling water, a golden eagle cruising up the river, = silence. I was fishing a hole with trout and smallmouth bass in it. All a= lone, my mind wandered, and I was soon asking myself whether or not I trul= y enjoyed fishing, or whether I was just trying to be better than the boys= . I contemplated this thought while casting, the line unrolling rhythmical= ly on each forward and back cast. And I felt so very present, in the now,= in peaceful solitude with my world, breathing deep and then? Fish on! An= d the answer was yes. I love this. I love the way I feel after a day of fi= shing, as though I had spent the whole day meditating. I feel fresh and li= ke a kid again, all sun-baked and dirty after a day rock hopping up a cre= ek. I enjoy most the solitude. Even if I fish with a buddy, I am still jus= t with myself, my rod and the cast, trying to come up with a recipe for ca= tching that fish. I become so peaceful fishing. And when I spot that big t= rout rising across the stream, the adrenaline rush is crazy. It's amazing = to me that I can get so excited about a fish. I realized that what had s= tarted out as me trying to be as good as the guys had become a practice in= stead. It is not a battle after all, but simply fishing: sharing tips, swa= pping stories, being part of a community. I love being a beginner. It mea= ns I have years to practice and learn about this thing called fly fishing= . And I hope I never lose that beginners mind, because it is the fuel that= pushes me further along and there is always something

new to learn. BIO = Kourtney Morgan works as a sample maker for Patagonia where she began fly= fishing. Reflecting on the sport, she says, "I do so many things I can't = say which is my favorite. RE: Stampede Rodeo for 2002 - Important, Tickets go on sale Monday

Sender	john.zufferli@enron.com
Recipients	['angela.mcculloch@enron.com']
File	zufferli-j/sent_items/245.

Power Trading will need about 6 seats.

-----Original Message-----

From: McCulloch, Angela Sent: Monday, August 13, 2001 9:54 AM To: Milnthorp, Rob; Davies, Derek; Le Dain, Eric; Zufferli, John; Hedstrom, Peggy Subject: Stampede Rodeo for 2002 - Important, Tickets go on sale Monday

July 7th - 16th are the dates for 2002 Stampede

Tickets for the 2002 Stampede Rodeo go on sale Monday, August 20 through Ticket Master. I am enquiring how may tickets we would like. Eric talked about possibly sitting in the Infield seats for our customer event or renting a suite. Suites will not be determined until the beginning of 2002 once the major corporate sponsors have decided on if they wish to lease the suite for the day. If you could please try to get back to me by Wednesday with ticket numbers. I will order tickets on Monday when Ticket Master opens.

Infield apx \$55 Regular Rodeo Seating apx \$32

Suite cost about - Super Suite - 2001 prices Rodeo Only includes 50 suite tickets for Afternoon Rodeo only July 6-13 \$13,520 July 14-15 \$14,870 Chuckwagons Only includes 50 suite tickets for Chuckwagon Races only July 6-13 \$6,760 July 14-15 \$7,435

Thanks for your request for information on the Calgary Stampede's Infield Suites. The Stampede's inventory of Infield Suites for the entire 10 days of Stampede are held by our major corporate sponsors who have licensed the suites as part of long-term contracts.

Each year, however, a very limited inventory of suites are offered back to us from some of our 10-day suiteholders in "whole-day packages" -- what that means is we receive back both the rodeo performance and chuckwagon race performance to be sold as a package.

This "return" of suite dates does not traditionally occur until the new year, when the companies begin to firm up their plans for the upcoming Stampede. Until then we maintain a waiting list of companies wishing to lease suites for a single day or days.

To be added to the wait list, I require a request in writing with all company details and preferred dates for Infield Suite use.

Please let me know if you have any other questions, I would be happy to assist.

We can have you sit down with John Disturnal, Chris Lambie and Mike Cowan in informal interviews.

-----Original Message-----

From: Leung, Victor Sent: Friday, August 24, 2001 12:38 PM To: Zufferli, John Subject: Recruiting

John

I am interested in joining the gas trading team next summer as I will be graduating from the U of C in April. I don't know if I should try going through the fall recruiting or try a different route. I have not talked to neither my superior (Peggy) nor Kathy yet.

I've been with Enron since October, but I was (will be again this fall) doing support work for Ryan Watt, and sometimes for Mike Cowan during the weekends. I work with their supply and demand models, calculate their positions, schedule gas on the Nova pipelines, and work with the Suncor and PetroCanada accounts together with the outsourcing team. Over the summer, I had the opportunity to work with Kathy's group to get some experience on the slightly more complex deal types that Enron offers.

I had an interview with McKay back in early June. However, I guess back then I was doing summer classes, the interview did not go as well as I hoped. Now with summer classes over, I was just wondering if I could try again.

Please let me know what you think and I look forward to your reply.

Kind regards,

Victor Leung

What did you have in mind, John? (3 hours??) I was thinking that he should go through the same interviews as the other candidates. Any thoughts?

-----Original Message-----

From: Leung, Victor Sent: Saturday, September 22, 2001 8:35 AM To: Doucet, Dawn Subject: Super Saturday

Dawn,

In addition to my prior e-mail, I have already had an interview with John Zufferli, John Disturnal, Mike Cowan, and Chris Lambie on September 13, 2001. The interview lasted for 3 hours! I have not heard back from any of them yet. Just wondering, would that then be considered as my first round of interview, or would that be already my "Super Thursday (Saturday)"?

I would also like to thank you for putting me as one of the potential candidates. I have attached a copy of my updated resume and a copy of my online academic record. My GPA is back to where I used to be, around the 3.3 range. Let me know if you would like me to fax in a transcript to you as well.

If you would like more information, please don't hesitate call me at 605.7568 (cell) or e-mail me at school vbleung@ucalgary.ca.

Have a wonderful week ahead!

Victor Leung

From: Dupuy, Mark Sent: Thursday, November 08, 2001 8:08 AM To: Zufferli, John Subject: FW: Promised 2001 ESBI Alberta Ltd. Customer Satisfaction Survey

Hi John, this survey looks pretty innocent. It seems to focus on customer satisfaction. Do you want to have any input to the responses. If not, I will respond and submit it.

Mark

-----Original Message-----

From: <vincent.flynn@eal.ab.ca>@ENRON Sent: Wednesday, November 07, 2001 7:17 PM To: Dupuy, Mark Subject: Promised 2001 ESBI Alberta Ltd. Customer Satisfaction Survey

Dear Mark :

Here is the Customer Satisfaction Survey promised in my October 31, 2001 letter. Your input will help improve Customer Service at ESBI Alberta Ltd. Our consultant, Praxis Research, has worked with us to develop an easy-to-use online survey that should only take about 5-10 minutes to complete.

You may complete the survey online or fax a completed printed version of the web survey to 1-403-249-8983. If you would prefer to complete the survey via telephone, please call Praxis Research at 1-888-882-1285.

To access the online survey, please click on the following Internet link: www.praxis.ca/eal/eal_survey1.htm.

We have assigned you an individual password: mad98 which you need to access the survey. If you do not complete the survey at one sitting you can use your password to re-enter the survey and finish your partially completed survey or revise your responses. (Up to Nov. 30 at which time the response period terminates and we analyze the input).

Your responses are confidential. Praxis, the independent research firm collecting the information, will aggregate all data. Comments will always be aggregated by Praxis to maintain individual confidentiality. If, however, you choose to identify yourself, EAL will be glad to respond to any specific comments you make. If you have any questions or concerns about the online survey please contact David de Lange at Praxis Research at 1-888-882-1285 or by email at delange@praxis.ca.

All participants will receive an executive summary of the survey. In addition, early in 2002 we intend to host a workshop to, among other things, develop customer service improvement initiatives in response to the survey findings.

Your participation in this survey is greatly appreciated.

Sincerely,

Vincent Flynn President and CEO ESBI Alberta Ltd.

Dear Participants:

I'm writing to provide you with an update on our progress to launch the Automated Dispatch and Messaging System, or 'ADaMS' for short. In my May 25 note I outlined the efficiency benefits of the new system, and attached a copy of our tentative implementation schedule.

Since then, we've been busy testing the product to make sure it meets the Power Pool's standards for quality, and the expectations of our participants. And to be frank, at this point in time it doesn't quite measure up. We feel we'd be jeopardizing the quality of the product to meet the timeline. And that's not the way we do business. Instead, we've decided to shift the launch to early September 2001. The change will also provide additional time for participants to prepare, especially during the summer holiday season, and allow for more one-on-one training with individual participants as requested.

Our technical staff will be contacting you in July, to ensure you can connect to the system and receive test dispatches. Also, we will contact you with a firmer implementation schedule as we approach September.

In the meantime, if you have any questions please feel free to contact either myself at (403) 233-6491, or your respective Participant Liaison listed below.

Company Name: A-E Elizabeth Vergara (403) 233-6405 elizabeth.vergara@powerpool.ab.ca

F-Z Karen Mazuryk (403) 705-8509 karen.mazuryk@powerpool.ab.ca

Thank you for your cooperation.

Sincerely, POWER POOL OF ALBERTA

Colleagues Arising from comments received from Friday to yesterday, Watt-Ex has incorporated a number of changes into this executable Version 1 of the referenced document.

We are attaching a blackline copy and clean copy of this document for your perusal. We believe we have been able to accommodate most of the change requests -- but not all. We would be pleased to respond to any comments you may have on the changes as well as those we have not included.

The key modifications from Draft 3 to this Version 1 relate to the following: 1) 3011. and 3209. Failure to Supply: Liquidated damages have been capped both for non-System Events and System Events. The original context of costs attributable to liquidated damages included WSCC penalties -- the caps serve to limit the total amount of liquidated damages claimed against the failed supplier. In addition, the penalties under (b) (i) in both sections have been removed. 2) 204. Code of Conduct: This section has been beefed up to provide a directive concerning any potential market manipulation that could cause WSCC penalties to be applied. 3) 116. Mediation and Arbitration Procedure: The Mediation procedure has been modified to allow the parties the option of proceeding directly to arbitration if they so wish and have applied a finite completion time on the process. 4) Schedule 6, 6000. General: Applied direction of applicability of sections to Transmission Administrator 5) 6004.08 Additional Security: Due to exposure on liquidated damages, Watt-Ex is requiring that Sellers post security for same within 90 days (this is roughly timed for October trading) unless there is sufficient Receivables to cover.

We would again request your indulgence to review and execute this Version 1 as soon as possible. In this regard, we request that customers complete pages 1-3 of the document plus individual Schedule 2's for each Ancillary Service Facility and fax a signed copy of pages 1-3 plus the Schedule 2's to Watt-Ex to immediately activate your trading privileges. Please mail the originals to Watt-Ex, we will execute and return your file copy.

If there are any outstanding items you wish to have considered/reconsidered, Watt-Ex will accept such written comments for consideration in a future version of this Customer Document.

Watt-Ex is also prepared to provide any of the following documents if it will assist you in attaining comfort with all the attendant infrastructure surrounding the operations of the Exchange. Please advise if you wish a copy of any/all of these documents.

1) Alberta Securities Commission Exemption Order 2) The NCM insurance binder document for the credit backstop arrangements 3) Deposit Agreement with Watt-Ex's Trustee, Royal Trust Corporation of Canada 4) Confirmation of ESBI Alberta Ltd.'s Credit Approval to \$20 million.

If you have any questions or comments, please contact the undersigned by return e-mail or call 403-210-8222, 403-210-2144 or 780-940-2820 (cell). Thanks Doug Andrews

<http://www.quantrisk.com/workshop.htm>

Gentlemen,

Besides the upcoming workshop we are organizing in Calgary, I would like to bring to your attention some of the software technologies we are developing for Energy Risk management in Calgary.

Our technology is Modular (multithreaded C++ DLLs) and can be integrated into yours with great ease. More generally, the cost of software development is quite lower in Canada, I would also like to explore the possibility of outsourcing some of your development: we have a strong analytics team: 3 PhD in Numerical and applied math (all of us are well established Profs at the University), and a software team ...

I have included a document describing our products.

Regards, ali lari lavassani -- Dr Ali Lari-Lavassani, President and CEO QuantRisk.com (www.quantrisk.com) Suite 1700, East Tower, Energy Plaza 311, 6th Avenue S.W. -----Original Message-----

From: "BRYAN DUGUID" <bryan.duguid@blakes.com>@ENRON Sent: Tuesday, January 29, 2002 10:22 PM To: Johnston, Greg Subject: Action List (ECC)_v1.DOC

Greg,

Further to my email to you earlier today, we have tracked down the reasons for the discrepancies in the termination dates in your list versus the chart we have prepared. In many instances, that contract was reviewed by BCG, and it was determined that the wrong termination date was set, given the provisions of the contract. I understand that a memo with respect to this issue likely was forwarded to ECC by Chris Christopher and John Eamon on January 8, 2002 (a copy of which is attached), which set out that based on our review of the contracts, the following parties and their proper termination dates are:

AEC Marketing, physical, gas - February 1, 2002 Calpine Canada Natural Gas Partnership (Encal) physical, gas - February 1, 2002 El Paso Merchant Energy, physical gas - February 1, 2002 Williams Energy Marketing & Trade Co. - February 1, 2002

Our review last night also revealed the following: Baytex physical, gas- ECC list says terminated January 6/02, but the January 4/02 letter from ECC set a termination date of January 8/02, which is reflected in the Chart

Marathon Canada Limited physical, gas - ECC list says terminated December 18/01, however the chart suggests that this was revised by a letter from ECC, sent December 31, 01, changing the termination date to January 4/02. Chris Christopher recalls the letter, but we do not have a copy of that letter.

Calpine Canada Natural Gas Partnership (Orbit) physical, gas - we have reviewed the contract and determined that the chart is incorrect. It has been changed from February 1/02 to December 18/01, as set out in the ECC list.

I understand that you have reviewed the Cinergy contract and determined the reason for the discrepancy in that instance.

We continue our review of a couple of entries, namely Canadian Natural Resources, Talisman Energy Inc, and Dynegy Canada. The remainder of the list was either consistent with the Chart, or had no entry and was therefore updated with your information.

Thank you for forwarding this to our attention.

As I have discussed with many of you, we are revising the Power Pool Supply Shortfall Procedures (POP 801) in accordance with Transmission Operating Policy OP-107. POP 801 contains several steps from the time all the energy in the energy market merit order has been dispatched up, to the time when a firm load directive will be issued by the System Controller to curtail firm load. In order to gather the information required to develop the procedure, would you please answer the following questions. Any action you choose to take is on a voluntary and best effort basis, without any obligation on your behalf.

In an effort to reduce the amount of, or possibility of having to issue, a firm load directive to curtail load, would you please reply whether you will comply with any of the following requests from the System Controller prior to the issuing of a firm load directive to curtail load. Please reply not applicable (N/A) to the questions that do not apply to you. If you will comply to any of these requests, we will include the request(s) in the steps identified in POP 801. Also, if you will comply to any of these requests, please indicate the appropriate party for the System Controller to contact. If you choose not to comply with any of these requests please reply that you will not. This will let us know not to make a request for something that will not be provided, which otherwise could cause confusion and waste valuable time during the management of this type of an event.

1. Would you provide available generation energy that was not offered into the energy market merit order if requested to do so by the System Controller prior to a firm load directive to curtail load?

Name of Plant: Response (Y/N): If yes, please indicate who the System Controller is to contact:

Name of Plant: Response (Y/N): If yes, please indicate who the System Controller is to contact:

Name of Plant: Response (Y/N): If yes, please indicate who the System Controller is to contact:

2. Would you reduce non-essential station service loads at your plant(s) if requested to do so by the System Controller prior to a firm load directive to curtail load?

Name of Plant: Response (Y/N): If yes, please indicate who the System Controller is to contact:

Name of Plant: Response (Y/N): If yes, please indicate who the System Controller is to contact:

Name of Plant: Response (Y/N): If yes, please indicate who the System Controller is to contact:

3. Would you reduce non-essential drag line loads (if applicable) if requested to do so by the System Controller prior to a firm load directive to curtail load?

Location: Response (Y/N): If yes, please indicate who the System Controller is to contact:

Location: Response (Y/N): If yes, please indicate who the System Controller is to contact:

4. Would you provide a 3% (or another value) reduction in distribution voltage if requested to do so by the System Controller prior to a firm load directive to curtail load?

Name of Wire Service Provider:

If yes, please indicate who the System Controller is to contact:

Please email or fax your response to me by December 12. If you have any questions please contact me. Your reply (either way) is appreciated.

Thank you, Ken Gardner Pool Code Analyst Power Pool of Alberta Phone: (403) 233-6416 Fax: (403) 543-0388

The implementation of the Automated Dispatch Messaging System (ADMS) from the Power Pool of Alberta is proceeding on schedule, however, the processes for implementation and training are changing slightly as described below. The purpose of this memo is to inform all of the participants who have been contacted for the implementation of ADMS of the processes over the next few weeks and the requirements for the implementation at your dispatch locations.

Beginning the week of July 2, 2001 and continuing through July 13, 2001, Power Pool staff will be contacting you individually to provide you with your username and password and ensure that you are able to log into the web site. This initial web site will be on a development system that is not connected to the active market system. This will enable participants to log onto the system to become familiar with the screens and user features as well as receive test dispatches.

Beginning the week of July 16, 2001, the Power Pool will turn off the development system web server and transfer to the active market system. The System Controller area will contact each participant and "walk you through" the screens and answer any questions that you may have regarding use of the system. Once you are familiar with the system through this

conversation, future active dispatches will then be provided over the ADMS system. The sequential addition of participants to the system will enable the orderly transfer from the voice dispatch process to the automated process with a minimum of disruption in the dispatch process.

The above process changes the manner in which training will be provided. In reviewing the user screens, we believe that participants will be able to understand how to use the system simply by having access to the system prior to the implementation. If there are any difficulties encountered using the system, the System Controllers will be available to assist you with any questions as your users begin to use the dispatch system.

The majority of you have indicated that your computer equipment is in place and that you are ready to start implementation. If you are unable to start the implementation process on July 2, 2001, please let the Power Pool contact know and he will arrange to schedule your user names, passwords and access closer to July 16, 2001.

The implementation of digital certificates to enhance the security of the system will be delayed for a short period of time to enable a newer and simpler digital certificate system. We believe that by implementing without the digital certificates, fewer implementation problems will be encountered and will also simplify the digital certificate installation process with users at a later date. Our implementation of username and password protection combined with server certification provides adequate security in the short term before the digital certificates are incorporated.

As we discussed, the system provides audible alerts for the users when a dispatch is received. I am attaching six files that contain audible alert sounds for you to load on your computers. To install these .wav files on your computers, create a folder C:\PPOA\admin_sounds and copy these files to the new folder. Your internet browser will then use these files for the audible alerts that are provided by the system. You can review this with the person who will be contacting you with usernames and passwords if there is difficulty implementing these alert sounds.

As the implementation portion of the ADMS project moves to the operational area of the Power Pool, contact points with the Power Pool will change. Effective immediately, would you please use the following contact names for work on the ADMS implementation.

Primary contact: Jack Kelly (403) 233-6410 jack.kelly@powerpool.ab.ca <mailto:jack.kelly@powerpool.ab.ca>

Secondary contact: Jerry Mossing (403) 233-6409 jerry.mossing@powerpool.ab.ca
<mailto:jerry.mossing@powerpool.ab.ca>

Thank you very much for your cooperation in getting this system underway.

Barry Rushford
